Piled with cotton-bales, from many a plantation, up over deck and sides, till she seems in the distance a square, massive block of gray, she moves heavily onward to the nearing mart. We must look some time among its crowded decks before we shall find again our humble friend Tom. High on the upper deck, in a little nook among the everywhere predominant cotton-bales, at last we may find him.

Partly from confidence inspired by Mr. Shelby’s representations, and partly from the remarkably inoffensive and quiet character of the man, Tom had insensibly won his way far into the confidence even of such a man as Haley.

At first he had watched him narrowly through the day, and never allowed him to sleep at night unfettered; but the uncomplaining patience and apparent contentment of Tom's manner led him gradually to discontinue these restraints, and for some time Tom had enjoyed a sort of parole of honor, being permitted to come and go freely where he pleased on the boat.

Ever quiet and obliging, and more than ready to lend a hand in every emergency which occurred among the workmen below, he had won the good opinion of all the hands, and spent many hours in helping them with as hearty a good will as ever he worked on a Kentucky farm.

When there seemed to be nothing for him to do, he would climb to a nook among the cotton-bales of the upper deck, and busy himself in studying over his Bible,—and it is there we see him now.

For a hundred or more miles above New Orleans, the river is higher than the surrounding country, and rolls its tremendous volume between massive levees twenty feet in height. The traveller from the deck of the steamer, as from some floating castle top, overlooks the whole country for miles and miles around. Tom, therefore, had spread out full before him, in plantation after plantation, a map of the life to which he was approaching.

He saw the distant slaves at their toil; he saw afar their villages of huts gleaming out in long rows on many a plantation, distant from the stately mansions and pleasure-grounds of the master;—and as the moving picture passed on, his poor, foolish heart would be turning backward to the Kentucky farm, with its old shadowy beeches,—to the master's house, with its wide, cool halls, and, near by, the little cabin overgrown with the multiflora and bignonia. There he seemed to see familiar faces of comrades who had grown up with him from infancy; he saw his busy wife, bustling in her preparations for his evening meals; he heard the merry laugh of his boys at their play, and the chirrup of the baby at his knee; and then, with a start, all faded, and he saw again the canebrakes and cypresses and gliding plantations, and heard again the creaking and groaning of the machinery, all telling him too plainly that all that phase of life had gone by forever.

In such a case, you write to your wife, and send messages to your children; but Tom could not write,—the mail for him had no existence, and the gulf of separation was unbridged by even a friendly word or signal.

Is it strange, then, that some tears fall on the pages of his Bible, as he lays it on the cotton-bale, and, with patient finger, threading his slow way from word to word, traces out its promises? Having learned late in life, Tom was but a slow reader, and passed on laboriously from verse to verse. Fortunate for him was it that the book he was intent on was one which slow reading cannot injure,—nay, one whose words, like ingots of gold, seem often to need to be weighed separately, that the mind may take in their priceless value. Let us follow him a moment, as, pointing to each word, and pronouncing each half aloud, he reads,

"Let—not—your—heart—be—troubled. In—my—Father's—house—are—many—mansions.
I—go—to—prepare—a—place—for—you."

Cicero, when he buried his darling and only daughter, had a heart as full of honest grief as poor Tom's,—perhaps no fuller, for both were only men;—but Cicero could pause over no such sublime words of hope, and look to no such future reunion; and if he _had_ seen them, ten to one he would not have believed,—he must fill his head first with a thousand questions of authenticity of manuscript, and correctness of translation. But, to poor Tom, there it lay, just what he needed, so evidently true and divine that the possibility of a question never entered his simple head. It must be true; for, if not true, how could he live?

As for Tom's Bible, though it had no annotations and helps in margin from learned commentators, still it had been embellished with certain way-marks and guide-boards of Tom's own invention, and which helped him more than the most learned expositions could have done. It had been his custom to get the Bible read to him by his master's children, in particular by young Master George; and, as they read, he would designate, by bold, strong marks and dashes, with pen and ink, the passages which more particularly gratified his ear or affected his heart. His Bible was thus marked through, from one end to the other, with a variety of styles and designations; so he could in a moment seize upon his favorite passages, without the labor of spelling out what lay between them;—and while it lay there before him, every passage breathing of some old home scene, and recalling some past enjoyment, his Bible seemed to him all of this life that remained, as well as the promise of a future one.

Among the passengers on the boat was a young gentleman of fortune and family, resident in New Orleans, who bore the name of St. Clare. He had with him a daughter between five and six years of age, together with a lady who seemed to claim relationship to both, and to have the little one especially under her charge.

Tom had often caught glimpses of this little girl,—for she was one of those busy, tripping creatures, that can be no more contained in one place than a sunbeam or a summer breeze,—nor was she one that, once seen, could be easily forgotten.

Her form was the perfection of childish beauty, without its usual chubbiness and squareness of outline. There was about it an undulating and aerial grace, such as one might dream of for some mythic and allegorical being. Her face was remarkable less for its perfect beauty of feature than for a singular and dreamy earnestness of expression, which made the ideal start when they looked at her, and by which the dullest and most literal were impressed, without exactly knowing why. The shape of her head and the turn of her neck and bust was peculiarly noble, and the long golden-brown hair that floated like a cloud around it, the deep spiritual gravity of her violet blue eyes, shaded by heavy fringes of golden brown,—all marked her out from other children, and made every one turn and look after her, as she glided hither and thither on the boat. Nevertheless, the little one was not what you would have called either a grave child or a sad one. On the contrary, an airy and innocent playfulness seemed to flicker like the shadow of summer leaves over her childish face, and around her buoyant figure. She was always in motion, always with a half smile on her rosy mouth, flying hither and thither, with an undulating and cloud-like tread, singing to herself as she moved as in a happy dream. Her father and female guardian were incessantly busy in pursuit of her,—but, when caught, she melted from them again like a summer cloud; and as no word of chiding or reproof ever fell on her ear for whatever she chose to do, she pursued her own way all over the boat. Always dressed in white, she seemed to move like a shadow through all sorts of places, without contracting spot or stain; and there was not a corner or nook, above or below, where those fairy footsteps had not glided, and that visionary golden head, with its deep blue eyes, fleeted along.

The fireman, as he looked up from his sweaty toil, sometimes found those eyes looking wonderingly into the raging depths of the furnace, and fearfully and pityingly at him, as if she thought him in some dreadful danger. Anon the steersman at the wheel paused and smiled, as the picture-like head gleamed through the window of the round house, and in a moment was gone again. A thousand times a day rough voices blessed her, and smiles of unwonted softness stole over hard faces, as she passed; and when she tripped fearlessly over dangerous places, rough, sooty hands were stretched involuntarily out to save her, and smooth her path.

Tom, who had the soft, impressible nature of his kindly race, ever yearning toward the simple and childlike, watched the little creature with daily increasing interest. To him she seemed something almost divine; and whenever her golden head and deep blue eyes peered out upon him from behind some dusky cotton-bale, or looked down upon him over some ridge of packages, he half believed that he saw one of the angels stepped out of his New Testament.

Often and often she walked mournfully round the place where Haley's gang of men and women sat in their chains. She would glide in among them, and look at them with an air of perplexed and sorrowful earnestness; and sometimes she would lift their chains with her slender hands, and then sigh wofully, as she glided away. Several times she appeared suddenly among them, with her hands full of candy, nuts, and oranges, which she would distribute joyfully to them, and then be gone again.

Tom watched the little lady a great deal, before he ventured on any overtures towards acquaintanceship. He knew an abundance of simple acts to propitiate and invite the approaches of the little people, and he resolved to play his part right skilfully. He could cut cunning little baskets out of cherry-stones, could make grotesque faces on hickory-nuts, or odd-jumping figures out of elder-pith, and he was a very Pan in the manufacture of whistles of all sizes and sorts. His pockets were full of miscellaneous articles of attraction, which he had hoarded in days of old for his master's children, and which he now produced, with commendable prudence and economy, one by one, as overtures for acquaintance and friendship.

The little one was shy, for all her busy interest in everything going on, and it was not easy to tame her. For a while, she would perch like a canary-bird on some box or package near Tom, while busy in the little arts afore-named, and take from him, with a kind of grave bashfulness, the little articles he offered. But at last they got on quite confidential terms.

"What's little missy's name?" said Tom, at last, when he thought matters were ripe to push such an inquiry.

"Evangeline St. Clare," said the little one, "though papa and everybody else call me Eva. Now, what's your name?"

"My name's Tom; the little chil'en used to call me Uncle Tom, way back thar in Kentuck."

"Then I mean to call you Uncle Tom, because, you see, I like you," said Eva. "So, Uncle Tom, where are you going?"

"I don't know, Miss Eva."

“Don’t know?” said Eva.

“No, I am going to be sold to somebody. I don’t know who.”

“My papa can buy you,” said Eva, quickly; “and if he buys you, you will have good times. I mean to ask him, this very day.”

“Thank you, my little lady,” said Tom.

The boat here stopped at a small landing to take in wood, and Eva, hearing her father’s voice, bounded nimbly away. Tom rose up, and went forward to offer his service in wooding, and soon was busy among the hands.

Eva and her father were standing together by the railings to see the boat start from the landing-place, the wheel had made two or three revolutions in the water, when, by some sudden movement, the little one suddenly lost her balance and fell sheer over the side of the boat into the water. Her father, scarce knowing what he did, was plunging in after her, but was held back by some behind him, who saw that more efficient aid had followed his child.

Tom was standing just under her on the lower deck, as she fell. He saw her strike the water, and sink, and was after her in a moment. A broad-chested, strong-armed fellow, it was nothing for him to keep afloat in the water, till, in a moment or two the child rose to the surface, and he caught her in his arms, and, swimming with her to the boat-side, handed her up, all dripping, to the grasp of hundreds of hands, which, as if they had all belonged to one man, were stretched eagerly out to receive her. A few moments more, and her father bore her, dripping and senseless, to the ladies’ cabin, where, as is usual in cases of the kind, there ensued a very well-meaning and kind-hearted strife among the female occupants generally, as to who should do the most things to make a disturbance, and to hinder her recovery in every way possible.

It was a sultry, close day, the next day, as the steamer drew near to New Orleans. A general bustle of expectation and preparation was spread through the boat; in the cabin, one and another were gathering their things together, and arranging them, preparatory to going ashore. The steward and chambermaid, and all, were busily engaged in cleaning, furbishing, and arranging the splendid boat, preparatory to a grand entree.

On the lower deck sat our friend Tom, with his arms folded, and anxiously, from time to time, turning his eyes towards a group on the other side of the boat.

There stood the fair Evangeline, a little paler than the day before, but otherwise exhibiting no traces of the accident which had befallen her. A graceful, elegantly-formed young man stood by her, carelessly leaning one elbow on a bale of cotton while a large pocket-book lay open before him. It was quite evident, at a glance, that the gentleman was Eva’s father. There was the same noble cast of head, the same large blue eyes, the same golden-brown hair; yet the expression was wholly different. In the large, clear blue eyes, though in form and color exactly similar, there was wanting that misty, dreamy depth of expression; all was clear, bold, and bright, but with a light wholly of this world: the beautifully cut mouth had a proud and somewhat sarcastic expression, while an air of free-and-easy superiority sat not ungracefully in every turn and movement of his fine form. He was listening, with a good-humored, negligent air, half comic, half contemptuous, to Haley, who was very volubly expatiating on the quality of the article for which they were bargaining.

“All the moral and Christian virtues bound in black Morocco, complete!” he said, when Haley had finished. “Well, now, my good fellow, what’s the damage, as they say in Kentucky; in short, what’s to be paid out for this business? How much are you going to cheat me, now? Out with it!”

“Wal,” said Haley, “if I should say thirteen hundred dollars for that ar fellow, I shouldn’t but just save myself; I shouldn’t, now, re’ly.”

“Poor fellow!” said the young man, fixing his keen, mocking blue eye on him; “but I suppose you’d let me have him for that, out of a particular regard for me.”

“Well, the young lady here seems to be sot on him, and nat’lly enough.”

“O! certainly, there’s a call on your benevolence, my friend. Now, as a matter of Christian charity, how cheap could you afford to let him go, to oblige a young lady that’s particular sot on him?”

“Wal, now, just think on ’t,” said the trader; “just look at them limbs,—broad-chested, strong as a horse. Look at his head; them high forrads allays shows calculatin niggers, that’ll do any kind o’ thing. I’ve, marked that ar. Now, a nigger of that ar heft and build is

worth considerable, just as you may say, for his body, supposin he's stupid; but come to put in his calculatin faculties, and them which I can show he has oncommon, why, of course, it makes him come higher. Why, that ar fellow managed his master's whole farm. He has a strornary talent for business."

"Bad, bad, very bad; knows altogether too much!" said the young man, with the same mocking smile playing about his mouth. "Never will do, in the world. Your smart fellows are always running off, stealing horses, and raising the devil generally. I think you'll have to take off a couple of hundred for his smartness."

"Wal, there might be something in that ar, if it warnt for his character; but I can show recommends from his master and others, to prove he is one of your real pious,—the most humble, prayin, pious crittur ye ever did see. Why, he's been called a preacher in them parts he came from."

"And I might use him for a family chaplain, possibly," added the young man, dryly. "That's quite an idea. Religion is a remarkably scarce article at our house."

"You're joking, now."

"How do you know I am? Didn't you just warrant him for a preacher? Has he been examined by any synod or council? Come, hand over your papers."

If the trader had not been sure, by a certain good-humored twinkle in the large eye, that all this banter was sure, in the long run, to turn out a cash concern, he might have been somewhat out of patience; as it was, he laid down a greasy pocket-book on the cotton-bales, and began anxiously studying over certain papers in it, the young man standing by, the while, looking down on him with an air of careless, easy drollery.

"Papa, do buy him! it's no matter what you pay," whispered Eva, softly, getting up on a package, and putting her arm around her father's neck. "You have money enough, I know. I want him."

"What for, pussy? Are you going to use him for a rattle-box, or a rocking-horse, or what?

"I want to make him happy."

"An original reason, certainly."

Here the trader handed up a certificate, signed by Mr. Shelby, which the young man took with the tips of his long fingers, and glanced over carelessly.

"A gentlemanly hand," he said, "and well spelt, too. Well, now, but I'm not sure, after all, about this religion," said he, the old wicked expression returning to his eye; "the country is almost ruined with pious white people; such pious politicians as we have just before elections,—such pious goings on in all departments of church and state, that a fellow does not know who'll cheat him next. I don't know, either, about religion's being up in the market, just now. I have not looked in the papers lately, to see how it sells. How many hundred dollars, now, do you put on for this religion?"

"You like to be jokin, now," said the trader; "but, then, there's _sense_ under all that ar. I know there's differences in religion. Some kinds is mis'rable: there's your meetin pious; there's your singin, roarin pious; them ar an't no account, in black or white;—but these rayly is; and I've seen it in niggers as often as any, your rail softly, quiet, stiddy, honest, pious, that the hull world couldn't tempt 'em to do nothing that they thinks is wrong; and ye see in this letter what Tom's old master says about him."

"Now," said the young man, stooping gravely over his book of bills, "if you can assure me that I really can buy _this_ kind of pious, and that it will be set down to my account in the book up above, as something belonging to me, I wouldn't care if I did go a little extra for it. How d'ye say?"

"Wal, raily, I can't do that," said the trader. "I'm a thinkin that every man'll have to hang on his own hook, in them ar quarters."

"Rather hard on a fellow that pays extra on religion, and can't trade with it in the state where he wants it most, an't it, now?" said the young man, who had been making out a roll of bills while he was speaking. "There, count your money, old boy!" he added, as he handed the roll to the trader.

“All right,” said Haley, his face beaming with delight; and pulling out an old inkhorn, he proceeded to fill out a bill of sale, which, in a few moments, he handed to the young man.

“I wonder, now, if I was divided up and inventoried,” said the latter as he ran over the paper, “how much I might bring. Say so much for the shape of my head, so much for a high forehead, so much for arms, and hands, and legs, and then so much for education, learning, talent, honesty, religion! Bless me! there would be small charge on that last, I’m thinking. But come, Eva,” he said; and taking the hand of his daughter, he stepped across the boat, and carelessly putting the tip of his finger under Tom’s chin, said, good-humoredly, “Look-up, Tom, and see how you like your new master.”

Tom looked up. It was not in nature to look into that gay, young, handsome face, without a feeling of pleasure; and Tom felt the tears start in his eyes as he said, heartily, “God bless you, Mas’r!”

“Well, I hope he will. What’s your name? Tom? Quite as likely to do it for your asking as mine, from all accounts. Can you drive horses, Tom?”

“I’ve been allays used to horses,” said Tom. “Mas’r Shelby raised heaps of ’em.”

“Well, I think I shall put you in coachy, on condition that you won’t be drunk more than once a week, unless in cases of emergency, Tom.”

Tom looked surprised, and rather hurt, and said, “I never drink, Mas’r.”

“I’ve heard that story before, Tom; but then we’ll see. It will be a special accommodation to all concerned, if you don’t. Never mind, my boy,” he added, good-humoredly, seeing Tom still looked grave; “I don’t doubt you mean to do well.”

“I sartin do, Mas’r,” said Tom.

“And you shall have good times,” said Eva. “Papa is very good to everybody, only he always will laugh at them.”

“Papa is much obliged to you for his recommendation,” said St. Clare, laughing, as he turned on his heel and walked away.

CHAPTER XV Of Tom’s New Master, and Various Other Matters

Since the thread of our humble hero’s life has now become interwoven with that of higher ones, it is necessary to give some brief introduction to them.

Augustine St. Clare was the son of a wealthy planter of Louisiana. The family had its origin in Canada. Of two brothers, very similar in temperament and character, one had settled on a flourishing farm in Vermont, and the other became an opulent planter in Louisiana. The mother of Augustine was a Huguenot French lady, whose family had emigrated to Louisiana during the days of its early settlement. Augustine and another brother were the only children of their parents. Having inherited from his mother an exceeding delicacy of constitution, he was, at the instance of physicians, during many years of his boyhood, sent to the care of his uncle in Vermont, in order that his constitution might be strengthened by the cold of a more bracing climate.

In childhood, he was remarkable for an extreme and marked sensitiveness of character, more akin to the softness of woman than the ordinary hardness of his own sex. Time, however, overgrew this softness with the rough bark of manhood, and but few knew how living and fresh it still lay at the core. His talents were of the very first order, although his mind showed a preference always for the ideal and the æsthetic, and there was about him that repugnance to the actual business of life which is the common result of this balance of the faculties. Soon after the completion of his college course, his whole nature was kindled into one intense and passionate effervescence of romantic passion. His hour came,—the hour that comes only once; his star rose in the horizon,—that star that rises so often in vain, to be remembered only as a thing of dreams; and it rose for him in vain. To drop the figure,—he saw and won the love of a high-minded and beautiful woman, in one of the northern states, and they were affianced. He returned south to make arrangements for their marriage, when, most unexpectedly, his letters were returned to him by mail, with a short note from her guardian, stating to him that ere this reached him the lady would be the wife of another. Stung to madness, he vainly hoped, as many another has done, to fling the whole thing from his heart by one desperate effort. Too proud to supplicate or seek explanation, he threw himself at once into a whirl of fashionable society, and in a fortnight from the time of the fatal letter was the accepted lover of the reigning belle of the season; and as soon as arrangements could be made, he became the husband of a fine figure, a pair of bright dark eyes, and a hundred thousand dollars; and, of course, everybody thought him a happy fellow.

The married couple were enjoying their honeymoon, and entertaining a brilliant circle of friends in their splendid villa, near Lake Pontchartrain, when, one day, a letter was brought to him in _that_ well-remembered writing. It was handed to him while he was in full tide of gay and successful conversation, in a whole room-full of company. He turned deadly pale when he saw the writing, but still preserved his composure, and finished the playful warfare of badinage which he was at the moment carrying on with a lady opposite; and, a short time after, was missed from the circle. In his room, alone, he opened and read the letter, now worse than idle and useless to be read. It was from her, giving a long account of a persecution to which she had been exposed by her guardian's family, to lead her to unite herself with their son: and she related how, for a long time, his letters had ceased to arrive; how she had written time and again, till she became weary and doubtful; how her health had failed under her anxieties, and how, at last, she had discovered the whole fraud which had been practised on them both. The letter ended with expressions of hope and thankfulness, and professions of undying affection, which were more bitter than death to the unhappy young man. He wrote to her immediately:

"I have received yours,—but too late. I believed all I heard. I was desperate. _I am married_, and all is over. Only forget,—it is all that remains for either of us."

And thus ended the whole romance and ideal of life for Augustine St. Clare. But the _real_ remained,—the _real_, like the flat, bare, oozy tide-mud, when the blue sparkling wave, with all its company of gliding boats and white-winged ships, its music of oars and chiming waters, has gone down, and there it lies, flat, slimy, bare,—exceedingly real.

Of course, in a novel, people's hearts break, and they die, and that is the end of it; and in a story this is very convenient. But in real life we do not die when all that makes life bright dies to us. There is a most busy and important round of eating, drinking, dressing, walking, visiting, buying, selling, talking, reading, and all that makes up what is commonly called _living_, yet to be gone through; and this yet remained to Augustine. Had his wife been a whole woman, she might yet have done something—as woman can—to mend the broken threads of life, and weave again into a tissue of brightness. But Marie St. Clare could not even see that they had been broken. As before stated, she consisted of a fine figure, a pair of splendid eyes, and a hundred thousand dollars; and none of these items were precisely the ones to minister to a mind diseased.

When Augustine, pale as death, was found lying on the sofa, and pleaded sudden sick-headache as the cause of his distress, she recommended to him to smell of hartshorn; and when the paleness and headache came on week after week, she only said that she never thought Mr. St. Clare was sickly; but it seems he was very liable to sick-headaches, and that it was a very unfortunate thing for her, because he didn't enjoy going into company with her, and it seemed odd to go so much alone, when they were just married. Augustine was glad in his heart that he had married so undiscerning a woman; but as the glosses and civilities of the honeymoon wore away, he discovered that a beautiful young woman, who has lived all her life to be caressed and waited on, might prove quite a hard mistress in domestic life. Marie never had possessed much capability of affection, or much sensibility, and the little that she had, had been merged into a most intense and unconscious selfishness; a selfishness the more hopeless, from its quiet obtuseness, its utter ignorance of any claims but her own. From her infancy, she had been surrounded with servants, who lived only to study her caprices; the idea that they had either feelings or rights had never dawned upon her, even in distant perspective. Her father, whose only child she had been, had never denied her anything that lay within the compass of human possibility; and when she entered life, beautiful, accomplished, and an heiress, she had, of course, all the eligibles and non-eligibles of the other sex sighing at her feet, and she had no doubt that Augustine was a most fortunate man in having obtained her. It is a great mistake to suppose that a woman with no heart will be an easy creditor in the exchange of affection. There is not on earth a more merciless exactor of love from others than a thoroughly selfish woman; and the more unlovely she grows, the more jealously and scrupulously she exacts love, to the uttermost farthing. When, therefore, St. Clare began to drop off those gallantries and small attentions which flowed at first through the habitude of courtship, he found his sultana no way ready to resign her slave; there were abundance of tears, poutings, and small tempests, there were discontents, pinings, upbraidings. St. Clare was good-natured and self-indulgent, and sought to buy off with presents and flatteries; and when Marie became mother to a beautiful daughter, he really felt awakened, for a time, to something like tenderness.

St. Clare's mother had been a woman of uncommon elevation and purity of character, and he gave to his child his mother's name, fondly fancying that she would prove a reproduction of her image. The thing had been remarked with petulant jealousy by his wife, and she regarded her husband's absorbing devotion to the child with suspicion and dislike; all that was given to her seemed so much taken from herself. From the time of the birth of this child, her health gradually sunk. A life of constant inaction, bodily and mental,—the friction of ceaseless ennui and discontent, united to the ordinary weakness which attended the period of maternity,—in course of a few years changed the blooming young belle into a yellow faded, sickly woman, whose time was divided

among a variety of fanciful diseases, and who considered herself, in every sense, the most ill-used and suffering person in existence.

There was no end of her various complaints; but her principal forte appeared to lie in sick-headache, which sometimes would confine her to her room three days out of six. As, of course, all family arrangements fell into the hands of servants, St. Clare found his menage anything but comfortable. His only daughter was exceedingly delicate, and he feared that, with no one to look after her and attend to her, her health and life might yet fall a sacrifice to her mother's inefficiency. He had taken her with him on a tour to Vermont, and had persuaded his cousin, Miss Ophelia St. Clare, to return with him to his southern residence; and they are now returning on this boat, where we have introduced them to our readers.

And now, while the distant domes and spires of New Orleans rise to our view, there is yet time for an introduction to Miss Ophelia.

Whoever has travelled in the New England States will remember, in some cool village, the large farmhouse, with its clean-swept grassy yard, shaded by the dense and massive foliage of the sugar maple; and remember the air of order and stillness, of perpetuity and unchanging repose, that seemed to breathe over the whole place. Nothing lost, or out of order; not a picket loose in the fence, not a particle of litter in the turfy yard, with its clumps of lilac bushes growing up under the windows. Within, he will remember wide, clean rooms, where nothing ever seems to be doing or going to be done, where everything is once and forever rigidly in place, and where all household arrangements move with the punctual exactness of the old clock in the corner. In the family "keeping-room," as it is termed, he will remember the staid, respectable old book-case, with its glass doors, where Rollin's History,[1] Milton's Paradise Lost, Bunyan's Pilgrim's Progress, and Scott's Family Bible,[2] stand side by side in decorous order, with multitudes of other books, equally solemn and respectable. There are no servants in the house, but the lady in the snowy cap, with the spectacles, who sits sewing every afternoon among her daughters, as if nothing ever had been done, or were to be done,—she and her girls, in some long-forgotten fore part of the day, "_did up the work_," and for the rest of the time, probably, at all hours when you would see them, it is "_done up_." The old kitchen floor never seems stained or spotted; the tables, the chairs, and the various cooking utensils, never seem deranged or disordered; though three and sometimes four meals a day are got there, though the family washing and ironing is there performed, and though pounds of butter and cheese are in some silent and mysterious manner there brought into existence.

[2] _Scott's Family Bible_ (1788-1792), edited with notes by the English Biblical commentator, Thomas Scott (1747-1821).

On such a farm, in such a house and family, Miss Ophelia had spent a quiet existence of some forty-five years, when her cousin invited her to visit his southern mansion. The eldest of a large family, she was still considered by her father and mother as one of "the children," and the proposal that she should go to _Orleans_ was a most momentous one to the family circle. The old gray-headed father took down Morse's Atlas[3] out of the book-case, and looked out the exact latitude and longitude; and read Flint's Travels in the South and West,[4] to make up his own mind as to the nature of the country.

[3] _The Cerographic Atlas of the United States_ (1842-1845), by Sidney Edwards Morse (1794-1871), son of the geographer, Jedidiah Morse, and brother of the painter-inventor, Samuel F. B. Morse.

[4] _Recollections of the Last Ten Years_ (1826) by Timothy Flint (1780-1840), missionary of Presbyterianism to the trans-Allegheny West.

The good mother inquired, anxiously, "if Orleans wasn't an awful wicked place," saying, "that it seemed to her most equal to going to the Sandwich Islands, or anywhere among the heathen."

It was known at the minister's and at the doctor's, and at Miss Peabody's milliner shop, that Ophelia St. Clare was "talking about" going away down to Orleans with her cousin; and of course the whole village could do no less than help this very important process of _talking about_ the matter. The minister, who inclined strongly to abolitionist views, was quite doubtful whether such a step might not tend somewhat to encourage the southerners in holding on to their slaves; while the doctor, who was a stanch colonizationist, inclined to the opinion that Miss Ophelia ought to go, to show the Orleans people that we don't think hardly of them, after all. He was of opinion, in fact, that southern people needed encouraging. When however, the fact that she had resolved to go was fully before the public mind, she was solemnly invited out to tea by all her friends and neighbors for the space of a fortnight, and her prospects and plans duly canvassed and inquired into. Miss Moseley, who came into the house to help to do the dress-making,

acquired daily accessions of importance from the developments with regard to Miss Ophelia's wardrobe which she had been enabled to make. It was credibly ascertained that Squire Sinclare, as his name was commonly contracted in the neighborhood, had counted out fifty dollars, and given them to Miss Ophelia, and told her to buy any clothes she thought best; and that two new silk dresses, and a bonnet, had been sent for from Boston. As to the propriety of this extraordinary outlay, the public mind was divided,—some affirming that it was well enough, all things considered, for once in one's life, and others stoutly affirming that the money had better have been sent to the missionaries; but all parties agreed that there had been no such parasol seen in those parts as had been sent on from New York, and that she had one silk dress that might fairly be trusted to stand alone, whatever might be said of its mistress. There were credible rumors, also, of a hemstitched pocket-handkerchief; and report even went so far as to state that Miss Ophelia had one pocket-handkerchief with lace all around it,—it was even added that it was worked in the corners; but this latter point was never satisfactorily ascertained, and remains, in fact, unsettled to this day.

Miss Ophelia, as you now behold her, stands before you, in a very shining brown linen travelling-dress, tall, square-formed, and angular. Her face was thin, and rather sharp in its outlines; the lips compressed, like those of a person who is in the habit of making up her mind definitely on all subjects; while the keen, dark eyes had a peculiarly searching, advised movement, and travelled over everything, as if they were looking for something to take care of.

All her movements were sharp, decided, and energetic; and, though she was never much of a talker, her words were remarkably direct, and to the purpose, when she did speak.

In her habits, she was a living impersonation of order, method, and exactness. In punctuality, she was as inevitable as a clock, and as inexorable as a railroad engine; and she held in most decided contempt and abomination anything of a contrary character.

The great sin of sins, in her eyes,—the sum of all evils,—was expressed by one very common and important word in her vocabulary—"shiftlessness." Her finale and ultimatum of contempt consisted in a very emphatic pronunciation of the word "shiftless;" and by this she characterized all modes of procedure which had not a direct and inevitable relation to accomplishment of some purpose then definitely had in mind. People who did nothing, or who did not know exactly what they were going to do, or who did not take the most direct way to accomplish what they set their hands to, were objects of her entire contempt,—a contempt shown less frequently by anything she said, than by a kind of stony grimness, as if she scorned to say anything about the matter.

As to mental cultivation,—she had a clear, strong, active mind, was well and thoroughly read in history and the older English classics, and thought with great strength within certain narrow limits. Her theological tenets were all made up, labelled in most positive and distinct forms, and put by, like the bundles in her patch trunk; there were just so many of them, and there were never to be any more. So, also, were her ideas with regard to most matters of practical life,—such as housekeeping in all its branches, and the various political relations of her native village. And, underlying all, deeper than anything else, higher and broader, lay the strongest principle of her being—conscientiousness. Nowhere is conscience so dominant and all-absorbing as with New England women. It is the granite formation, which lies deepest, and rises out, even to the tops of the highest mountains.

Miss Ophelia was the absolute bond-slave of the "_ought_." Once make her certain that the "path of duty," as she commonly phrased it, lay in any given direction, and fire and water could not keep her from it. She would walk straight down into a well, or up to a loaded cannon's mouth, if she were only quite sure that there the path lay. Her standard of right was so high, so all-embracing, so minute, and making so few concessions to human frailty, that, though she strove with heroic ardor to reach it, she never actually did so, and of course was burdened with a constant and often harassing sense of deficiency;—this gave a severe and somewhat gloomy cast to her religious character.

But, how in the world can Miss Ophelia get along with Augustine St. Clare,—gay, easy, unpunctual, unpractical, sceptical,—in short,—walking with impudent and nonchalant freedom over every one of her most cherished habits and opinions?

To tell the truth, then, Miss Ophelia loved him. When a boy, it had been hers to teach him his catechism, mend his clothes, comb his hair, and bring him up generally in the way he should go; and her heart having a warm side to it, Augustine had, as he usually did with most people, monopolized a large share of it for himself, and therefore it was that he succeeded very easily in persuading her that the "path of duty" lay in the direction of New Orleans, and that she must go with him to take care of Eva, and keep everything from going to wreck and ruin during the frequent illnesses of his wife. The idea of a house without anybody to take care of it went to her heart; then she loved the lovely little girl, as few could help doing; and though she regarded Augustine as very much of a heathen, yet she loved him, laughed at his jokes, and forbore with his failings, to an extent which those who knew him thought perfectly incredible. But what more or other is to be known of Miss Ophelia our reader must discover by a personal

acquaintance.

There she is, sitting now in her state-room, surrounded by a mixed multitude of little and big carpet-bags, boxes, baskets, each containing some separate responsibility which she is tying, binding up, packing, or fastening, with a face of great earnestness.

“Now, Eva, have you kept count of your things? Of course you haven’t,—children never do: there’s the spotted carpet-bag and the little blue band-box with your best bonnet,—that’s two; then the India rubber satchel is three; and my tape and needle box is four; and my band-box, five; and my collar-box; and that little hair trunk, seven. What have you done with your sunshade? Give it to me, and let me put a paper round it, and tie it to my umbrella with my shade;—there, now.”

“Why, aunty, we are only going up home;—what is the use?”

“To keep it nice, child; people must take care of their things, if they ever mean to have anything; and now, Eva, is your thimble put up?”

“Really, aunty, I don’t know.”

“Well, never mind; I’ll look your box over,—thimble, wax, two spools, scissors, knife, tape-needle; all right,—put it in here. What did you ever do, child, when you were coming on with only your papa. I should have thought you’d a lost everything you had.”

“Well, aunty, I did lose a great many; and then, when we stopped anywhere, papa would buy some more of whatever it was.”

“Mercy on us, child,—what a way!”

“It was a very easy way, aunty,” said Eva.

“It’s a dreadful shiftless one,” said aunty.

“Why, aunty, what’ll you do now?” said Eva; “that trunk is too full to be shut down.”

“It _must_ shut down,” said aunty, with the air of a general, as she squeezed the things in, and sprung upon the lid;—still a little gap remained about the mouth of the trunk.

“Get up here, Eva!” said Miss Ophelia, courageously; “what has been done can be done again. This trunk has _got to be_ shut and locked—there are no two ways about it.”

And the trunk, intimidated, doubtless, by this resolute statement, gave in. The hasp snapped sharply in its hole, and Miss Ophelia turned the key, and pocketed it in triumph.

“Now we’re ready. Where’s your papa? I think it time this baggage was set out. Do look out, Eva, and see if you see your papa.”

“O, yes, he’s down the other end of the gentlemen’s cabin, eating an orange.”

“He can’t know how near we are coming,” said aunty; “hadn’t you better run and speak to him?”

“Papa never is in a hurry about anything,” said Eva, “and we haven’t come to the landing. Do step on the guards, aunty. Look! there’s our house, up that street!”

The boat now began, with heavy groans, like some vast, tired monster, to prepare to push up among the multiplied steamers at the levee. Eva joyously pointed out the various spires, domes, and way-marks, by which she recognized her native city.

“Yes, yes, dear; very fine,” said Miss Ophelia. “But mercy on us! the boat has stopped! where is your father?”

And now ensued the usual turmoil of landing—waiters running twenty ways at once—men tugging trunks, carpet-bags, boxes—women anxiously calling to their children, and everybody crowding in a dense mass to the plank towards the landing.

Miss Ophelia seated herself resolutely on the lately vanquished trunk, and marshalling all her goods and chattels in fine military order, seemed resolved to defend them to the last.

“Shall I take your trunk, ma’am?” “Shall I take your baggage?” “Let me ’tend to your baggage, Missis?” “Shan’t I carry out these yer, Missis?” rained down upon her unheeded. She sat with grim determination, upright as a darning-needle stuck in a board, holding on her bundle of umbrella and parasols, and replying with a determination that was enough to strike dismay even into a hackman,

wondering to Eva, in each interval, “what upon earth her papa could be thinking of; he couldn’t have fallen over, now,—but something must have happened;”—and just as she had begun to work herself into a real distress, he came up, with his usually careless motion, and giving Eva a quarter of the orange he was eating, said,

“Well, Cousin Vermont, I suppose you are all ready.”

“I’ve been ready, waiting, nearly an hour,” said Miss Ophelia; “I began to be really concerned about you.

“That’s a clever fellow, now,” said he. “Well, the carriage is waiting, and the crowd are now off, so that one can walk out in a decent and Christian manner, and not be pushed and shoved. Here,” he added to a driver who stood behind him, “take these things.”

“I’ll go and see to his putting them in,” said Miss Ophelia.

“O, pshaw, cousin, what’s the use?” said St. Clare.

“Well, at any rate, I’ll carry this, and this, and this,” said Miss Ophelia, singling out three boxes and a small carpet-bag.

“My dear Miss Vermont, positively you mustn’t come the Green Mountains over us that way. You must adopt at least a piece of a southern principle, and not walk out under all that load. They’ll take you for a waiting-maid; give them to this fellow; he’ll put them down as if they were eggs, now.”

Miss Ophelia looked despairingly as her cousin took all her treasures from her, and rejoiced to find herself once more in the carriage with them, in a state of preservation.

“Where’s Tom?” said Eva.

“O, he’s on the outside, Pussy. I’m going to take Tom up to mother for a peace-offering, to make up for that drunken fellow that upset the carriage.”

“O, Tom will make a splendid driver, I know,” said Eva; “he’ll never get drunk.”

The carriage stopped in front of an ancient mansion, built in that odd mixture of Spanish and French style, of which there are specimens in some parts of New Orleans. It was built in the Moorish fashion,—a square building enclosing a court-yard, into which the carriage drove through an arched gateway. The court, in the inside, had evidently been arranged to gratify a picturesque and voluptuous ideality. Wide galleries ran all around the four sides, whose Moorish arches, slender pillars, and arabesque ornaments, carried the mind back, as in a dream, to the reign of oriental romance in Spain. In the middle of the court, a fountain threw high its silvery water, falling in a never-ceasing spray into a marble basin, fringed with a deep border of fragrant violets. The water in the fountain, pellucid as crystal, was alive with myriads of gold and silver fishes, twinkling and darting through it like so many living jewels. Around the fountain ran a walk, paved with a mosaic of pebbles, laid in various fanciful patterns; and this, again, was surrounded by turf, smooth as green velvet, while a carriage-drive enclosed the whole. Two large orange-trees, now fragrant with blossoms, threw a delicious shade; and, ranged in a circle round upon the turf, were marble vases of arabesque sculpture, containing the choicest flowering plants of the tropics. Huge pomegranate trees, with their glossy leaves and flame-colored flowers, dark-leaved Arabian jessamines, with their silvery stars, geraniums, luxuriant roses bending beneath their heavy abundance of flowers, golden jessamines, lemon-scented verbenum, all united their bloom and fragrance, while here and there a mystic old aloe, with its strange, massive leaves, sat looking like some old enchanter, sitting in weird grandeur among the more perishable bloom and fragrance around it.

The galleries that surrounded the court were festooned with a curtain of some kind of Moorish stuff, and could be drawn down at pleasure, to exclude the beams of the sun. On the whole, the appearance of the place was luxurious and romantic.

As the carriage drove in, Eva seemed like a bird ready to burst from a cage, with the wild eagerness of her delight.

“O, isn’t it beautiful, lovely! my own dear, darling home!” she said to Miss Ophelia. “Isn’t it beautiful?”

“’T is a pretty place,” said Miss Ophelia, as she alighted; “though it looks rather old and heathenish to me.”

Tom got down from the carriage, and looked about with an air of calm, still enjoyment. The negro, it must be remembered, is an exotic of the most gorgeous and superb countries of the world, and he has, deep in his heart, a passion for all that is splendid, rich, and fanciful; a passion which, rudely indulged by an untrained taste, draws on them the ridicule of the colder and more correct

white race.

St. Clare, who was in heart a poetical voluptuary, smiled as Miss Ophelia made her remark on his premises, and, turning to Tom, who was standing looking round, his beaming black face perfectly radiant with admiration, he said,

“Tom, my boy, this seems to suit you.”

“Yes, Mas’r, it looks about the right thing,” said Tom.

All this passed in a moment, while trunks were being hustled off, hackman paid, and while a crowd, of all ages and sizes,—men, women, and children,—came running through the galleries, both above and below to see Mas’r come in. Foremost among them was a highly-dressed young mulatto man, evidently a very _distingue_ personage, attired in the ultra extreme of the mode, and gracefully waving a scented cambric handkerchief in his hand.

This personage had been exerting himself, with great alacrity, in driving all the flock of domestics to the other end of the verandah.

“Back! all of you. I am ashamed of you,” he said, in a tone of authority. “Would you intrude on Master’s domestic relations, in the first hour of his return?”

All looked abashed at this elegant speech, delivered with quite an air, and stood huddled together at a respectful distance, except two stout porters, who came up and began conveying away the baggage.

Owing to Mr. Adolph’s systematic arrangements, when St. Clare turned round from paying the hackman, there was nobody in view but Mr. Adolph himself, conspicuous in satin vest, gold guard-chain, and white pants, and bowing with inexpressible grace and suavity.

“Ah, Adolph, is it you?” said his master, offering his hand to him; “how are you, boy?” while Adolph poured forth, with great fluency, an extemporary speech, which he had been preparing, with great care, for a fortnight before.

“Well, well,” said St. Clare, passing on, with his usual air of negligent drollery, “that’s very well got up, Adolph. See that the baggage is well bestowed. I’ll come to the peop Author: active 1696-1707 Judith Drake Mary Astell

AN ESSAY In Defence of the _FEMALE SEX_.

In which are inserted the

CHARACTERS

OF

A Pedant, _A Squire_, _A Beau_, _A Vertuoso_, _A Poetaster_, _A City-Critick_, &c.

In a Letter to a Lady.

Written by a Lady.

Since each is fond of his own ugly Face; Why shou'd you when we hold it break the Glass?

Prol. to Sir _F. Flutter_.

LONDON,

Printed for _A. Roper_ and _E. Wilkinson_ at the _Black Boy_, and _R. Clavel_ at the _Peacock_, in _Fleetstreet_, 1696.

To Her Royal Highness the Princess Anne _of_ Denmark.

MADAM,

If in adventuring to lay this little Piece at your Highnesses Feet, and humbly beg your Royal Protection of it, I have presum'd too far, be pleas'd to impute it to your own, most gracious Goodness, the knowledge of which encourag'd me. Our Sex are by Nature tender of their own Off-spring, and may be allow'd to have more fondness for those of the Brain, then any other; because they are so few, and meet with so many Enemies at their first appearance in the World. I hope therefore to find pardon, if like an indulgent Parent, I have endeavour'd to advance my first Born, by entering it very early into your Highnesses Service.

I have not presum'd to approach your Highness out of any Confidence in the merits of this Essay, but of the Cause which it pleads, wherein the Honour of the whole Sex seem'd to exact of me no less a Patronage than that of the Best, as well as Greatest among 'em, whom they are all ambitious to see at their head. I have only endeavour'd to reduce the Sexes to a Level, and by Arguments to raise Ours to an Equallity at most with the Men: But your Highness by Illustrious Example daily convinces the World of our Superiority, and we see with wonder, Vertues in you, Madam, greater than your Birth. In this I am peculiarly happy, that I am exempted from the common Task of other Dedicators, who lie under an Obligation of publishing to the World those Excellencies of their Patrons, which perhaps appear no where but in their Epistles. In me it were as great folly, to pretend to make known the Illustrious Quallities of your Highness, as it wou'd be to go about to demonstrate by Argument, that the Sun shin'd, to a Crowd that are warm'd by the Influence of it.

I had attempted the Character of a consummate Woman, could I, tho' but faintly have shaddow'd the inimitable Graces of you Highness; but the impossibillity of that Task forc'd me to desist. It were easy here to lanch into those glorious particulars, which affirmed of any other than your Royal Highness, would have been extravagance of Flattery; but to you Injustice, and in me the highest presumption, to attempt with my feeble Hand those Perfections, which the ablest must fall infinitely short of. The lustre of your Royal Vertues, Madam, like the Sun, gives us warmth and light, and while at a modest distance we admire it, improves our sight, which too bold a view confounds, yet the meanest and most ignorant see those Glories, which the most exquisite Artist can never express. The World therefore will rather justify than comdemn my conduct, if I do not wrong so bright an Original with a dark obscure Copy.

Madam, Tho' the world may condemn my performance, it must applaud my choice in this Address, and own that had I known as well how to Argue, as to Instance, I must infallibly have Triumph'd over all Opposition. It may be easie to evade, or baffle the force of my Arguments, but it is impossible without the utmost Stupidity, and Injustice to deny the manifest Advantages of those Illustrious Graces, which raise your Highness so far above theirs as well as your own Sex. In this I have imitated the conduct of prudent Generals, who, when they doubt the sufficiency of their strength, retire to some strong Fort, and rest secure There is yet another Reason, _Madam_, which tho' the least justifiable, was nevertheless most prevalent with me to devote this Essay to your Highness. My Ambition to shew the profound Respects I have always had for your Highness, would not suffer me to let slip any occasion of expressing it, even tho I blush for the meanes of it. Thus I find my self reduc'd by my Zeal, to the condition of poor Tenants, who must expose their Poverty, to shew their Affection to their Lord in a worthless Present. I am sensible of the rashness of my Ambition in aspiring to the Patronage of Your Highness, and the need I have of an Apology; but were I able to make one as I ought, I should have taken care to have had less occasion for it. Yet I doubt not from Your Goodness that Indulgence, which I cannot expect from

Your Justice, nor but that you will (like Heaven, whose more immediate Images Princes are) accept my unprofitable Service, for the sincerity with which it is tender'd. If my unfeign'd Submission may procure pardon for my Presumption, that Your Happiness may equal Your illustrious Vertues, and Your Royal Person be as far out of the reach of Fortune, as your Fame and Honour of Detraction, shall ever be the prayers of

Madam,

Your Royal Highness's most Humble, most Obedient, and most Devoted Servant

PREFACE.

Prefaces to most Books, are like Prolocutors to Puppet-Shows, they come first to tell you what Figures are to be presented, and what Tricks they are to play. According therefore to ancient and laudable Custom, I have thought fit to let you know by way of Preface, or Advertisement, (call it which you please) that here are many fine Figures within to be seen, as well worth your curiosity, as any in Smithfield _at_ Bartholomew _Tide. I will not deny, Reader, but that you may have seen some of 'em there already; to those that have, I have little more to say, than that if they have a mind to see them again in Effigie, they may do it here. What is it you wou'd have? Here are St._ George's, Batemans, John Dories, Punchinello's, _and the_ Creation of the World, _or what's as good; here's the_ German Artist _too, or one that can show more Tricks than he: If all this will not invite you, y'are grown more squeamish of late, Gentlemen, than you us'd to be, and the poor Bookseller will make but an indifferent Market of you. Well, let the worst come to the worst, 'tis but shifting the scene to_ Smithfield, _and making an Interest in half a dozen Vizor-Masks to be sure of your Company: But he, good Man, is desirous to please you at first hand, and therefore has put a fine Picture in the front to invite you in, so like some of you (as he protests) that you ought never look in a Glass again, if it offends you. For my part, I declare, he has acted clear against my Opinion in this case, and so he has been told; for many a poor Man has lost the showing of his Monster, by gratifying the curiosity of the gaping Crowd with too exact a picture without doors. Besides, there's an unlucky Rogue of a left-handed Barber, that looks like an ill Omen in the beginning. He was told too, that if he wou'd please most of you, he ought to take example by your Glasses and flatter you. Yet he continued obstinate and unmoveable to all these weighty Reasons, and is so fondly bent for his Picture, that he resolv'd against all advice to have it. Nay, and he wou'd have Rhimes underneath it too, which, he says, weigh more with you, than all the Reason in the world. I thought fit to let you know this, that the Bookseller might not lose the credit of his Fancy, if it takes with you, as he is perswaded it will. For you must know, I am a great lover of strict Justice, and therefore would by no means Rob, or Defraud him of the Glory of his Invention, or by any sinister way sullie, or diminish the Honour, or Reputation of his Parts and Ingenuity. For the same Reason likewise I must acquaint you, that the Rhimes are none of mine neither; and now my Hand is in, I don't much care if I tell you, that I am not very good at that ingenious Recreation, called_ Crambo, _from which some rise to be very considerable Rhimers. This now is more then I was oblig'd to tell you, and therefore I hope no body will deny, but that I deal ingenuously at least with you._

This one would think were Preface sufficient; but there are some Men so impertinently curious, that they must needs have a Reason for every thing, that is done in the World, tho' it were in their favour (for which perhaps it were hard to give a good one) when it were their Interest to be satisfied, and thankful without further enquiry. To comply therefore in some measure with the humour of these People, if any such think fit to peruse this Book, I must tell 'em very freely, that I was so far from aiming to oblige, or disoblige 'em by it, that it was never intended for their View. It was occasion'd by a private Conversation, between some Gentlemen and Ladies, and written at the request, and for the Diversion of one Lady more particularly, by whom with my consent it was communicated to two or three more of both Sexes, my Friends likewise.

By them I was with abundance of Complements importun'd to make it publick; now tho' I do with good Reason attribute much more, of what was said to me upon this Occasion, to their good Breeding and Friendship, than to their real Opinions of my Performance; yet I have so much satisfaction in their Sincerity, and Friendship as to be confident they would not suffer, much less perswade me to expose to the world any thing, of which they doubted so far, as to think it would not be tollerably acceptable. Nor have I less assurance of their Judgment and Skill in things of this nature, beside that I have been inform'd by some of 'em, that it has been seen, and favourably receiv'd by some Gentlemen, whom the world thinks no incompetent Judges. After all this Encouragement, I suppose, I shall not be thought vain, if, as I pretend not to the applause, so I fear not the contempt of the world: Yet I presume not so far upon the Merits of what I have written, as to make my Name publick with it. I have elsewhere held, that Vanity was almost the universal mover of all our Actions, and consequently of mine, as well as of others; yet it is not strongenough in me, to induce me to bring my Name upon the publick stage of the World.

There are many Reasons, that oblige me to this cautious, reserv'd way of procedure; tho' I might otherwise be very ambitious of appearing in the defence of my Sex, cou'd I perswade my self, that I was able to write any thing sutable to the dignity of the Subject, which I am not vain enough to think. This indeed is one Reason, because I am sensible it might have been much better defended by abler Pens; such as many among our own Sex are; though I believe scarce thus much wou'd have been expected from me, by those that know me. There is likewise another Reason, which was yet more prevalent with me, and with those few Friends whom I consulted about it, which is this; There are a sort of Men, that upon all occasions think themselves more concern'd, and more thought of than they are, and that, like Men that are deaf, or have any other notorious Defect, can see no body whisper, or laugh, but they think 'tis at themselves. These Men are apt to think, that every ridiculous description they meet with, was intended more particularly for some one or other of them; as indeed it is hard to paint any thing compleat in their several Kinds, without hitting many of their particular Features, even without drawing from them. The knowledge of this, with the consideration of the tenderness of Reputation in our Sex, (which as our delicatest Fruits and finest Flowers are most obnoxious to the injuries of Weather, is submitted to every infectious Blast of malicious Breath) made me very cautious, how I expos'd mine to such poisonous Vapours. I was not ignorant, how liberal some Men are of their Scandal, whenever provok'd, especially by a Woman; and how ready the same Men are to be so, tho upon never so mistaken Grounds. This made me resolve to keep 'em in Ignorance of my Name, and if they have a mind to find me out, let 'em catch me (if they can) as Children at Blindmans Buff do one another, Hoodwinkt; and I am of Opinion I have room enough to put 'em out of Breath before they come near me.

The Event has in Effect prov'd my suspicions Prophetick; for there are (as I am inform'd) already some, so forward to interest themselves against me, that they take Characters upon themselves, before they see 'em; and, for fear they should want some Body to throw their Dirt at, with equal Ignorance, and Injustice Father this Piece upon the Gentleman, who was so kind as to take care of the Publication of it, only to excuse me from appearing. This made me once resolve to oppose my Innocence to their Clamour, and perfix my Name, which I thought I was bound to do in Justice to him. In this Resolution I had persisted, had not the very same Gentleman generously perswaded, and over-rul'd me to the contrary, representing how weak a defence Innocence is against Calumny, how open the Ears of all the World are, and how greedily they suck in any thing to the prejudice of a Woman; and that (to use his own Expression) the scandal of such Men, was like Dirt thrown by Children, and Fools at random, and without Provocation, it would dawb filthily at first, though it were easily washt off again: Adding, that he desir'd me not to be under any concern for him; for he valued the Malice of such men, as little, as their Friendship, the one was as feeble, as tother false.

I suppose I need make no Apology to my own Sex for the meaness of this defence; the bare intention of serving 'em will I hope be accepted, and of Men, the Candid and Ingenuous I am sure will not quarrel with me for any thing in this little Book; since there is nothing in it, which was not drawn from the strictest Reason I was Mistress of, and the best Observations I was able to make, except a start or two only concerning the Salique Law, and the Amazons, _which, if they divert not the Reader, can't offend him_.

I shall not trouble the Reader with any account of the Method I have observ'd, he will easily discover that in reading the Piece it self. I shall only take notice to him of one thing, which with a little attention to what he reads he will readily find to be true, that is, that the Characters were not written out of any Wanton Humour, or Malicious Design to characterize any Particular Persons, but to illustrate what I have said upon the several Heads, under which they are rang'd, and represent not single Men, but so many Clans, or Divisions of Men, that play the Fool seriously in the World. If any Individual seem to be more peculiarly markt, it is because he is perhaps more notorious to the World, by some one or more Articles of the General Character here given I am sure that there is no Man, who is but moderately Acquainted with the World, especially this Town, but may find half a Dozen, or more Originals for every Picture. After all, if any Man have so little Wit, as to appropriate any of these Characters to himself, He takes a liberty I have hitherto never given him, but shall do it now in the Words of a Great Man, If any Fool finds the Cap fit him, let him put it on.

_There are some Men, (I hear) who will not allow this Piece to be written by a Woman; did I know what Estimate to make of their Judgments, I might perhaps have a higher Opinion of this Triffle, than I ever yet had. For I little thought while I was writing this, that any Man (especially an Ingenious Man) should have the scandal of being the reputed Author. For he must think it scandalous to be made to Father a Womans Productions unlawfully. But these Gentlemen, I suppose, believe there is more Wit, than they'l find in this Piece, upon the Credit of the Bookseller, whose Interest it is to flatter it. But were it as well written as I could wish it, or as the Subject wou'd bear, and deserves; I see no reason why our Sex shou'd be robb'd of the Honour of it; Since there have been Women in all Ages, whose Writings might vie with those of the greatest Men, as the Present Age as well as past can testifie. I shall not trouble the Reader with their names, because I wou'd not be thought so vain, as to rank my self among 'em; and their names are already too well known, and celebrated to receive any additional Lustre from so weak Encomiums as mine. I pretend not to imitate, much less to Rival those Illustrious Ladies, who have done so much Honour to their Sex, and are unanswerable Proofs of,

what I contend for. I only wish, that some Ladies now living among us (whose names I forbear to mention in regard to their Modesty) wou'd exert themselves, and give us more recent Instances, who are both by Nature and Education sufficiently qualified to do it, which I pretend not to. I freely own to the Reader, that I know no other Tongue besides my Native, except_ French, _in which I am but very moderately skill'd. I plead not this to excuse the meaness of my Performance; because I know, I may reasonably be ask'd, why I was so forward to write; For that I have already given my reasons above, if they will not satisfie the Reader, he must endeavour to please himself with better, for I am very little solicitous about the matter. I shall only add, that for my Good Will I hope the Favour of my own Sex, which will satisfie my Ambition._

To the Most Ingenious Mrs. —— or her Admirable Defence of Her Sex.

Long have we sung the Fam'd _Orinda_'s praise, And own'd _Astrea_'s Title to the Bays, We to their Wit have paid the Tribute due, But shou'd be Bankrupt, before just to you. Sweet flowing Numbers, and fine Thoughts they writ; But you Eternal Truths, as well as Wit. In them the Force of Harmony we find, In you the Strength, and Vigour of the Mind. Dark Clouds of Prejudice obscur'd their Verse, You with Victorious Prose those Clouds disperse: Those Foggs, which wou'd not to their Flame submit, Vanish before your Rising Sun of Wit. Like Stars, they only in Themselves were bright, The whole Sex shines by your reflected Light. Our Sex have long thro' Usurpation reign'd, And by their Tyranny their Rule maintain'd. Till wanton grown with Arbitrary Sway Depos'd by you They practice to obey, Proudly submitting, when such Graces meet, Beauty by Nature, and by conquest Wit. For Wit they had on their own Sex entail'd, Till for your self, and Sex you thus prevail'd. Thrice happy Sex! Whose Foes such Pow'r disarms, And gives fresh Lustre to your native Charms, Whose Nervous Sense couch'd in close Method lies, Clear as her Soul, and piercing as her Eyes. If any yet so stupid shou'd appear, As still to doubt, what she has made so clear, Her Beautie's Arguments they would allow, And to Her Eyes their full Conversion owe. And by Experiment the World convince. The Force of Reason's less, than that of Sense. Your Sex you with such Charming Grace defend, While that you vindicate, you Ours amend: We in your Glass may see each foul defect. And may not only see, but may correct. In vain old _Greece_ her Sages would compare, They taught what Men should be, you what they are With doubtfull Notiones they Mankind perplext, And with unpracticable Precept vext. In vain they strove wild Passions to reclaim, Uncertain what they were, or whence they came. But you, who have found out their certain Source, May with a happier Hand divert their Course. Themselves so little did those Sages know, That to their Failings We their Learning owe. Their Vanity first caus'd 'em to aspire, And with feirce Wranglings set all _Greece_ on Fire: Thus into sects they split the _Grecian_ youth, Contending more for Victory than Truth. Your Speculations nobler Ends persue, They aim not to be Popular, but true. You with strict Justice in an equal Light, Expose both Wit and Folly to our Sight, Yet as the Bee secure on Poyson feeds, Extracting Honey from the rankest Weeds: So safely you in Fools Instructours find, And Wisdom in the Follies of mankind. With purer Waves henceforth shall Satyr flow, And we this change to your chast Labours owe; Satyr before from a Polluted Source Brought Native Filth, augmented in its course. No longer muddy shall those Streams appear, Which you have purg'd, and made so sweet, and clear. Well may your Wit to us a wonder seem, So strong's the Current, yet so clear the stream, Deep, but not Dull, thro' each transparent Line We see the Gems, which at the Bottom shine. To your Correction freely we submit, Who teach us Modesty, as well as Wit. Our Sex with Blushes must your Conquest own, While yours prepare the Garlands you have won. Your Fame secure long as your Sex shall last, Nor Time, nor Envy shall your Lawrels blast.

James Drake.

The Reader is desir'd to excuse, and correct all Literal Escapes, and to amend the following thus.

AN ESSAY In Defence of the Female Sex, _&c._

The Conversation we had 'tother day, makes me, Dear _Madam_, but more sensible of the unreasonableness of your desire; which obliges me to inform you further upon a Subject, wherein I have more need of your instruction. The strength of Judgment, sprightly

Fancy, and admirable Address; you shew'd upon that Occasion, speak you so perfect a Mistress of that Argument (as I doubt not but you are of any other that you please to engage in) that whoever, would speak or write well on it, ought first to be your Schollar. Yet to let you see how absolutely you may command me, I had rather be your _Eccho_, than be silent when You bid me speak, and beg your excuse rather for my Failures, than want of Complacence. I know You will not accuse me for a Plagiary if I return You nothing, but what I have glean'd from You, when You consider, that I pretend not to make a Present, but to pay the Interest only of a Debt. Nor can You tax me with Vanity, since no Importunity of a Person less lov'd, or valu'd by me than your self could have extorted thus much from me. This Consideration leaves me no room to doubt but that you will with your usual Candour pardon those Defects, and correct those Errors, which proceed only from an over forward Zeal to oblige You, though to my own Disadvantage.

The defence of our Sex against so many and so great Wits as have so strongly attack'd it, may justly seem a Task too difficult for a Woman to attempt. Not that I can, or ought to yield, that we are by Nature less enabled for such an Enterpize, than Men are; which I hope at least to shew plausible Reasons for, before I have done: But because through the Usurpation of Men, and the Tyranny of Custom (here in _England_ especially) there are at most but few, who are by Education, and acquir'd Wit, or Letters sufficiently quallified for such an Undertaking. For my own part I shall readily own, that as few as there are, there may be and are abundance, who in their daily Conversations approve themselves much more able, and sufficient Assertors of our Cause, than my self; and I am sorry that either their Business, their other Diversions, or too great Indulgence of their Ease, hinder them from doing publick Justice to their Sex. The Men by Interest or Inclination are so generally engag'd against us, that it is not to be expected, that any one Man of Wit should arise so generous as to engage in our Quarrel, and be the Champion of our Sex against the Injuries and Oppressions of his own. Those Romantick days are over, and there is not so much as a _Don Quixot_ of the Quill left to succour the distressed Damsels. 'Tis true, a Feint of something of this Nature was made three or four Years since by one; but how much soever his Eugenia may be oblig'd to him, I am of Opinion the rest of her Sex are but little beholding to him. For as you rightly observ'd, _Madam_, he has taken more care to give an Edge to his Satyr, than force to his Apology; he has play'd a sham Prize, and receives more thrusts than he makes; and like a false Renegade fights under our Colours only for a fairer Opportunity of betraying us. But what could be expected else from a Beau? An Annimal that can no more commend in earnest a Womans Wit, than a Man's Person, and that compliments ours, only to shew his own good Breeding and Parts. He levels his Scandal at the whole Sex, and thinks us sufficiently fortified, if out of the Story of Two Thousand Years he has been able to pick up a few Examples of Women illustrious for their Wit, Learning or Vertue, and Men infamous for the contrary; though I think the most inveterate of our Enemies would have spar'd him that labour, by granting that all Ages have produc'd Persons famous or infamous of both Sexes; or they must throw up all pretence to Modesty, or Reason.

I have neither Learning, nor Inclination to make a Precedent, or indeed any use of Mr. W's. labour'd Common Place Book; and shall leave Pedants and School-Boys to rake and tumble the Rubbish of Antiquity, and muster all the _Heroes_ and _Heroins_ they can find to furnish matter for some wretched Harangue, or stuff a miserable Declamation with instead of Sense or Argument.

[Sidenote: _Some advantages to be allow'd to the disparity of Education._]

I shall not enter into any dispute, whether Men, or Women be generally more ingenious, or learned; that Point must be given up to the advantages Men have over us by their Education, Freedom of Converse, and variety of Business and Company. But when any Comparison is made between 'em, great allowances must be made for the disparity of those Circumstances. Neither shall I contest about the preheminence of our Virtues; I know there are too many Vicious, and I hope there are a great many Virtuous of both Sexes. Yet this I may say, that whatever Vices are found amongst us, have in general both their source, and encouragement from them.

The Question I shall at present handle is, whether the time an ingenious Gentleman spends in the Company of Women, may justly be said to be misemploy'd, or not? I put the question in general terms; because whoever holds the affirmative must maintain it so, or the Sex is no way concern'd to oppose him. On the other side I shall not maintain the Negative, but with some Restrictions and Limitations; because I will not be bound to justifie those Women, whose Vices and ill Conduct expose them deservedly to the Censure of the other Sex, as well as of their own. The Question being thus stated, let us consider the end and purposes, for which Conversation was at first instituted, and is yet desirable; and then we shall see, whether they may not all be found in the Company of Women. These Ends, I take it, are the same with those we aim at in all our other Actions, in general only two, Profit or Pleasure. These are divided into those of the Mind, and those of the Body. Of the latter I shall take no further Notice, as having no Relation to the present Subject; but shall confine my self wholly to the Mind, the Profit of which is the Improvement of the Understanding, and the Pleasure is the Diversion, and Relaxation of its Cares and Passions. Now if either of these Ends be attainable by the Society of

Women, I have gain'd my Point. However, I hope to make it appear, that they are not only both to be met with in the Conversation of Women, but one of them more generally, and in greater measure than in Mens.

Our Company is generally by our Adversaries represented as unprofitable and irksome to Men of Sense, and by some of the more vehement Sticklers against us, as Criminal. These Imputations as they are unjust, especially the latter, so they savour strongly of the Malice, Arrogance and Sottishness of those, that most frequently urge 'em; who are commonly either conceited Fops, whose success in their Pretences to the favour of our Sex has been no greater than their Merit, and fallen very far short of their Vanity and Presumption, or a sort of morose, ill-bred, unthinking Fellows, who appear to be Men only by their Habit and Beards, and are scarce distinguishable from Brutes but by their Figure and Risibility. But I shall wave these Reflections at present, however just, and come closer to our Argument. If Women are not quallified for the Conversation of ingenious Men, or, to go yet further, their friendship, it must be because they want some one condition, or more, necessarily requisite to either. The necessary Conditions of these are Sense, and good nature, to which must be added, for Friendship, Fidelity and Integrity. Now if any of these be wanting to our Sex, it must be either because Nature has not been so liberal as to bestow 'em upon us; or because due care has not been taken to cultivate those Gifts to a competent measure in us.

The first of these Causes is that, which is most generally urg'd against us, whether it be in Raillery, or Spight. I might easily cut this part of the Controversy short by an irrefragable Argument, which is, that the express intent, and reason for which Woman was created, was to be a Companion, and help meet to Man; and that consequently those, that deny 'em to be so, must argue a Mistake in Providence, and think themselves wiser than their Creator. But these Gentlemen are generally such passionate Admirers of themselves, and have such a profound value and reverence for their own Parts, that they are ready at any time to sacrifice their Religion to the Reputation of their Wit, and rather than lose their point, deny the truth of the History. There are others, that though they allow the Story yet affirm, that the propagation, and continuance of Mankind, was the only Reason for which we were made; as if the Wisdom that first made Man, cou'd not without trouble have continu'd the Species by the same or any other Method, had not this been most conducive to his happiness, which was the gracious and only end of his Creation. But these superficial Gentlemen wear their Understandings like their Clothes, always set and formal, and wou'd no more Talk than Dress out of Fashion; Beau's that, rather than any part of their outward Figure shou'd be damag'd, wou'd wipe the dirt of their shoes with their Handkercher, and that value themselves infinitely more upon modish Nonsense, than upon the best Sense against the Fashion. But since I do not intend to make this a religious Argument, I shall leave all further Considerations of this Nature to the Divines, whose more immediate Business and Study it is to assert the Wisdom of Providence in the Order, and distribution of this World, against all that shall oppose it.

[Sidenote: _No distinction of Sexes in Souls._]

To proceed therefore if we be naturally defective, the Defect must be either in Soul or Body. In the Soul it can't be, if what I have hear'd some learned Men maintain, be true, that all Souls are equal, and alike, and that consequently there is no such distinction, as Male and Female Souls; that there are no innate _Idea's_, but that all the Notions we have, are deriv'd from our External Senses, either immediately, or by Reflection. These Metaphysical Speculations, I must own Madam, require much more Learning and a stronger Head, than I can pretend to be Mistress of, to be consider'd as they ought: Yet so bold I may be, as to undertake the defence of these Opinions, when any of our jingling Opponents think fit to refute 'em.

[Sidenote: _No advantage in the Organization of their Bodies._]

Neither can it be in the Body, (if I may credit the Report of learned Physicians) for there is no difference in the Organization of those Parts, which have any relation to, or influence over the Minds; but the Brain, and all other Parts (which I am not Anatomist enough to name) are contriv'd as well for the plentiful conveyance of Spirits, which are held to be the immediate Instruments of Sensation, in Women, as Men. I see therefore no natural Impediment in the structure of our Bodies; nor does Experience, or Observation argue any: We use all our Natural Faculties, as well as Men, nay and our Rational too, deducting only for the advantages before mention'd.

[Sidenote: _Confirm'd from Experience of Brutes._]

Let us appeal yet further to Experience, and observe those Creatures that deviate least from simple Nature, and see if we can find any difference in Sense, or understanding between Males and Females. In these we may see Nature plainest, who lie under no constraint of Custom or Laws, but those of Passion or Appetite, which are Natures, and know no difference of Education, nor receive any Byass by prejudice. We see great distance in Degrees of Understanding, Wit, Cunning and Docility (call them what you

please) between the several Species of Brutes. An Ape, a Dog, a Fox, are by daily Observation found to be more Docile, and more Subtle than an Ox, a Swine, or a Sheep. But a She Ape is as full of, and as ready at Imitation as a He; a Bitch will learn as many Tricks in as short a time as a Dog, a Female Fox has as many Wiles as a Male. A thousand instances of this kind might be produc'd; but I think these are so plain, that to instance more were a superfluous labour; I shall only once more take notice, that in Brutes and other Animals there is no difference betwixt Male and Female in point of Sagacity, notwithstanding there is the same distinction of Sexes, that is between Men and Women. I have read, that some Philosophers have held Brutes to be no more than meer Machines, a sort of Divine Clock-work, that Act only by the force of nice unseen Springs without Sensation, and cry out without feeling Pain, Eat without Hunger, Drink without Thirst, fawn upon their Keepers without seeing 'em, hunt Hares without Smelling, _&c._ Here Madam is cover for our Antagonists against the last Argument so thick, that there is no beating 'em out. For my part, I shall not envy 'em their refuge, let 'em lie like the wild _Irish_ secure within their Boggs; the field is at least ours, so long as they keep to their Fastnesses. But to quit this Topick, I shall only add, that if the learnedest He of 'em all can convince me of the truth of this Opinion, He will very much stagger my Faith; for hitherto I have been able to observe no difference between our Knowledge and theirs, but a gradual one; and depend upon Revelation alone, that our Souls are Immortal, and theirs not.

[Sidenote: _Experience of Mankind._]

But if an Argument from Brutes and other Animals shall not be allow'd as conclusive, (though I can't see, why such an Inference should not be valid, since the parity of Reason is the same on both sides in this Case.) I shall desire those, that hold against us to observe the Country People, I mean the inferiour sort of them, such as not having Stocks to follow Husbandry upon their own Score, subsist upon their daily Labour. For amongst these, though not so equal as that of Brutes, yet the Condition of the two Sexes is more level, than amongst Gentlemen, City Traders, or rich Yeomen. Examine them in their several Businesses, and their Capacities will appear equal; but talk to them of things indifferent, and out of the Road of their constant Employment, and the Ballance will fall on our side, the Women will be found the more ready and polite. Let us look a little further, and view our Sex in a state of more improvement, amongst our Neighbours the _Dutch_. There we shall find them managing not only the Domestick Affairs of the Family, but making, and receiving all Payments as well great as small, keeping the Books, ballancing the Accounts, and doing all the Business, even the nicest of Merchants, with as much Dexterity and Exactness as their, or our Men can do. And I have often hear'd some of our considerable Merchants blame the conduct of our Country-Men in this point; that they breed our Women to ignorant of Business; whereas were they taught Arithmetick, and other Arts which require not much bodily strength, they might supply the places of abundance of lusty Men now employ'd in sedentary Business; which would be a mighty profit to the Nation by sending those Men to Employments, where hands and Strength are more requir'd, especially at this time when we are in such want of People. Beside that it might prevent the ruine of many Families, which is often occasion'd by the Death of Merchants in full Business, and leaving their Accounts perplex'd, and embroil'd to a Widdow and Orphans, who understanding nothing of the Husband or Father's Business occasions the Rending, and oftentimes the utter Confounding a fair Estate; which might be prevented, did the Wife but understand Merchants Accounts, and were made acquainted with the Books.

I have yet another Argument from Nature, which is, that the very Make and Temper of our Bodies shew that we were never design'd for Fatigue; and the Vivacity of our Wits, and Readiness of our Invention (which are confess'd even by our Adversaries) demonstrate that we were chiefly intended for Thought and the Exercise of the Mind. Whereas on the contrary it is apparent from the strength and size of their Limbs, the Vigour and Hardiness of their Constitutions, that Men were purposely fram'd and contriv'd for Action, and Labour. And herein the Wisdom and Contrivance of Providence is abundantly manifested; for as the one Sex is fortified with Courage and Ability to undergo the necessary Drudgery of providing Materials for the sustenance of Life in both; so the other is furnish'd with Ingenuity and Prudence for the orderly management and distribution of it, for the Relief and Comfort of a Family; and is over and above enrich'd with a peculiar Tenderness and Care requisite to the Cherishing their poor helpless Off-spring. I know our Opposers usually miscall our quickness of Thought, Fancy and Flash, and christen their own heaviness by the specious Names of Judgment and Solidity; but it is easie to retort upon 'em the reproachful Ones of Dullness and Stupidity with more Justice. I shall pursue this Point no further, but continue firm in my Persuasion, that Nature has not been so Niggardly to us, as our Adversaries would insinuate, till I see better cause to the contrary, then I have hitherto at any time done. Yet I am ready to yield to Conviction, whoever offers it; which I don't suddenly expect.

It remains then for us to enquire, whether the Bounty of Nature be wholly neglected, or stifled by us, or so far as to make us unworthy the Company of Men? Or whether our Education (as bad as it is) be not sufficient to make us a useful, nay a necessary part of Society for the greatest part of Mankind. This cause is seldom indeed urg'd against us by the Men, though it be the only one, that gives 'em any advantage over us in understanding. But it does not serve their Pride, there is no Honour to be gain'd by it: For a

Man ought no more to value himself upon being Wiser than a Woman, if he owe his Advantage to a better Education, and greater means of Information, then he ought to boast of his Courage, for beating a Man, when his Hands were bound. Nay it would be so far from Honourable to contend for preference upon this Score, that they would thereby at once argue themselves guilty both of Tyranny, and of Fear: [Sidenote: _Women industriously kept in Ignorance._] I think I need not have mention'd the latter; for none can be Tyrants but Cowards. For nothing makes one Party slavishly depress another, but their fear that they may at one time or other become Strong or Couragious enough to make themselves equal to, if not superiour to their Masters. This is our Case; for Men being sensible as well of the Abilities of Mind in our Sex, as of the strength of Body in their own, began to grow Jealous, that we, who in the Infancy of the World were their Equals and Partners in Dominion, might in process of Time, by Subtlety and Stratagem, become their Superiours; and therefore began in good time to make use of Force (the Origine of Power) to compell us to a Subjection, Nature never meant; and made use of Natures liberality to them to take the benefit of her kindness from us. From that time they have endeavour'd to train us up altogether to Ease and Ignorance; as Conquerors use to do to those, they reduce by Force, that so they may disarm 'em, both of Courage and Wit; and consequently make them tamely give up their Liberty, and abjectly submit their Necks to a slavish Yoke. As the World grew more Populous, and Mens Necessities whetted their Inventions, so it increas'd their Jealousy, and sharpen'd their Tyranny over us, till by degrees, it came to that height of Severity, I may say Cruelty, it is now at in all the Eastern parts of the World, where the Women, like our Negroes in our Western Plantations, are born slaves, and live Prisoners all their Lives. Nay, so far has this barbarous Humour prevail'd, and spread it self, that in some parts of _Europe_, which pretend to be most refin'd and civiliz'd, in spite of Christianity, and the Zeal for Religion which they so much affect, our Condition is not very much better. And even in _France_, a Country that treats our Sex with more Respect than most do, [Sidenote: _Original of the Salique Law._] We are by the _Salique Law_ excluded from Soveraign Power. The _French_ are an ingenious People, and the Contrivers of that Law knew well enough, that We were no less capable of Reigning, and Governing well, than themselves; but they were suspicious, that if the Regal Power shou'd fall often into the hands of Women, they would favour their own Sex, and might in time restore 'em to their Primitive Liberty and Equality with the Men, and so break the neck of that unreasonable Authority they so much affect over us; and therefore made this Law to prevent it. The Historians indeed tell us other Reasons, but they can't agree among themselves, and as Men are Parties against us, and therefore their Evidence may justly be rejected. To say the truth Madam, I can't tell how to prove all this from Ancient Records; for if any Histories were, anciently written by Women, Time, and the Malice of Men have effectually conspir'd to suppress 'em; and it is not reasonable to think that Men shou'd transmit, or suffer to be transmitted to Posterity, any thing that might shew the weakness and illegallity of their Title to a Power they still exercise so arbitrarily, and are so fond of. But since daily Experience shews, and their own Histories tell us, how earnestly they endeavour, and what they act, and suffer to put the same Trick upon one another, 'tis natural to suppose they took the same measures with us at first, which now they have effected, like the Rebels in our last Civil Wars, when they had brought the Royal Party under, they fall together by the Ears about the Dividend. [Sidenote: _Amazons; why they rejected the Society of Men._] The Sacred History takes no notice of any such Authority they had before the Flood, and their Own confess that whole Nations have rejected it since, and not suffer'd a Man to live amongst them, which cou'd be for no other Reason, than their Tyranny. For upon less provocation the Women wou'd never have been so foolish, as to deprive themselves of the benefit of that Ease and Security, which a good agreement with their Men might have afforded 'em. 'Tis true the same Histories tell us, that there were whole Countries where were none but Men, which border'd upon 'em. But this makes still for us; for it shews that the Conditions of their Society were not so easie, as to engage their Women to stay amongst 'em; but as liberty presented it self, they withdrew and retired to the _Amazons_: But since our Sex can hardly boast of so great Privileges, and so easie a Servitude any where as in _England_, I cut this ungrateful Digression short in acknowledgment; tho' Fetters of Gold are still Fetters, and the softest Lining can never make 'em so easy, as Liberty.

You will excuse, I know Madam, this short, but necessary Digression. I call it necessary, because it shews a probable Reason, why We are at this time in such subjection to them, without lessening the Opinion of our Sense, or Natural Capacities either at present, or for the time past; beside that it briefly lays open without any Scandal to our Sex, why our Improvements are at present so disproportion'd to those of Men. I wou'd not have any of our little, unthinking Adversaries triumph at my allowing a disproportion between the Improvements of our Sex and theirs; and I am sure those of 'em that are ingenious Men, will see no reason for it from what I have said.

After having granted so great a disparity as I have already done in the customary Education, and advantagious Liberties of the Sexes, 'twere Nonsense to maintain, that our Society is generally and upon all accounts as Beneficial, Improving and Entertaining, as that of Men. He must be a very shallow Fellow, that resorts to, and frequents us in hopes by our means to make himself considerable as a Schollar, a Mathematician, a Philosopher, or a States-man. These Arts and Sciences are the result only of much

Study and great Experience; and without one at least of 'em are no more to be acquir'd by the Company of Men, however celebrated for any or all of them, than by ours. But there are other Quallifications, which are as indispensably necessary to a Gentleman, or any Man that wou'd appear to Advantage in the World, which are attainable only by Company, and Conversation, and chiefly by ours. Nor can the greatest part of Mankind, of what Quallity soever, boast much of the use they make, or the benefit they reap from these acknowledg'd Advantages. So that Schollars only, and some few of the more thinking Gentlemen, and Men of Business have any just claim to 'em. And of these the first generally fall short enough some other way to make the Ballance even. [Sidenote: _Character of a Pedant._] For Schollars, though by their acquaintance with Books, and conversing much with Old Authors, they may know perfectly the Sense of the Learned Dead, and be perfect Masters of the Wisdom, be throughly inform'd of the State, and nicely skill'd in the Policies of Ages long since past, yet by their retir'd and unactive Life, their neglect of Business, and constant Conversation with Antiquity, they are such Strangers to, and to ignorant of the Domestick Affairs and manners of their own Country and Times, that they appear like the Ghosts of Old Romans rais'd by Magick. Talk to them of the _Assyrian_, or _Perssian_ Monarchies, the _Grecians_ or _Roman_ Common-wealths. They answer like Oracles, they are such finish'd Statemen, that we shou'd scarce take 'em to have been less than Confifidents of _Semiramis_, Tutours to _Cyrus_ the great, old Cronies of _Solon_ and _Lycurgus_, or Privy Councellours at least to the Twelve _Cæsars_ successively; but engage them in a Discourse that concerns the present Times, and their Native Country, and they heardly speak the Language of it, and know so little of the affairs of it, that as much might reasonably be expected from an animated _Egyptian_ Mummy. They are very much disturbed to see a Fold or a Plait amiss the Picture of an Old _Roman_ Gown, yet take no notice that their own are thredbare out at the Elbows, or Ragged, and suffer more if _Priscians_ Head be broken then if it were their own. They are excellent Guides, and can direct you to every Ally, and turning in old _Rome_; yet lose their way at home in their own Parish. They are mighty admirers of the Wit and Eloquence of the Ancients; yet had they liv'd in the time of _Cicero_, and _Cæsar_ wou'd have treated them with as much supercilious Pride, and disrespect as they do now with Reverence. They are great hunters of ancient Manuscripts, and have in great Veneration any thing, that has scap'd the Teeth of Time and Rats, and if Age have obliterated the Characters, 'tis the more valuable for not being legible. But if by chance they can pick out one Word, they rate it higher then the whole Author in Print, and wou'd give more for one Proverb of _Solomons_ under his own Hand, then for all his Wisdom. These Superstitious, bigotted Idolaters of time past, are Children in their understanding all their lives; for they hang so incessantly upon the leading Strings of Authority, that their Judgments like the Limbs of some _Indian_ Penitents, become altogether crampt and motionless for want of use.

But as these Men, will hardly be reckon'd much superiour to us upon the account of their Learning or Improvements, so neither will I suppose another sort diametrically opposite to these in their Humors and Opinions: [Sidenote: _Character of a Country Squire._] I mean those whose Ancestors have been wise and provident, and rais'd Estates by their Ingenuity and Industry, and given all their Posterity after 'em Means, and Leisure to be Fools. These are generally sent to School in their Minority, and were they kept there till they came to Years of Discretion, might most of 'em stay, till they cou'd tuck their Beards into their Girdles before they left carrying a Satchel. In conformity to Custom, and the Fashion, they are sent early to serve an Apprenticeship to Letters, and for eight or nine years are whipt up and down through two or three Counties from School to School; when being arriv'd a Sixteen, or Seventeen Years of Age, and having made the usual _Tour_ of Latin, and Greek Authors, they are call'd Home to be made Gentlemen. As soon as the young Squire has got out of the House of Bondage, shaken off the awe of Birch, and begins to feel himself at Liberty, he considers that he is now Learned enough, (and 'tis ten to one but his Friends are wise enough to be of his Opinion) and thinks it high time to shake off the barbarous Acquaintance he contracted, with those crabbed, vexatious, obscure Fellows, that gave him so much trouble and smart at School, Companions by no means fit for a Gentleman, that writ only to torment and perplex poor Boys, and exercise the tyranny of Pedants and School-masters. These prudent resolutions taken, his Conversation for some years succeeding is wholly taken up by his Horses, Dogs and Hawks (especially if his Residence be in the Country) and the more sensless Animals that tend 'em. His Groom, his Huntsman, and his Falconer are his Tutors, and his walk is from the Stable to the Dog-kennel, and the reverse of it. His diversion is drudgery, and he is in highest satisfaction when he is most tir'd. He wearies you in the Morning with his Sport, in the Afternoon with the noisie Repetition and Drink, and the whole Day with Fatigue and Confusion. His Entertainment is stale Beer, and the History of his Dogs and Horses, in which he gives you the Pedigree of every one with all the exactness of a Herald; and if you be very much in his good Graces, 'tis odds, but he makes you the Compliment of a Puppy of one of his favourite Bitches, which you must take with abundance of Acknowledgments of his Civillity, or else he takes you for a stupid, as well as an ill bred Fellow. He is very constant at all Clubs and Meetings of the Country Gentlemen, where he will suffer nothing to be talk'd or hear'd of but his Jades, his Curs, and his Kites. Upon these he rings perpetual Changes, and trespasses as much upon the patience of the Company in the Tavern, as upon their Enclosures in the Field, and is least impertinent, when most drunk.

His grand Business is to make an Assignation for a Horse Race, or a Hunting Match, and nothing discomposes him so much as a Disappointment. Thus accomplish'd, and finish'd for a Gentleman, he enters the Civil Lists, and holds the Scale of Justice with as much Blindness as she is said to do. From hence forward his Worship becomes as formidable to the Ale-Houses, as he was before Familiar; he sizes an Ale Pot, and takes the dimensions of Bread with great Dexterity and Sagacity. He is the terrour of all the Deer, and Poultry Stealers in the Neighbourhood, and is so implacable a Persecutor of Poachers, that he keeps a Register of all the Dogs and Guns in the Hundred, and is the Scare-Beggar of the Parish. Short Pots, and unjustifiable Dogs and Nets, furnish him with sufficient matter for Presentments, to carry him once a Quarter to the Sessions; where he says little, Eats and Drinks much, and after Dinner, Hunts over the last Chace, and so rides Worshipfully Drunk home again. At home he Exercises his Authority in granting his Letters, Pattents to Petitioners for erecting Shovel Board, Tables and Ginger Bread Stalls. If he happen to live near any little Borough or Corporation that sends Burgesses to Parliament, he may become ambitious and sue for the Honour of being made their Representative. Henceforward he grows Popular, bows to, and treats the Mob all round him; and whether there be any in his Discourse or not, there is good Sense in his Kitchin and his Cellar, which is more agreeable and edifying. If he be so happy as to out-tap his Competitour, and Drink his Neighbours into an Opinion of his Sobriety, he is chosen, and up he comes to that Honourable Assembly, where he shews his Wisdom best by his Silence, and serves his Country most in his absence.

I give you these two Characters, _Madam_, as irreconcileable as Water and Oyl, to shew that Men may and do often Baffle and Frustrate the Effects of a liberal Education, as well by Industry as Negligence. 'Tis hard to say, which of these two is the more Sottish; the first is such an Admirer of Letters, that he thinks it a disparagement to his Learning to talk what other Men understand, and will scarce believe that two, and two, make four, under a Demonstration from _Euclid_, or a Quotation of _Aristotle_: The latter has such a fear of Pedantry always before his Eyes, that he thinks it a Scandal to his good Breeding, and Gentility to talk Sense, or write true _English_; and has such a contemptible Notion of his past Education, that he thinks the _Roman_ Poets good for nothing but to teach Boys to cap Verses. For my Part I think the Learned, and Unlearned Blockhead pretty equal; for 'tis all one to me, whether a Man talk Nonsense, or Unintelligible Sense, I am diverted and edified alike by either; the one enjoys himself less, but suffers his Friends to do it more; the other enjoys himself and his own Humour enough, but will let no body else do it in his Company. Thus, _Madam_, I have set them before You, and shall leave you to determine a Point, which I cannot.

[Sidenote: _The Education of the Female Sex not so deficient as commonly thought._]

There are others that deserve to be brought into the Company of these upon like Honourable Reasons; but I keep them in reserve for a proper place, where I may perhaps take the Pains to draw their Pictures to the Life at full length. Let us now return to our Argument, from which we have had a long breathing while. Let us look into the manner of our Education, and see wherein it falls short of the Mens, and how the defects of it may be, and are generally supply'd. In our tender years they are the same, for after Children can Talk, they are promiscuously taught to Read and Write by the same Persons, and at the same time both Boys and Girls. When these are acquir'd, which is generally about the Age of Six or Seven Years, they begin to be separated, and the Boys are sent to the _Grammer School_, and the Girls to _Boarding Schools_, or other places, to learn Needle Work, Dancing, Singing, Musick, Drawing, Painting, and other Accomplishments, according to the Humour and Ability of the Parents, or Inclination of the Children. Of all these, Reading and Writing are the main Instruments of Conversation; though Musick and Painting may be allow'd to contribute something towards it, as they give us an insight into two Arts, that makes up a great Part of the Pleasures and Diversions of Mankind. Here then lies the main Defect, that we are taught only our Mother Tongue, or perhaps _French_, which is now very fashionable, and almost as Familiar amongst Women of Quality as Men; whereas the other Sex by means of a more extensive Education to the knowledge of the _Roman_ and _Greek_ Languages, have a vaster Feild for their Imaginations to rove in, and their Capacities thereby enlarg'd. To see whether this be strictly true or not, I mean in what relates to our debate, I will for once suppose, that we are instructed only in our own Tongue, and then enquire whether the disadvantage be so great as it is commonly imagin'd. You know very well, _Madam_, that for Conversation, it is not requisite we should be Philologers, Rhetoricians, Philosophers, Historians or Poets; but only that we should think pertinently and express our thoughts properly, on such matters as are the proper Subjects for a mixt Conversation. The _Italians_, a People as delicate in their Conversation as any in the World, have a Maxim that our selves, our Neighbours, Religion, or Business ought never to be the Subject. [Sidenote: _Religion, &c. no proper subjects for mixt Conversation._] There are very substantial Reasons, to be given for these Restrictions for Men are very apt to be vain, and impertinent, when they talk of themselves, besides that others are very jealous, and apt to suspect, that all the good things said, are intended as so many arguments of preference to them. When they speak of their Neighbours, they are apt out of a Principle of Emulation and Envy, natural to all the race of _Adam_ to lessen, and tarnish their Fame, whether by open Scandal, and Defamatory Stories, and Tales, or by malicious Insinuations, invidious Circumstances, sinister and covert Reflections. This humour

springs from an over fondness of our selves, and a mistaken conceit that anothers loss is an addition to our own Reputation, as if like two Buckets, one must necessarily rise as the other goes down. This is the basest and most ungenerous of all our natural Failures, and ought to be corrected as much as possible e'ry where; but more especially in _Italy_, where Resentments are carried so high, and Revenges prosecuted with so much Heat, and Animosity. Religion is likewise very tender there, as in all other places, where the Priests have so much Power and Authority. But even here, where our differences and Disputes have made it more tame, and us'd it to rough handling, it ought carefully to be avoided; for nothing raises unfriendly warmths among Company more than a religious Argument, which therefore ought to be banisht all Society intended only for Conversation and Diversion. Business is too dry and barren to give any Spirit to Conversation, or Pleasure to a Company, and is therefore rather to be reckon'd among the Encumbrances than Comforts of Life, however necessary. Besides these, Points of Learning, abstruse Speculations, and nice Politicks, ought, in my opinion, to be excluded; because being things that require much Reading and Consideration, they are not fit to be canvas'd _ex tempore_ in mixt Company, of which 'tis probable the greatest part will have little to say to 'em, and will scarce be content to be silent Hearers only; besides that they are not in their nature gay enough to awaken the good Humour, or raise the Mirth of the Company. Nor need any one to fear, that by these limitations Conversation shou'd be restrain'd to too narrow a compass, there are subjects enough that are in themselves neither insipid, nor offensive; such as Love, Honour, Gallantry, Morality, News, Raillery, and a numberless train of other Things copious and diverting. Now I can't see the necessity of any other Tongue beside our own to enable us to talk plausibly, or judiciously upon any of these Topicks: Nay, I am very confident that 'tis possible for an ingenious Person to make a very considerable progress in most parts of Learning, by the help of English only. [Sidenote: _Great Improvements to be made by the help of English Books only._] For the only reason I can conceive of learning Languages, is to arrive at the Sense, Wit or Arts, that have been communicated to the World in 'em. Now of those that have taken the pains to make themselves Masters of those Treasures, many have been so generous as to impart a share of 'em to the Publick, by Translations for the use of the Unlearned; and I flatter my self sometimes, that several of these were more particularly undertaken by Ingenious, good Natur'd Men in Kindness and Compassion to our Sex. But whatever the Motives were, the obliging Humour has so far prevail'd, that scarce any thing either Ancient or Modern that might be of general use either for Pleasure, or Instruction is left untouch'd, and most of them are made entirely free of our Tongue. I am no Judge either of the Accuracy, or Elegance of such Performances; but if I may credit the report of Learned and Ingenious Gentlemen, (whose Judgment or Sincerity I have no reason to question) many of those excellent Authors have lost nothing by the change of Soil. I can see and admire the Wit and Fancy of _Ovid_ in the Translation of his Epistles, and Elegies, the softness and Passion of _Tibullus_, the Impetuosity and Fire of _Juvenal_, the Gayety, Spirit and Judgment of _Horace_; who, though he may appear very different from himself through the diversity, and inequality of the Hands concern'd in making him speak _English_, yet may easily be guess'd at from the several excellent Pieces render'd by the Earl of _Roscommon_, Mr. _Cowley_, Mr. _Dryden_, Mr. _Congreve_, Mr. _Brown_ and other ingenious Gentlemen, who have oblig'd the Nation with their excellent Versions of some parts of him. Nor is it possible to be insensible of the sweetness and Majesty of _Virgil_, after having read those little but Divine Samples already made Publick in _English_ by Mr. _Dryden_, which gives us so much Impatience to see the whole Work entire by that admirable Hand. I have heard some ingenious Gentlemen say, That it was impossible to do Justice in our Tongue to these two last Celebrated Roman Poets, and I have known others, of whose Judgments I have as high an Opinion, affirm the contrary; my ignorance of Latin disables me from determining whether we are in the right, but the Beauty of what I have already seen by the means of those Gentlemen, has so far prejudic'd me in favour of the latter; that might I have 'em entire from the same hands, I think I shou'd scarce envy those who can tast the pleasure of the Originals. Nor is it to the Poets only, that we stand indebted for the Treasure of Antiquity, we have no less Engagements to those, who have successfully labour'd in Prose, and have mads us familiar with _Plutarch_, _Seneca_, _Cicero_, and in general with all the famous Philosophers, Orators and Historians, from whom we may at once learn both the Opinions and Practices of their Times. Assisted by these helps, 'tis impossible for any Woman to be ignorant that is but desirous to be otherwise, though she know no part of Speech out of her Mother Tongue. But these are neither the only, nor the greatest Advantages we have; all that is excellent in _France_, _Italy_, or any of our neighbouring Nations is now become our own; to one of whom, I may be bold to say, we are beholding for more, and greater Improvements of Conversation, than to all Antiquity, and the learned Languages together. [Sidenote: _The name of Learning unjustly restrained to the knowledge of Latin and Greek only._] Nor can I imagine for what good Reason a Man skill'd in Latin and Greek, and vers'd in the Authors of Ancient Times shall be call'd Learned; yet another who perfectly understands _Italian_, _French_, _Spanish_, _High Dutch_, and the rest of the _European_ Languages, is acquainted with the Modern History of all those Countries, knows their Policies, has div'd into all the Intrigues of the several Courts, and can tell their mutual Dispositions, Obligations and Ties of Interest one to another, shall after all this be thought Unlearned for want of those two Languages. Nay, though he be never so well vers'd in the Modern Philosophy, Astronomy, Geometry and Algebra, he shall notwithstanding never be allow'd that honourable Title. I can see but one apparent Reason for this

unfair Procedure; which is, that when about an Age and an half ago, all the poor Remains of Learning then in Being, were in the hands of the Schoolmen; they wou'd suffer none to pass Muster, that were not deeply engag'd in those intricate, vexatious and unintelligible Trifles, for which themselves contended with so much Noise and Heat; or at least were not acquainted with _Plato_ and _Aristotle_, and their Commentators; from whence the Sophistry and Subtleties of the Schools at that time were drawn. This Usurpation was maintain'd by their Successors, the Divines, who to this day pretend almost to the Monopoly of Learning; and though some generous Spirits have in good measure broke the neck of this Arbitrary, Tyrannical Authority; yet can't they prevail to extend the name of Learning beyond the Studies, in which the Divines are more particularly conversant. Thus you shall have 'em allow a Man to be a wise Man, a good Naturalist, a good Mathematician, Politician, or Poet, but not a Scholar, a learned Man, that is no Philologer. For my part I think these Gentlemen have just inverted the use of the Term, and given that to the knowledge of words, which belongs more properly to Things. I take Nature to be the great Book of Universal Learning, which he that reads best in all or any of its Parts, is the greatest Scholar, the most learned Man; and 'tis as ridiculous for a Man to count himself more learned than another, if he have no greater extent of knowledge of things, because he is more vers'd in Languages; as it would be for an Old Fellow to tell a Young One, his Eyes were better than his, because he Reads with Spectacles, the other without.

[Sidenote: _English Books the best helps to Conversation._]

Thus, _Madam_, you see we may come in Time to put in for Learning, if we have a mind, without falling under the Correction of Pedants. But I will let Learning alone at present, because I have already banish'd it (though not out of disrespect) from mix'd Conversation; to which we will return, and of which the greatest Magazines and Supports are still in Reserve. I mean the many excellent Authors of our own Country, whose Works it were endless to recount. Where is Love, Honour and Bravery more lively represented than in our Tragedies, who has given us Nobler, or juster Pictures of Nature than Mr. _Shakespear_? Where is there a tenderer Passion, than in the Maids Tragedy? Whose Grief is more awful and commanding than Mr. _Otways_? Whose Descriptions more Beautifull, or Thoughts more Gallant than Mr. _Drydens_? When I see any of their Plays acted, my Passions move by their Direction, my Indignation, my Compassion, my Grief are all at their Beck. Nor is our Comedy at all inferiour to our Tragedy; for, not to mention those already nam'd for the other part of the Stage, who are all excellent in this too, Sir _George Etherege_ and Sir _Charles Sedley_ for neat Raillery and Gallantry are without Rivals, Mr. _Wicherley_ for strong Wit, pointed Satyr, sound and useful Observations is beyond Imitation; Mr. _Congreve_ for sprightly, gentile, easie Wit falls short of no Man. These are the Masters of the Stage; but there are others who though of an inferiour Class, yet deserve Commendation, were that at present my Business. Nay, even the worst of 'em afford us some diversion; for I find a sort of foolish Pleasure, and can laugh at Mr. _D——y_'s Farce, as I do at the Tricks, and Impertinencies of a Monkey; and was pleased to see the humour and delight of the Author in Mr. _H——n_'s Eating, and Drinking Play which I fancy'd was written in a Victualling House. In short, were it not for the too great frequency of loose Expressions, and wanton Images, I should take our Theaters for the best Schools in the World of Wit, Humanity, and Manners; which they might easily become by retrenching that too great Liberty. Neither have the Poets only, but the Criticks too Endeavour'd to compleat us; Mr. _Dennis_ and Mr. _Rimer_ have by their Ingenious, and judicious labours taught us to admire the Beauties as we ought, and to know the faults of the former. Nor are we less beholding to these for forming our Judgments, than to those for raising our Fancies.

These are the Sources from whence we draw our gayer part of Conversation; I don't mean in exclusion to the other parts of Poetry, in most of which (as I have heard good Judges say) we equal at least the Ancients, and far surpass all the Moderns. I honour the Names, and admire the Writings of _Denham_, _Suckling_ and _D'avenant_, I am ravish'd with the Fancy of _Cowley_, and the Gallantry of _Waller_. I reverence the _Fairy Queen_, am rais'd, and elevated with _Paradise Lost_, _Prince Arthur_ composes and reduces me to a State of Yawning indifference, and Mr. _W—stl—y_'s _Heroicks_ lull me to Sleep. Thus all Ranks and Degrees of Poets have their use, and may be serviceable to some body or other from the Prince to the Pastry Cook, or Past-board Box-maker. I should mention our Satyrists, but it would be endless to descend to every particular, of these Mr. _Oldham_ is admirable, and to go no further, the inimitable Mr. _Butler_ will be an everlasting Testimony, of the Wit of his Age, and Nation, and bid eternal defiance to the Wits of all Countries, and future Ages to follow him in a Path before untrack'd. Our Prose Writers, that are eminent for a gay Style and Iovial Argument, are so many, that it would swell this Letter too much to name 'em, so that I shall only take notice, that whoever can read without Pleasure, or Laughter, _The contempt of the Clergy_, and the following Letters and Dialogues by the same Author, or the facetious Dialogues of Mr. _Brown_ must be more Splenetick than _Heraclitus_, or more stupid, than the Ass he laugh'd at.

Nor are we less provided for the serious Part; Morality has generally been the Province of our Clergy who have treated of all parts of it very largely with so much Piety, Solidity, and Eloquence, that as I think I may venture to say, they have written more upon it

than the Clergy of all the rest of the World; so I believe no Body will deny that they have written better. Yet I cou'd wish, that our Ingenious Gentlemen wou'd employ their Pens oftner on these Subjects; because the severity of the other's Profession obliges 'em to write with an Air, and in a Style less agreable, and inviting to Young People, Not that we are without many excellent Pieces of Morality, Humanity and Civil Prudence written by, and like Gentlemen. But it is the Excellence of 'em, and the ability of our Gentlemen, which appears in the Spirit, Wit, and curious Observations in those Pieces, which make me desire more of the same Nature, Who can read the Essays of that Wonderful Man my Lord _Bacon_, or the no less to be admir'd Sir _Walter Raleigh_'s, or Mr. _Osborns_ advice to a Son, the _Advice to a Daughter_, Sir _William Temple_'s, or Sir _George Machenzie_'s Essays, Sir _Roger L'Estrange_'s Esop (to which last we are likewise oblig'd for an incomparable Version of _Seneca_) and abundance of others, without wishing for more from the same or the like hands? Our Neighbours the _French_, have written a great deal of this kind, of the best of which we have the benefit in _English_; but more particularly the _Sieurs_, _Montagne_, _Rochefaucaut_, and St. _Evremont_ deserve to be immortal in all Languages. I need not mention any more, it is apparent from these that Women want not the means of being Wise and Prudent without more Tongues than one; nay, and Learned too, if they have any Ambition to be so.

The numberless Treatises of Antiquities, Philosophy, Mathematicks, Natural, and other History (in which I can't pass silently by, that learned One of Sir _Walter Raleigh_, which the World he writ of can't match) written originally in, or translated to our Tongue are sufficient to lead us a great way into any Science our Curiousity shall prompt us to. The greatest difficulty we struggled with, was the want of a good Art of Reasoning, which we had not, that I know of, till that defect was supply'd by the greatest Master of that Art Mr. _Locke_, whose Essay on Human Understanding makes large amends for the want of all others in that kind.

Thus Madam I have endeavour'd to obviate all our Adversarie's Objections, by touching upon as great a Variety of things relating to the Subject as I conveniently cou'd. Yet I hope I have troubled you with nothing but what was necessary to make my way clear, and plain before me; and I am apt to think I have made it appear, that nothing but disencouragement or an Idle Uncurious Humour can hinder us from Rivalling most Men in the knowledge of great Variety of things, without the help of more Tongues than our Own; which the Men so often reproachfully tell us is enough. This Idleness is but too frequently to be found among us, but 'tis a Fault equally common to both Sexes. Those that have means to play the Fool all their lives, seldom care for the trouble of being made wise. We are naturally Lovers of our Ease, and have great apprehensions of the difficulty of things untry'd; Especially in matters of Learning, the common Methods of acquiring which are so unpleasant, and uneasie. I doubt not but abundance of noble Wits are stiffled in both Sexes, for want but of suspecting what they were able to do, and with how much facility. Experience shews us every day Blockheads, that arrive at a moderate, nay sometimes a great Reputation by their Confidence, and brisk attempts which they maintain by their Diligence; while great Numbers of Men naturally more Ingenious lye neglected by, for want of Industry to improve, or Courage to exert themselves. No Man certainly but wishes he had the Reputation in, and were Respected and Esteem'd by the World as he sees some Men are for the Fruits of their Pens; but they are loth to be at the pains of an Attempt, or doubt their sufficience to perform; or what I believe is most general, never to enquire so far into themselves, and their own Abilities, as to bring such a thought into their Heads. This last I fancy is the true Reason, why our Sex, who are commonly charged with talking too much, are Guilty of Writing so little. I wish they would shake of this lazy Despondence, and let the noble examples of the deservedly celebrated Mrs. _Philips_, and the incomparable Mrs. _Behn_ rouse their Courages, and shew Mankind the great injustice of their Contempt. I am confident they would find no such need of the assistance of Languages as is generally imagin'd. [Sidenote: _Ignorance of Latine_ &c. _no disadvantage._] Those that have of their own need not graft upon Foreign Stocks. I have often thought that the not teaching Women Latin and Greek, was an advantage to them, if it were rightly consider'd, and might be improv'd to a great heigth. For Girles after they can Read and Write (if they be of any Fashion) are taught such things as take not up their whole time, and not being suffer'd to run about at liberty as Boys, are furnish'd among other toys with Books, such as _Romances_, _Novels_, _Plays_ and _Poems_; which though they read carelessly only for Diversion, yet unawares to them, give 'em very early a considerable Command both of Words and Sense; which are further improv'd by their making and receiving Visits with their Mothers, which gives them betimes the opportunity of imitating, conversing with, and knowing the manner, and address of elder Persons. These I take to be the true Reasons why a Girl of Fifteen is reckon'd as ripe as a Boy of One and Twenty, and not any natural forwardness of Maturity as some People would have it. These advantages the Education of Boys deprives them of, who drudge away the Vigour of their Memories at Words, useless ever after to most of them, and at Seventeen or Eighteen are to begin their Alphabet of Sense, and are but where the Girles were at Nine or Ten. Yet because they have learnt Latin and Greek, reject with Scorn all _English_ Books their best helps, and lay aside their Latin ones, as if they were already Masters of all that Learning, and so hoist Sail for the wide World without a Compass to Steer by. Thus I have fairly stated the difference between us, and can find no such disparity in Nature or Education as they contend for; but we have a sort of ungenerous Adversaries, that deal more in

Scandal than Argument, and when they can't hurt us with their Weapons, endeavour to annoy us with stink Pots. Let us see therefore, _Madam_, whether we can't beat them from their Ammunition, and turn their own Artillery upon them; for I firmly believe there is nothing, which they charge upon us, but may with more Justice be retorted upon themselves.

They tax us with a long List of Faults, and Imperfections, and seem to have taken a Catalogue of their own Follies and Vices, not with design to correct them, but to shift of the Imputation to us. There is no doubt, but particular Women may be found upon whom every charge may be justified; but our Sex is not answerable for them, till they prove there are no such Men, which will not be before Dooms-day. However, like ill Neighbours they bring the Dirt out of their own Homes not out of Neatness, but out of Envy to their Neighbours, at whose Doors they lay it. But let them remove their Follies as oft as they please, they are still as constant to them, as the _Needle_ to the _North Pole_, they point them out which way soever they move. Let us see what these Qualities are, they so liberally bestow upon us, and after see how they fit the Donours, and survey 'em in their proper Figures and Colours. The most familiar of these are Vanity, Impertinence, Enviousness, Dissimulation, Inconstancy, _&c._

[Sidenote: _Vanity._]

To begin with Vanity, it is a Failing the greatest Part of Mankind are tinctured with, more or less. For all Men are apt to flatter themselves with a Fancy, that they have some one or more good Quallities, or extraordinary Gifts, that raise 'em above the ordinary Level of Men; and therefore hug and cherish, what they think valuable and singular in 'em. It is never commendable, sometimes pardonable, when the excellencies are real, and it is moderate so much must be allow'd to humane frailty. It is ridiculous and intollerable when it is extravagant, misplac'd, or groundless. It is very injudicious, and makes men commonly dote on their Defects, and expose their blemishes by their Fondness, which makes 'em more remarkable by the care and ornament bestow'd on 'em. It persuades hard Favour'd and distorted Fellows to dress, and value their Persons, Cowards to pretend to Courage, and provoke Beatings, Blockheads to set up for Wit, and make themselves ridiculous in Print, Upstarts to brag of their Families, and be reminded of the Garrets they were born, and the Stalls they were brought up in. In Women the object of it is their Beauty, and is excusable in those that have it. Those that have it not may be pardon'd, if they endeavour at it; because it is the only undisputed advantage our Sex has over the other, and what makes 'em respected beyond all other Perfections, and is alone ador'd. In Men it has not only this Object, but all those before mention'd, and a hundred other. It is admirably seen in a Writing, reciting Fop Author, is in full Lustre in a Beau, but its most unlucky Prospect is in a Swaggering Coward, who is a Fool beyond the Conviction of Smart. [Sidenote: _Character of a Bully._] His Courage is like an Ague Fit, that leaves him upon a Fright, and returns when he is out of the reach of a Cudgel. He spends much time in the Fencing School, and Fights briskly where there is no danger of Wounds nor Smart. His Hands are instructed, but his Heels do him all the Service. He is a nice observer of Punctilio's, and takes more Affronts than are given him. He draws first, and runs first, and if ever he makes another Man run, it is after him. He is a Pebble that sparkles like a Diamond, but wants hardness. He talks perpetually of what he will do, but thinks continually of what he shall suffer. He is often in Quarels, yet seldom in Rencounters, and is glad of a Challenge, that he may know whom, and when to avoid. He brings up the Rear at an Engagement, and leads the Van in the Retreat. He is a Man of much Passion, but the most predominant is his Fear. He offers affronts readily, but has too much honour to justifie them, and will submit to any terms of satisfaction rather than occasion Blood-shed. He is so full of Courage, that it boils over when there is no occasion, and his _Sword_ and _Person_ are always at Leisure, and at your Service, till you want them, and then to his great Trouble, he is always indispensably engag'd otherwise. He wears _Red_, and a long _Sword_ openly to shew his Valour, and _Mail_, privately to shew his Discretion. He threatens terribly, but he is like a Witch, if you draw Blood of him, he has no power to hurt you. No Man shews or boasts more of his Scars with less Reason. He scorns to take a blow in the Face, and a Back-piece is as good to him as a whole sute of Armour. He is at first the Terrour of all the _Young Bullies_, at last their Maygame, and they blood their _Cub Hectors_ upon him, as they do young _Beagles_ on a _Hare_. Good usage makes him insolent, but he fawns like a _Spaniel_ most upon those that beat him. When he is discover'd by all the rest of the World, the Cheat passes still upon himself, and he is pleas'd with the terrible Figure he makes in his Glass, tho' he is ready to shake at his own Shaddow.

[Sidenote: _Character of a Scowrer._]

There are men of an humour directly opposite to this, yet e'ry whit as Mad, Foolish, and Vain; these are your Men of nice Honour, that love Fighting for the sake of Blows, and are never well but when they are wounded They are severe Interpreters of Looks, are affronted at every Face that don't please 'em, and like true Cocks of the Game have a quarrel to all Mankind at first sight. They are passionate Admirers of scarr'd Faces, and dote on a Wooden Leg. They receive a Challenge like a _Billet Douce_, and a home thrust as a Favour. Their common Adversary is the Constable, and their usual Lodging the Counter. Broken heads are a diversion, and an Arm in a Scarfe is a high satisfaction. They are frugal in their expences with the Taylor, for they have their Doublets pinkt on

their Backs, but they are as good as an Annuity to the Surgeon, tho' they need him not to let 'em blood. _Flanders_ is their Mistress, and a Clap from her carries 'em off the Stage. If they return, an _Hospital_ is their Retreat, or the _Sheriff_ their Executour. These two, _Madam_, are very different extravagances, and very strange one's, yet they are real, and such as appear every day. But, what is most to be wonder'd at, arise both from the same Principle, and the same mistaken Notion, and are only differenc'd by the diversity of Tempers in Men. The common Motive to both is Vanity, and they jointly concurr in this Opinion, that Valour is the most estimable, and most honourable Quality, that Man is capable of; they agree in a desire to be honour'd and fear'd, but they differ in their methods in persuing this common End. The one is naturally active, bold and daring; and therefore takes the true course to arrive at it by shewing what he can do, by what he dare suffer, and his immoderate desire and indiscretion suffer him to know no bounds. The other is mean Spirited and fearful, and seeks by false Fire to Counterfeit a heat that may pass for genuine to conceal the Frost in his Blood, and like an ill Actor, over-does his Part for want of understanding it, which 'tis impossible he shou'd. Among peaceable Men, and those of his own Temper he comes of with Colours flying, and those are the Men he wou'd be valiant amongst only, cou'd he read Men's hearts. But the first Rencounter betrays the Ass thro' the Lions Skin, and he is Cudgel'd like an Ass in Spite of his Covering. It is our happiness _Madam_, that we lie under no manner of Temptation from these two Vanities, [Sidenote: _Imitation ridiculous._] whereof one is so dangerous, the other so ridiculous. For all humours that are forc'd against the natural bent of our tempers must be so. Nature is our best guide, and has fitted ev'ry Man for somethings more particularly than others; which if they had the sense to prosecute, they wou'd at least not be ridiculous, if they were not extaordinary. But so prevalent are our Vanity, and this Apish Humour of Imitation, that we persuade our selves, that we may practise with applause, whatever we see another succeed in, tho' as contrary to the intent of our Nature, as Dancing to an Elephant; so some Men that talk well of serious matters, are so mov'd at the applause some merry Drolls gain, that they forget their gravity, and aiming to be Wits, turn Buffoons; There are others, that are so taken with the actions and grimace of a good Mimick, that they fall presently to making awkard Faces and wry Mouths, and are all their lives after in a Vizor, Maskt tho' bare fac'd.

These, and innumerable others of the like Nature, are the lesser Follies of Mankind, by which their Vanity makes 'em fit only to be laugh'd at. There are others, who by more studied and refin'd Follies arrive to be more considerable, and make a great Figure and Party among their Sex.

[Sidenote: _Character of a Beau._]

Of the first rank of these is the _Beau_, who is one that has more Learning in his Heels than his Head, which is better cover'd than fill'd. His Taylor and his Barber are his Cabinet Councel, to whom he is more beholding for what he is, than to his Maker. He is One that has travell'd to see Fashions, and brought over with him the newest cut suit, and the prettiest Fancy'd Ribbands for Sword Knots. His best Acquaintance at _Paris_ was his Dancing Master, whom he calls the Marquiss, and his chief Visits to the Opera's. He has seen the _French_ King once, and knows the name of his cheif Minister, and is by this suffciently convinc'd that there are no Politicians in any other Part of the World. His improvements are a nice Skill in the Mode, and a high Contempt of his own Country, and of Sense. All the knowledge he has of the Country, or Manners of it, is in the keeping of the Valet that follow'd him hither, and all that he retains of the Language is a few modish words to lard his discourse with, and shew his Breeding, and the names of his Garniture. He shou'd be a Philosopher, for he studies nothing but himself, yet ev'ry one knows him better, that thinks him not worth knowing. His looks and gestures are his constant Lesson, and his Glass is the Oracle that resolves all his mighty doubts and scruples. He examines and refreshes his Complexion by it, and is more dejected at a Pimple, than if it were a Cancer. When his Eyes are set to a languishing Air, his Motions all prepar'd according to Art, his Wig and his Coat abundantly Powder'd, his Gloves Essenc'd, and his Handkercher perfum'd and all the rest of his Bravery rightly adjusted, the greatest part of the day, as well the business of it at home, is over; 'tis time to launch, and down he comes, scented like a Perfumers Shop, and looks like a Vessel with all her rigging under sail without Ballast. A Chair is brought within the door, for he apprehends every Breath of Air as much, as if it were a Hurricane. His first Vesit is to the _Chocolate_ House, and after a quarter of an Hours Compliment to himself in the great Glass, he faces about and salutes the Company, and puts in practice his Mornings Meditations; When he has made his Cringes round, and play'd over all his Tricks, out comes the fine _Snush Box_, and his _Nose_ is Regal'd a while: After this he begins to open, and starts some learned Arguments about the newest Fashion, and hence takes occasion to commend the next Man's Fancy in his Cloths, this ushers in a discourse of the Appearance last _Birth Night_, or _Ball_ at Court, and so a Critick upon this _Lord_, or that _Ladies_ Masquing Habit. From hence he adjourns to the _Play-house_, where he is to be met again in the side Box, from whence he makes his Court to all the Ladies in general with his Eyes, and is particular only with the _Orange-Wench_. After a while he engages some neighbouring Vizor, and together they run over all the Boxes, take to Pieces every Face, examine every Feature, pass their Censure upon every one, and so on to their Dress; here he very Judiciously gives his opinion upon every particular, and determines whose Colours are well chosen, whose Fancy is neatest, and whose Cloths fit with most Air; but in conclusion sees no

Body compleat but himself in the whole House. After this he looks down with contempt upon the Pit, and rallies all the slovenly Fellows, and awkard Beau's (as he calls them) of t'other End of the Town, is mightily offended at their ill scented _Snush_, and in spight of all his _Pulvilio_ and _Essences_, is overcome with the stink of their _Cordovant Gloves_. To close all, _Madam_, in the Mask must give him an account of the Scandal of the Town, which she does in the History of abundance of Intrigues real or feign'd; at all which he laughs aloud and often, not to shew his satisfaction, but his Teeth. She shews him who is kept by such a Lord, Who was lately discarded by such a Knight, for granting favours too indiscreetly to such a Gentleman: who has lately been in the Country for two or three Months upon extraordinary Occasions. To all which he gives great attention, that he may pass for a Man of Intelligence in another Place. His next Stage is _Locket's_, where his Vanity, not his Stomach, is to be gratified with something that is _little_ and _dear_, _Quails_ and _Ortalans_ are the meanest of his Diet, and a Spoonful of _Green Pease_ at _Christmass_, are worth to him more than the inheritance of the _Feild_ where they grow in _Summer_. Every thing falls in his Esteem, as it falls in price, and he wou'd not so much as tast the _Wine_, if the hard name, and the high rate did not give it a relish. After a glass or two, (for a Pint is his stint) he begins to talk of his Intrigues, boasts much of the Favours he has receiv'd, and shews counterfeit Tokens, and in Conclusion, slanders some Lady or other of unquestion'd Vertue with a particular fondness for him. His Amours are all profound Secrets, yet he makes a Confidence of 'em to every Man he meets with. He pretends a great reverence for the Ladies, and a mighty tenderness of their Reputations; yet he is like a _Flesh Flye_, whatever he blows on is tainted. He talks of nothing under Quality, tho' he never obtain'd a Favour, which his Man might not have for half a Crown. He and his Footman in this Case are like _English_ and _Dutch_ at an Ordinary in _Holland_, the Fare is the same, but the Price is vastly different. Thus the Show goes forward, till he is beaten for Trespasses he was never guilty of, and shall be damn'd for Sins he never Committed. At last, with his Credit as low as his Fortune he retires sullenly to his Cloister, the _King's-Bench_, or _Fleet_, and passes the rest of his days in Privacy, and Contemplation. Here, _Madam_, if you please wee'l give him one _Visit_ more, and see the last _Act_ of the _Farce_; and you shall find him (whose Sobriety was before a _Vice_, as being only the _Pimp_ to his other _Pleasures_, and who fear'd a lighted _Pipe_ as much as if it had been a great _Gun_ levell'd at him) with his _Nose Flaming_, and his _Breath_ stinking of Spirits worse than a _Dutch Tarpawlin's_, and smoking out of a short _Pipe_, that for some Months has been kept hot as constantly as a _Glass-House_, and so I leave him to his Meditation.

You wou'd think it yet more strange, that any one should be _Slovenly_ and _Nasty_ out of _Vanity_; yet such there are I can assure you, _Madam_, and cou'd easily give a description of 'em, but that so foul a Relation must needs be Nauseous to a Person so Neat as your _Self_; and wou'd be treating You as the _Country Squire_ did his _Court Friend_, who when he had shew'd him all the Curiosities of his House and Gardens, carried him into his Hogsties. But there are more than enow to justifie what I have said of the Humour of _Diogenes_, who was as vain and as proud in his _Tub_, as _Plato_ cou'd be in the midst of his fine _Persian Carpets_, and rich _Furniture_. Vanity is only an Ambition of being taken notice of, which shews it self variously according to the humour of the Persons; which was more extravagant in the _Anti-Beau_, than in the _Beau Philosopher_. Vanity is the veriest _Proteus_ in the World, it can Ape _Humility_, and can make Men decry themselves on purpose to be Flattered; like some cunning _Preachers_ that cry up _Mortification_ and _Self-denial_ perpetually, and are pamper'd all the while by the Zeal and at the Charges of their Followers, who are affraid the good Man shou'd starve himself. It is the Blessing of Fools, and the Folly of Ingenious Men. For it makes those contentedly hugg themselves under all the scorn of the World, and the Indignities that are offer'd 'em, and these restless and dissatisfied with its applause. Both think the World envious, and that their merit is injur'd, and it is impossible to right either of 'em to their Minds; for those have no title to the pretence of merit, and these not so much as they think they have. Yet it is the Happiness of the first that they can think themselves capable of moving _Envy_; [Sidenote: _Vanity a Blessing to Fools._] for though they commonly mistake the Derision of Men, for their applause, yet Men are sometimes so ill Natur'd as to undeceive 'em, and then it is their Comfort, that these are envious Men, and misrepresent the Worlds opinion of 'em. Cou'd these Men be convinc'd of their mistake, I see nothing that shou'd hinder them from being desperate, and hanging or disposing of themselves some other such way. For though a Man may comfort himself under Afflictions, it is either that they are undeserved, or if deserved, that he suffers only for Oversights, or rash Acts, by which the wisest Men may be sometimes overtaken; that he is in the main Discreet and Prudent, and that others believe him so. But when a Man falls under his own _Contempt_, and does not only think himself not wise, but by _Nature_ made absolutely incapable of ever becoming _Wise_, he is in a deplorable _State_, and wants the common _Comfort_, as well of _Fools_, as _Wise Men_, Vanity; which in such a Case is the only proper _Mediatour_ of a _Reconcilement_. No Quality seems to be more Providentially distributed to every Man according to his Necessity; for those that have least Wit, ought to have the greatest Opinion of it; as all other Commodities are rated highest, where they are scarcest. By this means the level is better maintain'd amongst Men, who, were this imaginary Equality destroy'd, might be apt to reverence, and idolize one another too much, and forgetting the common Fate, they are all Born to, pay Honours too near divine to their Fellow Mortals. But as the humour of the World now runs, this sort of _Idolatry_ is scarce likely to come into

Fashion. We have too great an Opinion of our selves, to believe too well of any one else, and we are in nothing more difficult than in points of Wit and Understanding, in either of which we very unwillingly yield the Preference to any Man. There is nothing of which we affect to speak with more humility and indifference than our own Sense, yet nothing of which we think with more Partiality, and Presumption. There have been some so bold as to assume the Title of the _Oracles_ of _Reason_ to themselves, and their own Writings; and we meet with others daily, that think themselves _Oracles_ of _Wit_. These are the most Vexatious Animals in the World, that think they have a Priviledge to torment and plague every Body; but those most who have the best Reputation for their Wit of Judgment; as _Fleas_ are said to molest those most, who have the tenderest _Skins_, and the sweetest _Blood_.

Of these the most voluminous Fool is the Fop Poet, who is one that has always more Wit in his Pockets than any where else, [Sidenote: _Character of a Poetaster._] yet seldom or never any of his own there. _Esop_'s _Daw_ was a _Type_ of him; For he makes himself fine with the Plunder of all Parties. He is a Smuggler of Wit, and steals _French_ Fancies without paying the customary Duties. Verse is his _Manufacture_; For it is more the labour of his Finger than his brain. He spends much time in Writing, but ten times more in Reading what he has Written. He is loaden constantly with more Papers, and duller than a _Clerk_ in _Chancery_, and spends more time in _Hearings_, and _Rehearings_. He asks your Opinion, yet for fear you shou'd not jump with him, tells you his own first. He desires no Favour, yet is disappointed, if he be not Flatter'd, and is offended always at the Truth. His first Education is generally a _Shop_, or a _Counting-House_, where his acquaintance commences with the _Bell-man_ upon a new Years day. He puts him upon Intriguing with the _Muses_, and promises to _Pimp_ for him. From this time forward he hates the name of _Mechanick_, and resolves to sell all his stock, and purchase a Plantation in _Parnassas_. He is now a Poetical _Haberdasher_ of _Small Wares_, and deals very much in _Novels_, _Madrigals_, _Riddles_, _Funeral_, and _Love Odes_, and _Elegies_, and other Toyes from _Helicon_, which he has a Shop so well furnish'd with, that he can fit you with all sorts and Sizes upon all Occasions in the twinkling of an Eye. He frequents _Apollo_'s _Exchange_ in _Covent-Garden_, and picks up the freshest Intelligence what _Plays_ are upon the Stocks, or ready to be launch'd; who have lately made a good Voyage, who a saving one only, and who have suffer'd a Wreck in _Lincoln_'s-_Inn-Feilds_, or _Drury-Lane_, and which are brought into the Dock to be Careen'd and fitted for another Voyage. He talks much of _Jack Dryden_, and _Will. Wyckerley_, and the rest of that Set, and protests he can't help having some respect for 'em, because they have so much for him, and his Writings; otherwise he cou'd shew 'em to be meer Sots and Blockheads that understand little of Poetry, in comparison of himself; but he forbears 'em meerly out of Gratitude, and Compassion. Once a Month he fits out a small _Poetical Smeck_ at the charge of his Bookseller, which he lades with _French Plunder_ new Vampt in _English_, small Ventures of _Translated Odes_, _Elegies_ and _Epigrams_ of Young Traders, and ballasts with heavy _Prose_ of his own; for which returns are to be made to the several Owners in Testers, or applause from the Prentices and Tyre Women that deal for 'em. He is the Oracle of those that want Wit, and the Plague of those that have it; for he haunts their Lodgings, and is more terrible to 'em, than their Duns. His Pocket is an unexhaustible Magazine of _Rhime_, and _Nonsense_, and his Tongue like a repeating Clock with Chimes, is ready upon every touch to sound to 'em. Men avoid him for the same Reason, they avoid the _Pillory_, the security of their _Ears_; of which he is as merciless a Persecutor. He is the Bane of Society, a Friend to the Stationers, the Plague of the Press, and the Ruine of his Bookseller. He is more profitable to the _Grocers_ and _Tabacconists_ than the _Paper Manufacture_; for his Works, which talk so much of Fire and Flame, commonly expire in their Shops in _Vapour_ and _Smoak_. If he aspire to _Comedy_, he intrigues with some experienc'd _Damsel_ of the _Town_, in order to instruct himself in the humour of it, and is cullied by her into _Matrimony_, and so is furnish'd at once with a Plot, and two good Characters, himself and his Wife, and is paid with a Portion for a Jointure in _Parnassus_, which I leave him to make his best of.

[Sidenote: _Vanity Universal._]

I shall not trouble you with any more Instances of the foolish vanities of Mankind; because I am affraid I have been too large upon that Head already. Not that I think there is any Order or Degree of Men, which wou'd not afford many and notorious instances for our Purpose. For as I think _Vanity_ almost the Universal mover of all our Actions, whether good or bad; so I think there are scarce any Men so Ingenious, or so Vertuous, but something of it will shine through the greatest Part of what they do, let them cast never so thick a Vail over it. What makes Men so solicitous of leaving a Reputation behind 'em in the World, though they know they can't be affected with it after Death, but this even to a degree of Folly? What else makes great Men involve themselves in the Fatigues and Hazards of War, and intricate Intrigues of State, when they have already more than they can enjoy, but an Itch of being talk'd of and remembred, to which they sacrifice their present happiness and repose?

But I shall carry these Considerations no farther; because I have already singled out some of those many whose _Vanity_ is more extravagant and ridiculous, than any our Sex is chargeable with, these slight Touches may serve to let 'em see, that even the

greatest, and Wisest are not wholely exempt, if they have it not in a higher Degree, tho' they exercise it in things more Popular, and Plausible. I hope therefore the burthen of this good Quality will not hereafter be laid upon us alone, but the Men will be contented to divide the Load with us, and be thankful that they bear less than their Proportion.

[Sidenote: _Impertinence._]

Impertinence comes next under Consideration, in which I shall be as brief, as I conveniently can, in regard I have been so long upon the precedeing Head. _Impertinence_ is a humour of busying our selves about things trivial, and of no Moment in themselves, or unseasonably in things of no concern to us, or wherein we are able to do nothing to any Purpose. Here our Adversaries insult over us, as if they had gain'd an intire _Victory_, and the _Field_ were indisputable; but they shall have no cause for _Triumph_, this is no Post of such mighty advantage as they fondly persuade themselves. This _Presumption_ arises from an Erroneous Conceit, that all those things in which they are little concern'd, or consulted, [Sidenote: _Commonly mistaken._] are triffles below their care or notice, which indeed they are not by Nature so well able to manage. Thus, when they hear us talking to, and advising one another about the Order, Distribution and Contrivance of _Houshold Affairs_, about the _Regulation_ of the _Family_, and _Government_ of _Children_ and _Servants_, the provident management of a _Kitchin_, and the decent ordering of a _Table_, the suitable _Matching_, and convenient disposition of _Furniture_ and the like, they presently condemn us for impertinence. Yet they may be pleased to consider, that as the affairs of the World are now divided betwixt us, the _Domestick_ are our share, and out of which we are rarely suffer'd to interpose our Sense. They may be pleased to consider likewise, that as light and inconsiderable as these things seem, they are capable of no Pleasures of Sense higher or more refin'd than those of _Brutes_ without our care of 'em. For were it not for that, their Houses wou'd be meer _Bedlams_, their most luxurious Treats, but a rude confusion of ill Digested, ill mixt Scents and Relishes, and the fine Furniture, they bestow so much cost on, but an expensive heap of glittering _Rubbish_. Thus they are beholding to us for the comfortable Enjoyment of what their labour or good Fortune hath acquir'd or bestow'd, and think meanly of our care only, because they understand not the value of it. But if we shall be thought impertinent for Discourses of this Nature, as I deny not but we sometimes justly may, when they are unseasonable; what censure must those Men bear, who are prepetually talking of _Politicks_, _State Affairs_ and _Grievances_ to us, in which perhaps neither they, nor We are much concern'd, or if we be, are not able to propose, much less to apply any Remedy to 'em? Surely these are impertinent; not to call the _Beau_, or _Poetaster_ on the _Stage_ again, whose whole Lives are one continued scene of Folly and Impertinence; let us make the best of our _News Monger_.

[Sidenote: _Character of a Coffee-House Politician._]

He is one whose Brains having been once over-heated, retain something of the Fire in 'em ever after. He mistakes his Passion for Zeal, and his Noise and Bustling, for Services. He is always full of Doubts, Fears, and Jealousies, and is never without some notable Discovery of a deep laid Design, or a dangerous Plot found out in a _Meal Tub_, or _Petticoat_. He is a mighty Listner after _Prodigies_, and never hears of a _Whale_, or a _Comet_, but he apprehends some sudden _Revolution_ in the State, and looks upon a _Groaning-board_, or a _speaking-head_, as fore-runners of the _Day_ of _Judgment_. He is a great Lover of the King, but a bitter Enemy to all about him, and thinks it impossible for him to have any but _Evil Counsellors_, and though he be very zealous for the Government, yet he never finds any thing in it but _Grievances_ and _Miscarriages_ to declaim upon. He is a Well-wisher to the _Church_, but he is never to be reconcil'd to the _Bishops_ and _Clergy_, and rails most inveterately at the _Act_ of _Uniformity_. He hates _Persecution_ implacably, and contends furiously for _Moderation_, and can scarce think well of the _Toleration_, because it is an Act of the State. He professes himself of the _Church_ of _England_, pretends to like the Worship of it, but he goes to Meetings in spight to the _Parson_ of his _Parish_. His _Conscience_ is very tender and scrupulous in Matters of Ceremony, but it is as steely and tough as Brawn behind his Counter, and can digest any Sin of Gain. He lodges at home, but he lives at the _Coffee-house_. He converses more with _News Papers_, _Gazettes_ and _Votes_, than with his _Shop Books_, and his constant Application to the _Publick_ takes him off all Care for his _Private Concern_. He is always settling the _Nation_, yet cou'd never manage his own _Family_. He is a mighty Stickler at all _Elections_, and tho' he has no _Vote_, thinks it impossible any thing shou'd go right unless he be there to Bawl for it. His business is at _Home_, but his thoughts are in _Flanders_, and he is earnestly investing of Towns till the _Sheriff's Officers_ beleaguer his Doors. He is busie in forcing of _Counterscarps_, and storming of _Breaches_, while his _Creditors_ take his _Shop_ by surprize, and make Plunder of his _Goods_. Thus by mending the _State_, He marrs his own _Fortune_; and never leaves talking of the _Laws_ of the _Land_, till the Execution of 'em silence him.

This sort of Impertinents the _Coffee-houses_ are every day full of; nay, so far has this contagious Impertinence spread it self, that _Private Houses_, and _Shops_, nay, the very _Streets_ and _Bulks_ are infected and pester'd with Politicks and News. Not a Pot

cou'd go glibly down, or a flitch go merrily forward without _Namur_, a while ago; 'twas _Spice_ to the _Porter's Ale_, and _Wax_ to the _Cobler's Thread_; the one suspended his Draught, and the other his Awl to enquire what was become of the _Rogue_, and were very glad to hear he was taken, and expected no doubt he shou'd come over and make 'em a _Holy-day_ at his Execution. They were mightily rejoyc'd at the Arresting of the Mareschal _Boufflers_, and made no question but they shou'd see him amongst the rest of the _Beasts_ at _Bartholomew Fair_ for Two Pence. This Folly of the _Mob_ was in some measure excusable, because their Ignorance led 'em into an expectation of seeing what had given the World so much Trouble. But those that have better knowledge of things have no such _Plea_, they ought to have been wiser, than to have busied themselves so much and so earnestly about affairs, which all their care and Sollicitude could have no more influence upon, than over the Weather. 'Twas pleasant to see what Shoals the report of the arrival of a _Holland_, or _Flanders Mail_, brought to the _Secretary's Office_, the _Post Office_, and the _Coffee-Houses_; every one Crowding to catch the News first, which as soon as they had, they posted away like so many Expresses to disperse it among their Neighbours at more distance, that waited with Ears prickt up to receive 'em, or walk'd uneasily with a Foolish Impatience to and from the Door, or Window, as if their looking out so often wou'd fetch 'em the sooner. Most Men in their News are like _Beau_'s in their Diet, the worst is welcome while 'tis fresh and scarce, and the best is not worth a Farthing when it has been blown upon; and commonly they fare like _Beau_'s, are fond of it while 'tis young and insipid, and neglect it when 'tis grown up to its full, and true relish. No sooner is it rumour'd that a Breach is made in the _Castle Wall_, or the _White Flag_ hung out, but a _Council of War_ is call'd in every _Coffee-house_ in Town; the _French_, and _Dutch Prints_, their Intelligencers are call'd for immediately, and examin'd, and not a Shot is mention'd but they start as if the Ball whizz'd just then by their Ears. After this follows a serious debate about a general Assault, and whether they shall storm immediately, or not; who shall begin the Attack; what Conditions shall be granted on Capitulation. The Castle of _Namur_ thus taken, or Surrender'd, they proceed to take their Measures, and settle the next Campaign, and whatever harm we suffer by those mischeivous _French_ in the Field, they are sure to take sufficient Revenge, and pay 'em off Swingingly in the _Coffee-houses_: But as if this were not enough, Our greatest Actions must be Buffoon'd in Show, as well as Talk. Shall _Namur_ be taken and our Hero's of the City not show their Prowess upon so great an Occasion? [Sidenote: _City Militia._] It must never be said, that the _Coffee-houses_ dar'd more than _Moor-Fields_; No, for the honour of _London_, out comes the Foreman of the _Shop_ very Formidable in _Buff_ and _Bandileers_, and away he marches with Feather in Cap, to the general Rendezvous in the _Artillery Ground_. There these terrible Mimicks of _Mars_ are to spend their Fury in _Noise_ and _Smoke_, upon a _Namur_ erected for that purpose on a _Molehill_, and by the help of _Guns_ and _Drums_ out-stink and out-rattle _Smith-field_ in all its Bravery, and wou'd be too hard for the greatest Man in all _France_, if they had him but amongst 'em. Yet this is but Skirmishing, the hot Service is in another Place, when they engage the _Capons_ and _Quart Pots_; never was Onset more Vigorous, For they come to Handy-Blows immediately, and now is the real cutting and slashing, and Tilting without Quarter, Were the Towns in _Flanders_ all wall'd with _Beef_, and the _French_ as good meat as _Capons_, and drest the same way, the King need never beat his Drums for Soldiers; all these Gallant Fellows wou'd come in Voluntarily, the meanest of which wou'd be able to eat a Mareschal, and whom nothing cou'd oppose in conjunction.

Nothing is more common, and familiar than this sort of Impertinence; Most Men wou'd have little to do, did they busie themselves about nothing, but what they understood, or were concern'd in. A Monkey is not liker a Man in his Figure, than in his humour. How ready are all Mankind to censure without Authority, and to give advice unaskt, and without reason. They are very much mistaken, that think this forwardness to thrust themselves into other's affairs, springs from any Principle of Charity or Tenderness for 'em, or the least Regard to the Welfare of their Neighbours. 'Tis only a Vain Conceit that they are wiser, and more able to advise, which puts 'em upon engaging in things they have nothing to do with, [Sidenote: _Officious Impertinences._] and passing their Judgments Magisterially on matters they have no Cognizance of, and generally little Information, or Skill in. They are desirous the World shou'd have as great an Opinion of 'em as they have of themselves, and therefore impertinently interpose their own Authority and Sense, tho' never so little to the purpose, only to shew how well they cou'd manage, were it their Business; thus they advise without good intention, or kindness, and censure without design, or malice to the Persons counsell'd, or reflected on, These buzzing Insects swarm as thick every where, and are as troublesome as _Muskettoes_ in the _West-Indies_. They are perpetually in a hurry of Business, yet are forc'd to rack their Inventions to employ their Leisure. They are very busie for every Body, and serve no Body. They are always in hast, and think themselves expected every where with Impatience, yet come sooner alwayes than they are welcome. They will walk a Mile, and spend an hour to tell any one how urgent their Business is, and what hast they are in to be gone. Their Expedition is their greatest Loss, For Time is the only thing that lies heavy upon their hands. They are walking _Gazetts_, that carry News from one Neighbour to another, and have their Stages about the Town as regular and certain, as a _Penny Postman_. Every Man is their acquaintance, but no Man their Friend. They drudge for every Body, and are paid by no Body, and tho' their Lives be worn out in endeavours to oblige all Mankind, when they die no one regrets their Loss, or misses their

Service.

There are another sort of Impertinents, [Sidenote: _Character of a Vertuoso._] who, as they mind not the Business of other Men where it concerns 'em not, neglect it likewise where it does; and amuse themselves continually with the Contemplation of those things, which the rest of the World slight as useless, and below their regard. Of these the most Egregious is the _Virtuoso_, who is one that has sold an Estate in Land to purchase one in _Scallop_, _Conch_, _Muscle_, _Cockle Shells_, _Periwinkles_, _Sea Shrubs_, _Weeds_, _Mosses_, _Sponges_, _Coralls_, _Corallines_, _Sea Fans_, _Pebbles_, _Marchasites_ and _Flint stones_; and has abandon'd the Acquaintance and Society of Men for that of _Insects_, _Worms_, _Grubbs_, _Maggots_, _Flies_, _Moths_, _Locusts_, _Beetles_, _Spiders_, _Grashoppers_, _Snails_, _Lizards_ and _Tortoises_. His study is like _Noah_'s Ark, the general Rendezvous of all Creatures in the _Universe_, and the greatest part of his Moveables are the remainders of his Deluge. His Travels are not design'd as Visits to the Inhabitants of any Place, but to the Pits, Shores and Hills; from whence he fetches not the Treasure, but the Trumpery. He is ravish'd at finding an uncommon shell, or an odd shap'd Stone, and is desperately enamour'd at first sight of an unusual markt Butter-flie, which he will hunt a whole day to be Master of. He trafficks to all places, and has his Correspondents in e'ry part of the World; yet his Merchandizes serve not to promote our Luxury, nor encrease our Trade, and neither enrich the Nation, nor himself. A Box or two of _Pebbles_ or _Shells_, and a dozen of _Wasps_, _Spiders_ and _Caterpillars_ are his Cargoe, He values a _Camelion_ or _Salamanders_ Egg, above all the Sugars and Spices of the _West_ and _East-indies_, and wou'd give more for the Shell of a _Star-fish_, or _Sea Urchin_ entire, than for a whole _Dutch_ Herring Fleet. He visites Mines, Colepits, and Quarries frequently, but not for that sordid end that other Men usually do, _viz._ gain; but for the sake of the fossile Shells and Teeth that are sometimes found there. He is a smatterer at _Botany_, but for fear of being suspected of any useful design by it, he employs his curiosity only about _Mosses_, _Grasses_, _Brakes_, _Thistles_, &c. that are not accus'd of any vertue in Medicine, which he distinguishes and divides very nicely. He preserves carefully those _Creatures_, which other Men industriously destroy, and cultivates sedulously those Plants, which others root up as Weeds. He is the Embalmer of deceas'd Vermin, and dresses his Mummyes with as much care, as the Ancient _Egyptians_ did their Kings. His Cash consists much in old Coins, and he thinks the Face of _Alexander_ in one of 'em worth more than all his Conquests. His Inventory is a list of the Insects of all Countries, and the Shells and Pebbles of all Shores, which can no more be compleat without two or three of remarkable _Signatures_, than an _Apothecaries_ Shop without a _Tortoise_ and a _Crocodile_, or a Country _Barber_'s without a batter'd _Cittern_. A piece of Ore with a Shell in it is a greater Present than if it were fine Gold, and a string of _Wampompeag_ is receiv'd with more joy, than a _Rope_ of _Orient Pearl_, or _Diamonds_ wou'd be. His Collection of _Garden Snails_, _Cockle Shells_ and _Vermine_ compleated, (as he thinks) he sets up for a _Philosopher_, and nothing less than Universal Nature will serve for a Subject, of which he thinks he has an entire History in his _Lumber Office_. Hence forward he _struts_ and _swells_, and despises all those little insignificant Fellows, that can make no better use of those noble incontestable Evidences of the Universal Deluge, _Scallop_ and _Oyster Shells_, than to stew _Oysters_, or melt _Brimstone_ for _Matches_. By this time he thinks it necessary to give the World an _Essay_ of his Parts, that it may think as highly of 'em (if possible) as he does himself; and finding _Moses_ hard beset of late, he resolves to give him a lift, and defend his Flood, to which he is so much oblig'd for sparing his darling Toys only. But as great Masters use, he corrects him sometimes for not speaking to his Mind, and gives him the lie now and then in order to support his Authority. He shakes the World to Atoms with ease, which melts before him as readily as if it were nothing but a Ball of Salt. He pumps even the Center, and drains it of imaginary stores by imaginary Loopholes, as if punching the Globe full of holes cou'd make his _Hypothesis_ hold Water. He is a Man of _Expedition_, and does that in a few days, which cost _Moses_ some Months to compleat. He is a Passionate Admirer of his own Works without a Rival, and superciliously contemns all _Answers_, yet the least _Objection_ throws him into the Vapours. He sets up for a grand _Philosopher_, and palms _Hypotheses_ upon the World, which future Ages may (if they please) expect to hear his Arguments for; at present he is in no humour to give 'em any other satisfaction than his own word, that he is infallible. Yet those that have a Faith complacent enough to take a Gentleman's word for his own great Abilities, may perhaps be admitted to a sight of his grand Demonstration, his _Raree Show_; the particulars of which he repeats to 'em in a whining _Tone_, e'ry whit as formal and merry, though not so Musical, as the Fellows that used formerly to carry _theirs at their Backs_. His ordinary discourse is of his _Travels under Ground_, in which he has gone farther (if he may be believ'd) than a whole Warren of _Conies_. Here he began his Collection of Furniture for his Philosophical _Toy Shop_, which he will conclude with his Fortune, and then like all Flesh revert to the place from whence he came, and be translated only from one Shop to another.

This, _Madam_, is another sort of Impertience our Sex are not liable to; one wou'd think that none but _Mad Men_, or highly _Hypochondriacal_, cou'd employ themselves at this rate. I appeal to you, or indeed to any Man of Sense, whether acts like the wiser Animal; the man that with great care, and pains distinguishes and divides the many Varieties of Grass, and finds no other

Fruit of his labour, than the charging of his Memory with abundance of superfluous Names; or the Ass that eats all promiscuously, and without distinction, to satisfy his _Appetite_ and support _Nature_. To what purpose is it, that these Gentlemen ransack all Parts both of _Earth_ and _Sea_ to procure these _Triffles_? It is only that they may give their Names to some yet unchristen'd Shell or Insect. I know that the desire of knowledge, and the discovery of things yet unknown is the Pretence; But what Knowledge is it? What Discoveries do we owe to their Labours? It is only the Discovery of some few unheeded Varieties of Plants, Shells, or Insects, unheeded only because useless; and the Knowledge, they boast so much of, is no more than a Register of their Names, and Marks of Distinction only. It is enough for them to know that a _Silk Worm_ is a sort of _Caterpiller_, that when it is come to maturity Weaves a _Web_, is metamorphos'd to a _Moth-Flye_, lays Eggs, and so Dies. They leave all further enquiry to the Unlearned and Mechanicks, whose business only they think it to prosecute matters of Gain and Profit. Let him contrive, if he can, to make this _Silk_ serviceable to _Mankind_; their _Speculations_ have another _Scope_, which is the founding some wild, uncertain, conjectural _Hypothesis_, which may be true or false; yet Mankind neither Gainers nor Losers either way a little in point of _Wisdom_ or Convenience. These Men are just the reverse of a _Rattle Snake_, and carry in their _Heads_, what he does in his _Tail_, and move Laughter rather than Regard. What improvements of _Physick_, or any useful Arts, what noble Remedies, what serviceable Instruments have these _Mushrome_, and _Cockle shell_ Hunters oblig'd the World with? For I am ready to recant if they can shew so good a Med'cine as Stew'd _Prunes_, or so necessary an Instrument as a _Flye Flap_ of their own Invention and Discovery. Yet these are the Men of exalted Understandings, the Men of elevated Capacities, and sublime Speculations, that Dignifie and Distinguish themselves from the rest of the World by Specious Names, and Pompous Titles, and continue notwithstanding as very _Reptiles_ in Sense, as those they converse so much with.

I wou'd not have any Body mistake me so far, as to think I wou'd in the least reflect upon any sincere, and intelligent Enquirer into Nature, of which I as heartily with a better knowledge, as any _Vertuoso_ of 'em all. You can be my Witness, _Madam_, that I us'd to say, I thought Mr. _Boyle_ more honourable for his learned Labours, than for his Noble Birth; and that the _Royal Society_, by their great and celebrated Performances, were an Illustrious Argument of the Wisdom of the _August_ Prince, their Founder of happy _Memory_; and that they highly merited the _Esteem_, _Respect_ and _Honour_ paid 'em by the Lovers of Learning all _Europe_ over. But tho' I have a very great Veneration for the _Society_ in general, I can't but put a vast difference between the particular Members that compose it. Were _Supererogation_ a Doctrine in Fashion, 'tis probable some of 'em might borrow of their Fellows merit enough to justifie their Arrogance, but alas they are come an Age too late for that trick; They are fallen into a Faithless, Incredulous Generation of Men that will give credit no farther than the visible Stock will extend: And tho' a Vertuoso should swell a Title-Page even till it burst with large Promises, and sonorous Titles, the World is so ill natur'd as not to think a whit the better of a Book for it. 'Tis an ill time to trade with implicite Faith, when so many have so lately been broken by an overstock of that _Commodity_; no sooner now a days can a Man write, or steal an Hypothesis, and promise Demonstration for it hereafter in this or the next World; but out comes some malicious Answer or other, with Reasons in hand against it, overthrows the credit of it, and puts the poor Author into Fits. For though a great Philosopher that has written a Book of three Shillings may reasonably insult, and despise a six penny Answer, yet the Indignity of so low pric'd a Refutation wou'd make a _Stoick_ fret, and _Frisk_ like a Cow with a Breeze in her Tail, or a Man bitten by a _Tarantula_. Men measure themselves by their _Vanity_, and are greater or less in their own Opinions, according to the proportion they have of it; if they be well stock'd with it, it may be easie to confute, but impossible to convince 'em. He therefore that wou'd set up for a great Man, ought first to be plentifully provided of it, and then a Score of _Cockle Shells_, a dozen of _Hodmandods_, or any Trifle else is a sufficient Foundation to build a Reputation upon. But if a Man shall abdicate his lawful Calling in pure affection to these things, and has for some years spent all the Time and Money he was Master of in prosecution of this Passion, and shall after all hear his _Caterpillars_ affronted, and his _Butter-flies_ irreverently spoken of, it must be more provoking to him, than 'tis to a _Lion_ to be pull'd by the _Beard_. And if, when to crown all his Labours, he has discover'd a Water so near a kin to the famous one, that cou'd be kept in nothing but the hoof of an Ass, that it was never found but in the _Scull_ of the same _Animal_; a Water that makes no more of melting a _World_, than a _Dutchman_ does of a _Ferkin_ of _Butter_; and when he has written a Book of Discoveries, and Wonders thereupon, if (I say) the Impertinent Scriblers of the Age, will still be demanding _Proofs_ and writing _Answers_, he has reason to throw down his _Pen_ in a rage, and pronounce the world, that cou'd give him such an interruption, unworthy to be blest with his future labours, and breath eternal Defiance to it, as irreconcilable, as the quarrel of the Sons of _Oedipus_. To which prudent Resolution, let us leave him till he can recover his Temper.

These Instances, _Madam_, will (I hope) suffice to shew that Men are themselves altogether as impertinent, as they maliciously misrepresent us. It is not for want of plenty of others that I content my self with these; but I am not willing to trouble you with any of an inferiour Character. These are all impertinents of _Mark_ and _Note_, and have severally the good fortune to find crowds of

Fools of their own Sex to applaud and admire them. _Impertinence_ is a failing, that has its _Root_ in _Nature_; but is not worth Laughing at, till it has receiv'd the finishing strokes of Art. A Man through natural defects may do abundance of incoherent, foolish Actions, yet deserve _Compassion_ and _Advice_ rather than _Derision_. But to see Men spending their Fortunes, as well as Lives, in a course of _Regular Folly_, and with an industrious, as well as expensive Idleness running through tedious _Systems_ of impertinence, wou'd have split the sides of _Heraclitus_, had it been his fortune to have been a Spectator. 'Tis very easie to decide which of these _Impertinents_ is the most signal; the _Vertuoso_ is manifestly without a Competitour. For our Follies are not to be measur'd by the degree of _Ignorance_, that appears in 'em, but by the Study, Labour and Expence they cost us to finish and compleat 'em. So that the more Regularity and Artifice there appears in any of our Extravagancies, the greater is the folly of 'em. Upon this Score it is, that the last mention'd deservedly claim the preference to all others; they have improv'd so well their Amusements into an Art, that the _Credulous_ and _Ignorant_ are induc'd to believe there is some secret Vertue, some hidden Mystery in those darling toys of theirs; when all their Bustling amounts to no more than a learned _Impertinence_, (for so they abuse the Term) and all they teach Men is, but a specious expensive method of throwing away both Time and Money.

I intend not in what remains to trouble you with any more such instances; because I am sensible these have already swell'd this _Letter_ to a _Volumn_, which was not at first my intent. I shall therefore dispatch the remaining part of the charge in; as few Words as possible. [Sidenote: _Dissimulation became necessary._] Amongst the rest _Dissimulation_ is none of the least _Blemishes_, which they endeavour to fix upon us. This Quality, though it can't upon any occasion deserve the name of a _Vertue_, yet according to the present Constitution of the World, is many times absolutely necessary, and is a main ingredient in the Composition of Human Prudence. It is indeed oftentimes criminal, but it is only accidentally so, as Industry, Wit, and most other good Qualities may be, according, to the Ends and Purposes to which they are misemploy'd. Dissimulation is nothing but the hiding or disguising our secret thoughts, or Inclinations under another appearance. I shall not endeavour to absolve our Sex wholly from all use of this Quality, or Art (call it which you please) because I think it may upon many occasions be used with Innocence enough, and upon some can't without great Imprudence be omitted. The World is too full of _Craft_, _Malice_, and _Violence_, for absolute _Simplicity_ to live in it. It behoves therefore our Sex as well as the other to live with so much Caution, and Circumspection in regard to their own Security, that their Thoughts and Inclinations may not be seen so naked, as to expose 'em to the _Snares_, designs, and practices of _Crafty Knaves_, who wou'd make a property of 'em; or lay 'em open to the wicked _Efforts_, and mischievous Impressions of _Envy_, or _Malice_, whose pleasure springs from the hurt of others. Nothing gives our Adversaries so great an advantage over us, as the knowledge of our Opinions, and Affections, with something agreable to which they will be sure to bate all their Traps and Devices. For this reason it is that it has been Proverbially said of Old, that, _He that knows not how to dissemble, knows not how to live_. The Experience of all Ages since has confirm'd this Observation, and ours no less than any of the Preceding. This premis'd, I suppose no Wise Man will blame our Sex for the use of an Art so necessary, to preserve 'em from becoming a _Prey_ to every designing Man, an Art of which himself must make great use to deserve that Title. Yet I am afraid, that upon enquiry our Sex will not be found to have so much of it as is requisite, at least not generally; Our sedentary Life, and the narrow Limits to which our Acquaintance, and Business are Circumscrib'd, afford us so little Variety, so regular a Face of things, that we want the means of obtaining the Mastery of so useful an Art, which no question but we shou'd as soon acquire as Men, had we but equal Opportunities. Hence it is that _Women_ are more apt to show their _Resentments_ upon all _Provocations_ than _Men_; and are thought naturally more _Peevish_ and _Captious_, by those that apprehend not the true reason; Whereas _Men_ are altogether as _Stomachful_, and take _Offence_ as soon, but they cover and suppress their Indignation better, not with a design to forget any Injury receiv'd, but to wreak their _Revenge_ more covertly and effectually. This is another advantage Men derive from liberty of Conversation and promiscuous Business, wherein the Variety of Contingencies they have to provide against, and the Diversity of Tempers they deal with, force 'em to turn and wind themselves into all _Shapes_, and accommodate themselves to all Humours. There is indeed yet a higher sort of _Dissimulation_, [Sidenote: _Dissimulation when criminal._] which is always Criminal, that is when Men not only cloud their real _Sentiments_ and Intentions, but make Profession of and seem zealously to affect the contrary; this by a more proper and restrain'd Name is call'd _Deceipt_, and is always us'd in an ill Sense. This Art is most practic'd in Courts where _Policie_, and _Ambition_ reign; there You may see _Enemies_ hugging and caressing one another with all outward _Expressions_ of _Tenderness_ and _Friendship_ imaginabe, while they are secretly contriving each others ruine. There you may see Men cringing to those, they wou'd _Spurn_ if they durst, and _Flattering_ those they despise and rail at behind; their _Backs_, The Court is a place where we come very rarely otherwise than as _Spectators_, not as _Actours_; as _Ornaments_, not as _Instruments_; and therefore are seldom involv'd in the guilty Practices of it. Nor is it the Court only, but all Places are infected with this Vice, where there is any Encouragement of Profit or Pleasure to be hop'd from successful Treachery, of which no Place is so barren as not to afford some. This Deceipt is so far from being the Vice of our Sex, that they are the common Object on which it is daily practic'd: Nothing is more frequently met with than false Love in Men, [Sidenote: _False Love

commonly practic'd._] which is now grown so familiar, that a Company of Six of both Sexes can scarce meet, but a _Sham Passion_ commences immediately, is urg'd, protested, and sworn to be real with all imaginable Violence. If these false Arts, mock sighing, and Dying prevail upon any foolish, easie, credulous _Woman_, the _Sham Lover_ is blown up with the Success, he is big and in Labour till he be deliver'd of the Secret, which with great satisfaction he proclaims in all Places where he comes: 'tis his highest Exploit of _Gallantry_, which he will by no means lose the credit of. Thus he thinks her ruine a step to Reputation, and founds his own Honour upon her Infamy. This _Madam_ is the basest of Treachery; for they are not satisfied with the Success of their false Promises, and Oaths, but they insult over the weakness of a too fond _Woman_, and _Triumph_ in her Dishonour. I am sorry there are any _Women_ so foolish and forward, as to give hopes and encouragement to such ungenerous Fellows; yet we may be assur'd that they are not a quarter so many as those vain _Boasters_ wou'd make 'em. Much more be said on this head, but that I think it high time to pass on to the next, which is _Enviousness_, so foul a Blot to a fair Character, that no Merit can wash it out, or atone sufficiently for it.

Envy is the Parent of _Calumny_, and the Daughter of _Jealousie_. Men seldom envy others, [Sidenote: _Enviousness_] till they fear being out strip'd by 'em in Fortune or Reputation. It is the most criminal, because the most injurious to Vertue, and worth of all our natural Failings, against which it's Malice is generally bent. This vice and _Jealousie_ seem to be more particularly hated of _Providence_ than any other; For they carry their Punishment inseparably along with 'em, The Envious and the Jealous need no other Tormentours than their own Thoughts. The Envious Man ruines his own to disturb anothers Tranquillity, and sacrifices his own Happiness and Repose to a perverse Desire of troubling his Neighbours. He feeds like _Toads_ upon the Venome of the Earth, and sucks in Scandal greedily, that he may at Pleasure disgorge it to the greater annoyance of other Men. His mind has the _Vapours_, a Sweet Report of any one throws it into Convulsions, and Agonies, and a foul one is the Releif and Refreshment of it. A wholesome Air free from the Blasts of _Detraction_ and _Slander_ is as certainly pernicious to him, as _Ireland_ to _Frogs_ and _Toads_. This Vice is generally disclaim'd by both Sexes, yet generally practic'd by both. Men love as little to have their Reputation as their Chimneys over-topt by their Neighbours; For they think by that means their names become dark, as their Houses do smoaky by the other: Yet thro' a lazy Malignity had rather pull the other's down to their Level, than build their own up higher. This Humour prevails indeed, yet not in equal Measure in both Sexes. For as we have confessedly less _Ambition_, so have we apparently less of this Poison which usually attends it, and arises from a self Interested Principle, which makes 'em endeavour by base sinister means to level that Merit which they think stands in their way to Preferment, and which they despair of being able to surmount by honourable attempts. For what need any one use base Sleights to stop the Man, whom by fair Speed he thought he cou'd overtake. No sooner is any Man rais'd to any Eminence in the World, but half the Sex at least join in Confederacy to raise a Battery of Scandal against him, to bring him down again. _Honour_ is the _Pillory_ of great Desert, whither a Man is no sooner rais'd, but the vile Rascally inferiour Croud gather immediately together, to throw Dirt at him, and make that which was intended as a Grace, and Reward, but a more honourable Punishment. Our Sex seldom arrive to this Pitch of Envy, our Ambition is more bounded, and our Desires sooner satisfied. Hence it is that we are less troubl'd at the Prosperity of others; for not giving our selves the Liberty of aiming at things far out of our Power, they are the sooner compass'd, and we the sooner at Ease. He, that thinks himself Happy, is incapable of Envying another's Felicity, since he sees him possess'd of nothing which either he has not or despises not. Yet it must be confess'd that the lesser Piques, and Grudgings are daily to be met with among us, but no less among Men. What is it that spawns daily such Fryes of _Satyrists_ without Wit, and _Criticks_ without Judgment, but this humour of carping, and nibbling at the Reputation of others? But they are generally abundantly furnisht with Impudence, a good Quality that commonly supplies largely the want of all other.

[Sidenote: _Character of a City Critick_]

A _Critick_ of this sort is one that for want of _Wit_ sets up for _Judgment_; yet he has so much Ambition to be thought a _Wit_, that he lets his _Spleen_ prevail against _Nature_, and turns _Poet_. In this Capacity he is as just to the World as in the other Injurious. For as the _Critick_ wrong'd ev'ry Body in his Censure, and snarl'd, and grin'd at their Writings, the _Poet_ gives 'em Opportunity to do themselves Justice, to return the Compliment and laugh at or despise his. He wants nothing but Wit to fit him for a _Satyrist_, yet he has _Gall_ and _Vanity_ enough to dispence with that Want, and write without it. His works are _Libells_ upon others, but _Satyrs_ upon himself, and while they _Bark_ at Men of _Wit_, call him Fool that writ 'em. He takes his Malice for a Muse, and thinks himself inspir'd when he is only _Possess'd_, and blown up with a Flatus of _Envy_ and _Vanity_. His great helps to Poetry are _Crambo_, and _Arithmetick_, by which he aspires to Chime, and Numbers, yet mistakes frequently in the tale of his Fingers. He has a very great _Antipathy_ to his own Species, and hates to see a Fool any where but in his Glass. For (as he says) they _Provoke_ him _And offend his Eyes_: [Sidenote: _7th. Satyre of Boileau Eng._] He _Follows 'em as a Dog persues his Prey, and barks whenere_ He _smells 'em in his way_: He _knows, to say no more_ that _Wit is scarce, to gingle out a Rhime, or tag a

Verse: Or Cobble wretched Prose to numerous Lines: There if he has a Genius there it shines_. His Fund of _Criticism_ is a Set of Terms of Art pickt out of the _French Criticks_, or their Translators; and his _Poetical_ stock is a Common Place of certain _Forms_ and _Manners_ of Expression. He writes better in _Verse_ than _Prose_; For in that there is _Rhime_, in this neither _Rhime_ not _Reason_. He talks much of the _Naivete_ of his Thoughts, which appears sufficiently in the Dullness of 'em; yet nothing but the _Phlegmatick_, Spiritless _Air_ is his own. He rails at Mr. _Oldham_ for want of Breeding and good Manners without a grain of either, and steals his own Wit to bespatter him with, but like an ill _Chymist_, he lets the _Spirit_ flie of in the drawing over, and retains only the _Phlegm_. He censures Mr. _Cowley_ for too much _Wit_, and corrects him with none. The difference between Mr. _Cowley_ and him is this; the one has too much Wit, and too fine for the Standard; the other not enough to blanch his base Metal, or cover the Brass of his Counterfeits. To compleat himself in the Formalities of _Parnassus_, he falls in love and tells the World, it is oblig'd to his _Passion_ for his _Poetry_; but if his _Mistress_ prove no more indulgent than his _Muse_, his Amour is like to conclude but unluckily. For if his Love be no warmer than his Lines, his _Corinna_ may play with his Flame without danger of Burning. He pretends to have written only his sincerest Thoughts; I don't know how well his Mistress may take that from the _Lover_, but I dare swear the World did not expect it from the Poet. He is happiest at the Picture of a Rhiming Fool, for he need only to look in his Glass, and he may Copy a Country _Wit_ from the City Original. If this Rhiming Humour lasts, there's a good _Sugar-Jobber_ spoil'd for an ill _Poet_; yet for his comfort, Time, Improvement, and two or three Books more may raise him to Rival _E— S—_ and sing _London_'s Triumphs, to the Envy of _Tom Jordan_ of happy Memory.

You may wonder, _Madam_, why I shou'd give you the trouble of this Character, after I had given you my word to trouble you with no more of this Nature. I must confess, I am sorry that so foolish an Occasion cou'd make me forget my self; but a Book newly publish'd happening just at this Juncture unluckily to fall into my Hands, I cou'd not without Indignation see the Scurrility and Insolence, with which Mr. _Oldham_, and Mr. _Cowley_ are treated; and cou'd not but resent a little the Wrongs done to the Memory of Men whom the rest of the World with Justice admire; and cou'd not help taking Notice upon so fair an Opportunity, that they are not, tho' dead, to be so rudely plaid with, and made the May-Game of e'ry _Splenetick Boy_. There are some yet living, whose Wit and Performances deserve a more respectful treatment, than they have met with from him. But they are able to revenge their own Quarrel, if they think he deserves the honour to be Scourg'd by 'em. Nothing but Envy and a Vain Conceit of himself cou'd move him to attack the Reputation of Men, whose Verse will alwayes command Admiration, while his own raise nothing but Scorn and Indignation. If his Bookseller were but blest with half a dozen such Authors, he wou'd in a short time infallibly be _Stationer_ general to all the _Grocers_ and _Tobacconists_ in the Town.

After this Digression, _Madam_, let us return to our Subject. We stand yet charg'd with _Levity_, and _Inconstancy_, two Failings so nearly related and so generally United, that it his hard to treat of 'em apart; [Sidenote: _Levity._] we will therefore consider 'em briefly together. _Levity_ is an unsteddy Humor that makes men like and dislike, seek, and reject frequently the same things upon slender or no Reasons. This is the Humour of the Infancy of both Sexes, and proceeds from the strength of their Appetites, and the weakness of their Judgments. At these tender Years every thing we see moves our Curiosities, and because we think little beyond our Appetites, desire impatiently whatever pleases. This wears of in Proportion to the growth of our Judgments, when we begin to consider the Fatigue, Hazard, Disreputation, and other Inconveniences that attend unreasonable, or inordinate Desires. Herein our Sex have a manifest Advantage over the other; For it is confess'd on all hands that our Judgments ripen sooner than theirs, [Sidenote: _Less Levity among Women then Men._] whence of course it Follows, that this Folly prevails not so long upon us, as them. 'Tis yet true, that even the most experienc'd and wisest of Us have no small mixture of it, which appears in the greatest Part of our Actions. But it is certain likewise, that Men have a greater proportion of it than we. From this it is that _Novelty_ derives all its Charms, and that Men persue with so much Eagerness and Impatience what they so soon slight if obtain'd. I appeal to the Experience of all mankind, if they do not generally frame to themselves much greater Idea's of any thing they desire, and are unacquainted with, than they find real, when they become Familiar to 'em; and if they did not imagine greater Pleasures, while they were in persuit, than they met with after they were in Possession of their Wishes. The Imagery of _Fancy_ is, like some Paintings, ravishing, and surprizing at a due distance, but approach 'em near, and all the Charms and Beauty vanish, and they appear rough and unpleasant. Hence it is that Men grow uneasie, and their desires pall so soon upon the full enjoyment of their Wishes; they see then the imperfections as well as Beauties of what they covered, which glitter'd so far of, and like the Moon appear'd all Lustre and Smoothness, but when arriv'd at, all dark and uneven. These Fallacies Men are more submitted to than we, by those very Priviledges which give 'em in some things the advantage over us. The variety of Business, and Society they run through, the large acquaintance they contract, give 'em encouragement to aspire to, and hopes to obtain many difficult things, which our Sex seldom lift their Thoughts up to. I know this aspiring Humour of theirs is generally call'd _Ambition_, and I allow the Term to be proper; but their Ambition works upon their Levity, which only can make them Barter certain Ease, Peace and Security, for uncertain Pomp and

Splendour; and forsake a Condition they know to be good, for one they know no more of, than that it Shines, and that it Glitters, and so part with the true Jewel for the false one. These are the seririous and applauded Follies of Mankind, and shew the Weakness and Levity of those we call the greatest, and wisest Men, that sacrifice the Ease and Pleasure of their lives to _Popular Breath_, and sounding Titles, which is like bartring a small Diamond for a large Glass Bubble.

[Sidenote: _Inconstancy_]

Inconstancy is so like _Levity_ that little more needs to be said of it, only that it is commonly restrain'd to the change of Affections in regard to Persons, and so is cheifly concern'd in Love and Freindship. It is founded upon Levity, thro' which we first make an injudicious Choice, and are afterwards as unreasonably disgusted with it. This happens oftner in _Love_, than _Friendship_; because the Impressions of _Love_ are more suddenly receiv'd, and the Effects of it more violent, than those of _Friendship_; and the Desires, which are commonly kindled by one single Perfection, such as _Beauty_ or _Wit_, not being suddenly answered, are in Process of time extinguish'd, or abated by observation of some disgustful Imperfection or other in the Person belov'd. This is indeed the true Reason, [Sidenote: _Love, why so soon cold._] why _Love_, which is generally so hot at first, cools commonly so suddenly; because being generally the Issue of Fancy, not judgment, it is grounded upon an over great Opinion of those Perfections, which first strike us, and which fall in our Esteem upon more mature Examination. From whence it is likewise that Men are less constant in their Affections, than we; for Beauty only being generally the Object of their Passion, the Effect must necessarily be as fadeing as the Cause; their Love therefore being only the result of wonder and Surprize, is abated by Familiarity, and decays, as they wear of, by Degrees. Beside, that, a Love so Founded is liable to be ravish'd by any Superiour Beauty; or if not so, yet the Novelty of the Former once worn of, the New Comer has the assistance of Fancy the Slave of Novelty to gain the Superiority. This is the Cause why so few real and lasting Passions are found amongst Men. For Charms depending upon, and owing their Power to Fancy, can maintain no Conquests any longer, than that is on their side, which is as inconstant as the Wind. [Sidenote: _Women constanter Lovers._] In this also we are less faulty, than they; For, not usually fixing our Affection on so mutable a Thing as the _Beauty_ of a _Face_, which a thousand accidents may destroy, but on _Wit_, _Good Humour_, and other _Graces_ of the _Mind_, as well as of the _Body_, our Love is more durable, and constant in proportion to the longer continuance of those Qualities in the Object. Neither indeed have we the means, or temptation to be Fickle and inconstant so ready as Men have; For Modesty, and the Rules of Decency observ'd among Us, not permitting to us the Liberty of declaring our sentiments to those we love, as Men may, we dare not indulge a wanton Fancy, or rambling Inclination, which must be stiffled in our own Breasts, and cou'd only give us a hopeless Anxiety, unless we were able to inspire the same Passion for us in them; which it were vain to expect, without breaking thro' all restraint of _Modesty_ and _Decorum_ at the price of our Fame and Reputation, which I hope few are so daring as to venture. Besides this our Tempers are by Nature calm, sedate, and tender, not apt to be ruffl'd, and disturb'd by Passions, and too fearful to enterprize any thing in satisfaction of 'em; theirs on the contrary, bold, active, and uneven, easily susceptible of all manner of Desires, and readily executing any Designs to gratifie 'em. Thus are we debarred the liberty of chusing for our selves, and confin'd to please our selves out of the number that like and address to us, of which if we fix our Affections upon any one, we are generally fixt and unmoveable, as having neither the Inclination to, nor opportunity of Inconstancy, that the Men have. I don't deny but that there may be some among us guilty of this Fault, but they are vastly short of the Number of Men involv'd in the like Guilt, amongst whom it is now grown so fashionable, that is become no Scandal; but is daily justified, and the Treachery boas the women candidates wholesale. This, regardless of the fact that the steady increase of the Labour poll has been due in great part to the votes and more to the organization and propaganda of large numbers of intelligent working women who know not only what they want, but how to get it. They are backed now by many of the middle-class women who were young enough to be revolted by war politics in 1914, and are old enough to claim their citizenship in 1924. Hundreds of thousands of others, now between twenty and thirty, mothers, professional and working women, will make themselves heard before long. To them, the principle of feminine equality is as natural as drawing breath■■they are neither oppressed by tradition nor worn by rebellion. I venture to think that, had the Labour Party machine been less dominated by the masculine perspective, to which the equal franchise bill was a matter of secondary importance, they would not have lost so heavily in the 1924 election. Votes for women at 21 would have greatly increased the poll of many Labour candidates. I have seen young mothers almost sobbing outside the polling-station on polling-day because they had no vote to cast for the future of themselves and their children. As for the defeat of women candidates, everybody, including the leader-writers who spread the adverse propaganda, knew perfectly well that the majority of them stood in constituencies where even a man of their party would not have had the ghost of a chance. Here again Jason at headquarters displayed his well-known chivalry.

[1] Lovat Fraser in a cunning article in _The Sunday Pictorial_, January 4, 1925.

It is no part of my thesis to maintain that women display their feminism in proportion as they vote for any particular political party■■Labour, for example. But I do suggest that it is the progressive working woman rather than the woman of the middle class who will in the future make the most important contribution to the thought of feminism and to a solution of our practical difficulties. One of the most inveterate anti-feminists, the author of _Lysistrata_, as an avowed anti-democrat, has based his thesis and his strictures on observations that do not go beyond the bounds of upper- and middle-class people, barely even beyond the bounds of the night club or the suburban dance-hall. In his eyes we are to blame for everything. Our worst crime is to “blaspheme life and man”; our next, not to have prevented food being put into tins; our next, to have adhered faithfully to that ascetic view of life and sex so firmly instilled into us by medieval monks and bullying Puritan fathers and brothers. We are to blame for the industrial revolution in that we let weaving, spinning, milling, and baking go out of our hands. We are to blame for the iniquities of doctors in that we did not maintain our position as the dispensers of healing potions and simples. We are to blame in that we have not learned to bring forth our children without pain, those children whose brows bear the marks of obstetric instruments that were used to spare their mothers, and whose lips have not been laid to those inhuman mothers’ breasts. (There are no scars of war, O Jason!) Where is salvation for us, and how shall we rid us of the burden of our iniquity? We who have waxed so arrogant that we have even aspired to let science build our children outside their mothers’ bodies must humble ourselves once more and take upon us the whole duty of woman. We must use our votes to restore aristocracy[2] and take the food out of tins; spin and weave, no doubt, the while we nurse and bear our yearly child, delivering it over to infanticide when necessary, since birth-control is artificial and displeasing to the male. In our leisure moments■■of which, doubtless, we shall find many under this humane _régime_■■we are to discover by what means of diet, or exercise it may be, we can fulfil our maternal functions with pleasure instead of suffering.

[2] An ingenious method of accomplishing this suggests itself. Since women do not sit in the House of Lords, suppose that all Peers’ wives, following the example of the Duchess of Atholl, stand for Parliament where their husbands have estates. This would obviate the necessity, now felt by Conservatives, of restoring the veto of the House of Lords.

A joke, you say? No, no, my poor Medea, it is a man called Rousseau, risen from the dead. Not long ago he preached this sort of thing to women who pinched their waists and wore a dozen petticoats. They were not educated enough to follow Voltaire, so they listened to what Rousseau called the Voice of Nature. Soon thereafter, they found they were being abused for being less civilized, more ape-like than the male, irrational and unsuited to take a part in public life. So they tried again, poor things, and then there was an awful thing called the Industrial Revolution, and the food got into tins. They may be pardoned, as may all of us, if at this point they became a little bewildered. Some people blamed science, some civilization, some the meat-trusts and the millers, but the true culprit, as ever, was Woman. A thousand voices cried her down■■she hadn’t enough children; she had too many; she was an ape; she was a dressed-up doll; she was a Puritan; she was an immoral minx; she was uneducated; they had taught her too much. Her pinched waist was formerly abused■■now it was her slim and boyish body. Eminent surgeons[3] committed themselves to the view that the boyish figure with its pliable rubber bust-bodices and corselets would be the ruin of the race, that race which had been superbly undegenerate through four centuries of armour-plate corset and eighteen-inch waists, that race which, then or now, can hardly compete in toughness with the Chinese, among whom the boyish figure has been for centuries the ideal, and whose women cannot conceivably be accused of shirking any of the responsibilities of maternity. Others told us that the woman-doctor has no nerve to tend confinements, and conveniently forgot that, since the world began, and until quite modern times, it is women who have ministered to one another in that agony which now as in the past is the lot of every mother. Is there truth in the words of Jason? Is there truth or justice in the passion of Medea? Let us not ask the protagonists, but let us summon the inquiring intelligence of Hypatia to find us a way out of the intolerable tangle in which their quarrelling has landed us.

[3] Sir Arbuthnot Lane, for whom I have hitherto entertained an entirely unqualified admiration, in a recent article. _Vide The Weekly Dispatch_, December 28, 1924.

II

ARTEMIS _The Early Struggles of Feminism_

When the feminist struggle began during the last century, ignorance and beauty were the two qualities most admired in women. It is necessary to remind our masculine critics what was the soil from which the feminist movement sprang and what the current morality which influenced its direction. It was customary in those days to make fun of old or ugly women and to scorn those who showed any signs of intelligence. A man chose a young, beautiful, and blushing creature for his bride, and transformed her by one year of marriage and one childbirth into a gentle and submissive matron. Ugly or intelligent women, for the most part, paid a heavy

price. Not only were they rejected in youth, and starved of all their natural joys, but as “old maids” they were the object of general scorn and derision. Small wonder that women adopted artificial aids to beauty and artificial hindrances to their native intelligence. Strongest of all the taboos laid by masculine custom and religion on feminine minds was that regarding sex-knowledge. Their purity was to be preserved only by ignorance, and even as matrons and mothers it was scarcely decent for them to refer to any of the physical changes of their bodies. It is impossible to over-estimate the strength of this tradition, or the harm which has been worked by it to the cause of women.

The feminists were, and are still, howled down by men on the pretence that they invented chastity and scorn of bodily values. History disproves such a ridiculous assertion. The early feminists were what history and tradition made them, and could not at the time of their rebellion have been otherwise. The origin of the stupid ideal of womanhood against which men as well as women to-day are still fighting was the asceticism of the Christian religion; and, unless St. Paul was a woman in disguise, I fail to see how woman is to be blamed for a conception of her place and duty from which she has suffered more than anybody else. Before the conversion of the West to Christianity, barbarian women of the North enjoyed a certain rough equality with their husbands. They stride through the sagas, these fierce women, brides of heroes, glad to reward the warrior with their favours, quick to avenge an insult or a wrong. They had no need to stoop to cajolery. Savage and untamed, they were the fit and equal mates of savage men.

Then came the monks, and the white wimples and courtly dresses and chivalry, chants and cathedrals, and meek and reverent casting up and casting down of eyes. The savage breast that had swelled and throbbed untrammelled in love or anger learnt to flutter and to sigh. Quenched were the fires of Brunhilde, her sunlit rock deserted. Agnes and Mary, tamed and pious, sat cooing in the shade. But for meekness and maternity, the early days of asceticism might have seen a crusade to destroy that temptress■■woman. Barely allowed a soul, she slipped through a life of oblivion, praying that it might be a pretty crown with which Heaven would reward her patience and submission at the last. Then came the Puritans and denied her even that, substituting ugliness in this life as well as the negation of body, and a heaven of people in starched nightshirts, rendered oblivious to the horrid spectacle of their figures by the still more horrid chanting of their nasal psalms.

A breath of rationalism■■brief, soon choked, a breath of “nature”■■and so to crinolines, pantalettes, and a life still lived in terror of hell-fire, terror of parents, dread of husband, horror of the least breath of adverse public opinion. Anyone who reads the _Fairchild Family_ must marvel that from such nerve-destroying parental tyranny and the intolerable weight of prejudice and religious superstition the nineteenth-century woman ever found the courage to rebel.

Was it astonishing that the revolt had in it something frenzied and ascetic■■that it seemed to express the anger of the spinster thwarted and despised in the current schemes of values? I do not think the pioneers were so much Puritan as votaries, hanging the tablet of each achievement in the temple of Athene or of Artemis, pressing on, breathless, swift of foot, sure of aim, in dread of the fate of Atalanta whom the Golden Apples lured to destruction and the marital embrace. “Chaste as the icicle, that hangs on Dian’s temple.” They had need to be, perhaps, who, in an atmosphere of swoons and ringlets, won for us schools and colleges, free limbs, health and the open air; unlocked for us the classics, science, medicine, the history of our world; drew us from our paltry, ladylike accomplishments; wrote upon our school-books: “Knowledge is now no more a fountain sealed,” and flung wide the gate into the world.

They, these pioneers, childless, unwed, created and bore thousands of women, made them anew, body and soul, for lives of mental and physical activity unknown in the past to any but the very exceptional few. Just like the new learning of the Renaissance to men’s minds in Europe was the opening of high school and university to the feminine mind of to-day. Thousands of women of the last generation and this, who would otherwise have passed their existence in genteel poverty and vacancy of mind, have found their happiness in teaching, in medicine, or in some other profession. Thousands of mothers have watched with delight the unfolding of their children’s minds, and enjoyed co-operating over “lessons” and arguing politics with the adolescent.

We, who in a sense are the children of the feminist pioneers, whose thoughts embrace the universe, whose lives are one long round of mental and physical delight, at times intense to ecstasy■■we at least will pay our tribute to those who lit the sacred fires, before we take up pen and paper to criticize.

When one reads the lamentations of would-be intelligent men about the iniquities of modern young people, chiefly those of the female sex, one cannot but laugh at their method of approach. It would seem according to them that our modern women just happened like that: no one had a part in forming their bodies or in training their minds. In so far as these people consider education or early training at all, it is to blaspheme at the sex-hating feminists who have trained modern women to dispense with their

birth-right■■the love of man. How this squares with the wail of the Bishops against the sexual immorality of the younger generation we will leave Jason or the eloquent author of _Lysistrata_ to decide. Our business is not to condemn woman, past or present, but to chronicle faithfully the forces that have made her, and the aspirations which will mould her future. For she, and she alone, shall be the arbiter of her fate, and neither man nor creed stand between her and the realization of her ideals. Men have blasphemed woman and life too long, and it will not be until the issues are clearer, the battle more advanced, that the basis for co-operation between man and woman can be finally established. There is too much evidence at present that man, professing friendship and concern, is still ready to snatch from us what little we have won.

To those elderly gentlemen, then, who watch with horror the upper- and middle-class woman perpetrating similar follies to those of upper- and middle-class men, the first question we would put is: “What education did they give their daughters, and what was taught to their mothers before them? What were the current ideas about feminine destiny which encircled them in their impressionable years?” Many would answer, still far too many, that their daughters were given the education of a gentlewoman and fitted to become the wives of gentlemen. This we know of old. The lady eats, drinks, digests, wears clothes, tinkles the piano, dances, sings, handles a golf-club, submits to sex, bears a child without the smallest notion of anatomy, turns from the whole thing disgusted, and probably bears no more. Whose fault? Not hers. They do not teach mothercraft or physiology in finishing schools for gentlemen’s daughters, and it is no part of the duty of gentlemen’s wives to reproduce their kind. Perhaps there is comfort in that.

A great many parents, however, would tell us that they gave their daughters a good and liberal education in such schools as were available, good ordinary boarding- and day-schools which have sprung up during the last fifty years in response to the feminist propaganda. Then we have the working woman, who has shared with her brothers in what education is permitted to trickle through the elementary schools. It must not be forgotten that this ends at fourteen.

Is there something wrong with this education of women, and if so, what? I think we must judge that there is. The reason lies in the sense of inferiority bred in women by so much oppression, and the natural result that their chief aim as they struggled upwards was to prove that in all respects they were just as good as men. The second aim was to prove that they could jolly well do without them. In exactly the same way the worker, rising in the social scale, seeks to prove himself a _bourgeois_. Both efforts are mistaken. Each class and sex has that to give to the common stock of achievement, knowledge, thought, which it alone can give, and robs itself and the community by inferior imitation. The feminist movement, like one dissentient voice in an excited public meeting, was querulous, hysterical, uncertain of itself. It dared not cry out that women had bodies. Its one hope of success was to prove that women had minds. And it was right in this, that the primary fact about men and women is not that they are two sexes apart, but that they are human beings and as such should share all knowledge in the world and make it the basis of their partnership and the rearing of their children.

Many an ardent feminist spinster in a girls’ secondary school has sighed over the state of public opinion which forced her to drive her girls’ minds along channels for which they were not always suited, that they might do well at college and show that women could surpass the men. Many another, well drilled by a mother or tradition in ideals of feminine virtue, gloried in the sexless learned women she was creating and in the thought that one day they would force those savage, lustful men to conform to the ideals which they set up for women. Why blame her? Lay the blame where it is due. It will be but a just retribution for that lustful male and his ideal of feminine virtue if one day, in a world full of prohibitions, he finds himself forced to kneel before the Mumbo-Jumbo[4] he himself built up to terrify his wives and daughters to submission.

[4] Mumbo-Jumbo was an idol set up by the men in Nigeria to terrify erring women. The men, but not the women, knew him to be a fake. See _Mungo Park’s Travels_.

Feminist ideals of education, then, had the defect that they did in a certain measure deny sex, or ignore it. The feminists had a pathetic hope that by so doing they would convince the dominant male that a woman might be learned and yet remain a lady. But I wish to emphasize the fact that this feature has belonged to all education of women, especially of ladies, from time immemorial, and it is, therefore, unbecoming in a male, whether young or old, to use this as a cause for reproach to our sex. We went as far as we dared with an eye to male hostility. Young feminists to-day would be the first to admit that it would probably have paid us to go further. There never has been a period when education has trained women for the possibility of motherhood, and it is time that such training was begun. There never was a period when the education of women was completely honest, and it is time that that training was begun. What knowledge is of more vital importance to women than anatomy and physiology? They were allowed it if they were to be doctors, and then only with caution. Turning casually the pages of a book on anatomy in a girls’ secondary school library, I found the diagrams connected with sex and maternity carefully stuck fast. What is more calculated to inspire prying and prurience?

We have no right to blame young women for shirking marriage, sex, or motherhood, or for moulding their figures on boyish lines, when we carefully treat them as boys and withhold from them as long as we can all knowledge of the difference of their physique and possibly of their destiny. I have no wish to go back on the great achievements of feminism, or to drive women from the professions in which they have a just right to be employed. I want to break down the last barriers. Artemis is slim and bold; Athene is stately. We have done well to worship at their shrines.

But the call of Demeter the Fruitful is insistent. If we would add to the achievements of those who came before us, let us freely admit that we have but been playing mock modesty, and that to us the body is no mere box to hold the mind, but a temple of delight and ecstasy: a temple to hold the future if we will. To me the important task of modern feminism is to accept and proclaim sex; to bury for ever the lie that has too long corrupted our society■■the lie that the body is a hindrance to the mind, and sex a necessary evil to be endured for the perpetuation of our race. To understand sex■■to bring to it dignity and beauty and knowledge born of science, in place of brute instinct and squalor■■that is the bridge that will span the breach between Jason and Medea.

III

ASPASIA _The Younger Feminists_

While we have admitted that the first aim of the feminist movement was to open to women the stores of learning, to develop their minds and to teach them to think, and that no attempt was made to handle the problem of sex, it is not quite fair to say that even early feminism has consistently denied or despised the body. The schools and colleges made it their business to give to women opportunities for physical development, for open-air exercise, swimming, tennis, hockey, lacrosse. The Victorian young woman learnt gradually to be ashamed of her tiny waist and fat hips. She learnt that a healthy appetite[5] as well became a young woman as a young man, gave up her snacks in private and did justice to good meals taken at proper intervals. Quietly, and without mention of the fatal word “sex,” the spinster feminists, by emphasis on health and vigour, built up a generation of young women who were to be frank about other desires besides eating and drinking.

[5] There may be a biological cause of the alleged smallness of feminine appetite. Watching a raven and his consort with fresh meat, I observed that she obtained only a minute portion beneath the contempt of the male. Can it be that, in the savage state, only those females survived who could exist on the little the male allowed them? Is this a case of sex-linked heredity?

I cannot see what is the matter with our figures. Steel rods and rubber are more modern materials than oak beams and pink plaster. Neither we nor our modern lovers admire the opulent Venuses, indolent and rose-embowered, who adorned the ceilings of old-fashioned ballrooms. They were stupid, self-indulgent creatures, not even good mothers, whatever the sentimental elderly gentlemen in their top-hats and whiskers may have to say. What is a good mother we will discuss in a later chapter, but for the present it is enough to say that more dangerous childbirths are due to narrow pelves caused by rickets than to hips contracted by the corsets of vanity. Let the doctors turn socialist and feed the poor, instead of spending their time lamenting the inadequacy for childbirth of a few fashionable women who don’t very much matter. Middle- and upper-class girls nowadays■■and most working-class girls, too■■go corsetless up to maturity. They do gymnastic exercises, and dances that give suppleness to the body. They swim and they play out of doors. Those who are rich enough to be adequately fed are graceful and active as kittens, and as healthy. By the time adolescence brings, as it always does, a few years of intensive sex-vanity, the corset can do very little harm. The muscular little body does not tolerate it stiff, or very tight, and the bones are well grown. The mystery of feminine dress helps the appearance of slimness. There are few clothes, and no lumpy gathers. Beneath that boyish outline are firm little breasts, clean arching hips, abdominal curves and thighs, lovely as anything the Venus of Milo has to show.

Artemis fashioned this modern woman. That is admitted. Has Artemis her vows?

I’m afraid for once we have to admit that the Bishops are right. In spite of everything the Church can do, in spite of an education committed, so far as the authorities can control it, to sour or religious spinsters, the modern young woman is not very moral. It is a pathetic picture which the author of _Lysistrata_ has drawn for us, of sexless beings going to and fro in tube and bus-like shuttles in a machine to dull work robbed of all joy, earning their livelihood and turning their backs on man in response to feminist propaganda. Man, the enemy■■to be defeated in his own professions, to be repelled in every onslaught upon feminine virtue: I wonder? I would hazard a guess that, relatively to the population, fewer women retain their virginity till death than in the Victorian period or the Middle Ages. In all probability it is sex, not sexlessness, which makes women cling so tenaciously to the right to earn their living. Marriage brings a jealous intolerant husband, children, prying and impertinent neighbours■■degraded and humiliating slavery for

the vast majority of women. Thirty shillings a week and typing or working in a shop, a still tongue, or a toss of the head and the assertion that independence is the best; and, in the background a lover with whom somehow evenings are spent■■a lover who has no claim and cannot tyrannize. A lover, perhaps, who pleads to become a husband, but has no chance unless his income is good or secure. Marriage would change him: Aspasia knows it. Marriage would also rob her of that thirty shillings a week, which alone stands between her and the abyss of primeval submission. Or else Aspasia teaches in a school or college. She is a skilled teacher, devoted to her work and pupils. She may be a Research Fellow in some difficult branch of learning which is to her the very breath of life. She may be a doctor in the public service, tending and advising mothers and children. She is lovely, vital, creative. Man approaches. There are holidays of delight and secret dread of the scandal which will end the work Aspasia loves■■or marriage and the certainty of that end at once. “Choose,” say the Bishops and the school-managers (often the same thing): “Choose,” say the public authorities who support the Church and rather wish women would get out of this indelicate profession of surgery and medicine; “choose between love and duty to the male and service to the community.” This is not feminism■■feminists have fought it persistently■■it is medieval Christianity. It presents a choice between physical pleasure and service to the mind or soul; it upholds the time-honoured theory that renunciation of the world, the flesh, and the devil is the path to duty and salvation. I am fully aware of all the arguments about economic pressure, the primary right of married men to work, the awful situation of their dependent children and their wives. None of this is fundamental, and the jealous male knows it. “Divide to conquer” is the principle in dealing with trade unions; it works equally well in the feminist struggle. Persuade the single women that the married woman is an unfair competitor,[6] terrify them so far as you can into believing that to succumb to sex is something unbecoming and disgraceful and punishable with misery everlasting, whether in marriage or outside of it, and you can prevent the women combining against you.

[6] This scheme no longer works, as is evidenced by the attitude of the National Union of Women Teachers this year (1925). Intelligent women are more appreciated than they were, and teachers know they may all want to marry some day.

But not if Aspasia will speak. If she but would, and put an end to this lie for ever. She could tell us how, especially during the years of war, young women took the last step towards feminine emancipation by admitting to themselves and their lovers the mutual nature of sex-love between man and woman. It sounds a platitude, but is, in fact, a revolution. Strange to say, the nearness of death from enemy bombs or enemy fire did not intensify the thought of holiness and heaven. It made the little footrules to measure morality look absurd; it mocked the emptiness of female virtue. While poverty and parents forbade the certainty of marriage, with nothing but instability and death around them, our modern Aspasias took the love of man and gave the love of woman, and found this union, free and full on either side, the most priceless gift the immortal gods can bestow. There is nothing new in this, the moralist will say■■it is just wickedness. Yes, there is this that is new: that, though these younger women may be driven from fear of starvation to the outward acceptance of old codes and conventions, inwardly they know they have done no wrong and will not admit a conviction of sin. Sex, even without children and without marriage, is to them a thing of dignity, beauty, and delight. All Puritans■■and most males so long as they can remember■■have tried to persuade women that their part in sex is pregnancy and childbirth, and not momentary delight. As well tell a man his part is the hunting and skinning of animals for food and clothing. To enjoy and admit we enjoy, without terror or regret, is an achievement in honesty. We will go further and say that polygamy, proffered by the male as a solution to our sexless lives, is no solution at all when we are polyandrous. It is useless to go on pretending, as both sexes do, about this question. The plain truth is that there are as many types of lover among women of all classes as among men, and that nothing but honesty and freedom will make instinctive satisfaction possible for all. Grant each man and woman the right to seek his or her own solution without fear of public censure. Moral questions of this kind cannot be decided by some abstract rule. It would not be wrong for a man to have six wives, provided he and they all found mutual happiness in that arrangement; nor for a woman to have six husbands and a child by each, if she and they found such a life satisfactory. The wrong lies in rules that are barriers between human beings who would otherwise reach a fuller and more intense understanding of one another. And any man or woman of intelligence and vitality can testify that to have known each other as lovers is to have completed mental and spiritual, as well as physical, understanding, and to have permanently enriched each other’s lives, capacities, energies, imaginations. There is no need to make these divisions into mind and body. There is no difference. A way of walking, laughter, thoughts spoken or written, gestures of love or anger, colour and light of eyes or hair■■these are the human being, man or woman. It is thus that modern individuals think of one another. When we think so, it seems absurd to argue whether or no love between man and woman should stop short of a certain kind of physical expression. It is useless to say that a mental exchange is sufficient. On the contrary, lovers know that it is through sexual understanding they best apprehend the quality of each other’s minds. It is equally futile to argue that woman is cheated of her full rights if children do not result. That is not true.

It is said that modern human beings, by dint of not valuing the body, are physically degenerate and lose the finest ecstasies of love. Their digestions are poor, we are told, their breath foul, their teeth bad. Was love more delightful, then, in the old days when baths were unknown, when “sweet breath” in a woman was so rare as to be sung by poets, and the reek of stale sweat was barely stifled by a strong perfume? John Donne wrote verses to the flea he saw nestling in his lady’s bosom. There is scarcely a fine gentleman to-day who could face the prospect of making love to one of the fine ladies of the past six or seven hundred years in Europe, if she could be presented to him just as she was to her contemporary lovers. It is true that neither vermin, filth, nor squalor■■being equal for both■■can stay the passion of sex whether now or in the past, but I do not believe in the theory that the rougher our physique the more intense our bodily delights. Health, to be sure, is essential; but health is to be secured in the modern world, not by a return to savagery, but by the use of intelligence. I believe the bodies of young people of to-day to whom fair opportunities have been given are more healthy within and without than they were in past times. And I believe that the disappearance of religious and moral dualism between mind and matter■■not by an oppressive victory of either, neither by rational and moral control, nor by abandonment to sensual materialism, but by a better understanding of psychology and physiology based on the discoveries of physical science■■is bringing to the whole of life, but especially to sex-love, maternity, the rearing and education of children, joy and rapture and promise surpassing anything known to the purely instinctive life of the past. Of course we are bewildered. Civilization without decay is at last a possibility. Let us have knowledge and patience: blaspheming and violence will ruin all.

It is for modern women and for men who can understand the problem to make an end to secrecy, shame, and starvation where sex is concerned. There has been a good deal of freedom in action, but less boldness in speech, because of the heavy penalties involved. For some women speech is impossible; those who are secure must fight their battle. How old and proper people love a vigorous and god-like young male! How they look askance upon, brow-beat, and bully his equivalent in the opposite sex! Here is a community for ever starving and choking its finest women, stifling their voices in education and public life; then turning and rending the submissive residue for being what years of intimidation have made them. Let them marry, you say, and make a success of that and their children. That would be well enough but for the taboos and disabilities with which marriage is surrounded. Feminism led women away from the home that they might return armed and unsubdued to make marriage tolerable. Women who have been free remember the horror of the approach to marriage: a barrier for most of us to free public activity; a life-long contract only to be broken in disgrace and public disgust; aunts, uncles, social duties that exasperate and are totally unnecessary; the common view that henceforward husband and wife are one and indivisible, and the wife for ever to be burdened with her husband’s duties and affairs; looks of surprise and reproach if we enjoy other male society; constraint in the manner of men formerly our friends; income, if we have any or can still earn, taxed as a part of our husband’s; children, which, had we had them illegitimate, would have been our own but now are our husband’s; worst of all, the looks and smiles from silly women broken in to slavery, congratulating us on having done well and made ourselves secure for life.

Let no one think this is petulant abuse. It is the accumulation of these details, and the pressure of public opinion which gradually destroy the nerve and independent judgment of married women who, in their free state, have been brilliant and remarkable. It is the fact that, by marriage, we conform and place ourselves in a line with millions of others whose view of what we have done is entirely foreign to our own. As a Labour Minister is corrupted by Court dress, so is a free woman by the marriage-contract. Nothing but our desire for children would make us endure it. We, to whom the mutual nature of sex-love is sacred, to whom a partnership involving children is of equal dignity on both sides, to whom the surrender of our whole being in love is a free gift■■the highest we can bestow; who would neither bind ourselves nor others where love is non-existent; we must submit to a contract based on rights of property and possession, buying and selling of our bodies; a law whose conception of conjugal wrongs is sin, punishment, and just revenge; and a Church whose utmost concession is to bid us “serve” instead of “obey” our husbands. Build, O Aspasia, a trade union of lovers to conquer the world, and cry aloud that feminism is nowhere so much needed as in the home.

IV

HECUBA _Feminist Mothers_

So far I have refrained from any detailed discussion of modern women and maternity because it is still necessary to make it clear that a full life of activity for women is perfectly possible and permissible without it. I am quite aware that certain religious people assert as a moral principle that the purpose of sex-love is not mutual enjoyment but the perpetuation of the race. I am also aware that militarists enjoin on women the necessity of marriage and large families as a patriotic duty. Further, certain doctors have gone out of their way to try to prove that the use of contraceptives is contrary to health and nature. These same people, we may note, have no aversion from the wearing by women of internal remedial rubber supports for months on end nor to patching up with silver,

papier mâché, and other foreign materials, the insides and outsides of human beings mutilated in the natural and healthy pursuit called war. I am not concerned with the morals of convention or superstition, but with the morals of experience. It is the experience of modern women that sex is an instinctive need to them as it is to men, and further that the prevention of conception brings to them no loss of poise, health, or happiness. On the contrary, when once they embark on the task of maternity, contraception is a blessed safeguard to health and recovery in the periods of rest between pregnancies. I am not going to deny that the most perfect delight known to human beings is the completely reckless, mutually adoring union of two people of vitality and intelligence who hope to create another human being as a constant reminder of the beauty of that moment. But many considerations, which we shall discuss, forbid a yearly child. I read recently in an article by G. K. Chesterton, that sex without gestation and parturition is like blowing the trumpets and waving the flags without doing any of the fighting. From a woman such words, though displaying inexperience, might come with dignity; from a man they are an unforgivable, intolerable insult. What is man's part in sex but a perpetual waving of flags and blowing of trumpets and avoidance of the fighting? The vast majority of men are not even tender or kindly to their pregnant or nursing wives, nor will they give help or consideration to the care of their young children.

A revolt against motherhood under present conditions is not surprising, nor is it entirely regrettable. There are quite a number of women whose minds and bodies are not fitted or have not been fitted by their upbringing and education to produce and care for children. This is a source of distress to many people, who, as was suggested earlier, did not think of it at the right moment, when the education of women in public and private schools was being developed. Even now these same people stand in the way of the surest remedy: which is to teach science, physiology, and the beauty of sex and maternity to boys and girls at an early age. The London County Council, many of whom are certainly distressed beyond measure at the falling birth-rate and the discontent and irresponsibility of modern young people, have just, in consultation with suitably selected moral headmasters and mistresses, turned down the suggestion of sex-teaching in elementary and secondary schools. We are always told that boys and girls of all classes nowadays acquire this knowledge easily for themselves, but the mere knowledge is not the only thing to the adolescent mind. Things not spoken of by parents or teachers, things dealt with in hushed voices by moral and spiritual leaders, surrounded by cant and humbug and false sentiment, are bound to be thought nasty by mild young people and to provide ribald laughter for the obstreperous.

This is not to say that sex-information should be given in a spirit of evangelical solemnity and exhortation, nor even of soft sentimentality. All that is needed is lessons in physiology, taught as a matter of course, as botany or nature-study are often taught; and then explanations to boys of the working of their bodies, how to keep them in health, how not to dissipate and destroy their energies too soon. Further, they should be told that woman is neither a chattel nor a servant, nor even an inferior, but a partner in joy as in the business of life; that there is no question or difficulty, public or private, which cannot be brought to her for discussion and judgment; and that she has a right to share in all decisions affecting a joint life, children, money, and the conduct of affairs of State. To girls in the same way could be explained the physical changes of puberty, marriage, and maternity, how the child grows, what food and care the mother, and afterwards the baby, will need. There is nothing in this too difficult or shocking to young or adolescent minds. So many of us can remember the secret conclaves with our friends when we puzzled out and pieced together what scraps of information we could glean, awakening instinct darkly supplementing this knowledge. Some of us can remember, perhaps, having noticed obscene writing on school-walls, instantly reported by shocked prefects, instantly effaced by school-mistresses with an awful and portentous gravity which made us feel we had stumbled on the brink of a secret of incredible wickedness and horror. One straightforward lecture of concise information could have dispelled the lurking mystery once and for all and imparted a sense of magic and wonder and ambition. Some of the more fortunate of us, through study in libraries and dreaming over poems, created for ourselves a finer attitude. With no teaching other than that we might find someone who would marry us some day, and that marriage was an excellent destiny even for educated women, and with no belief in any of the moral taboos current around us, some of us can none the less remember the pride of caring for the body, safeguarding health and looks, avoiding excess, severe strain, and overwork, because we cherished our dreams of the children that our bodies were to make■■not ordinary children, of course not: Promethean creatures, endowed with every gift that mortal man could steal from the jealous gods, strong, beautiful, intelligent and bold■■kings and conquerors, not of their fellow-creatures but of nature and the mystery of the world. There is not a woman, unless completely warped by early training, in whom such dreams and visions will not stir if we try to wake them. If not, then let her pass: we do not need her to perpetuate the race. And do not trick her into motherhood by false sentiment and information, or by withholding from her the means to protect herself if she is not fully resolved upon bearing a child.

We want better reasons for having children than not knowing how to prevent them. Nor should we represent motherhood as something so common and easy that everyone can go through it without harm or suffering and rear her children competently and

well. Without arousing dread or horror, we should tell young women frankly the pain and agony of childbirth, and the anxiety and griefs which are the fate of every woman who is a mother by choice and therefore loves her children. Nothing whatever is to be gained by driving the timorous and weak by lies or compulsion into pain which they will resent and responsibility which they will evade. Everything is to be gained by training a woman in knowledge, courage, and physical strength, and leaving it then to her own instinct and her mind to tell her that to create new human beings is worth the discomfort and the suffering which she must necessarily undergo. Those in whom the courage to create survives when choice is free and all the facts are known are those best fitted to bring children into the world, and breed in them eagerness and intrepidity. The others will only pass on fear and distaste for life from which individuals and the community suffer far too much already.[7]

[7] The anti-feminists who see in emancipated women nothing but persecuting spinsters should take comfort from the fact that voluntary motherhood will ultimately destroy feminism, if they are right. The children of women passionately desirous of maternity will inherit strong parental and survival instincts, the occasional feminist “sport” not reproducing herself!

I do not mean by this that we should, scorning the aid of science, return to natural childbirth, and let its pangs scare off the weaklings and the cowards. In this matter the charges of our critics are conflicting. They condemn us for having sought the aid of science to mitigate our suffering, and in the same breath tell us that a return to natural child-bed will bring back a primitive exhilaration and freedom from pain lost for thousands of years. I do not believe that for any comparatively civilized race, any race really worthy the name of man, childbirth has ever been painless. The upright position, held by eighteenth-century divines to be a source of pride in man, was the first injustice to women. Nor do I believe that the sufferings of modern women are any worse or their confinements any more difficult than those of women in the past. They are more closely observed and the difficulties known, and, where skill is available, the dangerous ones are less likely to be fatal. In the past the fragile woman died, or continued ailing, unobserved by a doctor and afraid to complain. People who live and breed in a state of nature are by no means so healthy and vigorous as our modern Rousseaus would have us believe: more children die than survive, and those who are left have physical defects and deformities which could have been remedied by knowledge and care. These and the ravages of smallpox and other diseases, and the deformities due to the natural accidents of life unmitigated by medical care, produce far more ugliness than the mark of an obstetric instrument on temple or forehead. Then, again, youth passes more quickly. The men and women we see in modern life, still reasonably young and fresh with rounded faces and teeth stopped or supplemented by art, would in a more primitive community be dead, or else crouching useless and despised, toothless and with sunken cheeks by the fireside of their sons and daughters.

Decay and pain belong to nature. To arrest the one and mitigate the other has been the task which the sciences that deal in physiology have set themselves. Remedial at first, they pass on to the stage of prevention. Already the principle of intelligent medicine is to strengthen what is weak in the body by nourishment and exercise rather than provide artificial substitutes. Paralysed limbs return to life; women retain their teeth white and strong through several pregnancies. This is not done by a return to nature, but by an increase in civilization and knowledge. In that way our very landscapes have been formed. We prune, we nourish the soil, we cross-breed our plants. The vegetables upon which the enthusiast for nature urges us to live are the product of science and artifice: thousands of years of cultivation, nitrates from Chile, skill of the experimenter, skill of the gardener’s hand. The same is true of the animals we breed for meat, eggs, or milk supply. Agriculture and stock-breeding seem natural to us■■they were not natural in the distant past. As regards the human body, to me at least it seems that we are now beginning to approach the right attitude. There was more dosing and doctoring of petty ailments among intelligent people in the last century. To-day we try to learn how best to live in order that such ailments may not occur, and substitute a well-balanced diet for aids to digestion and the normal functioning of our bodies. We do the same in rearing our children. And this attitude would become more general if those who rule us, Press, Church, rich men and politicians, would consider it really important that every man, woman, and child in the State should have health and happiness, and therefore supply broadcast the necessary rules of life and sufficient of healthy and staple foods for all, in place of advertisement of quack remedies and patent substitutes prepared by profiteers.

To return to the application of science and nature to maternity. A special sentimentality and superstition inherited from the completely savage periods of history cling about this, as about sex. The avoidance of suffering in childbirth is taboo in the Japanese moral code, as it was until recently in Christian morals. Religion has persisted in regarding the female body as unclean when engaged in its most important functions, and purifying it afterwards by special prayers to the Deity.[8] We find this savagery current in Judaism[9] as in Christianity, together with an exhortation to be fruitful and multiply, and therefore to pass through shame and uncleanness as often as we can. It was thought a horror and an outrage when chloroform was used to help us. It is a still greater horror when means are discovered of not having children at all. To this day most doctors and dentists refuse to give an anæsthetic

and draw a rotten tooth which is wearing down a pregnant mother's strength by sleepless nights and days of agony. Yet this can be done with reasonable care and skill. Behind all this there is the mystic belief that somehow or other nature does the work best unaided and unhindered; and this mysticism is rooted in a savage taboo. Life is, indeed, so pertinacious that somehow some of us will survive whatever we do, but this does not seem to me an adequate attitude for the rational mother.

[8] See the service for the _Churching of Women_ in the Prayer Book.

[9] _Leviticus_, xii, 1–8.

The truth is that it is not desired or expected that mothers should be rational. Maternal instinct is so wonderful, maternal devotion so sublime, cry our sentimental brutes. Whatever we may have known of life and the outside world, it is still expected in modern times that, once married, we shall descend into a morass of instinct and ignorance from which we shall never, if the male and the vindictively-minded spinster can prevent it, emerge again. We are privileged, so we are told, in that we may bear each year a child for the State, rock the cradle, wash, mend, and make, pass on the lore of housekeeping and infant-care to our daughters just as we received it from our mothers. It is such a beautiful picture: a pity it is entirely false. The old-fashioned mother had no lore, and her instinct was inadequate. She succeeded by luck rather than by knowledge. She adored, or disciplined; she killed by kindness or by severity and neglect. She would coddle when she should have hardened, harden when she should have coddled; she would over-feed and under-feed, or give the wrong kind of food. Since it has been the fashion for women to have minds, the books for mothers have become more scientific and our intelligent inquiries have been met by research and more adequate replies. Every mother with any intelligence who has reared one or more children through the first year of life and up to five years of age would admit nowadays that scientific knowledge was of more service to her than all the instinct and adoration at her command. Indeed, I believe the so-called maternal instinct in handling and understanding babies consists of habit almost imperceptibly learnt in tending the first, blossoming into a smooth instinctive unity with the coming of the second. The fashionable mother, said to be devoid of maternal instinct because she neglects her child, has simply not learnt it, because necessity does not compel her to practical duties. This is even true, though less so, of well-to-do mothers who feed their babies at the breast.

People will persist in imagining that uncivilized women were always able to feed their children in natural fashion. Very often they were obliged to seek the help of another mother, and, when that was not forthcoming, the baby died. It is quite true that our adaptation to modern conditions of life, nerve-stress, combined with overwork for women in towns and industrial districts, has caused breast-feeding to be less common than it was in the past. But here again the way of life is not back to nature, which is impossible because we cannot at a blow destroy industrialism and the towns■■but onwards, to greater knowledge. Instead of bullying the mothers and telling them it is wicked not to feed their babies at the breast, let them know how, by pre-natal care of health and strength, by diet, by deliberate nerve-control, they can feed their babies with comfort and delight and without detriment to their health and the work which they must necessarily do■■or even to their beauty. Here again, if choice is free and the child therefore ardently desired, there is more chance of success with breast-feeding. And knowledge of the chemical constituents of cow's milk and patent foods as compared with human milk is more likely to induce the modern mother to suckle her child than volumes of abuse or sentimental twaddle.

Then as to the hygiene of pregnancy. Could our mothers have taught us about the different food-values, about protein, nitrogenous foods, calcium from the green foods for teeth and bones, avoidance of too many albuminous foods? Knowledge of what diet can do to help us in pregnancy and our children in early youth is in its infancy, but it is there, none the less. Shall we fling it aside and return to pure instinct? What massage and remedial exercises have taught can be applied to our bodies during pregnancy and after childbirth. It is probable that closer study of the functions of the muscles of the back and the abdomen would enable us to teach women to exercise and control them in a way that would make childbirth almost painless, and the recovery of poise and activity afterwards more rapid and more thorough. Under present conditions, muscles that are often too rigid or too feeble expand and never recover their tone; others■■the back muscles, it may be■■go out of use temporarily and similarly do not recover. In the middle-class woman laziness is often the cause of difficult confinements and poor recovery of the figure; in the working mother a too speedy return to work which is too hard and does not exercise the body harmoniously; in both the ignorance which leads to wrong kinds of nourishment during pregnancy, and fear of doing harm to the child which leads to rigid and over-careful movement, are responsible for a good many troubles. Psychological effects may be serious. Most women develop during pregnancy sensitiveness and a timidity protective to the child. From this the very fertile mother has no opportunity to recover. Hence many of the silly old ladies who cannot cross roads unaided by a policeman. With birth-control, in two years a determined mother can completely restore her nerve, her joy in life, and her full muscular powers.

The author of _Lysistrata_ suggests that by diet we may produce thin babies and therefore have easier confinements. This may be true, but it is a curious fact that the experience of some mothers and doctors goes to show that much protein (which Mr. Ludovici suggests we should avoid) produces a thin baby and a corpulent mother; that, on the other hand, light and nitrogenous foods, while keeping the mother slim and supple, yield a plump 8 to 9 lbs. baby. I think the size of our babies is perhaps not so much under our control as many might wish to suggest. Heredity enters in. Children sometimes have large fathers. The sheep-breeder knows that he dare not mate certain larger types of rams with small-made ewes.

In all these problems, however, it is the frankness and intelligence which feminism has made possible for women which will bring solution and progress, rather than a return to the unguided instincts of our forefathers. The lore of motherhood is a science which is now beginning, but it is not following the lines which convention and the moralists expect. It defies sentiment, ridicules unnecessary and unintelligent sacrifice, is not content to suffer, but makes demands. It begins with birth control, which to many seems the negation of motherhood, but which to the creative mother is the key-stone of her work.

Suppose we have educated our young women sanely about physical matters, as suggested earlier in this chapter. As they reach the age of maturity and activity, what will they find? If they are middle- or upper-class, an existence that is not too intolerable. Feminism has won for them the right of entry to most professions and, provided they are fairly able, they can get work. None the less, it must be admitted that the years since the War have borne hardly upon wage-earning women of all classes. The lack of sexual freedom is a terrible burden, but the remedy ultimately lies in their own hands. Life in marriage still offers reasonable comfort and good food for man and wife and two or three children. But late marriages, from the lack of opportunity for men and the expense of living, cause girls' young bodies to be worn with longing unless they are bold enough to follow our modern Aspasias. This waiting to marry is a real danger to young women's health which conventional, unimaginative people refuse to face. It produces nervous disorders bordering at times on insanity.

As regards the care of her body in pregnancy and childbirth, and the feeding of her children, the middle-class mother is in a position to carry out what modern science has to teach. She cannot have a large family, it is true, and the cry goes up on all sides that it is very hard for the middle-classes to pay for the proper education of their children.[10] The best stocks are being penalized and extinguished, so we are told. This is part of a much bigger problem, and a problem that involves the class-war. All ambitious mothers, from miners' wives to the aristocracy, would like to breed the fine types who receive a thorough education and then enter one of the intellectual professions. Obviously this cannot be. And, given equal ability in two children of different classes of life, there is no just reason for driving the worker's child, who has less good food and conditions and is therefore less fitted to stand the strain, through the worry of the scholarship system, whilst the other child's path is made smooth to a ruling position. Man for man, woman for woman, the workers would be the equals of the middle-class in strength and ability, given the same nourishment, comfort and training. In actual fact, the middle-class is perpetually being replenished in one generation, or two at most, from below. Middle-class fathers and mothers have no right to claim the privilege of a large family unless their children, if they are strong but not clever, are prepared to work the railways or dig coal in the mines. Professional people, scientists, artists, research workers, pure mathematicians, as well as skilled engineers, are, indeed, the salt of the earth, and the community that fails to produce them and give them scope is doomed in this modern world. But they are supported by manual labor, and it cannot be denied that their number cannot be indefinitely extended except by an increase of productivity and wealth. A more equal system of society will diminish drudgery and make it possible for all to have a fine development of intelligence and understanding, whatever the work on which they are employed.

[10] An instance of the incredible snobbery surrounding this question is given by the decision of the conference of Headmasters of Secondary Schools, January, 1925, against free secondary education. While the middle-class parent groans against the cost of his children's education, he also refuses to take the obvious remedy of making education free, for fear the working class should get some of it. Class difficulties would not exist if health and education were adequately dealt with.

Feminism in the mother has led us far from maternity. That is what it is bound to do. The working mother to-day looks straight from her kitchen, if she is lucky enough to have one, on to one of the most complex situations in history. And the intelligent ones are not blind to the situation. That is why I suggested that, though middle-class feminism has conquered the professions, the feminism of working mothers might bring a new and powerful contribution to our work.

The life of the working woman who intends maternity is becoming well-nigh impossible, and she knows it. When she has found a husband the community denies them a decent house. Possibly they find one room or two at an exorbitant rent, with no water and a grate unsuited for cooking. There are no restaurants at which the pair can afford to feed. Therefore they exist on partially or

casually-cooked food, innutritious bread, and food from tins. Things may not be so bad if the wife can go on with work at a mill and get food that is fairly good at the canteen, her wages helping the meals taken at home.

The coming of a baby too often means a search for another lodging. The Bishops and the Generals like babies, but landladies don't. Another room is found, perhaps. The mother works till the last moment, has a difficult confinement and inadequate attention, and gets up too soon. It is not easier for her than for a delicately-nurtured woman, and it is not less painful. Probably it is worse, because the working mother has from birth been underfed and has weaknesses and deformities■■a contracted pelvis, perhaps■■that a woman well-fed and cared for escapes. Then it goes on, baby after baby up to ten and eleven,[11] always in one room and no more money coming in. The mother works whenever she can to help keep the family. Frequently she is cursed or beaten by her husband for her fertility. Should the husband die, she must work continually and harder or send her children to the workhouse. In the opinion of the Bishops, she deserves the "stigma of the Poor Law," and, in the opinion of all right-thinking people, anything done for her by individuals or the State is in the nature of a charity.

[11] A woman of 45 years of age gave birth recently at Queen Charlotte's Hospital, Paddington, to her 23rd child. Ten children is not uncommon.

If I but had the eloquence of Hecuba mourning her slaughtered sons! The crime of war is bad enough: this butchery of hope and promise and human lives is one so black that the heart and mind of every woman who has borne a child should revolt against it until it is tolerated no more. It is easy to escape into an aristocratic theory of society. It has been done before, and ends in the guillotine. These working mothers are the people who must be lied to and terrified by bogies for fear that they use their votes to help themselves. And it is they who, when they sit in conference, demand of the State the right to stem the tide of children, to endow mothers, to pension widows, to teach and tend maternity and ensure rest for pregnant and nursing women; to see that houses and schools are built, and to control and purify the food-supply. Here is the most serious problem for the mothers, and one which the middle-class politician does not touch, because for the middle-class pure and fresh food is almost always obtainable. It is for the working mother to tackle those tins. She cannot now destroy industrialism, which dragged her work and her after it to the mill; but she can claim her right to control it in the name of life and the destiny of her children. Control of the population is essential to solving the food-problem and improving national health. Women in small houses know it. They know, moreover, that contraceptives are better than infanticide and war. The survival of the fittest is a false doctrine in child-bearing as in fighting. Every child which starts with a reasonably good constitution can, by the right care up to one year and food up to five, grow up to be strong and well. And, if the weak and unhealthy are discouraged from breeding and healthy mothers given proper care, great improvements are possible. Poor food and over-crowding are the ladder down which we go to mental deficiency and ultimate complete feebleness of mind.[12] If we cared for life, the best food would by law go to the pregnant and nursing mothers instead of, as at present, to clubs for fat old gentlemen and the frequenters of palatial hotels. It is probable that at present we do not produce enough milk, or produce and import enough butter and eggs to distribute adequately to all.[13] But, by stabilizing or decreasing our population, and by co-operation, intensive culture and control of marketing abroad and of marketing and purity at home, we could see to it that everybody had enough and that what they had was really good.

[12] Professor MacBride, dealing recently with the "Inheritance of Defect" (_Daily Telegraph_, January 8, 1925) said: "The question of questions was whether the failure of the lowest strata of society was due to their surroundings or to their inborn characters. Such questions must be ultimately decided by experiment; and proper experimental work could only be done with animals; we were not entitled to make _corpora vilia_ of our fellow human beings. For this reason he would direct attention to the common goldfish, whose weird monstrosities were all originally due to the starvation of the eggs with respect to light and air in the earliest stages of development. The result of this starvation was to weaken the developmental power and to produce a disharmonious arrest of growth of various organs. Similar arrests of growth occurred in human beings, and were the causes of mental and bodily defects. Their original cause, however, must be sought in the starvation and poisoning of the blood of the mother, but, once started, they were hereditary."

[13] Working people live on tinned milk, margarine, and substitute eggs■■all deficient in necessary vitamins.

To feed an industrial population in a small island is a peculiar and special problem and one demanding expert care and advice. Food must come long distances and must "keep." Hence the preservatives and tins and the need to be watchful beyond measure against poisoning and the loss of what is vital to our well-being. With research, the problem would be easy; but we must make it clear that it is important. Science would easily enable us to produce more from the soil, and, as regards the food of mothers, since the assimilation of extra minerals, salts, etc., in their natural state is not always satisfactory or easy during pregnancy, we might find

ways of growing food, through treatment of the soil, to provide for the special needs of their condition.

What then must feminist mothers demand? The right first of all to the recognition of their work■■the most dangerous of all trades and the most neglected and despised. They should ask for endowment from the community. This is opposed by many on the ground that fathers delight to support their children, and it is they who should claim from the community an adequate family-wage. But, after all, it is the mother who bears and tends the child, and, although many women receive the whole of their husbands' wages, others must fight a humiliating battle against drink and tobacco for the wherewithal to build their children's bodies. This struggle is exemplified on a large scale in the spending of State revenue, most of which goes on armaments and the forces of destruction, and an infinitesimal portion to aid and support life. If Jason cannot give up his murderous playthings, let him have neither sons to destroy nor daughters to drag through misery. His children shall never be conceived. I have indicated that this is happening already, not as a deliberate revolt, but as a counsel of despair in a world which offers no hope, no joy, and no opportunity to the young.

The mother has a right to demand two years' rest between pregnancies; and the right to decide the number of her children. For some the call of motherhood is insistent and its charm grows with experience; they would be good mothers and might well have large families. They could help others by superintending nursery-schools in which children from one to five years might have their important meal of the day. But it is imperative that the woman who has children should not be shut out from public life. The ideal would be for a woman to continue her education at least till eighteen, have the first child at twenty-four, then perhaps three others at two-year intervals. This assumes that large numbers of women do not choose to breed. At thirty-five every mother of four children would, in a community of good schools, convenient houses, and well-run restaurants, be free again to take part in public life. It does not follow that she would be separated from her children; they would go to day-schools. But the mother would do the work for which she was best fitted in school,[14] kitchen, hospital, shop, mill, or Parliament. In this way her opinion would count, and her attitude to life help to permeate the community, which is otherwise left to be guided by the outlook of the single woman and the male. Problems of unemployment and competition due to married women's work are really questions of population pressure, muddled thinking, and bad organization. To discuss all this in close detail is hardly within the scope of this book.

[14] I am strongly of opinion that experience of maternity, even more than of marriage alone, would help the teacher. Some women, even teachers, are bored by children until they have one of their own, whereupon all children of all ages become interesting.

In conclusion, it may be said that the community should never, except on the strongest grounds, deny parenthood to man or woman. Therefore marriages which after two years did not result in a child should be dissoluble at the wish of either party to the contract. This, apart from all other reasons for which the cancelling of marriage should be allowed. Partnership in marriage should in effect be regarded as a partnership for parenthood, and as such should not be entered upon lightly.

V

JASON AND ADMETUS _Men_

Before we pass on to an attempt at a summary and conclusion of the argument, it may be as well to re-state briefly what is the matter with men. Certainly they are not such fierce tyrants as when first we fought them; certainly they have some grounds to complain of the feminine arrogance which, not content with proving equality, wants to go on and prove women the superior sex. We might, on grounds of science perhaps, advance this claim, urging that, since a female being needs one more chromosome for its creation than a male, it must, therefore, be of higher importance. Should we do so, and seek to live alone on the planet, producing our children by parthenogenesis, our pride would be doomed to a fall. Such children, there is reason to believe, would all be males. At least, that is what happens when the experiment is tried by sea-urchins. Men, on the other hand, like to pretend that our assumption of intelligence and independence is but a momentary spurt in a race which must end in masculine victory and feminine submission. They admit that the great development of our freedom in body and mind has given us a serious advantage, and the more discerning among them urge their fellows to press on and catch us up. Others trundle the golden apples beseechingly, but still Atalanta runs.

I believe it to be true that the education and outlook of men is more old-fashioned than that of women reared in the freedom of feminist traditions. Men have not yet realized how women's outlook is changing, nor attempted very seriously to adapt themselves to the change. They will do so, of a certainty; for, true as it may be that above all desires in woman is that to be pleasing to men, it is still truer that the desire of desires in man is to be pleasing to women. I believe that Puritanism or asceticism, of which they

accuse us, is very strong in them. One of the compliments or insults that has been hurled during the sex-war is that the feminine mind is pervaded by the physical harmony of the feminine body. One may perhaps retort that the dualism of mind and matter is a very masculine philosophy; and one which, moreover, men have translated into their everyday lives by the sharp division they like to make between fighters and thinkers, games-playing idiots and thin intellectuals. Too often a woman of vitality and intelligence must choose between a soldier-gentleman and Chaucer's clerk.[15] Should she choose the former, she takes a plunge into the past. This man exults in murder, whether of animals or of his fellow-creatures; deep down within him he is still convinced that women are divided into good and bad■■and both require the handling of a master. His wife must beware how she responds to his advances; she may be thought forward or impure. Decency must above all things be preserved. Though games and the classics may have taught the English gentleman the beauty of paganism and the joy of the naked body where man is concerned, he is still stuffy in his approach to sex. He rarely brings the freshness of the morning and the joy of the open skies to the love of mistress or of wife. Plush, gilt and silk stockings express the one; pipe, the armchair at the fireside, dinner, and a coldly furnished bedroom, the other. Conversation is a masculine monologue, punctuated by assent. He will be good to his children, provided they are not odd, and will protect his wife. He will never lift her to rapture. She fears, and will probably deceive him.

[15] A clerk ther was of Oxenford also

That unto logyk hadde longe y-go. As leene was his hors as is a rake, And he nas nat right fat, I undertake,

* * * * *

And him was lever have at his beddes heed Twenty bokes clad in black or reed.

The intellectual■■perhaps by reason of the monastic tradition of learning, perhaps because he finds Jason so revolting■■does all that he can to forget the needs of the body. Woman counts as one of them. She is a burden, a responsibility, a distraction, an incursion of the material into a world of contemplation. As for children and domestic life, they would make an end to all thought, to all art. An instinctive life■■so he thinks■■is possible only in spasm, if at all, for a man with serious mental work to accomplish. If woman persists in keeping him company, then she must shoulder the burdens, tend him and care for him, and leave him alone when he doesn't want her. It is this contempt for the natural play of instinct which eats the heart out of life for many intellectuals, men and women, of to-day. They dread the gift of themselves, the loss of independence which passion would bring, and therefore they never give freely. In part, they are cherishing the medieval tradition that to be worthy of spiritual or mental labour man and woman must go aside and renounce; in part, they are inspired by a tight conception of materialism, in which individuals are hurled like lumps of matter by dynamic forces through space, unable to do more than come near, but never mingle one with another. This view of life and the medieval are combining to destroy our world in lovelessness and despair.

The old-fashioned mind clings to spiritual duties and consolations and the framework of Church discipline, as a bulwark against personal licence; the more modern mind is dominated by mechanism■■which is, after all, no more than the rational control of matter■■and seeks in an intelligent organization of the State, a framework within which each individual is to perform the duties for which he is best fitted. To neither conception is love between individuals, or sex-love between man and woman, important. In effect, personal relationships do not matter. The Christian doctrine of all-embracing love was once potent, but fails to-day because of the foundation of God, dogma, and Church on which it is built and which modern people cannot accept. "To love thy neighbour as thyself" is also inadequate without knowledge and understanding. But the rational materialists' attitude■■such, for instance, is that of the Bolsheviks■■to human relationships, in particular to women and sex, is as lacking in the sense of human dignity as the Christian. Monogamy and undiscriminating licence rest upon a common basis of contempt for love

THE SPLENDID WOMEN OF ALL NATIONS AND ALL AGES WHO HAVE VALIANTLY STRIVEN TOWARD THE BROADER FIELDS OF THOUGHT AND ACTIVITY FOR THEIR SISTERS AND FOR MANKIND AS A WHOLE

EDITOR’S PREFACE

Just now, when the world is going through the most significant period of human history, it is well that woman’s voice be heard above the tumult. For upon woman’s activity may rest the salvation of the race.

This Anthology is not an attempt at literary effects so much as it is an attempt to present seriously woman’s viewpoint of life to a nation standing on the verge of—it knows not what!

So new is the voice of woman in the affairs of life, that in time of stress or panic it must become insistent to be heard or heeded. One book, by one woman, regardless of its strength or purpose, could not have the effect that one book by “crowds” of women could have. That is why this volume has come into existence. It literally is the voice of “crowds of women.”

Those whose words are quoted here are representative women, leaders in their various organizations, representing hundreds of thousands of individuals. Many of them are among our foremost writers, artists, teachers, actors, orators and organizers—some of them combining several of these qualities.

“Woman’s Voice” might easily have been two or three times its present size, but that would have meant a publication too expensive to reach the thousands of readers of moderate means to whom this work is an immediate, special appeal. Future editions of this Anthology will be revised and enlarged until we finally shall have a perfect volume which will take its place in every home as a standard household classic, along with those other books of strong human appeal which every home possesses.

Much of the material in “Woman’s Voice” is covered by copyright, and special permission has been granted the editor to reproduce it here. Many very good things were taken from exchanges (more or less obscure publications), and in such cases the original source of their appearance was difficult to trace. However, in each instance attempt has been made to give credit where it is due, and the editor hopes she has made no serious failures in this respect.

The many publishers and publications, as well as authors and artists represented here, have been very kind in their co-operation to make “Woman’s Voice” a success, by granting permission to use these selections from their output. Special mention is given them elsewhere.

It is the editor’s hope that this volume will circulate very largely in the small towns and country districts of our nation. I want the millions of women who are feeling, and thinking, but who are as yet inarticulate upon the larger affairs of life, to find their need and their voice in this volume. I want that great isolated sisterhood, many of whom have never read a book by a woman on social questions, to have this volume in their homes—and always near at hand; on the sewing table, or in the kitchen cabinet, where it may be referred to between cake-baking and bread-making times. I hope the children in these homes will memorize the verses in this book, and recite them at the Friday afternoon “Literaries,” in their schools.

I hope the club women will make constant use of this volume in their club work—in the preparation of programs, and in roll calls. For the things quoted here deal with the most vital issues of the times, as well as with the most intimate personal emotions and needs of the individual, and are presented by responsible and capable women. Also, they show the growth of race progress through woman's efforts—how she has struggled and won educational rights; how she has struggled and won political rights; how she has struggled and won matrimonial rights, and rights for her children, and for the world's workers. How she is struggling still to bring about an ever higher and fuller life for today and for the future.

And in all this she needs your help, you in your isolated corners; for not until every nook and cranny is active and comes to the front, can our nation attain to those heights for which our womankind is so valiantly working.

When woman's voice is heard the world around, mankind will hearken to her cries and heed them.

INDEX OF AUTHORS

INTRODUCTORY NOTE

The American people today may be likened to the onlookers of a great drama. A drama so tremendous, so spectacular, so tragic, that it surpasses anything the mind of man has hitherto conceived. The onlookers of this drama naturally are absorbed with its immediate movements. With its broad meanings they are intensely concerned, but beyond these they have no interest. Their vision for detail is clouded by the flare and vastness of the apparent. What lies beneath, above, about, are only incidentals and of no immediate consequence to them.

But the “incidentals” of the present war are, for the careful observer, to say nothing of the professional drama critic, the chips which show what is taking place as the result of the flare and the noise, and the tragedy. One of these incidents is the coming of woman into realms of activity which not for a million years—that is to say, never before—have been opened to her.

Under the stress involved in winning a world peace, this fact is scarcely noted, and is not understood in its full meaning. But the moment peace is declared it will become a question of vital importance, involving as it does all lines of human endeavor—labor, commerce, philosophy, literature, agriculture, law, education, and the crafts as well as the arts.

The conservative mind, freed from the absorption of war, will turn with startled gasp to discover that one half of the race has been shaken out of the rut of ages, and is spilling itself helter-skelter, into every department of social achievement. And the conservative mind will ask with child-like frankness if the women are equal to the responsibility and the opportunity which has been thrust upon them.

“Woman’s Voice” has been compiled in anticipation of this awakening on the part of the multitude, as an answer to its wondering inquiry.

That women have themselves long yearned toward the broader paths of effort and usefulness is manifest in the utterances of those who have learned the art of self-expression. That they fully comprehend the meaning, hardships and blessings of the broader life, is plainly shown in their wide-spread printed word. “Woman’s Voice” is an effort to collect, in what may be called at once a brief and an exposition of woman’s entrance into the world of general endeavor, the wisdom of the women who have studied conditions with an earnestness and efficiency which renders them peculiarly fitted to speak for themselves upon the questions most closely touching themselves and their children.

For ages untold only the voice of man has dictated the conditions under which the rest of the world should live, including women and children. All the poetry, all the philosophy, all the wisdom of the ages was presented in man’s words, and from man’s standpoint. Woman, dumb, untutored, and handicapped by an adverse public opinion, another creation of the solely masculine mind, held to her chimney corner as helpless in the face of petty and colossal injustices as the children she bore.

“Woman’s Voice” portrays the effort of women to get away from this now apparent social mistake. Women have spoken and will continue to speak, for, if we are to proceed speedily and with the least possible resistance into the new order of things, education is still essential. There are millions to whom the apparent is not apparent, and whose eyes must be opened before the democracy for which the world is paying in blood and agony can become a reality.

I believe “Woman’s Voice” should be in every home in the nation, and in all nations where society is affected by the conditions which have brought women away from the hearth-stone into the market-place. As a digest of the best thought of representative women the world over, it will be read when the multiplicity of volumes from which it is quoted are passed by. It will be read not only for its seriousness, but for its poetic sentiment, and its sprightly comment on the every-day things of life. Its usefulness to club members and to workers in the equal suffrage campaigns will be invaluable, but it is to the average housewife and mother that I trust it will make its strongest appeal. To the women who have more or less dimly felt, but who have not as yet found a voice or an avenue through which to develop or express this feeling about things which so much concern them and their children. I am hoping, also, that it will fall into the hands of thousands of theorists who are opposing, for no reason except their own ignorance about it, the advance of women in the coming world-democracy.

Briefly, but earnestly, I wish to thank the publishers, editors and writers who have made this Anthology possible through their permission to reprint from books, magazines and articles the matter contained herein. I have endeavored in all instances to give full credit to all of these, and if errors happen to occur in this regard they are unintentional, and only the result of the initial publishing of a work as new and comprehensive as this one. Also, if any name has been omitted whose observations should have appeared in this book, it is only because it was impossible for a very busy editor to fail to miss some very worthy writers. In future editions these

can be gathered up, until we have a volume or many volumes which may be perfectly representative of the woman's voice of the world.

JOSEPHINE CONGER Compiler "Woman's Voice"

BOOK I

The Woman Movement

THE WOMAN MOVEMENT

The Most Brilliant Period

By Anna Howard Shaw

(American contemporary. Former president of the National American Suffrage Association. From a series of articles in "The Metropolitan.")

The winning of the suffrage states, the work in the states not yet won, the conventions, gatherings and international councils in which women of every nation have come together, have all combined to make this quarter of a century the most brilliant period for women in the history of the world.

Woman's Awakening

By Mary Ritter Beard

The awakening of women to the low social status of their sex is the most encouraging fact of the century.

Unanimity of Needs

By Katherine Anthony

(Author of "Mothers Who Must Earn," and "Feminism in Germany and Scandinavia," from which the following is taken.)

The woman movement of the civilized world wants much the same thing in whatever language its demands are expressed. In more or less unconscious cooperation, the women of the civilized nations have from the first worked for similar ends and common interests. Beyond all superficial differences and incidental forms, the vision of the emancipated woman wears the same features whether she be hailed as _frau_, _fru_, or _woman_. The disfranchisement of a whole sex, a condition which has existed throughout the civilized world until a comparatively recent date, has bred in half the population an unconscious internationalism. The man without a country was a tragic exception; the woman without a country was the accepted rule. The enfranchisement of the women now under way has come too late to inculcate in them the narrow views of citizenship which were once supposed to accompany the gift of the vote. Its effect will rather be to make the unconscious internationalism of the past the conscious internationalism of the future.

Coming Into Her Own

By Fanny Humphrey Gaffny

(American contemporary. President National Council of Women. From a speech delivered at the celebration of Miss Anthony's 80th birthday.)

The Christian world reckoned by centuries is just coming of age. Therefore women are beginning to put away childish things and to realize the greatness of womanhood.

The Sisterhood of Women

By Coralie Franklin Cook

(From a speech delivered at the 80th birthday celebration of Susan B. Anthony.)

Not until the suffrage movement had awakened woman to her responsibility and power, did she come to appreciate the true significance of Christ's pity for Magdalene as well as of his love for Mary; not till then was the work of Pundita Ramabai in far away India as sacred as that of Frances Willard at home in America; not till she had suffered under the burden of her own wrongs and abuses did she realize the all-important truth that no woman and no class of women can be degraded and all womankind not suffer thereby.

The Revolt of Women

"Ouida" in Lippincott's

(See page 113)

The whole human race is involved in the results of the present revolt and reaction amongst women; if turned back upon itself by mockery it will burn and bite on unseen, and find its issue in mad sins, wild frivolity, and all the anarchy of voluptuous abandonment; if rightly met, if rightly guided, it may become the noblest and highest revolution that has ever broken the chains of effete prejudices, and let out human souls from the darkness of ignorance into the light and glory of a day of liberty.

Women's Qualifications for Suffrage

By Mrs. Russell Sage

(See page 170)

Twenty years ago I did not think that women were qualified for suffrage, but the strides they have made since then in the acquirement of business methods, in the management of their affairs, in the effective interest they have evinced in civic matters, and the way in which they have mastered parliamentary methods, have convinced me that they are eminently fitted to do men's work in all purely intellectual fields.

A Generation Ago

By Neva R. Deardorf, Ph. D.

(Department Public Health and Charities, Philadelphia. From "Annals of the American Academy.")

Woman's place in the crowd of a generation ago was immediately back of her masculine kinsfolk. Here she enjoyed protection from the rough elbowing of the crowd, though in return for this shelter she forfeited her liberty and was expected to devote all of her physical strength and mental energy to pushing some particular masculine protector to the front. Some times her efforts were appreciated, frequently they were taken for granted, since etiquette favored a covert manner of pushing. But the rules of the game have changed. Partners and co-laborers are taking the place of lords and masters. Farmers, professors, clergymen, politicians, in fact, husbands of every calling are coming to see the advantage of having a wife beside, instead of behind, them. They now take pride in a wife who enjoys an outlook on the world which enables her to help far more intelligently and effectively than did the wife of a generation ago.

To Raise the Standards of Life

By Gertrude Barnum

(American newspaper woman. Speaker and writer in the cause of organized labor.)

The attitude of men toward women, economic, social, political, reacts upon man and society. In recognizing this, the man with the scythe is a length ahead of the man with the cap and gown, the cassock or the check book. The awakening to a sense of the economic interdependence and fellowship of men and women, has made the trade unionist the first to recognize the justice and wisdom of "universal suffrage," and annually in convention the American Federation of Labor declares:

"That the best interests of labor require the admission of women to full citizenship—not only as a matter of justice to them, but also as a necessary step toward insuring and raising the American standards of life for all."

Legislative Responsibility

By Emily J. Hutchins

(See page 204)

The most obvious effect of the vote is that it puts women upon a plane of political equality with other normal adults.... Universal suffrage stands for a certain recognition of the stake that all human beings, irrespective of sex, have in the general welfare, and destroys a false sense of sex limitations. By virtue of their new standing in the community women assume an equal responsibility with men, for both good and bad legislation.

He Shall See the New Woman

By Mabel Potter Daggett

(From “What the War Means to Woman,” in “Pictorial Review.”)

You see, when her country called her, it was destiny that spoke. Though no nation knew. Governments have only thought they were making women munition workers and women conductors and women bank-tellers and women doctors and women lawyers and women citizens and all the rest. I doubt if there is a statesman anywhere who has learned to unlock a door of opportunity to let the woman movement by, who has realized that he was but the instrument in the hands of a higher power that is re-shaping the world for mighty ends, rough-hewn though they be today from the awful chaos of war.

But there is one who will know. When the man at the front gets back and stands again before the cottage rose-bowered on the English downs, red-roofed in France and Italy, blue-trimmed in Germany, or ikon-blessed in Russia, or white-porched off Main Street in America, he will clasp her to his heart once more. Then he will hold her off, so, at arm’s length and look long into her eyes and deep into her soul. And lo, he shall see there the New Woman. This is not the woman whom he left behind when he marched away to the Great World War. Something profound has happened to her since. It is woman’s coming of age.

The Freedom of the Women

By Louise Collier Wilcox

(In “The Woman’s Journal.”)

When woman knew that on her strength devolved the care of race, She crept into her cave to sleep and told her man to face The prowling outer dangers, and the dark and fearful odds, The thunder, beasts, and lightning, and the wrath of all the gods; For at her heart she carried the future and its cares, And the freedom that she needed was more precious far then theirs.

So she watched her babe’s eyes open, and the little limbs grow straight, And she taught him all the lore she’d learned, and what to love and hate; And she trained the little body, and she led the little soul, Till another woman took him to lead further toward the goal; Then the mother smiled in anguish, though she laughed at age and cares, For the freedom that she wanted was a longer one than theirs.

When the work of life grew harder and men bowed beneath the yoke, Of needs too great to master, and lusts too deep to choke, She worked and slaved and tended, she wrestled with the dearth; She harnessed up herself to beasts, to till the barren earth; And she planted in her garden and she weeded out the tares, For the freedom that she wanted was more beautiful than theirs.

But when she saw man bestial and content with earthly things, She scourged herself in cloisters, and she wept and prayed for wings. Then she nurtured heavenly visions and she held aloft the cross, To show eternal values amid life’s gain and loss. And she pointed to the radiance round the crown the god-man wears, For the freedom that she wanted was a holier one than theirs.

Then she smiled from out her shelter while her men coped with the world; Her strength she made of weakness, and about her heart she curled The tendrils of dependence and his little children’s love; And she showed him what a home was in her gathered treasure trove. All the time her eyes were smiling with the smile the seer wears, For the freedom that she wanted was the freedom of his heirs.

Still her heart grew great and greater, and her eyes she would not blind To the suffering of the victims, to the needs of all mankind. And she knew her safety futile and her children’s stronghold weak, Till the least, last one is sheltered, and there’s none astray to seek. So she looked far down the ages to the good that all man shares, For the freedom that she wanted was a broader one than

theirs.

And she knew her man short-sighted, since he had not borne the pain, The slavery, drudgery, darkness, the glory and the stain Of womanhood and motherhood. How could he love the race? As she who bore and nurtured, God's instrument of grace? So she ceased to coax and wheedle, and commanded as one dares Whose only love of freedom is a higher one than theirs.

...

She stands, now, hand upon the helm, to help him govern life, And she steers her world, his equal, in love, in peace, in strife; She owns her strength and wisdom; and he may read who runs, That she must demand her freedom from his daughters and his sons. Neither beneath nor over, but equal in her place, The freedom that she'll die for, is the freedom of the race.

A Woman's Question

By M. Carey Thomas

(A contemporary. President of Bryn Mawr College. From an address at the College Evening of the National American Suffrage Association.)

Woman suffrage is first of all a woman's question. We cannot remain indifferent. The issues involved are so overwhelmingly important, first of all, to us as women caring as we must for all other women's welfare, and second, to us as citizens of the modern industrial state. I am sure as the result of repeated experiment that it is only necessary for generous and unprejudiced women to realize the present economic independence of millions of women workers, and the swiftly coming economic independence of millions upon millions more women workers for woman suffrage to seem to them inevitable from that moment.

No one can maintain by serious arguments—that is, by arguments that are not pure and simple distortion of fact—that the ballot will not aid women workers, as it has aided men workers, to obtain fairer conditions and fairer wages. All working men and all men of every class regard the ballot as their greatest protection against the oppression and injustice of other men. It is only necessary to ask ourselves what would be the fate of any political party whose platform contained a plank depriving laboring men of the right to vote.

Because They Cannot Vote

By Meta L. Stern

(See page 250)

Industrial organization and political activity constitute the two powerful arms of the labor movement. Men are free to use both their arms. Women are struggling with one arm tied.

The Plea of the Women

By Katherine Parrott Sorringe

(In "The Woman's Journal.")

Standing before you with suppliant hands, Mothers and wives and daughters, we Sue for the justice long denied;— Give us the vote that makes us free!

She who went down to the gates of death, Joyful, to fling the life-doors wide, Mother of statesman, soldier, saint— Set this crown on her patient pride!

She, your comrade, who steadfast stood Shoulder to shoulder, through storm and night, Held up your hands till victory pealed— Grant her this prize of well-fought fight.

Who trips laughing across your life, Light of your love, your soul made fair? Give her this pledge of a father's faith, Flower o' freedom to deck her hair!

Mothers and wives and daughters, we, Shall we ask in vain, with suppliant hand? We, who are children of the free! We, who are builders in the land!

A Prisoner in Bow

By Sylvia Pankhurst

(A leader of the Suffragette movement of England. The following, quoted from “The Woman’s Journal,” is an account of one of her imprisonments in the London jails.)

My eight days’ license had expired. The police were massed outside the Bromley Public Hall where I was speaking, waiting to arrest me. Numbers of detectives in plain clothes within were amongst the audience; the people hissed and howled at them and they threatened them with sticks. At the close of the meeting, the people, declaring that I should not be arrested, crowded down the stairs and out in a thick mass with men in the center of them all. The police rushed at us, striving to break our ranks and to force a way through to me.... Policemen were on every side of me. Two of them gripped and bruised my arms, dragging me along. The crowd followed, calling to me.... The policemen dug their fingers into my flesh. One of them took out his truncheon and grasped it tight against my hand and arm. The back of my left hand was bruised from it all next day. Several women rushed up to me and were arrested, and one girl who did not know any of us, or what the trouble was about, called out: “Oh, you should not hurt her,” and was taken into custody. They dragged me into a Cannon Row police station....

So, hatless, and without so much as a brush or comb, I was taken back to gaol to begin my hunger, thirst and sleep strike. When I reached my cell, the same cell in the hospital in which during February and March I had been forcibly fed for five weeks, I began to pace up and down.

A woman officer came to me and said I must not make a noise.... I took a blanket from the bed and spread it on the floor to deaden the sound of my footsteps, lest any of the other women prisoners should hear them and be kept awake.

Then I walked on and on, five short steps across the cell and five short steps back, on and on, and on.... As the hours dragged their slow way I stumbled often over the blanket that wrinkled up and caught in my feet. Often I stooped with dizzy brain to straighten it. The walking, the ceaseless walking, when I was so tired, made me grow sick and faint. I was stumbling, falling to my knees, clutching, as one drowning, at the bed or chair. Sometimes I think I slept an instant or two as I lay, for sleep seemed to be dogging as I walked.

It was cold, cold and colder, as the morning came, as the sombre yellow faded and the gray sky turned to violet—such a strange brilliant violet, almost startling it seemed through those heavy bars. Then the violet died into the bleak white chill of early day.

In the day time I still walked, but sometimes I had to rest in the hard, wooden chair, and then I would be startled to feel my head nod heavily to one side. My legs ached, the soles of my feet were swollen. They burned, and I thought of the women of the past who were made to walk on red hot plough shares for their faith. After the first few days I remembered that tramps rubbed soap on their feet to prevent their getting sore. I rubbed soap on mine and found that it eased them a good deal. Each time I took my stocking off to do this I noticed that my feet had grown more purple. My hands, too, were purple as they hung at my sides. My throat was parched and dry. My lips were cracked. On Wednesday I fainted twice, and afterwards there came and stayed till I was released, a strange pressure in the head, especially in the ears. There was a sharp pain across my chest. That evening I asked to see a doctor from the home office. On Thursday afternoon he came. On Friday there was no more likelihood of my sleeping. I lay on the bed most of the day burning hot, with cold shivers that seemed to pass over me as though a cold wind was blowing on my face. In the afternoon I was released and came back to the little red-roofed house under St. Stephen’s church and the kind hearts of Bow.

Out of the Dark

By Matilda Jocelyn Gage

(From “Woman, Church and State.”)

Although England was Christianized in the fourth century, it was not until the tenth that the Christian wife of a Christian husband acquired the right of eating at table with him.

All Methods Employed

By Mrs. Oliver H. P. Belmont

(In “Harper’s Bazar.” President of the Political Equality Association of New York, a leading spirit in the Congressional Union, an organization whose tactics have caused it to be called the militant wing of the suffrage movement.)

Woman suffrage is a war on ignorance, prejudice and vice. To attack certain gigantic forces, a people must take any and every line open to them. If the Germans had attacked Warsaw from but one side, that great city would still be under Russian rule. I believe, therefore, that women in fighting for their suffrage should use all lines approaching the enemy. I personally am working along all roads of attack, for I feel that where one method may fail, another may succeed.

Glory in Power

By Mrs. Burke Cockran

(In “Harper’s Bazar.”)

Suffragists are born, not made. There are many women whose brains will never respond to suffrage argument.... And yet I am convinced that these women, when they do receive the vote, will not only use their power judiciously and conscientiously, but will eventually glory in it.

Feminism a Tree

By Beatrice Forbes-Robertson Hale

(Well-known English actress. Author of “What Women Want,”[1] from which the following is taken.)

... Feminism is a tree, and woman suffrage merely one of its many branches. Some of these branches are essential to the life of the tree, others are not. Some grow strong and put forth shoots in their turn, others blossom prematurely, wither young, and drop from the trunk. Meanwhile the tree towers up into the sun with its crown of sturdy growths, and its abortive shoots lie forgotten in the shadow below, leaving hardly a scar upon the great stem to mark their death. Only few people see this tree as a unit. All who do know that woman suffrage is one of its essential growths. But the majority still concentrate their gaze upon one branch or another, whichever seems to them most fair, and the parent tree is lost to sight amid the multiplicity of its offspring’s leaves. Suffrage has rallied to its march thousands of conservative women who are indifferent, or even opposed, to some newer branches of the tree, while those who are absorbed in certain later and eccentric growths are sometimes amusingly contemptuous of the older limbs. They forget that the topmost crown could not flourish if the wide boughs below did not help the tree to breathe. They are sometimes, too, in danger of forgetting that if the great roots of the trees were not anchored deep in the soil of woman’s nature itself, in her motherhood, her strong tenderness, and her service, the whole growth would perish.

[1] Frederick A. Stokes Co.

Woman Has Justified Herself

By Lady Morgan

(English. From “Woman and Her Master,” published in Paris, in a “Collection of Ancient and Modern British Authors,” 1840.)

Notwithstanding her false position, woman has struggled through all disabilities and degradations, has justified the intentions of Nature in her behalf, and demonstrated her claim to share in the moral agency of the world. In all outbursts of mind, in every forward rush of the great march of improvement she has borne a part; permitting herself to be used as an instrument, without hope of reward, and faithfully fulfilling her mission, without expectation of acknowledgment. She has, in various ages, given her secret service to the task-master, without partaking in his triumph, or sharing in his success. Her subtlety has insinuated views which man has shrunk from exposing, and her adroitness found favor for doctrines which he had the genius to conceive, but not the art to divulge. Priestess, prophetess, the oracle of the tripod, the sibyl of the cave, the veiled idol of the temple, the shrouded teacher of the academy, the martyr or missionary of a spiritual truth, the armed champion of a political cause, she has been covertly used for every purpose, by which man, when he has failed to reason his species into truth, has endeavored to fanaticize it into good; whenever mind has triumphed by indirect means over the hearts of the masses.

In all moral impulsions, woman has aided and been adopted; but, her efficient utility accomplished, the temporary part assigned her for temporary purposes performed, she has ever been hurled back into her natural obscurity, and conventional insignificance....

Alluded to, rather as an incident, rather than a principle in the chronicles of nations, her influence, which cannot be denied, has been turned into a reproach; her genius, which could not be concealed, has been treated as a phenomenon, when not considered as a monstrosity!

But where exist the evidences of these merits unacknowledged, of these penalties unrepealed? They are to be found carelessly scattered through all that is known in the written history of mankind, from the first to the last of its indited pages. They may be detected in the habits of the untamed savage, in the traditions of the semi-civilized barbarian! And in those fragments of the antiquity of our antiquity, scattered through undated epochs,—monuments of some great moral debris, which, like the fossil remains of long-imbedded, and unknown species, serve to found a theory or to establish a fact.

Wherever woman has been, there has she left the track of her humanity, to mark her passage—incidentally impressing the seal of her sensibility and wrongs upon every phase of society, and in every region, “from Indus to the Pole.”

The Story of Katie Malloy

By Caroline A. Lowe

(Well-known as a speaker on the Socialist and labor platforms. From a speech before the Committee on the Judiciary, House of Representatives, Sixty-Second Congress.)

The need of the ballot for the wage-earning woman is a vital one. No plea can be made that we have the protection of the home or are represented by our fathers or brothers....

What of the working girls, who through unemployment are no longer permitted to sell the labor of their hands and are forced to sell their virtue?

I met Katie Malloy under peculiar circumstances. It was because of this that she told me of her terrible struggles during the great garment workers strike in Chicago. She had worked at H——’s for five years and had saved $30. It was soon gone. She hunted for work, applied at the Young Women’s Christian Association and was told that so many hundreds of girls were out of work that they could not possibly do anything for her. She walked the streets day after day without success. For three days she had almost nothing to eat. “Oh,” she said, with the tears streaming down her cheeks, “there is always some place where a man can crowd in and keep decent, but for us girls there is no place, no place but one, and it is thrown open to us day and night. Hundreds of girls—girls that worked by me in the shop—have gone into houses of impurity.”

Has Katie Malloy and the five thousand working girls who are forced into lives of shame each month no need of a voice in a Government that should protect them from this worse than death!

The New Woman

By Dora B. Montefiore

(In “The Progressive Woman.” English Contemporary. Writer and speaker on woman and labor problems.)

Pausing on the century’s threshold, With her face toward the dawn, Stands a tall and radiant presence; In her eyes the light of morn, On her brow the flush of knowledge Won in spite of curse and ban, In her heart the mystic watchword Of the Brotherhood of Man.

She is listening to the heartbeats Of the People in its pain; She is pondering social problems Which appeal to heart and brain. She is daring for the first time Both to think—and then to act; She is flouting social fictions, Changing social lie—for Fact.

Centuries she followed blindfold Where her lord and master led; Lived his faith, embraced his morals; Trod but where he bade her tread. Till one day the light broke round her, And she saw with horror’s gaze, All the filth and mire of passion Choking up the world’s highways.

Saw the infants doomed to suffering, Saw the maidens slaves to lust, Saw the starving mothers barter Souls and bodies for a crust. Saw the workers crushed by sweaters, Heard the cry go up, “How long?” Saw the weak and feeble sink ’neath Competition’s cursed wrong.

For a moment paused she shuddering; Hers in part the guilt, the blame— Untrue to herself and others, Careless to her sister's shame. Then, she rose—with inward vision Nerving all her powers for good; Feeling one with suffering sisters In a perfect womanhood.

Rising ever 'bove the struggle For this mortal fleeting life; Listening to the God within her Urging Love—forbidding Strife. Love and care for life of others Who with her must fall or rise. This the lesson through the ages Taught to her by Nature Wise.

She had pondered o'er the teaching, She had made its truths her own; Grasped them in their fullest meaning, As "New Woman" she is known. 'Tis her enemies have baptized her But she gladly claims the name; Hers it is to make a glory What was meant to be a shame.

Thinking high thoughts, living simply, Dignified by labor done; Changing the old years of thraldom For new freedom—hardly won. Clear-eyed, selfless, saved through knowledge, With her ideals fixed above, We may greet in the "New Woman" The old perfect Law of Love.

What Is This Government?

By Mrs. Belle Case La Follette

(American contemporary. Wife of the United States Senator, Robert La Follette. The following is from a speech on suffrage, given in Boston.)

What is this government that we women have been taught to think of as something so remote from our interests, so unrelated to the immediate personal preoccupations of our daily lives? There are three great matters in which we are all concerned: religion, education and government. In religion men and women share equally (indeed, men sometimes are content that women should do more than their share). In education it has come to pass that both men and women participate equally, though that was not always so. It is less than two generations that our universities and even our high schools have been open to women upon the same terms as to men.

But government is considered as man's exclusive province—a limitation that has narrowed the lives of the women, that has robbed the children, and that has reacted most injuriously upon the State. For with what matters does government concern itself? Why, with matters that touch intimately home happiness and home prosperity, with laws and regulations that guard and further human lives.

Woman Has Helped

By Luella Twining

Woman always has figured prominently in every movement and transformation that has changed the conditions of human life.

Our Common Interests

By Lena Morrow Lewis

(American contemporary. Writer. Speaker. Former member of the National Executive Committee of the Socialist Party. Editor "The Seattle Call.")

Every argument in behalf of man suffrage applies with equal force to woman suffrage. Men and women have more in common as members of the same species, belonging to the same human family, than they have differences, because of the incident of sex. To deny woman the ballot because of her sex is virtually to repudiate her right and claim as a human being. That a difference does exist between men and women is on the other hand a strong argument in behalf of woman suffrage. The giving of the ballot to woman will not rob man of his just rights. The admission of woman into the political arena will do away with male supremacy, which is injurious to man, breeds tyranny and results in injustice to woman. Justice to woman does not mean injustice to man. Our common interests as human beings, and our differences as men and women both demand political power and social rights for women the same as for men.

Women

By Zona Gale

(Contemporary American writer and suffragist. In “The American Magazine.”)

They looked from farm house window; Their joyless faces showed Between the curtain and the sill— You saw them from the road. They looked up while they churned and cooked And washed and swept and sewed. Some could die and some just lived, and many a one went mad, But it’s “Mother be up at four o’clock,” the menfolk bade.

They looked from town-house windows, A shadow on the shade Rose-touched by colorful depths of room Where harmonies were made. Within, the women went and came, And delicately played. Some could grow, and some could work, but many of them were dead. “We must be gowned and gay tonight when the men come home,” they said.

They looked from factory windows Where many an iron gin Drew in their days and ground their days On the black wheels within, Drew in their days and wove their days To a web exceeding thin. And they suffered what women have suffered over and over again. And it’s “Double your speed for a living wage, ye mothers and wives of men!”

They looked from brothel windows, And caught the curtain down. A piteous, beckoning hand thrust out, To summon or clod, or clown. They named them true, they named them true, The Women of the Town. Some could live and some just died, and most of them none could know, And it’s “What if the fallen women vote?” from the men who keep them so.

Allegory on Wimmin’s Rights

By Josiah Allen’s Wife (Marietta Holly)

(American contemporary. A philosopher who uses the humorous story to carry her message to the reading public.)

“Wimmin haint no business with the laws of the country,” said Josiah.

“If they haint no business with the law, the law haint no business with them,” said I warmly. “Of the three classes that haint no business with the law—lunatics, idiots and wimmin—the lunatics and idiots have the best time of it,” says I with a great rush of ideas into my brain that almost lifted up the border of my head-dress. “Let a idiot kill a man; ‘What of it?’ says the law. Let a luny steal a sheep; again the law murmurs in a calm and gentle tone, ‘What of it? They haint no business with the law, and the law haint no business with them!’

“But let one of a third class, let a woman steal a sheep, does the law soothe her in those comfortin’ tones? No; it thunders to her in awful accents: ‘You haint no business with the law, but the law has a good deal of business with you, vile female; start for state’s prison! You haint nothin’ at all to do with the law, only to pay all the taxes it tells you to, embrace a license bill that is ruinin’ to your husband, give up your innocent little children to a wicked father if it tells you to, and a few other little things, such as bein’ dragged off to prison by it, chained up for life, and hung, and et cetery.”

“‘Methought I once heard the words,’ sithes the female, ‘True government consists in the consent of the governed. Did I dream them, or did the voice of a luny pour them into my ear?’

“‘Haint I told you,’ frowns the law on her, ‘that that don’t mean wimmin? Have I got to explain again to your weakened female comprehension, the great fundymental truth that wimmin haint included and mingled in the law books and statutes of the country, only in a condemnin’ and punishin’ sense as it were?’

“‘Alas!’ sithes the woman to herself, ‘would that I had the sweet rights of my wild and foolish companions, the idiots and lunys!’

“‘But,’ says she, ‘are the laws always just, that I should obey them thus implicitely?’

“‘Idiots, lunatics! and wimmin! Are they goin’ to speak?’ thunders the law. ‘Can I believe my noble right ear? Can I, bein’ blindfolded, trust my seventeen senses? I’ll have you understand that it haint no woman’s business whether the laws are just or unjust; all you have to do is just to obey ’em. So start off for prison, my young woman.’

“‘But my housework,’ pleads the woman. ‘Woman’s place is the home. It is her duty to remain, at all hazards, within its holy and protectin’ precincts. How can I leave its sacred retirement to moulder in state’s prison?’

“‘Housework!’ and the law fairly yells the words, he is so filled with contempt at the idea. ‘Housework! Jest as if housework is goin’ to stand in the way of the noble administration of the law! I admit the recklessness and immorality of her leavin’ that holy haven long enough to vote; but I guess she can leave her housework long enough to be condemned, and hung, and so forth.’

“‘But I have got a infant,’ says the woman, ‘of tender days. How can I go?’

“‘That is nothin’ to the case,’ says the law in stern tones. ‘The peculiar conditions of motherhood only unfits a female woman from ridin’ to town in a covered carriage once a year, and layin’ her vote on a pole. I’ll have you understand it’s no hinderence to her at all in a cold and naked cell, or in a public court room crowded with men.’

“As the young woman totters along to prison is it any wonder that she sithes to herself—

“‘Would that I were an idiot! Alas is it not possible that I may become even now, a luny? Then I should be respected!’”

For Woman Suffrage

By Jane Addams

(From speech favoring a suffrage amendment to the Constitution, before the Committee on the Judiciary, House of Representatives, Sixty-Second Congress. Prior to the enfranchisement of the Illinois women.)

As I have been engaged for a number of years in various philanthropic undertakings, perhaps you will permit me, for only a few moments, to speak from experience. A good many women with whom I have been associated have initiated and carried forward philanthropic enterprises, which were later taken over by the city, and thereupon the women have been shut out from the opportunity to do the self-same work which they have done up to that time. In Chicago the women for many years supported school nurses who took care of the children, both made them comfortable and kept them from truancy. When the nurses were taken over by the health department of the city the same women who had given them their support and management were shut out from doing anything more in that direction. And I think Chicago will bear me out when I say that the nurses are not now doing as good work as they did before.

I could also use the illustration of the probation officers in Chicago who are attached to the juvenile court. For a number of years women selected and supported these probation officers. Later, when the same officers, paid the same salary, were taken over by the county and paid from the county funds, the women who had had to do with the initiation and beginning of the probation system, and with the primary and early management of the officers, had no more to do with them. At the present moment the juvenile court in Chicago has fallen behind its former position in the juvenile courts of the world. I think the fair-minded men of Chicago will admit that it was a disaster for the juvenile court when the women were disqualified, by their lack of the franchise, to care for it.

The juvenile court has to do largely with delinquent and dependent children, and I think there is no doubt that on the whole women can deal with such cases better than men, because their natural interests lie in that direction....

The establishment of a sanitarium for the care of tubercular patients in Chicago was begun by some philanthropic women, and later on, when these also were put under the care of the city, these women were shut out, save as they were permitted to do some work through the courtesy of the officials. Sometimes the officials are very courteous to them and glad to have their assistance; sometimes they quite resent the suggestions from them, claiming it is “up to” them to take care of the city affairs, and that women are only interfering when they try to help.

So, it seems fair to say, if women are to keep on with the work which they have done since the beginning of the world—to continue with their humanitarian efforts which are so rapidly being taken over by the Government, and often not properly administered, that the women themselves will have to have the franchise.

The franchise is only a little bit of mechanism which enables the voter to say how much money shall be appropriated from the taxes, of which women pay so large a part. When a woman votes, she votes in an Australian ballot box, very carefully guarded from roughness, and it seems to us only fair to the State activities which are so largely humanitarian that women should have this opportunity.

A Spade’s A Spade

By Ethel R. Peyser

(In “Judge.”)

She’s treated by him like a queen, She’s helped across the streets, She’s given every courtesy That every woman greets; And yet he thinks the vote for her Would signal grave defeats.

She trained and reared his able sons, She helped him make his cash, She advised him in his business, She made him act less rash; And yet he thinks the vote for her Would be “just so much trash.”

She answers all his business notes In a manner quite “parfait,” She does all his stenography And seems to have great sway; And yet he thinks the vote for her Would bring “naught but dismay.”

She knows the whys of stocks and bonds, She knows statistics dull, She keeps him up on markets And knows the price to cull; And yet he thinks the vote for her “Would be an awful mull.”

She’s placed on rate commissions, She takes part in great debates, She is asked for her opinion, She knows causes, bills, and dates; And yet he thinks the vote for her Would cause the fall of States.

She’s the brains of large conventions, She knows well the social trend, She has written books of civics, She has made great forces blend; And yet the vote for such as she He cannot comprehend!

Woman on the Scaffold

By Alice Meynell

(English contemporary. Poet and essayist. From “The Bookman.”)

See the curious history of the political rights of woman under the Revolution. On the scaffold she enjoyed an ungrudged share in the fortunes of a party. Political life might be denied her, but that seems a trifle when you consider how generously she was permitted political death. She was to spin and cook for her citizen in the obscurity of her living hours; but to the hour of her death was granted no part in the largest interests, social, national, international. The blood with which she should, according to Robespierre, have blushed to be seen or heard in the tribune was exposed in the public sight unsheltered by her veins.... Women might be, and were, duly silenced when, by the mouth of Olympe de Gougas, they claimed a “right to concur in the choice of representatives for the formation of the laws,” but in her person, too, they were liberally allowed to bear responsibility to the Republic. Olympe de Gougas was guillotined. Robespierre then made her public and complete amends.

A Lady Rebel

By Abigail Adams

(Wife of one president of the United States, and mother of another. A brilliant correspondent, her letters showing her to be a woman unusual in breadth of interest, and general culture. The following extract is from a letter written to her husband in 1774, during the session of the First Continental Congress.)

I long to hear that you have declared an independency. And in the new code of laws which I suppose it will be necessary for you to make, I desire you would remember the ladies, and be more generous and favorable to them than your ancestors.... If particular care and attention is not paid to the ladies, we are determined to foment a rebellion, and will not hold ourselves bound by any laws in which we have no voice or representation.

“The Gibraltar of Our Cause”

By Susan B. Anthony

(From a speech delivered at the Suffrage Convention held at Syracuse, N.Y. September 8, 1852. Quoted from “Life and Work of Susan B. Anthony.”[2])

The claims we make at these conventions are self-evident truths. The second resolution affirms the right of human beings to their persons and earnings. Is that not self evident? Yet the common law, which regulates the relations of husband and wife, and is modified only in a few instances, gives the “custody” of the wife’s person to the husband, so that he has a right to her, even against herself. It gives him her earnings, no matter with what weariness they have been acquired, or how greatly she may need them for

herself or her children. It gives him a right to her personal property, which he may will entirely away from her, also the use of her real estate, and in some of the states married women, insane persons and idiots are ranked together as not fit to make a will, so that she is left with only one right, which she enjoys in common with the pauper, the right of maintenance. Indeed, when she has taken the sacred marriage vows, her legal existence ceases. And what is our position politically? The foreigner, the negro, the drunkard, all are entrusted with the ballot, all are placed by men higher than their own mothers, wives, sisters and daughters!

The woman, who, seeing this, dares not maintain her rights is the one to hang her head and blush. We ask only for justice and equal rights—the right to vote, the right to our own earnings, equality before the law: these are “the Gibraltar of our Cause.”

[2] The Bowen Merrill Co.

A Great Life

By Ida Husted Harper

(Biographer of Susan B. Anthony. From Introduction to the “Life and Works of Susan B. Anthony.”)

Those who follow the story of this life will confirm the assertion that every girl who enjoys a college education; every woman who has the chance of earning an honest living in whatever sphere she chooses; every wife who is protected by law in the possession of her person and property; every mother who is blessed with the custody and control of her own children—owes these sacred privileges to Susan B. Anthony beyond all others.

Suffrage a Means to an End

By Ella S. Stewart

(Contemporary. Ex-President the Illinois Equal Suffrage Association—Former Secretary “National American Suffrage Association.”)

Suffrage is not an end in itself, but a means to an end....

The opposition of the liquor forces is not gauged by the number of women actively engaged in temperance work. That number is still comparatively small. It takes no comfort from the fact that suffrage associations are non-partisan on all questions except suffrage. It would fear and fight off the enfranchisement of women if every temperance organization were to disband today. Therein it unconsciously pays its high tribute to woman and confesses its own lack of moral defense.... The forces of evil fear for woman’s vote.

Man Cannot Represent Woman

By Rev. Antoinette Brown

(The first woman ordained to preach in the United States. The following extract is from a speech delivered at the Suffrage Convention at Syracuse, N. Y., Sept. 8, 1852.)

Man cannot represent woman. They differ in their nature and relations. The law is wholly masculine; it is created and executed by man. The framers of all legal compacts are restricted to the masculine standpoint of observation, to the thoughts, feelings and biases of man. The law then can give us no representation as women, and therefore no impartial justice, even if the law makers were intent upon this, for we can be represented only by our peers.... When woman is tried for crime, her jury, her judges, her advocates, are all men; and yet there may have been temptations and various palliating circumstances connected with her peculiar nature as woman, such as man cannot appreciate. Common justice demands that a part of the law-makers and law-executors should be of her own sex. In questions of marriage and divorce, affecting interests dearer than life, both parties in the contract are entitled to an equal voice.

Universality

By Belle Lindner Israels

(From the Introduction to “The Upholstered Cage.”)

There can be no problem of women anywhere without aspects of universality.

Mankind Our Neighbor

By Mrs. R. R. Cotton

(In “Social Service Review.”)

The day is past when we deluded ourselves with the thought that our responsibilities ceased with the performance of our individual duties. We are jointly responsible for the existing conditions, and only by a joint effort can they be improved. Our neighbor’s welfare is our business, and our neighbor is mankind.

Clearing Up the Muss

By Gertrude Breslau Fuller

(American contemporary. Prominent as a Lyceum speaker on social questions.)

You say politics are too corrupt for women to mix up in? Well, they are pretty bad, there is no doubt about that. You have laid almost everything under heaven onto the women, but this one thing that has been under your own exclusive, masculine domain.

Don’t you know that the principal business of women, all down the ages, has been to go along after the men and clear up the everlasting muss they made? Well, we are still at the same task. Our politics are no more corrupt than our housekeeping would be if we let you run it alone.

Wisdom Comes with Freedom

By Mary Wollstonecraft

(See page 121)

In France or Italy have the women confined themselves to domestic life? Though they have not hitherto had a political existence, yet have they not illicitly had great sway, corrupting themselves and the men with whose passions they played? In short, in whatever light I view the subject, reason and experience convince me that the only method of leading women to fulfill their peculiar duties is to free them from all restraint by allowing them to participate in the inherent rights of mankind.

Make them free, and they will quickly become wise and virtuous, as men become more so, for the improvement must be mutual, or the injustice which one-half of the race are obliged to submit to retorting on their oppressors, the virtue of men will become worm-eaten by the insect whom he keeps under his feet.

Women to Men

By Miriam Allen De Ford

(In “The Woman Voter.”)

We are they that wept at Babylon, And still are they that weep; We have watched the cradles of the world, And hushed its sick to sleep; We have served your folly and desire, And drunk your cruel will; You have smiled on us with far content:— Are you smiling still?

We were slaves most fit for Solomon, That now can call you kin; It was strength of soul and many years That changed us so within; The strength of those you killed with scorn, The years you could not kill; Steep were the stairs to climb and hard:— Are you smiling still?

We have shared your salt of loyalty, And eaten of its bread; We have died with you for Freedom’s sake, And gained it, being dead: You have drawn from out our breasts your life, The life you use so ill: We are they that bore you in the night:— Are you smiling still?

The Call to Social Service

By Elizabeth (Mrs. George) Bass

(American contemporary. Former president of the Woman's City Club, Chicago. Chairman Chicago-Biennial Board, General Federation of Women's Clubs. From editorial in "Life and Labor.")

The call to social service and action has brought the modern club woman along an ever broadening path to the high, wind-swept levels, where she sights limitless opportunity for expression and action; and two things she has come to see clearly, first, that she needs the ballot to do this, her natural work, more effectively; and second, that the Commonwealth needs her.

Submission

By Miriam Teichner

(In "The Woman's Journal.")

Submission? They have preached at that so long, As though the head bowed down would right the wrong; As though the folded hands, the coward heart, Were saintly signs of souls sublimely strong; As though the man who acts the waiting part And but submits, had little wings a-start. But may I never reach that anguished plight, Where I at last grow weary of the fight!

Submission? "Wrong of course, must ever be Because it ever was. 'Tis not for me To seek a change; to strike the maiden blow. 'Tis best to bow the head and not to see; 'Tis best to dream, that we need never know The truth—to turn our eyes away from woe." Perhaps. But, ah! I pray for keener sight. And—may I not grow weary of the fight!

The Price of Liberty

By Mary Gray Peck

(In "Life and Labor." Chairman Committee on Drama, General Federation of Women's Clubs.)

"I know not what course others may take, but as for me, give me liberty or give me death."

Patrick Henry, when he said that, was not asking that liberty come as a free gift. No race or class ever has attained it so cheaply. Fifty years after the battle of Gettysburg, the negro is still fighting for the liberty which the bloodiest war in history could not confer on him. He must get it for himself.

Women have been fighting longer than that for freedom.

It is the glory of the women's labor movement that working women struck the first blow for women's liberty in this country.

For a hundred years, working women have made straight the way for all women to follow. It was the women in the mills and the shops and factories who made it possible sixty years ago for women to enter the schools and the professions.

Today, in the ultimate analysis, it is the women in the mills of commerce who gave women the ballot in the suffrage states. It is they who are paying the price. _Their strikes are all hunger strikes; not a hunger for bread alone, but a hunger for life and the liberty of soul._

Not till these strikes end in victory, not till the last burning-factory martyr has rendered up her life as a sacrifice necessary to the destruction of the system which thrives on factory fires, can we count the price which working women have paid to make all women free.

"No people can long endure half slave and half free."

If the working women had consented to be slaves, there would have been no woman movement. More than that—without the woman's trade unions there could be no organized labor movement. Theirs is the strategic point in the conflict in which the whole world is lining up. Around them will rage the fiercest fight; but the stars in their courses fight for them.

Woman's Right

By Olive Schreiner

(South African novelist. Contemporary. Author of "An African Farm," "Three Dreams in a Desert," "Woman and Labor," etc. The following is from "Woman and Labor."[3])

Thrown into strict logical form, our demand is this: We do not ask that the wheels of time should reverse themselves, or the stream of life flow backward. We do not ask that our ancient spinning wheels be again resuscitated and placed in our hands; we do not demand that our old grindstones and hoes be returned to us, or that man should again betake himself entirely to his province of war and the chase, leaving to us all domestic and civil labor. We do not even demand that society shall immediately so reconstruct itself that every woman may again be a child bearer (deep and overmastering as lies the hunger for motherhood in every virile woman's heart!); neither do we demand that the children we bear shall again be put exclusively into our hands to train. This, we know, cannot be. The past material conditions of life have gone forever; no will of man can recall them. But _this_ is our demand: We demand that, in that strange new world that is arising alike upon the man and the woman, where nothing is as it was, and all things are assuming new shapes and relations, that in this new world we also shall have our share of honored and socially useful human toil, our full half of the labor of the Children of Woman. We demand nothing more than this, and will take nothing less. _This is our WOMAN'S RIGHT!_

[3] Frederick A. Stokes Co.

From "The Convert"

By Elizabeth Robins

(English contemporary. Actress, playwright, novelist. Author of "Way Stations," "The Convert," etc. The following is from a suffrage speech by one of her characters, Miss Claxton, in "The Convert.")

What, women don't want it? Are you worrying about a handful who think because they have been trained to like subservience everybody else ought to like subservience, too?... The women who are made to work over hours—they want the vote. To compel them to work over hours is illegal. But who troubles to see that laws are fairly interpreted for the unrepresented.... I know a factory where a notice went up yesterday to say that the women employed there will be required to work 12 hours a day for the next few weeks.... Much of woman's employment is absolutely unrestricted except that they may not be worked on Sunday. And while all this is going on, comfortable gentility sit in arm chairs and write alarmist articles on the falling birth-rate and the horrible amount of infant mortality. Here and there we find a man who realizes that the main concern of the State should be its children, and that you can't get worthy citizens when the mothers are sickly and enslaved. The question of statecraft rightly considered always reaches back to the mother. That State is most prosperous that most considers her. No State that forgets her can survive. The future is rooted in the real being of women. If you rob the women, your children and your child's children pay. Men haven't realized it—your boasted logic has never yet reached so far. Of all the community the women who give the next generation birth, and who form its character, during the most impressionable years of its life—of all the community, these mothers now, or mothers to be, ought to be set free from the monstrous burden that lies upon the shoulders of millions of women.

Rights, Privileges and Capacities

By Catherine Waugh McCulloch

(American contemporary. Former President Illinois Woman Suffrage Association, and practicing attorney. The following is from a pamphlet, "Illinois Laws Concerning Women," issued by the I. W. S. A.)

We read that no person shall be denied any political rights, privileges, or powers on account of religion. The word sex should have been added. People may change their religion, but never their sex. Rights, privileges and capacities ought never to depend on color of eyes or hair, cast of features, sex or any other accident for which a person is not to be blamed and which a person can never overcome. Any other qualification demanded of a voter may be acquired by one's own exertion, or the lapse of time. Property may be earned, minority out-grown, education secured, sanity regained, alienage removed, imprisonment outlived. But no industry, no age, no brilliancy, no morality, can change sex. Sex should be made less a disgrace instead of more of a disgrace than poverty, minority, alienage, insanity and criminality.

The Working Woman's Awakening

By Theresa Malkiel

(In "The Progressive Woman." American contemporary. Socialist. Speaker and writer on woman, child and labor problems.)

Unconsciously, with closed eyes, driven, perhaps, by the herd instinct that makes her follow the others, the working woman is rising at last from her long slumber....

The solution of the problem of existence is pressing upon her more and more. Even the mantle of marriage does no longer save her from it. The patient sufferer cannot and will not see her children destitute and hungry. She wants some of the celestial promises to be realized here on earth. Hence this general unrest of womanhood the world over.

Woman's Weak Dependency

By Gertrude Atherton

(American contemporary. Said by the London critics to be the most brilliant of American women novelists. The following is from "Julia France and Her Times.")

No wonder so few women had left an impression on history. How could any brain, even if endowed with true genius, reach the highest order of development while the character remained placid in its willing dependence upon the reigning sex? And man had despised woman through the ages, even when most enslaved by her, knowing that on him depended her very existence. He had the physical strength to wring her neck, and the legal backing to treat her as partner or servant, whichever he found convenient.

A Pageant of Great Women

By Cicily Hamilton

A dramatic poem of power and beauty. Woman contends with prejudice in an argument before the throne of Justice, calling a pageant of the world's great women to justify her claims. She wins her freedom and speaks to man as follows:

I have no quarrel with you, but I stand For the clear right to hold my life my own: The clear, clean right. To mould it as I will,— Not as you will, with or apart from you To make of it a thing of brain and blood, Of tangible substance and of turbulent thought— No thin, gray shadow of the life of man! Your love, perchance, may set a crown on it; But I may crown myself in other ways— (As you have done, who are in one flesh with me). I have no quarrel with you; but, henceforth This you must know: The world is mine as yours— The pulsing strength and passion and hurt of it: The work I set my hand to, woman's work, Because I set my hand to it.

The Prayer of the Modern Woman

By Josephine Conger

(Published in various Suffrage Journals.)

(See page 177)

Unbind our hands. We do not ask for favor in this fight Of human souls for human needs. We ask for naught but right, That we may throw the burden from our backs, and from our brains The thrall of servitude. We are so weary of the pains That crush our hearts and cramp our wills, reducing all desires To childish whims, while great hopes lie like smould'ring fires Within our brains, or burst distorted from some weak, unguarded point, Leaving ruin and anguish in their track. With woman bound, the whole world's out of joint, For women are the mothers of the race. We cannot boast Of natural rights, of liberty, while mothers of the host Must know they're classed in common law with idiots and slaves, Must stand aside with criminals, with imbeciles and knaves. The sturdy sons nursed at their breast cannot be wholly free, For what the mother is, the child will in a measure be. You are not granting Favor when you give us equal power; The shame is, you've withheld from us so long our dower Of earth's inheritance. We do not beg for alms, for charity. We do not want our rights doled out; we want full liberty To grow, to be, to do our part, as Nature meant we should. We want a perfect sister-, as well as brother-hood.

By Mrs. James Lees Laidlaw

(Chairman of the New York City Suffrage Party. In "Harper's Bazar.")

The getting of votes has been to us like the saving of souls.

By Julia Wedgewood

(English writer. From an essay, “Female Suffrage, Considered Chiefly with Regard to Its Indirect Results.”)

Of course, if women are either exactly like men, or simply men minus something or other, they could add no light to that already possessed by a male constituency, but I know of no one who seriously believes either of these things.

BOOK II

The Home

THE HOME

“The Woman’s Place”

By The Hon. Mrs. Arthur Lyttleton

(English contemporary. The following is taken from “Women and Their Work.”)

“The woman’s place is the home.”

Such is a very common reply to those who propound any new schemes for educating or helping women. No one would deny the statement. It is true that those who make it sometimes forget that now-a-days a considerable number of women have no homes, and that therefore the remark by no means meets the whole case.

The Spirit of the Home

By Lucy Re Bartlett

(English contemporary. Author of “Toward Liberty,” from which the following is taken.)

By all means let most women choose the home for their sphere, if they will, and even severely avoid politics for the moment, if they be so minded. But whether in the home, or outside it, let all women consider well what be the spirit they are bringing into life—whether it be one which liberates and uplifts, or one which makes, instead, for bondage.

Lovers of Home

By Dr. Anna Howard Shaw

(In “The Metropolitan Magazine.”)

Every suffragist I have ever met has been a lover of home; and only the conviction that she is fighting for her home, her children, for other women, for all of these, has sustained her in her public work.

Woman’s High Achievement

By Selma Lagerlof

(Swedish contemporary. Prominent in literary and progressive circles. From an address delivered before the Sixth Congress of the International Suffrage Alliance in Stockholm, entitled “Woman the Savior of the State.”)

Have women done nothing which entitles us to equal rights with man? Our time on earth has been long—as long as his. Have we created nothing of incontestable worth to life and civilization? Besides this, that we have brought human beings into the world, have we contributed nothing of use to mankind?... I look at paintings and engravings, pictures of old women, of olden times. Their faces are haggard and stern; their hands rough and bony. They had their struggles and their interests. What have they done?

I place myself before Rembrandt’s old peasant woman, she of the thousand wrinkles in her intelligent face, and I ask myself why she lived? Certainly not to be worshipped by many men, not to rule a state, not to win a scholar’s degree! And yet the work to which she devoted herself could not have been of a trivial nature. She did not go through life stupid and shallow! The glances of men and women rest rather upon her aged countenance than upon that of the fairest young beauty. Her life must have had a meaning.

We all know what the old woman will reply to my question. We read the answer in her calm and kindly smile: “All that I did was to make a good home.”

And look you! That is what the women would answer if they could rise from their graves generation after generation, thousands upon thousands, millions upon millions: “All that we strove for was to make a good home.”

We know that if we were to ask the men, could we line them up, generation after generation, thousands and millions in succession, it would not occur to one of them to say that he had lived for the purpose of making a good home....

We know that it is needless to seek further. We should find nothing. Our gift to humanity is the home—that, and nothing else....

For the home we have been great; for the home we have been petty. Not many of us have stood with Christina Gyllenstierna on the walls of Stockholm and defended a city; still fewer of us have gone forth with Jeanne D’Arc to battle for the Fatherland. But if the enemy approached our own gate, we stood there with broom and dish rag, with the sharp tongue and clawing hand, ready to fight to the last in defense of our creation, the home. And this little structure which has cost us so much effort, is it a success or a failure? Is this woman’s contribution to civilization inconsiderable or valuable? Is it appreciated or despised?

Woman’s Sphere the Home

By Helen Keller

(From “Out of the Dark.”[4])

(See page 209)

Woman’s sphere _is_ the home, and the home, too, is the sphere of man. The home embraces everything we strive for in this world. To get and maintain a decent home is the object of all our best endeavors. But what is the home? What are its boundaries? What does it contain? What must we do to secure and protect it?

In olden times the home was a private factory.... Home and industrial life were one.... Once the housewife made her own butter and baked her own bread; she even sowed, reaped, threshed, and ground the wheat. Now her churn has been removed to great cheese and butter factories. The village mill, where she used to take her corn, is today in Minneapolis; her sickle is in Dakota. Every morning the express company delivers her loaves to the local grocer from a bakery that employs a thousand hands. The men who inspect her winter preserves are chemists in Washington. Her ice box is in Chicago. The men in control of her pantry are bankers in New York. The leavening of bread is somehow dependent upon the culinary science of congressmen, and the washing of milk cans is a complicated art which legislative bodies, composed of lawyers, are trying to teach the voting population on the farms.

It would take a modern woman a lifetime to walk across her kitchen floor; and to keep it clean is an Augean labor. No wonder that she sometimes shrinks from the task and joins the company of timid, lazy women who do not want to vote. But she _must_ manage her home; for, no matter how grievously incompetent she may be, there is no one else authorized or able to manage it for her. She _must_ secure for her children clean food at honest prices. Through all the changes of industry and government she remains the baker of bread, the minister of the universal sacrament of life.

Woman and the Primitive Home

By Mrs. St. Clair Stobart

(See page 144)

(From “War and Woman.”)

In the days when such proverbs as “The woman, the cat and the chimney should never leave the house”, “_Bonne femme est oiseau de cage_”, “A wife and a broken leg are best left at home”, were current in every household, there was some reason why women should remain at home. For _within the home_ were conducted—by women—all the industries of life. In those days women not only made jams and pickles, cured the hams and bacon, concocted wines and medicines, they also designed and embroidered all the curtains, tapestries and carpets; the making of beautiful laces, the spinning, the weaving, the sewing and the knitting of all the garments was committed to the charge of women. In those days when the control of all that made life worth living was with

woman, she did not need, nor did she seek, outside occupations, which indeed consisted chiefly of the less intellectual pursuits of hunting and fishing. There was plenty of scope _within_ doors for the intellectual, industrial, and artistic faculties of every active-minded woman. If it is true that woman was more honored at that time when she remained indoors than she is now, this was _not because_ she remained at home, but because all the arts and crafts of life were in her hands—_within the home_. But now all this is changed, through no fault of the woman herself, and, except for the young wife and mother who has plenty of occupation in the rearing of her family, there is not enough work _within the home_ for additional active-minded and able-bodied women, the numerous daughters, sisters, cousins, aunts, who need occupation, but who have no family of their own because there are not enough men to go round.

The Poor and Good Housing

By Elizabeth Cook

(From Speech on “Housing and Morals in Richmond.” Quoted from “Woman’s Work in Municipalities.”)

Can children raised in Jail Bottom, whose only outlook is a mountain-like dump of rotting and rusty tin cans on the one side, and on the other a stream which is an open sewer, smelling to heaven from the filth which it carries along, or leaves here and there in slime upon its banks, have any but debasing ideas? Can parents inculcate high moral standards when across the street or down the block are houses of the “red light” district? Is the world so small that there is no room left for the amenities of life? Are ground space and floor space of more value than cleanliness and health and morality?... It is certainly a fallacy that the poor do not want good housing.

Where She Lived

By Mrs. John Van Vorst

(American contemporary writer on Child Labor Problems. The following is taken from her book, “The Cry of the Children.”)

The cotton-mill “folks” wear unwittingly a badge which distinguishes them far and wide. As I came along down over the hillside I met a child holding in her arms another smaller child; both were covered, their hair, their clothes, their very eyelids, with fine flakes of lint, wisps of cotton, fibres of the great web in which the factories imprison their victims.

“Hello,” I said, “do you work in the mill?”

“Yes, meaum.” The voice was gentle and the manner friendly. And giving a sidewise hitch to the baby, who had a tendency to slip from her tiny mother’s arms, this little worker showed me one of her fingers done up in a loose, dirty bandage.

“I cut my finger right smart,” she drawled, “so I’m takin’ a day off.”

“How old are you?”

“Tweaulve.”

“Got any brothers or sisters?”

“I’ve got him.... And I’ve got one brother in the mill.”

“How old is he?”

“Tweaulve.”

“Twins?” I asked.

She smiled and shook her head. “He’s tweaulve in the mill, and he’s teayun outside.”

This little bit of humanity, taking a day off as mother of a still tinier being, seemed a promising sponsor, and I suggested that we walk along together. She could not go to the mill with me, she explained, without first consulting her mother, so we proceeded to the settlement in which she lodged, along with eighty or a hundred families, who man the mill in which she was a hand.

“That’s where we live.”

Her fleet little bare feet picked a way deftly over the stony path, and she kept a hand free—when it was not laid on the baby's back—to point out the turns in the road that led to "where she lived." Her home was one of a group of frame one-story houses, perched on a slant of ground. Each house was encircled by a wooden veranda, and the order of the housekeeping described itself before the eyes, as a whisk of the broom which carried all the dirt from the kitchen onto the porch, and another whisk which landed it on the slant of ground, bedecked, in consequence, with old tin cans, decayed vegetables, pieces of dirty paper, rags and chicken feathers.

It was to the more intimate quarters, however, that I penetrated with my guide. The inside court, or square upon which these "homes" opened their back doors, was a large mud puddle overhung with the collective wash of the neighborhood. In and out of the mud puddle wallowed the younger members of the mill families, receiving from time to time admonition and reprimand from a gently irate parent, who swished her long cotton wrapper over the court, drawling to her offspring: "I sure will whip you if you-all don't quit."

"That-a-ways where we live," said my little companion, stepping onto the porch and depositing her load, as she opened the door to announce a visitor to her mother. The woman turned listlessly from her sewing machine over which she was bent.

"Won't you come in?" she called to me, dragging out a chair by the fire, without getting up. "Lookin' for work?" she asked.

I took a seat, glancing at the interior which my little friend called "home." The outer room was a kitchen—though it might, except for the stove, have been mistaken for a hen coop. The chickens pecked their way about the dirty floor, venturing as far, even, as the table upon which stood the meagre remains of a noonday meal. The second and the inner room had each a bed;—an unmade bed, I was going to say, but how, indeed, could a bed be made without either sheets or pillows? Two grimy counterpanes were flung in disorder across the mattresses; a few chairs, a bureau and the sewing machine completed the house furnishings.

As the listless woman talked with me in a kindly manner about work, the baby, who had crawled in from the porch, and arrived as far as his mother's skirts, now tugged at these, to be taken up. His tiny hands had served as propellers across the filthy floor. The piece of lemon candy had added to the general stickiness of the dirt, with which both hands and face were smeared. As a soldier shoulders a gun—the burden to which he is most accustomed—this mother swung her baby into her arms, and, while she talked on, giving items about the cost of living, and factory wages, she loosened her cotton jacket—evidently the only garment she had on—and folding the baby to her breast, she lulled its whimperings.

"Yes," she said, "we pay $1.50 a week for three rooms. That's a little over six a month. I call it high. We don't get no runnin' water. Every drop we use's got to be drawed in the yard; an' we don't get no light, either, nuthin' but lamps."

The baby, comfortable and contented, let his hand stray over the mother's throat, with little spasmodic caresses which left in their trail smears of dirt, flecked with tiny scarlet streaks where the sharp nails had caught in the pale, withered flesh.

"I reckon you-all might be cold," she said, directing the older child to put more wood on the open grate fire, thinking apparently nothing of herself. "We don't like it here first-rate. Maybe we'll move on. I sure do crave traveling. Well, honey," this was addressed to the baby, who had sat up with a jerk and began to whine. The candy picked up from the floor where it had fallen and restored to its owner's mouth, did not seem the desired thing. The mother looked at me with a knowing smile.

"I reckon I can guess what ails him. He wants his babies." And at this, always without getting out of her chair before the machine, she reached behind her and drew from a shelf over her head two white rats. These were apparently what the baby wanted. In the game that ensued between him and his pets, his chief delight seemed to be in seeing the rats disappear through the open throated gown of his mother, and making the tour of her bodice, wriggling, burrowing, crawling, to emerge finally from her collar at the nape of her neck. Sometimes they diversified their gyrations, proceeding upward into her hair and down again by way of her ears onto easier climbing ground. Impassable, unmoved, she talked on in her gentle voice, giving no sign whatever that she noticed the animals. It was only when the baby plunged his short nails into the white rat's side that she ejaculated mercifully:

"Quit that! You-all 'll hurt them babies."

I was somewhat dazed as I proceeded presently with my little girl guide from this interior to the mill. The squalor and disorder of what I had seen, the ignorance and the insensibility, contrasted strangely with the courtesy that had been shown me, the friendly concern about any intention I might have to get work, the desire to help me on my way, the strange lethargic tenderness which took the form of pity for even rats.

"Like animals," my friend had told me. That we must wait to see.

The War and the Home

By Jane Addams

(See page 28)

This war is destroying the home unit in the most highly civilized countries in the world to an extent which is not less than appalling.... At the present moment women in Europe are being told: bring children into the world for the benefit of the nation; for the strengthening of future battle lines; forgetting everything that you are taught to hold dear; forgetting your struggles to establish the responsibilities of fatherhood; forgetting all but the appetite of war for human flesh. It must be satisfied and you must be the ones to feed it, cost what it may; this is war's message to the world of women.

The Home

By Mrs. Laura P. Young

It is the home, and specifically the mother, who, with taste and tact, experience and wisdom, and above all, with love and faith, must guide and steady and inspire these lives. If we want our boys and girls to be free from discontent, free from hard commercialism, free from vulgarity and false ideals, we must enter their lives and quietly guide them into a youthful brotherhood and sisterhood of service.

Honest Partnership in the Home

By Mrs. Fred Dick

(From speech before Congress on Welfare of the Child.)

The homemaking of the future ... must be founded in this day and generation on financial independence. The girl of the past used to go from financial dependence in the girlhood home, to financial dependence as wife. She now goes from the independence of a wage earner to financial dependence as a wife, which relationship creates friction, and leads to incompatibility and divorce. There should be an adjustment of the responsibilities of home life before marriage on the basis of honest partnership. The children coming into the home should be taken into partnership financially and occupationally. They should be paid for their work on the basis that "If you don't work you can't eat," and held responsible for their share in the home-making.

The Home Influence

By Ida Tarbell

(From "The Business of Being a Woman."[5])

(See page 266)

Every home is perforce a good or bad educational center. It does its work in spite of every effort to shirk or supplement it. No teacher can entirely undo what it does, be that good or bad. The natural, joyous opening of a child's mind depends on its first intimate relations. These are, as a rule, with the mother. It is the mother who "takes an interest," who oftenest decides whether the new mind shall open frankly and fearlessly. How she does her work depends less upon her ability to answer questions, than her effort not to discourage them; less upon her ability to lead authoritatively into great fields than her efforts to push the child into those which attract him. To be responsive to his interests is the woman's greatest contribution to the child's development.

[5] McMillan Publishers.

Then—Back to the Home!

By Caro Lloyd

(American contemporary writer. Sister of Henry Demarest Lloyd, and author of his Biography. The following was taken from an article in "The Progressive Woman.")

Search any woman's heart, no matter how "emancipated", how "modern", she may be, and you will find there the love of home, of a lover, of a child, either realized or hoped for. How far this love is being denied to women today needs no showing. Women are being forced from the home into industry at a faster rate than the birth rate. Those still in the home are beginning to realize the interdependence of the modern social order and to see that only by extending their home-making out into the larger life of the community are their own circles safe.

As they go out into this wider service and struggle, women will take the spirit of the home with them. There are already signs that the faith, honesty, cleanliness, kindness of the home are to become the qualities of future society. We are to forsake our present régime with its cruel hostilities, and to build an order which shall meet the needs of all its children with the tenderness of father and mother, which shall institutionalize sisterhood and brotherhood. In this reconstruction women, the home-makers, will do a valiant share.

Then, having battled for their emancipation and won, and having used their new powers to join in the crusade for a higher civilization and won, women will go back into the home. Back to the home! But it will be as free women to a free home, under whose roof justice, equality and security will be sheltered. At last there will be an era of peace, and the morning rays of the golden age will tint the hilltops.

Women's Lodging Houses

By Mary Higgs

(English contemporary. Author of "The Master," "How to Deal With the Unemployed," "Glimpses Into the Abyss," etc. The following extract is taken from the last named book.)

We sat watching until we were weary, between 11 and 12, and then went to our bedroom. The same beds were reserved, and one woman who was said to work for her living, and had a very bad cough, was already in bed. We were speedily in bed also, and for awhile were quiet. The room was very stuffy, in spite of two ventilators; the sheets were not very clean, but still fairly so. The beds were filled by degrees all but one, that previously occupied by the Scotch woman. One girl who came in late said she was not on the streets; that she had begged money for her lodging, as she was out too late to return to her place. It was holiday time, being Whit week. One girl came in late and had had drink, which made her talkative, said she was a servant, and had just left a place where she had been ten months.... She meant to "enjoy herself" over the holiday and go to service again.

One girl who had been in before grumbled that her bed had been slept in and was dirty; but her own underlinen was far from clean. No one seemed to possess a nightgown; all slept in their underlinen.

We had the door a little ajar, and far into the night the doorbell kept ringing, and girls were admitted, and laughter and conversation drifted up the stairs. Our room settled down sometime past midnight, but the girl who was drunk several times tried to begin a conversation. At last we all slept. Two, however, had bad coughs. I woke at intervals through the night, and finally at 6.30. I was longing for fresh air, so put on a skirt and went down to enquire the time, and decided to go out for a quiet stroll. The bath room was empty, the bath had old papers in it, and did not look as if it was often used. There was a table with a looking glass, and a good deal of rouge about. The wash basin was very small, and no soap was provided. There was a roller towel for everybody. We had learned by experience to take our own soap and towel, and we lent the soap several times....

I slipped out to the brightness of a May morning, and walked in the direction of the park. The park was not open, as it was not yet seven, but just outside I found a resting place. What a contrast to the fresh budding life of the trees was that perversion and decay of budding womanhood I had left behind me! A tree cut down in its prime to make way for building furnished me with a parallel. What _artificial_ conditions of man's making, are pressing on those young lives, sapping them off from true use to rottenness and decay?...

Is there even at the back an _organized_ system, seeking victims and preying on them? This much is certain: that there is room for an allowance of greed and wickedness against defenseless womanhood. For if a woman cannot get work, where is she to go? What is she to do? Can all our homes and shelters together prevent many from drifting "on the streets"? Do we not need a national provision for migration, and temporary destitution among women?

The Inefficient Home

By Mrs. Laura P. Young

(From a paper read at the Third International Congress on “Welfare of the Child.”)

At present the chief reason I see for the fostering of a recreative social relationship among high school students is the inefficiency of the average home....

For instance, there is the home where the father may assume the attitude that after working all day at his own necessary pursuits, he cannot be annoyed by a riotous lot of youngsters all over the place in the evening. This is the short-sighted home....

There is the home in which the mother values her housekeeping above her home-making, the mother who cannot have her cherished lares and penates marred or displaced by visiting young people or indeed even by her own. This is the home of things, not of children....

And an especially pitiful type of inefficient home is that materially prosperous one in which the parents are too absorbed in their own affairs, social and business, to encourage home social life in their children. This type flourishes in many so-called exclusive suburban districts.

From whatever type of home a child goes to school, it is in that home that his standards of conduct and ideals of life are formed, and it is these that he carries to his association with his fellow-pupils.

Immorality and the Home

By Clara E. Laughlin

(Contemporary—Author of “The Evolution of a Girl’s Ideal,” “Everybody’s Lonesome,” “The Work-a-Day Girl.” The following extract is from “The Work-a-Day Girl.”)

What is the relation between domestic service and criminality and immorality? Between erring girls and their own homes as nurseries of weakness and wilfulness? It is this: housework as a sad majority of women perform it, is the most unsystematized, unstandardized, undisciplinary, unsocial and uninteresting work in the world. And family relations, as a sad majority of our citizens comprehend them, are the most unregulated relations in the world; there are a few standards below which the social conscience of the community will not allow a parent to fall in the treatment of a child, or a mistress to fall in the treatment of a maid; but they are standards so low that almost any other human relationship is better regulated by law and by public sentiment. The home is the most haphazard institution of our day.... Of the twelve or fifteen million homes in the country, probably not one million would pass an efficiency test based on the way they are run and the quality of their output.

Perpetuate the Ideal

By Mrs. C. E. Porter

If every man and woman held in their hearts a definite home ideal,—a lofty conception of their united lives, the highest function of parenthood would then, too, be perfect. There is little credit in simply perpetuating either a condition or a race.

Market Value of Home Labor

By Helen G. Putnam, M. D., LL. D.

If the labors which the great majority of women are putting in homes were estimated at market rates like those of men—and domestic arts are coming to have high values—husband’s incomes in a great majority of cases could not secure either the quality or the quantity. This, the largest single field of industries, is not enumerated by the census. Accurate valuation would put an end to the shibboleth, “The husband supports the wife”; would give self-respect to millions of women, and so inspire them; would remove the unsound impression of women’s comparative irresponsibility and men’s comparative dependability, whose psychologic effect is disastrous.

Domestic Strife

By Mrs. Belle Case La Follette

(See page 22)

(In “The Woman’s Journal.”)

Where do we find strife amid civilization? In the homes where husband and wife have not had mutual interests, where they have grown apart, and one has outstripped the other in development.

The Child at Home

By Elizabeth McCracken

(See page 90)

In one of the letters of Alice, Grand Duchess of Hesse, to her mother, Queen Victoria, she writes: “I try to give my children in their home what I had in my childhood’s home. As well as I am able, I copy what you did.”

There is something essentially British in this point of view. The English mother, whatever her rank, tried to give her children in their home what she had in her childhood’s home; as well as she is able, she copies what her mother did. The conditions in her life may be entirely different from those of her mother, her children may be unlike herself in disposition; yet she holds to tradition in regard to their upbringing; she tries to make their home a reproduction of her mother’s home.

The American mother, whatever her station, does the exact opposite—she attempts to bestow upon her children what she did not possess; and she makes an effort to imitate as little as possible what her mother did.... Her ambition is to train her children, not after the mother’s way, but in accordance with “the most approved method”. This is apt, on analysis, to turn out to be merely the reverse of her mother’s procedure.

Cannot Replace the Home

By Lillian D. Wald

(Of Henry Street Settlement, New York.)

We acknowledge the inability and the inefficiency of the parents and the home to control the fortunes of the child when we substitute for them the parental function of government; nevertheless, the strongest of education remains in the home, and the school and the settlement and other agencies that hover over it cannot replace that home.

Man, Woman, and the Home

By Edna Kenton

(American contemporary writer. The following quotation is from “The Militant Women—and Women,” in “The Century Magazine.”)

There is a rising revolt among women against the unspeakable dullness of unvaried home life. It has been a long, deadly routine, a life of servitude imposed on her for ages in a man-made world. No honest woman will deny—man’s opinion is valueless here—that there is nothing in the home alone to satisfy woman’s human longing for variety, adventure, romance. But any man will tell you strongly that home is not enough to fill a human being’s life—_if that human being is to be himself_.

Mother and Child-Character

By Mrs. Winifred Sackville Stoner

(Of the University of Pittsburgh, and noted specialist in Child Culture.)

As you know, the ancients believed that a mother had a great deal to do with the character of her children, and this is true, for no mother has the right to bring children into this world and not give them the best of care and attention. I believe that every child born into this world has the trinity of mental, physical and moral elements, and it is up to the mother to develop this trinity....

I believe more good can be accomplished by proper training right from the cradle than all the corporal punishment in the world. I have ten rules, and they are:

1. Never say “don’t.” The very atmosphere of some homes is fairly reeking with “don’t”.

2. Never scold. A scolding mother is worse than a spanking mother.

3. Never give corporal punishment.

4. Never say “must”.

5. Never allow a child to lose its self-respect or respect for its parents.

6. Never frighten a child.

7. Never refuse to answer questions.

8. Never ridicule a child or tease him.

9. Don’t banish the fairies.

10. Don’t let a child ever think there is any more attractive place than its own home.

The Home of the Workingman

By Alice Henry

(See page 203)

I look forward to a time I believe to be rapidly approaching, when the home of the workingman, like everyone else’s home, will be truly a home, the happy resting-place, the sheltering nest of father, mother and children, and when, through the rearrangement of labor, the workingman’s wife will be relieved from her monotonous existence of unrelieved domestic drudgery and overwork, disguised under the name of wifely and maternal duties, when the cooking and the washing, for instance, will be no more part of the home life in the humblest home than in the wealthiest. The workingman’s wife will then share in the general freedom to occupy part of her time in whatever occupation she is best fitted for, and, along with every other member of the community, she will share in the benefits arising from the better organization of domestic work.

The Hotel “Home”

By Edith Wharton

(Contemporary American Novelist. From “The House of Mirth.”)

The environment in which Lily found herself was as strange to her as its inhabitants. She was unacquainted with the world of the fashionable New York hotel—a world over-heated, over-upholstered, and over-fitted with mechanical appliances for the gratification of fantastic requirements, while the comforts of a civilized life were as unattainable as in a desert. Through this atmosphere of torrid splendor moved wan beings as richly upholstered as the furniture, beings without definite pursuits or permanent relations, who drifted on a languid tide of curiosity from restaurant to concert hall, from palm-garden to music-room, from “art-exhibit” to dressmaker’s opening. High-stepping horses or elaborately equipped motors waited to carry these ladies into vague metropolitan distances, whence they returned, still more wan from the weight of their sables, to be sucked back into the stifling inertia of the hotel routine. Somewhere behind them in the background of their lives, there was doubtless a real past, peopled by real human activities; they themselves were probably the product of strong ambitions, persistent energies, diversified contacts with the wholesome roughness of life; yet they had no more real existence than the poet’s shades in limbo.

Lily had not been long in this pallid world without discovering that Mrs. Hatch was its most substantial figure.... The details of her existence were as strange to Lily as its general tenor. The lady’s habits were marked by an Oriental indolence and disorder peculiarly trying to her companion. Mrs. Hatch and her friends seemed to float together outside the bonds of time and space. No definite hours were kept; no fixed obligations existed: night and day floated into one another in a blur of confused and retarded engagement so that one had the impression of lunching at the tea-hour, while dinner was often merged in the noisy after-theater supper which prolonged Mrs. Hatch’s vigil until daylight. Through this jumble of futile activities came and went a strange throng of hangers-on—manicures, beauty-doctors, hairdressers, teachers of bridge, of French, of “physical development”.... Mrs. Hatch swam in a haze of interminate enthusiasms, of aspirations culled from the stage, the newspapers, the fashion-journals, and a

gaudy world of sport still more completely beyond her companion's ken.

The Domestic Home Destroyed

By Lida Parce

(From "Economic Determinism."[6])

(See page 174)

We have seen how the ties of mutual interest and common experience are disrupted by the transference of industry from the home to the factory. We have seen members of the family forsake the roof-tree in pursuit of work. We have seen the wife and child receiving their pay from the corporation, in definite, fixed wages.... The home shifts from time to time. Light, food, air, space, all are inadequate or polluted. The parents are irritable from the constant friction and anxiety of the predicament in which they live. Naturally, none of them can love "the home" very deeply. The children feel little reverence for the parents whose helplessness exposes the family to such a life. There are few common activities and interests between the members of the family, hence, there are few strong ties. The companions of the alleyways and streets form the social circle of the young, and the cheap theatres which offer their attractions at short intervals along the city streets fill up that vacuum in their experience which the nature of man abhors. Children living in these conditions do not have a reasonable chance to grow up with strong minds in sound bodies. Nor can this kind of youthful life develop those ideas of fair and right conduct, that honorable and dignified attitude of mind which are essential to good citizenship. Born into such a world, growing up in such an environment, why should they respect anything or any body? They do not. And the family disintegrates as soon as the children are old enough to declare their independence. Society has deprived the family of the means of securing normal living conditions for its future citizens. It is now confronted by the immediate and urgent problem of providing those conditions outside the family. The domestic home having been destroyed, a social one must be provided.

BOOK III

The Child

THE CHILD

Child

By Agnes Repplier

This is so emphatically the children's age that a good many of us are thankful that we were not born in it. The little girl who said she wished she had lived in the time of Charles II because then "education was much neglected" wins our sympathy. It is a doubtful privilege to have the attention of the civilized world focussed upon us both before and after birth.

Little Beloved

By Leonora Pease

(In "The Progressive Woman.")

I hold by man's hand for thy sake, Little Beloved. Of the large human life, in thy being I partake, Little Beloved. My heart's to the lowly, the weary and frail, Who shall fail, For they step up and enter thy place; Lift thy face, Little Beloved.

My soul fellowships in thy name, Little Beloved. Man's overcoming is mine, his wrong is my shame, Little Beloved. Thy image for me stamps the low and the high, As a die, And thou, of thy kind, one with all, Mount or fall, Little Beloved.

When sounds the alarm of disaster, Little Beloved, For the swift prayer of my heart runneth faster, Little Beloved. Thou, too, imperiled, fashioned as they, Of the clay; Thou, too, who shalt walk in the way, Or astray, Little Beloved.

I would disentangle in vain, Little Beloved, Thy one shining, delicate thread from the skein, Little Beloved. For Fate's fast-running loom all the strands doth enmesh, Of the flesh, And her intricate pattern unroll, As a whole, Little Beloved.

More Woman's Work

By Mrs. Leonard Thomas

The child from its birth is more woman's work than man's.

The Call of the Unborn

By Ethel Blackwell Robinson

(Author of "The Religion of Joy," and "A Child's Glimpse of God, for Grown-Up Children"—from which the following is taken.)

Oh, smile up your heart for me, mother, Be happy, be buoyant, be mild; Oh, smile up your heart, for I'm coming! You'll make me a lovelier child. I'll bud as a gay little lassie, Or bloom as a cheery young lad; So, smile up your heart, mother darling, You'll always be grateful and glad.

The Nursery a University

By C. Josephine Barton

(See page 121)

If your child is rightly born, with no prenatal drapery to untangle from, you need concern yourself about his proper guidance, only past the infant age. He will educate, without your insistence. He will be showing you new points wherein your old rhetoric is at fault, or your mental philosophy behind the times. If you are wise, you will get vast lessons from him.

Froebel said: "The nursery was my university." The child receives there indelible lessons, nor does he judge as to whether a thing is literal or figurative. It is all fact to him. Plato says it is most important that tales which the young first hear should be models of virtuous thought. The highest and grandest that could be said of that strange phase of human experience, the Flesh-birth phase, was said by Friedrich Froebel, substantially as follows: "With the beginning of every new family there is issued to mankind and to each individual human being, the call to represent humanity in _pure development_; to represent man in his _ideal perfection_." Froebel was broad in saying also, "The destiny of nations lies far more in the hands of women, the mothers, than in the possessors of power, or of those innovators who, for the most part, do not understand themselves! We _must cultivate women_, who are the educators of the race, else the new generation cannot accomplish its task."

Now Froebel was not contending for woman's rights, but for the _race_. He speaks of woman, because he saw that _her element_ in the cause of civilization was in need of accentuation. He was seeking in the race that _balance_ which is imperative in the promotion of perfect conditions.... Froebel spoke of women because men have held the reins of education in the past. Even in the matter of bringing children into the world....

Above all things do not encourage the child to occupy his time with trivialities, to the neglect of the grand phenomena of nature—the beauty and poetry everywhere, along the dewy borders of the country road, the hedges and fields, the rocks and imbedded fossils, insects and plants. To study botany, geology, physiology and even psychology in youth, is excellent occupation.

Parental Duty

By Ellen Key

(Swedish contemporary. From "Love and Marriage.")

Children begotten under a sense of duty would ... be deprived of a number of essential conditions of life; among others that of finding in their parents beings full of life and radiating happiness which constitutes the chief spiritual nourishment of children—and it may be added that parents who live entirely for their children are seldom good company for them.

My Little Son

By Pauline Florence Brower

(American contemporary poet. From “Century Magazine.”)

We were so very intimate, we two, Even before I knew The outline of the little face I love, Or bent above The small, sweet body made so strong and fair; For we had learned to share The silences that are more than speech, Before your cry could reach My listening heart, or I could see The miracle made manifest to me.

My little son, Most glad, most radiant one, Too soon, too soon, the hour must be cried That draws you from my side! In life’s exultant hands is lifted up This newly molded cup. The tangled vineyard of the world demands Your toiling hands. Look deep, and in all women that you meet Your searching gaze will greet This mother of the child that used to be; Beholding women, oh, remember me!

Children Innumerable

By Florence Kiper

(In “The Forum.”)

Our age, it is true, is not a very reverential age, a sceptical age, one questioning the traditions. It is doubting the dignity in the lot of a soldier driven to martial courage by conscription. It is finding attenuated beauty in unwilling motherhood, though submission be in the name of God or Social Duty. It has asked itself this question and the answers are perturbing—For what and for whom are we breeding humanity if it be not for humanity itself?... Indeed, it is unbelievable that there should be a cry for breeding, when children innumerable crowd the city slums, deprived of air and spiritual breathing place, or in small towns and little farm houses grow dull and vicious through lack of appeal to the imagination and the intellect. Society as a whole cannot be too thankful for those women, who, celibate in body, have given themselves to the rearing of this “child material below par”, in the belief that the world is not for its superman but for the many.

Quantity vs. Quality in Children

By Lady Grove

(English contemporary. From “Fortnightly Review.”)

Is not the quality, rather than the quantity, of children the thing to be aimed at? If, then, by improving woman’s status the breed improves, as improve it must, is not this preferable to the “plenty” in their present very mixed condition? Has no one sufficient imagination to see in the mind’s eye a race that would be incapable of breeding this mass of “undesirable aliens”, who are tossed about from shore to shore, welcome nowhere, and a curse to themselves?

Fewer and Better Children

By Helen Campbell

(In “The Arena.”)

Slowly, how slowly, has dawned the thought that something more than mere numbers is the need of the family. Man found out long ago what laws must be studied and carried out in breeding for the high results in animal life; the brood mare or other animal rested and skillfully fed. For the woman, such thought never entered the mind of either husband or wife. The formula “God wills it”, lifted the burden of responsibility for defectives, or diseased, deformed or crippled children.... “Fewer and better”, has its own mission, till the day comes when a trained motherhood and fatherhood will ensure to the state an order of citizens for whom that war cry is no longer needed. The old phrase “God’s will”, is to fill with new meaning. God’s will and man’s, more and more with every step forward in the knowledge of what life was meant to bring to every child of man.

Equality in Fitness

By Helen G. Putnam, M. D. LL. D.

It makes no difference to the child’s inheritance which parent is unfit. Neither should be. It makes no difference to the child whether, after birth, the ignorance, evil instruction, contagious blighting of him come from a man or from a woman; from domestic conditions

(said to be women's work), or from municipal conditions (said to be man's work). The responsibility cannot be divided. Before this ideal—the child's well being—these sexes are on an equal footing, nor is one sex justified in wronging the child because the other says or does so. Nature forgives no spurious reasoning. The child and the race suffer the consequences.

Where Women Have Long Voted

By Florence Kelly

Never before in human history has the right of the young to pure living, the claim of the adolescent to guidance and restraint, the need of the child for nurture at the hands of father, mother, school and the community been recognized as in Colorado today.

Reason and the Child

By Mary Wollstonecraft

(See page 121)

Few parents think of addressing their children in the following manner, though it is in this reasonable way that Heaven seems to command the whole human race:—It is your interest to obey me till you can judge for yourself; and the Almighty Father of all has implanted an affection in me to serve as a guard to you whilst your reason is unfolding; but when your mind arrives at maturity, you must only obey me, or respect my opinions, so far as they coincide with the light that is breaking in on your mind.

A slavish bondage to parents cramps every faculty of the mind; and Mr. Locke very judiciously observes, that "if the mind be curbed and humbled too much in children; if their spirits be abased and broken much by too strict a hand over them, they lose all their vigor and industry." ...

On the contrary, the parent who sets a good example, patiently lets that example work, and it seldom fails to produce its natural effect—filial reverence.

The Government and Child Life

By Mrs. Frederick Schoff

(National President Congress of Mothers and Parent-Teachers Association. From speech delivered at Third International Congress of the Association.)

The Government's interest in children shown to all the world has stimulated every nation to deeper study of its own conditions as they relate to child life and the effect has been more far-reaching than can be estimated.

America, which is the Mecca for every nation, which has within its borders over 100,000 children of foreign birth and one-quarter of whose children are of foreign parentage, can claim a wider interest in the children of every nation than can any other nation on the globe, for within the boundaries of the United States may be found children of every race and every clime.

The Rising Value of a Baby

By Mabel Potter Daggett

(In "Pictorial Review.")

Only a mother counted her jewels yesterday, you see. Today, States count them, too. Even Jimmie Smith in, we will say, England, who before the war might have been regarded as among the least of these little ones, has become the object of his country's concern. Jimmie came screaming into this troublous world in a borough of London's East End, where there were already so many people that you didn't seem to miss Jimmie's father and some of the others who had gone to the war. Jimmie belongs to one of those three hundred thousand London families who are obliged to live in one- and two-room tenements. Five or six, perhaps it was five, little previous brothers and sisters, waited on the stair landing outside the door until the midwife in attendance ushered them in to welcome the new arrival. Now Jimmie is the stuff from which soldiers are made, either soldiers of war or soldiers of industry. And however you look at the future, his country's going to need Jimmie. He is entered in the great new ledger which has been opened by his government. The Notification of Births Act, completed by Parliament in 1915, definitely put the British baby on a business basis. Every child must now, within thirty-six hours of its advent, be listed by the local health authorities. Jimmie was.

And he was thereby automatically linked up with the great national child-saving campaign. Since then, so much as a fly in his milk is a matter of solicitude to the borough council. If he sneezes, it's heard in Westminster. And it's at least worried about there.

Ideals of the Child

By Sidonie Matzner Gruenberg

(American Contemporary. From "Your Child To-day and To-morrow.")

We should make a special effort to discover our children's ideals, for several reasons. First of all, by knowing what the girl or boy has nearest the heart we shall be able to enter into closer sympathy with the child, we shall be able to understand much of the conduct that would otherwise baffle as well as annoy us....

It is very easy to ridicule the ideals and ambitions of children when they seem to us too high flown or futile. But a person's ideals stand too close to the center of his character to be treated so rudely. It is better to ignore the many trifling flights of fancy that are not likely to have any permanent effect, and to throw the child into circumstances that will force the emergence of more deep-seated or far-reaching ambitions.

The Child and Parental Youth

By Elizabeth McCracken

(American contemporary. From "The American Child.")

A Frenchwoman to whom I once said that American parents treat their children in many ways as though they were their contemporaries remarked, "But does that not make the children old before their time?"

So far from this, it seems, on the contrary, to keep the parents young after their time. It has been truly said that we have in America fewer and fewer grandmothers who are "sweet old ladies," and more and more who are "charming elderly women." We hear less and less about the "older" and the "younger" generations; increasingly we merge two, and even three, generations into one.

Consideration for Others

By Mrs. R. P. Alexander

(Official Delegate to National Mothers' Council from Tokio, Japan.)

A Japanese child is rarely punished and never whipped, but the strong influence of the home training makes the average child obedient and self-controlled at a comparatively early age. He is taught to conceal his grief with the thought that if he does not, he will give pain to others.

A Blot on Civilization

By Julia Lathrop

(Head of The National Children's Bureau)

Infant mortality is a blot on civilization. If it is worth while to spend millions to safeguard farm products which are, after all, only raised to serve the needs of each generation of children in turn, is it not worth while to spend the necessary sums to popularize the methods by which the lives of children themselves may be safe-guarded?

Teaching the Child Citizenship

By Virginia Terhune Van de Water

(From "Little Talks with Mothers of Little People."[7])

One cannot begin too early to teach boys the duties of citizenship. There are many men who are educated, intelligent gentlemen who do not "take the trouble to vote," and are not ashamed of the fact. When such things are true, is it any wonder that we have cause to complain of corruption or misgovernment? How can it be otherwise when some of our citizens neglect their duty to their

country?

For Father’s Amusement

By Elizabeth Harrison

(Author of “A Study in Child-Nature,” “Two Children of the Foot-Hills,” “Some Silent Teachers,” “In Storyland,” etc. From “Misunderstood Children.”[8])

I was strolling through a neighboring park one breezy September day when it occurred. It took less than ten minutes from beginning to end—but did it _end_ then?

There had been a shower the night before, and the city’s dust had been washed from the leaves on trees and shrubbery. All nature seemed in fine mood and had filled me, along with the rest of the town-imprisoned mortals, with some of her exuberance and life.

This keen enjoyment of mere existence, which nature alone can give, was particularly noticeable in the buoyant movements of a little three-year-old child, who was dancing in and out of the shadows of the tall trees, now running, now skipping, now jumping in the joyous exhilaration of mere animal life. Ever and anon he looked back at his father and his father’s friend, who were strolling along in a more sedate enjoyment of the fresh air and glittering sunshine. The fact that each of them carried a tennis racket showed that they, too, were out for a holiday.

The child’s delight in all the freshness and freedom about him quickened his senses, as it always will quicken a healthy child. In a few moments his attention was attracted by the bending, swaying branches of a nearby clump of willow trees. The fascination of the lithe, graceful movement of the boughs was so strong that he stooped and stood with upturned face, gazing at them until the two men approached him. Then catching hold of his father’s hand he exclaimed, “See! See!” pointing to the nodding tree branches. His face was full of happiness, and his eyes were looking into his father’s eyes expecting sympathy in this new-found wonder of nature. But the father gave no heed to what was interesting the boy. Instead, he began playfully slapping him on his skirts with the tennis racket, at the same time saying, “Will you be good?” “No,” answered the child in high glee. It was evidently a familiar pastime between them. “Will you be good?” repeated the father, in mock threat lifting the tennis racket as if to strike the child over the head. “No, I won’t! No, I won’t!” shouted the boy as he scampered off over the grass. This created a chase in which the father playfully spanked the captured boy as with make-believe wrath he dragged him back to the side-walk. Having returned to the starting point of the chase he released the boy with the words, “There now, I’ll spank you hard if you are not a good boy!” He had scarcely let go his hold on the youngster’s arm before the latter again ran off, shouting in high glee, “No, I won’t! No, I won’t be good!” Again came the chase and again the playful spanking and dragging back and the release with an admonition that he would get a beating this time if he was not a good boy. The tone in which the words were said were an invitation to the child to renew the game.

The third time he started off, however, the other man decided that he, too, would take part in the sport. So he quickly put his tennis racket in front of the boy, thus obstructing his path. The child manfully struggled to push it aside, but could not. Soon his “No, I won’t,” in answer to his father’s “Will you be good?” had in it a note of fretfulness or, rather, resentment. He was contending now with two grown men and his strength was not equal to the strain. He pushed angrily against the racket in front while trying at the same time to avoid the light blows from the one in the rear. With cat-like agility the man in front would withdraw his obstructing tennis racket until the boy started forward and then check—would come the racket just in front of him. The very movement of his arm was like that of a cat regaining his hold on an escaping mouse. A peal of laughter from him each time he caught the exasperated child showed how much he was enjoying the sport. The father seemed equally amused and joined heartily in thwarting the efforts of the boy to escape. The little fellow’s face grew red, and he was soon short of breath from his struggles, and there was the angry sob of defeat in his voice. The scene ended by the child’s getting into a towering rage.

When they passed out of sight the father had seized him by the arm and was forcing him along, the boy kicking and struggling, but powerless to help himself. The two men were laughing heartily.

The child’s blood had been poisoned by the heat of anger, he had exhausted his physical vitality and his nervous system had been disarranged, not to speak of his moral standards—but then, the father and his friend had been amused.

[8] Central Publishing Company.

The Factory Child

By Harriet Monroe

(In “The Century.”)

Why do the wheels go whirling round, Mother, mother? Oh, mother, are they giants bound, And will they growl forever? Yes, fiery giants underground, Daughter, little daughter. Forever turn the wheels around, And rumble, grumble ever. Why do I pick the threads all day? Mother, mother? While sunshine children are at play, And must I work forever? Yes, factory-child; the live-long day, Daughter, little daughter, Your hands must pick the threads away, And feel the sunshine never. Why do the birds sing in the sun, Mother, mother, If all day long I run and run— Run with the wheels forever? The birds may sing till day is done, Daughter, little daughter, But with the wheels your feet must run— Run with the wheels forever. Why do I feel so tired each night, Mother, Mother? The wheels are always buzzing bright; Do they grow sleepy never? Oh, baby thing, so soft and white, Daughter, little daughter, The big wheels grind us in their might, And they will grind forever. And is the white thread never spun, Mother, mother? And is the white cloth never done— For you and me done never? Oh, yes, our thread will all be spun, Daughter, little daughter, When we lie down out in the sun, And work no more forever. And when will come that happy day, Mother, mother? Oh, shall we laugh and sing and play Out in the sun forever? Nay, factory child, we’ll rest all day, Daughter, little daughter, Where green peas grow and roses gay, There in the sun forever.

The Cotton-Mill Child

By Mrs. John Van Vorst

(From “The Cry of the Children.”[9])

(See page 57)

The first child to whom I spoke stood waiting, without work, for the machinery to start up. He had on a cloth cap, overalls, and a blue cotton shirt open at the throat. His face was wan, his eyes blue, with an intense blue streak beneath them. His mouth was full of tobacco, which had collected in a dingy crust about his lips. As he leaned back, one foot crossed over the other, expectant for the spindles to begin their whirling, he presented in his attitude and gestures, the appearance, not of a child, but of a gaunt man shrunk to diminutive size. Going over to where he sat, I started conversation with him about his work.

“How many sides do you run a day?” I asked.

“Three to four,” he answered.

“How much do you make?”

“About $2.40 a week.”

Then hastily I put the question: “How old are you!”

“Goin’ on tweayulve,” he responded. “I’ve been workin’ about four years. I come in here when I was seayvun.”

“Ever been to school?”

He shook his head. “No, meayum. I don’t know if I would like it. I reckon I’d as soon work here as be in school.”

“How many hours do you work here a day!”

“From six until six.”

The noise of the machine was distracting, and as I bent over him to catch his answer piped in a shrill, nasal voice, I could not but notice how fine and delicate his features were; the deep eyes, the high arched nose, the slender lips were placed in the oval face as features only can be placed by the unerring mold that breeding casts. Observing, also, the miniature shoulders that seemed to have been oppressed by some iron hand, I said:

“Don’t you get very tired?”

There was a pause which made more marked the honesty of his response.

“Why, I don’t never pay much attention whether I get tired or not.”

“You have an hour at noon?”

Here he brushed the cloth cap onto the back of his head, and sent a long, wet, black line from his mouth to the floor.

“Well,” he said (it was the man who spoke, his arms akimbo, his body warped in the long tussle for existence), “they aim to give us an hour, but we don’t never get more’n twenty-five minutes. We all live right up there.” He nodded toward the square of houses clustered around the mud-puddle on the brink of the slovenly hillside. Then the bobbins began to revolve slowly, and the boy started back to his work.

“You can’t loaf much,” he explained, “when the machine’s a runnin’.”

Up and down he plied on his monotonous beat—lone little figure....

Evidently waiting to join in the conversation, a small boy, I noticed, was standing beside me. His dark eyes sparkled merrily in his colorless face; he was dirty and covered with lint.

“What’s your job?”

“Sweepin’,” he grinned.

“How much do you make a day!”

“Twenty cents.”

“How old are you!”

“Seayvun.”

The boy at the machine, making bands for the spindles, was “goin’ on tayun.” He earned twenty cents a day. Others, I learned, were eight, nine and ten, and occasionally there was one as old as twelve.

As I walked on now through the mills talking with a twelve-year-old red-headed girl who had been four years at work, my eyes suddenly fell upon a strange couple. I could not take my attention from the tinier of the tiny pair; the boy’s hands appeared to be made without bones, his thumb flew back almost double as he pressed the cotton to loosen it from the revolving roller in the spinning frame; they no longer moved, these yellow, anemic hands, as though directed in their different acts by a thinking intelligence; they performed mechanically the gestures which had given them their definite form.

The red-headed girl laughed and nodded in the direction of the dwarfs.

“He’s most six,” she said. “He’s been here two years. He come in when he was most four. His little brother most four’s workin’ here now.”

“Yes? Where?”

“Oh, he works on the night shift. He comes in ’beaout half-a-past five and stays till six in the mornin’.”

I went over to the other dwarf of the couple, older, evidently, than the boy “most six.” Below her red cotton frock hung a long apron which reached to the ground. Her hair was short and shaggy, her face bloated, her eyes like a depression in the flesh, and about her mouth trailed streaks of tobacco. It seemed absurd to question her. Oblivion was the only thing that could have been mercifully tendered—even the peace of death could hardly have relaxed those tense features, cast in the dogged mould of suffering.

“How old are you?” I asked.

She shook her head. “I don’t know.”

“What do you earn?”

She shook her head again.

Her fingers did not for a moment stop in their swift manipulation of the broken thread. Then, as if she had suddenly remembered something, she said:

“I’ve only been workin’ here a day.”

“Only one day?”

“I’ve been on the night shift till neow.”

Dwarfs? Ah, yes; dwarfs indeed. But would that those who affirm it might catch sight of the expression that lowered under the brows of those two miniature victims. Like a menace, threatening, terrible, it seemed to presage the storm that shall one day be unchained by the spirits too long pent up in service to the greed of man.

The Crusade of the Children

By Margaret Belle Houston

(In “The Woman’s Journal.”)

O’er the grind of the wheels of traffic, Through the strident scream of the mart, Soundeth a muffled tramping, Like the faltering beat of a heart. But only the ear hath heard it That low on the earth is laid— The stumbling tread of the children, As they go on their long crusade!

Oh, some that are rosy as blossoms Sing with the singing rills, Wade through the sun-lit shadows And clamber the violet hills. But these are the paler children That move with the sad footfalls, And dark is the road they follow, Tunneled through iron walls.

They hear the song of the others Ring sweet in the outer air, But they may not run in the sunlight With the load their shoulders bear. They may not weave bright blossoms Though nimble their fingers be; But the Master hath not forgotten— “Let the little ones come to me!”

Well have ye planned and shaped it, The road that the children plod, Yet it leads, for all your delving, Straight to the throne of God. And there shall they lay their burdens, And there will they loose their bands; They will lift up their twisted fingers, To Him of the nail-marked hands.

They will cry, “Like Thee, O Father, We come with the marks of men!” Nor all the gold of their toiling Will spare you His answer then! Better the nether millstone And the depths of the darkest seas! Ye have wounded Christ the Avenger, Who wounded the least of these!

Child Labor

By Ruby Archer

(See page 254)

Poor little children that work all day— Far from the meadows, far from the birds, Far from the beautiful, silent words The hills know how to say!

Laughter is gone from your old-young eyes— Gone from the lips with the dimples sweet, Gone with the song of the little feet— As light in winter dies.

Evening—with only the years at ten? Where was the morning, where was the noon? Did the day turn back to the night so soon, Children—women—and—men?

Parts of the monster things that turn; Less than a lever, less than a wheel! Pity you were not wrought of steel, To save the pence you earn!

Add the columns, aye, foot the gain— Ye that barter in children’s lives! How will the reckoning end, that strives To balance gold and pain?

Need the Vote for the Children

By M. Carey Thomas

(See page 149)

Women need a vote for the sake of children. No state, modern or ancient, has ever cared properly for its children. Children are at the present time horribly neglected in every country, even when they are not, as in many states of the United States, horribly abused. All women whatever their nationality care more than all men for the welfare of all children. This is true even of female animals in the animal world. It is supremely true in our human world. Children are, and always will be, the special interest of women. Wherever women already vote, their influence is felt immediately and persistently in ameliorative measures for the protection, reformation, and education of little children. No one with any knowledge of the facts can deny that the political power of women is exercised on behalf of children. We are now learning that children should be the chief concern of our present civilization because in them lies the hope of the future. For the sake of children, women must vote.

Fettered Little Children

By Mary E. Carbutt

(In “The Progressive Woman.” Contemporary. Prominent California Club Woman.)

Oh blind and cruel nation, In your selfish race for wealth, You have fettered your young children With chains that drag to death.

To the wheel of toil you’ve bound them, In their young and tender years; And when they cry in anguish, You do not heed their tears.

They drag out their days in sorrow; They grow old before their time; All the joy of their young childhood You have stifled by your crime.

The children, wan and pallid, With wasted frames and weary hands, Turn in their defenseless sorrow To the mothers of the land.

You, fond and tender mothers, Happy children at your knee, Will you hear their silent pleading— Will you rise and set them free?

Announce Her Maturity

By Anne Morton Barnard

As woman has always mothered the race she should now refuse to be its child.

The Cry of the Children

By Elizabeth Barrett Browning

1806-1861

(English. Foremost among the world’s poets. Lived with her husband, Robert Browning, for many years in Italy, championing the cause of the Italian people toward liberty.)

Do you hear the children weeping, O my brothers, Ere the sorrow comes with years? They are leaning their young heads against their mothers— And _that_ cannot stop their tears. The young lambs are bleating in the meadows; The young birds are chirping in the nest: The young fawns are playing in the shadows; The young flowers are blowing toward the west— But the young, young children, O my brothers, They are weeping bitterly! They are weeping in the playtime of the others, In the country of the free.

Do you question the young children in the sorrow Why their tears are falling so? The old man may weep for his to-morrow Which is lost in Long Ago; The old tree is leafless in the forest, The old year is ending in the frost, The old wound, if stricken, is the sorest, The old hope is hardest to be lost: But the young, young children, O my brothers, Do you ask them why they stand Weeping sore before the bosoms of their mothers, In our happy Fatherland?

They look up with their pale and sunken faces, And their looks are sad to see, For the man’s hoary anguish draws and presses Down the cheeks of infancy; “Your old earth,” they say, “is very dreary, Our young feet,” they say, “are very weak; Few paces we have to ken, yet are weary— Our grave-rest is very far to seek. Ask the old why they weep, and not the children, For the outside

earth is cold, And we young ones stand without, in our bewildering, And the graves are for the old”....

“For oh,” say the children, “we are weary, And we cannot run or leap; If we cared for any meadows, it were merely To drop down in them and sleep. Our knees tremble sorely in the stooping, We fall upon our faces, trying to go; And, underneath our eyelids heavy drooping, The reddest flower would look as pale as snow. For all day long we drag our burden tiring Through the coal-dark, underground, Or, all day we drive the wheels of iron In the factories, round and round.

“For, all day the wheels are droning, turning; Their wind comes in our faces, Till our hearts turn, our head, with pulses burning, And the walls turn in their places: Turns the sky in the high window blank and reeling, Turns the light that drops adown the wall, Turn the black flies that crawl along the ceiling, All are turning, all the day, and we with all. And all day, the iron wheels are droning, And sometimes we could pray, ‘O ye wheels,’ (breaking out in a mad moaning) ‘Stop! be silent for today!’”....

They look up, with their pale and sunken faces, And their look is dread to see, For they mind you of the angels in their places, With eyes turned on Deity. “How long,” they say, “how long, O cruel nation, Will you stand, to move the world, on a child’s heart,— Stifle down with a mailed heel its palpitation, And tread onward to your throne amid the mart? Our blood splashes upward, O gold-heaper, And your purple shows your path! But the child’s sob in the silence curses deeper Than the strong man in his wrath.”

Children’s Ward

By Hortense Flexner

(In “The Survey.”)

She had been sent for—visiting hours were past— The Lithuanian woman with the blue, Still eyes. The child’s bed was the last In the row. She stood beside it, white—she knew, And watched! Her broad, young shoulders drooped Beneath the hooded gown that visitors wear; The nurse had left her—suddenly she stooped,

The hood slipped back and showed her braided hair. There was no cry. The Russians weep and pray, Italians beat their breasts. This mother turned, Asked for his clothes—tearless and calm and gray— The doctor told her they had all been burned. So she was gone—only her great eyes said What thing is lost, when a small child is dead!

Child Slavery

By Gertrude Breslau Fuller

(See page 36)

(There are 1,700,000 children working in the mills, mines and factories of the United States.)

Generations of the past have been responsible for certain iniquitous practises, but it remained for the present century to shut the little ones up in factories, stunting physical and mental growth. Because of child labor today the future generation of men and women will suffer. Their career will bear the stamp of human brutality.

BOOK IV

Mother

MOTHER

Rock Me to Sleep

By Elizabeth Akers Allen

(An old familiar poem. My mother often sang it to me when she rocked me to sleep as a child. Taken from her scrap book.—“Editor”)

Backward, turn backward, O time in your flight, Make me a child again just for tonight! Mother, come back from the echoless shore, Take me again to your heart as of yore; Kiss from my forehead the furrows of care, Smooth the few silver threads out of my hair; Over my slumbers your loving watch keep; Rock me to sleep, mother,—rock me to sleep!

Backward, flow backward, O tide of the years! I am so weary of toil and of tears— Toil without recompense—tears all in vain— Take them and give me my childhood again! I have grown weary of dust and decay— Weary of flinging my soul-wealth away; Weary of sowing for others to reap; Rock me to sleep, mother,—rock me to sleep!

Tired of the hollow, the base, the untrue, Mother, O mother, my heart calls for you! Many a summer the grass has grown green, Blossomed and faded, our faces between; Yet, with strong yearning and passionate pain, Long I tonight for your presence again. Come from the silence so long and so deep; Rock me to sleep, mother—rock me to sleep!

Over my heart in the days that are flown, No love like mother-love ever has shown; No other worship abides and endures,— Faithful, unselfish, and patient like yours; None like a mother can charm away pain From the sick soul or the world-weary brain. Slumber's soft calms o'er my heavy lids creep— Rock me to sleep, mother,—rock me to sleep!

Come, let your brown hair, just lighted with gold, Fall on your shoulders again as of old; Let it drop over my forehead tonight, Shading my faint eyes away from the light; For with its sunny-edged shadows once more Haply will throng the sweet visions of yore; Lovingly, softly, its bright billows sweep;— Rock me to sleep, mother,—rock me to sleep!

Mother, dear mother, the years have been long Since I last listened your lullaby song; Sing, then, and unto my soul it shall seem Womanhood's years have been only a dream. Clasped to your heart in a loving embrace, With your light lashes just sweeping my face, Never hereafter to wake or to weep;— Rock me to sleep, mother,—rock me to sleep!

The Mother

By Marion Harland

(Well-known magazine writer. The following is from "The Independent.")

She has never ceased out of the land. That she seems to be more in evidence now than she was sixty years ago may be but one more expression of Feminism....

In every well-appointed household the mother is the controlling influence. In a large percentage of homes her acknowledged sovereignty is a dictatorship. If she be a woman of intelligence and refinement, she virtually supervises her girl's education and molds her views of life, morals and manners. The father is, at most, Prince Consort, playing an insignificant part in the selection of associates and instructors, and no part at all in the regulation of deportment, speech and dress. "My mother thinks," and "My mother says," are cast-iron formulas that make an end of all controversy while the girl is in short skirts and wears her unshorn locks between her shoulders. With the lengthened skirts, and trussed hair, comes entrance upon the school or college world, and the beginning of individual life.

The Mother's Influence

By "Ouida"

(Mlle. Louise de la Ramee, Author of "Under Two Flags," "A Dog of Flanders," etc. Died Jan. 28, 1908. The following is from one of a series of articles written and sold to Lippincott's 28 years ago with the request that they be not published until after her death. The articles appeared in the May, June, and July, 1909, issues.)

When we reflect on the enormous weight which the woman's influence has on the growing child; when we consider the incurable superstitions, the unreasonable fables, the illogical deductions, the warped and stifled judgments, which millions of young boys learn in education and religion at their mothers' knees in infancy,—it is impossible to over-rate the invaluable consequences of any introduction of _geist_ into the minds of women. But for the backward pressure of woman—woman ever conservative, ever _reculante_, ever wedded to form and precedent, and to tradition—the world of men would have forsaken many a _cultus_ built on fable, many a dominion of priestcraft, many a limbo of worn-out and oppressive credulity. The evil mental influence of women is fully as great as can be the good moral influence of the best of their sex. Wars hounded on; fetters freshly riveted; the withes of dead beliefs binding down the free action of living limbs; the pressure of narrow ties, and of egotisms deified to virtue, forcing men aside from paths of greatness or justice—all those, and much more, are due to the baleful intellectual influence of women.

Fatherhood Cannot Be Motherhood

By Ada M. Kassimer

(From Introduction to “Representative Women.”)

Womanhood now as always recognizes motherhood as its highest duty, its greatest obligation; and the present awakened womanhood sees its mission of motherhood—not only in the narrowed home immediately about it, but in the large human family, in the world of activity, it sees how the affairs of men, women and children need the true mother instinct, which in every phase of nature is one of unselfish devotion, of unlimited service, of freedom from combat for financial, social and personal supremacy. The inherent attributes of motherhood must combine with those of fatherhood to square the balance of justice for childhood.

The world needs woman, her ideas, her way of reasoning, her insight, her sense of justice, her tender hands and her loving heart. The children of the world need her; for a long time they have been governed by the masculine mind which has made laws for them, established educational plans for them, opened juvenile courts for them, founded factories, mills, mines, in which little hands have hardened, little bodies have dwarfed, young minds and hearts grown prematurely old—and this, not because the masculine mind and the masculine heart would intentionally be drastic, but because men are not women, and fatherhood cannot be motherhood.

The Price

By Winona Douglas

(In “The Woman’s Journal.”)

Sleep, little dream child, in mother’s arms; Cuddle yet closer and take your rest, Eyelids now hiding the blue eyes since laughing, Laughing in glee here on mother’s breast.

Dear are the moments with you I am spending; Toil is forgotten in comfort and calm. Together we are, wee one, in the gloaming, Evening blessed,—my babe’s coo is a psalm.—

You were my dream child, and I must awaken, My arms are empty, sweet babe unborn, For me the lone quiet, while night is fast darkening; Darkening now, and there’s toil on the morn.

The days come and go, toil is ever supreme; Motherhood smother, the thought is vain. Forget it, indeed, for wheels must be turning, Turning incessantly—more wealth to gain!

Passionate Instinct

By Emily Huntington Miller

(From “Parents and Their Problems.”)

What could atone to a multitude of children for the misfortune of having been born, but the passionate instinct that takes no account of lack of beauty, grace or intellectual gift, but clings to its own with deathless devotion?

Functions Identical

By Mrs. Alice H. Putnam

(From “Parents and Their Problems.”)

In one respect, at least, the functions of mother and teacher should be identical.... The teacher and parent must take their charge “for better, for worse.”

The Adolescent Child

By Julia Clark Hallam

(From “Studies in Child Development.” American contemporary. Instructor in the University of Chicago.)

It goes without saying that every mother has an imperative duty toward her son as he approaches this important period in his development. Nature has done her part in preparing the boy’s body, the mother must be doing her part in preparing his mind for all

of these new experiences. There are many things which a mother can do because she is the mother, and because her mind is mature while the mind of the boy is yet immature. The mother, through her study, comes to see that the adolescent boy is about to acquire new powers. Before, he was simply an individual. Now he is becoming a part of the race, because he is acquiring the power of conserving it. To the mother who has duly prepared herself for her child's adolescence, its appearance will bring the same mysterious thrill which she felt when she first saw the child as a new-born babe. It has been said in this connection, "When a baby is to be born, preparations for its advent are carefully made. But when, in future years, the most critical time comes when the child is to be re-born, a man or a woman, it is rare that intelligent suggestions or wise words of counsel tell him or her of the importance of the period."

Mother

By Laura Simmons

(In the "Boston Herald.")

Oh, Mother—hands of balm and gracious healing, And cool, soft fingers that could heal and bless! So sure to charm the aching and the fever With magic spell and soothing tenderness.

Oh, Mother—feet that grew so very tired Treading Life's pavements and its burning sands! Have they found rest at last, and cooling waters Where they may stop to loose their earthly bands?

Oh, Mother—eyes so keen to probe the sorrows! So quick to see the hurt and understand! Do they not shine tonight from highest Heaven Bright with the old-time courage, high and grand?

Oh, Mother—heart so wise and tender— That has not died, nor failed, but lived and wrought In deeds and words—in daily work and action— In lovely memory and blessed thought!

Oh, Mother—love that lives past death and parting! That reaches still to bless and guard and guide, To hold me from the snare undreamed and waiting— To point the refuge where I yet may hide!

And, oh—the things my heart hath yearned to utter! The joys that thrilled—the pain that seared and scarred! But I must wait—I, too—till sunset's splendor Shall hold for me its shining gates unbarred.

Past joy, past sorrow, past the driving torrent Of tears, I see her stand and watch for me; And clear the sweet old Mother-question cometh: "Oh, child—dear child! And is all well with thee?"

Wise Mothers

By Mona Cairo

(From "The Morality of Marriage.")

We shall never have really good mothers until women cease to make motherhood the central idea of their existence. The woman who has no interest larger than the affairs of her children is not a fit person to train them.

The Factory Worker and Motherhood

By Kate Richards O'Hare

(American contemporary. Well-known Socialist speaker and writer. From "The Sorrows of Cupid.")

I spent six months one winter in the various factories of New York in order to get information by actual experience. I can truthfully and conservatively say that not more than one out of two girls employed in the factory trades for a year or more are physically fitted to be wives and mothers, not considering their fitness mentally, morally or spiritually. There are six million women workers in the United States. If fifty per cent., not ninety, are made physically, mentally and morally unfit for wife and motherhood by doing work unsuited to their strength, then the wage-system must be weighed and "found wanting" indeed. Economic conditions which force women to work in unsuitable industrial occupations are not only a fruitful cause for divorce, but an outrage against humanity as well.

THE SUPPRESSION OF THE AFRICAN SLAVE-TRADE TO THE UNITED STATES OF AMERICA 1638-1870

Volume I Harvard Historical Studies

1896

Longmans, Green, and Co. New York

* * * * *

Preface

This monograph was begun during my residence as Rogers Memorial Fellow at Harvard University, and is based mainly upon a study of the sources, i.e., national, State, and colonial statutes, Congressional documents, reports of societies, personal narratives, etc. The collection of laws available for this research was, I think, nearly complete; on the other hand, facts and statistics bearing on the economic side of the study have been difficult to find, and my conclusions are consequently liable to modification from this source.

The question of the suppression of the slave-trade is so intimately connected with the questions as to its rise, the system of American slavery, and the whole colonial policy of the eighteenth century, that it is difficult to isolate it, and at the same time to avoid superficiality on the one hand, and unscientific narrowness of view on the other. While I could not hope entirely to overcome such a difficulty, I nevertheless trust that I have succeeded in rendering this monograph a small contribution to the scientific study of slavery and the American Negro.

I desire to express my obligation to Dr. Albert Bushnell Hart, of Harvard University, at whose suggestion I began this work and by whose kind aid and encouragement I have brought it to a close; also I have to thank the trustees of the John F. Slater Fund, whose appointment made it possible to test the conclusions of this study by the general principles laid down in German universities.

W.E. BURGHARDT DU BOIS.

Chapter I

INTRODUCTORY.

1. Plan of the Monograph. 2. The Rise of the English Slave-Trade.

1. ~Plan of the Monograph.~ This monograph proposes to set forth the efforts made in the United States of America, from early colonial times until the present, to limit and suppress the trade in slaves between Africa and these shores.

The study begins with the colonial period, setting forth in brief the attitude of England and, more in detail, the attitude of the planting, farming, and trading groups of colonies toward the slave-trade. It deals next with the first concerted effort against the trade and with the further action of the individual States. The important work of the Constitutional Convention follows, together with the history of the trade in that critical period which preceded the Act of 1807. The attempt to suppress the trade from 1807 to 1830 is next recounted. A chapter then deals with the slave-trade as an international problem. Finally the development of the crises up to the Civil War is studied, together with the steps leading to the final suppression; and a concluding chapter seeks to sum up the results of the investigation. Throughout the monograph the institution of slavery and the interstate slave-trade are considered only incidentally.

2. ~The Rise of the English Slave-Trade.~ Any attempt to consider the attitude of the English colonies toward the African slave-trade must be prefaced by a word as to the attitude of England herself and the development of the trade in her hands.[1]

Sir John Hawkins's celebrated voyage took place in 1562, but probably not until 1631[2] did a regular chartered company undertake to carry on the trade.[3] This company was unsuccessful,[4] and was eventually succeeded by the "Company of Royal Adventurers trading to Africa," chartered by Charles II. in 1662, and including the Queen Dowager and the Duke of York.[5] The company contracted to supply the West Indies with three thousand slaves annually; but contraband trade, misconduct, and war so reduced it that in 1672 it surrendered its charter to another company for £34,000.[6] This new corporation, chartered by Charles II. as the "Royal African Company," proved more successful than its predecessors, and carried on a growing trade for a quarter of a century.

In 1698 Parliamentary interference with the trade began. By the Statute 9 and 10 William and Mary, chapter 26, private traders, on payment of a duty of 10% on English goods exported to Africa, were allowed to participate in the trade. This was brought about by the clamor of the merchants, especially the "American Merchants," who "in their Petition suggest, that it would be a great Benefit to the Kingdom to secure the Trade by maintaining Forts and Castles there, with an equal Duty upon all Goods exported."[7] This plan, being a compromise between maintaining the monopoly intact and entirely abolishing it, was adopted, and the statute declared the trade "highly Beneficial and Advantageous to this Kingdom, and to the Plantations and Colonies thereunto belonging."

Having thus gained practically free admittance to the field, English merchants sought to exclude other nations by securing a monopoly of the lucrative Spanish colonial slave-trade. Their object was finally accomplished by the signing of the Assiento in

1713.[8]

The Assiento was a treaty between England and Spain by which the latter granted the former a monopoly of the Spanish colonial slave-trade for thirty years, and England engaged to supply the colonies within that time with at least 144,000 slaves, at the rate of 4,800 per year. England was also to advance Spain 200,000 crowns, and to pay a duty of 33½ crowns for each slave imported. The kings of Spain and England were each to receive one-fourth of the profits of the trade, and the Royal African Company were authorized to import as many slaves as they wished above the specified number in the first twenty-five years, and to sell them, except in three ports, at any price they could get.

It is stated that, in the twenty years from 1713 to 1733, fifteen thousand slaves were annually imported into America by the English, of whom from one-third to one-half went to the Spanish colonies.[9] To the company itself the venture proved a financial failure; for during the years 1729-1750 Parliament assisted the Royal Company by annual grants which amounted to £90,000,[10] and by 1739 Spain was a creditor to the extent of £68,000, and threatened to suspend the treaty. The war interrupted the carrying out of the contract, but the Peace of Aix-la-Chapelle extended the limit by four years. Finally, October 5, 1750, this privilege was waived for a money consideration paid to England; the Assiento was ended, and the Royal Company was bankrupt.

By the Statute 23 George II., chapter 31, the old company was dissolved and a new "Company of Merchants trading to Africa" erected in its stead.[11] Any merchant so desiring was allowed to engage in the trade on payment of certain small duties, and such merchants formed a company headed by nine directors. This marked the total abolition of monopoly in the slave-trade, and was the form under which the trade was carried on until after the American Revolution.

That the slave-trade was the very life of the colonies had, by 1700, become an almost unquestioned axiom in British practical economics. The colonists themselves declared slaves "the strength and sinews of this western world,"[12] and the lack of them "the grand obstruction"[13] here, as the settlements "cannot subsist without supplies of them."[14] Thus, with merchants clamoring at home and planters abroad, it easily became the settled policy of England to encourage the slave-trade. Then, too, she readily argued that what was an economic necessity in Jamaica and the Barbadoes could scarcely be disadvantageous to Carolina, Virginia, or even New York. Consequently, the colonial governors were generally instructed to "give all due encouragement and invitation to merchants and others, ... and in particular to the royal African company of England."[15] Duties laid on the importer, and all acts in any way restricting the trade, were frowned upon and very often disallowed. "Whereas," ran Governor Dobbs's instructions, "Acts have been passed in some of our Plantations in America for laying duties on the importation and exportation of Negroes to the great discouragement of the Merchants trading thither from the coast of Africa.... It is our Will and Pleasure that you do not give your assent to or pass any Law imposing duties upon Negroes imported into our Province of North Carolina."[16]

The exact proportions of the slave-trade to America can be but approximately determined. From 1680 to 1688 the African Company sent 249 ships to Africa, shipped there 60,783 Negro slaves, and after losing 14,387 on the middle passage, delivered 46,396 in America. The trade increased early in the eighteenth century, 104 ships clearing for Africa in 1701; it then dwindled until the signing of the Assiento, standing at 74 clearances in 1724. The final dissolution of the monopoly in 1750 led--excepting in the years 1754-57, when the closing of Spanish marts sensibly affected the trade--to an extraordinary development, 192 clearances being made in 1771. The Revolutionary War nearly stopped the traffic; but by 1786 the clearances had risen again to 146.

To these figures must be added the unregistered trade of Americans and foreigners. It is probable that about 25,000 slaves were brought to America each year between 1698 and 1707. The importation then dwindled, but rose after the Assiento to perhaps 30,000. The proportion, too, of these slaves carried to the continent now began to increase. Of about 20,000 whom the English annually imported from 1733 to 1766, South Carolina alone received some 3,000. Before the Revolution, the total exportation to America is variously estimated as between 40,000 and 100,000 each year. Bancroft places the total slave population of the continental colonies at 59,000 in 1714, 78,000 in 1727, and 293,000 in 1754. The census of 1790 showed 697,897 slaves in the United States.[17]

In colonies like those in the West Indies and in South Carolina and Georgia, the rapid importation into America of a multitude of savages gave rise to a system of slavery far different from that which the late Civil War abolished. The strikingly harsh and even inhuman slave codes in these colonies show this. Crucifixion, burning, and starvation were legal modes of punishment.[18] The rough and brutal character of the time and place was partly responsible for this, but a more decisive reason lay in the fierce and turbulent character of the imported Negroes. The docility to which long years of bondage and strict discipline gave rise was absent, and insurrections and acts of violence were of frequent occurrence.[19] Again and again the danger of planters being "cut off by

their own negroes"[20] is mentioned, both in the islands and on the continent. This condition of vague dread and unrest not only increased the severity of laws and strengthened the police system, but was the prime motive back of all the earlier efforts to check the further importation of slaves.

On the other hand, in New England and New York the Negroes were merely house servants or farm hands, and were treated neither better nor worse than servants in general in those days. Between these two extremes, the system of slavery varied from a mild serfdom in Pennsylvania and New Jersey to an aristocratic caste system in Maryland and Virginia.

FOOTNOTES:

[1] This account is based largely on the _Report of the Lords of the Committee of Council_, etc. (London, 1789).

[2] African trading-companies had previously been erected (e.g. by Elizabeth in 1585 and 1588, and by James I. in 1618); but slaves are not specifically mentioned in their charters, and they probably did not trade in slaves. Cf. Bandinel, _Account of the Slave Trade_ (1842), pp. 38-44.

[3] Chartered by Charles I. Cf. Sainsbury, _Cal. State Papers, Col. Ser., America and W. Indies, 1574-1660_, p. 135.

[4] In 1651, during the Protectorate, the privileges of the African trade were granted anew to this same company for fourteen years. Cf. Sainsbury, _Cal. State Papers, Col. Ser., America and W. Indies, 1574-1660_, pp. 342, 355.

Chapter II

THE PLANTING COLONIES.

3. Character of these Colonies. 4. Restrictions in Georgia. 5. Restrictions in South Carolina. 6. Restrictions in North Carolina. 7. Restrictions in Virginia. 8. Restrictions in Maryland. 9. General Character of these Restrictions.

3. ~Character of these Colonies.~ The planting colonies are those Southern settlements whose climate and character destined them to be the chief theatre of North American slavery. The early attitude of these communities toward the slave-trade is therefore of peculiar interest; for their action was of necessity largely decisive for the future of the trade and for the institution in North America. Theirs was the only soil, climate, and society suited to slavery; in the other colonies, with few exceptions, the institution was by these same factors doomed from the beginning. Hence, only strong moral and political motives could in the planting colonies overthrow or check a traffic so favored by the mother country.

4. ~Restrictions in Georgia.~ In Georgia we have an example of a community whose philanthropic founders sought to impose upon it a code of morals higher than the colonists wished. The settlers of Georgia were of even worse moral fibre than their slave-trading and whiskey-using neighbors in Carolina and Virginia; yet Oglethorpe and the London proprietors prohibited from the beginning both the rum and the slave traffic, refusing to "suffer slavery (which is against the Gospel as well as the fundamental law of England) to be authorised under our authority."[1] The trustees sought to win the colonists over to their belief by telling them that money could be better expended in transporting white men than Negroes; that slaves would be a source of weakness to the colony; and that the "Produces designed to be raised in the Colony would not require such Labour as to make Negroes necessary for carrying them on."[2]

This policy greatly displeased the colonists, who from 1735, the date of the first law, to 1749, did not cease to clamor for the repeal of the restrictions.[3] As their English agent said, they insisted that "In Spight of all Endeavours to disguise this Point, it is as clear as Light itself, that Negroes are as essentially necessary to the Cultivation of _Georgia_, as Axes, Hoes, or any other Utensil of Agriculture."[4] Meantime, evasions and infractions of the laws became frequent and notorious. Negroes were brought across from Carolina and "hired" for life.[5] "Finally, purchases were openly made in Savannah from African traders: some seizures were made by those who opposed the principle, but as a majority of the magistrates were favorable to the introduction of slaves into the province, legal decisions were suspended from time to time, and a strong disposition evidenced by the courts to evade the operation of the law."[6] At last, in 1749, the colonists prevailed on the trustees and the government, and the trade was thrown open under careful restrictions, which limited importation, required a registry and quarantine on all slaves brought in, and laid a duty.[7] It is probable, however, that these restrictions were never enforced, and that the trade thus established continued unchecked until the Revolution.

5. ~Restrictions in South Carolina.~[8] South Carolina had the largest and most widely developed slave-trade of any of the continental colonies. This was owing to the character of her settlers, her nearness to the West Indian slave marts, and the early development of certain staple crops, such as rice, which were adapted to slave labor.[9] Moreover, this colony suffered much less interference from the home government than many other colonies; thus it is possible here to trace the untrammeled development of slave-trade restrictions in a typical planting community.

As early as 1698 the slave-trade to South Carolina had reached such proportions that it was thought that "the great number of negroes which of late have been imported into this Collony may endanger the safety thereof." The immigration of white servants was therefore encouraged by a special law.[10] Increase of immigration reduced this disproportion, but Negroes continued to be imported in such numbers as to afford considerable revenue from a moderate duty on them. About the time when the Assiento was signed, the slave-trade so increased that, scarcely a year after the consummation of that momentous agreement, two heavy duty acts were passed, because "the number of Negroes do extremely increase in this Province, and through the afflicting providence of

God, the white persons do not proportionately multiply, by reason whereof, the safety of the said Province is greatly endangered."[11] The trade, however, by reason of the encouragement abroad and of increased business activity in exporting naval stores at home, suffered scarcely any check, although repeated acts, reciting the danger incident to a "great importation of Negroes," were passed, laying high duties.[12] Finally, in 1717, an additional duty of £40,[13] although due in depreciated currency, succeeded so nearly in stopping the trade that, two years later, all existing duties were repealed and one of £10 substituted.[14] This continued during the time of resistance to the proprietary government, but by 1734 the importation had again reached large proportions. "We must therefore beg leave," the colonists write in that year, "to inform your Majesty, that, amidst our other perilous circumstances, we are subject to many intestine dangers from the great number of negroes that are now among us, who amount at least to twenty-two thousand persons, and are three to one of all your Majesty's white subjects in this province. Insurrections against us have been often attempted."[15] In 1740 an insurrection under a slave, Cato, at Stono, caused such widespread alarm that a prohibitory duty of £100 was immediately laid.[16] Importation was again checked; but in 1751 the colony sought to devise a plan whereby the slightly restricted immigration of Negroes should provide a fund to encourage the importation of white servants, "to prevent the mischiefs that may be attended by the great importation of negroes into this Province."[17] Many white servants were thus encouraged to settle in the colony; but so much larger was the influx of black slaves that the colony, in 1760, totally prohibited the slave-trade. This act was promptly disallowed by the Privy Council and the governor reprimanded;[18] but the colony declared that "an importation of negroes, equal in number to what have been imported of late years, may prove of the most dangerous consequence in many respects to this Province, and the best way to obviate such danger will be by imposing such an additional duty upon them as may totally prevent the evils."[19] A prohibitive duty of £100 was accordingly imposed in 1764.[20] This duty probably continued until the Revolution.

The war made a great change in the situation. It has been computed by good judges that, between the years 1775 and 1783, the State of South Carolina lost twenty-five thousand Negroes, by actual hostilities, plunder of the British, runaways, etc. After the war the trade quickly revived, and considerable revenue was raised from duty acts until 1787, when by act and ordinance the slave-trade was totally prohibited.[21] This prohibition, by renewals from time to time, lasted until 1803.

6. ~Restrictions in North Carolina.~ In early times there were few slaves in North Carolina;[22] this fact, together with the troubled and turbulent state of affairs during the early colonial period, did not necessitate the adoption of any settled policy toward slavery or the slave-trade. Later the slave-trade to the colony increased; but there is no evidence of any effort to restrict or in any way regulate it before 1786, when it was declared that "the importation of slaves into this State is productive of evil consequences and highly impolitic,"[23] and a prohibitive duty was laid on them.

7. ~Restrictions in Virginia.~[24] Next to South Carolina, Virginia had probably the largest slave-trade. Her situation, however, differed considerably from that of her Southern neighbor. The climate, the staple tobacco crop, and the society of Virginia were favorable to a system of domestic slavery, but one which tended to develop into a patriarchal serfdom rather than into a slave-consuming industrial hierarchy. The labor required by the tobacco crop was less unhealthy than that connected with the rice crop, and the Virginians were, perhaps, on a somewhat higher moral plane than the Carolinians. There was consequently no such insatiable demand for slaves in the larger colony. On the other hand, the power of the Virginia executive was peculiarly strong, and it was not possible here to thwart the slave-trade policy of the home government as easily as elsewhere.

Considering all these circumstances, it is somewhat difficult to determine just what was the attitude of the early Virginians toward the slave-trade. There is evidence, however, to show that although they desired the slave-trade, the rate at which the Negroes were brought in soon alarmed them. In 1710 a duty of £5 was laid on Negroes, but Governor Spotswood "soon perceived that the laying so high a Duty on Negros was intended to discourage the importation," and vetoed the measure.[25] No further restrictive legislation was attempted for some years, but whether on account of the attitude of the governor or the desire of the inhabitants, is not clear. With 1723 begins a series of acts extending down to the Revolution, which, so far as their contents can be ascertained, seem to have been designed effectually to check the slave-trade. Some of these acts, like those of 1723 and 1727, were almost immediately disallowed.[26] The Act of 1732 laid a duty of 5%, which was continued until 1769,[27] and all other duties were in addition to this; so that by such cumulative duties the rate on slaves reached 25% in 1755,[28] and 35% at the time of Braddock's expedition.[29] These acts were found "very burthensome," "introductive of many frauds," and "very inconvenient,"[30] and were so far repealed that by 1761 the duty was only 15%. As now the Burgesses became more powerful, two or more bills proposing restrictive duties were passed, but disallowed.[31] By 1772 the anti-slave-trade feeling had become considerably developed, and the Burgesses petitioned the king, declaring that "The importation of slaves into the colonies from the coast of Africa hath long been considered as a trade of great inhumanity, and under its present encouragement, we have too much reason to fear _will endanger

the very existence_ of your Majesty's American dominions.... Deeply impressed with these sentiments, we most humbly beseech your Majesty to remove _all those restraints_ on your Majesty's governors of this colony, _which inhibit their assenting to such laws as might check so very pernicious a commerce_."[32]

Nothing further appears to have been done before the war. When, in 1776, the delegates adopted a Frame of Government, it was charged in this document that the king had perverted his high office into a "detestable and insupportable tyranny, by ... prompting our negroes to rise in arms among us, those very negroes whom, by an inhuman use of his negative, he hath refused us permission to exclude by law."[33] Two years later, in 1778, an "Act to prevent the further importation of Slaves" stopped definitively the legal slave-trade to Virginia.[34]

8. ~Restrictions in Maryland.~[35] Not until the impulse of the Assiento had been felt in America, did Maryland make any attempt to restrain a trade from which she had long enjoyed a comfortable revenue. The Act of 1717, laying a duty of 40_s._,[36] may have been a mild restrictive measure. The duties were slowly increased to 50_s._ in 1754,[37] and £4. in 1763.[38] In 1771 a prohibitive duty of £9 was laid;[39] and in 1783, after the war, all importation by sea was stopped and illegally imported Negroes were freed.[40]

Compared with the trade to Virginia and the Carolinas, the slave-trade to Maryland was small, and seems at no time to have reached proportions which alarmed the inhabitants. It was regulated to the economic demand by a slowly increasing tariff, and finally, after 1769, had nearly ceased of its own accord before the restrictive legislation of Revolutionary times.[41] Probably the proximity of Maryland to Virginia made an independent slave-trade less necessary to her.

9. ~General Character of these Restrictions.~ We find in the planting colonies all degrees of advocacy of the trade, from the passiveness of Maryland to the clamor of Georgia. Opposition to the trade did not appear in Georgia, was based almost solely on political fear of insurrection in Carolina, and sprang largely from the same motive in Virginia, mingled with some moral repugnance. As a whole, it may be said that whatever opposition to the slave-trade there was in the planting colonies was based principally on the political fear of insurrection.

Chapter III

THE FARMING COLONIES.

10. Character of these Colonies. 11. The Dutch Slave-Trade. 12. Restrictions in New York. 13. Restrictions in Pennsylvania and Delaware. 14. Restrictions in New Jersey. 15. General Character of these Restrictions.

10. ~Character of these Colonies.~ The colonies of this group, occupying the central portion of the English possessions, comprise those communities where, on account of climate, physical characteristics, and circumstances of settlement, slavery as an institution found but a narrow field for development. The climate was generally rather cool for the newly imported slaves, the soil was best suited to crops to which slave labor was poorly adapted, and the training and habits of the great body of settlers offered little chance for the growth of a slave system. These conditions varied, of course, in different colonies; but the general statement applies to all. These communities of small farmers and traders derived whatever opposition they had to the slave-trade from three sorts of motives,--economic, political, and moral. First, the importation of slaves did not pay, except to supply a moderate demand for household servants. Secondly, these colonies, as well as those in the South, had a wholesome political fear of a large servile population. Thirdly, the settlers of many of these colonies were of sterner moral fibre than the Southern cavaliers and adventurers, and, in the absence of great counteracting motives, were more easily led to oppose the institution and the trade. Finally, it must be noted that these colonies did not so generally regard themselves as temporary commercial investments as did Virginia and Carolina. Intending to found permanent States, these settlers from the first more carefully studied the ultimate interests of those States.

11. ~The Dutch Slave-Trade.~ The Dutch seem to have commenced the slave-trade to the American continent, the Middle colonies and some of the Southern receiving supplies from them. John Rolfe relates that the last of August, 1619, there came to Virginia "a dutch man of warre that sold us twenty Negars."[1] This was probably one of the ships of the numerous private Dutch trading-companies which early entered into and developed the lucrative African slave-trade. Ships sailed from Holland to Africa, got slaves in exchange for their goods, carried the slaves to the West Indies or Brazil, and returned home laden with sugar.[2] Through the enterprise of one of these trading-companies the settlement of New Amsterdam was begun, in 1614. In 1621 the private companies trading in the West were all merged into the Dutch West India Company, and given a monopoly of American trade. This company was very active, sending in four years 15,430 Negroes to Brazil,[3] carrying on war with Spain, supplying even the English plantations,[4] and gradually becoming the great slave carrier of the day.

The commercial supremacy of the Dutch early excited the envy and emulation of the English. The Navigation Ordinance of 1651 was aimed at them, and two wars were necessary to wrest the slave-trade from them and place it in the hands of the English. The final terms of peace among other things surrendered New Netherland to England, and opened the way for England to become henceforth the world's greatest slave-trader. Although the Dutch had thus commenced the continental slave-trade, they had not actually furnished a very large number of slaves to the English colonies outside the West Indies. A small trade had, by 1698, brought a few thousand to New York, and still fewer to New Jersey.[5] It was left to the English, with their strong policy in its favor, to develop this trade.

12. ~Restrictions in New York.~[6] The early ordinances of the Dutch, laying duties, generally of ten per cent, on slaves, probably proved burdensome to the trade, although this was not intentional.[7] The Biblical prohibition of slavery and the slave-trade, copied from New England codes into the Duke of York's Laws, had no practical application,[8] and the trade continued to be encouraged in the governors' instructions. In 1709 a duty of £3 was laid on Negroes from elsewhere than Africa.[9] This was aimed at West India slaves, and was prohibitive. By 1716 the duty on all slaves was £1 12½_s._, which was probably a mere revenue figure.[10] In 1728 a duty of 40_s._ was laid, to be continued until 1737.[11] It proved restrictive, however, and on the "humble petition of the Merchants and Traders of the City of Bristol" was disallowed in 1735, as "greatly prejudicial to the Trade and Navigation of this Kingdom."[12] Governor Cosby was also reminded that no duties on slaves payable by the importer were to be laid. Later, in 1753, the 40_s._ duty was restored, but under the increased trade of those days was not felt.[13] No further restrictions seem to have been attempted until 1785, when the sale of slaves in the State was forbidden.[14]

The chief element of restriction in this colony appears to have been the shrewd business sense of the traders, who never flooded the slave market, but kept a supply sufficient for the slowly growing demand. Between 1701 and 1726 only about 2,375 slaves were imported, and in 1774 the total slave population amounted to 21,149.[15] No restriction was ever put by New York on participation in the trade outside the colony, and in spite of national laws New York merchants continued to be engaged in this traffic even down to the Civil War.[16]

Vermont, who withdrew from New York in 1777, in her first Constitution[17] declared slavery illegal, and in 1786 stopped by law the sale and transportation of slaves within her boundaries.[18]

13. ~Restrictions in Pennsylvania and Delaware.~[19] One of the first American protests against the slave-trade came from certain German Friends, in 1688, at a Weekly Meeting held in Germantown, Pennsylvania. "These are the reasons," wrote "Garret henderich, derick up de graeff, Francis daniell Pastorius, and Abraham up Den graef," "why we are against the traffick of men-body, as followeth: Is there any that would be done or handled at this manner?... Now, tho they are black, we cannot conceive there is more liberty to have them slaves, as it is to have other white ones. There is a saying, that we shall doe to all men like as we will be done ourselves; making no difference of what generation, descent or colour they are. And those who steal or robb men, and those who buy or purchase them, are they not all alike?"[20] This little leaven helped slowly to work a revolution in the attitude of this great sect toward slavery and the slave-trade. The Yearly Meeting at first postponed the matter, "It having so General a Relation to many other Parts."[21] Eventually, however, in 1696, the Yearly Meeting advised "That Friends be careful not to encourage the bringing in of any more Negroes."[22] This advice was repeated in stronger terms for a quarter-century,[23] and by that time Sandiford, Benezet, Lay, and Woolman had begun their crusade. In 1754 the Friends took a step farther and made the purchase of slaves a matter of discipline.[24] Four years later the Yearly Meeting expressed itself clearly as "against every branch of this practice," and declared that if "any professing with us should persist to vindicate it, and be concerned in importing, selling or purchasing slaves, the respective Monthly Meetings to which they belong should manifest their disunion with such persons."[25] Further, manumission was recommended, and in 1776 made compulsory.[26] The effect of this attitude of the Friends was early manifested in the legislation of all the colonies where the sect was influential, and particularly in Pennsylvania.

One of the first duty acts (1710) laid a restrictive duty of 40_s._ on slaves, and was eventually disallowed.[27] In 1712 William Southeby petitioned the Assembly totally to abolish slavery. This the Assembly naturally refused to attempt; but the same year, in response to another petition "signed by many hands," they passed an "Act to prevent the Importation of Negroes and Indians,"[28]--the first enactment of its kind in America. This act was inspired largely by the general fear of insurrection which succeeded the "Negro-plot" of 1712 in New York. It declared: "Whereas, divers Plots and Insurrections have frequently happened, not only in the Islands but on the Main Land of _America_, by Negroes, which have been carried on so far that several of the inhabitants have been barbarously Murthered, an Instance whereof we have lately had in our Neighboring Colony of _New York_,"[29] etc. It then proceeded to lay a prohibitive duty of £20 on all slaves imported. These acts were quickly disposed of in

England. Three duty acts affecting Negroes, including the prohibitory act, were in 1713 disallowed, and it was directed that "the Dep^{ty} Govr Council and Assembly of Pensilvania, be & they are hereby Strictly Enjoyned & required not to permit the said Laws ... to be from henceforward put in Execution."[30] The Assembly repealed these laws, but in 1715 passed another laying a duty of £5, which was also eventually disallowed.[31] Other acts, the provisions of which are not clear, were passed in 1720 and 1722,[32] and in 1725-1726 the duty on Negroes was raised to the restrictive figure of £10.[33] This duty, for some reason not apparent, was lowered to £2 in 1729,[34] but restored again in 1761.[35] A struggle occurred over this last measure, the Friends petitioning for it, and the Philadelphia merchants against it, declaring that "We, the subscribers, ever desirous to extend the Trade of this Province, have seen, for some time past, the many inconveniencys the Inhabitants have suffer'd for want of Labourers and artificers, ... have for some time encouraged the importation of Negroes;" they prayed therefore at least for a delay in passing the measure.[36] The law, nevertheless, after much debate and altercation with the governor, finally passed.

These repeated acts nearly stopped the trade, and the manumission or sale of Negroes by the Friends decreased the number of slaves in the province. The rising spirit of independence enabled the colony, in 1773, to restore the prohibitive duty of £20 and make it perpetual.[37] After the Revolution unpaid duties on slaves were collected and the slaves registered,[38] and in 1780 an "Act for the gradual Abolition of Slavery" was passed.[39] As there were probably at no time before the war more than 11,000 slaves in Pennsylvania,[40] the task thus accomplished was not so formidable as in many other States. As it was, participation in the slave-trade outside the colony was not prohibited until 1788.[41]

It seems probable that in the original Swedish settlements along the Delaware slavery was prohibited.[42] This measure had, however, little practical effect; for as soon as the Dutch got control the slave-trade was opened, although, as it appears, to no large extent. After the fall of the Dutch Delaware came into English hands. Not until 1775 do we find any legislation on the slave-trade. In that year the colony attempted to prohibit the importation of slaves, but the governor vetoed the bill.[43] Finally, in 1776 by the Constitution, and in 1787 by law, importation and exportation were both prohibited.[44]

14. ~Restrictions in New Jersey.~[45] Although the freeholders of West New Jersey declared, in 1676, that "all and every Person and Persons Inhabiting the said Province, shall, as far as in us lies, be free from Oppression and Slavery,"[46] yet Negro slaves are early found in the colony.[47] The first restrictive measure was passed, after considerable friction between the Council and the House, in 1713; it laid a duty of £10, currency.[48] Governor Hunter explained to the Board of Trade that the bill was "calculated to Encourage the Importation of white Servants for the better Peopeling that Country."[49] How long this act continued does not appear; probably, not long. No further legislation was enacted until 1762 or 1763, when a prohibitive duty was laid on account of "the inconvenience the Province is exposed to in lying open to the free importation of Negros, when the Provinces on each side have laid duties on them."[50] The Board of Trade declared that while they did not object to "the Policy of imposing a reasonable duty," they could not assent to this, and the act was disallowed.[51] The Act of 1769 evaded the technical objection of the Board of Trade, and laid a duty of £15 on the first purchasers of Negroes, because, as the act declared, "Duties on the Importation of Negroes in several of the neighbouring Colonies hath, on Experience, been found beneficial in the Introduction of sober, industrious Foreigners."[52] In 1774 a bill which, according to the report of the Council to Governor Morris, "plainly intended an entire Prohibition of all Slaves being imported from foreign Parts," was thrown out by the Council.[53] Importation was finally prohibited in 1786.[54]

15. ~General Character of these Restrictions.~ The main difference in motive between the restrictions which the planting and the farming colonies put on the African slave-trade, lay in the fact that the former limited it mainly from fear of insurrection, the latter mainly because it did not pay. Naturally, the latter motive worked itself out with much less legislation than the former; for this reason, and because they held a smaller number of slaves, most of these colonies have fewer actual statutes than the Southern colonies. In Pennsylvania alone did this general economic revolt against the trade acquire a distinct moral tinge. Although even here the institution was naturally doomed, yet the clear moral insight of the Quakers checked the trade much earlier than would otherwise have happened. We may say, then, that the farming colonies checked the slave-trade primarily from economic motives.

Chapter IV

THE TRADING COLONIES.

16. Character of these Colonies. 17. New England and the Slave-Trade. 18. Restrictions in New Hampshire. 19. Restrictions in Massachusetts. 20. Restrictions in Rhode Island. 21. Restrictions in Connecticut. 22. General Character of these Restrictions.

16. ~Character of these Colonies.~ The rigorous climate of New England, the character of her settlers, and their pronounced political views gave slavery an even slighter basis here than in the Middle colonies. The significance of New England in the African slave-trade does not therefore lie in the fact that she early discountenanced the system of slavery and stopped importation; but rather in the fact that her citizens, being the traders of the New World, early took part in the carrying slave-trade and furnished slaves to the other colonies. An inquiry, therefore, into the efforts of the New England colonies to suppress the slave-trade would fall naturally into two parts: first, and chiefly, an investigation of the efforts to stop the participation of citizens in the carrying slave-trade; secondly, an examination of the efforts made to banish the slave-trade from New England soil.

17. ~New England and the Slave-Trade.~ Vessels from Massachusetts,[1] Rhode Island,[2] Connecticut,[3] and, to a less extent, from New Hampshire,[4] were early and largely engaged in the carrying slave-trade. "We know," said Thomas Pemberton in 1795, "that a large trade to Guinea was carried on for many years by the citizens of Massachusetts Colony, who were the proprietors of the vessels and their cargoes, out and home. Some of the slaves purchased in Guinea, and I suppose the greatest part of them, were sold in the West Indies."[5] Dr. John Eliot asserted that "it made a considerable branch of our commerce.... It declined very little till the Revolution."[6] Yet the trade of this colony was said not to equal that of Rhode Island. Newport was the mart for slaves offered for sale in the North, and a point of reshipment for all slaves. It was principally this trade that raised Newport to her commercial importance in the eighteenth century.[7] Connecticut, too, was an important slave-trader, sending large numbers of horses and other commodities to the West Indies in exchange for slaves, and selling the slaves in other colonies.

This trade formed a perfect circle. Owners of slavers carried slaves to South Carolina, and brought home naval stores for their ship-building; or to the West Indies, and brought home molasses; or to other colonies, and brought home hogsheads. The molasses was made into the highly prized New England rum, and shipped in these hogsheads to Africa for more slaves.[8] Thus, the rum-distilling industry indicates to some extent the activity of New England in the slave-trade. In May, 1752, one Captain Freeman found so many slavers fitting out that, in spite of the large importations of molasses, he could get no rum for his vessel.[9]

In Newport alone twenty-two stills were at one time running continuously;[10] and Massachusetts annually distilled 15,000 hogsheads of molasses into this "chief manufacture."[11]

Turning now to restrictive measures, we must first note the measures of the slave-consuming colonies which tended to limit the trade. These measures, however, came comparatively late, were enforced with varying degrees of efficiency, and did not seriously affect the slave-trade before the Revolution. The moral sentiment of New England put some check upon the trade. Although in earlier times the most respectable people took ventures in slave-trading voyages, yet there gradually arose a moral sentiment which tended to make the business somewhat disreputable.[12] In the line, however, of definite legal enactments to stop New England citizens from carrying slaves from Africa to any place in the world, there were, before the Revolution, none. Indeed, not until the years 1787-1788 was slave-trading in itself an indictable offence in any New England State.

The particular situation in each colony, and the efforts to restrict the small importing slave-trade of New England, can best be studied in a separate view of each community.

18. ~Restrictions in New Hampshire.~ The statistics of slavery in New Hampshire show how weak an institution it always was in that colony.[13] Consequently, when the usual instructions were sent to Governor Wentworth as to the encouragement he must give to the slave-trade, the House replied: "We have considered his Maj^{ties} Instruction relating to an Impost on Negroes & Felons, to which this House answers, that there never was any duties laid on either, by this Goverm^{t}, and so few bro't in that it would not be worth the Publick notice, so as to make an act concerning them."[14] This remained true for the whole history of the colony. Importation was never stopped by actual enactment, but was eventually declared contrary to the Constitution of 1784.[15] The participation of citizens in the trade appears never to have been forbidden.

19. ~Restrictions in Massachusetts.~ The early Biblical codes of Massachusetts confined slavery to "lawfull Captives taken in iust warres, & such strangers as willingly selle themselves or are sold to us."[16] The stern Puritanism of early days endeavored to carry this out literally, and consequently when a certain Captain Smith, about 1640, attacked an African village and brought some of the unoffending natives home, he was promptly arrested. Eventually, the General Court ordered the Negroes sent home at the colony's expense, "conceiving themselues bound by ye first oportunity to bear witnes against ye haynos & crying sinn of manstealing, as also to P'scribe such timely redresse for what is past, & such a law for ye future as may sufficiently deterr all oth^{r}s belonging to us to have to do in such vile & most odious courses, iustly abhored of all good & iust men."[17]

The temptation of trade slowly forced the colony from this high moral ground. New England ships were early found in the West Indian slave-trade, and the more the carrying trade developed, the more did the profits of this branch of it attract Puritan captains. By the beginning of the eighteenth century the slave-trade was openly recognized as legitimate commerce; cargoes came regularly to Boston, and "The merchants of Boston quoted negroes, like any other merchandise demanded by their correspondents."[18] At the same time, the Puritan conscience began to rebel against the growth of actual slavery on New England soil. It was a much less violent wrenching of moral ideas of right and wrong to allow Massachusetts men to carry slaves to South Carolina than to allow cargoes to come into Boston, and become slaves in Massachusetts. Early in the eighteenth century, therefore, opposition arose to the further importation of Negroes, and in 1705 an act "for the Better Preventing of a Spurious and Mixt Issue," laid a restrictive duty of £4 on all slaves imported.[19] One provision of this act plainly illustrates the attitude of Massachusetts: like the acts of many of the New England colonies, it allowed a rebate of the whole duty on re-exportation. The harbors of New England were thus offered as a free exchange-mart for slavers. All the duty acts of the Southern and Middle colonies allowed a rebate of one-half or three-fourths of the duty on the re-exportation of the slave, thus laying a small tax on even temporary importation.

The Act of 1705 was evaded, but it was not amended until 1728, when the penalty for evasion was raised to £100.[20] The act remained in force, except possibly for one period of four years, until 1749. Meantime the movement against importation grew. A bill "for preventing the Importation of Slaves into this Province" was introduced in the Legislature in 1767, but after strong opposition and disagreement between House and Council it was dropped.[21] In 1771 the struggle was renewed. A similar bill passed, but was vetoed by Governor Hutchinson.[22] The imminent war and the discussions incident to it had now more and more aroused public opinion, and there were repeated attempts to gain executive consent to a prohibitory law. In 1774 such a bill was twice passed, but never received assent.[23]

The new Revolutionary government first met the subject in the case of two Negroes captured on the high seas, who were advertised for sale at Salem. A resolution was introduced into the Legislature, directing the release of the Negroes, and declaring "That the selling and enslaving the human species is a direct violation of the natural rights alike vested in all men by their Creator,

and utterly inconsistent with the avowed principles on which this, and the other United States, have carried their struggle for liberty even to the last appeal." To this the Council would not consent; and the resolution, as finally passed, merely forbade the sale or ill-treatment of the Negroes.[24] Committees on the slavery question were appointed in 1776 and 1777,[25] and although a letter to Congress on the matter, and a bill for the abolition of slavery were reported, no decisive action was taken.

All such efforts were finally discontinued, as the system was already practically extinct in Massachusetts and the custom of importation had nearly ceased. Slavery was eventually declared by judicial decision to have been abolished.[26] The first step toward stopping the participation of Massachusetts citizens in the slave-trade outside the State was taken in 1785, when a committee of inquiry was appointed by the Legislature.[27] No act was, however, passed until 1788, when participation in the trade was prohibited, on pain of £50 forfeit for every slave and £200 for every ship engaged.[28]

20. ~Restrictions in Rhode Island.~ In 1652 Rhode Island passed a law designed to prohibit life slavery in the colony. It declared that "Whereas, there is a common course practised amongst English men to buy negers, to that end they may have them for service or slaves forever; for the preventinge of such practices among us, let it be ordered, that no blacke mankind or white being forced by covenant bond, or otherwise, to serve any man or his assighnes longer than ten yeares, or untill they come to bee twentie four yeares of age, if they bee taken in under fourteen, from the time of their cominge within the liberties of this Collonie. And at the end or terme of ten yeares to sett them free, as the manner is with the English servants. And that man that will not let them goe free, or shall sell them away elsewhere, to that end that they may bee enslaved to others for a long time, hee or they shall forfeit to the Collonie forty pounds."[29]

This law was for a time enforced,[30] but by the beginning of the eighteenth century it had either been repealed or become a dead letter; for the Act of 1708 recognized perpetual slavery, and laid an impost of £3 on Negroes imported.[31] This duty was really a tax on the transport trade, and produced a steady income for twenty years.[32] From the year 1700 on, the citizens of this State engaged more and more in the carrying trade, until Rhode Island became the greatest slave-trader in America. Although she did not import many slaves for her own use, she became the clearing-house for the trade of other colonies. Governor Cranston, as early as 1708, reported that between 1698 and 1708 one hundred and three vessels were built in the State, all of which were trading to the West Indies and the Southern colonies.[33] They took out lumber and brought back molasses, in most cases making a slave voyage in between. From this, the trade grew. Samuel Hopkins, about 1770, was shocked at the state of the trade: more than thirty distilleries were running in the colony, and one hundred and fifty vessels were in the slave-trade.[34] "Rhode Island," said he, "has been more deeply interested in the slave-trade, and has enslaved more Africans than any other colony in New England." Later, in 1787, he wrote: "The inhabitants of Rhode Island, especially those of Newport, have had by far the greater share in this traffic, of all these United States. This trade in human species has been the first wheel of commerce in Newport, on which every other movement in business has chiefly depended. That town has been built up, and flourished in times past, at the expense of the blood, the liberty, and happiness of the poor Africans; and the inhabitants have lived on this, and by it have gotten most of their wealth and riches."[35]

The Act of 1708 was poorly enforced. The "good intentions" of its framers "were wholly frustrated" by the clandestine "hiding and conveying said negroes out of the town [Newport] into the country, where they lie concealed."[36] The act was accordingly strengthened by the Acts of 1712 and 1715, and made to apply to importations by land as well as by sea.[37] The Act of 1715, however, favored the trade by admitting African Negroes free of duty. The chaotic state of Rhode Island did not allow England often to review her legislation; but as soon as the Act of 1712 came to notice it was disallowed, and accordingly repealed in 1732.[38] Whether the Act of 1715 remained, or whether any other duty act was passed, is not clear.

While the foreign trade was flourishing, the influence of the Friends and of other causes eventually led to a movement against slavery as a local institution. Abolition societies multiplied, and in 1770 an abolition bill was ordered by the Assembly, but it was never passed.[39] Four years later the city of Providence resolved that "as personal liberty is an essential part of the natural rights of mankind," the importation of slaves and the system of slavery should cease in the colony.[40] This movement finally resulted, in 1774, in an act "prohibiting the importation of Negroes into this Colony,"--a law which curiously illustrated the attitude of Rhode Island toward the slave-trade. The preamble of the act declared: "Whereas, the inhabitants of America are generally engaged in the preservation of their own rights and liberties, among which, that of personal freedom must be considered as the greatest; as those who are desirous of enjoying all the advantages of liberty themselves, should be willing to extend personal liberty to others;--Therefore," etc. The statute then proceeded to enact "that for the future, no negro or mulatto slave shall be brought into this colony; and in case any slave shall hereafter be brought in, he or she shall be, and are hereby, rendered immediately free...." The

logical ending of such an act would have been a clause prohibiting the participation of Rhode Island citizens in the slave-trade. Not only was such a clause omitted, but the following was inserted instead: "Provided, also, that nothing in this act shall extend, or be deemed to extend, to any negro or mulatto slave brought from the coast of Africa, into the West Indies, on board any vessel belonging to this colony, and which negro or mulatto slave could not be disposed of in the West Indies, but shall be brought into this colony. Provided, that the owner of such negro or mulatto slave give bond ... that such negro or mulatto slave shall be exported out of the colony, within one year from the date of such bond; if such negro or mulatto be alive, and in a condition to be removed."[41]

In 1779 an act to prevent the sale of slaves out of the State was passed,[42] and in 1784, an act gradually to abolish slavery.[43] Not until 1787 did an act pass to forbid participation in the slave-trade. This law laid a penalty of £100 for every slave transported and £1000 for every vessel so engaged.[44]

21. ~Restrictions in Connecticut.~ Connecticut, in common with the other colonies of this section, had a trade for many years with the West Indian slave markets; and though this trade was much smaller than that of the neighboring colonies, yet many of her citizens were engaged in it. A map of Middletown at the time of the Revolution gives, among one hundred families, three slave captains and "three notables" designated as "slave-dealers."[45]

The actual importation was small,[46] and almost entirely unrestricted before the Revolution, save by a few light, general duty acts. In 1774 the further importation of slaves was prohibited, because "the increase of slaves in this Colony is injurious to the poor and inconvenient." The law prohibited importation under any pretext by a penalty of £100 per slave.[47] This was re-enacted in 1784, and provisions were made for the abolition of slavery.[48] In 1788 participation in the trade was forbidden, and the penalty placed at £50 for each slave and £500 for each ship engaged.[49]

22. ~General Character of these Restrictions.~ Enough has already been said to show, in the main, the character of the opposition to the slave-trade in New England. The system of slavery had, on this soil and amid these surroundings, no economic justification, and the small number of Negroes here furnished no political arguments against them. The opposition to the importation was therefore from the first based solely on moral grounds, with some social arguments. As to the carrying trade, however, the case was different. Here, too, a feeble moral opposition was early aroused, but it was swept away by the immense economic advantages of the slave traffic to a thrifty seafaring community of traders. This trade no moral suasion, not even the strong "Liberty" cry of the Revolution, was able wholly to suppress, until the closing of the West Indian and Southern markets cut off the demand for slaves.

[8] A typical voyage is that of the brigantine "Sanderson" of Newport. She was fitted out in March, 1752, and carried, beside the captain, two mates and six men, and a cargo of 8,220 gallons of rum, together with "African" iron, flour, pots, tar, sugar, and provisions, shackles, shirts, and water. Proceeding to Africa, the captain after some difficulty sold his cargo for slaves, and in April, 1753, he is expected in Barbadoes, as the consignees write. They also state that slaves are selling at £33 to £56 per head in lots. After a stormy and dangerous voyage, Captain Lindsay arrived, June 17, 1753, with fifty-six slaves, "all in helth & fatt." He also had 40 oz. of gold dust, and 8 or 9 cwt. of pepper. The net proceeds of the sale of all this was £1,324 3_d._ The captain then took on board 55 hhd. of molasses and 3 hhd. 27 bbl. of sugar, amounting to £911 77_s._ 2½_d._, received bills on Liverpool for the balance, and returned in safety to Rhode Island. He had done so well that he was immediately given a new ship and sent to Africa again. _American Historical Record_, I. 315-9, 338-42.

Chapter V

THE PERIOD OF THE REVOLUTION. 1774-1787.

23. The Situation in 1774. 24. The Condition of the Slave-Trade. 25. The Slave-Trade and the "Association." 26. The Action of the Colonies. 27. The Action of the Continental Congress. 28. Reception of the Slave-Trade Resolution. 29. Results of the Resolution. 30. The Slave-Trade and Public Opinion after the War. 31. The Action of the Confederation.

23. ~The Situation in 1774.~ In the individual efforts of the various colonies to suppress the African slave-trade there may be traced certain general movements. First, from 1638 to 1664, there was a tendency to take a high moral stand against the traffic. This is illustrated in the laws of New England, in the plans for the settlement of Delaware and, later, that of Georgia, and in the protest of the German Friends. The second period, from about 1664 to 1760, has no general unity, but is marked by statutes laying duties varying in design from encouragement to absolute prohibition, by some cases of moral opposition, and by the slow but steady growth of a spirit unfavorable to the long continuance of the trade. The last colonial period, from about 1760 to 1787, is one of pronounced effort to regulate, limit, or totally prohibit the traffic. Beside these general movements, there are many waves of legislation, easily distinguishable, which rolled over several or all of the colonies at various times, such as the series of high duties following the Assiento, and the acts inspired by various Negro "plots."

Notwithstanding this, the laws of the colonies before 1774 had no national unity, the peculiar circumstances of each colony determining its legislation. With the outbreak of the Revolution came unison in action with regard to the slave-trade, as with regard to other matters, which may justly be called national. It was, of course, a critical period,--a period when, in the rapid upheaval of a few years, the complicated and diverse forces of decades meet, combine, act, and react, until the resultant seems almost the work of chance. In the settlement of the fate of slavery and the slave-trade, however, the real crisis came in the calm that succeeded the storm, in that day when, in the opinion of most men, the question seemed already settled. And indeed it needed an exceptionally clear and discerning mind, in 1787, to deny that slavery and the slave-trade in the United States of America were doomed to early annihilation. It seemed certainly a legitimate deduction from the history of the preceding century to conclude that, as the system had risen, flourished, and fallen in Massachusetts, New York, and Pennsylvania, and as South Carolina, Virginia, and Maryland were apparently following in the same legislative path, the next generation would in all probability witness the last throes of the system on our soil.

To be sure, the problem had its uncertain quantities. The motives of the law-makers in South Carolina and Pennsylvania were dangerously different; the century of industrial expansion was slowly dawning and awakening that vast economic revolution in which American slavery was to play so prominent and fatal a rôle; and, finally, there were already in the South faint signs of a changing moral attitude toward slavery, which would no longer regard the system as a temporary makeshift, but rather as a permanent though perhaps unfortunate necessity. With regard to the slave-trade, however, there appeared to be substantial unity of opinion; and there were, in 1787, few things to indicate that a cargo of five hundred African slaves would openly be landed in Georgia in 1860.

24. ~The Condition of the Slave-Trade.~ In 1760 England, the chief slave-trading nation, was sending on an average to Africa 163 ships annually, with a tonnage of 18,000 tons, carrying exports to the value of £163,818. Only about twenty of these ships regularly returned to England. Most of them carried slaves to the West Indies, and returned laden with sugar and other products. Thus may be formed some idea of the size and importance of the slave-trade at that time, although for a complete view we must add to this the trade under the French, Portuguese, Dutch, and Americans. The trade fell off somewhat toward 1770, but was flourishing again when the Revolution brought a sharp and serious check upon it, bringing down the number of English slavers, clearing, from 167 in 1774 to 28 in 1779, and the tonnage from 17,218 to 3,475 tons. After the war the trade gradually recovered, and by 1786 had reached nearly its former extent. In 1783 the British West Indies received 16,208 Negroes from Africa, and by 1787 the importation had increased to 21,023. In this latter year it was estimated that the British were taking annually from Africa 38,000 slaves; the French, 20,000; the Portuguese, 10,000; the Dutch and Danes, 6,000; a total of 74,000. Manchester alone sent £180,000 annually in goods to Africa in exchange for Negroes.[1]

25. ~The Slave-Trade and the "Association."~ At the outbreak of the Revolution six main reasons, some of which were old and of slow growth, others peculiar to the abnormal situation of that time, led to concerted action against the slave-trade. The first reason was the economic failure of slavery in the Middle and Eastern colonies; this gave rise to the presumption that like failure awaited the institution in the South. Secondly, the new philosophy of "Freedom" and the "Rights of man," which formed the corner-stone of the Revolution, made the dullest realize that, at the very least, the slave-trade and a struggle for "liberty" were not consistent. Thirdly, the old fear of slave insurrections, which had long played so prominent a part in legislation, now gained new power from the imminence of war and from the well-founded fear that the British might incite servile uprisings. Fourthly, nearly all the American slave markets were, in 1774-1775, overstocked with slaves, and consequently many of the strongest partisans of the system were "bulls" on the market, and desired to raise the value of their slaves by at least a temporary stoppage of the trade. Fifthly, since the vested interests of the slave-trading merchants were liable to be swept away by the opening of hostilities, and since the price of slaves was low,[2] there was from this quarter little active opposition to a cessation of the trade for a season. Finally, it was long a

favorite belief of the supporters of the Revolution that, as English exploitation of colonial resources had caused the quarrel, the best weapon to bring England to terms was the economic expedient of stopping all commercial intercourse with her. Since, then, the slave-trade had ever formed an important part of her colonial traffic, it was one of the first branches of commerce which occurred to the colonists as especially suited to their ends.[3]

Such were the complicated moral, political, and economic motives which underlay the first national action against the slave-trade. This action was taken by the "Association," a union of the colonies entered into to enforce the policy of stopping commercial intercourse with England. The movement was not a great moral protest against an iniquitous traffic; although it had undoubtedly a strong moral backing, it was primarily a temporary war measure.

26. ~The Action of the Colonies.~ The earlier and largely abortive attempts to form non-intercourse associations generally did not mention slaves specifically, although the Virginia House of Burgesses, May 11, 1769, recommended to merchants and traders, among other things, to agree, "That they will not import any slaves, or purchase any imported after the first day of November next, until the said acts are repealed."[4] Later, in 1774, when a Faneuil Hall meeting started the first successful national attempt at non-intercourse, the slave-trade, being at the time especially flourishing, received more attention. Even then slaves were specifically mentioned in the resolutions of but three States. Rhode Island recommended a stoppage of "all trade with Great Britain, Ireland, Africa and the West Indies."[5] North Carolina, in August, 1774, resolved in convention "That we will not import any slave or slaves, or purchase any slave or slaves, imported or brought into this Province by others, from any part of the world, after the first day of _November_ next."[6] Virginia gave the slave-trade especial prominence, and was in reality the leading spirit to force her views on the Continental Congress. The county conventions of that colony first took up the subject. Fairfax County thought "that during our present difficulties and distress, no slaves ought to be imported," and said: "We take this opportunity of declaring our most earnest wishes to see an entire stop forever put to such a wicked, cruel, and unnatural trade."[7] Prince George and Nansemond Counties resolved "That the _African_ trade is injurious to this Colony, obstructs the population of it by freemen, prevents manufacturers and other useful emigrants from _Europe_ from settling amongst us, and occasions an annual increase of the balance of trade against this Colony."[8] The Virginia colonial convention, August, 1774, also declared: "We will neither ourselves import, nor purchase any slave or slaves imported by any other person, after the first day of _November_ next, either from _Africa_, the _West Indies_, or any other place."[9]

In South Carolina, at the convention July 6, 1774, decided opposition to the non-importation scheme was manifested, though how much this was due to the slave-trade interest is not certain. Many of the delegates wished at least to limit the powers of their representatives, and the Charleston Chamber of Commerce flatly opposed the plan of an "Association." Finally, however, delegates with full powers were sent to Congress. The arguments leading to this step were not in all cases on the score of patriotism; a Charleston manifesto argued: "The planters are greatly in arrears to the merchants; a stoppage of importation would give them all an opportunity to extricate themselves from debt. The merchants would have time to settle their accounts, and be ready with the return of liberty to renew trade."[10]

27. ~The Action of the Continental Congress.~ The first Continental Congress met September 5, 1774, and on September 22 recommended merchants to send no more orders for foreign goods.[11] On September 27 "Mr. Lee made a motion for a non-importation," and it was unanimously resolved to import no goods from Great Britain after December 1, 1774.[12] Afterward, Ireland and the West Indies were also included, and a committee consisting of Low of New York, Mifflin of Pennsylvania, Lee of Virginia, and Johnson of Connecticut were appointed "to bring in a Plan for carrying into Effect the Non-importation, Non-consumption, and Non-exportation resolved on."[13] The next move was to instruct this committee to include in the proscribed articles, among other things, "Molasses, Coffee or Piemento from the _British_ Plantations or from _Dominica_,"--a motion which cut deep into the slave-trade circle of commerce, and aroused some opposition. "Will, can, the people bear a total interruption of the West India trade?" asked Low of New York; "Can they live without rum, sugar, and molasses? Will not this impatience and vexation defeat the measure?"[14]

The committee finally reported, October 12, 1774, and after three days' discussion and amendment the proposal passed. This document, after a recital of grievances, declared that, in the opinion of the colonists, a non-importation agreement would best secure redress; goods from Great Britain, Ireland, the East and West Indies, and Dominica were excluded; and it was resolved that "We will neither import, nor purchase any Slave imported after the First Day of _December_ next; after which Time, we will wholly discontinue the Slave Trade, and will neither be concerned in it ourselves, nor will we hire our Vessels, nor sell our Commodities or Manufactures to those who are concerned in it."[15]

Strong and straightforward as this resolution was, time unfortunately proved that it meant very little. Two years later, in this same Congress, a decided opposition was manifested to branding the slave-trade as inhuman, and it was thirteen years before South Carolina stopped the slave-trade or Massachusetts prohibited her citizens from engaging in it. The passing of so strong a resolution must be explained by the motives before given, by the character of the drafting committee, by the desire of America in this crisis to appear well before the world, and by the natural moral enthusiasm aroused by the imminence of a great national struggle.

28. ~Reception of the Slave-Trade Resolution.~ The unanimity with which the colonists received this "Association" is not perhaps as remarkable as the almost entire absence of comment on the radical slave-trade clause. A Connecticut town-meeting in December, 1774, noticed "with singular pleasure ... the second Article of the Association, in which it is agreed to import no more Negro Slaves."[16] This comment appears to have been almost the only one. There were in various places some evidences of disapproval; but only in the State of Georgia was this widespread and determined, and based mainly on the slave-trade clause.[17] This opposition delayed the ratification meeting until January 18, 1775, and then delegates from but five of the twelve parishes appeared, and many of these had strong instructions against the approval of the plan. Before this meeting could act, the governor adjourned it, on the ground that it did not represent the province. Some of the delegates signed an agreement, one article of which promised to stop the importation of slaves March 15, 1775, i.e., four months later than the national "Association" had directed. This was not, of course, binding on the province; and although a town like Darien might declare "our disapprobation and abhorrence of the unnatural practice of Slavery in _America_"[18] yet the powerful influence of Savannah was "not likely soon to give matters a favourable turn. The importers were mostly against any interruption, and the consumers very much divided."[19] Thus the efforts of this Assembly failed, their resolutions being almost unknown, and, as a gentleman writes, "I hope for the honour of the Province ever will remain so."[20] The delegates to the Continental Congress selected by this rump assembly refused to take their seats. Meantime South Carolina stopped trade with Georgia, because it "hath not acceded to the Continental Association,"[21] and the single Georgia parish of St. Johns appealed to the second Continental Congress to except it from the general boycott of the colony. This county had already resolved not to "purchase any Slave imported at _Savannah_ (large Numbers of which we understand are there expected) till the Sense of Congress shall be made known to us."[22]

May 17, 1775, Congress resolved unanimously "That all exportations to _Quebec_, _Nova-Scotia_, the Island of _St. John's_, _Newfoundland_, _Georgia_, except the Parish of _St. John's_, and to _East_ and _West Florida_, immediately cease."[23] These measures brought the refractory colony to terms, and the Provincial Congress, July 4, 1775, finally adopted the "Association," and resolved, among other things, "That we will neither import or purchase any Slave imported from Africa, or elsewhere, after this day."[24]

The non-importation agreement was in the beginning, at least, well enforced by the voluntary action of the loosely federated nation. The slave-trade clause seems in most States to have been observed with the others. In South Carolina "a cargo of near three hundred slaves was sent out of the Colony by the consignee, as being interdicted by the second article of the Association."[25] In Virginia the vigilance committee of Norfolk "hold up for your just indignation Mr. _John Brown_, Merchant, of this place," who has several times imported slaves from Jamaica; and he is thus publicly censured "to the end that all such foes to the rights of _British America_ may be publickly known ... as the enemies of _American_ Liberty, and that every person may henceforth break off all dealings with him."[26]

29. ~Results of the Resolution.~ The strain of war at last proved too much for this voluntary blockade, and after some hesitancy Congress, April 3, 1776, resolved to allow the importation of articles not the growth or manufacture of Great Britain, except tea. They also voted "That no slaves be imported into any of the thirteen United Colonies."[27] This marks a noticeable change of attitude from the strong words of two years previous: the former was a definitive promise; this is a temporary resolve, which probably represented public opinion much better than the former. On the whole, the conclusion is inevitably forced on the student of this first national movement against the slave-trade, that its influence on the trade was but temporary and insignificant, and that at the end of the experiment the outlook for the final suppression of the trade was little brighter than before. The whole movement served as a sort of social test of the power and importance of the slave-trade, which proved to be far more powerful than the platitudes of many of the Revolutionists had assumed.

The effect of the movement on the slave-trade in general was to begin, possibly a little earlier than otherwise would have been the case, that temporary breaking up of the trade which the war naturally caused. "There was a time, during the late war," says Clarkson, "when the slave trade may be considered as having been nearly abolished."[28] The prices of slaves rose correspondingly high, so that smugglers made fortunes.[29] It is stated that in the years 1772-1778 slave merchants of Liverpool

failed for the sum of £710,000.[30] All this, of course, might have resulted from the war, without the "Association;" but in the long run the "Association" aided in frustrating the very designs which the framers of the first resolve had in mind; for the temporary stoppage in the end created an extraordinary demand for slaves, and led to a slave-trade after the war nearly as large as that before.

30. ~The Slave-Trade and Public Opinion after the War.~ The Declaration of Independence showed a significant drift of public opinion from the firm stand taken in the "Association" resolutions. The clique of political philosophers to which Jefferson belonged never imagined the continued existence of the country with slavery. It is well known that the first draft of the Declaration contained a severe arraignment of Great Britain as the real promoter of slavery and the slave-trade in America. In it the king was charged with waging "cruel war against human nature itself, violating its most sacred rights of life and liberty in the persons of a distant people who never offended him, captivating and carrying them into slavery in another hemisphere, or to incur miserable death in their transportation thither. This piratical warfare, the opprobrium of _infidel_ powers, is the warfare of the _Christian_ king of Great Britain. Determined to keep open a market where _men_ should be bought and sold, he has prostituted his negative for suppressing every legislative attempt to prohibit or to restrain this execrable commerce. And that this assemblage of horrors might want no fact of distinguished die, he is now exciting those very people to rise in arms among us, and to purchase that liberty of which he has deprived them, by murdering the people on whom he also obtruded them: thus paying off former crimes committed against the _liberties_ of one people with crimes which he urges them to commit against the _lives_ of another."[31]

To this radical and not strictly truthful statement, even the large influence of the Virginia leaders could not gain the assent of the delegates in Congress. The afflatus of 1774 was rapidly subsiding, and changing economic conditions had already led many to look forward to a day when the slave-trade could successfully be reopened. More important than this, the nation as a whole was even less inclined now than in 1774 to denounce the slave-trade uncompromisingly. Jefferson himself says that this clause "was struck out in complaisance to South Carolina and Georgia, who had never attempted to restrain the importation of slaves, and who, on the contrary, still wished to continue it. Our northern brethren also, I believe," said he, "felt a little tender under those censures; for though their people had very few slaves themselves, yet they had been pretty considerable carriers of them to others."[32]

As the war slowly dragged itself to a close, it became increasingly evident that a firm moral stand against slavery and the slave-trade was not a probability. The reaction which naturally follows a period of prolonged and exhausting strife for high political principles now set in. The economic forces of the country, which had suffered most, sought to recover and rearrange themselves; and all the selfish motives that impelled a bankrupt nation to seek to gain its daily bread did not long hesitate to demand a reopening of the profitable African slave-trade. This demand was especially urgent from the fact that the slaves, by pillage, flight, and actual fighting, had become so reduced in numbers during the war that an urgent demand for more laborers was felt in the South.

Nevertheless, the revival of the trade was naturally a matter of some difficulty, as the West India circuit had been cut off, leaving no resort except to contraband traffic and the direct African trade. The English slave-trade after the peace "returned to its former state," and was by 1784 sending 20,000 slaves annually to the West Indies.[33] Just how large the trade to the continent was at this time there are few means of ascertaining; it is certain that there was a general reopening of the trade in the Carolinas and Georgia, and that the New England traders participated in it. This traffic undoubtedly reached considerable proportions; and through the direct African trade and the illicit West India trade many thousands of Negroes came into the United States during the years 1783-1787.[34]

Meantime there was slowly arising a significant divergence of opinion on the subject. Probably the whole country still regarded both slavery and the slave-trade as temporary; but the Middle States expected to see the abolition of both within a generation, while the South scarcely thought it probable to prohibit even the slave-trade in that short time. Such a difference might, in all probability, have been satisfactorily adjusted, if both parties had recognized the real gravity of the matter. As it was, both regarded it as a problem of secondary importance, to be solved after many other more pressing ones had been disposed of. The anti-slavery men had seen slavery die in their own communities, and expected it to die the same way in others, with as little active effort on their own part. The Southern planters, born and reared in a slave system, thought that some day the system might change, and possibly disappear; but active effort to this end on their part was ever farthest from their thoughts. Here, then, began that fatal policy toward slavery and the slave-trade that characterized the nation for three-quarters of a century, the policy of _laissez-faire, laissez-passer_.

31. ~The Action of the Confederation.~ The slave-trade was hardly touched upon in the Congress of the Confederation, except in the ordinance respecting the capture of slaves, and on the occasion of the Quaker petition against the trade, although, during the

debate on the Articles of Confederation, the counting of slaves as well as of freemen in the apportionment of taxes was urged as a measure that would check further importation of Negroes. "It is our duty," said Wilson of Pennsylvania, "to lay every discouragement on the importation of slaves; but this amendment [i.e., to count two slaves as one freeman] would give the _jus trium liberorum_ to him who would import slaves."[35] The matter was finally compromised by apportioning requisitions according to the value of land and buildings.

After the Articles went into operation, an ordinance in regard to the recapture of fugitive slaves provided that, if the capture was made on the sea below high-water mark, and the Negro was not claimed, he should be freed. Matthews of South Carolina demanded the yeas and nays on this proposition, with the result that only the vote of his State was recorded against it.[36]

On Tuesday, October 3, 1783, a deputation from the Yearly Meeting of the Pennsylvania, New Jersey, and Delaware Friends asked leave to present a petition. Leave was granted the following day,[37] but no further minute appears. According to the report of the Friends, the petition was against the slave-trade; and "though the Christian rectitude of the concern was by the Delegates generally acknowledged, yet not being vested with the powers of legislation, they declined promoting any public remedy against the gross national iniquity of trafficking in the persons of fellow-men."[38]

The only legislative activity in regard to the trade during the Confederation was taken by the individual States.[39] Before 1778 Connecticut, Vermont, Pennsylvania, Delaware, and Virginia had by law stopped the further importation of slaves, and importation had practically ceased in all the New England and Middle States, including Maryland. In consequence of the revival of the slave-trade after the War, there was then a lull in State activity until 1786, when North Carolina laid a prohibitive duty, and South Carolina, a year later, began her series of temporary prohibitions. In 1787-1788 the New England States forbade the participation of their citizens in the traffic. It was this wave of legislation against the traffic which did so much to blind the nation as to the strong hold which slavery still had on the country.

Chapter VI

THE FEDERAL CONVENTION. 1787.

32. The First Proposition. 33. The General Debate. 34. The Special Committee and the "Bargain." 35. The Appeal to the Convention. 36. Settlement by the Convention. 37. Reception of the Clause by the Nation. 38. Attitude of the State Conventions. 39. Acceptance of the Policy.

32. ~The First Proposition.~ Slavery occupied no prominent place in the Convention called to remedy the glaring defects of the Confederation, for the obvious reason that few of the delegates thought it expedient to touch a delicate subject which, if let alone, bade fair to settle itself in a manner satisfactory to all. Consequently, neither slavery nor the slave-trade is specifically mentioned in the delegates' credentials of any of the States, nor in Randolph's, Pinckney's, or Hamilton's plans, nor in Paterson's propositions. Indeed, the debate from May 14 to June 19, when the Committee of the Whole reported, touched the subject only in the matter of the ratio of representation of slaves. With this same exception, the report of the Committee of the Whole contained no reference to slavery or the slave-trade, and the twenty-three resolutions of the Convention referred to the Committee of Detail, July 23 and 26, maintain the same silence.

The latter committee, consisting of Rutledge, Randolph, Gorham, Ellsworth, and Wilson, reported a draft of the Constitution August 6, 1787. The committee had, in its deliberations, probably made use of a draft of a national Constitution made by Edmund Randolph.[1] One clause of this provided that "no State shall lay a duty on imports;" and, also, "1. No duty on exports. 2. No prohibition on such inhabitants as the United States think proper to admit. 3. No duties by way of such prohibition." It does not appear that any reference to Negroes was here intended. In the extant copy, however, notes in Edward Rutledge's handwriting change the second clause to "No prohibition on such inhabitants or people as the several States think proper to admit."[2] In the report, August 6, these clauses take the following form:--

"Article VII. Section 4. No tax or duty shall be laid by the legislature on articles exported from any state; nor on the migration or importation of such persons as the several states shall think proper to admit; nor shall such migration or importation be prohibited."[3]

33. ~The General Debate.~ This, of course, referred both to immigrants ("migration") and to slaves ("importation").[4] Debate on this section began Tuesday, August 22, and lasted two days. Luther Martin of Maryland precipitated the discussion by a proposition to alter the section so as to allow a prohibition or tax on the importation of slaves. The debate immediately became general, being carried on principally by Rutledge, the Pinckneys, and Williamson from the Carolinas; Baldwin of Georgia; Mason, Madison, and Randolph of Virginia; Wilson and Gouverneur Morris of Pennsylvania; Dickinson of Delaware; and Ellsworth, Sherman, Gerry, King, and Langdon of New England.[5]

In this debate the moral arguments were prominent. Colonel George Mason of Virginia denounced the traffic in slaves as "infernal;" Luther Martin of Maryland regarded it as "inconsistent with the principles of the revolution, and dishonorable to the American character." "Every principle of honor and safety," declared John Dickinson of Delaware, "demands the exclusion of slaves." Indeed, Mason solemnly averred that the crime of slavery might yet bring the judgment of God on the nation. On the other side, Rutledge of South Carolina bluntly declared that religion and humanity had nothing to do with the question, that it was a matter of "interest" alone. Gerry of Massachusetts wished merely to refrain from giving direct sanction to the trade, while others contented themselves with pointing out the inconsistency of condemning the slave-trade and defending slavery.

The difficulty of the whole argument, from the moral standpoint, lay in the fact that it was completely checkmated by the obstinate attitude of South Carolina and Georgia. Their delegates--Baldwin, the Pinckneys, Rutledge, and others--asserted flatly, not less than a half-dozen times during the debate, that these States "can never receive the plan if it prohibits the slave-trade;" that "if the Convention thought" that these States would consent to a stoppage of the slave-trade, "the expectation is vain."[6] By this stand all argument from the moral standpoint was virtually silenced, for the Convention evidently agreed with Roger Sherman of Connecticut that "it was better to let the Southern States import slaves than to part with those States."

In such a dilemma the Convention listened not unwillingly to the _non possumus_ arguments of the States' Rights advocates. The "morality and wisdom" of slavery, declared Ellsworth of Connecticut, "are considerations belonging to the States themselves;" let every State "import what it pleases;" the Confederation has not "meddled" with the question, why should the Union? It is a dangerous symptom of centralization, cried Baldwin of Georgia; the "central States" wish to be the "vortex for everything," even matters of "a local nature." The national government, said Gerry of Massachusetts, had nothing to do with slavery in the States; it had only to refrain from giving direct sanction to the system. Others opposed this whole argument, declaring, with Langdon of New Hampshire, that Congress ought to have this power, since, as Dickinson tartly remarked, "The true question was, whether the national happiness would be promoted or impeded by the importation; and this question ought to be left to the national government, not to the states particularly interested."

Beside these arguments as to the right of the trade and the proper seat of authority over it, many arguments of general expediency were introduced. From an economic standpoint, for instance, General C.C. Pinckney of South Carolina "contended, that the importation of slaves would be for the interest of the whole Union. The more slaves, the more produce." Rutledge of the same State declared: "If the Northern States consult their interest, they will not oppose the increase of slaves, which will increase the commodities of which they will become the carriers." This sentiment found a more or less conscious echo in the words of Ellsworth of Connecticut, "What enriches a part enriches the whole." It was, moreover, broadly hinted that the zeal of Maryland and Virginia against the trade had an economic rather than a humanitarian motive, since they had slaves enough and to spare, and wished to sell them at a high price to South Carolina and Georgia, who needed more. In such case restrictions would unjustly discriminate against the latter States. The argument from history was barely touched upon. Only once was there an allusion to "the example of all the world" "in all ages" to justify slavery,[7] and once came the counter declaration that "Greece and Rome were made unhappy by their slaves."[8] On the other hand, the military weakness of slavery in the late war led to many arguments on that score. Luther Martin and George Mason dwelt on the danger of a servile class in war and insurrection; while Rutledge hotly replied that he "would readily exempt the other states from the obligation to protect the Southern against them;" and Ellsworth thought that the very danger would "become a motive to kind treatment." The desirability of keeping slavery out of the West was once mentioned as an argument against the trade: to this all seemed tacitly to agree.[9]

Throughout the debate it is manifest that the Convention had no desire really to enter upon a general slavery argument. The broader and more theoretic aspects of the question were but lightly touched upon here and there. Undoubtedly, most of the members would have much preferred not to raise the question at all; but, as it was raised, the differences of opinion were too manifest to be ignored, and the Convention, after its first perplexity, gradually and perhaps too willingly set itself to work to find some "middle ground" on which all parties could stand. The way to this compromise was pointed out by the South. The most radical pro-slavery arguments always ended with the opinion that "if the Southern States were let alone, they will probably of themselves stop importations."[10] To be sure, General Pinckney admitted that, "candidly, he did not think South Carolina would stop her importations of slaves in any short time;" nevertheless, the Convention "observed," with Roger Sherman, "that the abolition of slavery seemed to be going on in the United States, and that the good sense of the several states would probably by degrees complete it." Economic forces were evoked to eke out moral motives: when the South had its full quota of slaves, like Virginia it too would abolish the trade; free labor was bound finally to drive out slave labor. Thus the chorus of "_laissez-faire_" increased; and compromise seemed at least in sight, when Connecticut cried, "Let the trade alone!" and Georgia denounced it as an "evil." Some few discordant notes were heard, as, for instance, when Wilson of Pennsylvania made the uncomforting remark, "If South Carolina and Georgia were themselves disposed to get rid of the importation of slaves in a short time, as had been suggested, they would never refuse to unite because the importation might be prohibited."

With the spirit of compromise in the air, it was not long before the general terms were clear. The slavery side was strongly intrenched, and had a clear and definite demand. The forces of freedom were, on the contrary, divided by important conflicts of interest, and animated by no very strong and decided anti-slavery spirit with settled aims. Under such circumstances, it was easy for the Convention to miss the opportunity for a really great compromise, and to descend to a scheme that savored unpleasantly of "log-rolling." The student of the situation will always have good cause to believe that a more sturdy and definite anti-slavery stand at this point might have changed history for the better.

34. ~The Special Committee and the "Bargain."~ Since the debate had, in the first place, arisen from a proposition to tax the importation of slaves, the yielding of this point by the South was the first move toward compromise. To all but the doctrinaires, who shrank from taxing men as property, the argument that the failure to tax slaves was equivalent to a bounty, was conclusive. With this point settled, Randolph voiced the general sentiment, when he declared that he "was for committing, in order that some middle ground might, if possible, be found." Finally, Gouverneur Morris discovered the "middle ground," in his suggestion that the whole subject be committed, "including the clauses relating to taxes on exports and to a navigation act. These things," said he, "may form a bargain among the Northern and Southern States." This was quickly assented to; and sections four and five, on slave-trade and capitation tax, were committed by a vote of 7 to 3,[11] and section six, on navigation acts, by a vote of 9 to 2.[12] All three clauses were referred to the following committee: Langdon of New Hampshire, King of Massachusetts, Johnson of Connecticut, Livingston of New Jersey, Clymer of Pennsylvania, Dickinson of Delaware, Martin of Maryland, Madison of Virginia, Williamson of North Carolina, General Pinckney of South Carolina, and Baldwin of Georgia.

The fullest account of the proceedings of this committee is given in Luther Martin's letter to his constituents, and is confirmed in its main particulars by similar reports of other delegates. Martin writes: "A committee of _one_ member from each state was chosen by

ballot, to take this part of the system under their consideration, and to endeavor to agree upon some report which should reconcile those states [i.e., South Carolina and Georgia]. To this committee also was referred the following proposition, which had been reported by the committee of detail, viz.: 'No navigation act shall be passed without the assent of two thirds of the members present in each house'--a proposition which the staple and commercial states were solicitous to retain, lest their commerce should be placed too much under the power of the Eastern States, but which these last States were as anxious to reject. This committee--of which also I had the honor to be a member--met, and took under their consideration the subjects committed to them. I found the _Eastern_ States, notwithstanding their _aversion to slavery_, were very willing to indulge the Southern States at least with a temporary liberty to prosecute the slave trade, provided the Southern States would, in their turn, gratify _them_, by laying no restriction on navigation acts; and after a very little time, the committee, by a great majority, agreed on a report, by which the general government was to be prohibited from preventing the importation of slaves for a limited time, and the restrictive clause relative to navigation acts was to be omitted."[13]

That the "bargain" was soon made is proven by the fact that the committee reported the very next day, Friday, August 24, and that on Saturday the report was taken up. It was as follows: "Strike out so much of the fourth section as was referred to the committee, and insert 'The migration or importation of such persons as the several states, now existing, shall think proper to admit, shall not be prohibited by the legislature prior to the year 1800; but a tax or duty may be imposed on such migration or importation, at a rate not exceeding the average of the duties laid on imports.' The fifth section to remain as in the report. The sixth section to be stricken out."[14]

35. ~The Appeal to the Convention.~ The ensuing debate,[15] which lasted only a part of the day, was evidently a sort of appeal to the House on the decisions of the committee. It throws light on the points of disagreement. General Pinckney first proposed to extend the slave-trading limit to 1808, and Gorham of Massachusetts seconded the motion. This brought a spirited protest from Madison: "Twenty years will produce all the mischief that can be apprehended from the liberty to import slaves. So long a term will be more dishonorable to the American character than to say nothing about it in the Constitution."[16] There was, however, evidently another "bargain" here; for, without farther debate, the South and the East voted the extension, 7 to 4, only New Jersey, Pennsylvania, Delaware, and Virginia objecting. The ambiguous phraseology of the whole slave-trade section as reported did not pass without comment; Gouverneur Morris would have it read: "The importation of slaves into North Carolina, South Carolina, and Georgia, shall not be prohibited," etc.[17] This emendation was, however, too painfully truthful for the doctrinaires, and was, amid a score of objections, withdrawn. The taxation clause also was manifestly too vague for practical use, and Baldwin of Georgia wished to amend it by inserting "common impost on articles not enumerated," in lieu of the "average" duty.[18] This minor point gave rise to considerable argument: Sherman and Madison deprecated any such recognition of property in man as taxing would imply; Mason and Gorham argued that the tax restrained the trade; while King, Langdon, and General Pinckney contented themselves with the remark that this clause was "the price of the first part." Finally, it was unanimously agreed to make the duty "not exceeding ten dollars for each person."[19]

Southern interests now being safe, some Southern members attempted, a few days later, to annul the "bargain" by restoring the requirement of a two-thirds vote in navigation acts. Charles Pinckney made the motion, in an elaborate speech designed to show the conflicting commercial interests of the States; he declared that "The power of regulating commerce was a pure concession on the part of the Southern States."[20] Martin and Williamson of North Carolina, Butler of South Carolina, and Mason of Virginia defended the proposition, insisting that it would be a dangerous concession on the part of the South to leave navigation acts to a mere majority vote. Sherman of Connecticut, Morris of Pennsylvania, and Spaight of North Carolina declared that the very diversity of interest was a security. Finally, by a vote of 7 to 4, Maryland, Virginia, North Carolina, and Georgia being in the minority, the Convention refused to consider the motion, and the recommendation of the committee passed.[21]

When, on September 10, the Convention was discussing the amendment clause of the Constitution, the ever-alert Rutledge, perceiving that the results of the laboriously settled "bargain" might be endangered, declared that he "never could agree to give a power by which the articles relating to slaves might be altered by the states not interested in that property."[22] As a result, the clause finally adopted, September 15, had the proviso: "Provided, that no amendment which may be made prior to the year 1808 shall in any manner affect the 1st and 4th clauses in the 9th section of the 1st article."[23]

36. ~Settlement by the Convention.~ Thus, the slave-trade article of the Constitution stood finally as follows:--

"Article I. Section 9. The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed

on such Importation, not exceeding ten dollars for each Person."

This settlement of the slavery question brought out distinct differences of moral attitude toward the institution, and yet differences far from hopeless. To be sure, the South apologized for slavery, the Middle States denounced it, and the East could only tolerate it from afar; and yet all three sections united in considering it a temporary institution, the corner-stone of which was the slave-trade. No one of them had ever seen a system of slavery without an active slave-trade; and there were probably few members of the Convention who did not believe that the foundations of slavery had been sapped merely by putting the abolition of the slave-trade in the hands of Congress twenty years hence. Here lay the danger; for when the North called slavery "temporary," she thought of twenty or thirty years, while the "temporary" period of the South was scarcely less than a century. Meantime, for at least a score of years, a policy of strict _laissez-faire_, so far as the general government was concerned, was to intervene. Instead of calling the whole moral energy of the people into action, so as gradually to crush this portentous evil, the Federal Convention lulled the nation to sleep by a "bargain," and left to the vacillating and unripe judgment of the States one of the most threatening of the social and political ills which they were so courageously seeking to remedy.

37. ~Reception of the Clause by the Nation.~ When the proposed Constitution was before the country, the slave-trade article came in for no small amount of condemnation and apology. In the pamphlets of the day it was much discussed. One of the points in Mason's "Letter of Objections" was that "the general legislature is restrained from prohibiting the further importation of slaves for twenty odd years, though such importations render the United States weaker, more vulnerable, and less capable of defence."[24] To this Iredell replied, through the columns of the _State Gazette_ of North Carolina: "If all the States had been willing to adopt this regulation [i.e., to prohibit the slave-trade], I should as an individual most heartily have approved of it, because even if the importation of slaves in fact rendered us stronger, less vulnerable and more capable of defence, I should rejoice in the prohibition of it, as putting an end to a trade which has already continued too long for the honor and humanity of those concerned in it. But as it was well known that South Carolina and Georgia thought a further continuance of such importations useful to them, and would not perhaps otherwise have agreed to the new constitution, those States which had been importing till they were satisfied, could not with decency have insisted upon their relinquishing advantages themselves had already enjoyed. Our situation makes it necessary to bear the evil as it is. It will be left to the future legislatures to allow such importations or not. If any, in violation of their clear conviction of the injustice of this trade, persist in pursuing it, this is a matter between God and their own consciences. The interests of humanity will, however, have gained something by the prohibition of this inhuman trade, though at a distance of twenty odd years."[25]

"Centinel," representing the Quaker sentiment of Pennsylvania, attacked the clause in his third letter, published in the _Independent Gazetteer, or The Chronicle of Freedom_, November 8, 1787: "We are told that the objects of this article are slaves, and that it is inserted to secure to the southern states the right of introducing negroes for twenty-one years to come, against the declared sense of the other states to put an end to an odious traffic in the human species, which is especially scandalous and inconsistent in a people, who have asserted their own liberty by the sword, and which dangerously enfeebles the districts wherein the laborers are bondsmen. The words, dark and ambiguous, such as no plain man of common sense would have used, are evidently chosen to conceal from Europe, that in this enlightened country, the practice of slavery has its advocates among men in the highest stations. When it is recollected that no poll tax can be imposed on _five_ negroes, above what _three_ whites shall be charged; when it is considered, that the imposts on the consumption of Carolina field negroes must be trifling, and the excise nothing, it is plain that the proportion of contributions, which can be expected from the southern states under the new constitution, will be unequal, and yet they are to be allowed to enfeeble themselves by the further importation of negroes till the year 1808. Has not the concurrence of the five southern states (in the convention) to the new system, been purchased too dearly by the rest?"[26]

Noah Webster's "Examination" (1787) addressed itself to such Quaker scruples: "But, say the enemies of slavery, negroes may be imported for twenty-one years. This exception is addressed to the quakers, and a very pitiful exception it is. The truth is, Congress cannot prohibit the importation of slaves during that period; but the laws against the importation into particular states, stand unrepealed. An immediate abolition of slavery would bring ruin upon the whites, and misery upon the blacks, in the southern states. The constitution has therefore wisely left each state to pursue its own measures, with respect to this article of legislation, during the period of twenty-one years."[27]

The following year the "Examination" of Tench Coxe said: "The temporary reservation of any particular matter must ever be deemed an admission that it should be done away. This appears to have been well understood. In addition to the arguments drawn from liberty, justice and religion, opinions against this practice [i.e., of slave-trading], founded in sound policy, have no doubt been

urged. Regard was necessarily paid to the peculiar situation of our southern fellow-citizens; but they, on the other hand, have not been insensible of the delicate situation of our national character on this subject."[28]

From quite different motives Southern men defended this section. For instance, Dr. David Ramsay, a South Carolina member of the Convention, wrote in his "Address": "It is farther objected, that they have stipulated for a right to prohibit the importation of negroes after 21 years. On this subject observe, as they are bound to protect us from domestic violence, they think we ought not to increase our exposure to that evil, by an unlimited importation of slaves. Though Congress may forbid the importation of negroes after 21 years, it does not follow that they will. On the other hand, it is probable that they will not. The more rice we make, the more business will be for their shipping; their interest will therefore coincide with ours. Besides, we have other sources of supply--the importation of the ensuing 20 years, added to the natural increase of those we already have, and the influx from our northern neighbours who are desirous of getting rid of their slaves, will afford a sufficient number for cultivating all the lands in this state."[29]

Finally, _The Federalist_, No. 41, written by James Madison, commented as follows: "It were doubtless to be wished, that the power of prohibiting the importation of slaves had not been postponed until the year 1808, or rather, that it had been suffered to have immediate operation. But it is not difficult to account, either for this restriction on the General Government, or for the manner in which the whole clause is expressed. It ought to be considered as a great point gained in favor of humanity, that a period of twenty years may terminate forever, within these States, a traffic which has so long and so loudly upbraided the barbarism of modern policy; that within that period, it will receive a considerable discouragement from the Federal Government, and may be totally abolished, by a concurrence of the few States which continue the unnatural traffic, in the prohibitory example which has been given by so great a majority of the Union. Happy would it be for the unfortunate Africans, if an equal prospect lay before them of being redeemed from the oppressions of their European brethren!

"Attempts have been made to pervert this clause into an objection against the Constitution, by representing it on one side as a criminal toleration of an illicit practice, and on another, as calculated to prevent voluntary and beneficial emigrations from Europe to America. I mention these misconstructions, not with a view to give them an answer, for they deserve none; but as specimens of the manner and spirit, in which some have thought fit to conduct their opposition to the proposed Government."[30]

38. ~Attitude of the State Conventions.~ The records of the proceedings in the various State conventions are exceedingly meagre. In nearly all of the few States where records exist there is found some opposition to the slave-trade clause. The opposition was seldom very pronounced or bitter; it rather took the form of regret, on the one hand that the Convention went so far, and on the other hand that it did not go farther. Probably, however, the Constitution was never in danger of rejection on account of this clause.

Extracts from a few of the speeches, _pro_ and _con_, in various States will best illustrate the character of the arguments. In reply to some objections expressed in the Pennsylvania convention, Wilson said, December 3, 1787: "I consider this as laying the foundation for banishing slavery out of this country; and though the period is more distant than I could wish, yet it will produce the same kind, gradual change, which was pursued in Pennsylvania."[31] Robert Barnwell declared in the South Carolina convention, January 17, 1788, that this clause "particularly pleased" him. "Congress," he said, "has guarantied this right for that space of time, and at its expiration may continue it as long as they please. This question then arises--What will their interest lead them to do? The Eastern States, as the honorable gentleman says, will become the carriers of America. It will, therefore, certainly be their interest to encourage exportation to as great an extent as possible; and if the quantum of our products will be diminished by the prohibition of negroes, I appeal to the belief of every man, whether he thinks those very carriers will themselves dam up the sources from whence their profit is derived. To think so is so contradictory to the general conduct of mankind, that I am of opinion, that, without we ourselves put a stop to them, the traffic for negroes will continue forever."[32]

In Massachusetts, January 30, 1788, General Heath said: "The gentlemen who have spoken have carried the matter rather too far on both sides. I apprehend that it is not in our power to do anything for or against those who are in slavery in the southern States.... Two questions naturally arise, if we ratify the Constitution: Shall we do anything by our act to hold the blacks in slavery? or shall we become partakers of other men's sins? I think neither of them. Each State is sovereign and independent to a certain degree, and they have a right, and will regulate their own internal affairs, as to themselves appears proper."[33] Iredell said, in the North Carolina convention, July 26, 1788: "When the entire abolition of slavery takes place, it will be an event which must be pleasing to every generous mind, and every friend of human nature.... But as it is, this government is nobly distinguished above others by that very provision."[34]

Of the arguments against the clause, two made in the Massachusetts convention are typical. The Rev. Mr. Neal said, January 25, 1788, that "unless his objection [to this clause] was removed, he could not put his hand to the Constitution."[35] General Thompson exclaimed, "Shall it be said, that after we have established our own independence and freedom, we make slaves of others?"[36] Mason, in the Virginia convention, June 15, 1788, said: "As much as I value a union of all the states, I would not admit the Southern States into the Union unless they agree to the discontinuance of this disgraceful trade.... Yet they have not secured us the property of the slaves we have already. So that 'they have done what they ought not to have done, and have left undone what they ought to have done.'"[37] Joshua Atherton, who led the opposition in the New Hampshire convention, said: "The idea that strikes those who are opposed to this clause so disagreeably and so forcibly is,--hereby it is conceived (if we ratify the Constitution) that we become _consenters to_ and _partakers in_ the sin and guilt of this abominable traffic, at least for a certain period, without any positive stipulation that it shall even then be brought to an end."[38]

In the South Carolina convention Lowndes, January 16, 1788, attacked the slave-trade clause. "Negroes," said he, "were our wealth, our only natural resource; yet behold how our kind friends in the north were determined soon to tie up our hands, and drain us of what we had! The Eastern States drew their means of subsistence, in a great measure, from their shipping; and, on that head, they had been particularly careful not to allow of any burdens.... Why, then, call this a reciprocal bargain, which took all from one party, to bestow it on the other!"[39]

In spite of this discussion in the different States, only one State, Rhode Island, went so far as to propose an amendment directing Congress to "promote and establish such laws and regulations as may effectually prevent the importation of slaves of every description, into the United States."[40]

39. ~Acceptance of the Policy.~ As in the Federal Convention, so in the State conventions, it is noticeable that the compromise was accepted by the various States from widely different motives.[41] Nevertheless, these motives were not fixed and unchangeable, and there was still discernible a certain underlying agreement in the dislike of slavery. One cannot help thinking that if the devastation of the late war had not left an extraordinary demand for slaves in the South,--if, for instance, there had been in 1787 the same plethora in the slave-market as in 1774,--the future history of the country would have been far different. As it was, the twenty-one years of _laissez-faire_ were confirmed by the States, and the nation entered upon the constitutional period with the slave-trade legal in three States,[42] and with a feeling of quiescence toward it in the rest of the Union.

[41] In five States I have found no mention of the subject (Delaware, New Jersey, Georgia, Connecticut, and Maryland). In the Pennsylvania convention there was considerable debate, partially preserved in Elliot's and Lloyd's _Debates_. In the Massachusetts convention the debate on this clause occupied a part of two or three days, reported in published debates. In South Carolina there were several long speeches, reported in Elliot's _Debates_. Only three speeches made in the New Hampshire convention seem to be extant, and two of these are on the slave-trade: cf. Walker and Elliot. The Virginia convention discussed the clause to considerable extent: see Elliot. The clause does not seem to have been a cause of North Carolina's delay in ratification, although it occasioned some discussion: see Elliot. In Rhode Island "much debate ensued," and in this State alone was an amendment proposed: see Staples, _Rhode Island in the Continental Congress_. In New York the Committee of the Whole

"proceeded through sections 8, 9 ... with little or no debate": Elliot, _Debates_, II. 406.

[42] South Carolina, Georgia, and North Carolina. North Carolina had, however, a prohibitive duty.

Chapter VII

TOUSSAINT L'OUVERTURE AND ANTI-SLAVERY EFFORT, 1787-1806.

40. Influence of the Haytian Revolution. 41. Legislation of the Southern States. 42. Legislation of the Border States. 43. Legislation of the Eastern States. 44. First Debate in Congress, 1789. 45. Second Debate in Congress, 1790. 46. The Declaration of Powers, 1790. 47. The Act of 1794. 48. The Act of 1800. 49. The Act of 1803. 50. State of the Slave-Trade from 1789 to 1803. 51. The South Carolina Repeal of 1803. 52. The Louisiana Slave-Trade, 1803-1805. 53. Last Attempts at Taxation, 1805-1806. 54. Key-Note of the Period.

40. ~Influence of the Haytian Revolution.~ The rôle which the great Negro Toussaint, called L'Ouverture, played in the history of the United States has seldom been fully appreciated. Representing the age of revolution in America, he rose to leadership through a bloody terror, which contrived a Negro "problem" for the Western Hemisphere, intensified and defined the anti-slavery movement, became one of the causes, and probably the prime one, which led Napoleon to sell Louisiana for a song, and finally, through the interworking of all these effects, rendered more certain the final prohibition of the slave-trade by the United States in 1807.

From the time of the reorganization of the Pennsylvania Abolition Society, in 1787, anti-slavery sentiment became active. New York, New Jersey, Rhode Island, Delaware, Maryland, and Virginia had strong organizations, and a national convention was held in 1794. The terrible upheaval in the West Indies, beginning in 1791, furnished this rising movement with an irresistible argument. A wave of horror and fear swept over the South, which even the powerful slave-traders of Georgia did not dare withstand; the Middle States saw their worst dreams realized, and the mercenary trade interests of the East lost control of the New England conscience.

41. ~Legislation of the Southern States.~ In a few years the growing sentiment had crystallized into legislation. The Southern States took immediate measures to close their ports, first against West India Negroes, finally against all slaves. Georgia, who had had legal slavery only from 1755, and had since passed no restrictive legislation, felt compelled in 1793[1] to stop the entry of free Negroes, and in 1798[2] to prohibit, under heavy penalties, the importation of all slaves. This provision was placed in the Constitution of the State, and, although miserably enforced, was never repealed.

South Carolina was the first Southern State in which the exigencies of a great staple crop rendered the rapid consumption of slaves more profitable than their proper maintenance. Alternating, therefore, between a plethora and a dearth of Negroes, she prohibited the slave-trade only for short periods. In 1788[3] she had forbidden the trade for five years, and in 1792,[4] being peculiarly exposed to the West Indian insurrection, she quickly found it "inexpedient" to allow Negroes "from Africa, the West India Islands, or other place beyond sea" to enter for two years. This act continued to be extended, although with lessening penalties, until 1803.[5] The home demand in view of the probable stoppage of the trade in 1808, the speculative chances of the new Louisiana Territory trade, and the large already existing illicit traffic combined in that year to cause the passage of an act, December 17, reopening the African slave-trade, although still carefully excluding "West India" Negroes.[6] This action profoundly stirred the Union, aroused anti-slavery sentiment, led to a concerted movement for a constitutional amendment, and, failing in this, to an irresistible demand for a national prohibitory act at the earliest constitutional moment.

North Carolina had repealed her prohibitory duty act in 1790,[7] but in 1794 she passed an "Act to prevent further importation and bringing of slaves," etc.[8] Even the body-servants of West India immigrants and, naturally, all free Negroes, were eventually prohibited.[9]

42. ~Legislation of the Border States.~ The Border States, Virginia and Maryland, strengthened their non-importation laws, Virginia freeing illegally imported Negroes,[10] and Maryland prohibiting even the interstate trade.[11] The Middle States took action chiefly in the final abolition of slavery within their borders, and the prevention of the fitting out of slaving vessels in their ports. Delaware declared, in her Act of 1789, that "it is inconsistent with that spirit of general liberty which pervades the constitution of this state, that vessels should be fitted out, or equipped, in any of the ports thereof, for the purpose of receiving and transporting the natives of Africa to places where they are held in slavery,"[12] and forbade such a practice under penalty of £500 for each person so

engaged. The Pennsylvania Act of 1788[13] had similar provisions, with a penalty of £1000; and New Jersey followed with an act in 1798.[14]

43. ~Legislation of the Eastern States.~ In the Eastern States, where slavery as an institution was already nearly defunct, action was aimed toward stopping the notorious participation of citizens in the slave-trade outside the State. The prime movers were the Rhode Island Quakers. Having early secured a law against the traffic in their own State, they turned their attention to others. Through their remonstrances Connecticut, in 1788,[15] prohibited participation in the trade by a fine of £500 on the vessel, £50 on each slave, and loss of insurance; this act was strengthened in 1792,[16] the year after the Haytian revolt. Massachusetts, after many fruitless attempts, finally took advantage of an unusually bold case of kidnapping, and passed a similar act in 1788.[17] "This," says Belknap, "was the utmost which could be done by our legislatures; we still have to regret the impossibility of making a law _here_, which shall restrain our citizens from carrying on this trade _in foreign bottoms_, and from committing the crimes which this act prohibits, _in foreign countries_, as it is said some of them have done since the enacting of these laws."[18]

Thus it is seen how, spurred by the tragedy in the West Indies, the United States succeeded by State action in prohibiting the slave-trade from 1798 to 1803, in furthering the cause of abolition, and in preventing the fitting out of slave-trade expeditions in United States ports. The country had good cause to congratulate itself. The national government hastened to supplement State action as far as possible, and the prophecies of the more sanguine Revolutionary fathers seemed about to be realized, when the ill-considered act of South Carolina showed the weakness of the constitutional compromise.

44. ~First Debate in Congress, 1789.~ The attention of the national government was early directed to slavery and the trade by the rise, in the first Congress, of the question of taxing slaves imported. During the debate on the duty bill introduced by Clymer's committee, Parker of Virginia moved, May 13, 1789, to lay a tax of ten dollars _per capita_ on slaves imported. He plainly stated that the tax was designed to check the trade, and that he was "sorry that the Constitution prevented Congress from prohibiting the importation altogether." The proposal was evidently unwelcome, and caused an extended debate.[19] Smith of South Carolina wanted to postpone a matter so "big with the most serious consequences to the State he represented." Roger Sherman of Connecticut "could not reconcile himself to the insertion of human beings as an article of duty, among goods, wares, and merchandise." Jackson of Georgia argued against any restriction, and thought such States as Virginia "ought to let their neighbors get supplied, before they imposed such a burden upon the importation." Tucker of South Carolina declared it "unfair to bring in such an important subject at a time when debate was almost precluded," and denied the right of Congress to "consider whether the importation of slaves is proper or not."

Mr. Parker was evidently somewhat abashed by this onslaught of friend and foe, but he "had ventured to introduce the subject after full deliberation, and did not like to withdraw it." He desired Congress, "if possible," to "wipe off the stigma under which America labored." This brought Jackson of Georgia again to his feet. He believed, in spite of the "fashion of the day," that the Negroes were better off as slaves than as freedmen, and that, as the tax was partial, "it would be the most odious tax Congress could impose." Such sentiments were a distinct advance in pro-slavery doctrine, and called for a protest from Madison of Virginia. He thought the discussion proper, denied the partiality of the tax, and declared that, according to the spirit of the Constitution and his own desire, it was to be hoped "that, by expressing a national disapprobation of this trade, we may destroy it, and save ourselves from reproaches, and our posterity the imbecility ever attendant on a country filled with slaves." Finally, to Burke of South Carolina, who thought "the gentlemen were contending for nothing," Madison sharply rejoined, "If we contend for nothing, the gentlemen who are opposed to us do not contend for a great deal."

It now became clear that Congress had been whirled into a discussion of too delicate and lengthy a nature to allow its further prolongation. Compromising councils prevailed; and it was agreed that the present proposition should be withdrawn and a separate bill brought in. This bill was, however, at the next session dexterously postponed "until the next session of Congress."[20]

45. ~Second Debate in Congress, 1790.~ It is doubtful if Congress of its own initiative would soon have resurrected the matter, had not a new anti-slavery weapon appeared in the shape of urgent petitions from abolition societies. The first petition, presented February 11, 1790,[21] was from the same interstate Yearly Meeting of Friends which had formerly petitioned the Confederation Congress.[22] They urged Congress to inquire "whether, notwithstanding such seeming impediments, it be not in reality within your power to exercise justice and mercy, which, if adhered to, we cannot doubt, must produce the abolition of the slave trade," etc. Another Quaker petition from New York was also presented,[23] and both were about to be referred, when Smith of South Carolina objected, and precipitated a sharp debate.[24] This debate had a distinctly different tone from that of the preceding one, and

represents another step in pro-slavery doctrine. The key-note of these utterances was struck by Stone of Maryland, who "feared that if Congress took any measures indicative of an intention to interfere with the kind of property alluded to, it would sink it in value very considerably, and might be injurious to a great number of the citizens, particularly in the Southern States. He thought the subject was of general concern, and that the petitioners had no more right to interfere with it than any other members of the community. It was an unfortunate circumstance, that it was the disposition of religious sects to imagine they understood the rights of human nature better than all the world besides."

In vain did men like Madison disclaim all thought of unconstitutional "interference," and express only a desire to see "If anything is within the Federal authority to restrain such violation of the rights of nations and of mankind, as is supposed to be practised in some parts of the United States." A storm of disapproval from Southern members met such sentiments. "The rights of the Southern States ought not to be threatened," said Burke of South Carolina. "Any extraordinary attention of Congress to this petition," averred Jackson of Georgia, would put slave property "in jeopardy," and "evince to the people a disposition towards a total emancipation." Smith and Tucker of South Carolina declared that the request asked for "unconstitutional" measures. Gerry of Massachusetts, Hartley of Pennsylvania, and Lawrence of New York rather mildly defended the petitioners; but after considerable further debate the matter was laid on the table.

The very next day, however, the laid ghost walked again in the shape of another petition from the "Pennsylvania Society for promoting the Abolition of Slavery," signed by its venerable president, Benjamin Franklin. This petition asked Congress to "step to the very verge of the power vested in you for discouraging every species of traffic in the persons of our fellow-men."[25] Hartley of Pennsylvania called up the memorial of the preceding day, and it was read a second time and a motion for commitment made. Plain words now came from Tucker of South Carolina. "The petition," he said, "contained an unconstitutional request." The commitment would alarm the South. These petitions were "mischievous" attempts to imbue the slaves with false hopes. The South would not submit to a general emancipation without "civil war." The commitment would "blow the trumpet of sedition in the Southern States," echoed his colleague, Burke. The Pennsylvania men spoke just as boldly. Scott declared the petition constitutional, and was sorry that the Constitution did not interdict this "most abominable" traffic. "Perhaps, in our Legislative capacity," he said, "we can go no further than to impose a duty of ten dollars, but I do not know how far I might go if I was one of the Judges of the United States, and those people were to come before me and claim their emancipation; but I am sure I would go as far as I could." Jackson of Georgia rejoined in true Southern spirit, boldly defending slavery in the light of religion and history, and asking if it was "good policy to bring forward a business at this moment likely to light up the flame of civil discord; for the people of the Southern States will resist one tyranny as soon as another. The other parts of the Continent may bear them down by force of arms, but they will never suffer themselves to be divested of their property without a struggle. The gentleman says, if he was a Federal Judge, he does not know to what length he would go in emancipating these people; but I believe his judgment would be of short duration in Georgia, perhaps even the existence of such a Judge might be in danger." Baldwin, his New-England-born colleague, urged moderation by reciting the difficulty with which the constitutional compromise was reached, and declaring, "the moment we go to jostle on that ground, I fear we shall feel it tremble under our feet." Lawrence of New York wanted to commit the memorials, in order to see how far Congress might constitutionally interfere. Smith of South Carolina, in a long speech, said that his constituents entered the Union "from political, not from moral motives," and that "we look upon this measure as an attack upon the palladium of the property of our country." Page of Virginia, although a slave owner, urged commitment, and Madison again maintained the appropriateness of the request, and suggested that "regulations might be made in relation to the introduction of them [i.e., slaves] into the new States to be formed out of the Western Territory." Even conservative Gerry of Massachusetts declared, with regard to the whole trade, that the fact that "we have a right to regulate this business, is as clear as that we have any rights whatever."

Finally, by a vote of 43 to 11, the memorials were committed, the South Carolina and Georgia delegations, Bland and Coles of Virginia, Stone of Maryland, and Sylvester of New York voting in the negative.[26] A committee, consisting of Foster of New Hampshire, Huntington of Connecticut, Gerry of Massachusetts, Lawrence of New York, Sinnickson of New Jersey, Hartley of Pennsylvania, and Parker of Virginia, was charged with the matter, and reported Friday, March 5. The absence of Southern members on this committee compelled it to make this report a sort of official manifesto on the aims of Northern anti-slavery politics. As such, it was sure to meet with vehement opposition in the House, even though conservatively worded. Such proved to be the fact when the committee reported. The onslaught to "negative the whole report" was prolonged and bitter, the debate _pro_ and _con_ lasting several days.[27]

46. ~The Declaration of Powers, 1790.~ The result is best seen by comparing the original report with the report of the Committee of the Whole, adopted by a vote of 29 to 25 Monday, March 23, 1790:[28]--

REPORT OF THE SELECT COMMITTEE.

That, from the nature of the matters contained in these memorials, they were induced to examine the powers vested in Congress, under the present Constitution, relating to the Abolition of Slavery, and are clearly of opinion,

First. That the General Government is expressly restrained from prohibiting the importation of such persons 'as any of the States now existing shall think proper to admit, until the year one thousand eight hundred and eight.'

Secondly. That Congress, by a fair construction of the Constitution, are equally restrained from interfering in the emancipation of slaves, who already are, or who may, within the period mentioned, be imported into, or born within, any of the said States.

Thirdly. That Congress have no authority to interfere in the internal regulations of particular States, relative to the instructions of slaves in the principles of morality and religion; to their comfortable clothing, accommodations, and subsistence; to the regulation of their marriages, and the prevention of the violation of the rights thereof, or to the separation of children from their parents; to a comfortable provision in cases of sickness, age, or infirmity; or to the seizure, transportation, or sale of free negroes; but have the fullest confidence in the wisdom and humanity of the Legislatures of the several States, that they will revise their laws from time to time, when necessary, and promote the objects mentioned in the memorials, and every other measure that may tend to the happiness of slaves.

Fourthly. That, nevertheless, Congress have authority, if they shall think it necessary, to lay at any time a tax or duty, not exceeding ten dollars for each person of any description, the importation of whom shall be by any of the States admitted as aforesaid.

Fifthly. That Congress have authority to interdict,[29] or (so far as it is or may be carried on by citizens of the United States, for supplying foreigners), to regulate the African trade, and to make provision for the humane treatment of slaves, in all cases while on their passage to the United States, or to foreign ports, so far as respects the citizens of the United States.

Sixthly. That Congress have also authority to prohibit foreigners from fitting out vessels in any port of the United States, for transporting persons from Africa to any foreign port.

Seventhly. That the memorialists be informed, that in all cases to which the authority of Congress extends, they will exercise it for the humane objects of the memorialists, so far as they can be promoted on the principles of justice, humanity, and good policy.

* * * * *

REPORT OF THE COMMITTEE OF THE WHOLE.

First. That the migration or importation of such persons as any of the States now existing shall think proper to admit, cannot be prohibited by Congress, prior to the year one thousand eight hundred and eight.

Secondly. That Congress have no authority to interfere in the emancipation of slaves, or in the treatment of them within any of the States; it remaining with the several States alone to provide any regulation therein, which humanity and true policy may require.

Thirdly. That Congress have authority to restrain the citizens of the United States from carrying on the African trade, for the purpose of supplying foreigners with slaves, and of providing, by proper regulations, for the humane treatment, during their passage, of slaves imported by the said citizens into the States admitting such importation.

Fourthly. That Congress have authority to prohibit foreigners from fitting out vessels in any port of the United States for transporting persons from Africa to any foreign port.

47. ~The Act of 1794.~ This declaration of the powers of the central government over the slave-trade bore early fruit in the second Congress, in the shape of a shower of petitions from abolition societies in Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, Maryland, and Virginia.[30] In some of these slavery was denounced as "an outrageous violation of one of the most essential rights of human nature,"[31] and the slave-trade as a traffic "degrading to the rights of man" and "repugnant to reason."[32] Others declared the trade "injurious to the true commercial interest of a nation,"[33] and asked Congress that, having taken up the matter, they do all in their power to limit the trade. Congress was, however, determined to avoid as long as possible so unpleasant a matter, and, save an angry attempt to censure a Quaker petitioner,[34] nothing was heard of the slave-trade until the third Congress.

Meantime, news came from the seas southeast of Carolina and Georgia which influenced Congress more powerfully than humanitarian arguments had done. The wild revolt of despised slaves, the rise of a noble black leader, and the birth of a new nation of Negro freemen frightened the pro-slavery advocates and armed the anti-slavery agitation. As a result, a Quaker petition for a law against the transport traffic in slaves was received without a murmur in 1794,[35] and on March 22 the first national act against the slave-trade became a law.[36] It was designed "to prohibit the carrying on the Slave Trade from the United States to any foreign place or country," or the fitting out of slavers in the United States for that country. The penalties for violation were forfeiture of the ship, a fine of $1000 for each person engaged, and of $200 for each slave transported. If the Quakers thought this a triumph of anti-slavery sentiment, they were quickly undeceived. Congress might willingly restrain the country from feeding West Indian turbulence, and yet be furious at a petition like that of 1797,[37] calling attention to "the oppressed state of our brethren of the African race" in this country, and to the interstate slave-trade. "Considering the present extraordinary state of the West India Islands and of Europe," young John Rutledge insisted "that 'sufficient for the day is the evil thereof,' and that they ought to shut their door against any thing which had a tendency to produce the like confusion in this country." After excited debate and some investigation by a special committee, the petition was ordered, in both Senate and House, to be withdrawn.

48. ~The Act of 1800.~ In the next Congress, the sixth, another petition threw the House into paroxysms of slavery debate. Waln of Pennsylvania presented the petition of certain free colored men of Pennsylvania praying for a revision of the slave-trade laws and of the fugitive-slave law, and for prospective emancipation.[38] Waln moved the reference of this memorial to a committee already appointed on the revision of the loosely drawn and poorly enforced Act of 1794.[39] Rutledge of South Carolina immediately arose. He opposed the motion, saying, that these petitions were continually coming in and stirring up discord; that it was a good thing the Negroes were in slavery; and that already "too much of this new-fangled French philosophy of liberty and equality" had found its way among them. Others defended the right of petition, and declared that none wished Congress to exceed its powers. Brown of Rhode Island, a new figure in Congress, a man of distinguished services and from a well-known family, boldly set forth the commercial philosophy of his State. "We want money," said he, "we want a navy; we ought therefore to use the means to obtain it. We ought to go farther than has yet been proposed, and repeal the bills in question altogether, for why should we see Great Britain getting all the slave trade to themselves; why may not our country be enriched by that lucrative traffic? There would not be a slave the more sold, but we should derive the benefits by importing from Africa as well as that nation." Waln, in reply, contended that they should look into "the slave trade, much of which was still carrying on from Rhode Island, Boston and Pennsylvania." Hill of North Carolina called the House back from this general discussion to the petition in question, and, while willing to remedy any existing defect in the Act of 1794, hoped the petition would not be received. Dana of Connecticut declared that the paper "contained nothing but a farrago of the French metaphysics of liberty and equality;" and that "it was likely to produce some of the dreadful scenes of St. Domingo." The next day Rutledge again warned the House against even discussing the matter, as "very serious, nay, dreadful effects, must be the inevitable consequence." He held up the most lurid pictures of the fatuity of the French Convention in listening to the overtures of the "three emissaries from St. Domingo," and thus yielding "one of the finest islands in the world" to "scenes which had never been practised since the destruction of Carthage." "But, sir," he continued, "we have lived to see these dreadful scenes. These horrid effects have succeeded what was conceived once to be trifling. Most important consequences may be the result, although gentlemen little apprehend it. But we know the situation of things there, although they do not, and knowing we deprecate it. There have been emissaries amongst us in the Southern States; they have begun their war upon us; an actual organization has commenced; we have had them meeting in their club rooms, and debating on that subject.... Sir, I do believe that persons have been sent from France to feel the pulse of this country, to know whether these [i.e., the Negroes] are the proper engines to make use of: these people have been talked to; they have been tampered with, and this is going on."

Finally, after censuring certain parts of this Negro petition, Congress committed the part on the slave-trade to the committee already appointed. Meantime, the Senate sent down a bill to amend the Act of 1794, and the House took this bill under consideration.[40] Prolonged debate ensued. Brown of Rhode Island again made a most elaborate plea for throwing open the foreign slave-trade. Negroes, he said, bettered their condition by being enslaved, and thus it was morally wrong and commercially indefensible to impose "a heavy fine and imprisonment ... for carrying on a trade so advantageous;" or, if the trade must be stopped, then equalize the matter and abolish slavery too. Nichols of Virginia thought that surely the gentlemen would not advise the importation of more Negroes; for while it "was a fact, to be sure," that they would thus improve their condition, "would it be policy so to do?" Bayard of Delaware said that "a more dishonorable item of revenue" than that derived from the slave-trade "could not be established." Rutledge opposed the new bill as defective and impracticable: the former act, he said, was enough; the States had stopped the trade, and in addition the United States had sought to placate philanthropists by stopping the use of our ships in the trade. "This was going very far indeed." New England first began the trade, and why not let them enjoy its profits now as well as the

English? The trade could not be stopped.

The bill was eventually recommitted and reported again.[41] "On the question for its passing, a long and warm debate ensued," and several attempts to postpone it were made; it finally passed, however, only Brown of Rhode Island, Dent of Maryland, Rutledge and Huger of South Carolina, and Dickson of North Carolina voting against it, and 67 voting for it.[42] This Act of May 10, 1800,[43] greatly strengthened the Act of 1794. The earlier act had prohibited citizens from equipping slavers for the foreign trade; but this went so far as to forbid them having any interest, direct or indirect, in such voyages, or serving on board slave-ships in any capacity. Imprisonment for two years was added to the former fine of $2000, and United States commissioned ships were directed to capture such slavers as prizes. The slaves though forfeited by the owner, were not to go to the captor; and the act omitted to say what disposition should be made of them.

49. ~The Act of 1803.~ The Haytian revolt, having been among the main causes of two laws, soon was the direct instigation to a third. The frightened feeling in the South, when freedmen from the West Indies began to arrive in various ports, may well be imagined. On January 17, 1803, the town of Wilmington, North Carolina, hastily memorialized Congress, stating the arrival of certain freed Negroes from Guadeloupe, and apprehending "much danger to the peace and safety of the people of the Southern States of the Union" from the "admission of persons of that description into the United States."[44] The House committee which considered this petition hastened to agree "That the system of policy stated in the said memorial to exist, and to be now pursued in the French colonial government, of the West Indies, is fraught with danger to the peace and safety of the United States. That the fact stated to have occurred in the prosecution of that system of policy, demands the prompt interference of the Government of the United States, as well Legislative as Executive."[45] The result was a bill providing for the forfeiture of any ship which should bring into States prohibiting the same "any negro, mulatto, or other person of color;" the captain of the ship was also to be punished. After some opposition[46] the bill became a law, February 28, 1803.[47]

50. ~State of the Slave-Trade from 1789 to 1803.~ Meantime, in spite of the prohibitory State laws, the African slave-trade to the United States continued to flourish. It was notorious that New England traders carried on a large traffic.[48] Members stated on the floor of the House that "it was much to be regretted that the severe and pointed statute against the slave trade had been so little regarded. In defiance of its forbiddance and its penalties, it was well known that citizens and vessels of the United States were still engaged in that traffic.... In various parts of the nation, outfits were made for slave-voyages, without secrecy, shame, or apprehension.... Countenanced by their fellow-citizens at home, who were as ready to buy as they themselves were to collect and to bring to market, they approached our Southern harbors and inlets, and clandestinely disembarked the sooty offspring of the Eastern, upon the ill fated soil of the Western hemisphere. In this way, it had been computed that, during the last twelve months, twenty thousand enslaved negroes had been transported from Guinea, and, by smuggling, added to the plantation stock of Georgia and South Carolina. So little respect seems to have been paid to the existing prohibitory statute, that it may almost be considered as disregarded by common consent."[49]

These voyages were generally made under the flag of a foreign nation, and often the vessel was sold in a foreign port to escape confiscation. South Carolina's own Congressman confessed that although the State had prohibited the trade since 1788, she "was unable to enforce" her laws. "With navigable rivers running into the heart of it," said he, "it was impossible, with our means, to prevent our Eastern brethren, who, in some parts of the Union, in defiance of the authority of the General Government, have been engaged in this trade, from introducing them into the country. The law was completely evaded, and, for the last year or two [1802-3], Africans were introduced into the country in numbers little short, I believe, of what they would have been had the trade been a legal one."[50] The same tale undoubtedly might have been told of Georgia.

51. ~The South Carolina Repeal of 1803.~ This vast and apparently irrepressible illicit traffic was one of three causes which led South Carolina, December 17, 1803, to throw aside all pretence and legalize her growing slave-trade; the other two causes were the growing certainty of total prohibition of the traffic in 1808, and the recent purchase of Louisiana by the United States, with its vast prospective demand for slave labor. Such a combination of advantages, which meant fortunes to planters and Charleston slave-merchants, could not longer be withheld from them; the prohibition was repealed, and the United States became again, for the first time in at least five years, a legal slave mart. This action shocked the nation, frightening Southern States with visions of an influx of untrained barbarians and servile insurrections, and arousing and intensifying the anti-slavery feeling of the North, which had long since come to think of the trade, so far as legal enactment went, as a thing of the past.

Scarcely a month after this repeal, Bard of Pennsylvania solemnly addressed Congress on the matter. "For many reasons," said he, "this House must have been justly surprised by a recent measure of one of the Southern States. The impressions, however, which that measure gave my mind, were deep and painful. Had I been informed that some formidable foreign Power had invaded our country, I would not, I ought not, be more alarmed than on hearing that South Carolina had repealed her law prohibiting the importation of slaves.... Our hands are tied, and we are obliged to stand confounded, while we see the flood-gate opened, and pouring incalculable miseries into our country."[51] He then moved, as the utmost legal measure, a tax of ten dollars per head on slaves imported.

Debate on this proposition did not occur until February 14, when Lowndes explained the circumstances of the repeal, and a long controversy took place.[52] Those in favor of the tax argued that the trade was wrong, and that the tax would serve as some slight check; the tax was not inequitable, for if a State did not wish to bear it she had only to prohibit the trade; the tax would add to the revenue, and be at the same time a moral protest against an unjust and dangerous traffic. Against this it was argued that if the tax furnished a revenue it would defeat its own object, and make prohibition more difficult in 1808; it was inequitable, because it was aimed against one State, and would fall exclusively on agriculture; it would give national sanction to the trade; it would look "like an attempt in the General Government to correct a State for the undisputed exercise of its constitutional powers;" the revenue would be inconsiderable, and the United States had nothing to do with the moral principle; while a prohibitory tax would be defensible, a small tax like this would be useless as a protection and criminal as a revenue measure.

The whole debate hinged on the expediency of the measure, few defending South Carolina's action.[53] Finally, a bill was ordered to be brought in, which was done on the 17th.[54] Another long debate took place, covering substantially the same ground. It was several times hinted that if the matter were dropped South Carolina might again prohibit the trade. This, and the vehement opposition, at last resulted in the postponement of the bill, and it was not heard from again during the session.

52. ~The Louisiana Slave-Trade, 1803-1805.~ About this time the cession of Louisiana brought before Congress the question of the status of slavery and the slave-trade in the Territories. Twice or thrice before had the subject called for attention. The first time was in the Congress of the Confederation, when, by the Ordinance of 1787,[55] both slavery and the slave-trade were excluded from the Northwest Territory. In 1790 Congress had accepted the cession of North Carolina back lands on the express condition that slavery there be undisturbed.[56] Nothing had been said as to slavery in the South Carolina cession (1787),[57] but it was tacitly understood that the provision of the Northwest Ordinance would not be applied. In 1798 the bill introduced for the cession of Mississippi contained a specific declaration that the anti-slavery clause of 1787 should not be included.[58] The bill passed the Senate, but caused long and excited debate in the House.[59] It was argued, on the one hand, that the case in Mississippi was different from that in the Northwest Territory, because slavery was a legal institution in all the surrounding country, and to prohibit the institution was virtually to prohibit the settling of the country. On the other hand, Gallatin declared that if this amendment should not obtain, "he knew not how slaves could be prevented from being introduced by way of New Orleans, by persons who are not citizens of the United States." It was moved to strike out the excepting clause; but the motion received only twelve votes,--an apparent indication that Congress either did not appreciate the great precedent it was establishing, or was reprehensibly careless. Harper of South Carolina then succeeded in building up the Charleston slave-trade interest by a section forbidding the slave traffic from "without the limits of the United States." Thatcher moved to strike out the last clause of this amendment, and thus to prohibit the interstate trade, but he failed to get a second.[60] Thus the act passed, punishing the introduction of slaves from without the country by a fine of $300 for each slave, and freeing the slave.[61]

In 1804 President Jefferson communicated papers to Congress on the status of slavery and the slave-trade in Louisiana.[62] The Spanish had allowed the traffic by edict in 1793, France had not stopped it, and Governor Claiborne had refrained from interference. A bill erecting a territorial government was already pending.[63] The Northern "District of Louisiana" was placed under the jurisdiction of Indiana Territory, and was made subject to the provisions of the Ordinance of 1787. Various attempts were made to amend the part of the bill referring to the Southern Territory: first, so as completely to prohibit the slave-trade;[64] then to compel the emancipation at a certain age of all those imported;[65] next, to confine all importation to that from the States;[66] and, finally, to limit it further to slaves imported before South Carolina opened her ports.[67] The last two amendments prevailed, and the final act also extended to the Territory the Acts of 1794 and 1803. Only slaves imported before May 1, 1798, could be introduced, and those must be slaves of actual settlers.[68] All slaves illegally imported were freed.

This stringent act was limited to one year. The next year, in accordance with the urgent petition of the inhabitants, a bill was introduced against these restrictions.[69] By dexterous wording, this bill, which became a law March 2, 1805,[70] swept away all

restrictions upon the slave-trade except that relating to foreign ports, and left even this provision so ambiguous that, later, by judicial interpretation of the law,[71] the foreign slave-trade was allowed, at least for a time.

Such a stream of slaves now poured into the new Territory that the following year a committee on the matter was appointed by the House.[72] The committee reported that they "are in possession of the fact, that African slaves, lately imported into Charleston, have been thence conveyed into the territory of Orleans, and, in their opinion, this practice will be continued to a very great extent, while there is no law to prevent it."[73] The House ordered a bill checking this to be prepared; and such a bill was reported, but was soon dropped.[74] Importations into South Carolina during this time reached enormous proportions. Senator Smith of that State declared from official returns that, between 1803 and 1807, 39,075 Negroes were imported into Charleston, most of whom went to the Territories.[75]

53. ~Last Attempts at Taxation, 1805-1806.~ So alarming did the trade become that North Carolina passed a resolution in December, 1804,[76] proposing that the States give Congress power to prohibit the trade. Massachusetts,[77] Vermont,[78] New Hampshire,[79] and Maryland[80] responded; and a joint resolution was introduced in the House, proposing as an amendment to the Constitution "That the Congress of the United States shall have power to prevent the further importation of slaves into the United States and the Territories thereof."[81] Nothing came of this effort; but meantime the project of taxation was revived. A motion to this effect, made in February, 1805, was referred to a Committee of the Whole, but was not discussed. Early in the first session of the ninth Congress the motion of 1805 was renewed; and although again postponed on the assurance that South Carolina was about to stop the trade,[82] it finally came up for debate January 20, 1806.[83] Then occurred a most stubborn legislative battle, which lasted during the whole session.[84] Several amendments to the motion were first introduced, so as to make it apply to all immigrants, and again to all "persons of color." As in the former debate, it was proposed to substitute a resolution of censure on South Carolina. All these amendments were lost. A long debate on the expediency of the measure followed, on the old grounds. Early of Georgia dwelt especially on the double taxation it would impose on Georgia; others estimated that a revenue of one hundred thousand dollars might be derived from the tax, a sum sufficient to replace the tax on pepper and medicines. Angry charges and counter-charges were made,--e.g., that Georgia, though ashamed openly to avow the trade, participated in it as well as South Carolina. "Some recriminations ensued between several members, on the participation of the traders of some of the New England States in carrying on the slave trade." Finally, January 22, by a vote of 90 to 25, a tax bill was ordered to be brought in.[85] One was reported on the 27th.[86] Every sort of opposition was resorted to. On the one hand, attempts were made to amend it so as to prohibit importation after 1807, and to prevent importation into the Territories; on the other hand, attempts were made to recommit and postpone the measure. It finally got a third reading, but was recommitted to a select committee, and disappeared until February 14.[87] Being then amended so as to provide for the forfeiture of smuggled cargoes, but saying nothing as to the disposition of the slaves, it was again relegated to a committee, after a vote of 69 to 42 against postponement.[88] On March 4 it appeared again, and a motion to reject it was lost. Finally, in the midst of the war scare and the question of non-importation of British goods, the bill was apparently forgotten, and the last attempt to tax imported slaves ended, like the others, in failure.

54. ~Key-Note of the Period.~ One of the last acts of this period strikes again the key-note which sounded throughout the whole of it. On February 20, 1806, after considerable opposition, a bill to prohibit trade with San Domingo passed the Senate.[89] In the House it was charged by one side that the measure was dictated by France, and by the other, that it originated in the fear of countenancing Negro insurrection. The bill, however, became a law, and by continuations remained on the statute-books until 1809. Even at that distance the nightmare of the Haytian insurrection continued to haunt the South, and a proposal to reopen trade with the island caused wild John Randolph to point out the "dreadful evil" of a "direct trade betwixt the town of Charleston and the ports of the island of St. Domingo."[90]

Of the twenty years from 1787 to 1807 it can only be said that they were, on the whole, a period of disappointment so far as the suppression of the slave-trade was concerned. Fear, interest, and philanthropy united for a time in an effort which bade fair to suppress the trade; then the real weakness of the constitutional compromise appeared, and the interests of the few overcame the fears and the humanity of the many.

Chapter VIII

THE PERIOD OF ATTEMPTED SUPPRESSION. 1807-1825.

55. The Act of 1807. 56. The First Question: How shall illegally imported Africans be disposed of? 57. The Second Question: How shall Violations be punished? 58. The Third Question: How shall the Interstate Coastwise Slave-Trade be protected? 59. Legislative History of the Bill. 60. Enforcement of the Act. 61. Evidence of the Continuance of the Trade. 62. Apathy of the Federal Government. 63. Typical Cases. 64. The Supplementary Acts, 1818-1820. 65. Enforcement of the Supplementary Acts, 1818-1825.

55. ~The Act of 1807.~ The first great goal of anti-slavery effort in the United States had been, since the Revolution, the suppression of the slave-trade by national law. It would hardly be too much to say that the Haytian revolution, in addition to its influence in the years from 1791 to 1806, was one of the main causes that rendered the accomplishment of this aim possible at the earliest constitutional moment. To the great influence of the fears of the South was added the failure of the French designs on Louisiana, of which Toussaint L'Ouverture was the most probable cause. The cession of Louisiana in 1803 challenged and aroused the North on the slavery question again; put the Carolina and Georgia slave-traders in the saddle, to the dismay of the Border States; and brought the whole slave-trade question vividly before the public conscience. Another scarcely less potent influence was, naturally, the great anti-slavery movement in England, which after a mighty struggle of eighteen years was about to gain its first victory in the British Act of 1807.

President Jefferson, in his pacificatory message of December 2, 1806, said: "I congratulate you, fellow-citizens, on the approach of the period at which you may interpose your authority constitutionally, to withdraw the citizens of the United States from all further participation in those violations of human rights which have been so long continued on the unoffending inhabitants of Africa, and which the morality, the reputation, and the best interests of our country, have long been eager to proscribe. Although no law you may pass can take prohibitory effect till the first day of the year one thousand eight hundred and eight, yet the intervening period is not too long to prevent, by timely notice, expeditions which cannot be completed before that day."[1]

In pursuance of this recommendation, the very next day Senator Bradley of Vermont introduced into the Senate a bill which, after a complicated legislative history, became the Act of March 2, 1807, prohibiting the African slave-trade.[2]

Three main questions were to be settled by this bill: first, and most prominent, that of the disposal of illegally imported Africans; second, that of the punishment of those concerned in the importation; third, that of the proper limitation of the interstate traffic by water.

The character of the debate on these three questions, as well as the state of public opinion, is illustrated by the fact that forty of the sixty pages of officially reported debates are devoted to the first question, less than twenty to the second, and only two to the third. A sad commentary on the previous enforcement of State and national laws is the readiness with which it was admitted that wholesale violations of the law would take place; indeed, Southern men declared that no strict law against the slave-trade could be

executed in the South, and that it was only by playing on the motives of personal interest that the trade could be checked. The question of punishment indicated the slowly changing moral attitude of the South toward the slave system. Early boldly said, "A large majority of people in the Southern States do not consider slavery as even an evil."[3] The South, in fact, insisted on regarding man-stealing as a minor offence, a "misdemeanor" rather than a "crime." Finally, in the short and sharp debate on the interstate coastwise trade, the growing economic side of the slavery question came to the front, the vested interests' argument was squarely put, and the future interstate trade almost consciously provided for.

From these considerations, it is doubtful as to how far it was expected that the Act of 1807 would check the slave traffic; at any rate, so far as the South was concerned, there seemed to be an evident desire to limit the trade, but little thought that this statute would definitively suppress it.

56. ~The First Question: How shall illegally imported Africans be disposed of?~ The dozen or more propositions on the question of the disposal of illegally imported Africans may be divided into two chief heads, representing two radically opposed parties: 1. That illegally imported Africans be free, although they might be indentured for a term of years or removed from the country. 2. That such Africans be sold as slaves.[4] The arguments on these two propositions, which were many and far-reaching, may be roughly divided into three classes, political, constitutional, and moral.

The political argument, reduced to its lowest terms, ran thus: those wishing to free the Negroes illegally imported declared that to enslave them would be to perpetrate the very evil which the law was designed to stop. "By the same law," they said, "we condemn the man-stealer and become the receivers of his stolen goods. We punish the criminal, and then step into his place, and complete the crime."[5] They said that the objection to free Negroes was no valid excuse; for if the Southern people really feared this class, they would consent to the imposing of such penalties on illicit traffic as would stop the importation of a single slave.[6] Moreover, "forfeiture" and sale of the Negroes implied a property right in them which did not exist.[7] Waiving this technical point, and allowing them to be "forfeited" to the government, then the government should either immediately set them free, or, at the most, indenture them for a term of years; otherwise, the law would be an encouragement to violators. "It certainly will be," said they, "if the importer can find means to evade the penalty of the act; for there he has all the advantage of a market enhanced by our ineffectual attempt to prohibit."[8] They claimed that even the indenturing of the ignorant barbarian for life was better than slavery; and Sloan declared that the Northern States would receive the freed Negroes willingly rather than have them enslaved.[9]

The argument of those who insisted that the Negroes should be sold was tersely put by Macon: "In adopting our measures on this subject, we must pass such a law as can be executed."[10] Early expanded this: "It is a principle in legislation, as correct as any which has ever prevailed, that to give effect to laws you must not make them repugnant to the passions and wishes of the people among whom they are to operate. How then, in this instance, stands the fact? Do not gentlemen from every quarter of the Union prove, on the discussion of every question that has ever arisen in the House, having the most remote bearing on the giving freedom to the Africans in the bosom of our country, that it has excited the deepest sensibility in the breasts of those where slavery exists? And why is this so? It is, because those who, from experience, know the extent of the evil, believe that the most formidable aspect in which it can present itself, is by making these people free among them. Yes, sir, though slavery is an evil, regretted by every man in the country, to have among us in any considerable quantity persons of this description, is an evil far greater than slavery itself. Does any gentleman want proof of this? I answer that all proof is useless; no fact can be more notorious. With this belief on the minds of the people where slavery exists, and where the importation will take place, if at all, we are about to turn loose in a state of freedom all persons brought in after the passage of this law. I ask gentlemen to reflect and say whether such a law, opposed to the ideas, the passions, the views, and the affections of the people of the Southern States, can be executed? I tell them, no; it is impossible--why? Because no man will inform--why? Because to inform will be to lead to an evil which will be deemed greater than the offence of which information is given, because it will be opposed to the principle of self-preservation, and to the love of family. No, no man will be disposed to jeopard his life, and the lives of his countrymen. And if no one dare inform, the whole authority of the Government cannot carry the law into effect. The whole people will rise up against it. Why? Because to enforce it would be to turn loose, in the bosom of the country, firebrands that would consume them."[11]

This was the more tragic form of the argument; it also had a mercenary side, which was presented with equal emphasis. It was repeatedly said that the only way to enforce the law was to play off individual interests against each other. The profit from the sale of illegally imported Negroes was declared to be the only sufficient "inducement to give information of their importation."[12] "Give up the idea of forfeiture, and I challenge the gentleman to invent fines, penalties, or punishments of any sort, sufficient to restrain the slave trade."[13] If such Negroes be freed, "I tell you that slaves will continue to be imported as heretofore.... You cannot get hold of the ships employed in this traffic. Besides, slaves will be brought into Georgia from East Florida. They will be brought into

the Mississippi Territory from the bay of Mobile. You cannot inflict any other penalty, or devise any other adequate means of prevention, than a forfeiture of the Africans in whose possession they may be found after importation."[14] Then, too, when foreigners smuggled in Negroes, "who then ... could be operated on, but the purchasers? There was the rub--it was their interest alone which, by being operated on, would produce a check. Snap their purse-strings, break open their strong box, deprive them of their slaves, and by destroying the temptation to buy, you put an end to the trade, ... nothing short of a forfeiture of the slave would afford an effectual remedy."[15] Again, it was argued that it was impossible to prevent imported Negroes from becoming slaves, or, what was just as bad, from being sold as vagabonds or indentured for life.[16] Even our own laws, it was said, recognize the title of the African slave factor in the transported Negroes; and if the importer have no title, why do we legislate? Why not let the African immigrant alone to get on as he may, just as we do the Irish immigrant?[17] If he should be returned to Africa, his home could not be found, and he would in all probability be sold into slavery again.[18]

The constitutional argument was not urged as seriously as the foregoing; but it had a considerable place. On the one hand, it was urged that if the Negroes were forfeited, they were forfeited to the United States government, which could dispose of them as it saw fit;[19] on the other hand, it was said that the United States, as owner, was subject to State laws, and could not free the Negroes contrary to such laws.[20] Some alleged that the freeing of such Negroes struck at the title to all slave property;[21] others thought that, as property in slaves was not recognized in the Constitution, it could not be in a statute.[22] The question also arose as to the source of the power of Congress over the slave-trade. Southern men derived it from the clause on commerce, and declared that it exceeded the power of Congress to declare Negroes imported into a slave State, free, against the laws of that State; that Congress could not determine what should or should not be property in a State.[23] Northern men replied that, according to this principle, forfeiture and sale in Massachusetts would be illegal; that the power of Congress over the trade was derived from the restraining clause, as a non-existent power could not be restrained; and that the United States could act under her general powers as executor of the Law of Nations.[24]

The moral argument as to the disposal of illegally imported Negroes was interlarded with all the others. On the one side, it began with the "Rights of Man," and descended to a stickling for the decent appearance of the statute-book; on the other side, it began with the uplifting of the heathen, and descended to a denial of the applicability of moral principles to the question. Said Holland of North Carolina: "It is admitted that the condition of the slaves in the Southern States is much superior to that of those in Africa. Who, then, will say that the trade is immoral?"[25] But, in fact, "morality has nothing to do with this traffic,"[26] for, as Joseph Clay declared, "it must appear to every man of common sense, that the question could be considered in a commercial point of view only."[27] The other side declared that, "by the laws of God and man," these captured Negroes are "entitled to their freedom as clearly and absolutely as we are;"[28] nevertheless, some were willing to leave them to the tender mercies of the slave States, so long as the statute-book was disgraced by no explicit recognition of slavery.[29] Such arguments brought some sharp sarcasm on those who seemed anxious "to legislate for the honor and glory of the statute book;"[30] some desired "to know what honor you will derive from a law that will be broken every day of your lives."[31] They would rather boldly sell the Negroes and turn the proceeds over to charity.

The final settlement of the question was as follows:--

"SECTION 4.... And neither the importer, nor any person or persons claiming from or under him, shall hold any right or title whatsoever to any negro, mulatto, or person of color, nor to the service or labor thereof, who may be imported or brought within the United States, or territories thereof, in violation of this law, but the same shall remain subject to any regulations not contravening the provisions of this act, which the Legislatures of the several States or Territories at any time hereafter may make, for disposing of any such negro, mulatto, or person of color."[32]

57. ~The Second Question: How shall Violations be punished?~ The next point in importance was that of the punishment of offenders. The half-dozen specific propositions reduce themselves to two: 1. A violation should be considered a crime or felony, and be punished by death; 2. A violation should be considered a misdemeanor, and be punished by fine and imprisonment.[33]

Advocates of the severer punishment dwelt on the enormity of the offence. It was "one of the highest crimes man could commit," and "a captain of a ship engaged in this traffic was guilty of murder."[34] The law of God punished the crime with death, and any one would rather be hanged than be enslaved.[35] It was a peculiarly deliberate crime, in which the offender did not act in sudden passion, but had ample time for reflection.[36] Then, too, crimes of much less magnitude are punished with death. Shall we punish the stealer of $50 with death, and the man-stealer with imprisonment only?[37] Piracy, forgery, and fraudulent sinking of vessels are punishable with death, "yet these are crimes only against property; whereas the importation of slaves, a crime committed

against the liberty of man, and inferior only to murder or treason, is accounted nothing but a misdemeanor."[38] Here, indeed, lies the remedy for the evil of freeing illegally imported Negroes,--in making the penalty so severe that none will be brought in; if the South is sincere, "they will unite to a man to execute the law."[39] To free such Negroes is dangerous; to enslave them, wrong; to return them, impracticable; to indenture them, difficult,--therefore, by a death penalty, keep them from being imported.[40] Here the East had a chance to throw back the taunts of the South, by urging the South to unite with them in hanging the New England slave-traders, assuring the South that "so far from charging their Southern brethren with cruelty or severity in hanging them, they would acknowledge the favor with gratitude."[41] Finally, if the Southerners would refuse to execute so severe a law because they did not consider the offence great, they would probably refuse to execute any law at all for the same reason.[42]

The opposition answered that the death penalty was more than proportionate to the crime, and therefore "immoral."[43] "I cannot believe," said Stanton of Rhode Island, "that a man ought to be hung for only stealing a negro."[44] It was argued that the trade was after all but a "transfer from one master to another;"[45] that slavery was worse than the slave-trade, and the South did not consider slavery a crime: how could it then punish the trade so severely and not reflect on the institution?[46] Severity, it was said, was also inexpedient: severity often increases crime; if the punishment is too great, people will sympathize with offenders and will not inform against them. Said Mr. Mosely: "When the penalty is excessive or disproportioned to the offence, it will naturally create a repugnance to the law, and render its execution odious."[47] John Randolph argued against even fine and imprisonment, "on the ground that such an excessive penalty could not, in such case, be constitutionally imposed by a Government possessed of the limited powers of the Government of the United States."[48]

The bill as passed punished infractions as follows:--

For equipping a slaver, a fine of $20,000 and forfeiture of the ship.

For transporting Negroes, a fine of $5000 and forfeiture of the ship and Negroes.

For transporting and selling Negroes, a fine of $1000 to $10,000, imprisonment from 5 to 10 years, and forfeiture of the ship and Negroes.

For knowingly buying illegally imported Negroes, a fine of $800 for each Negro, and forfeiture.

58. ~The Third Question: How shall the Interstate Coastwise Slave-Trade be protected?~ The first proposition was to prohibit the coastwise slave-trade altogether,[49] but an amendment reported to the House allowed it "in any vessel or species of craft whatever." It is probable that the first proposition would have prevailed, had it not been for the vehement opposition of Randolph and Early.[50] They probably foresaw the value which Virginia would derive from this trade in the future, and consequently Randolph violently declared that if the amendment did not prevail, "the Southern people would set the law at defiance. He would begin the example." He maintained that by the first proposition "the proprietor of sacred and chartered rights is prevented the Constitutional use of his property."[51] The Conference Committee finally arranged a compromise, forbidding the coastwise trade for purposes of sale in vessels under forty tons.[52] This did not suit Early, who declared that the law with this provision "would not prevent the introduction of a single slave."[53] Randolph, too, would "rather lose the bill, he had rather lose all the bills of the session, he had rather lose every bill passed since the establishment of the Government, than agree to the provision contained in this slave bill."[54] He predicted the severance of the slave and the free States, if disunion should ever come. Congress was, however, weary with the dragging of the bill, and it passed both Houses with the compromise provision. Randolph was so dissatisfied that he had a committee appointed the next day, and introduced an amendatory bill. Both this bill and another similar one, introduced at the next session, failed of consideration.[55]

59. ~Legislative History of the Bill.~[56] On December 12, 1805, Senator Stephen R. Bradley of Vermont gave notice of a bill to prohibit the introduction of slaves after 1808. By a vote of 18 to 9 leave was given, and the bill read a first time on the 17th. On the 18th, however, it was postponed until "the first Monday in December, 1806." The presidential message mentioning the matter, Senator Bradley, December 3, 1806, gave notice of a similar bill, which was brought in on the 8th, and on the 9th referred to a committee consisting of Bradley, Stone, Giles, Gaillard, and Baldwin. This bill passed, after some consideration, January 27. It provided, among other things, that violations of the act should be felony, punishable with death, and forbade the interstate coast-trade.[57]

Meantime, in the House, Mr. Bidwell of Massachusetts had proposed, February 4, 1806, as an amendment to a bill taxing slaves imported, that importation after December 31, 1807, be prohibited, on pain of fine and imprisonment and forfeiture of ship.[58] This

was rejected by a vote of 86 to 17. On December 3, 1806, the House, in appointing committees on the message, "_Ordered_, That Mr. Early, Mr. Thomas M. Randolph, Mr. John Campbell, Mr. Kenan, Mr. Cook, Mr. Kelly, and Mr. Van Rensselaer be appointed a committee" on the slave-trade. This committee reported a bill on the 15th, which was considered, but finally, December 18, recommitted. It was reported in an amended form on the 19th, and amended in Committee of the Whole so as to make violation a misdemeanor punishable by fine and imprisonment, instead of a felony punishable by death.[59] A struggle over the disposal of the cargo then ensued. A motion by Bidwell to except the cargo from forfeiture was lost, 77 to 39. Another motion by Bidwell may be considered the crucial vote on the whole bill: it was an amendment to the forfeiture clause, and read, _"Provided, that no person shall be sold as a slave by virtue of this act."_[60] This resulted in a tie vote, 60 to 60; but the casting vote of the Speaker, Macon of North Carolina, defeated it. New England voted solidly in favor of it, the Middle States stood 4 for and 2 against it, and the six Southern States stood solid against it. On January 8 the bill went again to a select committee of seventeen, by a vote of 76 to 46. The bill was reported back amended January 20, and on the 28th the Senate bill was also presented to the House. On the 9th, 10th, and 11th of February both bills were considered in Committee of the Whole, and the Senate bill finally replaced the House bill, after several amendments had been made.[61] The bill was then passed, by a vote of 113 to 5.[62] The Senate agreed to the amendments, including that substituting fine and imprisonment for the death penalty, but asked for a conference on the provision which left the interstate coast-trade free. The six conferees succeeded in bringing the Houses to agree, by limiting the trade to vessels over forty tons and requiring registry of the slaves.[63]

The following diagram shows in graphic form the legislative history of the act:--[64]

This bill received the approval of President Jefferson, March 2, 1807, and became thus the "Act to prohibit the importation of Slaves into any port or place within the jurisdiction of the United States, from and after the first day of January, in the year of our Lord one thousand eight hundred and eight."[65] The debates in the Senate were not reported. Those in the House were prolonged and bitter, and hinged especially on the disposal of the slaves, the punishment of offenders, and the coast-trade. Men were continually changing their votes, and the bill see-sawed backward and forward, in committee and out, until the House was thoroughly worn out. On the whole, the strong anti-slavery men, like Bidwell and Sloan, were outgeneraled by Southerners, like Early and Williams; and, considering the immense moral backing of the anti-slavery party from the Revolutionary fathers down, the bill of 1807 can hardly be regarded as a great anti-slavery victory.

60. ~Enforcement of the Act.~ The period so confidently looked forward to by the constitutional fathers had at last arrived; the slave-trade was prohibited, and much oratory and poetry were expended in celebration of the event. In the face of this, let us see how the Act of 1807 was enforced and what it really accomplished. It is noticeable, in the first place, that there was no especial set of machinery provided for the enforcement of this act. The work fell first to the Secretary of the Treasury, as head of the customs collection. Then, through the activity of cruisers, the Secretary of the Navy gradually came to have oversight, and eventually the whole matter was lodged with him, although the Departments of State and War were more or less active on different occasions. Later, at the advent of the Lincoln government, the Department of the Interior was charged with the enforcement of the slave-trade laws. It would indeed be surprising if, amid so much uncertainty and shifting of responsibility, the law were not poorly enforced. Poor enforcement, moreover, in the years 1808 to 1820 meant far more than at almost any other period; for these years were, all over the European world, a time of stirring economic change, and the set which forces might then take would in a later period be unchangeable without a cataclysm. Perhaps from 1808 to 1814, in the midst of agitation and war, there was some excuse for carelessness. From 1814 on, however, no such palliation existed, and the law was probably enforced as the people who made it wished it enforced.

Most of the Southern States rather tardily passed the necessary supplementary acts disposing of illegally imported Africans. A few appear not to have passed any. Some of these laws, like the Alabama-Mississippi Territory Act of 1815,[66] directed such Negroes

to be "sold by the proper officer of the court, to the highest bidder, at public auction, for ready money." One-half the proceeds went to the informer or to the collector of customs, the other half to the public treasury. Other acts, like that of North Carolina in 1816,[67] directed the Negroes to "be sold and disposed of for the use of the state." One-fifth of the proceeds went to the informer. The Georgia Act of 1817[68] directed that the slaves be either sold or given to the Colonization Society for transportation, providing the society reimburse the State for all expense incurred, and pay for the transportation. In this manner, machinery of somewhat clumsy build and varying pattern was provided for the carrying out of the national act.

61. ~Evidence of the Continuance of the Trade.~ Undoubtedly, the Act of 1807 came very near being a dead letter. The testimony supporting this view is voluminous. It consists of presidential messages, reports of cabinet officers, letters of collectors of revenue, letters of district attorneys, reports of committees of Congress, reports of naval commanders, statements made on the floor of Congress, the testimony of eye-witnesses, and the complaints of home and foreign anti-slavery societies.

"When I was young," writes Mr. Fowler of Connecticut, "the slave-trade was still carried on, by Connecticut shipmasters and Merchant adventurers, for the supply of southern ports. This trade was carried on by the consent of the Southern States, under the provisions of the Federal Constitution, until 1808, and, after that time, clandestinely. There was a good deal of conversation on the subject, in private circles." Other States were said to be even more involved than Connecticut.[69] The African Society of London estimated that, down to 1816, fifteen of the sixty thousand slaves annually taken from Africa were shipped by Americans. "Notwithstanding the prohibitory act of America, which was passed in 1807, ships bearing the American flag continued to trade for slaves until 1809, when, in consequence of a decision in the English prize appeal courts, which rendered American slave ships liable to capture and condemnation, that flag suddenly disappeared from the coast. Its place was almost instantaneously supplied by the Spanish flag, which, with one or two exceptions, was now seen for the first time on the African coast, engaged in covering the slave trade. This sudden substitution of the Spanish for the American flag seemed to confirm what was established in a variety of instances by more direct testimony, that the slave trade, which now, for the first time, assumed a Spanish dress, was in reality only the trade of other nations in disguise."[70]

So notorious did the participation of Americans in the traffic become, that President Madison informed Congress in his message, December 5, 1810, that "it appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity, and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct, will doubtless be felt by Congress, in devising further means of suppressing the evil."[71] The Secretary of the Navy wrote the same year to Charleston, South Carolina: "I hear, not without great concern, that the law prohibiting the importation of slaves has been violated in frequent instances, near St. Mary's."[72] Testimony as to violations of the law and suggestions for improving it also came in from district attorneys.[73]

The method of introducing Negroes was simple. A slave smuggler says: "After resting a few days at St. Augustine, ... I agreed to accompany Diego on a land trip through the United States, where a _kaffle_ of negroes was to precede us, for whose disposal the shrewd Portuguese had already made arrangements with my uncle's consignees. I soon learned how readily, and at what profits, the Florida negroes were sold into the neighboring American States. The _kaffle_, under charge of negro drivers, was to strike up the Escambia River, and thence cross the boundary into Georgia, where some of our wild Africans were mixed with various squads of native blacks, and driven inland, till sold off, singly or by couples, on the road. At this period [1812], the United States had declared the African slave trade illegal, and passed stringent laws to prevent the importation of negroes; yet the Spanish possessions were thriving on this inland exchange of negroes and mulattoes; Florida was a sort of nursery for slave-breeders, and many American citizens grew rich by trafficking in Guinea negroes, and smuggling them continually, in small parties, through the southern United States. At the time I mention, the business was a lively one, owing to the war then going on between the States and England, and the unsettled condition of affairs on the border."[74]

The Spanish flag continued to cover American slave-traders. The rapid rise of privateering during the war was not caused solely by patriotic motives; for many armed ships fitted out in the United States obtained a thin Spanish disguise at Havana, and transported thousands of slaves to Brazil and the West Indies. Sometimes all disguise was thrown aside, and the American flag appeared on the slave coast, as in the cases of the "Paz,"[75] the "Rebecca," the "Rosa"[76] (formerly the privateer "Commodore Perry"), the "Dorset" of Baltimore,[77] and the "Saucy Jack."[78] Governor McCarthy of Sierra Leone wrote, in 1817: "The slave trade is carried on most vigorously by the Spaniards, Portuguese, Americans and French. I have had it affirmed from several quarters, and do believe it to be a fact, that there is a greater number of vessels employed in that traffic than at any former period."[79]

62. ~Apathy of the Federal Government.~ The United States cruisers succeeded now and then in capturing a slaver, like the "Eugene," which was taken when within four miles of the New Orleans bar.[80] President Madison again, in 1816, urged Congress to act on account of the "violations and evasions which, it is suggested, are chargeable on unworthy citizens, who mingle in the slave trade under foreign flags, and with foreign ports; and by collusive importations of slaves into the United States, through adjoining ports and territories."[81] The executive was continually in receipt of ample evidence of this illicit trade and of the helplessness of officers of the law. In 1817 it was reported to the Secretary of the Navy that most of the goods carried to Galveston were brought into the United States; "the more valuable, and the slaves are smuggled in through the numerous inlets to the westward, where the people are but too much disposed to render them every possible assistance. Several hundred slaves are now at Galveston, and persons have gone from New-Orleans to purchase them. Every exertion will be made to intercept them, but I have little hopes of success."[82] Similar letters from naval officers and collectors showed that a system of slave piracy had arisen since the war, and that at Galveston there was an establishment of organized brigands, who did not go to the trouble of sailing to Africa for their slaves, but simply captured slavers and sold their cargoes into the United States. This Galveston nest had, in 1817, eleven armed vessels to prosecute the work, and "the most shameful violations of the slave act, as well as our revenue laws, continue to be practised."[83] Cargoes of as many as three hundred slaves were arriving in Texas. All this took place under Aury, the buccaneer governor; and when he removed to Amelia Island in 1817 with the McGregor raid, the illicit traffic in slaves, which had been going on there for years,[84] took an impulse that brought it even to the somewhat deaf ears of Collector Bullock. He reported, May 22, 1817: "I have just received information from a source on which I can implicitly rely, that it has already become the practice to introduce into the state of Georgia, across the St. Mary's River, from Amelia Island, East Florida, Africans, who have been carried into the Port of Fernandina, subsequent to the capture of it by the Patriot army now in possession of it ...; were the legislature to pass an act giving compensation in some manner to informers, it would have a tendency in a great degree to prevent the practice; as the thing now is, no citizen will take the trouble of searching for and detecting the slaves. I further understand, that the evil will not be confined altogether to Africans, but will be extended to the worst class of West India slaves."[85]

Undoubtedly, the injury done by these pirates to the regular slave-trading interests was largely instrumental in exterminating them. Late in 1817 United States troops seized Amelia Island, and President Monroe felicitated Congress and the country upon escaping the "annoyance and injury" of this illicit trade.[86] The trade, however, seems to have continued, as is shown by such letters as the following, written three and a half months later:--

PORT OF DARIEN, March 14, 1818.

... It is a painful duty, sir, to express to you, that I am in possession of undoubted information, that African and West India negroes are almost daily illicitly introduced into Georgia, for sale or settlement, or passing through it to the territories of the United States for similar purposes; these facts are notorious; and it is not unusual to see such negroes in the streets of St. Mary's, and such too, recently captured by our vessels of war, and ordered to Savannah, were illegally bartered by hundreds in that city, _for_ this bartering or bonding (as _it is called_, but in reality _selling_,) actually took place before any decision had [been] passed by the court respecting them. I cannot but again express to you, sir, that these irregularities and mocking of the laws, by men who understand them, and who, it was presumed, would have respected them, are such, that it requires the immediate interposition of Congress to effect a suppression of this traffic; for, as things are, should a faithful officer of the government apprehend such negroes, to avoid the penalties imposed by the laws, the proprietors disclaim them, and some agent of the executive demands a delivery of the same to him, who may employ them as he pleases, or effect a sale by way of a bond, for the restoration of the negroes when legally called on so to do; which bond, it is _understood_, is to be _forfeited_, as the amount of the bond is so much less than the value of the property.... There are many negroes ... recently introduced into this state and the Alabama territory, and which can be apprehended. The undertaking would be great; but to be sensible that we shall possess your approbation, and that we are carrying the views and wishes of the government into execution, is all we wish, and it shall be done, independent of every personal consideration.

I have, etc.[87]

This "approbation" failed to come to the zealous collector, and on the 5th of July he wrote that, "not being favored with a reply," he has been obliged to deliver over to the governor's agents ninety-one illegally imported Negroes.[88] Reports from other districts corroborate this testimony. The collector at Mobile writes of strange proceedings on the part of the courts.[89] General D.B. Mitchell, ex-governor of Georgia and United States Indian agent, after an investigation in 1821 by Attorney-General Wirt, was found "guilty of having prostituted his power, as agent for Indian affairs at the Creek agency, to the purpose of aiding and assisting in a conscious breach of the act of Congress of 1807, in prohibition of the slave trade--and this from mercenary motives."[90] The

indefatigable Collector Chew of New Orleans wrote to Washington that, "to put a stop to that traffic, a naval force suitable to those waters is indispensable," and that "vast numbers of slaves will be introduced to an alarming extent, unless prompt and effectual measures are adopted by the general government."[91] Other collectors continually reported infractions, complaining that they could get no assistance from the citizens,[92] or plaintively asking the services of "one small cutter."[93]

Meantime, what was the response of the government to such representations, and what efforts were made to enforce the act? A few unsystematic and spasmodic attempts are recorded. In 1811 some special instructions were sent out,[94] and the President was authorized to seize Amelia Island.[95] Then came the war; and as late as November 15, 1818, in spite of the complaints of collectors, we find no revenue cutter on the Gulf coast.[96] During the years 1817 and 1818[97] some cruisers went there irregularly, but they were too large to be effective; and the partial suppression of the Amelia Island pirates was all that was accomplished. On the whole, the efforts of the government lacked plan, energy, and often sincerity. Some captures of slavers were made;[98] but, as the collector at Mobile wrote, anent certain cases, "this was owing rather to accident, than any well-timed arrangement." He adds: "from the Chandalier Islands to the Perdido river, including the coast, and numerous other islands, we have only a small boat, with four men and an inspector, to oppose to the whole confederacy of smugglers and pirates."[99]

To cap the climax, the government officials were so negligent that Secretary Crawford, in 1820, confessed to Congress that "it appears, from an examination of the records of this office, that no particular instructions have ever been given, by the Secretary of the Treasury, under the original or supplementary acts prohibiting the introduction of slaves into the United States."[100] Beside this inactivity, the government was criminally negligent in not prosecuting and punishing offenders when captured. Urgent appeals for instruction from prosecuting attorneys were too often received in official silence; complaints as to the violation of law by State officers went unheeded;[101] informers were unprotected and sometimes driven from home.[102] Indeed, the most severe comment on the whole period is the report, January 7, 1819, of the Register of the Treasury, who, after the wholesale and open violation of the Act of 1807, reported, in response to a request from the House, "that it doth not appear, from an examination of the records of this office, and particularly of the accounts (to the date of their last settlement) of the collectors of the customs, and of the several marshals of the United States, that any forfeitures had been incurred under the said act."[103]

63. ~Typical Cases.~ At this date (January 7, 1819), however, certain cases were stated to be pending, a history of which will fitly conclude this discussion. In 1818 three American schooners sailed from the United States to Havana; on June 2 they started back with cargoes aggregating one hundred and seven slaves. The schooner "Constitution" was captured by one of Andrew Jackson's officers under the guns of Fort Barancas. The "Louisa" and "Marino" were captured by Lieutenant McKeever of the United States Navy. The three vessels were duly proceeded against at Mobile, and the case began slowly to drag along. The slaves, instead of being put under the care of the zealous marshal of the district, were placed in the hands of three bondsmen, friends of the judge. The marshal notified the government of this irregularity, but apparently received no answer. In 1822 the three vessels were condemned as forfeited, but the court "reserved" for future order the distribution of the slaves. Nothing whatever either then or later was done to the slave-traders themselves. The owners of the ships promptly appealed to the Supreme Court of the United States, and that tribunal, in 1824, condemned the three vessels and the slaves on two of them.[104] These slaves, considerably reduced in number "from various causes," were sold at auction for the benefit of the State, in spite of the Act of 1819. Meantime, before the decision of the Supreme Court, the judge of the Supreme Court of West Florida had awarded to certain alleged Spanish claimants of the slaves indemnity for nearly the whole number seized, at the price of $650 per head, and the Secretary of the Treasury had actually paid the claim.[105] In 1826 Lieutenant McKeever urgently petitions Congress for his prize-money of $4,415.15, which he has not yet received.[106] The "Constitution" was for some inexplicable reason released from bond, and the whole case fades in a very thick cloud of official mist. In 1831 Congress sought to inquire into the final disposition of the slaves. The information given was never printed; but as late as 1836 a certain Calvin Mickle petitions Congress for reimbursement for the slaves sold, for their hire, for their natural increase, for expenses incurred, and for damages.[107]

64. ~The Supplementary Acts, 1818-1820.~ To remedy the obvious defects of the Act of 1807 two courses were possible: one, to minimize the crime of transportation, and, by encouraging informers, to concentrate efforts against the buying of smuggled slaves; the other, to make the crime of transportation so great that no slaves would be imported. The Act of 1818 tried the first method; that of 1819, the second.[108] The latter was obviously the more upright and logical, and the only method deserving thought even in 1807; but the Act of 1818 was the natural descendant of that series of compromises which began in the Constitutional Convention, and which, instead of postponing the settlement of critical questions to more favorable times, rather aggravated and complicated them.

The immediate cause of the Act of 1818 was the Amelia Island scandal.[109] Committees in both Houses reported bills, but that of the Senate finally passed. There does not appear to have been very much debate.[110] The sale of Africans for the benefit of the informer and of the United States was strongly urged "as the only means of executing the laws against the slave trade as experience had fully demonstrated since the origin of the prohibition."[111] This proposition was naturally opposed as "inconsistent with the principles of our Government, and calculated to throw as wide open the door to the importation of slaves as it was before the existing prohibition."[112] The act, which became a law April 20, 1818,[113] was a poorly constructed compromise, which virtually acknowledged the failure of efforts to control the trade, and sought to remedy defects by pitting cupidity against cupidity, informer against thief. One-half of all forfeitures and fines were to go to the informer, and penalties for violation were changed as follows:--

For equipping a slaver, instead of a fine of $20,000, a fine of $1000 to $5000 and imprisonment from 3 to 7 years.

For transporting Negroes, instead of a fine of $5000 and forfeiture of ship and Negroes, a fine of $1000 to $5000 and imprisonment from 3 to 7 years.

For actual importation, instead of a fine of $1000 to $10,000 and imprisonment from 5 to 10 years, a fine of $1000 to $10,000, and imprisonment from 3 to 7 years.

For knowingly buying illegally imported Negroes, instead of a fine of $800 for each Negro and forfeiture, a fine of $1000 for each Negro.

The burden of proof was laid on the defendant, to the extent that he must prove that the slave in question had been imported at least five years before the prosecution. The slaves were still left to the disposal of the States.

This statute was, of course, a failure from the start,[114] and at the very next session Congress took steps to revise it. A bill was reported in the House, January 13, 1819, but it was not discussed till March.[115] It finally passed, after "much debate."[116] The Senate dropped its own bill, and, after striking out the provision for the death penalty, passed the bill as it came from the House.[117] The House acquiesced, and the bill became a law, March 3, 1819,[118] in the midst of the Missouri trouble. This act directed the President to use armed cruisers on the coasts of the United States and Africa to suppress the slave-trade; one-half the proceeds of the condemned ship were to go to the captors as bounty, provided the Africans were safely lodged with a United States marshal and the crew with the civil authorities. These provisions were seriously marred by a proviso which Butler of Louisiana, had inserted, with a "due regard for the interests of the State which he represented," viz., that a captured slaver must always be returned to the port whence she sailed.[119] This, of course, secured decided advantages to Southern slave-traders. The most radical provision of the act was that which directed the President to "make such regulations and arrangements as he may deem expedient for the safe keeping, support, and removal beyond the limits of the United States, of all such negroes, mulattoes, or persons of colour, as may be so delivered and brought within their jurisdiction;" and to appoint an agent in Africa to receive such Negroes.[120] Finally, an appropriation of $100,000 was made to enforce the act.[121] This act was in some measure due to the new colonization movement; and the return of Africans recaptured was a distinct recognition of its efforts, and the real foundation of Liberia.

To render this straightforward act effective, it was necessary to add but one measure, and that was a penalty commensurate with the crime of slave stealing. This was accomplished by the Act of May 15, 1820,[122] a law which may be regarded as the last of the Missouri Compromise measures. The act originated from the various bills on piracy which were introduced early in the sixteenth Congress. The House bill, in spite of opposition, was amended so as to include slave-trading under piracy, and passed. The Senate agreed without a division. This law provided that direct participation in the slave-trade should be piracy, punishable with death.[123]

65. ~Enforcement of the Supplementary Acts, 1818-1825.~ A somewhat more sincere and determined effort to enforce the slave-trade laws now followed; and yet it is a significant fact that not until Lincoln's administration did a slave-trader suffer death for violating the laws of the United States. The participation of Americans in the trade continued, declining somewhat between 1825 and 1830, and then reviving, until it reached its highest activity between 1840 and 1860. The development of a vast internal slave-trade, and the consequent rise in the South of vested interests strongly opposed to slave smuggling, led to a falling off in the illicit introduction of Negroes after 1825, until the fifties; nevertheless, smuggling never entirely ceased, and large numbers were thus added to the plantations of the Gulf States.

Monroe had various constitutional scruples as to the execution of the Act of 1819;[124] but, as Congress took no action, he at last put a fair interpretation on his powers, and appointed Samuel Bacon as an agent in Africa to form a settlement for recaptured Africans. Gradually the agency thus formed became merged with that of the Colonization Society on Cape Mesurado; and from this union Liberia was finally evolved.[125]

Meantime, during the years 1818 to 1820, the activity of the slave-traders was prodigious. General James Tallmadge declared in the House, February 15, 1819: "Our laws are already highly penal against their introduction, and yet, it is a well known fact, that about fourteen thousand slaves have been brought into our country this last year."[126] In the same year Middleton of South Carolina and Wright of Virginia estimated illicit introduction at 13,000 and 15,000 respectively.[127] Judge Story, in charging a jury, took occasion to say: "We have but too many proofs from unquestionable sources, that it [the slave-trade] is still carried on with all the implacable rapacity of former times. Avarice has grown more subtle in its evasions, and watches and seizes its prey with an appetite quickened rather than suppressed by its guilty vigils. American citizens are steeped to their very mouths (I can hardly use too bold a figure) in this stream of iniquity."[128] The following year, 1820, brought some significant statements from various members of Congress. Said Smith of South Carolina: "Pharaoh was, for his temerity, drowned in the Red Sea, in pursuing them [the Israelites] contrary to God's express will; but our Northern friends have not been afraid even of that, in their zeal to furnish the Southern States with Africans. They are better seamen than Pharaoh, and calculate by that means to elude the vigilance of Heaven; which they seem to disregard, if they can but elude the violated laws of their country."[129] As late as May he saw little hope of suppressing the traffic.[130] Sergeant of Pennsylvania declared: "It is notorious that, in spite of the utmost vigilance that can be employed, African negroes are clandestinely brought in and sold as slaves."[131] Plumer of New Hampshire stated that "of the unhappy beings, thus in violation of all laws transported to our shores, and thrown by force into the mass of our black population, scarcely one in a hundred is ever detected by the officers of the General Government, in a part of the country, where, if we are to believe the statement of Governor Rabun, 'an officer who would perform his duty, by attempting to enforce the law [against the slave trade] is, by many, considered as an officious meddler, and treated with derision and contempt;' ... I have been told by a gentleman, who has attended particularly to this subject, that ten thousand slaves were in one year smuggled into the United States; and that, even for the last year, we must count the number not by hundreds, but by thousands."[132] In 1821 a committee of Congress characterized prevailing methods as those "of the grossest fraud that could be practised to deceive the officers of government."[133] Another committee, in 1822, after a careful examination of the subject, declare that they "find it impossible to measure with precision the effect produced upon the American branch of the slave trade by the laws above mentioned, and the seizures under them. They are unable to state, whether those American merchants, the American capital and seamen which heretofore aided in this traffic, have abandoned it altogether, or have sought shelter under the flags of other nations." They then state the suspicious circumstance that, with the disappearance of the American flag from the traffic, "the trade, notwithstanding, increases annually, under the flags of other nations." They complain of the spasmodic efforts of the executive. They say that the first United States cruiser arrived on the African coast in March, 1820, and remained a "few weeks;" that since then four others had in two years made five visits in all; but "since the middle of last November, the commencement of the healthy season on that coast, no vessel has been, nor, as your committee is informed, is, under orders for that service."[134] The United States African agent, Ayres, reported in 1823: "I was informed by an American officer who had been on the coast in 1820, that he had boarded 20 American vessels in one morning, lying in the port of Gallinas, and fitted for the reception of slaves. It is a lamentable fact, that most of the harbours, between the Senegal and the line, were visited by an equal number of American

vessels, and for the sole purpose of carrying away slaves. Although for some years the coast had been occasionally visited by our cruizers, their short stay and seldom appearance had made but slight impression on those traders, rendered hardy by repetition of crime, and avaricious by excessive gain. They were enabled by a regular system to gain intelligence of any cruizer being on the coast."[135]

Even such spasmodic efforts bore abundant fruit, and indicated what vigorous measures might have accomplished. Between May, 1818, and November, 1821, nearly six hundred Africans were recaptured and eleven American slavers taken.[136] Such measures gradually changed the character of the trade, and opened the international phase of the question. American slavers cleared for foreign ports, there took a foreign flag and papers, and then sailed boldly past American cruisers, although their real character was often well known. More stringent clearance laws and consular instructions might have greatly reduced this practice; but nothing was ever done, and gradually the laws became in large measure powerless to deal with the bulk of the illicit trade. In 1820, September 16, a British officer, in his official report, declares that, in spite of United States laws, "American vessels, American subjects, and American capital, are unquestionably engaged in the trade, though under other colours and in disguise."[137] The United States ship "Cyane" at one time reported ten captures within a few days, adding: "Although they are evidently owned by Americans, they are so completely covered by Spanish papers that it is impossible to condemn them."[138] The governor of Sierra Leone reported the rivers Nunez and Pongas full of renegade European and American slave-traders;[139] the trade was said to be carried on "to an extent that almost staggers belief."[140] Down to 1824 or 1825, reports from all quarters prove this activity in slave-trading.

The execution of the laws within the country exhibits grave defects and even criminal negligence. Attorney-General Wirt finds it necessary to assure collectors, in 1819, that "it is against public policy to dispense with prosecutions for violation of the law to prohibit the Slave trade."[141] One district attorney writes: "It appears to be almost impossible to enforce the laws of the United States against offenders after the negroes have been landed in the state."[142] Again, it is asserted that "when vessels engaged in the slave trade have been detained by the American cruizers, and sent into the slave-holding states, there appears at once a difficulty in securing the freedom to these captives which the laws of the United States have decreed for them."[143] In some cases, one man would smuggle in the Africans and hide them in the woods; then his partner would "rob" him, and so all trace be lost.[144] Perhaps 350 Africans were officially reported as brought in contrary to law from 1818 to 1820: the absurdity of this figure is apparent.[145] A circular letter to the marshals, in 1821, brought reports of only a few well-known cases, like that of the "General Ramirez;" the marshal of Louisiana had "no information."[146]

There appears to be little positive evidence of a large illicit importation into the country for a decade after 1825. It is hardly possible, however, considering the activity in the trade, that slaves were not largely imported. Indeed, when we note how the laws were continually broken in other respects, absence of evidence of petty smuggling becomes presumptive evidence that collusive or tacit understanding of officers and citizens allowed the trade to some extent.[147] Finally, it must be noted that during all this time scarcely a man suffered for participating in the trade, beyond the loss of the Africans and, more rarely, of his ship. Red-handed slavers, caught in the act and convicted, were too often, like La Coste of South Carolina, the subjects of executive clemency.[148] In certain cases there were those who even had the effrontery to ask Congress to cancel their own laws. For instance, in 1819 a Venezuelan privateer, secretly fitted out and manned by Americans in Baltimore, succeeded in capturing several American, Portuguese, and Spanish slavers, and appropriating the slaves; being finally wrecked herself, she transferred her crew and slaves to one of her prizes, the "Antelope," which was eventually captured by a United States cruiser and the 280 Africans sent to Georgia. After much litigation, the United States Supreme Court ordered those captured from Spaniards to be surrendered, and the others to be returned to Africa. By some mysterious process, only 139 Africans now remained, 100 of whom were sent to Africa. The Spanish claimants of the remaining thirty-nine sold them to a certain Mr. Wilde, who gave bond to transport them out of the country. Finally, in December, 1827, there came an innocent petition to Congress to _cancel this bond_.[149] A bill to that effect passed and was approved, May 2, 1828,[150] and in consequence these Africans remained as slaves in Georgia.

On the whole, it is plain that, although in the period from 1807 to 1820 Congress laid down broad lines of legislation sufficient, save in some details, to suppress the African slave trade to America, yet the execution of these laws was criminally lax. Moreover, by the facility with which slavers could disguise their identity, it was possible for them to escape even a vigorous enforcement of our laws. This situation could properly be met only by energetic and sincere international co-operation. The next chapter will review efforts directed toward this end.[151]

FOOTNOTES:

[1] _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 468.

[2] Cf. below, § 59.

[3] _Annals of Cong._, 9 Cong. 2 sess. p. 238.

[4] There were at least twelve distinct propositions as to the disposal of the Africans imported:--

1. That they be forfeited and sold by the United States at auction (Early's bill, reported Dec. 15: _Annals of Cong._, 9 Cong. 2 sess. pp. 167-8).

2. That they be forfeited and left to the disposal of the States (proposed by Bidwell and Early: _Ibid._, pp. 181, 221, 477. This was the final settlement.)

3. That they be forfeited and sold, and that the proceeds go to charities, education, or internal improvements (Early, Holland, and Masters: _Ibid._, p. 273).

4. That they be forfeited and indentured for life (Alston and Bidwell: _Ibid._, pp. 170-1).

5. That they be forfeited and indentured for 7, 8, or 10 years (Pitkin: _Ibid._, p. 186).

6. That they be forfeited and given into the custody of the President, and by him indentured in free States for a term of years (bill reported from the Senate Jan. 28: _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 575; _Annals of Cong._, 9 Cong. 2 sess. p. 477. Cf. also _Ibid._, p. 272).

7. That the Secretary of the Treasury dispose of them, at his discretion, in service (Quincy: _Ibid._, p. 183).

8. That those imported into slave States be returned to Africa or bound out in free States (Sloan: _Ibid._, p. 254).

9. That all be sent back to Africa (Smilie: _Ibid._, p. 176).

10. That those imported into free States be free, those imported into slave States be returned to Africa or indentured (Sloan: _Ibid._, p. 226).

11. That they be forfeited but not sold (Sloan and others: _Ibid._, p. 270).

12. That they be free (Sloan: _Ibid._, p. 168; Bidwell: _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 515).

[30] Early: _Ibid._, p. 239.

[31] _Ibid._

[32] _Ibid._, p. 1267.

[33] There were about six distinct punishments suggested:--

1. Forfeiture, and fine of $5000 to $10,000 (Early's bill: _Ibid._, p. 167).

2. Forfeiture and imprisonment (amendment to Senate bill: _Ibid._, pp. 231, 477, 483).

3. Forfeiture, imprisonment from 5 to 10 years, and fine of $1000 to $10,000 (amendment to amendment of Senate bill: _Ibid._, pp. 228, 483).

4. Forfeiture, imprisonment from 5 to 40 years, and fine of $1000 to $10,000 (Chandler's amendment: _Ibid._, p. 228).

5. Forfeiture of all property, and imprisonment (Pitkin: _Ibid._, p. 188).

6. Death (Smilie: _Ibid._, pp. 189-90; bill reported to House, Dec. 19: _Ibid._, p. 190; Senate bill as reported to House, Jan. 28).

[34] Smilie: _Annals of Cong._, 9 Cong. 2 sess. pp. 189-90.

[35] Tallmadge: _Ibid._, p. 233; Olin: _Ibid._, p. 237.

[36] Ely: _Ibid._, p. 237.

[43] Elmer: _Annals of Cong._, 9 Cong. 2 sess. p. 235.

[44] _Ibid._, p. 240.

[45] Holland: _Ibid._, p. 240.

[46] Early: _Ibid._, pp. 238-9; Holland: _Ibid._, p. 239.

[47] _Ibid._, p. 233. Cf. Lloyd: _Ibid._, p. 237; Ely: _Ibid._, p. 232; Early: _Ibid._, pp. 238-9.

[48] _Ibid._, p. 484.

[49] This was the provision of the Senate bill as reported to the House. It was over the House amendment to this that the Houses disagreed. Cf. _Ibid._, p. 484.

[50] Cf. _Annals of Cong._, 9 Cong. 2 sess. pp. 527-8.

[51] _Ibid._, p. 528.

[52] _Ibid._, p. 626.

[53] _Ibid._

[54] _Ibid._

[55] _Ibid._, pp. 636-8; _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 616, and House Bill No. 219; _Ibid._, 10 Cong. 1 sess. VI. 27, 50; _Annals of Cong._, 10 Cong. 1 sess. pp. 854-5, 961.

[56] On account of the meagre records it is difficult to follow the course of this bill. I have pieced together information from various sources, and trust that this account is approximately correct.

[57] Cf. _Senate Journal_ (repr. 1821), 9 Cong. 2 sess. IV., Senate Bill No. 41.

[58] _Annals of Cong._, 9 Cong. 1 sess. p. 438. Cf. above, § 53.

[59] This amendment of the Committee of the Whole was adopted by a vote of 63 to 53. The New England States stood 3 to 2 for the death penalty; the Middle States were evenly divided, 3 and 3; and the South stood 5 to 0 against it, with Kentucky evenly divided. Cf. _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 504.

[60] _Ibid._, V. 514-5.

[61] The substitution of the Senate bill was a victory for the anti-slavery party, as all battles had to be fought again. The Southern party, however, succeeded in carrying all its amendments.

[62] Messrs. Betton of New Hampshire, Chittenden of Vermont, Garnett and Trigg of Virginia, and D.R. Williams of South Carolina voted against the bill: _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 585-6.

[63] _Annals of Cong._, 9 Cong. 2 sess. pp. 626-7.

[64] The unassigned dates refer to debates, etc. The history of the amendments and debates on the measure may be traced in the following references:--

Senate (Bill No. 41).

Annals of Cong., 9 Cong. 1 sess. pp. 20-1; 9 Cong. 2 sess. pp. 16, 19, 23, 33, 36, 45, 47, 68, 69, 70, 71, 79, 87, 93, etc.

Senate Journal (repr. 1826), 9 Cong. 1-2 sess. IV. 11, 112, 123, 124, 132, 133, 150, 158, 164, 165, 167, 168, etc.

[72] _House Doc._, 15 Cong. 2 sess. IV. No. 84, p. 5.

[73] See, e.g., _House Journal_ (repr. 1826), 11 Cong. 3 sess. VII. p. 575.

[74] Drake, _Revelations of a Slave Smuggler_, p. 51. Parts of this narrative are highly colored and untrustworthy; this passage, however, has every earmark of truth, and is confirmed by many incidental allusions.

[75] For accounts of these slavers, see _House Reports_, 17 Cong. 1 sess. II. No. 92, pp. 30-50. The "Paz" was an armed slaver flying the American flag.

[76] Said to be owned by an Englishman, but fitted in America and manned by Americans. It was eventually captured by H.M.S. "Bann," after a hard fight.

[77] Also called Spanish schooner "Triumvirate," with American supercargo, Spanish captain, and American, French, Spanish, and English crew. It was finally captured by a British vessel.

[78] An American slaver of 1814, which was boarded by a British vessel. All the above cases, and many others, were proven before British courts.

[79] _House Reports_, 17 Cong. 1 sess. II. No. 92, p. 51.

[80] _House Doc._, 15 Cong. 1 sess. II. No. 12, pp. 22, 38. This slaver was after capture sent to New Orleans,--an illustration of the irony of the Act of 1807.

[81] _House Journal_, 14 Cong. 2 sess. p. 15.

[82] _House Doc._, 16 Cong. 1 sess. III. No. 36, p. 5.

[83] _Ibid._, 15 Cong. 1 sess. II. No. 12, pp. 8-14. See Chew's letter of Oct. 17, 1817: _Ibid._, pp. 14-16.

[84] By the secret Joint Resolution and Act of 1811 (_Statutes at Large_, III. 471), Congress gave the President power to suppress the Amelia Island establishment, which was then notorious. The capture was not accomplished until 1817.

[85] _House Doc._, 16 Cong. 1 sess. III. No. 42, pp. 10-11. Cf. Report of the House Committee, Jan. 10, 1818: "It is but too notorious that numerous infractions of the law prohibiting the importation of slaves into the United States have been perpetrated with impunity upon our southern frontier." _Amer. State Papers, Miscellaneous_, II. No. 441.

[92] _Ibid._, p. 6.

[93] _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 82.

[94] They were not general instructions, but were directed to Commander Campbell. Cf. _House Doc._, 15 Cong. 2 sess. IV. No. 84, pp. 5-6.

[95] _Statutes at Large_, III. 471 ff.

[96] _House Doc._, 15 Cong. 2 sess. VI. No. 107, pp. 8-9.

[97] _Ibid._, IV. No. 84. Cf. Chew's letters in _House Reports_, 21 Cong. 1 sess. III. No. 348.

[98] _House Doc._, 15 Cong. 1 sess. II. No. 12, pp. 22, 38; 15 Cong. 2 sess. VI. No. 100, p. 13; 16 Cong. 1 sess. III. No. 42, p. 9, etc.; _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 85.

[99] _House Doc._, 15 Cong. 2 sess. VI. No. 107, pp. 8-9.

[100] _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 77.

[101] Cf. _House Doc._, 16 Cong. 1 sess. III. No. 42, p. 11: "The Grand Jury found true bills against the owners of the vessels, masters, and a supercargo--all of whom are discharged; why or wherefore I cannot say, except that it could not be for want of proof against them."

[102] E.g., in July, 1818, one informer "will have to leave that part of the country to save his life": _Ibid._, 15 Cong. 2 sess. VI. No. 100, p. 9.

[103] Joseph Nourse, Register of the Treasury, to Hon. W.H. Crawford, Secretary of the Treasury: _Ibid._, 15 Cong. 2 sess. VI. No. 107, p. 5.

[104] The slaves on the "Constitution" were not condemned, for the technical reason that she was not captured by a commissioned officer of the United States navy.

[105] These proceedings are very obscure, and little was said about them. The Spanish claimants were, it was alleged with much probability, but representatives of Americans. The claim was paid under the provisions of the Treaty of Florida, and included slaves whom the court afterward declared forfeited.

[106] An act to relieve him was finally passed, Feb. 8, 1827, nine years after the capture. See _Statutes at Large_, VI. 357.

[107] It is difficult to get at the exact facts in this complicated case. The above statement is, I think, much milder than the real facts would warrant, if thoroughly known. Cf. _House Reports_, 19 Cong. 1 sess. II. No. 231; 21 Cong. 1 sess. III. No. 348, pp. 62-3, etc.; 24 Cong. 1 sess. I. No. 209; _Amer. State Papers, Naval_, II. No. 308.

[108] The first method, represented by the Act of 1818, was favored by the South, the Senate, and the Democrats; the second method, represented by the Act of 1819, by the North, the House, and by the as yet undeveloped but growing Whig party.

[109] Committees on the slave-trade were appointed by the House in 1810 and 1813; the committee of 1813 recommended a revision of the laws, but nothing was done: _Annals of Cong._, 11 Cong. 3 sess. p. 387; 12 Cong. 2 sess. pp. 1074, 1090. The presidential message of 1816 led to committees on the trade in both Houses. The committee of the House of Representatives reported a joint resolution on abolishing the traffic and colonizing the Negroes, also looking toward international action. This never came to a vote: _Senate Journal_, 14 Cong. 2 sess. pp. 46, 179, 180; _House Journal_, 14 Cong. 2 sess. pp. 25, 27, 380; _House Doc_, 14 Cong. 2 sess. II. No. 77. Finally, the presidential message of 1817 (_House Journal_, 15 Cong. 1 sess. p. 11), announcing the issuance of orders to suppress the Amelia Island establishment, led to two other committees in both Houses. The House committee under Middleton made a report with a bill (_Amer. State Papers, Miscellaneous_, II. No. 441), and the Senate committee also reported a bill.

[110] The Senate debates were entirely unreported, and the report of the House debates is very meagre. For the proceedings, see _Senate Journal_, 15 Cong. 1 sess. pp. 243, 304, 315, 333, 338, 340, 348, 377, 386, 388, 391, 403, 406; _House Journal_, 15 Cong. 1 sess. pp. 19, 20, 29, 51, 92, 131, 362, 410, 450, 452, 456, 468, 479, 484, 492, 505.

[111] Simkins of South Carolina, Edwards of North Carolina, and Pindall: _Annals of Cong._, 15 Cong. 1 sess. p. 1740.

[112] Hugh Nelson of Virginia: _Annals of Cong._, 15 Cong. 1 sess. p. 1740.

[113] _Statutes at Large_, III. 450. By this act the first six sections of the Act of 1807 were repealed.

[114] Or, more accurately speaking, every one realized, in view of the increased activity of the trade, that it would be a failure.

[115] Nov. 18, 1818, the part of the presidential message referring to the slave-trade was given to a committee of the House, and this committee also took in hand the House bill of the previous session which the Senate bill had replaced: _House Journal_, 15 Cong. 2 sess. pp. 9-19, 42, 150, 179, 330, 334, 341, 343, 352.

[116] Of which little was reported: _Annals of Cong._, 15 Cong. 2 sess. pp. 1430-31. Strother opposed, "for various reasons of expediency," the bounties for captors. Nelson of Virginia advocated the death penalty, and, aided by Pindall, had it inserted. The vote on the bill was 57 to 45.

[117] The Senate had also had a committee at work on a bill which was reported Feb. 8, and finally postponed: _Senate Journal_, 15 Cong. 2 sess. pp. 234, 244, 311-2, 347. The House bill was taken up March 2: _Annals of Cong._, 15 Cong. 2 sess. p. 280.

[118] _Statutes at Large_, III. 532.

[119] _Annals of Cong._, 15 Cong. 2 sess. p. 1430. This insured the trial of slave-traders in a sympathetic slave State, and resulted in the "disappearance" of many captured Negroes.

[120] _Statutes at Large_, III. 533.

[121] The first of a long series of appropriations extending to 1869, of which a list is given on the next page. The totals are only approximately correct. Some statutes may have escaped me, and in the reports of moneys the surpluses of previous years are not always clearly distinguishable.

[122] In the first session of the sixteenth Congress, two bills on piracy were introduced into the Senate, one of which passed, April 26. In the House there was a bill on piracy, and a slave-trade committee reported recommending that the slave-trade be piracy. The Senate bill and this bill were considered in Committee of the Whole, May 11, and a bill was finally passed declaring, among other things, the traffic piracy. In the Senate there was "some discussion, rather on the form than the substance of these amendments," and "they were agreed to without a division": _Senate Journal_, 16 Cong. 1 sess. pp. 238, 241, 268, 287, 314, 331, 346, 350, 409, 412, 417, 420, 422, 424, 425; _House Journal_, 16 Cong. 1 sess. pp. 113, 280, 453, 454, 494, 518, 520, 522, 537; _Annals of Cong._, 16 Cong. 1 sess. pp. 693-4, 2231, 2236-7, etc. The debates were not reported.

[123] _Statutes at Large_, III. 600-1. This act was in reality a continuation of the piracy Act of 1819, and was only temporary. The provision was, however, continued by several acts, and finally made perpetual by the Act of Jan. 30, 1823: _Statutes at Large_, III. 510-4, 721. On March 3, 1823, it was slightly amended so as to give district courts jurisdiction.

[124] Attorney-General Wirt advised him, October, 1819, that no part of the appropriation could be used to purchase land in Africa or tools for the Negroes, or as salary for the agent: _Opinions of Attorneys-General_, I. 314-7. Monroe laid the case before Congress in a special message Dec. 20, 1819 (_House Journal_, 16 Cong. 1 sess. p. 57); but no action was taken there.

[147] A few accounts of captures here and there would make the matter less suspicious; these, however, do not occur. How large this suspected illicit traffic was, it is of course impossible to say; there is no reason why it may not have reached many hundreds per year.

[148] Cf. editorial in _Niles's Register_, XXII. 114. Cf. also the following instances of pardons:--

PRESIDENT JEFFERSON: March 1, 1808, Phillip M. Topham, convicted for "carrying on an illegal slave-trade" (pardoned twice). _Pardons and Remissions_, I. 146, 148-9.

PRESIDENT MADISON: July 29, 1809, fifteen vessels arrived at New Orleans from Cuba, with 666 white persons and 683 negroes. Every penalty incurred under the Act of 1807 was remitted. (Note: "Several other pardons of this nature were granted.") _Ibid._, I. 179.

Nov. 8, 1809, John Hopkins and Lewis Le Roy, convicted for importing a slave. _Ibid._, I. 184-5.

Feb. 12, 1810, William Sewall, convicted for importing slaves. _Ibid._, I. 194, 235, 240.

May 5, 1812, William Babbit, convicted for importing slaves. _Ibid._, I. 248.

PRESIDENT MONROE: June 11, 1822, Thomas Shields, convicted for bringing slaves into New Orleans. _Ibid._, IV. 15.

Aug. 24, 1822, J.F. Smith, sentenced to five years' imprisonment and $3000 fine; served twenty-five months and was then pardoned. _Ibid._, IV. 22.

July 23, 1823, certain parties liable to penalties for introducing slaves into Alabama. _Ibid._, IV. 63.

Aug. 15, 1823, owners of schooner "Mary," convicted of importing slaves. _Ibid._, IV. 66.

PRESIDENT J.Q. ADAMS: March 4, 1826, Robert Perry; his ship was forfeited for slave-trading. _Ibid._, IV. 140.

Jan. 17, 1827, Jesse Perry; forfeited ship, and was convicted for introducing slaves. _Ibid._, IV. 158.

Feb. 13, 1827, Zenas Winston; incurred penalties for slave-trading. _Ibid._, IV. 161. The four following cases are similar to that of Winston:--

Feb. 24, 1827, John Tucker and William Morbon. _Ibid._, IV. 162.

March 25, 1828, Joseph Badger. _Ibid._, IV. 192.

Feb. 19, 1829, L.R. Wallace. _Ibid._, IV. 215.

PRESIDENT JACKSON: Five cases. _Ibid._, IV. 225, 270, 301, 393, 440.

The above cases were taken from manuscript copies of the Washington records, made by Mr. W.C. Endicott, Jr., and kindly loaned me.

[149] See _Senate Journal_, 20 Cong. 1 sess. pp. 60, 66, 340, 341, 343, 348, 352, 355; _House Journal_, 20 Cong. 1 sess. pp. 59, 76, 123, 134, 156, 169, 173, 279, 634, 641, 646, 647, 688, 692.

[150] _Statutes at Large_, VI. 376.

[151] Among interesting minor proceedings in this period were two Senate bills to register slaves so as to prevent illegal importation. They were both dropped in the House; a House proposition to the same effect also came to nothing: _Senate Journal_, 15 Cong. 1 sess. pp. 147, 152, 157, 165, 170, 188, 201, 203, 232, 237; 15 Cong. 2 sess. pp. 63, 74, 77, 202, 207, 285, 291, 297; _House Journal_, 15 Cong. 1 sess. p. 332; 15 Cong. 2 sess. pp. 303, 305, 316; 16 Cong. 1 sess. p. 150. Another proposition was contained in the Meigs resolution presented to the House, Feb. 5, 1820, which proposed to devote the public lands to the suppression of the slave-trade. This was ruled out of order. It was presented again and laid on the table in 1821: _House Journal_, 16 Cong. 1 sess. pp. 196, 200, 227; 16 Cong. 2 sess. p. 238.

Chapter IX

THE INTERNATIONAL STATUS OF THE SLAVE-TRADE.

1783-1862.

66. The Rise of the Movement against the Slave-Trade, 1788-1807. 67. Concerted Action of the Powers, 1783-1814. 68. Action of the Powers from 1814 to 1820. 69. The Struggle for an International Right of Search, 1820-1840. 70. Negotiations of 1823-1825. 71. The Attitude of the United States and the State of the Slave-Trade. 72. The Quintuple Treaty, 1839-1842. 73. Final Concerted Measures, 1842-1862.

66. ~The Rise of the Movement against the Slave-Trade, 1788-1807.~ At the beginning of the nineteenth century England held 800,000 slaves in her colonies; France, 250,000; Denmark, 27,000; Spain and Portugal, 600,000; Holland, 50,000; Sweden, 600; there were also about 2,000,000 slaves in Brazil, and about 900,000 in the United States.[1] This was the powerful basis of the demand for the slave-trade; and against the economic forces which these four and a half millions of enforced laborers represented, the battle for freedom had to be fought.

Denmark first responded to the denunciatory cries of the eighteenth century against slavery and the slave-trade. In 1792, by royal order, this traffic was prohibited in the Danish possessions after 1802. The principles of the French Revolution logically called for the extinction of the slave system by France. This was, however, accomplished more precipitately than the Convention anticipated;

and in a whirl of enthusiasm engendered by the appearance of the Dominican deputies, slavery and the slave-trade were abolished in all French colonies February 4, 1794.[2] This abolition was short-lived; for at the command of the First Consul slavery and the slave-trade was restored in An X (1799).[3] The trade was finally abolished by Napoleon during the Hundred Days by a decree, March 29, 1815, which briefly declared: "À dater de la publication du présent Décret, la Traite des Noirs est abolie."[4] The Treaty of Paris eventually confirmed this law.[5]

In England, the united efforts of Sharpe, Clarkson, and Wilberforce early began to arouse public opinion by means of agitation and pamphlet literature. May 21, 1788, Sir William Dolben moved a bill regulating the trade, which passed in July and was the last English measure countenancing the traffic.[6] The report of the Privy Council on the subject in 1789[7] precipitated the long struggle. On motion of Pitt, in 1788, the House had resolved to take up at the next session the question of the abolition of the trade.[8] It was, accordingly, called up by Wilberforce, and a remarkable parliamentary battle ensued, which lasted continuously until 1805. The Grenville-Fox ministry now espoused the cause. This ministry first prohibited the trade with such colonies as England had acquired by conquest during the Napoleonic wars; then, in 1806, they prohibited the foreign slave-trade; and finally, March 25, 1807, enacted the total abolition of the traffic.[9]

67. ~Concerted Action of the Powers, 1783-1814.~ During the peace negotiations between the United States and Great Britain in 1783, it was proposed by Jay, in June, that there be a proviso inserted as follows: "Provided that the subjects of his Britannic Majesty shall not have any right or claim under the convention, to carry or import, into the said States any slaves from any part of the world; it being the intention of the said States entirely to prohibit the importation thereof."[10] Fox promptly replied: "If that be their policy, it never can be competent to us to dispute with them their own regulations."[11] No mention of this was, however, made in the final treaty, probably because it was thought unnecessary.

In the proposed treaty of 1806, signed at London December 31, Article 24 provided that "The high contracting parties engage to communicate to each other, without delay, all such laws as have been or shall be hereafter enacted by their respective Legislatures, as also all measures which shall have been taken for the abolition or limitation of the African slave trade; and they further agree to use their best endeavors to procure the co-operation of other Powers for the final and complete abolition of a trade so repugnant to the principles of justice and humanity."[12]

This marks the beginning of a long series of treaties between England and other powers looking toward the prohibition of the traffic by international agreement. During the years 1810-1814 she signed treaties relating to the subject with Portugal, Denmark, and Sweden.[13] May 30, 1814, an additional article to the Treaty of Paris, between France and Great Britain, engaged these powers to endeavor to induce the approaching Congress at Vienna "to decree the abolition of the Slave Trade, so that the said Trade shall cease universally, as it shall cease definitively, under any circumstances, on the part of the French Government, in the course of 5 years; and that during the said period no Slave Merchant shall import or sell Slaves, except in the Colonies of the State of which he is a Subject."[14] In addition to this, the next day a circular letter was despatched by Castlereagh to Austria, Russia, and Prussia, expressing the hope "that the Powers of Europe, when restoring Peace to Europe, with one common interest, will crown this great work by interposing their benign offices in favour of those Regions of the Globe, which yet continue to be desolated by this unnatural and inhuman traffic."[15] Meantime additional treaties were secured: in 1814 by royal decree Netherlands agreed to abolish the trade;[16] Spain was induced by her necessities to restrain her trade to her own colonies, and to endeavor to prevent the fraudulent use of her flag by foreigners;[17] and in 1815 Portugal agreed to abolish the slave-trade north of the equator.[18]

68. ~Action of the Powers from 1814 to 1820.~ At the Congress of Vienna, which assembled late in 1814, Castlereagh was indefatigable in his endeavors to secure the abolition of the trade. France and Spain, however, refused to yield farther than they had already done, and the other powers hesitated to go to the lengths he recommended. Nevertheless, he secured the institution of annual conferences on the matter, and a declaration by the Congress strongly condemning the trade and declaring that "the public voice in all civilized countries was raised to demand its suppression as soon as possible," and that, while the definitive period of termination would be left to subsequent negotiation, the sovereigns would not consider their work done until the trade was entirely suppressed.[19]

In the Treaty of Ghent, between Great Britain and the United States, ratified February 17, 1815, Article 10, proposed by Great Britain, declared that, "Whereas the traffic in slaves is irreconcilable with the principles of humanity and justice," the two countries agreed to use their best endeavors in abolishing the trade.[20] The final overthrow of Napoleon was marked by a second declaration of the powers, who, "desiring to give effect to the measures on which they deliberated at the Congress of Vienna, relative to the complete and universal abolition of the Slave Trade, and having, each in their respective Dominions, prohibited

without restriction their Colonies and Subjects from taking any part whatever in this Traffic, engage to renew conjointly their efforts, with the view of securing final success to those principles which they proclaimed in the Declaration of the 4th February, 1815, and of concerting, without loss of time, through their Ministers at the Courts of London and of Paris, the most effectual measures for the entire and definitive abolition of a Commerce so odious, and so strongly condemned by the laws of religion and of nature."[21]

Treaties further restricting the trade continued to be made by Great Britain: Spain abolished the trade north of the equator in 1817,[22] and promised entire abolition in 1820; Spain, Portugal, and Holland also granted a mutual limited Right of Search to England, and joined in establishing mixed courts.[23] The effort, however, to secure a general declaration of the powers urging, if not compelling, the abolition of the trade in 1820, as well as the attempt to secure a qualified international Right of Visit, failed, although both propositions were strongly urged by England at the Conference of 1818.[24]

69. ~The Struggle for an International Right of Search, 1820-1840.~ Whatever England's motives were, it is certain that only a limited international Right of Visit on the high seas could suppress or greatly limit the slave-trade. Her diplomacy was therefore henceforth directed to this end. On the other hand, the maritime supremacy of England, so successfully asserted during the Napoleonic wars, would, in case a Right of Search were granted, virtually make England the policeman of the seas; and if nations like the United States had already, under present conditions, had just cause to complain of violations by England of their rights on the seas, might not any extension of rights by international agreement be dangerous? It was such considerations that for many years brought the powers to a dead-lock in their efforts to suppress the slave-trade.

At first it looked as if England might attempt, by judicial decisions in her own courts, to seize even foreign slavers.[25] After the war, however, her courts disavowed such action,[26] and the right was sought for by treaty stipulation. Castlereagh took early opportunity to approach the United States on the matter, suggesting to Minister Rush, June 20, 1818, a mutual but strictly limited Right of Search.[27] Rush was ordered to give him assurances of the solicitude of the United States to suppress the traffic, but to state that the concessions asked for appeared of a character not adaptable to our institutions. Negotiations were then transferred to Washington; and the new British minister, Mr. Stratford Canning, approached Adams with full instructions in December, 1820.[28]

Meantime, it had become clear to many in the United States that the individual efforts of States could never suppress or even limit the trade without systematic co-operation. In 1817 a committee of the House had urged the opening of negotiations looking toward such international co-operation,[29] and a Senate motion to the same effect had caused long debate.[30] In 1820 and 1821 two House committee reports, one of which recommended the granting of a Right of Search, were adopted by the House, but failed in the Senate.[31] Adams, notwithstanding this, saw constitutional objections to the plan proposed by Canning, and wrote to him, December 30: "A Compact, giving the power to the Naval Officers of one Nation to search the Merchant Vessels of another for Offenders and offences against the Laws of the latter, backed by a further power to seize and carry into a Foreign Port, and there subject to the decision of a Tribunal composed of at least one half Foreigners, irresponsible to the Supreme Corrective tribunal of this Union, and not amendable to the controul of impeachment for official misdemeanors, was an investment of power, over the persons, property and reputation of the Citizens of this Country, not only unwarranted by any delegation of Sovereign Power to the National Government, but so adverse to the elementary principles and indispensable securities of individual rights, ... that not even the most unqualified approbation of the ends ... could justify the transgression." He then suggested co-operation of the fleets on the coast of Africa, a proposal which was promptly accepted.[32]

The slave-trade was again a subject of international consideration at the Congress of Verona in 1822. Austria, France, Great Britain, Russia, and Prussia were represented. The English delegates declared that, although only Portugal and Brazil allowed the trade, yet the traffic was at that moment carried on to a greater extent than ever before. They said that in seven months of the year 1821 no less than 21,000 slaves were abducted, and three hundred and fifty-two vessels entered African ports north of the equator. "It is obvious," said they, "that this crime is committed in contravention of the Laws of every Country of Europe, and of America, excepting only of one, and that it requires something more than the ordinary operation of Law to prevent it." England therefore recommended:--

1. That each country denounce the trade as piracy, with a view of founding upon the aggregate of such separate declarations a general law to be incorporated in the Law of Nations.

2. A withdrawing of the flags of the Powers from persons not natives of these States, who engage in the traffic under the flags of these States.

3. A refusal to admit to their domains the produce of the colonies of States allowing the trade, a measure which would apply to Portugal and Brazil alone.

These proposals were not accepted. Austria would agree to the first two only; France refused to denounce the trade as piracy; and Prussia was non-committal. The utmost that could be gained was another denunciation of the trade couched in general terms.[33]

70. ~Negotiations of 1823-1825.~ England did not, however, lose hope of gaining some concession from the United States. Another House committee had, in 1822, reported that the only method of suppressing the trade was by granting a Right of Search.[34] The House agreed, February 28, 1823, to request the President to enter into negotiations with the maritime powers of Europe to denounce the slave-trade as piracy; an amendment "that we agree to a qualified right of search" was, however, lost.[35] Meantime, the English minister was continually pressing the matter upon Adams, who proposed in turn to denounce the trade as piracy. Canning agreed to this, but only on condition that it be piracy under the Law of Nations and not merely by statute law. Such an agreement, he said, would involve a Right of Search for its enforcement; he proposed strictly to limit and define this right, to allow captured ships to be tried in their own courts, and not to commit the United States in any way to the question of the belligerent Right of Search. Adams finally sent a draft of a proposed treaty to England, and agreed to recognize the slave-traffic "as piracy under the law of nations, namely: that, although seizable by the officers and authorities of every nation, they should be triable only by the tribunals of the country of the slave trading vessel."[36]

Rush presented this _project_ to the government in January, 1824. England agreed to all the points insisted on by the United States; viz., that she herself should denounce the trade as piracy; that slavers should be tried in their own country; that the captor should be laid under the most effective responsibility for his conduct; and that vessels under convoy of a ship of war of their own country should be exempt from search. In addition, England demanded that citizens of either country captured under the flag of a third power should be sent home for trial, and that citizens of either country chartering vessels of a third country should come under these stipulations.[37]

This convention was laid before the Senate April 30, 1824, but was not acted upon until May 21, when it was so amended as to make it terminable at six months' notice. The same day, President Monroe, "apprehending, from the delay in the decision, that some difficulty exists," sent a special message to the Senate, giving at length the reasons for signing the treaty, and saying that "should this Convention be adopted, there is every reason to believe, that it will be the commencement of a system destined to accomplish the entire Abolition of the Slave Trade." It was, however, a time of great political pot-boiling, and consequently an unfortunate occasion to ask senators to settle any great question. A systematic attack, led by Johnson of Louisiana, was made on all the vital provisions of the treaty: the waters of America were excepted from its application, and those of the West Indies barely escaped exception; the provision which, perhaps, aimed the deadliest blow at American slave-trade interests was likewise struck out; namely, the application of the Right of Search to citizens chartering the vessels of a third nation.[38]

The convention thus mutilated was not signed by England, who demanded as the least concession the application of the Right of Search to American waters. Meantime the United States had invited nearly all nations to denounce the trade as piracy; and the President, the Secretary of the Navy, and a House committee had urgently favored the granting of the Right of Search. The bad faith of Congress, however, in the matter of the Colombian treaty broke off for a time further negotiations with England.[39]

71. ~The Attitude of the United States and the State of the Slave-Trade.~ In 1824 the Right of Search was established between England and Sweden, and in 1826 Brazil promised to abolish the trade in three years.[40] In 1831 the cause was greatly advanced by the signing of a treaty between Great Britain and France, granting mutually a geographically limited Right of Search.[41] This led, in the next few years, to similar treaties with Denmark, Sardinia,[42] the Hanse towns,[43] and Naples.[44] Such measures put the trade more and more in the hands of Americans, and it began greatly to increase. Mercer sought repeatedly in the House to have negotiations reopened with England, but without success.[45] Indeed, the chances of success were now for many years imperilled by the recurrence of deliberate search of American vessels by the British.[46] In the majority of cases the vessels proved to be slavers, and some of them fraudulently flew the American flag; nevertheless, their molestation by British cruisers created much feeling, and hindered all steps toward an understanding: the United States was loath to have her criminal negligence in enforcing her own laws thus exposed by foreigners. Other international questions connected with the trade also strained the relations of the two countries: three different vessels engaged in the domestic slave-trade, driven by stress of weather, or, in the "Creole" case, captured by Negroes on board, landed slaves in British possessions; England freed them, and refused to pay for such as were landed after emancipation had been proclaimed in the West Indies.[47] The case of the slaver "L'Amistad" also raised difficulties with Spain. This Spanish vessel, after the Negroes on board had mutinied and killed their owners, was seized by a

United States vessel and brought into port for adjudication. The court, however, freed the Negroes, on the ground that under Spanish law they were not legally slaves; and although the Senate repeatedly tried to indemnify the owners, the project did not succeed.[48]

Such proceedings well illustrate the new tendency of the pro-slavery party to neglect the enforcement of the slave-trade laws, in a frantic defence of the remotest ramparts of slave property. Consequently, when, after the treaty of 1831, France and England joined in urging the accession of the United States to it, the British minister was at last compelled to inform Palmerston, December, 1833, that "the Executive at Washington appears to shrink from bringing forward, in any shape, a question, upon which depends the completion of their former object--the utter and universal Abolition of the Slave Trade--from an apprehension of alarming the Southern States."[49] Great Britain now offered to sign the proposed treaty of 1824 as amended; but even this Forsyth refused, and stated that the United States had determined not to become "a party of any Convention on the subject of the Slave Trade."[50]

Estimates as to the extent of the slave-trade agree that the traffic to North and South America in 1820 was considerable, certainly not much less than 40,000 slaves annually. From that time to about 1825 it declined somewhat, but afterward increased enormously, so that by 1837 the American importation was estimated as high as 200,000 Negroes annually. The total abolition of the African trade by American countries then brought the traffic down to perhaps 30,000 in 1842. A large and rapid increase of illicit traffic followed; so that by 1847 the importation amounted to nearly 100,000 annually. One province of Brazil is said to have received 173,000 in the years 1846-1849. In the decade 1850-1860 this activity in slave-trading continued, and reached very large proportions.

The traffic thus carried on floated under the flags of France, Spain, and Portugal, until about 1830; from 1830 to 1840 it began gradually to assume the United States flag; by 1845, a large part of the trade was under the stars and stripes; by 1850 fully one-half the trade, and in the decade, 1850-1860 nearly all the traffic, found this flag its best protection.[51]

72. ~The Quintuple Treaty, 1839-1842.~ In 1839 Pope Gregory XVI. stigmatized the slave-trade "as utterly unworthy of the Christian name;" and at the same time, although proscribed by the laws of every civilized State, the trade was flourishing with pristine vigor. Great advantage was given the traffic by the fact that the United States, for two decades after the abortive attempt of 1824, refused to co-operate with the rest of the civilized world, and allowed her flag to shelter and protect the slave-trade. If a fully equipped slaver sailed from New York, Havana, Rio Janeiro, or Liverpool, she had only to hoist the stars and stripes in order to proceed unmolested on her piratical voyage; for there was seldom a United States cruiser to be met with, and there were, on the other hand, diplomats at Washington so jealous of the honor of the flag that they would prostitute it to crime rather than allow an English or a French cruiser in any way to interfere. Without doubt, the contention of the United States as to England's pretensions to a Right of Visit was technically correct. Nevertheless, it was clear that if the slave-trade was to be suppressed, each nation must either zealously keep her flag from fraudulent use, or, as a labor-saving device, depute to others this duty for limited places and under special circumstances. A failure of any one nation to do one of these two things meant that the efforts of all other nations were to be fruitless. The United States had invited the world to join her in denouncing the slave-trade as piracy; yet, when such a pirate was waylaid by an English vessel, the United States complained or demanded reparation. The only answer which this country for years returned to the long-continued exposures of American slave-traders and of the fraudulent use of the American flag, was a recital of cases where Great Britain had gone beyond her legal powers in her attempt to suppress the slave-trade.[52] In the face of overwhelming evidence to the contrary, Secretary of State Forsyth declared, in 1840, that the duty of the United States in the matter of the slave-trade "has been faithfully performed, and if the traffic still exists as a disgrace to humanity, it is to be imputed to nations with whom Her Majesty's Government has formed and maintained the most intimate connexions, and to whose Governments Great Britain has paid for the right of active intervention in order to its complete extirpation."[53] So zealous was Stevenson, our minister to England, in denying the Right of Search, that he boldly informed Palmerston, in 1841, "that there is no shadow of pretence for excusing, much less justifying, the exercise of any such right. That it is wholly immaterial, whether the vessels be equipped for, or actually engaged in slave traffic or not, and consequently the right to search or detain even slave vessels, must be confined to the ships or vessels of those nations with whom it may have treaties on the subject."[54] Palmerston courteously replied that he could not think that the United States seriously intended to make its flag a refuge for slave-traders;[55] and Aberdeen pertinently declared: "Now, it can scarcely be maintained by Mr. Stevenson that Great Britain should be bound to permit her own subjects, with British vessels and British capital, to carry on, before the eyes of British officers, this detestable traffic in human beings, which the law has declared to be piracy, merely because they had the audacity to commit an additional offence by fraudulently usurping the American flag."[56] Thus the dispute, even after the advent of Webster, went on for a time, involving itself in metaphysical subtleties, and apparently leading no nearer to an understanding.[57]

In 1838 a fourth conference of the powers for the consideration of the slave-trade took place at London. It was attended by representatives of England, France, Russia, Prussia, and Austria. England laid the _projet_ of a treaty before them, to which all but France assented. This so-called Quintuple Treaty, signed December 20, 1841, denounced the slave-trade as piracy, and declared that "the High Contracting Parties agree by common consent, that those of their ships of war which shall be provided with special warrants and orders ... may search every merchant-vessel belonging to any one of the High Contracting Parties which shall, on reasonable grounds, be suspected of being engaged in the traffic in slaves." All captured slavers were to be sent to their own countries for trial.[58]

While the ratification of this treaty was pending, the United States minister to France, Lewis Cass, addressed an official note to Guizot at the French foreign office, protesting against the institution of an international Right of Search, and rather grandiloquently warning the powers against the use of force to accomplish their ends.[59] This extraordinary epistle, issued on the minister's own responsibility, brought a reply denying that the creation of any "new principle of international law, whereby the vessels even of those powers which have not participated in the arrangement should be subjected to the right of search," was ever intended, and affirming that no such extraordinary interpretation could be deduced from the Convention. Moreover, M. Guizot hoped that the United States, by agreeing to this treaty, would "aid, by its most sincere endeavors, in the definitive abolition of the trade."[60] Cass's theatrical protest was, consciously or unconsciously, the manifesto of that growing class in the United States who wanted no further measures taken for the suppression of the slave-trade; toward that, as toward the institution of slavery, this party favored a policy of strict _laissez-faire_.

73. ~Final Concerted Measures, 1842-1862.~ The Treaty of Washington, in 1842, made the first effective compromise in the matter and broke the unpleasant dead-lock, by substituting joint cruising by English and American squadrons for the proposed grant of a Right of Search. In submitting this treaty, Tyler said: "The treaty which I now submit to you proposes no alteration, mitigation, or modification of the rules of the law of nations. It provides simply that each of the two Governments shall maintain on the coast of Africa a sufficient squadron to enforce separately and respectively the laws, rights, and obligations of the two countries for the suppression of the slave trade."[61] This provision was a part of the treaty to settle the boundary disputes with England. In the Senate, Benton moved to strike out this article; but the attempt was defeated by a vote of 37 to 12, and the treaty was ratified.[62]

This stipulation of the treaty of 1842 was never properly carried out by the United States for any length of time.[63] Consequently the same difficulties as to search and visit by English vessels continued to recur. Cases like the following were frequent. The "Illinois," of Gloucester, Massachusetts, while lying at Whydah, Africa, was boarded by a British officer, but having American papers was unmolested. Three days later she hoisted Spanish colors and sailed away with a cargo of slaves. Next morning she fell in with another British vessel and hoisted American colors; the British ship had then no right to molest her; but the captain of the slaver feared that she would, and therefore ran his vessel aground, slaves and all. The senior English officer reported that "had Lieutenant Cumberland brought to and boarded the 'Illinois,' notwithstanding the American colors which she hoisted,... the American master of the 'Illinois' ... would have complained to his Government of the detention of his vessel."[64] Again, a vessel which had been boarded by British officers and found with American flag and papers was, a little later, captured under the Spanish flag with four hundred and thirty slaves. She had in the interim complained to the United States government of the boarding.[65]

Meanwhile, England continued to urge the granting of a Right of Search, claiming that the stand of the United States really amounted to the wholesale protection of pirates under her flag.[66] The United States answered by alleging that even the Treaty of 1842 had been misconstrued by England,[67] whereupon there was much warm debate in Congress, and several attempts were made to abrogate the slave-trade article of the treaty.[68] The pro-slavery party had become more and more suspicious of England's motives, since they had seen her abolition of the slave-trade blossom into abolition of the system itself, and they seized every opportunity to prevent co-operation with her. At the same time, European interest in the question showed some signs of weakening, and no decided action was taken. In 1845 France changed her Right of Search stipulations of 1833 to one for joint cruising,[69] while the Germanic Federation,[70] Portugal,[71] and Chili[72]enounced the trade as piracy. In 1844 Texas granted the Right of Search to England,[73] and in 1845 Belgium signed the Quintuple Treaty.[74]

Discussion between England and the United States was revived when Cass held the State portfolio, and, strange to say, the author of "Cass's Protest" went farther than any of his predecessors in acknowledging the justice of England's demands. Said he, in 1859: "If The United States maintained that, by carrying their flag at her masthead, any vessel became thereby entitled to the immunity which belongs to American vessels, they might well be reproached with assuming a position which would go far towards shielding crimes upon the ocean from punishment; but they advance no such pretension, while they concede that, if in the honest

examination of a vessel sailing under American colours, but accompanied by strongly-marked suspicious circumstances, a mistake is made, and she is found to be entitled to the flag she bears, but no injury is committed, and the conduct of the boarding party is irreproachable, no Government would be likely to make a case thus exceptional in its character a subject of serious reclamation."[75] While admitting this and expressing a desire to co-operate in the suppression of the slave-trade, Cass nevertheless steadily refused all further overtures toward a mutual Right of Search.

The increase of the slave-traffic was so great in the decade 1850-1860 that Lord John Russell proposed to the governments of the United States, France, Spain, Portugal, and Brazil, that they instruct their ministers to meet at London in May or June, 1860, to consider measures for the final abolition of the trade. He stated: "It is ascertained, by repeated instances, that the practice is for vessels to sail under the American flag. If the flag is rightly assumed, and the papers correct, no British cruizer can touch them. If no slaves are on board, even though the equipment, the fittings, the water-casks, and other circumstances prove that the ship is on a Slave Trade venture, no American cruizer can touch them."[76] Continued representations of this kind were made to the paralyzed United States government; indeed, the slave-trade of the world seemed now to float securely under her flag. Nevertheless, Cass refused even to participate in the proposed conference, and later refused to accede to a proposal for joint cruising off the coast of Cuba.[77] Great Britain offered to relieve the United States of any embarrassment by receiving all captured Africans into the West Indies; but President Buchanan "could not contemplate any such arrangement," and obstinately refused to increase the suppressing squadron.[78]

On the outbreak of the Civil War, the Lincoln administration, through Secretary Seward, immediately expressed a willingness to do all in its power to suppress the slave-trade.[79] Accordingly, June 7, 1862, a treaty was signed with Great Britain granting a mutual limited Right of Search, and establishing mixed courts for the trial of offenders at the Cape of Good Hope, Sierra Leone, and New York.[80] The efforts of a half-century of diplomacy were finally crowned; Seward wrote to Adams, "Had such a treaty been made in 1808, there would now have been no sedition here."[81]

[7] Various petitions had come in praying for an abolition of the slave-trade; and by an order in Council, Feb. 11, 1788, a committee of the Privy Council was ordered to take evidence on the subject. This committee presented an elaborate report in 1739. See published _Report_, London, 1789.

[8] For the history of the Parliamentary struggle, cf. Clarkson's and Copley's histories. The movement was checked in the House of Commons in 1789, 1790, and 1791. In 1792 the House of Commons resolved to abolish the trade in 1796. The Lords postponed the matter to take evidence. A bill to prohibit the foreign slave-trade was lost in 1793, passed the next session, and was lost in the House of Lords. In 1795, 1796, 1798, and 1799 repeated attempts to abolish the trade were defeated. The matter then rested until 1804, when the battle was renewed with more success.

[24] This was the first meeting of the London ministers of the powers according to agreement; they assembled Dec. 4, 1817, and finally called a meeting of plenipotentiaries on the question of suppression at Aix-la-Chapelle, beginning Oct. 24, 1818. Among those present were Metternich, Richelieu, Wellington, Castlereagh, Hardenberg, Bernstorff, Nesselrode, and Capodistrias. Castlereagh made two propositions: 1. That the five powers join in urging Portugal and Brazil to abolish the trade May 20, 1820; 2. That the powers adopt the principle of a mutual qualified Right of Search. No. 379, pp. 364-5, No. 414, p. 783, etc. Among the nations invited by the United States to co-operate in suppressing the trade was the United States of Colombia. Mr. Anderson, our minister, expressed "the certain belief that the Republic of Colombia will not permit herself to be behind any Government in the civilized world in the adoption of energetic measures for the suppression of this disgraceful traffic": _Ibid._, No. 407, p. 729. The little republic replied courteously; and, as a _projet_ for a treaty, Mr. Anderson offered the proposed English treaty of 1824, including the Senate amendments. Nevertheless, the treaty thus agreed to was summarily rejected by the Senate, March 9, 1825: _Ibid._, p. 735. Another result of this general invitation of the United States was a proposal by Colombia that the slave-trade and the status of Hayti be among the subjects for discussion at the Panama Congress. As a result of this, a Senate committee recommended that the United States take no part in the Congress. This report was finally disagreed to by a vote of 19 to 24: _Ibid._, No. 423, pp. 837, 860, 876, 882.

[40] _British and Foreign State Papers_, 1823-4, and 1826-7. Brazil abolished the trade in 1830.

Chapter X

THE RISE OF THE COTTON KINGDOM. 1820-1850.

74. The Economic Revolution. 75. The Attitude of the South. 76. The Attitude of the North and Congress. 77. Imperfect Application of the Laws. 78. Responsibility of the Government. 79. Activity of the Slave-Trade.

74. ~The Economic Revolution.~ The history of slavery and the slave-trade after 1820 must be read in the light of the industrial revolution through which the civilized world passed in the first half of the nineteenth century. Between the years 1775 and 1825 occurred economic events and changes of the highest importance and widest influence. Though all branches of industry felt the impulse of this new industrial life, yet, "if we consider single industries, cotton manufacture has, during the nineteenth century, made the most magnificent and gigantic advances."[1] This fact is easily explained by the remarkable series of inventions that revolutionized this industry between 1738 and 1830, including Arkwright's, Watt's, Compton's, and Cartwright's epoch-making contrivances.[2] The effect which these inventions had on the manufacture of cotton goods is best illustrated by the fact that in England, the chief cotton market of the world, the consumption of raw cotton rose steadily from 13,000 bales in 1781, to 572,000 in 1820, to 871,000 in 1830, and to 3,366,000 in 1860.[3] Very early, therefore, came the query whence the supply of raw cotton was to come. Tentative experiments on the rich, broad fields of the Southern United States, together with the indispensable invention of Whitney's cotton-gin, soon answered this question: a new economic future was opened up to this land, and immediately the whole South began to extend its cotton culture, and more and more to throw its whole energy into this one staple.

Here it was that the fatal mistake of compromising with slavery in the beginning, and of the policy of _laissez-faire_ pursued thereafter, became painfully manifest; for, instead now of a healthy, normal, economic development along proper industrial lines, we have the abnormal and fatal rise of a slave-labor large farming system, which, before it was realized, had so intertwined itself with and braced itself upon the economic forces of an industrial age, that a vast and terrible civil war was necessary to displace it. The tendencies to a patriarchal serfdom, recognizable in the age of Washington and Jefferson, began slowly but surely to disappear; and in the second quarter of the century Southern slavery was irresistibly changing from a family institution to an industrial system.

The development of Southern slavery has heretofore been viewed so exclusively from the ethical and social standpoint that we are apt to forget its close and indissoluble connection with the world's cotton market. Beginning with 1820, a little after the close of the Napoleonic wars, when the industry of cotton manufacture had begun its modern development and the South had definitely assumed her position as chief producer of raw cotton, we find the average price of cotton per pound, 8½_d._ From this time until 1845 the price steadily fell, until in the latter year it reached 4_d._; the only exception to this fall was in the years 1832-1839, when, among other things, a strong increase in the English demand, together with an attempt of the young slave power to "corner" the market, sent the price up as high as 11_d._ The demand for cotton goods soon outran a crop which McCullough had pronounced "prodigious," and after 1845 the price started on a steady rise, which, except for the checks suffered during the continental revolutions and the Crimean War, continued until 1860.[4] The steady increase in the production of cotton explains the fall in price down to 1845. In 1822 the crop was a half-million bales; in 1831, a million; in 1838, a million and a half; and in 1840-1843, two million. By this time the world's consumption of cotton goods began to increase so rapidly that, in spite of the increase in Southern crops, the price kept rising. Three million bales were gathered in 1852, three and a half million in 1856, and the remarkable crop of five million bales in 1860.[5]

Here we have data to explain largely the economic development of the South. By 1822 the large-plantation slave system had gained footing; in 1838-1839 it was able to show its power in the cotton "corner;" by the end of the next decade it had not only gained a solid economic foundation, but it had built a closed oligarchy with a political policy. The changes in price during the next few years drove out of competition many survivors of the small-farming free-labor system, and put the slave _régime_ in position to dictate the policy of the nation. The zenith of the system and the first inevitable signs of decay came in the years 1850-1860, when the rising price of cotton threw the whole economic energy of the South into its cultivation, leading to a terrible consumption of soil and slaves, to a great increase in the size of plantations, and to increasing power and effrontery on the part of the slave barons.

Finally, when a rising moral crusade conjoined with threatened economic disaster, the oligarchy, encouraged by the state of the cotton market, risked all on a political _coup-d'état_, which failed in the war of 1861-1865.[6]

75. ~The Attitude of the South.~ The attitude of the South toward the slave-trade changed _pari passu_ with this development of the cotton trade. From 1808 to 1820 the South half wished to get rid of a troublesome and abnormal institution, and yet saw no way to do so. The fear of insurrection and of the further spread of the disagreeable system led her to consent to the partial prohibition of the trade by severe national enactments. Nevertheless, she had in the matter no settled policy: she refused to support vigorously the execution of the laws she had helped to make, and at the same time she acknowledged the theoretical necessity of these laws. After 1820, however, there came a gradual change. The South found herself supplied with a body of slave laborers, whose number had been augmented by large illicit importations, with an abundance of rich land, and with all other natural facilities for raising a crop which was in large demand and peculiarly adapted to slave labor. The increasing crop caused a new demand for slaves, and an interstate slave-traffic arose between the Border and the Gulf States, which turned the former into slave-breeding districts, and bound them to the slave States by ties of strong economic interest.

As the cotton crop continued to increase, this source of supply became inadequate, especially as the theory of land and slave consumption broke down former ethical and prudential bounds. It was, for example, found cheaper to work a slave to death in a few years, and buy a new one, than to care for him in sickness and old age; so, too, it was easier to despoil rich, new land in a few years of intensive culture, and move on to the Southwest, than to fertilize and conserve the soil.[7] Consequently, there early came a demand for land and slaves greater than the country could supply. The demand for land showed itself in the annexation of Texas, the conquest of Mexico, and the movement toward the acquisition of Cuba. The demand for slaves was manifested in the illicit traffic that noticeably increased about 1835, and reached large proportions by 1860. It was also seen in a disposition to attack the government for stigmatizing the trade as criminal,[8] then in a disinclination to take any measures which would have rendered our repressive laws effective; and finally in such articulate declarations by prominent men as this: "Experience having settled the point, that this Trade _cannot be abolished by the use of force_, and that blockading squadrons serve only to make it more profitable and more cruel, I am surprised that the attempt is persisted in, unless as it serves as a cloak to some other purposes. It would be far better than it now is, for the African, if the trade was free from all restrictions, and left to the mitigation and decay which time and competition would surely bring about."[9]

76. ~The Attitude of the North and Congress.~ With the North as yet unawakened to the great changes taking place in the South, and with the attitude of the South thus in process of development, little or no constructive legislation could be expected on the subject of the slave-trade. As the divergence in sentiment became more and more pronounced, there were various attempts at legislation, all of which proved abortive. The pro-slavery party attempted, as early as 1826, and again in 1828, to abolish the African agency and leave the Africans practically at the mercy of the States;[10] one or two attempts were made to relax the few provisions which restrained the coastwise trade;[11] and, after the treaty of 1842, Benton proposed to stop appropriations for the African squadron until England defined her position on the Right of Search question.[12] The anti-slavery men presented several bills to amend and strengthen previous laws;[13] they sought, for instance, in vain to regulate the Texan trade, through which numbers of slaves indirectly reached the United States.[14] Presidents and consuls earnestly recommended legislation to restrict the clearances of vessels bound on slave-trading voyages, and to hinder the facility with which slavers obtained fraudulent papers.[15] Only one such bill succeeded in passing the Senate, and that was dropped in the House.[16]

The only legislation of this period was confined to a few appropriation bills. Only one of these acts, that of 1823, appropriating $50,000,[17] was designed materially to aid in the suppression of the trade, all the others relating to expenses incurred after violations. After 1823 the appropriations dwindled, being made at intervals of one, two, and three years, down to 1834, when the amount was $5,000. No further appropriations were made until 1842, when a few thousands above an unexpended surplus were appropriated. In 1843 $5,000 were given, and finally, in 1846, $25,000 were secured; but this was the last sum obtainable until 1856.[18] Nearly all of these meagre appropriations went toward reimbursing Southern plantation owners for the care and support of illegally imported Africans, and the rest to the maintenance of the African agency. Suspiciously large sums were paid for the first purpose, considering the fact that such Africans were always worked hard by those to whom they were farmed out, and often "disappeared" while in their hands. In the accounts we nevertheless find many items like that of $20,286.98 for the maintenance of Negroes imported on the "Ramirez;"[19] in 1827, $5,442.22 for the "bounty, subsistence, clothing, medicine," etc., of fifteen Africans;[20] in 1835, $3,613 for the support of thirty-eight slaves for two months (including a bill of $1,038 for medical attendance).[21]

The African agency suffered many vicissitudes. The first agent, Bacon, who set out early in 1820, was authorized by President Monroe "to form an establishment on the island of Sherbro, or elsewhere on the coast of Africa," and to build barracks for three hundred persons. He was, however, warned "not to connect your agency with the views or plans of the Colonization Society, with which, under the law, the Government of the United States has no concern." Bacon soon died, and was followed during the next four years by Winn and Ayres; they succeeded in establishing a government agency on Cape Mesurado, in conjunction with that of the Colonization Society. The agent of that Society, Jehudi Ashmun, became after 1822, the virtual head of the colony; he fortified and enlarged it, and laid the foundations of an independent community. The succeeding government agents came to be merely official representatives of the United States, and the distribution of free rations for liberated Africans ceased in 1827.

Between 1819 and 1830 two hundred and fifty-two recaptured Africans were sent to the agency, and $264,710 were expended. The property of the government at the agency was valued at $18,895. From 1830 to 1840, nearly $20,000 more were expended, chiefly for the agents' salaries. About 1840 the appointment of an agent ceased, and the colony became gradually self-supporting and independent. It was proclaimed as the Republic of Liberia in 1847.[22]

77. ~Imperfect Application of the Laws.~ In reviewing efforts toward the suppression of the slave-trade from 1820 to 1850, it must be remembered that nearly every cabinet had a strong, if not a predominating, Southern element, and that consequently the efforts of the executive were powerfully influenced by the changing attitude of the South. Naturally, under such circumstances, the government displayed little activity and no enthusiasm in the work. In 1824 a single vessel of the Gulf squadron was occasionally sent to the African coast to return by the route usually followed by the slavers; no wonder that "none of these or any other of our public ships have found vessels engaged in the slave trade under the flag of the United States, ... although it is known that the trade still exists to a most lamentable extent."[23] Indeed, all that an American slaver need do was to run up a Spanish or a Portuguese flag, to be absolutely secure from all attack or inquiry on the part of United States vessels. Even this desultory method of suppression was not regular: in 1826 "no vessel has been despatched to the coast of Africa for several months,"[24] and from that time until 1839 this country probably had no slave-trade police upon the seas, except in the Gulf of Mexico. In 1839 increasing violations led to the sending of two fast-sailing vessels to the African coast, and these were kept there more or less regularly;[25] but even after the signing of the treaty of 1842 the Secretary of the Navy reports: "On the coast of Africa we have _no_ squadron. The small appropriation of the present year was believed to be scarcely sufficient."[26] Between 1843 and 1850 the coast squadron varied from two to six vessels, with from thirty to ninety-eight guns;[27] "but the force habitually and actively engaged in cruizing on the ground frequented by slavers has probably been less by one-fourth, if we consider the size of the ships employed and their withdrawal for purposes of recreation and health, and the movement of the reliefs, whose arrival does not correspond exactly with the departure of the vessels whose term of service has expired."[28] The reports of the navy show that in only four of the eight years mentioned was the fleet, at the time of report, at the stipulated size of eighty guns; and at times it was much below this, even as late as 1848, when only two vessels are reported on duty along the African coast.[29] As the commanders themselves acknowledged, the squadron was too small and the cruising-ground too large to make joint cruising effective.[30]

The same story comes from the Brazil station: "Nothing effectual can be done towards stopping the slave trade, as our squadron is at present organized," wrote the consul at Rio Janeiro in 1847; "when it is considered that the Brazil station extends from north of the equator to Cape Horn on this continent, and includes a great part of Africa south of the equator, on both sides of the Cape of Good Hope, it must be admitted that one frigate and one brig is a very insufficient force to protect American commerce, and repress the participation in the slave trade by our own vessels."[31] In the Gulf of Mexico cruisers were stationed most of the time, although even here there were at times urgent representations that the scarcity or the absence of such vessels gave the illicit trade great license.[32]

Owing to this general negligence of the government, and also to its anxiety on the subject of the theoretic Right of Search, many officials were kept in a state of chronic deception in regard to the trade. The enthusiasm of commanders was dampened by the lack of latitude allowed and by the repeated insistence in their orders on the non-existence of a Right of Search.[33] When one commander, realizing that he could not cover the trading-track with his fleet, requested English commanders to detain suspicious American vessels until one of his vessels came up, the government annulled the agreement as soon as it reached their ears, rebuked him, and the matter was alluded to in Congress long after with horror.[34] According to the orders of cruisers, only slavers with slaves actually on board could be seized. Consequently, fully equipped slavers would sail past the American fleet, deliberately make all preparations for shipping a cargo, then, when the English were not near, "sell" the ship to a Spaniard, hoist the Spanish flag, and again sail gayly past the American fleet with a cargo of slaves. An English commander reported: "The officers of the United States' navy are extremely active and zealous in the cause, and no fault can be attributed to them, but it is greatly to be

lamented that this blemish should in so great a degree nullify our endeavours."[35]

78. ~Responsibility of the Government.~ Not only did the government thus negatively favor the slave-trade, but also many conscious, positive acts must be attributed to a spirit hostile to the proper enforcement of the slave-trade laws. In cases of doubt, when the law needed executive interpretation, the decision was usually in favor of the looser construction of the law; the trade from New Orleans to Mobile was, for instance, declared not to be coastwise trade, and consequently, to the joy of the Cuban smugglers, was left utterly free and unrestricted.[36] After the conquest of Mexico, even vessels bound to California, by the way of Cape Horn, were allowed to clear coastwise, thus giving our flag to "the slave-pirates of the whole world."[37] Attorney-General Nelson declared that the selling to a slave-trader of an American vessel, to be delivered on the coast of Africa, was not aiding or abetting the slave-trade.[38] So easy was it for slavers to sail that corruption among officials was hinted at. "There is certainly a want of proper vigilance at Havana," wrote Commander Perry in 1844, "and perhaps at the ports of the United States;" and again, in the same year, "I cannot but think that the custom-house authorities in the United States are not sufficiently rigid in looking after vessels of suspicious character."[39]

In the courts it was still next to impossible to secure the punishment of the most notorious slave-trader. In 1847 a consul writes: "The slave power in this city [i.e., Rio Janeiro] is extremely great, and a consul doing his duty needs to be supported kindly and effectually at home. In the case of the 'Fame,' where the vessel was diverted from the business intended by her owners and employed in the slave trade--both of which offences are punishable with death, if I rightly read the laws--I sent home the two mates charged with these offences, for trial, the first mate to Norfolk, the second mate to Philadelphia. What was done with the first mate I know not. In the case of the man sent to Philadelphia, Mr. Commissioner Kane states that a clear prima facie case is made out, and then holds him to bail in the sum of _one thousand dollars_, which would be paid by any slave trader in Rio, on the _presentation of a draft_. In all this there is little encouragement for exertion."[40] Again, the "Perry" in 1850 captured a slaver which was about to ship 1,800 slaves. The captain admitted his guilt, and was condemned in the United States District Court at New York. Nevertheless, he was admitted to bail of $5,000; this being afterward reduced to $3,000, he forfeited it and escaped. The mate was sentenced to two years in the penitentiary.[41] Also several slavers sent home to the United States by the British, with clear evidence of guilt, escaped condemnation through technicalities.[42]

79. ~Activity of the Slave-Trade, 1820-1850.~ The enhanced price of slaves throughout the American slave market, brought about by the new industrial development and the laws against the slave-trade, was the irresistible temptation that drew American capital and enterprise into that traffic. In the United States, in spite of the large interstate traffic, the average price of slaves rose from about $325 in 1840, to $360 in 1850, and to $500 in 1860.[43] Brazil and Cuba offered similar inducements to smugglers, and the American flag was ready to protect such pirates. As a result, the American slave-trade finally came to be carried on principally by United States capital, in United States ships, officered by United States citizens, and under the United States flag.

Executive reports repeatedly acknowledged this fact. In 1839 "a careful revision of these laws" is recommended by the President, in order that "the integrity and honor of our flag may be carefully preserved."[44] In June, 1841, the President declares: "There is reason to believe that the traffic is on the increase," and advocates "vigorous efforts."[45] His message in December of the same year acknowledges: "That the American flag is grossly abused by the abandoned and profligate of other nations is but too probable."[46] The special message of 1845 explains at length that "it would seem" that a regular policy of evading the laws is carried on: American vessels with the knowledge of the owners are chartered by notorious slave dealers in Brazil, aided by English capitalists, with this intent.[47] The message of 1849 "earnestly" invites the attention of Congress "to an amendment of our existing laws relating to the African slave-trade, with a view to the effectual suppression of that barbarous traffic. It is not to be denied," continues the message, "that this trade is still, in part, carried on by means of vessels built in the United States, and owned or navigated by some of our citizens."[48] Governor Buchanan of Liberia reported in 1839: "The chief obstacle to the success of the very active measures pursued by the British government for the suppression of the slave-trade on the coast, is the _American flag_. Never was the proud banner of freedom so extensively used by those pirates upon liberty and humanity, as at this season."[49] One well-known American slaver was boarded fifteen times and twice taken into port, but always escaped by means of her papers.[50] Even American officers report that the English are doing all they can, but that the American flag protects the trade.[51] The evidence which literally poured in from our consuls and ministers at Brazil adds to the story of the guilt of the United States.[52] It was proven that the participation of United States citizens in the trade was large and systematic. One of the most notorious slave merchants of Brazil said: "I am worried by the Americans, who insist upon my hiring their vessels for slave-trade."[53] Minister Proffit stated, in 1844, that the "slave-trade is almost entirely carried on under our flag, in American-built vessels."[54] So, too, in Cuba: the British commissioners affirm that American citizens were openly engaged in the traffic; vessels

arrived undisguised at Havana from the United States, and cleared for Africa as slavers after an alleged sale.[55] The American consul, Trist, was proven to have consciously or unconsciously aided this trade by the issuance of blank clearance papers.[56]

The presence of American capital in these enterprises, and the connivance of the authorities, were proven in many cases and known in scores. In 1837 the English government informed the United States that from the papers of a captured slaver it appeared that the notorious slave-trading firm, Blanco and Carballo of Havana, who owned the vessel, had correspondents in the United States: "at Baltimore, Messrs. Peter Harmony and Co., in New York, Robert Barry, Esq."[57] The slaver "Martha" of New York, captured by the "Perry," contained among her papers curious revelations of the guilt of persons in America who were little suspected.[58] The slaver "Prova," which was allowed to lie in the harbor of Charleston, South Carolina, and refit, was afterwards captured with two hundred and twenty-five slaves on board.[59] The real reason that prevented many belligerent Congressmen from pressing certain search claims against England lay in the fact that the unjustifiable detentions had unfortunately revealed so much American guilt that it was deemed wiser to let the matter end in talk. For instance, in 1850 Congress demanded information as to illegal searches, and President Fillmore's report showed the uncomfortable fact that, of the ten American ships wrongly detained by English men-of-war, nine were proven red-handed slavers.[60]

The consul at Havana reported, in 1836, that whole cargoes of slaves fresh from Africa were being daily shipped to Texas in American vessels, that 1,000 had been sent within a few months, that the rate was increasing, and that many of these slaves "can scarcely fail to find their way into the United States." Moreover, the consul acknowledged that ships frequently cleared for the United States in ballast, taking on a cargo at some secret point.[61] When with these facts we consider the law facilitating "recovery" of slaves from Texas,[62] the repeated refusals to regulate the Texan trade, and the shelving of a proposed congressional investigation into these matters,[63] conjecture becomes a practical certainty. It was estimated in 1838 that 15,000 Africans were annually taken to Texas, and "there are even grounds for suspicion that there are other places ... where slaves are introduced."[64] Between 1847 and 1853 the slave smuggler Drake had a slave depot in the Gulf, where sometimes as many as 1,600 Negroes were on hand, and the owners were continually importing and shipping. "The joint-stock company," writes this smuggler, "was a very extensive one, and connected with leading American and Spanish mercantile houses. Our island[65] was visited almost weekly, by agents from Cuba, New York, Baltimore, Philadelphia, Boston, and New Orleans.... The seasoned and instructed slaves were taken to Texas, or Florida, overland, and to Cuba, in sailing-boats. As no squad contained more than half a dozen, no difficulty was found in posting them to the United States, without discovery, and generally without suspicion.... The Bay Island plantation sent ventures weekly to the Florida Keys. Slaves were taken into the great American swamps, and there kept till wanted for the market. Hundreds were sold as captured runaways from the Florida wilderness. We had agents in every slave State; and our coasters were built in Maine, and came out with lumber. I could tell curious stories ... of this business of smuggling Bozal negroes into the United States. It is growing more profitable every year, and if you should hang all the Yankee merchants engaged in it, hundreds would fill their places."[66] Inherent probability and concurrent testimony confirm the substantial truth of such confessions. For instance, one traveller discovers on a Southern plantation Negroes who can speak no English.[67] The careful reports of the Quakers "apprehend that many [slaves] are also introduced into the United States."[68] Governor Mathew of the Bahama Islands reports that "in more than one instance, Bahama vessels with coloured crews have been purposely wrecked on the coast of Florida, and the crews forcibly sold." This was brought to the notice of the United States authorities, but the district attorney of Florida could furnish no information.[69]

Such was the state of the slave-trade in 1850, on the threshold of the critical decade which by a herculean effort was destined finally to suppress it.

Chapter XI

THE FINAL CRISIS. 1850-1870.

80. The Movement against the Slave-Trade Laws. 81. Commercial Conventions of 1855-56. 82. Commercial Conventions of 1857-58. 83. Commercial Convention of 1859. 84. Public Opinion in the South. 85. The Question in Congress. 86. Southern Policy in 1860. 87. Increase of the Slave-Trade from 1850 to 1860. 88. Notorious Infractions of the Laws. 89. Apathy of the Federal Government. 90. Attitude of the Southern Confederacy. 91. Attitude of the United States.

80. ~The Movement against the Slave-Trade Laws.~ It was not altogether a mistaken judgment that led the constitutional fathers to consider the slave-trade as the backbone of slavery. An economic system based on slave labor will find, sooner or later, that the demand for the cheapest slave labor cannot long be withstood. Once degrade the laborer so that he cannot assert his own rights, and there is but one limit below which his price cannot be reduced. That limit is not his physical well-being, for it may be, and in the Gulf States it was, cheaper to work him rapidly to death; the limit is simply the cost of procuring him and keeping him alive a profitable length of time. Only the moral sense of a community can keep helpless labor from sinking to this level; and when a community has once been debauched by slavery, its moral sense offers little resistance to economic demand. This was the case in the West Indies and Brazil; and although better moral stamina held the crisis back longer in the United States, yet even here the ethical standard of the South was not able to maintain itself against the demands of the cotton industry. When, after 1850, the price of slaves had risen to a monopoly height, the leaders of the plantation system, brought to the edge of bankruptcy by the crude and

reckless farming necessary under a slave _régime_, and baffled, at least temporarily, in their quest of new rich land to exploit, began instinctively to feel that the only salvation of American slavery lay in the reopening of the African slave-trade.

It took but a spark to put this instinctive feeling into words, and words led to deeds. The movement first took definite form in the ever radical State of South Carolina. In 1854 a grand jury in the Williamsburg district declared, "as our unanimous opinion, that the Federal law abolishing the African Slave Trade is a public grievance. We hold this trade has been and would be, if re-established, a blessing to the American people, and a benefit to the African himself."[1] This attracted only local attention; but when, in 1856, the governor of the State, in his annual message, calmly argued at length for a reopening of the trade, and boldly declared that "if we cannot supply the demand for slave labor, then we must expect to be supplied with a species of labor we do not want,"[2] such words struck even Southern ears like "a thunder clap in a calm day."[3] And yet it needed but a few years to show that South Carolina had merely been the first to put into words the inarticulate thought of a large minority, if not a majority, of the inhabitants of the Gulf States.

81. ~Commercial Conventions of 1855-56.~ The growth of the movement is best followed in the action of the Southern Commercial Convention, an annual gathering which seems to have been fairly representative of a considerable part of Southern opinion. In the convention that met at New Orleans in 1855, McGimsey of Louisiana introduced a resolution instructing the Southern Congressmen to secure the repeal of the slave-trade laws. This resolution went to the Committee on Resolutions, and was not reported.[4] In 1856, in the convention at Savannah, W.B. Goulden of Georgia moved that the members of Congress be requested to bestir themselves energetically to have repealed all laws which forbade the slave-trade. By a vote of 67 to 18 the convention refused to debate the motion, but appointed a committee to present at the next convention the facts relating to a reopening of the trade.[5] In regard to this action a pamphlet of the day said: "There were introduced into the convention two leading measures, viz.: the laying of a State tariff on northern goods, and the reopening of the slave-trade; the one to advance our commercial interest, the other our agricultural interest, and which, when taken together, as they were doubtless intended to be, and although they have each been attacked by presses of doubtful service to the South, are characterized in the private judgment of politicians as one of the completest southern remedies ever submitted to popular action.... The proposition to revive, or more properly to reopen, the slave trade is as yet but imperfectly understood, in its intentions and probable results, by the people of the South, and but little appreciated by them. It has been received in all parts of the country with an undefined sort of repugnance, a sort of squeamishness, which is incident to all such violations of moral prejudices, and invariably wears off on familiarity with the subject. The South will commence by enduring, and end by embracing the project."[6] The matter being now fully before the public through these motions, Governor Adams's message, and newspaper and pamphlet discussion, the radical party pushed the project with all energy.

82. ~Commercial Conventions of 1857-58.~ The first piece of regular business that came before the Commercial Convention at Knoxville, Tennessee, August 10, 1857, was a proposal to recommend the abrogation of the 8th Article of the Treaty of Washington, on the slave-trade. An amendment offered by Sneed of Tennessee, declaring it inexpedient and against settled policy to reopen the trade, was voted down, Alabama, Arkansas, Florida, Louisiana, Mississippi, South Carolina, and Virginia refusing to agree to it. The original motion then passed; and the radicals, satisfied with their success in the first skirmish, again secured the appointment of a committee to report at the next meeting on the subject of reopening the slave-trade.[7] This next meeting assembled May 10, 1858, in a Gulf State, Alabama, in the city of Montgomery. Spratt of South Carolina, the slave-trade champion, presented an elaborate majority report from the committee, and recommended the following resolutions:--

1. _Resolved_, That slavery is right, and that being right, there can be no wrong in the natural means to its formation.

2. _Resolved_, That it is expedient and proper that the foreign slave trade should be re-opened, and that this Convention will lend its influence to any legitimate measure to that end.

3. _Resolved_, That a committee, consisting of one from each slave State, be appointed to consider of the means, consistent with the duty and obligations of these States, for re-opening the foreign slave-trade, and that they report their plan to the next meeting of this Convention.

Yancey, from the same committee, presented a minority report, which, though it demanded the repeal of the national prohibitory laws, did not advocate the reopening of the trade by the States.

Much debate ensued. Pryor of Virginia declared the majority report "a proposition to dissolve the Union." Yancey declared that "he was for disunion now. [Applause.]" He defended the principle of the slave-trade, and said: "If it is right to buy slaves in Virginia and carry them to New Orleans, why is it not right to buy them in Cuba, Brazil, or Africa, and carry them there?" The opposing speeches made little attempt to meet this uncomfortable logic; but, nevertheless, opposition enough was developed to lay the report on the table until the next convention, with orders that it be printed, in the mean time, as a radical campaign document. Finally the convention passed a resolution:--

That it is inexpedient for any State, or its citizens, to attempt to re-open the African slave-trade while that State is one of the United States of America.[8]

83. ~Commercial Convention of 1859.~ The Convention of 1859 met at Vicksburg, Mississippi, May 9-19, and the slave-trade party came ready for a fray. On the second day Spratt called up his resolutions, and the next day the Committee on Resolutions recommended that, _"in the opinion of this Convention, all laws, State or Federal, prohibiting the African slave trade, ought to be repealed."_ Two minority reports accompanied this resolution: one proposed to postpone action, on account of the futility of the attempt at that time; the other report recommended that, since repeal of the national laws was improbable, nullification by the States impracticable, and action by the Supreme Court unlikely, therefore the States should bring in the Africans as apprentices, a system the legality of which "is incontrovertible." "The only difficult question," it was said, "is the future status of the apprentices after the expiration of their term of servitude."[9] Debate on these propositions began in the afternoon. A brilliant speech on the resumption of the importation of slaves, says Foote of Mississippi, "was listened to with breathless attention and applauded vociferously. Those of us who rose in opposition were looked upon by the excited assemblage present as _traitors_ to the best interests of the South, and only worthy of expulsion from the body. The excitement at last grew so high that personal violence was menaced, and some dozen of the more conservative members of the convention withdrew from the hall in which it was holding its sittings."[10] "It was clear," adds De Bow, "that the people of Vicksburg looked upon it [i.e., the convention] with some distrust."[11] When at last a ballot was taken, the first resolution passed by a vote of 40 to 19.[12] Finally, the 8th Article of the Treaty of Washington was again condemned; and it was also suggested, in the newspaper which was the official organ of the meeting, that "the Convention raise a fund to be dispensed in premiums for the best sermons in favor of reopening the African Slave Trade."[13]

84. ~Public Opinion in the South.~ This record of the Commercial Conventions probably gives a true reflection of the development of extreme opinion on the question of reopening the slave-trade. First, it is noticeable that on this point there was a distinct divergence of opinion and interest between the Gulf and the Border States, and it was this more than any moral repugnance that checked the radicals. The whole movement represented the economic revolt of the slave-consuming cotton-belt against their base of labor supply. This revolt was only prevented from gaining its ultimate end by the fact that the Gulf States could not get on without the active political co-operation of the Border States. Thus, although such hot-heads as Spratt were not able, even as late as 1859, to carry a substantial majority of the South with them in an attempt to reopen the trade at all hazards, yet the agitation did succeed in sweeping away nearly all theoretical opposition to the trade, and left the majority of Southern people in an attitude which regarded the reopening of the African slave-trade as merely a question of expediency.

This growth of Southern opinion is clearly to be followed in the newspapers and pamphlets of the day, in Congress, and in many significant movements. The Charleston _Standard_ in a series of articles strongly advocated the reopening of the trade; the Richmond _Examiner_, though opposing the scheme as a Virginia paper should, was brought to "acknowledge that the laws which condemn the Slave-trade imply an aspersion upon the character of the South.[14] In March, 1859, the _National Era_ said: "There can be no doubt that the idea of reviving the African Slave Trade is gaining ground in the South. Some two months ago we could quote strong articles from ultra Southern journals against the traffic; but of late we have been sorry to observe in the same journals an ominous silence upon the subject, while the advocates of 'free trade in negroes' are earnest and active."[15] The Savannah _Republican_, which at first declared the movement to be of no serious intent, conceded, in 1859, that it was gaining favor, and that nine-tenths of the Democratic Congressional Convention favored it, and that even those who did not advocate a revival demanded the abolition of the laws.[16] A correspondent from South Carolina writes, December 18, 1859: "The nefarious project of opening it [i.e., the slave trade] has been started here in that prurient temper of the times which manifests itself in disunion schemes.... My State is strangely and terribly infected with all this sort of thing.... One feeling that gives a countenance to the opening of the slave trade is, that it will be a sort of spite to the North and defiance of their opinions."[17] The New Orleans _Delta_ declared that those who voted for the slave-trade in Congress were men "whose names will be honored hereafter for the unflinching manner in which they stood up for principle, for truth, and consistency, as well as the vital interests of the South."[18]

85. ~The Question in Congress.~ Early in December, 1856, the subject reached Congress; and although the agitation was then new, fifty-seven Southern Congressmen refused to declare a re-opening of the slave-trade "shocking to the moral sentiment of the enlightened portion of mankind," and eight refused to call the reopening even "unwise" and "inexpedient."[19] Three years later, January 31, 1859, it was impossible, in a House of one hundred and ninety-nine members, to get a two-thirds vote in order even to consider Kilgore's resolutions, which declared "that no legislation can be too thorough in its measures, nor can any penalty known to the catalogue of modern punishment for crime be too severe against a traffic so inhuman and unchristian."[20]

Congressmen and other prominent men hastened with the rising tide.[21] Dowdell of Alabama declared the repressive acts "highly offensive;" J.B. Clay of Kentucky was "opposed to all these laws;"[22] Seward of Georgia declared them "wrong, and a violation of the Constitution;"[23] Barksdale of Mississippi agreed with this sentiment; Crawford of Georgia threatened a reopening of the trade; Miles of South Carolina was for "sweeping away" all restrictions;[24] Keitt of South Carolina wished to withdraw the African squadron, and to cease to brand slave-trading as piracy;[25] Brown of Mississippi "would repeal the law instantly;"[26] Alexander Stephens, in his farewell address to his constituents, said: "Slave states cannot be made without Africans.... [My object is] to bring clearly to your mind the great truth that without an increase of African slaves from abroad, you may not expect or look for many more slave States."[27] Jefferson Davis strongly denied "any coincidence of opinion with those who prate of the inhumanity and sinfulness of the trade. The interest of Mississippi," said he, "not of the African, dictates my conclusion." He opposed the immediate reopening of the trade in Mississippi for fear of a paralyzing influx of Negroes, but carefully added: "This conclusion, in relation to Mississippi, is based upon my view of her _present_ condition, _not_ upon any _general theory_. It is not supposed to be applicable to Texas, to New Mexico, or to any _future acquisitions_ to be made south of the Rio Grande."[28] John Forsyth, who for seven years conducted the slave-trade diplomacy of the nation, declared, about 1860: "But one stronghold of its [i.e., slavery's] enemies remains to be carried, to _complete its triumph_ and assure its welfare,--that is the existing prohibition of the African Slave-trade."[29] Pollard, in his _Black Diamonds_, urged the importation of Africans as "laborers." "This I grant you," said he, "would be practically the re-opening of the African slave trade; but ... you will find that it very often becomes necessary to evade the letter of the law, in some of the greatest measures of social happiness and patriotism."[30]

86. ~Southern Policy in 1860.~ The matter did not rest with mere words. During the session of the Vicksburg Convention, an "African Labor Supply Association" was formed, under the presidency of J.D.B. De Bow, editor of _De Bow's Review_, and ex-superintendent of the seventh census. The object of the association was "to promote the supply of African labor."[31] In 1857 the committee of the South Carolina legislature to whom the Governor's slave-trade message was referred made an elaborate report, which declared in italics: _"The South at large does need a re-opening of the African slave trade."_ Pettigrew, the only member who disagreed to this report, failed of re-election. The report contained an extensive argument to prove the kingship of cotton, the perfidy of English philanthropy, and the lack of slaves in the South, which, it was said, would show a deficit of six hundred thousand slaves by 1878.[32] In Georgia, about this time, an attempt to expunge the slave-trade prohibition in the State Constitution lacked but one vote of passing.[33] From these slower and more legal movements came others less justifiable. The long argument on the "apprentice" system finally brought a request to the collector of the port at Charleston, South Carolina, from E. Lafitte & Co., for a clearance to Africa for the purpose of importing African "emigrants." The collector appealed to the Secretary of the Treasury, Howell Cobb of Georgia, who flatly refused to take the bait, and replied that if the "emigrants" were brought in as slaves, it would be contrary to United States law; if as freemen, it would be contrary to their own State law.[34] In Louisiana a still more radical movement was attempted, and a bill passed the House of Representatives authorizing a company to import two thousand five hundred Africans, "indentured" for fifteen years "at least." The bill lacked but two votes of passing the Senate.[35] It was said that the _Georgian_, of Savannah, contained a notice of an agricultural society which "unanimously resolved to offer a premium of $25 for the best specimen of a live African imported into the United States within the last twelve months."[36]

It would not be true to say that there was in the South in 1860 substantial unanimity on the subject of reopening the slave-trade; nevertheless, there certainly was a large and influential minority, including perhaps a majority of citizens of the Gulf States, who favored the project, and, in defiance of law and morals, aided and abetted its actual realization. Various movements, it must be remembered, gained much of their strength from the fact that their success meant a partial nullification of the slave-trade laws. The admission of Texas added probably seventy-five thousand recently imported slaves to the Southern stock; the movement against Cuba, which culminated in the "Ostend Manifesto" of Buchanan, Mason, and Soulé, had its chief impetus in the thousands of slaves whom Americans had poured into the island. Finally, the series of filibustering expeditions against Cuba, Mexico, and Central America were but the wilder and more irresponsible attempts to secure both slave territory and slaves.

87. ~Increase of the Slave-Trade from 1850 to 1860.~ The long and open agitation for the reopening of the slave-trade, together with the fact that the South had been more or less familiar with violations of the laws since 1808, led to such a remarkable increase of illicit traffic and actual importations in the decade 1850-1860, that the movement may almost be termed a reopening of the slave-trade.

In the foreign slave-trade our own officers continue to report "how shamefully our flag has been used;"[37] and British officers write "that at least one half of the successful part of the slave trade is carried on under the American flag," and this because "the number of American cruisers on the station is so small, in proportion to the immense extent of the slave-dealing coast."[38] The fitting out of slavers became a flourishing business in the United States, and centred at New York City. "Few of our readers," writes a periodical of the day, "are aware of the extent to which this infernal traffic is carried on, by vessels clearing from New York, and in close alliance with our legitimate trade; and that down-town merchants of wealth and respectability are extensively engaged in buying and selling African Negroes, and have been, with comparatively little interruption, for an indefinite number of years."[39] Another periodical says: "The number of persons engaged in the slave-trade, and the amount of capital embarked in it, exceed our powers of calculation. The city of New York has been until of late [1862] the principal port of the world for this infamous commerce; although the cities of Portland and Boston are only second to her in that distinction. Slave dealers added largely to the wealth of our commercial metropolis; they contributed liberally to the treasuries of political organizations, and their bank accounts were largely depleted to carry elections in New Jersey, Pennsylvania, and Connecticut."[40] During eighteen months of the years 1859-1860 eighty-five slavers are reported to have been fitted out in New York harbor,[41] and these alone transported from 30,000 to 60,000 slaves annually.[42] The United States deputy marshal of that district declared in 1856 that the business of fitting out slavers "was never prosecuted with greater energy than at present. The occasional interposition of the legal authorities exercises no apparent influence for its suppression. It is seldom that one or more vessels cannot be designated at the wharves, respecting which there is evidence that she is either in or has been concerned in the Traffic."[43] On the coast of Africa "it is a well-known fact that most of the Slave ships which visit the river are sent from New York and New Orleans."[44]

The absence of United States war-ships at the Brazilian station enabled American smugglers to run in cargoes, in spite of the prohibitory law. One cargo of five hundred slaves was landed in 1852, and the _Correio Mercantil_ regrets "that it was the flag of the United States which covered this act of piracy, sustained by citizens of that great nation."[45] When the Brazil trade declined, the illicit Cuban trade greatly increased, and the British consul reported: "Almost all the slave expeditions for some time past have been fitted out in the United States, chiefly at New York."[46]

88. ~Notorious Infractions of the Laws.~ This decade is especially noteworthy for the great increase of illegal importations into the South. These became bold, frequent, and notorious. Systematic introduction on a considerable scale probably commenced in the forties, although with great secrecy. "To have boldly ventured into New Orleans, with negroes freshly imported from Africa, would not only have brought down upon the head of the importer the vengeance of our very philanthropic Uncle Sam, but also the anathemas of the whole sect of philanthropists and negrophilists everywhere. To import them for years, however, into quiet places, evading with impunity the penalty of the law, and the ranting of the thin-skinned sympathizers with Africa, was gradually to popularize the traffic by creating a demand for laborers, and thus to pave the way for the _gradual revival of the slave trade_. To this end, a few men, bold and energetic, determined, ten or twelve years ago [1848 or 1850], to commence the business of importing negroes, slowly at first, but surely; and for this purpose they selected a few secluded places on the coast of Florida, Georgia and Texas, for the purpose of concealing their stock until it could be sold out. Without specifying other places, let me draw your attention to a deep and abrupt pocket or indentation in the coast of Texas, about thirty miles from Brazos Santiago. Into this pocket a slaver could run at any hour of the night, because there was no hindrance at the entrance, and here she could discharge her cargo of movables upon the projecting bluff, and again proceed to sea inside of three hours. The live stock thus landed could be marched a short distance across the main island, over a porous soil which refuses to retain the recent foot-prints, until they were again placed in boats, and were concealed upon some of the innumerable little islands which thicken on the waters of the Laguna in the rear. These islands, being covered with a thick growth of bushes and grass, offer an inscrutable hiding place for the 'black diamonds.'"[47] These methods became, however, toward 1860, too slow for the radicals, and the trade grew more defiant and open. The yacht "Wanderer," arrested on suspicion in New York and released, landed in Georgia six months later four hundred and twenty slaves, who were never recovered.[48] The Augusta _Despatch_ says: "Citizens of our city are probably interested in the enterprise. It is hinted that this is the third cargo landed by the same company, during the last six months."[49] Two parties of Africans were brought into Mobile with impunity. One bark, strongly suspected of having landed a cargo of slaves, was seized on the Florida coast; another vessel was reported to be landing slaves near Mobile; a letter from Jacksonville, Florida, stated that a bark had left there for Africa to ship a cargo for Florida and Georgia.[50] Stephen A. Douglas said "that there was not the shadow of

doubt that the Slave-trade had been carried on quite extensively for a long time back, and that there had been more Slaves imported into the southern States, during the last year, than had ever been imported before in any one year, even when the Slave-trade was legal. It was his confident belief, that over fifteen thousand Slaves had been brought into this country during the past year [1859.] He had seen, with his own eyes, three hundred of those recently-imported, miserable beings, in a Slave-pen in Vicksburg, Miss., and also large numbers at Memphis, Tenn."[51] It was currently reported that depots for these slaves existed in over twenty large cities and towns in the South, and an interested person boasted to a senator, about 1860, that "twelve vessels would discharge their living freight upon our shores within ninety days from the 1st of June last," and that between sixty and seventy cargoes had been successfully introduced in the last eighteen months.[52] The New York _Tribune_ doubted the statement; but John C. Underwood, formerly of Virginia, wrote to the paper saying that he was satisfied that the correspondent was correct. "I have," he said, "had ample evidences of the fact, that reopening the African Slave-trade is a thing already accomplished, and the traffic is brisk, and rapidly increasing. In fact, the most vital question of the day is not the opening of this trade, but its suppression. The arrival of cargoes of negroes, fresh from Africa, in our southern ports, is an event of frequent occurrence."[53]

Negroes, newly landed, were openly advertised for sale in the public press, and bids for additional importations made. In reply to one of these, the Mobile _Mercury_ facetiously remarks: "Some negroes who never learned to talk English, went up the railroad the other day."[54] Congressmen declared on the floor of the House: "The slave trade may therefore be regarded as practically re-established;"[55] and petitions like that from the American Missionary Society recited the fact that "this piratical and illegal trade--this inhuman invasion of the rights of men,--this outrage on civilization and Christianity--this violation of the laws of God and man--is openly countenanced and encouraged by a portion of the citizens of some of the States of this Union."[56]

From such evidence it seems clear that the slave-trade laws, in spite of the efforts of the government, in spite even of much opposition to these extra-legal methods in the South itself, were grossly violated, if not nearly nullified, in the latter part of the decade 1850-1860.

89. ~Apathy of the Federal Government.~ During the decade there was some attempt at reactionary legislation, chiefly directed at the Treaty of Washington. June 13, 1854, Slidell, from the Committee on Foreign Relations, made an elaborate report to the Senate, advocating the abrogation of the 8th Article of that treaty, on the ground that it was costly, fatal to the health of the sailors, and useless, as the trade had actually increased under its operation.[57] Both this and a similar attempt in the House failed,[58] as did also an attempt to substitute life imprisonment for the death penalty.[59] Most of the actual legislation naturally took the form of appropriations. In 1853 there was an attempt to appropriate $20,000.[60] This failed, and the appropriation of $8,000 in 1856 was the first for ten years.[61] The following year brought a similar appropriation,[62] and in 1859[63] and 1860[64] $75,000 and $40,000 respectively were appropriated. Of attempted legislation to strengthen the laws there was plenty: e.g., propositions to regulate the issue of sea-letters and the use of our flag;[65] to prevent the "coolie" trade, or the bringing in of "apprentices" or "African laborers;"[66] to stop the coastwise trade;[67] to assent to a Right of Search;[68] and to amend the Constitution by forever prohibiting the slave-trade.[69]

The efforts of the executive during this period were criminally lax and negligent. "The General Government did not exert itself in good faith to carry out either its treaty stipulations or the legislation of Congress in regard to the matter. If a vessel was captured, her owners were permitted to bond her, and thus continue her in the trade; and if any man was convicted of this form of piracy, the executive always interposed between him and the penalty of his crime. The laws providing for the seizure of vessels engaged in the traffic were so constructed as to render the duty unremunerative; and marshals now find their fees for such services to be actually less than their necessary expenses. No one who bears this fact in mind will be surprised at the great indifference of these officers to the continuing of the slave-trade; in fact, he will be ready to learn that the laws of Congress upon the subject had become a dead letter, and that the suspicion was well grounded that certain officers of the Federal Government had actually connived at their violation."[70] From 1845 to 1854, in spite of the well-known activity of the trade, but five cases obtained cognizance in the New York district. Of these, Captains Mansfield and Driscoll forfeited their bonds of $5,000 each, and escaped; in the case of the notorious Canot, nothing had been done as late as 1856, although he was arrested in 1847; Captain Jefferson turned State's evidence, and, in the case of Captain Mathew, a _nolle prosequi_ was entered.[71] Between 1854 and 1856 thirty-two persons were indicted in New York, of whom only thirteen had at the latter date been tried, and only one of these convicted.[72] These dismissals were seldom on account of insufficient evidence. In the notorious case of the "Wanderer," she was arrested on suspicion, released, and soon after she landed a cargo of slaves in Georgia; some who attempted to seize the Negroes were arrested for larceny, and in spite of the efforts of Congress the captain was never punished. The yacht was afterwards started on another voyage, and being brought back to Boston was sold to her former owner for about one third her value.[73] The bark "Emily"

was seized on suspicion and released, and finally caught red-handed on the coast of Africa; she was sent to New York for trial, but "disappeared" under a certain slave captain, Townsend, who had, previous to this, in the face of the most convincing evidence, been acquitted at Key West.[74]

The squadron commanders of this time were by no means as efficient as their predecessors, and spent much of their time, apparently, in discussing the Right of Search. Instead of a number of small light vessels, which by the reports of experts were repeatedly shown to be the only efficient craft, the government, until 1859, persisted in sending out three or four great frigates. Even these did not attend faithfully to their duties. A letter from on board one of them shows that, out of a fifteen months' alleged service, only twenty-two days were spent on the usual cruising-ground for slavers, and thirteen of these at anchor; eleven months were spent at Madeira and Cape Verde Islands, 300 miles from the coast and 3,000 miles from the slave market.[75] British commanders report the apathy of American officers and the extreme caution of their instructions, which allowed many slavers to escape.[76]

The officials at Washington often remained in blissful, and perhaps willing, ignorance of the state of the trade. While Americans were smuggling slaves by the thousands into Brazil, and by the hundreds into the United States, Secretary Graham was recommending the abrogation of the 8th Article of the Treaty of Washington;[77] so, too, when the Cuban slave-trade was reaching unprecedented activity, and while slavers were being fitted out in every port on the Atlantic seaboard, Secretary Kennedy naïvely reports, "The time has come, perhaps, when it may be properly commended to the notice of Congress to inquire into the necessity of further continuing the regular employment of a squadron on this [i.e., the African] coast."[78] Again, in 1855, the government has "advices that the slave trade south of the equator is entirely broken up;"[79] in 1856, the reports are "favorable;"[80] in 1857 a British commander writes: "No vessel has been seen here for one year, certainly; I think for nearly three years there have been no American cruizers on these waters, where a valuable and extensive American commerce is carried on. I cannot, therefore, but think that this continued absence of foreign cruizers looks as if they were intentionally withdrawn, and as if the Government did not care to take measures to prevent the American flag being used to cover Slave Trade transactions;"[81] nevertheless, in this same year, according to Secretary Toucey, "the force on the coast of Africa has fully accomplished its main object."[82] Finally, in the same month in which the "Wanderer" and her mates were openly landing cargoes in the South, President Buchanan, who seems to have been utterly devoid of a sense of humor, was urging the annexation of Cuba to the United States as the only method of suppressing the slave-trade![83]

About 1859 the frequent and notorious violations of our laws aroused even the Buchanan government; a larger appropriation was obtained, swift light steamers were employed, and, though we may well doubt whether after such a carnival illegal importations "entirely" ceased, as the President informed Congress,[84] yet some sincere efforts at suppression were certainly begun. From 1850 to 1859 we have few notices of captured slavers, but in 1860 the increased appropriation of the thirty-fifth Congress resulted in the capture of twelve vessels with 3,119 Africans.[85] The Act of June 16, 1860, enabled the President to contract with the Colonization Society for the return of recaptured Africans; and by a long-needed arrangement cruisers were to proceed direct to Africa with such cargoes, instead of first landing them in this country.[86]

90. ~Attitude of the Southern Confederacy.~ The attempt, initiated by the constitutional fathers, to separate the problem of slavery from that of the slave-trade had, after a trial of half a century, signally failed, and for well-defined economic reasons. The nation had at last come to the parting of the ways, one of which led to a free-labor system, the other to a slave system fed by the slave-trade. Both sections of the country naturally hesitated at the cross-roads: the North clung to the delusion that a territorially limited system of slavery, without a slave-trade, was still possible in the South; the South hesitated to fight for her logical object--slavery and free trade in Negroes--and, in her moral and economic dilemma, sought to make autonomy and the Constitution her object. The real line of contention was, however, fixed by years of development, and was unalterable by the present whims or wishes of the contestants, no matter how important or interesting these might be: the triumph of the North meant free labor; the triumph of the South meant slavery and the slave-trade.

It is doubtful if many of the Southern leaders ever deceived themselves by thinking that Southern slavery, as it then was, could long be maintained without a general or a partial reopening of the slave-trade. Many had openly declared this a few years before, and there was no reason for a change of opinion. Nevertheless, at the outbreak of actual war and secession, there were powerful and decisive reasons for relegating the question temporarily to the rear. In the first place, only by this means could the adherence of important Border States be secured, without the aid of which secession was folly. Secondly, while it did no harm to laud the independence of the South and the kingship of cotton in "stump" speeches and conventions, yet, when it came to actual hostilities,

the South sorely needed the aid of Europe; and this a nation fighting for slavery and the slave-trade stood poor chance of getting. Consequently, after attacking the slave-trade laws for a decade, and their execution for a quarter-century, we find the Southern leaders inserting, in both the provisional and the permanent Constitutions of the Confederate States, the following article:--

The importation of negroes of the African race, from any foreign country other than the slaveholding States or Territories of the United States of America, is hereby forbidden; and Congress is required to pass such laws as shall effectually prevent the same.

Congress shall also have power to prohibit the introduction of slaves from any State not a member of, or Territory not belonging to, this Confederacy.[87]

The attitude of the Confederate government toward this article is best illustrated by its circular of instructions to its foreign ministers:--

It has been suggested to this Government, from a source of unquestioned authenticity, that, after the recognition of our independence by the European Powers, an expectation is generally entertained by them that in our treaties of amity and commerce a clause will be introduced making stipulations against the African slave trade. It is even thought that neutral Powers may be inclined to insist upon the insertion of such a clause as a _sine qua non_.

You are well aware how firmly fixed in our Constitution is the policy of this Confederacy against the opening of that trade, but we are informed that false and insidious suggestions have been made by the agents of the United States at European Courts of our intention to change our constitution as soon as peace is restored, and of authorizing the importation of slaves from Africa. If, therefore, you should find, in your intercourse with the Cabinet to which you are accredited, that any such impressions are entertained, you will use every proper effort to remove them, and if an attempt is made to introduce into any treaty which you may be charged with negotiating stipulations on the subject just mentioned, you will assume, in behalf of your Government, the position which, under the direction of the President, I now proceed to develop.

The Constitution of the Confederate States is an agreement made between independent States. By its terms all the powers of Government are separated into classes as follows, viz.:--

1st. Such powers as the States delegate to the General Government.

2d. Such powers as the States agree to refrain from exercising, although they do not delegate them to the General Government.

3d. Such powers as the States, without delegating them to the General Government, thought proper to exercise by direct agreement between themselves contained in the Constitution.

4th. All remaining powers of sovereignty, which not being delegated to the Confederate States by the Constitution nor prohibited by it to the States, are reserved to the States respectively, or to the people thereof.... Especially in relation to the importation of African negroes was it deemed important by the States that no power to permit it should exist in the Confederate Government.... It will thus be seen that no power is delegated to the Confederate Government over this subject, but that it is included in the third class above referred to, of powers exercised directly by the States.... This Government unequivocally and absolutely denies its possession of any power whatever over the subject, and cannot entertain any proposition in relation to it.... The policy of the Confederacy is as fixed and immutable on this subject as the imperfection of human nature permits human resolve to be. No additional agreements, treaties, or stipulations can commit these States to the prohibition of the African slave trade with more binding efficacy than those they have themselves devised. A just and generous confidence in their good faith on this subject exhibited by friendly Powers will be far more efficacious than persistent efforts to induce this Government to assume the exercise of powers which it does not possess.... We trust, therefore, that no unnecessary discussions on this matter will be introduced into your negotiations. If, unfortunately, this reliance should prove ill-founded, you will decline continuing negotiations on your side, and transfer them to us at home....[88]

This attitude of the conservative leaders of the South, if it meant anything, meant that individual State action could, when it pleased, reopen the slave-trade. The radicals were, of course, not satisfied with any veiling of the ulterior purpose of the new slave republic, and attacked the constitutional provision violently. "If," said one, "the clause be carried into the permanent government, our whole movement is defeated. It will abolitionize the Border Slave States--it will brand our institution. Slavery cannot share a government with Democracy,--it cannot bear a brand upon it; thence another revolution ... having achieved one revolution to escape democracy at the North, it must still achieve another to escape it at the South. That it will ultimately triumph none can doubt."[89]

91. ~Attitude of the United States.~ In the North, with all the hesitation in many matters, there existed unanimity in regard to the slave-trade; and the new Lincoln government ushered in the new policy of uncompromising suppression by hanging the first American slave-trader who ever suffered the extreme penalty of the law.[90] One of the earliest acts of President Lincoln was a step which had been necessary since 1808, but had never been taken, viz., the unification of the whole work of suppression into the hands of one responsible department. By an order, dated May 2, 1861, Caleb B. Smith, Secretary of the Interior, was charged with the execution of the slave-trade laws,[91] and he immediately began energetic work. Early in 1861, as soon as the withdrawal of the Southern members untied the hands of Congress, two appropriations of $900,000 each were made to suppress the slave trade, the first appropriations commensurate with the vastness of the task. These were followed by four appropriations of $17,000 each in the years 1863 to 1867, and two of $12,500 each in 1868 and 1869.[92] The first work of the new secretary was to obtain a corps of efficient assistants. To this end, he assembled all the marshals of the loyal seaboard States at New York, and gave them instruction and opportunity to inspect actual slavers. Congress also, for the first time, offered them proper compensation.[93] The next six months showed the effect of this policy in the fact that five vessels were seized and condemned, and four slave-traders were convicted and suffered the penalty of their crimes. "This is probably the largest number [of convictions] ever obtained, and certainly the only ones for many years."[94]

Meantime the government opened negotiations with Great Britain, and the treaty of 1862 was signed June 7, and carried out by Act of Congress, July 11.[95] Specially commissioned war vessels of either government were by this agreement authorized to search merchant vessels on the high seas and specified coasts, and if they were found to be slavers, or, on account of their construction or equipment, were suspected to be such, they were to be sent for condemnation to one of the mixed courts established at New York, Sierra Leone, and the Cape of Good Hope. These courts, consisting of one judge and one arbitrator on the part of each government, were to judge the facts without appeal, and upon condemnation by them, the culprits were to be punished according to the laws of their respective countries. The area in which this Right of Search could be exercised was somewhat enlarged by an additional article to the treaty, signed in 1863. In 1870 the mixed courts were abolished, but the main part of the treaty was left in force. The Act of July 17, 1862, enabled the President to contract with foreign governments for the apprenticing of recaptured Africans in the West Indies,[96] and in 1864 the coastwise slave-trade was forever prohibited.[97] By these measures the trade was soon checked, and before the end of the war entirely suppressed.[98] The vigilance of the government, however, was not checked, and as late as 1866 a squadron of ten ships, with one hundred and thirteen guns, patrolled the slave coast.[99] Finally, the Thirteenth Amendment legally confirmed what the war had already accomplished, and slavery and the slave-trade fell at one blow.[100]

Chapter XII

THE ESSENTIALS IN THE STRUGGLE.

92. How the Question Arose. 93. The Moral Movement. 94. The Political Movement. 95. The Economic Movement. 96. The Lesson for Americans.

92. ~How the Question Arose.~ We have followed a chapter of history which is of peculiar interest to the sociologist. Here was a rich new land, the wealth of which was to be had in return for ordinary manual labor. Had the country been conceived of as existing primarily for the benefit of its actual inhabitants, it might have waited for natural increase or immigration to supply the needed hands; but both Europe and the earlier colonists themselves regarded this land as existing chiefly for the benefit of Europe, and as designed to be exploited, as rapidly and ruthlessly as possible, of the boundless wealth of its resources. This was the primary excuse for the rise of the African slave-trade to America.

Every experiment of such a kind, however, where the moral standard of a people is lowered for the sake of a material advantage, is dangerous in just such proportion as that advantage is great. In this case it was great. For at least a century, in the West Indies and the southern United States, agriculture flourished, trade increased, and English manufactures were nourished, in just such proportion as Americans stole Negroes and worked them to death. This advantage, to be sure, became much smaller in later times, and at one critical period was, at least in the Southern States, almost _nil_; but energetic efforts were wanting, and, before the nation was aware, slavery had seized a new and well-nigh immovable footing in the Cotton Kingdom.

The colonists averred with perfect truth that they did not commence this fatal traffic, but that it was imposed upon them from without. Nevertheless, all too soon did they lay aside scruples against it and hasten to share its material benefits. Even those who braved the rough Atlantic for the highest moral motives fell early victims to the allurements of this system. Thus, throughout colonial

history, in spite of many honest attempts to stop the further pursuit of the slave-trade, we notice back of nearly all such attempts a certain moral apathy, an indisposition to attack the evil with the sharp weapons which its nature demanded. Consequently, there developed steadily, irresistibly, a vast social problem, which required two centuries and a half for a nation of trained European stock and boasted moral fibre to solve.

93. ~The Moral Movement.~ For the solution of this problem there were, roughly speaking, three classes of efforts made during this time,--moral, political, and economic: that is to say, efforts which sought directly to raise the moral standard of the nation; efforts which sought to stop the trade by legal enactment; efforts which sought to neutralize the economic advantages of the slave-trade. There is always a certain glamour about the idea of a nation rising up to crush an evil simply because it is wrong. Unfortunately, this can seldom be realized in real life; for the very existence of the evil usually argues a moral weakness in the very place where extraordinary moral strength is called for. This was the case in the early history of the colonies; and experience proved that an appeal to moral rectitude was unheard in Carolina when rice had become a great crop, and in Massachusetts when the rum-slave-traffic was paying a profit of 100%. That the various abolition societies and anti-slavery movements did heroic work in rousing the national conscience is certainly true; unfortunately, however, these movements were weakest at the most critical times. When, in 1774 and 1804, the material advantages of the slave-trade and the institution of slavery were least, it seemed possible that moral suasion might accomplish the abolition of both. A fatal spirit of temporizing, however, seized the nation at these points; and although the slave-trade was, largely for political reasons, forbidden, slavery was left untouched. Beyond this point, as years rolled by, it was found well-nigh impossible to rouse the moral sense of the nation. Even in the matter of enforcing its own laws and co-operating with the civilized world, a lethargy seized the country, and it did not awake until slavery was about to destroy it. Even then, after a long and earnest crusade, the national sense of right did not rise to the entire abolition of slavery. It was only a peculiar and almost fortuitous commingling of moral, political, and economic motives that eventually crushed African slavery and its handmaid, the slave-trade in America.

94. ~The Political Movement.~ The political efforts to limit the slave-trade were the outcome partly of moral reprobation of the trade, partly of motives of expediency. This legislation was never such as wise and powerful rulers may make for a nation, with the ulterior purpose of calling in the respect which the nation has for law to aid in raising its standard of right. The colonial and national laws on the slave-trade merely registered, from time to time, the average public opinion concerning this traffic, and are therefore to be regarded as negative signs rather than as positive efforts. These signs were, from one point of view, evidences of moral awakening; they indicated slow, steady development of the idea that to steal even Negroes was wrong. From another point of view, these laws showed the fear of servile insurrection and the desire to ward off danger from the State; again, they often indicated a desire to appear well before the civilized world, and to rid the "land of the free" of the paradox of slavery. Representing such motives, the laws varied all the way from mere regulating acts to absolute prohibitions. On the whole, these acts were poorly conceived, loosely drawn, and wretchedly enforced. The systematic violation of the provisions of many of them led to a widespread belief that enforcement was, in the nature of the case, impossible; and thus, instead of marking ground already won, they were too often sources of distinct moral deterioration. Certainly the carnival of lawlessness that succeeded the Act of 1807, and that which preceded final suppression in 1861, were glaring examples of the failure of the efforts to suppress the slave-trade by mere law.

95. ~The Economic Movement.~ Economic measures against the trade were those which from the beginning had the best chance of success, but which were least tried. They included tariff measures; efforts to encourage the immigration of free laborers and the emigration of the slaves; measures for changing the character of Southern industry; and, finally, plans to restore the economic balance which slavery destroyed, by raising the condition of the slave to that of complete freedom and responsibility. Like the political efforts, these rested in part on a moral basis; and, as legal enactments, they were also themselves often political measures. They differed, however, from purely moral and political efforts, in having as a main motive the economic gain which a substitution of free for slave labor promised.

The simplest form of such efforts was the revenue duty on slaves that existed in all the colonies. This developed into the prohibitive tariff, and into measures encouraging immigration or industrial improvements. The colonization movement was another form of these efforts; it was inadequately conceived, and not altogether sincere, but it had a sound, although in this case impracticable, economic basis. The one great measure which finally stopped the slave-trade forever was, naturally, the abolition of slavery, i.e., the giving to the Negro the right to sell his labor at a price consistent with his own welfare. The abolition of slavery itself, while due in part to direct moral appeal and political sagacity, was largely the result of the economic collapse of the large-farming slave system.

96. ~The Lesson for Americans.~ It may be doubted if ever before such political mistakes as the slavery compromises of the Constitutional Convention had such serious results, and yet, by a succession of unexpected accidents, still left a nation in position to work out its destiny. No American can study the connection of slavery with United States history, and not devoutly pray that his country may never have a similar social problem to solve, until it shows more capacity for such work than it has shown in the past. It is neither profitable nor in accordance with scientific truth to consider that whatever the constitutional fathers did was right, or that slavery was a plague sent from God and fated to be eliminated in due time. We must face the fact that this problem arose principally from the cupidity and carelessness of our ancestors. It was the plain duty of the colonies to crush the trade and the system in its infancy: they preferred to enrich themselves on its profits. It was the plain duty of a Revolution based upon "Liberty" to take steps toward the abolition of slavery: it preferred promises to straightforward action. It was the plain duty of the Constitutional Convention, in founding a new nation, to compromise with a threatening social evil only in case its settlement would thereby be postponed to a more favorable time: this was not the case in the slavery and the slave-trade compromises; there never was a time in the history of America when the system had a slighter economic, political, and moral justification than in 1787; and yet with this real, existent, growing evil before their eyes, a bargain largely of dollars and cents was allowed to open the highway that led straight to the Civil War. Moreover, it was due to no wisdom and foresight on the part of the fathers that fortuitous circumstances made the result of that war what it was, nor was it due to exceptional philanthropy on the part of their descendants that that result included the abolition of slavery.

With the faith of the nation broken at the very outset, the system of slavery untouched, and twenty years' respite given to the slave-trade to feed and foster it, there began, with 1787, that system of bargaining, truckling, and compromising with a moral, political, and economic monstrosity, which makes the history of our dealing with slavery in the first half of the nineteenth century so discreditable to a great people. Each generation sought to shift its load upon the next, and the burden rolled on, until a generation came which was both too weak and too strong to bear it longer. One cannot, to be sure, demand of whole nations exceptional moral foresight and heroism; but a certain hard common-sense in facing the complicated phenomena of political life must be expected in every progressive people. In some respects we as a nation seem to lack this; we have the somewhat inchoate idea that we are not destined to be harassed with great social questions, and that even if we are, and fail to answer them, the fault is with the question and not with us. Consequently we often congratulate ourselves more on getting rid of a problem than on solving it. Such an attitude is dangerous; we have and shall have, as other peoples have had, critical, momentous, and pressing questions to answer. The riddle of the Sphinx may be postponed, it may be evasively answered now; sometime it must be fully answered.

It behooves the United States, therefore, in the interest both of scientific truth and of future social reform, carefully to study such chapters of her history as that of the suppression of the slave-trade. The most obvious question which this study suggests is: How far in a State can a recognized moral wrong safely be compromised? And although this chapter of history can give us no definite answer suited to the ever-varying aspects of political life, yet it would seem to warn any nation from allowing, through carelessness and moral cowardice, any social evil to grow. No persons would have seen the Civil War with more surprise and horror than the Revolutionists of 1776; yet from the small and apparently dying institution of their day arose the walled and castled Slave-Power. From this we may conclude that it behooves nations as well as men to do things at the very moment when they ought to be done.

* * * * *

APPENDIX A.

A CHRONOLOGICAL CONSPECTUS OF COLONIAL AND STATE LEGISLATION RESTRICTING THE AFRICAN SLAVE-TRADE. 1641-1787.

~1641. Massachusetts: Limitations on Slavery.~

"Liberties of Forreiners & Strangers": 91. "There shall never be any bond slaverie villinage or Captivitie amongst vs, unles it be lawfull Captives taken in iust warres, & such strangers as willingly selle themselves or are sold to us. And those shall have all the liberties & Christian usages wch ye law of god established in Jsraell concerning such p/^{sons} doeth morally require. This exempts none from servitude who shall be Judged there to by Authoritie."

"Capitall Laws": 10. "If any man stealeth aman or mankinde, he shall surely be put to death" (marginal reference, Exodus xxi. 16). Re-enacted in the codes of 1649, 1660, and 1672. Whitmore, _Reprint of Colonial Laws of 1660_, etc. (1889), pp. 52, 54, 71-117.

~1642, April 3. New Netherland: Ten per cent Duty.~

"Ordinance of the Director and Council of New Netherland, imposing certain Import and Export Duties." O'Callaghan, _Laws of New Netherland_ (1868), p. 31.

~1642, Dec. 1. Connecticut: Man-Stealing made a Capital Offence.~

"Capitall Lawes," No. 10. Re-enacted in Ludlow's code, 1650. _Colonial Records_, I. 77.

~1646, Nov. 4. Massachusetts: Declaration against Man-Stealing.~

Testimony of the General Court. For text, see above, page 37. _Colonial Records_, II. 168; III. 84.

~1652, April 4. New Netherland: Duty of 15 Guilders.~

"Conditions and Regulations" of Trade to Africa. O'Callaghan, _Laws of New Netherland_, pp. 81, 127.

~1652, May 18-20. Rhode Island: Perpetual Slavery Prohibited.~

For text, see above, page 40. _Colonial Records_, I. 243.

~1655, Aug. 6. New Netherland: Ten per cent Export Duty.~

"Ordinance of the Director General and Council of New Netherland, imposing a Duty on exported Negroes." O'Callaghan, _Laws of New Netherland_, p. 191.

~1664, March 12. Duke of York's Patent: Slavery Regulated.~

"Lawes establisht by the Authority of his Majesties Letters patents, granted to his Royall Highnes James Duke of Yorke and Albany; Bearing Date the 12th Day of March in the Sixteenth year of the Raigne of our Soveraigne Lord Kinge Charles the Second." First published at Long Island in 1664.

"Bond slavery": "No Christian shall be kept in Bond-slavery villenage or Captivity, Except Such who shall be Judged thereunto by Authority, or such as willingly have sould, or shall sell themselves," etc. Apprenticeship allowed. _Charter to William Penn, and Laws of the Province of Pennsylvania_ (1879), pp. 3, 12.

~1672, October. Connecticut: Law against Man-Stealing.~

"The General Laws and Liberties of Conecticut

"Capital Laws": 10. "If any Man stealeth a Man or Man kinde, and selleth him, or if he be found in his hand, he shall be put to death. Exod. 21. 16." _Laws of Connecticut_, 1672 (repr. 1865), p. 9.

~1676, March 3. West New Jersey: Slavery Prohibited (?).~

"The Concessions and Agreements of the Proprietors, Freeholders and Inhabitants of the Province of West New-Jersey, in America."

Chap. XXIII. "That in all publick Courts of Justice for Tryals of Causes, Civil or Criminal, any Person or Persons, Inhabitants of the said Province, may freely come into, and attend the said Courts, ... that all and every Person and Persons Inhabiting the said Province, shall, as far as in us lies, be free from Oppression and Slavery." Leaming and Spicer, _Grants, Concessions_, etc., pp. 382, 398.

~1688, Feb. 18. Pennsylvania: First Protest of Friends against Slave-Trade.~

"At Monthly Meeting of Germantown Friends." For text, see above, pages 28-29. _Fac-simile Copy_ (1880).

~1695, May. Maryland: 10s. Duty Act.~

"An Act for the laying an Imposition upon Negroes, Slaves, and White Persons imported into this Province." Re-enacted in 1696, and included in Acts of 1699 and 1704. Bacon, _Laws_, 1695, ch. ix.; 1696, ch. vii.; 1699, ch. xxiii.; 1704, ch. ix.

~1696. Pennsylvania: Protest of Friends.~

"That Friends be careful not to encourage the bringing in of any more negroes." Bettle, _Notices of Negro Slavery_, in _Penn. Hist. Soc. Mem._ (1864), I. 383.

~1698, Oct. 8. South Carolina: White Servants Encouraged.~

"An Act for the Encouragement of the Importation of White Servants."

"Whereas, the great number of negroes which of late have been imported into this Collony may endanger the safety thereof if speedy care be not taken and encouragement given for the importation of white servants."

§ 1. £13 are to be given to any ship master for every male white servant (Irish excepted), between sixteen and forty years, whom he shall bring into Ashley river; and £12 for boys between twelve and sixteen years. Every servant must have at least four years to serve, and every boy seven years.

§ 3. Planters are to take servants in proportion of one to every six male Negroes above sixteen years.

§ 5. Servants are to be distributed by lot.

§ 8. This act to continue three years. Cooper, _Statutes_, II. 153.

~1699, April. Virginia: 20s. Duty Act.~

"An act for laying an imposition upon servants and slaves imported into this country, towards building the Capitoll." For three years; continued in August, 1701, and April, 1704. Hening, _Statutes_, III. 193, 212, 225.

~1703, May 6. South Carolina: Duty Act.~

"An Act for the laying an Imposition on Furrs, Skinns, Liquors and other Goods and Merchandize, Imported into and Exported out of this part of this Province, for the raising of a Fund of Money towards defraying the publick charges and expenses of this Province, and paying the debts due for the Expedition against St. Augustine." 10_s._ on Africans and 20_s._ on others. Cooper, _Statutes_, II. 201.

~1704, October. Maryland: 20s. Duty Act.~

"An Act imposing Three Pence per Gallon on Rum and Wine, Brandy and Spirits; and Twenty Shillings per Poll for Negroes; for raising a Supply to defray the Public Charge of this Province; and Twenty Shillings per Poll on Irish Servants, to prevent the importing too great a Number of Irish Papists into this Province." Revived in 1708 and 1712. Bacon, _Laws_, 1704, ch. xxxiii.; 1708, ch. xvi.; 1712, ch. xxii.

~1705, Jan. 12. Pennsylvania: 10s. Duty Act. ~

"An Act for Raising a Supply of Two pence half penny per Pound & ten shillings per Head. Also for Granting an Impost & laying on Sundry Liquors & negroes Imported into this Province for the Support of Governmt., & defraying the necessary Publick Charges in the Administration thereof." _Colonial Records_ (1852), II. 232, No. 50.

~1705, October. Virginia: 6d. Tax on Imported Slaves.~

"An act for raising a publick revenue for the better support of the Government," etc. Similar tax by Act of October, 1710. Hening, _Statutes_, III. 344, 490.

~1705, October. Virginia: 20s. Duty Act.~

"An act for laying an Imposition upon Liquors and Slaves." For two years; re-enacted in October, 1710, for three years, and in October, 1712. _Ibid._, III. 229, 482; IV. 30.

~1705, Dec. 5. Massachusetts: £4 Duty Act.~

"An act for the Better Preventing of a Spurious and Mixt Issue," etc.

§ 6. On and after May 1, 1706, every master importing Negroes shall enter his number, name, and sex in the impost office, and insert them in the bill of lading; he shall pay to the commissioner and receiver of the impost £4 per head for every such Negro. Both master and ship are to be security for the payment of the same.

§ 7. If the master neglect to enter the slaves, he shall forfeit £8 for each Negro, one-half to go to the informer and one-half to the government.

§ 8. If any Negro imported shall, within twelve months, be exported and sold in any other plantation, and a receipt from the collector there be shown, a drawback of the whole duty will be allowed. Like drawback will be allowed a purchaser, if any Negro sold die within six weeks after importation. _Mass. Province Laws, 1705-6_, ch. 10.

~1708, February. Rhode Island: £3 Duty Act.~

No title or text found. Slightly amended by Act of April, 1708; strengthened by Acts of February, 1712, and July 5, 1715; proceeds disposed of by Acts of July, 1715, October, 1717, and June, 1729. _Colonial Records_, IV. 34, 131-5, 138, 143, 191-3, 225, 423-4.

~1709, Sept. 24. New York: £3 Duty Act.~

"An Act for Laying a Duty on the Tonnage of Vessels and Slaves." A duty of £3 was laid on slaves not imported directly from their native country. Continued by Act of Oct. 30, 1710. _Acts of Assembly, 1691-1718_, pp. 97, 125, 134; Laws of New York, 1691-1773, p. 83.

~1710, Dec. 28. Pennsylvania: 40s. Duty Act.~

"An impost Act, laying a duty on Negroes, wine, rum and other spirits, cyder and vessels." Repealed by order in Council Feb. 20, 1713. Carey and Bioren, _Laws_, I. 82; Bettle, _Notices of Negro Slavery_, in _Penn. Hist. Soc. Mem._ (1864), I. 415.

~1710. Virginia: £5 Duty Act.~

"Intended to discourage the importation" of slaves. Title and text not found. Disallowed (?). _Governor Spotswood to the Lords of Trade_, in _Va. Hist. Soc. Coll._, New Series, I. 52.

~1711, July-Aug. New York: Act of 1709 Strengthened.~

"An Act for the more effectual putting in Execution an Act of General Assembly, Intituled, An Act for Laying a Duty on the Tonnage of Vessels and Slaves." _Acts of Assembly, 1691-1718_, p. 134.

~1711, December. New York: Bill to Increase Duty.~

Bill for laying a further duty on slaves. Passed Assembly; lost in Council. _Doc. rel. Col. Hist. New York_, V. 293.

~1711. Pennsylvania: Testimony of Quakers.~

" ... the Yearly Meeting of Philadelphia, on a representation from the Quarterly Meeting of Chester, that the buying and encouraging the importation of negroes was still practised by some of the members of the society, again repeated and enforced the observance of the advice issued in 1696, and further directed all merchants and factors to write to their correspondents and discourage their sending any more negroes." Bettle, _Notices of Negro Slavery_, in _Penn. Hist. Soc. Mem._ (1864), I. 386.

~1712, June 7. Pennsylvania: Prohibitive (?) Duty Act.~

"A supplementary Act to an act, entituled, An impost act, laying a duty on Negroes, rum," etc. Disallowed by Great Britain, 1713. Carey and Bioren, _Laws_, I. 87, 88. Cf. _Colonial Records_ (1852), II. 553.

~1712, June 7. Pennsylvania: Prohibitive Duty Act.~

"An act to prevent the Importation of Negroes and Indians into this Province."

"Whereas Divers Plots and Insurrections have frequently happened, not only in the Islands, but on the Main Land of _America_, by Negroes, which have been carried on so far that several of the Inhabitants have been thereby barbarously Murthered, an instance whereof we have lately had in our neighboring Colony of _New York_. And whereas the Importation of Indian Slaves hath given our Neighboring _Indians_ in this Province some umbrage of Suspicion and Dis-satisfaction. For Prevention of all which for the future,

"_Be it Enacted_ ..., That from and after the Publication of this Act, upon the Importation of any Negro or Indian, by Land or Water, into this Province, there shall be paid by the Importer, Owner or Possessor thereof, the sum of _Twenty Pounds per head_, for every Negro or Indian so imported or brought in (except Negroes directly brought in from the _West India Islands_ before the first Day of the Month called _August_ next) unto the proper Officer herein after named, or that shall be appointed according to the Directions of this Act to receive the same," etc. Disallowed by Great Britain, 1713. _Laws of Pennsylvania, collected_, etc. (ed. 1714), p. 165; _Colonial Records_ (1852), II. 553; Burge, _Commentaries_, I. 737, note; _Penn. Archives_, I. 162.

~1713, March 11. New Jersey: £10 Duty Act.~

"An Act for laying a Duty on Negro, Indian and Mulatto Slaves, imported and brought into this Province."

"_Be it Enacted_ ..., That every Person or Persons that shall hereafter Import or bring in, or cause to be imported or brought into this Province, any Negro Indian or Mulatto Slave or Slaves, every such Person or Persons so importing or bringing in, or causing to be imported or brought in, such Slave or Slaves, shall enter with one of the Collectors of her Majestie's Customs of this Province, every such Slave or Slaves, within Twenty Four Hours after such Slave or Slaves is so Imported, and pay the Sum of _Ten Pounds_ Money as appointed by her Majesty's Proclamation, for each Slave so imported, or give sufficient Security that the said Sum of _Ten Pounds_, Money aforesaid, shall be well and truly paid within three Months after such Slave or Slaves are so imported, to the Collector or his Deputy of the District into which such Slave or Slaves shall be imported, for the use of her Majesty, her Heirs and Successors, toward the Support of the Government of this Province." For seven years; violations incur forfeiture and sale of slaves at auction; slaves brought from elsewhere than Africa to pay £10, etc. _Laws and Acts of New Jersey, 1703-1717_ (ed. 1717), p. 43; _N.J. Archives_, 1st Series, XIII. 516, 517, 520, 522, 523, 527, 532, 541.

~1713, March 26. Great Britain and Spain: The Assiento.~

"The Assiento, or Contract for allowing to the Subjects of Great Britain the Liberty of importing Negroes into the Spanish America. Signed by the Catholick King at Madrid, the 26th Day of March, 1713."

Art. I. "First then to procure, by this means, a mutual and reciprocal advantage to the sovereigns and subjects of both crowns, her British majesty does offer and undertake for the persons, whom she shall name and appoint, That they shall oblige and charge themselves with the bringing into the West-Indies of America, belonging to his catholick majesty, in the space of the said 30 years, to commence on the 1st day of May, 1713, and determine on the like day, which will be in the year 1743, _viz._ 144000 negroes, _Piezas de India_, of both sexes, and of all ages, at the rate of 4800 negroes, _Piezas de India_, in each of the said 30 years, with this condition, That the persons who shall go to the West-Indies to take care of the concerns of the assiento, shall avoid giving any offence, for in such case they shall be prosecuted and punished in the same manner, as they would have been in Spain, if the like misdemeanors had been committed there."

Art. II. Assientists to pay a duty of 33 pieces of eight (_Escudos_) for each Negro, which should include all duties.

Art. III. Assientists to advance to his Catholic Majesty 200,000 pieces of eight, which should be returned at the end of the first twenty years, etc. John Almon, _Treaties of Peace, Alliance, and Commerce, between Great-Britain and other Powers_ (London, 1772), I. 83-107.

~1713, July 13. Great Britain and Spain: Treaty of Utrecht.~

"Treaty of Peace and Friendship between the most serene and most potent princess Anne, by the grace of God, Queen of Great Britain, France, and Ireland, Defender of the Faith, &c. and the most serene and most potent Prince Philip V the Catholick King of Spain, concluded at Utrecht, the 2/13 Day of July, 1713."

Art. XII. "The Catholick King doth furthermore hereby give and grant to her Britannick majesty, and to the company of her subjects appointed for that purpose, as well the subjects of Spain, as all others, being excluded, the contract for introducing negroes into

several parts of the dominions of his Catholick Majesty in America, commonly called _el Pacto de el Assiento de Negros_, for the space of thirty years successively, beginning from the first day of the month of May, in the year 1713, with the same conditions on which the French enjoyed it, or at any time might or ought to enjoy the same, together with a tract or tracts of Land to be allotted by the said Catholick King, and to be granted to the company aforesaid, commonly called _la Compania de el Assiento_, in some convenient place on the river of Plata, (no duties or revenues being payable by the said company on that account, during the time of the abovementioned contract, and no longer) and this settlement of the said society, or those tracts of land, shall be proper and sufficient for planting, and sowing, and for feeding cattle for the subsistence of those who are in the service of the said company, and of their negroes; and that the said negroes may be there kept in safety till they are sold; and moreover, that the ships belonging to the said company may come close to land, and be secure from any danger. But it shall always be lawful for the Catholick King, to appoint an officer in the said place or settlement, who may take care that nothing be done or practised contrary to his royal interests. And all who manage the affairs of the said company there, or belong to it, shall be subject to the inspection of the aforesaid officer, as to all matters relating to the tracts of land abovementioned. But if any doubts, difficulties, or controversies, should arise between the said officer and the managers for the said company, they shall be referred to the determination of the governor of Buenos Ayres. The Catholick King has been likewise pleased to grant to the said company, several other extraordinary advantages, which are more fully and amply explained in the contract of the Assiento, which was made and concluded at Madrid, the 26th day of the month of March, of this present year 1713. Which contract, or _Assiento de Negros_, and all the clauses, conditions, privileges and immunities contained therein, and which are not contrary to this article, are and shall be deemed, and taken to be, part of this treaty, in the same manner as if they had been here inserted word for word." John Almon, _Treaties of Peace, Alliance, and Commerce, between Great-Britain and other Powers_, I. 168-80.

~1714, Feb. 18. South Carolina: Duty on American Slaves.~

"An Act for laying an additional duty on all Negro Slaves imported into this Province from any part of America." Title quoted in Act of 1719, §30, _q.v._

~1714, Dec. 18. South Carolina: Prohibitive Duty.~

"An additional Act to an Act entitled 'An Act for the better Ordering and Governing Negroes and all other Slaves.'"

§9 "And _whereas_, the number of negroes do extremely increase in this Province, and through the afflicting providence of God, the white persons do not proportionally multiply, by reason whereof, the safety of the said Province is greatly endangered; for the prevention of which for the future,

"_Be it further enacted_ by the authority aforesaid, That all negro slaves from twelve years old and upwards, imported into this part of this Province from any part of Africa, shall pay such additional duties as is hereafter named, that is to say:--that every merchant or other person whatsoever, who shall, six months after the ratification of this Act, import any negro slaves as aforesaid, shall, for every such slave, pay unto the public receiver for the time being, (within thirty days after such importation,) the sum of two pounds current money of this Province." Cooper, _Statutes_, VII. 365.

~1715, Feb. 18. South Carolina: Duty on American Negroes.~

"_An additional Act_ to an act entitled _an act for raising the sum of £2000, of and from the estates real and personal of the inhabitants of this Province, ratified in open Assembly the 18th day of December, 1714_; and for laying an additional duty on all Negroe slaves imported into this Province from any part of America." Title only given. Grimké, _Public Laws_, p. xvi, No. 362.

~1715, May 28. Pennsylvania: £5 Duty Act.~

"An Act for laying a Duty on _Negroes_ imported into this province." Disallowed by Great Britain, 1719. _Acts and Laws of Pennsylvania, 1715_, p. 270; _Colonial Records_ (1852), III. 75-6; Chalmers, _Opinions_, II. 118.

~1715, June 3. Maryland: 20s. Duty Act.~

"An Act laying an Imposition on Negroes ...; and also on Irish Servants, to prevent the importing too great a Number of Irish Papists into this Province." Supplemented April 23, 1735, and July 25, 1754. _Compleat Collection of the Laws of Maryland_ (ed. 1727), p. 157; Bacon, _Laws_, 1715, ch. xxxvi. §8; 1735, ch. vi. §§1-3; _Acts of Assembly, 1754_, p. 10.

~1716, June 30. South Carolina: £3 Duty Act.~

"An Act for laying an Imposition on Liquors, Goods and Merchandizes, Imported into and Exported out of this Province, for the raising of a Fund of Money towards the defraying the publick charges and expences of the Government." A duty of £3 was laid on African slaves, and £30 on American slaves. Cooper, _Statutes_, II. 649.

~1716. New York: 5 oz. and 10 oz. plate Duty Act.~

"An Act to Oblige all Vessels Trading into this Colony (except such as are therein excepted) to pay a certain Duty; and for the further Explanation and rendring more Effectual certain Clauses in an Act of General Assembly of this Colony, Intituled, An Act by which a Duty is laid on Negroes, and other Slaves, imported into this Colony." The act referred to is not to be found. _Acts of Assembly, 1691-1718_, p. 224.

~1717, June 8. Maryland: Additional 20s. Duty Act.~

"An Act for laying an Additional Duty of Twenty Shillings Current Money per Poll on all Irish Servants, ... also, the Additional Duty of Twenty Shillings Current Money per Poll on all Negroes, for raising a Fund for the Use of Publick Schools," etc. Continued by Act of 1728. _Compleat Collection of the Laws of Maryland_ (ed. 1727), p. 191; Bacon, _Laws_, 1728, ch. viii.

~1717, Dec. 11. South Carolina: Prohibitive Duty.~

"A further additional Act to an Act entitled An Act for the better ordering and governing of Negroes and all other Slaves; and to an additional Act to an Act entitled An Act for the better ordering and governing of Negroes and all other Slaves."

§ 3. "And _whereas_, the great importation of negroes to this Province, in proportion to the white inhabitants of the same, whereby the future safety of this Province will be greatly endangered; for the prevention whereof,

"_Be it enacted_ by the authority aforesaid, That all negro slaves of any age or condition whatsoever, imported or otherwise brought into this Province, from any part of the world, shall pay such additional duties as is hereafter named, that is to say:--that every merchant or other person whatsoever, who shall, eighteen months after the ratification of this Act, import any negro slave as aforesaid, shall, for every such slave, pay unto the public receiver for the time being, at the time of each importation, over and above all the duties already charged on negroes, by any law in force in this Province, the additional sum of forty pounds current money of this Province," etc.

§ 4. This section on duties to be in force for four years after ratification, and thence to the end of the next session of the General Assembly. Cooper, _Statutes_, VII. 368.

~1718, Feb. 22. Pennsylvania: Duty Act.~

"An Act for continuing a duty on Negroes brought into this province." Carey and Bioren, _Laws_, I. 118.

~1719, March 20. South Carolina: £10 Duty Act.~

"An Act for laying an Imposition on Negroes, Liquors, and other Goods and Merchandizes, imported, and exported out of this Province, for the raising of a Fund of Money towards the defraying the Publick Charges and Expences of this Government; as also to Repeal several Duty Acts, and Clauses and Paragraphs of Acts, as is herein mentioned." This repeals former duty acts (e.g. that of 1714), and lays a duty of £10 on African slaves, and £30 on American slaves. Cooper, _Statutes_, III. 56.

~1721, Sept. 21. South Carolina: £10 Duty Act.~

"An Act for granting to His Majesty a Duty and Imposition on Negroes, Liquors, and other Goods and Merchandize, imported into and exported out of this Province." This was a continuation of the Act of 1719. _Ibid._, III. 159.

~1722, Feb. 23. South Carolina: £10 Duty Act.~

"An Act for Granting to His Majesty a Duty and Imposition on Negroes, Liquors, and other Goods and Merchandizes, for the use of the Publick of this Province."

§ 1. " ... on all negro slaves imported from Africa directly, or any other place whatsoever, Spanish negroes excepted, if above ten years of age, ten pounds; on all negroes under ten years of age, (sucking children excepted) five pounds," etc.

§ 3. "And whereas, it has proved to the detriment of some of the inhabitants of this Province, who have purchased negroes imported here from the Colonies of America, that they were either transported thence by the Courts of justice, or sent off by private persons for their ill behaviour and misdemeanours, to prevent which for the future,

"_Be it enacted_ by the authority aforesaid, That all negroes imported in this Province from any part of America, after the ratification of this Act, above ten years of age, shall pay unto the Publick Receiver as a duty, the sum of fifty pounds, and all such negroes under the age of ten years, (sucking children excepted) the sum of five pounds of like current money, unless the owner or agent shall produce a testimonial under the hand and seal of any Notary Publick of the Colonies or plantations from whence such negroes came last, before whom it was proved upon oath, that the same are new negroes, and have not been six months on shoar in any part of America," etc.

§ 4. "And whereas, the importation of Spanish Indians, mustees, negroes, and mulattoes, may be of dangerous consequence by inticing the slaves belonging to the inhabitants of this Province to desert with them to the Spanish settlements near us,

"_Be it therefore enacted_ That all such Spanish negroes, Indians, mustees, or mulattoes, so imported into this Province, shall pay unto the Publick Receiver, for the use of this Province, a duty of one hundred and fifty pounds, current money of this Province."

§ 19. Rebate of three-fourths of the duty allowed in case of re-exportation in six months.

§ 31. Act of 1721 repealed.

§ 36. This act to continue in force for three years, and thence to the end of the next session of the General Assembly, and no longer. Cooper, _Statutes_, III. 193.

~1722, May 12. Pennsylvania: Duty Act.~

"An Act for laying a duty on Negroes imported into this province." Carey and Bioren, _Laws_, I. 165.

~1723, May. Virginia: Duty Act.~

"An Act for laying a Duty on Liquors and Slaves." Title only; repealed by proclamation Oct. 27, 1724. Hening, _Statutes_, IV. 118.

~1723, June 18. Rhode Island: Back Duties Collected.~

Resolve appointing the attorney-general to collect back duties on Negroes. _Colonial Records_, IV. 330.

~1726, March 5. Pennsylvania: £10 Duty Act.~

"An Act for the better regulating of Negroes in this province." Carey and Bioren, _Laws_, I. 214; Bettle, _Notices of Negro Slavery_, in _Penn. Hist. Soc. Mem._ (1864), I. 388.

~1726, March 5. Pennsylvania: Duty Act.~

"An Act for laying a duty on Negroes imported into this province." Carey and Bioren, _Laws_, I. 213.

~1727, February. Virginia: Prohibitive Duty Act (?).~

"An Act for laying a Duty on Slaves imported; and for appointing a Treasurer." Title only found; the duty was probably prohibitive; it was enacted with a suspending clause, and was not assented to by the king. Hening, _Statutes_, IV. 182.

~1728, Aug. 31. New York: £2 and £4 Duty Act.~

"An Act to repeal some Parts and to continue and enforce other Parts of the Act therein mentioned, and for granting several Duties to His Majesty, for supporting His Government in the Colony of New York" from Sept. 1, 1728, to Sept. 1, 1733. Same duty continued by Act of 1732. _Laws of New York, 1691-1773_, pp. 148, 171; _Doc. rel. Col. Hist. New York_, VI. 32, 33, 34, 37, 38.

~1728, Sept. 14. Massachusetts: Act of 1705 Strengthened.~

"An Act more effectually to secure the Duty on the Importation of Negroes." For seven years; substantially the same law re-enacted Jan. 26, 1738, for ten years. _Mass. Province Laws, 1728-9_, ch. 16; _1738-9_, ch. 27.

~1729, May 10. Pennsylvania: 40s. Duty Act.~

"An Act for laying a Duty on Negroes imported into this Province." _Laws of Pennsylvania_ (ed. 1742), p. 354, ch. 287.

~1732, May. Rhode Island: Repeal of Act of 1712.~

"Whereas, there was an act made and passed by the General Assembly, at their session, held at Newport, the 27th day of February, 1711 [O.S., N.S. = 1712], entitled 'An Act for laying a duty on negro slaves that shall be imported into this colony,' and this Assembly being directed by His Majesty's instructions to repeal the same;--

"Therefore, be it enacted by the General Assembly ... that the said act ... be, and it is hereby repealed, made null and void, and of none effect for the future." If this is the act mentioned under Act of 1708, the title is wrongly cited; if not, the act is lost. _Colonial Records_, IV. 471.

~1732, May. Virginia: Five per cent Duty Act.~

"An Act for laying a Duty upon Slaves, to be paid by the Buyers." For four years; continued and slightly amended by Acts of 1734, 1736, 1738, 1742, and 1745; revived February, 1752, and continued by Acts of November, 1753, February, 1759, November, 1766, and 1769; revived (or continued?) by Act of February, 1772, until 1778. Hening, _Statutes_, IV. 317, 394, 469; V. 28, 160, 318; VI. 217, 353; VII. 281; VIII. 190, 336, 530.

~1734, November. New York: Duty Act.~

"An act to lay a duty on Negroes & a tax on the Slaves therein mentioned during the time and for the uses within mentioned." The tax was 1_s._ yearly per slave. _Doc. rel. Col. Hist. New York_, VI. 38.

~1734, Nov. 28. New York: £2 and £4 (?) Duty Act.~

"An Act to lay a Duty on the Goods, and a Tax on the Slaves therein mentioned, during the Time, and for the Uses mentioned in the same." Possibly there were two acts this year. _Laws of New York, 1691-1773_, p. 186; _Doc. rel. Col. Hist. New York_, VI. 27.

~1735. Georgia: Prohibitive Act.~

An "act for rendering the colony of Georgia more defensible by prohibiting the importation and use of black slaves or negroes into the same." W.B. Stevens, _History of Georgia_, I. 311; [B. Martyn], _Account of the Progress of Georgia_ (1741), pp. 9-10; Prince Hoare, _Memoirs of Granville Sharp_ (London, 1820), p. 157.

~1740, April 5. South Carolina: £100 Prohibitive Duty Act.~

"An Act for the better strengthening of this Province, by granting to His Majesty certain taxes and impositions on the purchasers of Negroes imported," etc. The duty on slaves from America was £150. Continued to 1744. Cooper, _Statutes_, III. 556. Cf. _Abstract Evidence on Slave-Trade before Committee of House of Commons, 1790-91_ (London, 1791), p. 150.

~1740, May. Virginia: Additional Five per cent Duty Act.~

"An Act, for laying an additional Duty upon Slaves, to be paid by the Buyer, for encouraging persons to enlist in his Majesty's service: And for preventing desertion." To continue until July 1, 1744. Hening, _Statutes_, V. 92.

~1751, June 14. South Carolina: White Servants Encouraged.~

"An Act for the better strengthening of this Province, by granting to His Majesty certain Taxes and Impositions on the purchasers of Negroes and other slaves imported, and for appropriating the same to the uses therein mentioned, and for granting to His Majesty a duty on Liquors and other Goods and Merchandize, for the uses therein mentioned, and for exempting the purchasers of Negroes and other slaves imported from payment of the Tax, and the Liquors and other Goods and Merchandize from the duties imposed by any former Act or Acts of the General Assembly of this Province."

"Whereas, the best way to prevent the mischiefs that may be attended by the great importation of negroes into this Province, will be to establish a method by which such importation should be made a necessary means of introducing a proportionable number of white inhabitants into the same; therefore for the effectual raising and appropriating a fund sufficient for the better settling of this Province with white inhabitants, we, his Majesty's most dutiful and loyal subjects, the House of Assembly now met in General Assembly, do cheerfully give and grant unto the King's most excellent Majesty, his heirs and successors, the several taxes and impositions hereinafter mentioned, for the uses and to be raised, appropriated, paid and applied as is hereinafter directed and appointed, and not otherwise, and do humbly pray his most sacred Majesty that it may be enacted,

§ 1. "_And be it enacted_, by his Excellency James Glen, Esquire, Governor in chief and Captain General in and over the Province of South Carolina, by and with the advice and consent of his Majesty's honorable Council, and the House of Assembly of the said Province, and by the authority of the same, That from and immediately after the passing of this Act, there shall be imposed on and paid by all and every the inhabitants of this Province, and other person and persons whosoever, first purchasing any negro or other slave, hereafter to be imported, a certain tax or sum of ten pounds current money for every such negro and other slave of the height of four feet two inches and upwards; and for every one under that height, and above three feet two inches, the sum of five pounds like money; and for all under three feet two inches, (sucking children excepted) two pounds and ten shillings like money, which every such inhabitant of this Province, and other person and persons whosoever shall so purchase or buy as aforesaid, which said sums of ten pounds and five pounds and two pounds and ten shillings respectively, shall be paid by such purchaser for every such slave, at the time of his, her or their purchasing of the same, to the public treasurer of this Province for the time being, for the uses hereinafter mentioned, set down and appointed, under pain of forfeiting all and every such negroes and slaves, for which the said taxes or impositions shall not be paid, pursuant to the directions of this Act, to be sued for, recovered and applied in the manner hereinafter directed."

§ 6. "_And be it further enacted_ by the authority aforesaid, That the said tax hereby imposed on negroes and other slaves, paid or to be paid by or on the behalf of the purchasers as aforesaid, by virtue of this Act, shall be applied and appropriated as followeth, and to no other use, or in any other manner whatever, (that is to say) that three-fifth parts (the whole into five equal parts to be divided) of the net sum arising by the said tax, for and during the term of five years from the time of passing this Act, be applied and the same is hereby applied for payment of the sum of six pounds proclamation money to every poor foreign protestant whatever from Europe, or other poor protestant (his Majesty's subject) who shall produce a certificate under the seal of any corporation, or a certificate under the hands of the minister and church-wardens of any parish, or the minister and elders of any church, meeting or congregation in Great Britain or Ireland, of the good character of such poor protestant, above the age of twelve and under the age of fifty years, and for payment of the sum of three pounds like money, to every such poor protestant under the age of twelve and above the age of two years; who shall come into this Province within the first three years of the said term of five years, and settle on any part of the southern frontier lying between Pon Pon and Savannah rivers, or in the central parts of this Province," etc. For the last two years the bounty is £4 and £2.

§ 7. After the expiration of this term of five years, the sum is appropriated to the protestants settling anywhere in the State, and the bounty is £2 13_s._ 4_d._, and £1 6_s._ 8_d._

§ 8. One other fifth of the tax is appropriated to survey lands, and the remaining fifth as a bounty for ship-building, and for encouraging the settlement of ship-builders.

§ 14. Rebate of three-fourths of the tax allowed in case of re-exportation of the slaves in six months.

§ 16. "_And be it further enacted_ by the authority aforesaid, That every person or persons who after the passing this Act shall purchase any slave or slaves which shall be brought or imported into this Province, either by land or water, from any of his Majesty's plantations or colonies in America, that have been in any such colony or plantation for the space of six months; and if such slave or slaves have not been so long in such colony or plantation, the importer shall be obliged to make oath or produce a proper certificate thereof, or otherwise every such importer shall pay a further tax or imposition of fifty pounds, over and besides the tax hereby imposed for every such slave which he or they shall purchase as aforesaid." Actual settlers bringing slaves are excepted.

§ 41. This act to continue in force ten years from its passage, and thence to the end of the next session of the General Assembly, and no longer. Cooper, _Statutes_, III. 739.

~1753, Dec. 12. New York: 5 oz. and 10 oz. plate Duty Act.~

"An Act for granting to His Majesty the several Duties and Impositions, on Goods, Wares and Merchandizes imported into this Colony, therein mentioned." Annually continued until 1767, or perhaps until 1774. _Laws of New York, 1752-62_, p. 21, ch. xxvii.; _Doc. rel. Col. Hist. New York_, VII. 907; VIII. 452.

~1754, February. Virginia: Additional Five per cent Duty Act.~

"An Act for the encouragement and protection of the settlers upon the waters of the Mississippi." For three years; continued in 1755 and 1763; revived in 1772, and continued until 1778. Hening, _Statutes_, VI. 417, 468; VII. 639; VIII. 530.

~1754, July 25. Maryland: Additional 10s. Duty Act.~

"An Act for his Majesty's Service." Bacon, _Laws_, 1754, ch. ix.

~1755, May. Virginia: Additional Ten per cent Duty Act.~

"An act to explain an act, intituled, An act for raising the sum of twenty thousand pounds, for the protection of his majesty's subjects, against the insults and encroachments of the French; and for other purposes therein mentioned."

§ 10. " ... from and after the passing of this act, there shall be levied and paid to our sovereign lord the king, his heirs and successors, for all slaves imported, or brought into this colony and dominion for sale, either by land or water, from any part [port] or place whatsoever, by the buyer, or purchaser, after the rate of ten per centum, on the amount of each respective purchase, over and above the several duties already laid on slaves, imported as aforesaid, by an act or acts of Assembly, now subsisting, and also over and above the duty laid by" the Act of 1754. Repealed by Act of May, 1760, § 11, " ... inasmuch as the same prevents the importation of slaves, and thereby lessens the fund arising from the duties upon slaves." Hening, _Statutes_, VI. 461; VII. 363. Cf. _Dinwiddie Papers_, II. 86.

~1756, March 22. Maryland: Additional 20s. Duty Act.~

"An Act for granting a Supply of Forty Thousand Pounds, for his Majesty's Service," etc. For five years. Bacon, _Laws_, 1756, ch. v.

~1757, April. Virginia: Additional Ten per cent Duty Act.~

"An Act for granting an aid to his majesty for the better protection of this colony, and for other purposes therein mentioned."

§ 22. " ... from and after the ninth day of July, one thousand seven hundred and fifty-eight, during the term of seven years, there shall be paid for all slaves imported into this colony, for sale, either by land or water, from any port or place whatsoever, by the buyer or purchaser thereof, after the rate of ten per centum on the amount of each respective purchase, over and above the several duties already laid upon slaves imported, as aforesaid, by any act or acts of Assembly now subsisting in this colony," etc. Repealed by Act of March, 1761, § 6, as being "found very inconvenient." Hening, _Statutes_, VII. 69, 383.

~1759, November. Virginia: Twenty per cent Duty Act.~

"An Act to oblige the persons bringing slaves into this colony from Maryland, Carolina, and the West-Indies, for their own use, to pay a duty."

§ 1. " ... from and after the passing of this act, there shall be paid ... for all slaves imported or brought into this colony and dominion from Maryland, North-Carolina, or any other place in America, by the owner or importer thereof, after the rate of twenty per centum on the amount of each respective purchase," etc. This act to continue until April 20, 1767; continued in 1766 and 1769, until 1773; altered by Act of 1772, _q.v. Ibid._, VII. 338; VIII. 191, 336.

~1760. South Carolina: Total Prohibition.~

Text not found; act disallowed by Great Britain. Cf. Burge, _Commentaries_, I. 737, note; W.B. Stevens, _History of Georgia_, I. 286.

~1761, March 14. Pennsylvania: £10 Duty Act.~

"An Act for laying a duty on Negroes and Mulattoe slaves, imported into this province." Continued in 1768; repealed (or disallowed) in 1780. Carey and Bioren, _Laws_, I. 371, 451; _Acts of Assembly_ (ed. 1782), p. 149; _Colonial Records_ (1852), VIII. 576.

~1761, April 22. Pennsylvania: Prohibitive Duty Act.~

"A Supplement to an act, entituled An Act for laying a duty on Negroes and Mulattoe slaves, imported into this province." Continued in 1768. Carey and Bioren, _Laws_, I. 371, 451; Bettle, _Notices of Negro Slavery_, in _Penn. Hist. Soc. Mem._ (1864), I. 388-9.

~1763, Nov. 26. Maryland: Additional £2 Duty Act.~

"An Act for imposing an additional Duty of Two Pounds per Poll on all Negroes Imported into this Province."

§ 1. All persons importing Negroes by land or water into this province, shall at the time of entry pay to the naval officer the sum of two pounds, current money, over and above the duties now payable by law, for every Negro so imported or brought in, on forfeiture of £10 current money for every Negro so brought in and not paid for. One half of the penalty is to go to the informer, the other half to the use of the county schools. The duty shall be collected, accounted for, and paid by the naval officers, in the same manner as former duties on Negroes.

§ 2. But persons removing from any other of his Majesty's dominions in order to settle and reside within this province, may import their slaves for carrying on their proper occupations at the time of removal, duty free.

§ 3. Importers of Negroes, exporting the same within two months of the time of their importation, on application to the naval officer shall be paid the aforesaid duty. Bacon, _Laws_, 1763, ch. xxviii.

~1763 (circa). New Jersey: Prohibitive Duty Act.~

"An Act for laying a duty on Negroes and Mulatto Slaves Imported into this Province." Disallowed (?) by Great Britain. _N.J. Archives_, IX. 345-6, 383, 447, 458.

~1764, Aug. 25. South Carolina: Additional £100 Duty Act.~

"An Act for laying an additional duty upon all Negroes hereafter to be imported into this Province, for the time therein mentioned, to be paid by the first purchasers of such Negroes." Cooper, _Statutes_, IV 187.

~1766, November. Virginia: Proposed Duty Act.~

"An act for laying an additional duty upon slaves imported into this colony."

§ 1. " ... from and after the passing of this act there shall be levied and paid ... for all slaves imported or brought into this colony for sale, either by land or water from any port or place whatsoever, by the buyer or purchaser, after the rate of ten per centum on the amount of each respective purchase over and above the several duties already laid upon slaves imported or brought into this colony as aforesaid," etc. To be suspended until the king's consent is given, and then to continue seven years. The same act was passed again in 1769. Hening, _Statutes_, VIII. 237, 337.

~1766. Rhode Island: Restrictive Measure (?).~

Title and text not found. Cf. _Digest_ of 1798, under "Slave Trade;" _Public Laws of Rhode Island_ (revision of 1822), p. 441.

~1768, Feb. 20. Pennsylvania: Re-enactment of Acts of 1761.~

Titles only found. Dallas, _Laws_, I. 490; _Colonial Records_ (1852), IX. 472, 637, 641.

~1769, Nov. 16. New Jersey: £15 Duty Act.~

"An Act for laying a Duty on the Purchasers of Slaves imported into this Colony."

"Whereas Duties on the Importation of Negroes in several of the neighbouring Colonies hath, on Experience, been found beneficial in the Introduction of sober, industrious Foreigners, to settle under His Majesty's Allegiance, and the promoting a Spirit of Industry among the Inhabitants in general: _In order therefore_ to promote the same good Designs in this Government, and that such as

choose to purchase Slaves may contribute some equitable Proportion of the publick Burdens," etc. A duty of "_Fifteen Pounds_, Proclamation Money, is laid." _Acts of Assembly_ (Allinson, 1776), p. 315.

~1769 (circa). Connecticut: Importation Prohibited (?).~

Title and text not found. "Whereas, the increase of slaves is injurious to the poor, and inconvenient, therefore," etc. Fowler, _Historical Status of the Negro in Connecticut_, in _Local Law_, etc., p. 125.

~1770. Rhode Island: Bill to Prohibit Importation.~

Bill to prohibit importation of slaves fails. Arnold, _History of Rhode Island_ (1859), II. 304, 321, 337.

~1771, April 12. Massachusetts: Bill to Prevent Importation.~

Bill passes both houses and fails of Governor Hutchinson's assent. _House Journal_, pp. 211, 215, 219, 228, 234, 236, 240, 242-3.

~1771. Maryland: Additional £5 Duty Act.~

"An Act for imposing a further additional duty of five pounds current money per poll on all negroes imported into this province." For seven years. _Laws of Maryland since 1763_: 1771, ch. vii.; cf. 1773, sess. Nov.-Dec., ch. xiv.

~1772, April 1. Virginia: Address to the King.~

" ... The importation of slaves into the colonies from the coast of Africa hath long been considered as a trade of great inhumanity, and under its _present encouragement_, we have too much reason to fear _will endanger the very existence_ of your majesty's American dominions....

"Deeply impressed with these sentiments, we most humbly beseech your majesty to _remove all those restraints_ on your majesty's governors of this colony, _which inhibit their assenting to such laws as might check so very pernicious a commerce_." _Journals of the House of Burgesses_, p. 131; quoted in Tucker, _Dissertation on Slavery_ (repr. 1861), p. 43.

~1773, Feb. 26. Pennsylvania: Additional £10 Duty Act.~

"An Act for making perpetual the act ... [of 1761] ... and laying an additional duty on the said slaves." Dallas, _Laws_, I. 671; _Acts of Assembly_ (ed. 1782), p. 149.

~1774, March, June. Massachusetts: Bills to Prohibit Importation.~

Two bills designed to prohibit the importation of slaves fail of the governor's assent. First bill: _General Court Records_, XXX. 248, 264; _Mass. Archives, Domestic Relations, 1643-1774_, IX. 457. Second bill: _General Court Records_, XXX. 308, 322.

~1774, June. Rhode Island: Importation Restricted.~

"An Act prohibiting the importation of Negroes into this Colony."

"Whereas, the inhabitants of America are generally engaged in the preservation of their own rights and liberties, among which, that of personal freedom must be considered as the greatest; as those who are desirous of enjoying all the advantages of liberty themselves, should be willing to extend personal liberty to others;--

"Therefore, be it enacted ... that for the future, no negro or mulatto slave shall be brought into this colony; and in case any slave shall hereafter be brought in, he or she shall be, and are hereby, rendered immediately free, so far as respects personal freedom, and the enjoyment of private property, in the same manner as the native Indians."

"Provided that the slaves of settlers and travellers be excepted.

"Provided, also, that nothing in this act shall extend, or be deemed to extend, to any negro or mulatto slave brought from the coast of Africa, into the West Indies, on board any vessel belonging to this colony, and which negro or mulatto slave could not be disposed of in the West Indies, but shall be brought into this colony.

"Provided, that the owner of such negro or mulatto slave give bond to the general treasurer of the said colony, within ten days after such arrival in the sum of £100, lawful money, for each and every such negro or mulatto slave so brought in, that such negro or mulatto slave shall be exported out of the colony, within one year from the date of such bond; if such negro or mulatto be alive, and in a condition to be removed."

"Provided, also, that nothing in this act shall extend, or be deemed to extend, to any negro or mulatto slave that may be on board any vessel belonging to this colony, now at sea, in her present voyage." Heavy penalties are laid for bringing in Negroes in order to free them. _Colonial Records_, VII. 251-3.

[1784, February: "It is voted and resolved, that the whole of the clause contained in an act of this Assembly, passed at June session, A.D. 1774, permitting slaves brought from the coast of Africa into the West Indies, on board any vessel belonging to this (then colony, now) state, and who could not be disposed of in the West Indies, &c., be, and the same is, hereby repealed." _Colonial Records_, X. 8.]

~1774, October. Connecticut: Importation Prohibited.~

"An Act for prohibiting the Importation of Indian, Negro or Molatto Slaves."

" ... no indian, negro or molatto Slave shall at any time hereafter be brought or imported into this Colony, by sea or land, from any place or places whatsoever, to be disposed of, left or sold within this Colony." This was re-enacted in the revision of 1784, and slaves born after 1784 were ordered to be emancipated at the age of twenty-five. _Colonial Records_, XIV. 329; _Acts and Laws of Connecticut_ (ed. 1784), pp. 233-4.

~1774. New Jersey: Proposed Prohibitive Duty.~

"A Bill for laying a Duty on Indian, Negroe and Molatto Slaves, imported into this Colony." Passed the Assembly, and was rejected by the Council as "plainly" intending "an intire Prohibition," etc. _N.J. Archives_, 1st Series, VI. 222.

~1775, March 27. Delaware: Bill to Prohibit Importation.~

Passed the Assembly and was vetoed by the governor. Force, _American Archives_, 4th Series, II. 128-9.

~1775, Nov. 23. Virginia: On Lord Dunmore's Proclamation.~

Williamsburg Convention to the public: "Our Assemblies have repeatedly passed acts, laying heavy duties upon imported Negroes, by which they meant altogether to prevent the horrid traffick; but their humane intentions have been as often frustrated by the cruelty and covetousness of a set of _English_ merchants." ... The Americans would, if possible, "not only prevent any more Negroes from losing their freedom, but restore it to such as have already unhappily lost it." This is evidently addressed in part to Negroes, to keep them from joining the British. _Ibid._, III. 1387.

~1776, June 29. Virginia: Preamble to Frame of Government.~

Blame for the slave-trade thrown on the king. See above, page 21. Hening, _Statutes_, IX. 112-3.

~1776, Aug.-Sept. Delaware: Constitution.~

"The Constitution or system of Government agreed to and resolved upon by the Representatives in full Convention of the Delaware State," etc.

§ 26. "No person hereafter imported into this State from _Africa_ ought to be held in slavery on any pretence whatever; and no Negro, Indian, or Mulatto slave ought to be brought into this State, for sale, from any part of the world." Force, _American Archives_, 5th Series, I. 1174-9.

~1777, July 2. Vermont: Slavery Condemned.~

The first Constitution declares slavery a violation of "natural, inherent and unalienable rights." _Vermont State Papers, 1779-86_, p. 244.

~1777. Maryland: Negro Duty Maintained.~

"An Act concerning duties."

" ... no duties imposed by act of assembly on any article or thing imported into or exported out of this state (except duties imposed on the importation of negroes), shall be taken or received within two years from the end of the present session of the general assembly." _Laws of Maryland since 1763_: 1777, sess. Feb.-Apr., ch. xviii.

~1778, Sept. 7. Pennsylvania: Act to Collect Back Duties.~

"An Act for the recovery of the duties on Negroes and Mulattoe slaves, which on the fourth day of July, one thousand seven hundred and seventy-six, were due to this state," etc. Dallas, _Laws_, I. 782.

~1778, October. Virginia: Importation Prohibited.~

"An act for preventing the farther importation of Slaves.

§ 1. "For preventing the farther importation of slaves into this commonwealth, _Be it enacted by the General Assembly_, That from and after the passing of this act no slave or slaves shall hereafter be imported into this commonwealth by sea or land, nor shall any slaves so imported be sold or bought by any person whatsoever.

§ 2. "Every person hereafter importing slaves into this commonwealth contrary to this act shall forfeit and pay the sum of one thousand pounds for every slave so imported, and every person selling or buying any such slaves shall in like manner forfeit and pay the sum of five hundred pounds for every slave so sold or bought," etc.

§ 3. "_And be it farther enacted_, That every slave imported into this commonwealth, contrary to the true intent and meaning of this act, shall, upon such importation become free."

§ 4. Exceptions are _bona fide_ settlers with slaves not imported later than Nov. 1, 1778, nor intended to be sold; and transient travellers. Re-enacted in substance in the revision of October, 1785. For a temporary exception to this act, as concerns citizens of Georgia and South Carolina during the war, see Act of May, 1780. Hening, _Statutes_, IX. 471; X. 307; XII. 182.

~1779, October. Rhode Island: Slave-Trade Restricted.~

"An Act prohibiting slaves being sold out of the state, against their consent." Title only found. _Colonial Records_, VIII. 618; Arnold, _History of Rhode Island_, II. 449.

~1779. Vermont: Importation Prohibited.~

"An Act for securing the general privileges of the people," etc. The act abolished slavery. _Vermont State Papers, 1779-86_, p. 287.

~1780. Massachusetts: Slavery Abolished.~

Passage in the Constitution which was held by the courts to abolish slavery: "Art. I. All men are born free and equal, and have certain, natural, essential, and unalienable rights; among which may be reckoned the right of enjoying and defending their lives and liberties," etc. _Constitution of Massachusetts_, Part I., Art. 1; prefixed to _Perpetual Laws_ (1789).

~1780, March 1. Pennsylvania: Slavery Abolished.~

"An Act for the gradual abolition of slavery."

§ 5. All slaves to be registered before Nov. 1.

§ 10. None but slaves "registered as aforesaid, shall, at any time hereafter, be deemed, adjudged, or holden, within the territories of this commonwealth, as slaves or servants for life, but as free men and free women; except the domestic slaves attending upon Delegates in Congress from the other American States," and those of travellers not remaining over six months, foreign ministers, etc., "provided such domestic slaves be not aliened or sold to any inhabitant," etc.

§ 11. Fugitive slaves from other states may be taken back.

§ 14. Former duty acts, etc., repealed. Dallas, _Laws_, I. 838. Cf. _Penn. Archives_, VII. 79; VIII. 720.

~1783, April. Confederation: Slave-Trade in Treaty of 1783.~

"To the earnest wish of Jay that British ships should have no right under the convention to carry into the states any slaves from any part of the world, it being the intention of the United States entirely to prohibit their importation, Fox answered promptly: 'If that be their policy, it never can be competent to us to dispute with them their own regulations.'" Fox to Hartley, June 10, 1783, in Bancroft, _History of the Constitution_, I. 61. Cf. Sparks, _Diplomatic Correspondence_, X. 154, June, 1783.

~1783. Maryland: Importation Prohibited.~

"An Act to prohibit the bringing slaves into this state."

" ... it shall not be lawful, after the passing this act, to import or bring into this state, by land or water, any negro, mulatto, or other slave, for sale, or to reside within this state; and any person brought into this state as a slave contrary to this act, if a slave before, shall thereupon immediately cease to be a slave, and shall be free; provided that this act shall not prohibit any person, being a citizen of some one of the United States, coming into this state, with a _bona fide_ intention of settling therein, and who shall actually reside within this state for one year at least, ... to import or bring in any slave or slaves which before belonged to such person, and which slave or slaves had been an inhabitant of some one of the United States, for the space of three whole years next preceding such importation," etc. _Laws of Maryland since 1763_: 1783, sess. April--June, ch. xxiii.

~1783, Aug. 13. South Carolina: £3 and £20 Duty Act.~

"An Act for levying and collecting certain duties and imposts therein mentioned, in aid of the public revenue." Cooper, _Statutes_, IV. 576.

~1784, February. Rhode Island: Manumission.~

"An Act authorizing the manumission of negroes, mulattoes, and others, and for the gradual abolition of slavery." Persons born after March, 1784, to be free. Bill framed pursuant to a petition of Quakers. _Colonial Records_, X. 7-8; Arnold, _History of Rhode Island_, II. 503.

~1784, March 26. South Carolina: £3 and £5 Duty Act.~

"An Act for levying and collecting certain Duties," etc. Cooper, _Statutes_, IV. 607.

~1785, April 12. New York: Partial Prohibition.~

"An Act granting a bounty on hemp to be raised within this State, and imposing an additional duty on sundry articles of merchandise, and for other purposes therein mentioned."

" ... _And be it further enacted by the authority aforesaid_, That if any negro or other person to be imported or brought into this State from any of the United States or from any other place or country after the first day of June next, shall be sold as a slave or slaves within this State, the seller or his or her factor or agent, shall be deemed guilty of a public offence, and shall for every such offence forfeit the sum of one hundred pounds lawful money of New York, to be recovered by any person," etc.

"_And be it further enacted_ ... That every such person imported or brought into this State and sold contrary to the true intent and meaning of this act shall be freed." _Laws of New York, 1785-88_ (ed. 1886), pp. 120-21.

~1785. Rhode Island: Restrictive Measure (?).~

Title and text not found. Cf. _Public Laws of Rhode Island_ (revision of 1822), p. 441.

~1786, March 2. New Jersey: Importation Prohibited.~

"An Act to prevent the importation of Slaves into the State of New Jersey, and to authorize the Manumission of them under certain restrictions, and to prevent the Abuse of Slaves."

"Whereas the Principles of Justice and Humanity require that the barbarous Custom of bringing the unoffending African from his native Country and Connections into a State of Slavery ought to be discountenanced, and as soon as possible prevented; and sound Policy also requires, in order to afford ample Support to such of the Community as depend upon their Labour for their daily Subsistence, that the Importation of Slaves into this State from any other State or Country whatsoever, ought to be prohibited under certain Restrictions; and that such as are under Servitude in the State ought to be protected by Law from those Exercises of Wanton Cruelty too often practiced upon them; and that every unnecessary Obstruction in the Way of freeing Slaves should be removed; therefore,

§ 1. "_Be it Enacted by the Council and General Assembly of this State, and it is hereby Enacted by the Authority of the same_, That from and after the Publication of this Act, it shall not be lawful for any Person or Persons whatsoever to bring into this State, either for Sale or for Servitude, any Negro Slave brought from Africa since the Year Seventeen Hundred and Seventy-six; and every Person offending by bringing into this State any such Negro Slave shall, for each Slave, forfeit and Pay the Sum of Fifty Pounds, to be sued for and recovered with Costs by the Collector of the Township into which such Slave shall be brought, to be applied when recovered to the Use of the State.

§ 2. "_And be it further Enacted by the Authority aforesaid_, That if any Person shall either bring or procure to be brought into this State, any Negro or Mulatto Slave, who shall not have been born in or brought from Africa since the Year above mentioned, and either sell or buy, or cause such Negro or Mulatto Slave to be sold or remain in this State, for the Space of six Months, every such Person so bringing or procuring to be brought or selling or purchasing such Slave, not born in or brought from Africa since the Year aforesaid, shall for every such Slave, forfeit and pay the Sum of Twenty Pounds, to be sued for and recovered with Costs by the Collector of the Township into which such Slave shall be brought or remain after the Time limited for that Purpose, the Forfeiture to be applied to the Use of the State as aforesaid.

§ 3. "_Provided always, and be it further Enacted by the Authority aforesaid_, That Nothing in this Act contained shall be construed to prevent any Person who shall remove into the State, to take a settled Residence here, from bringing all his or her Slaves without incurring the Penalties aforesaid, excepting such Slaves as shall have been brought from Africa since the Year first above mentioned, or to prevent any Foreigners or others having only a temporary Residence in this State, for the Purpose of transacting any particular Business, or on their Travels, from bringing and employing such Slaves as Servants, during the Time of his or her Stay here, provided such Slaves shall not be sold or disposed of in this State." _Acts of the Tenth General Assembly_ (Tower Collection of Laws).

~1786, Oct. 30. Vermont: External Trade Prohibited.~

"An act to prevent the sale and transportation of Negroes and Molattoes out of this State." £100 penalty. _Statutes of Vermont_ (ed. 1787), p. 105.

~1786. North Carolina: Prohibitive Duty.~

"An act to impose a duty on all slaves brought into this state by land or water."

"Whereas the importation of slaves into this state is productive of evil consequences, and highly impolitic," etc. A prohibitive duty is imposed. The exact text was not found.

§ 6. Slaves introduced from States which have passed emancipation acts are to be returned in three months; if not, a bond of £50 is to be forfeited, and a fine of £100 imposed.

§ 8. Act to take effect next Feb. 1; repealed by Act of 1790, ch. 18. Martin, _Iredell's Acts of Assembly_, I. 413, 492.

~1787, Feb. 3. Delaware: Exportation Prohibited.~

"An Act to prevent the exportation of slaves, and for other purposes." _Laws of Delaware_ (ed. 1797), p. 884, ch. 145 b.

~1787, March 28. South Carolina: Total Prohibition.~

"An Act to regulate the recovery and payment of debts and for prohibiting the importation of negroes for the time therein mentioned." Title only given. Grimké, _Public Laws_, p. lxviii, No. 1485.

~1787, March 28. South Carolina: Importation Prohibited.~

"An Ordinance to impose a Penalty on any person who shall import into this State any Negroes, contrary to the Instalment Act."

1. "_Be it ordained_, by the honorable the Senate and House of Representatives, met in General Assembly, and by the authority of the same, That any person importing or bringing into this State a negro slave, contrary to the Act to regulate the recovery of debts and prohibiting the importation of negroes, shall, besides the forfeiture of such negro or slave, be liable to a penalty of one hundred pounds, to the use of the State, for every such negro or slave so imported and brought in, in addition to the forfeiture in and by the said Act prescribed." Cooper, _Statutes_, VII. 430.

~1787, October. Rhode Island: Importation Prohibited.~

"An act to prevent the slave trade and to encourage the abolition of slavery." This act prohibited and censured trade under penalty of £100 for each person and £1,000 for each vessel. Bartlett, _Index to the Printed Acts and Resolves_, p. 333; _Narragansett Historical Register_, II. 298-9.

* * * * *

APPENDIX B.

A CHRONOLOGICAL CONSPECTUS OF STATE, NATIONAL, AND INTERNATIONAL LEGISLATION.

1788-1871.

As the State statutes and Congressional reports and bills are difficult to find, the significant parts of such documents are printed in full. In the case of national statutes and treaties, the texts may easily be found through the references.

~1788, Feb. 22. New York: Slave-Trade Prohibited.~

"An Act concerning slaves."

"Whereas in consequence of the act directing a revision of the laws of this State, it is expedient that the several existing laws relative to slaves, should be revised, and comprized in one. Therefore, _Be it enacted_," etc.

"And to prevent the further importation of slaves into this State, _Be it further enacted by the authority aforesaid_, That if any person shall sell as a slave within this State any negro, or other person, who has been imported or brought into this State, after" June 1, 1785, "such seller, or his or her factor or agent, making such sale, shall be deemed guilty of a public offence, and shall for every such offence, forfeit the sum of one hundred pounds.... _And further_, That every person so imported ... shall be free." The purchase of slaves for removal to another State is prohibited under penalty of £100. _Laws of New York, 1785-88_ (ed. 1886), pp. 675-6.

~1788, March 25. Massachusetts: Slave-Trade Prohibited.~

"An Act to prevent the Slave-Trade, and for granting Relief to the Families of such unhappy Persons as may be kidnapped or decoyed away from this Commonwealth."

"Whereas by the African trade for slaves, the lives and liberties of many innocent persons have been from time to time sacrificed to the lust of gain: And whereas some persons residing in this Commonwealth may be so regardless of the rights of human kind, as to be concerned in that unrighteous commerce:

§ 1. "Be it therefore enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same, That no citizen of this Commonwealth, or other person residing within the same, shall for himself, or any other person whatsoever, either as master, factor, supercargo, owner or hirer, in whole or in part, of any vessel, directly or indirectly, import or transport, or buy or sell, or receive on board, his or their vessel, with intent to cause to be imported or transported, any of the inhabitants of any State or Kingdom, in that part of the world called _Africa_, as slaves, or as servants for term of years." Any person convicted of doing this shall forfeit and pay the sum of £50 for every person received on board, and the sum of £200 for every vessel fitted out for the trade, "to be recovered by action of debt, in any Court within this Commonwealth, proper to try the same; the one moiety thereof to the use of this Commonwealth, and the other moiety to the person who shall prosecute for and

recover the same."

§ 2. All insurance on said vessels and cargo shall be null and void; "and this act may be given in evidence under the general issue, in any suit or action commenced for the recovery of insurance so made," etc.

§ 4. "_Provided_ ... That this act do not extend to vessels which have already sailed, their owners, factors, or commanders, for and during their present voyage, or to any insurance that shall have been made, previous to the passing of the same." _Perpetual Laws of Massachusetts, 1780-89_ (ed. 1789), p. 235.

~1788, March 29. Pennsylvania: Slave-Trade Prohibited.~

"An Act to explain and amend an act, entituled, 'An Act for the gradual abolition of slavery.'"

§ 2. Slaves brought in by persons intending to settle shall be free.

§ 3. " ... no negro or mulatto slave, or servant for term of years," except servants of congressmen, consuls, etc., "shall be removed out of this state, with the design and intention that the place of abode or residence of such slave or servant shall be thereby altered or changed, or with the design and intention that such slave or servant, if a female, and pregnant, shall be detained and kept out of this state till her delivery of the child of which she is or shall be pregnant, or with the design and intention that such slave or servant shall be brought again into this state, after the expiration of six months from the time of such slave or servant having been first brought into this state, without his or her consent, if of full age, testified upon a private examination, before two Justices of the peace of the city or county in which he or she shall reside, or, being under the age of twenty-one years, without his or her consent, testified in manner aforesaid, and also without the consent of his or her parents," etc. Penalty for every such offence, £75.

§ 5. " ... if any person or persons shall build, fit, equip, man, or otherwise prepare any ship or vessel, within any port of this state, or shall cause any ship or other vessel to sail from any port of this state, for the purpose of carrying on a trade or traffic in slaves, to, from, or between Europe, Asia, Africa or America, or any places or countries whatever, or of transporting slaves to or from one port or place to another, in any part or parts of the world, such ship or vessel, her tackle, furniture, apparel, and other appurtenances, shall be forfeited to the commonwealth.... And, moreover, all and every person and persons so building, fitting out," etc., shall forfeit £1000. Dallas, _Laws_, II. 586.

~1788, October. Connecticut: Slave-Trade Prohibited.~

"An Act to prevent the Slave-Trade."

"Be it enacted by the Governor, Council and Representatives in General Court assembled, and by the Authority of the same, That no Citizen or Inhabitant of this State, shall for himself, or any other Person, either as Master, Factor, Supercargo, Owner or Hirer, in Whole, or in Part, of any Vessel, directly or indirectly, import or transport, or buy or sell, or receive on board his or her Vessel, with Intent to cause to be imported or transported, any of the Inhabitants of any Country in Africa, as Slaves or Servants, for Term of Years; upon Penalty of _Fifty Pounds_, for every Person so received on board, as aforesaid; and of _Five Hundred Pounds_ for every such Vessel employed in the Importation or Transportation aforesaid; to be recovered by Action, Bill, Plaint or Information; the one Half to the Plaintiff, and the other Half to the Use of this State." And all insurance on vessels and slaves shall be void. This act to be given as evidence under general issue, in any suit commenced for recovery of such insurance.

" ... if any Person shall kidnap ... any free Negro," etc., inhabitant of this State, he shall forfeit £100. Every vessel clearing for the coast of Africa or any other part of the world, and suspected to be in the slave-trade, must give bond in £1000. Slightly amended in 1789. _Acts and Laws of Connecticut_ (ed. 1784), pp. 368-9, 388.

~1788, Nov. 4. South Carolina: Temporary Prohibition.~

"An Act to regulate the Payment and Recovery of Debts, and to prohibit the Importation of Negroes, for the Time therein limited."

§ 16. "No negro or other slave shall be imported or brought into this State either by land or water on or before the first of January, 1793, under the penalty of forfeiting every such slave or slaves to any person who will sue or inform for the same; and under further penalty of paying £100 to the use of the State for every such negro or slave so imported or brought in: _Provided_, That nothing in this prohibition contained shall extend to such slaves as are now the property of citizens of the United States, and at the time of passing this act shall be within the limits of the said United States.

§ 17. "All former instalment laws, and an ordinance imposing a penalty on persons importing negroes into this State, passed the 28th day of March 1787, are hereby repealed." Grimké, _Public Laws_, p. 466.

~1789, Feb. 3. Delaware: Slave-Trade Prohibited.~

"_An additional Supplementary_ ACT _to an act, intituled_, An act to prevent the exportation of slaves, and for other purposes."

"Whereas it is inconsistent with that spirit of general liberty which pervades the constitution of this state, that vessels should be fitted out, or equipped, in any of the ports thereof, for the purpose of receiving and transporting the natives of Africa to places where they are held in slavery; or that any acts should be deemed lawful, which tend to encourage or promote such iniquitous traffic among us:

§ 1. "_Be it therefore enacted by the General Assembly of Delaware_, That if any owner or owners, master, agent, or factor, shall fit out, equip, man, or otherwise prepare, any ship or vessel within any port or place in this state, or shall cause any ship, or other vessel, to sail from any port or place in this state, for the purpose of carrying on a trade or traffic in slaves, to, from, or between, Europe, Asia, Africa, or America, or any places or countries whatever, or of transporting slaves to, or from, one port or place to another, in any part or parts of the world; such ship or vessel, her tackle, furniture, apparel, and other appurtenances, shall be forfeited to this state.... And moreover, all and every person and persons so fitting out ... any ship or vessel ... shall severally forfeit and pay the sum of Five Hundred Pounds;" one-half to the state, and one-half to the informer.

§ 2. "_And whereas_ it has been found by experience, that the act, intituled, _An act to prevent the exportation of slaves, and for other purposes_, has not produced all the good effects expected therefrom," any one exporting a slave to Maryland, Virginia, North Carolina, South Carolina, Georgia, or the West Indies, without license, shall forfeit £100 for each slave exported and £20 for each attempt.

§ 3. Slaves to be tried by jury for capital offences. _Laws of Delaware_ (ed. 1797), p. 942, ch. 194 b.

~1789, May 13. Congress (House): Proposed Duty on Slaves Imported.~

A tax of $10 per head on slaves imported, moved by Parker of Virginia. After debate, withdrawn. _Annals of Cong._, 1 Cong. 1 sess. pp. 336-42.

~1789, Sept. 19. Congress (House): Bill to Tax Slaves Imported.~

A committee under Parker of Virginia reports, "a bill concerning the importation of certain persons prior to the year 1808." Read once and postponed until next session. _House Journal_ (repr. 1826), 1 Cong. 1 sess. I. 37, 114; _Annals of Cong._, 1 Cong. 1 sess., pp. 366, 903.

~1790, March 22. Congress (House): Declaration of Powers.~

See above, pages 82-83.

~1790, March 22. New York: Amendment of Act of 1788.~

"An Act to amend the act entitled 'An act concerning slaves.'"

"Whereas many inconveniences have arisen from the prohibiting the exporting of slaves from this State. Therefore

"_Be it enacted_ ..., That where any slave shall hereafter be convicted of a crime under the degree of a capital offence, in the supreme court, or the court of oyer and terminer, and general gaol delivery, or a court of general sessions of the peace within this State, it shall and may be lawful to and for the master or mistress to cause such slave to be transported out of this State," etc. _Laws of New York, 1789-96_ (ed. 1886), p. 151.

~1792, May. Connecticut: Act of 1788 Strengthened.~

"An Act in addition to an Act, entitled 'An Act to prevent the Slave Trade.'"

This provided that persons directly or indirectly aiding or assisting in slave-trading should be fined £100. All notes, bonds, mortgages, etc., of any kind, made or executed in payment for any slave imported contrary to this act, are declared null and void. Persons removing from the State might carry away their slaves. _Acts and Laws of Connecticut_ (ed. 1784), pp. 412-3.

~1792, Dec. 17. Virginia: Revision of Acts.~

"An Act to reduce into one, the several acts concerning slaves, free negroes, and mulattoes."

§ 1. "_Be it enacted_ ..., That no persons shall henceforth be slaves within this commonwealth, except such as were so on the seventeenth day of October," 1785, "and the descendants of the females of them."

§ 2. "Slaves which shall hereafter be brought into this commonwealth, and kept therein one whole year together, or so long at different times as shall amount to one year, shall be free."

§ 4. "_Provided_, That nothing in this act contained, shall be construed to extend to those who may incline to remove from any of the United States and become citizens of this, if within sixty days after such removal, he or she shall take the following oath before some justice of the peace of this commonwealth: '_I, A.B., do swear, that my removal into the state of Virginia, was with no intent of evading the laws for preventing the further importation of slaves, nor have I brought with me any slaves, with an intention of selling them, nor have any of the slaves which I have brought with me, been imported from Africa, or any of the West India islands, since the first day of November_,'" 1778, etc.

§ 53. This act to be in force immediately. _Statutes at Large of Virginia, New Series_, I. 122.

~1792, Dec. 21. South Carolina: Importation Prohibited until 1795.~

"An Act to prohibit the importation of Slaves from Africa, or other places beyond sea, into this State, for two years; and also to prohibit the importation or bringing in Slaves, or Negroes, Mulattoes, Indians, Moors or Mestizoes, bound for a term of years, from any of the United States, by land or by water."

"Whereas, it is deemed inexpedient to increase the number of slaves within this State, in our present circumstances and situation;

§ 1. "_Be it therefore enacted_ ..., That no slave shall be imported into this State from Africa, the West India Islands, or other place beyond sea, for and during the term of two years, commencing from the first day of January next, which will be in the year of our Lord one thousand seven hundred and ninety-three."

§ 2. No slaves, Negroes, Indians, etc., bound for a term of years, to be brought in from any of the United States or bordering countries. Settlers may bring their slaves. Cooper, _Statutes_, VII. 431.

~1793, Dec. 19. Georgia: Importation Prohibited.~

"An act to prevent the importation of negroes into this state from the places herein mentioned." Title only. Re-enacted (?) by the Constitution of 1798. Marbury and Crawford, _Digest_, p. 442; Prince, _Digest_, p. 786.

~1794, North Carolina: Importation Prohibited.~

"An act to prevent the further importation and bringing of slaves and indented servants of colour into this state."

§ 1. "_Be it enacted_ ..., That from and after the first day of May next, no slave or indented servant of colour shall be imported or brought into this state by land or water; nor shall any slave or indented servant of colour, who may be imported or brought contrary to the intent and meaning of this act, be bought, sold or hired by any person whatever."

§ 2. Penalty for importing, £100 per slave; for buying or selling, the same.

§ 4. Persons removing, travelling, etc., are excepted. The act was amended slightly in 1796. Martin, _Iredell's Acts of Assembly_, II. 53, 94.

~1794, March 22. United States Statute: Export Slave-Trade Forbidden.~

"An Act to prohibit the carrying on the Slave Trade from the United States to any foreign place or country." _Statutes at Large_, I. 347. For proceedings in Congress, see _Senate Journal_ (repr. 1820), 3 Cong. 1 sess. II. 51; _House Journal_ (repr. 1826), 3 Cong. 1 sess. II. 76, 84, 85, 96, 98, 99, 100; _Annals of Cong._, 3 Cong. 1 sess. pp. 64, 70, 72.

~1794, Dec. 20. South Carolina: Act of 1792 Extended.~

"An Act to revive and extend an Act entitled 'An Act to prohibit the importation of Slaves from Africa, or other places beyond Sea, into this State, for two years; and also, to prohibit the importation or bringing in of Negro Slaves, Mulattoes, Indians, Moors or Mestizoes, bound for a term of years, from any of the United States, by Land or Water.'"

§ 1. Act of 1792 extended until Jan. 1, 1797.

§ 2. It shall not be lawful hereafter to import slaves, free Negroes, etc., from the West Indies, any part of America outside the United States, "or from other parts beyond sea." Such slaves are to be forfeited and sold; the importer to be fined £50; free Negroes to be re-transported. Cooper, _Statutes_, VII. 433.

~1795. North Carolina: Act against West Indian Slaves.~

"An act to prevent any person who may emigrate from any of the West India or Bahama islands, or the French, Dutch or Spanish settlements on the southern coast of America, from bringing slaves into this state, and also for imposing certain restrictions on free persons of colour who may hereafter come into this state." Penalty, £100 for each slave over 15 years of age. _Laws of North Carolina_ (revision of 1819), I. 786.

~1796. Maryland: Importation Prohibited.~

"An Act relating to Negroes, and to repeal the acts of assembly therein mentioned."

"_Be it enacted_ ..., That it shall not be lawful, from and after the passing of this act, to import or bring into this state, by land or water, any negro, mulatto or other slave, for sale, or to reside within this state; and any person brought into this state as a slave contrary to this act, if a slave before, shall thereupon immediately cease to be the property of the person or persons so importing or bringing such slave within this state, and shall be free."

§ 2. Any citizen of the United States, coming into the State to take up _bona fide_ residence, may bring with him, or within one year import, any slave which was his property at the time of removal, "which slaves, or the mother of which slaves, shall have been a resident of the United States, or some one of them, three whole years next preceding such removal."

§ 3. Such slaves cannot be sold within three years, except by will, etc. In 1797, "A Supplementary Act," etc., slightly amended the preceding, allowing guardians, executors, etc., to import the slaves of the estate. Dorsey, _Laws_, I. 334, 344.

~1796, Dec. 19. South Carolina: Importation Prohibited until 1799.~

"An Act to prohibit the importation of Negroes, until the first day of January, one thousand seven hundred and ninety-nine."

"Whereas, it appears to be highly impolitic to import negroes from Africa, or other places beyond seas," etc. Extended by acts of Dec. 21, 1798, and Dec. 20, 1800, until Jan. 1, 1803. Cooper, _Statutes_, VII. 434, 436.

~1797, Jan. 18. Delaware: Codification of Acts.~

"An Act concerning Negro and Mulatto slaves."

§ 5. " ... any Negro or Mulatto slave, who hath been or shall be brought into this state contrary to the intent and meaning of [the act of 1787]; and any Negro or Mulatto slave who hath been or shall be exported, or sold with an intention for exportation, or carried out for sale from this state, contrary to the intent and meaning of [the act of 1793], shall be, and are hereby declared free; any thing in this act to the contrary notwithstanding." _Laws of Delaware_ (ed. 1797), p. 1321, ch. 124 c.

~1798, Jan. 31. Georgia: Importation Prohibited.~

"An act to prohibit the further importation of slaves into this state."

§ 1. " ... six months after the passing of this act, it shall be unlawful for any person or persons to import into this state, from Africa or elsewhere, any negro or negroes of any age or sex." Every person so offending shall forfeit for the first offence the sum of $1,000 for every negro so imported, and for every subsequent offence the sum of $1,000, one half for the use of the informer, and one half for the use of the State.

§ 2. Slaves not to be brought from other States for sale after three months.

§ 3. Persons convicted of bringing slaves into this State with a view to sell them, are subject to the same penalties as if they had sold them. Marbury and Crawford, _Digest_, p. 440.

~1798, March 14. New Jersey: Slave-Trade Prohibited.~

"An Act respecting slaves."

§ 12. "_And be it enacted_, That from and after the passing of this act, it shall not be lawful for any person or persons whatsoever, to bring into this state, either for sale or for servitude, any negro or other slave whatsoever." Penalty, $140 for each slave; travellers and temporary residents excepted.

§ 17. Any persons fitting out vessels for the slave-trade shall forfeit them. Paterson, _Digest_, p. 307.

~1798, April 7. United States Statute: Importation into Mississippi Territory Prohibited.~

"An Act for an amicable settlement of limits with the state of Georgia, and authorizing the establishment of a government in the Mississippi territory." _Statutes at Large_, I. 549. For proceedings in Congress, see _Annals of Cong._, 5 Cong. 2 sess. pp. 511, 512, 513, 514, 515, 532, 533, 1235, 1249, 1277-84, 1296, 1298-1312, 1313, 1318.

~1798, May 30. Georgia: Constitutional Prohibition.~

Constitution of Georgia:--

Art. IV § 11. "There shall be no future importation of slaves into this state from Africa, or any foreign place, after the first day of October next. The legislature shall have no power to pass laws for the emancipation of slaves, without the consent of each of their respective owners previous to such emancipation. They shall have no power to prevent emigrants, from either of the United States to this state, from bringing with them such persons as may be deemed slaves, by the laws of any one of the United States." Marbury and Crawford, _Digest_, p. 30.

~1800, May 10. United States Statute: Americans Forbidden to Trade from one Foreign Country to Another.~

"An Act in addition to the act intituled 'An act to prohibit the carrying on the Slave Trade from the United States to any foreign place or country.'" _Statutes at Large_, II. 70. For proceedings in Congress, see _Senate Journal_ (repr. 1821), 6 Cong. 1 sess. III. 72, 77, 88, 92.

~1800, Dec. 20. South Carolina: Slaves and Free Negroes Prohibited.~

"An Act to prevent Negro Slaves and other persons of Colour, from being brought into or entering this State." Supplemented Dec. 19, 1801, and amended Dec. 18, 1802. Cooper, _Statutes_, VII. 436, 444, 447.

~1801, April 8. New York: Slave-Trade Prohibited.~

"An Act concerning slaves and servants."

" ... _And be it further enacted_, That no slave shall hereafter be imported or brought into this State, unless the person importing or bringing such slave shall be coming into this State with intent to reside permanently therein and shall have resided without this State, and also have owned such slave at least during one year next preceding the importing or bringing in of such slave," etc. A certificate, sworn to, must be obtained; any violation of this act or neglect to take out such certificate will result in freedom to the slave. Any sale or limited transfer of any person hereafter imported to be a public offence, under penalty of $250, and freedom to the slave transferred. The export of slaves or of any person freed by this act is forbidden, under penalty of $250 and freedom to the slave. Transportation for crime is permitted. Re-enacted with amendments March 31, 1817. _Laws of New York, 1801_ (ed. 1887),

pp. 547-52; _Laws of New York, 1817_ (ed. 1817), p. 136.

~1803, Feb. 28. United States Statute: Importation into States Prohibiting Forbidden.~

"An Act to prevent the importation of certain persons into certain states, where, by the laws thereof, their admission is prohibited." _Statutes at Large_, II. 205. For copy of the proposed bill which this replaced, see _Annals of Cong._, 7 Cong. 2 sess. p. 467. For proceedings in Congress, see _House Journal_ (repr. 1826), 7 Cong. 2 sess. IV 304, 324, 347; _Senate Journal_ (repr. 1821), 7 Cong. 2 sess. III. 267, 268, 269-70, 273, 275, 276, 279.

~1803, Dec. 17. South Carolina: African Slaves Admitted.~

"An Act to alter and amend the several Acts respecting the importation or bringing into this State, from beyond seas, or elsewhere, Negroes and other persons of colour; and for other purposes therein mentioned."

§ 1. Acts of 1792, 1794, 1796, 1798, 1800, 1802, hereby repealed.

§ 2. Importation of Negroes from the West Indies prohibited.

§ 3. No Negro over fifteen years of age to be imported from the United States except under certificate of good character.

§ 5. Negroes illegally imported to be forfeited and sold, etc. Cooper, _Statutes_, VII. 449.

~1804.~ [~Denmark.~

Act of 1792 abolishing the slave-trade goes into effect.]

~1804, Feb. 14. Congress (House): Proposed Censure of South Carolina.~

Representative Moore of South Carolina offered the following resolution, as a substitute to Mr. Bard's taxing proposition of Jan. 6:--

"_Resolved_, That this House receive with painful sensibility information that one of the Southern States, by a repeal of certain prohibitory laws, have permitted a traffic unjust in its nature, and highly impolitic in free Governments." Ruled out of order by the chairman of the Committee of the Whole. _Annals of Cong._, 8 Cong. 1 sess. p. 1004.

~1804, Feb. 15. Congress (House): Proposed Duty.~

"_Resolved_, That a tax of ten dollars be imposed on every slave imported into any part of the United States."

"_Ordered_, That a bill, or bills, be brought in, pursuant to the said resolution," etc. Feb. 16 "a bill laying a duty on slaves imported into the United States" was read, but was never considered. _House Journal_ (repr. 1826), 8 Cong. 1 sess. IV 523, 578, 580, 581-2, 585; _Annals of Cong._, 8 Cong. 1 sess. pp. 820, 876, 991, 1012, 1020, 1024-36.

~1804, March 26. United States Statute: Slave-Trade Limited.~

"An Act erecting Louisiana into two territories," etc. Acts of 1794 and 1803 extended to Louisiana. _Statutes at Large_, II. 283. For proceedings in Congress, see _Annals of Cong._, 8 Cong. 1 sess. pp. 106, 211, 223, 231, 233-4, 238, 255, 1038, 1054-68, 1069-79, 1128-30, 1185-9.

~1805, Feb. 15. Massachusetts: Proposed Amendment.~

"_Resolve requesting the Governor to transmit to the Senators and Representatives in Congress, and the Executives of the several States this Resolution, as an amendment to the Constitution of the United States, respecting Slaves._" June 8, Governor's message; Connecticut answers that it is inexpedient; Maryland opposes the proposition. _Massachusetts Resolves_, February, 1805, p. 55; June, 1805, p. 18. See below, March 3, 1805.

~1805, March 2. United States Statute: Slave-Trade to Orleans Territory Permitted.~

"An Act further providing for the government of the territory of Orleans."

§ 1. A territorial government erected similar to Mississippi, with same rights and privileges.

§ 5. 6th Article of Ordinance of 1787, on slaves, not to extend to this territory.

Statutes at Large, II. 322. For proceedings in Congress, see _Annals of Cong._, 8 Cong. 2 sess. pp. 28, 30, 45-6, 47, 48, 54, 59-61, 69, 727-8, 871-2, 957, 1016-9, 1020-1, 1201, 1209-10, 1211. Cf. _Statutes at Large_, II. 331; _Annals of Cong._, 8 Cong. 2 sess., pp. 50, 51, 52, 57, 68, 69, 1213, 1215. In _Journals_, see Index, Senate Bills Nos. 8, 11.

~1805, March 3. Congress (House): Massachusetts Proposition to Amend Constitution.~

Mr. Varnum of Massachusetts presented the resolution of the Legislature of Massachusetts, "instructing the Senators, and requesting the Representatives in Congress, from the said State, to take all legal and necessary steps, to use their utmost exertions, as soon as the same is practicable, to obtain an amendment to the Federal Constitution, so as to authorize and empower the Congress of the United States to pass a law, whenever they may deem it expedient, to prevent the further importation of slaves from any of the West India Islands, from the coast of Africa, or elsewhere, into the United States, or any part thereof." A motion was made that Congress have power to prevent further importation; it was read and ordered to lie on the table. _House Journal_ (repr. 1826), 8 Cong. 2 sess. V 171; _Annals of Cong._, 8 Cong. 2 sess. pp. 1221-2. For the original resolution, see _Massachusetts Resolves_, May, 1802, to March, 1806, Vol. II. A. (State House ed., p. 239.)

~1805, Dec. 17. Congress (Senate): Proposition to Prohibit Importation.~

A "bill to prohibit the importation of certain persons therein described into any port or place within the jurisdiction of the United States, from and after" Jan. 1, 1808, was read twice and postponed. _Senate Journal_ (repr. 1821), 9 Cong. 1 sess. IV. 10-11; _Annals of Cong._, 9 Cong. 1 sess. pp. 20-1.

~1806, Jan. 20. Congress (House): Vermont Proposed Amendment.~

"Mr. Olin, one of the Representatives from the State of Vermont, presented to the House certain resolutions of the General Assembly of the said State, proposing an article of amendment to the Constitution of the United States, to prevent the further importation of slaves, or people of color, from any of the West India Islands, from the coast of Africa, or elsewhere, into the United States, or any part thereof; which were read, and ordered to lie on the table." No further mention found. _House Journal_ (repr. 1826), 9 Cong. 1 sess. V 238; _Annals of Cong._, 9 Cong. 1 sess. pp. 343-4.

~1806, Jan. 25. Virginia: Imported Slaves to be Sold.~

"An Act to amend the several laws concerning slaves."

§ 5. If the jury before whom the importer is brought "shall find that the said slave or slaves were brought into this commonwealth, and have remained therein, contrary to the provisions of this act, the court shall make an order, directing him, her or them to be delivered to the overseers of the poor, to be by them sold for cash and applied as herein directed."

§ 8. Penalty for bringing slaves, $400 per slave; the same for buying or hiring, knowingly, such a slave.

§ 16. This act to take effect May 1, 1806. _Statutes at Large of Virginia_, New Series, III. 251.

~1806, Jan. 27. Congress (House): Bill to Tax Slaves Imported.~

"A Bill laying a duty on slaves imported into any of the United States." Finally dropped. _House Journal_ (repr. 1826), 8 Cong. 2 sess. V. 129; _Ibid._, 9 Cong. 1 sess. V. 195, 223, 240, 242, 243-4, 248, 260, 262, 264, 276-7, 287, 294, 305, 309, 338; _Annals of Cong._, 9 Cong. 1 sess. pp. 273, 274, 346, 358, 372, 434, 442-4, 533.

~1806, Feb. 4. Congress (House): Proposition to Prohibit Slave-Trade after 1807.~

Mr. Bidwell moved that the following section be added to the bill for taxing slaves imported,--that any ship so engaged be forfeited. The proposition was rejected, yeas, 17, nays, 86 (?). _Annals of Cong._, 9 Cong. 1 sess. p. 438.

~1806, Feb. 10. Congress (House): New Hampshire Proposed Amendment.~

"Mr. Tenney ... presented to the House certain resolutions of the Legislature of the State of New Hampshire, 'proposing an amendment to the Constitution of the United States, so as to authorize and empower Congress to pass a law, whenever they may

deem it expedient, to prevent the further importation of slaves,' or people of color, into the United States, or any part thereof." Read and laid on the table. _House Journal_ (repr. 1826), 9 Cong. 1 sess. V. 266; _Annals of Cong._, 9 Cong. 1 sess. p. 448.

~1806, Feb. 17. Congress (House): Proposition on Slave-Trade.~

The committee on the slave-trade reported a resolution:--

"_Resolved_, That it shall not be lawful for any person or persons, to import or bring into any of the Territories of the United States, any slave or slaves that may hereafter be imported into the United States." _House Journal_, 9 Cong. 1 sess. V 264, 278, 308, 345-6; _House Reports_, 9 Cong. 1 sess. II. Feb. 17, 1806; _Annals of Cong._, 9 Cong. 1 sess. pp. 472-3.

~1806, April 7. Congress (Senate): Maryland Proposed Amendment.~

"Mr. Wright communicated a resolution of the legislature of the state of Maryland instructing their Senators and Representatives in Congress to use their utmost exertions to obtain an amendment to the constitution of the United States to prevent the further importation of slaves; whereupon, Mr. Wright submitted the following resolutions for the consideration of the Senate....

"_Resolved_, That the migration or importation of slaves into the United States, or any territory thereof, be prohibited after the first day of January, 1808." Considered April 10, and further consideration postponed until the first Monday in December next. _Senate Journal_ (repr. 1821), 9 Cong. 1 sess. IV. 76-7, 79; _Annals of Cong._, 9 Cong. 1 sess. pp. 229, 232.

~1806, Dec. 2. President Jefferson's Message.~

See above, pages 97-98. _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 468.

~1806, Dec. 15. Congress (House): Proposition on Slave-Trade.~

"A bill to prohibit the importation or bringing of slaves into the United States, etc.," after Dec. 31, 1807. Finally merged into Senate bill. _Ibid._, House Bill No. 148.

~1806, Dec. 17. Congress (House): Sloan's Proposition.~

Proposition to amend the House bill by inserting after the article declaring the forfeiture of an illegally imported slave, "And such person or slave shall be entitled to his freedom." Lost. _Annals of Cong._, 9 Cong. 2 sess. pp. 167-77, 180-89.

~1806, Dec. 29. Congress (House): Sloan's Second Proposition.~

Illegally imported Africans to be either freed, apprenticed, or returned to Africa. Lost; Jan. 5, 1807, a somewhat similar proposition was also lost. _Ibid._, pp. 226-8, 254.

~1806, Dec. 31. Great Britain: Rejected Treaty.~

"Treaty of amity, commerce, and navigation, between His Britannic Majesty and the United States of America."

"Art. XXIV. The high contracting parties engage to communicate to each other, without delay, all such laws as have been or shall be hereafter enacted by their respective Legislatures, as also all measures which shall have been taken for the abolition or limitation of the African slave trade; and they further agree to use their best endeavors to procure the co-operation of other Powers for the final and complete abolition of a trade so repugnant to the principles of justice and humanity." _Amer. State Papers, Foreign_, III. 147, 151.

~1807, March 25. [England: Slave-Trade Abolished.~

"An Act for the Abolition of the Slave Trade." _Statute 47 George III._, 1 sess. ch. 36.]

~1807, Jan. 7. Congress (House): Bidwell's Proposition.~

"Provided, that no person shall be sold as a slave by virtue of this act." Offered as an amendment to § 3 of House bill; defeated 60 to 61, Speaker voting. A similar proposition was made Dec. 23, 1806. _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 513-6. Cf. _Annals of Cong._, 9 Cong. 2 sess. pp. 199-203, 265-7.

~1807, Feb. 9. Congress (House): Section Seven of House Bill.~

§ 7 of the bill reported to the House by the committee provided that all Negroes imported should be conveyed whither the President might direct and there be indentured as apprentices, or employed in whatever way the President might deem best for them and the country; provided that no such Negroes should be indentured or employed except in some State in which provision is now made for the gradual abolition of slavery. Blank spaces were left for limiting the term of indenture. The report was never acted on. _Annals of Cong._, 9 Cong. 2 sess. pp. 477-8.

~1807, March 2. United States Statute: Importation Prohibited.~

"An Act to prohibit the importation of Slaves into any port or place within the jurisdiction of the United States, from and after the first day of January, in the year of our Lord one thousand eight hundred and eight." Bills to amend § 8, so as to make less ambiguous the permit given to the internal traffic, were introduced Feb. 27 and Nov. 27. _Statutes at Large_, II. 426. For proceedings in Senate, see _Senate Journal_ (repr. 1821), 9 Cong. 1-2 sess. IV. 11, 112, 123, 124, 132, 133, 150, 158, 164, 165, 167, 168; _Annals of Cong._, 9 Cong. 2 sess. pp. 16, 19, 23, 33, 36, 45, 47, 68, 69, 70, 71, 79, 87, 93. For proceedings in House, see _House Journal_ (repr. 1826), 9 Cong. 2 sess. V. 470, 482, 488, 490, 491, 496, 500, 504, 510, 513-6, 517, 540, 557, 575, 579, 581, 583-4, 585, 592, 594, 610, 613-4, 616, 623, 638, 640; 10 Cong. 1 sess. VI. 27, 50; _Annals of Cong._, 9 Cong. 2 sess. pp. 167, 180, 200, 220, 231, 254, 264, 270.

~1808, Feb. 23. Congress (Senate): Proposition to Amend Constitution.~

"Agreeably to instructions from the legislature of the state of Pennsylvania to their Senators in Congress, Mr. Maclay submitted the following resolution, which was read for consideration:--

"_Resolved_ ..., That the Constitution of the United States be so altered and amended, as to prevent the Congress of the United States, and the legislatures of any state in the Union, from authorizing the importation of slaves." No further mention. _Senate Journal_ (repr. 1821), 10 Cong. 1 sess. IV. 235; _Annals of Cong._, 10 Cong. 1 sess. p. 134. For the full text of the instructions, see _Amer. State Papers, Miscellaneous_, I. 716.

~1810, Dec. 5. President Madison's Message.~

"Among the commercial abuses still committed under the American flag, ... it appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity, and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct, will doubtless be felt by Congress, in devising further means of suppressing the evil." _House Journal_ (repr. 1826), 11 Cong. 3 sess. VII. 435.

~1811, Jan. 15. United States Statute: Secret Act and Joint Resolution against Amelia Island Smugglers.~

Statutes at Large, III. 471 ff.

~1815, March 29. [France: Abolition of Slave-Trade.~

Napoleon on his return from Elba decrees the abolition of the slave-trade. Decree re-enacted in 1818 by the Bourbon dynasty. _British and Foreign State Papers_, 1815-16, p. 196, note; 1817-18, p. 1025.]

~1815, Feb. 18. Great Britain: Treaty of Ghent.~

"Treaty of peace and amity. Concluded December 24, 1814; Ratifications exchanged at Washington February 17, 1815; Proclaimed February 18, 1815."

Art. X. "Whereas the traffic in slaves is irreconcilable with the principles of humanity and justice, and whereas both His Majesty and the United States are desirous of continuing their efforts to promote its entire abolition, it is hereby agreed that both the contracting parties shall use their best endeavors to accomplish so desirable an object." _U.S. Treaties and Conventions_ (ed. 1889), p. 405.

~1815, Dec. 8. Alabama and Mississippi Territory: Act to Dispose of Illegally Imported Slaves.~

"An Act concerning Slaves brought into this Territory, contrary to the Laws of the United States." Slaves to be sold at auction, and the proceeds to be divided between the territorial treasury and the collector or informer. Toulmin, _Digest of the Laws of Alabama_, p. 637; _Statutes of Mississippi digested_, etc. (ed. 1816), p. 389.

~1816, Nov. 18. North Carolina: Act to Dispose of Illegally Imported Slaves.~

"An act to direct the disposal of negroes, mulattoes and persons of colour, imported into this state, contrary to the provisions of an act of the Congress of the United States, entitled 'an act to prohibit the importation of slaves into any port or place, within the jurisdiction of the United States, from and after the first day of January, in the year of our Lord one thousand eight hundred and eight.'"

§ 1. Every slave illegally imported after 1808 shall be sold for the use of the State.

§ 2. The sheriff shall seize and sell such slave, and pay the proceeds to the treasurer of the State.

§ 3. If the slave abscond, the sheriff may offer a reward not exceeding one-fifth of the value of the slave. _Laws of North Carolina, 1816_, ch. xii. p. 9; _Laws of North Carolina_ (revision of 1819), II. 1350.

~1816, Dec. 3. President Madison's Message.~

"The United States having been the first to abolish, within the extent of their authority, the transportation of the natives of Africa into slavery, by prohibiting the introduction of slaves, and by punishing their citizens participating in the traffick, cannot but be gratified at the progress, made by concurrent efforts of other nations, towards a general suppression of so great an evil. They must feel, at the same time, the greater solicitude to give the fullest efficacy to their own regulations. With that view, the interposition of Congress appears to be required by the violations and evasions which, it is suggested, are chargeable on unworthy citizens, who mingle in the slave trade under foreign flags, and with foreign ports; and by collusive importations of slaves into the United States, through adjoining ports and territories. I present the subject to Congress, with a full assurance of their disposition to apply all the remedy which can be afforded by an amendment of the law. The regulations which were intended to guard against abuses of a kindred character, in the trade between the several States, ought also to be rendered more effectual for their humane object." _House Journal_, 14 Cong. 2 sess. pp. 15-6.

~1817, Feb. 11. Congress (House): Proposed Joint Resolution.~

"Joint Resolution for abolishing the traffick in Slaves, and the Colinization [_sic_] of the Free People of Colour of the United States."

"_Resolved_, ... That the President be, and he is hereby authorized to consult and negotiate with all the governments where ministers of the United States are, or shall be accredited, on the means of effecting an entire and immediate abolition of the traffick in slaves. And, also, to enter into a convention with the government of Great Britain, for receiving into the colony of Sierra Leone, such of the free people of colour of the United States as, with their own consent, shall be carried thither....

"_Resolved_, That adequate provision shall hereafter be made to defray any necessary expenses which may be incurred in carrying the preceding resolution into effect." Reported on petition of the Colonization Society by the committee on the President's Message. No further record. _House Journal_, 14 Cong. 2 sess. pp. 25-7, 380; _House Doc._, 14 Cong. 2 sess. No. 77.

~1817, July 28. [Great Britain and Portugal: First Concession of Right of Search.~

"By this treaty, ships of war of each of the nations might visit merchant vessels of both, if suspected of having slaves on board, acquired by illicit traffic." This "related only to the trade north of the equator; for the slave-trade of Portugal within the regions of western Africa, to the south of the equator, continued long after this to be carried on with great vigor." Woolsey, _International Law_ (1874), § 197, pp. 331-2; _British and Foreign State Papers_, 1816-17, pp. 85-118.]

~1817, Sept. 23. [Great Britain and Spain: Abolition of Trade North of Equator.~

"By the treaty of Madrid, ... Great Britain obtained from Spain, for the sum of four hundred thousand pounds, the immediate abolition of the trade north of the equator, its entire abolition after 1820, and the concession of the same mutual right of search, which the treaty with Portugal had just established." Woolsey, _International Law_ (1874), § 197, p. 332; _British and Foreign State Papers_, 1816-17, pp. 33-74.]

~1817, Dec. 2. President Monroe's Message on Amelia Island, etc.~

"A just regard for the rights and interests of the United States required that they [i.e., the Amelia Island and Galveston pirates] should be suppressed, and orders have been accordingly issued to that effect. The imperious considerations which produced this measure will be explained to the parties whom it may, in any degree, concern." _House Journal_, 15 Cong. 1 sess. p. 11.

~1817, Dec. 19. Georgia: Act to Dispose of Illegally Imported Slaves.~

"An Act for disposing of any such negro, mulatto, or person of color, who has been or may hereafter be imported or brought into this State in violation of an act of the United States, entitled an act to prohibit the importation of slaves," etc.

§ 1. The governor by agent shall receive such Negroes, and,

§ 2. sell them, or,

§ 3. give them to the Colonization Society to be transported, on condition that the Society reimburse the State for all expense, and transport them at their own cost. Prince, _Digest_, p. 793.

~1818, Jan. 10. Congress (House): Bill to Supplement Act of 1807.~

Mr. Middleton, from the committee on so much of the President's Message as related to the illicit introduction of slaves into the United States from Amelia Island, reported a bill in addition to former acts prohibiting the introduction of slaves into the United States. This was read twice and committed; April 1 it was considered in Committee of the Whole; Mr. Middleton offered a substitute, which was ordered to be laid on table and to be printed; it became the Act of 1819. See below, March 3, 1819. _House Journal_, 15 Cong. 1 sess. pp. 131, 410.

~1818, Jan. 13. President Monroe's Special Message.~

"I have the satisfaction to inform Congress, that the establishment at Amelia Island has been suppressed, and without the effusion of blood. The papers which explain this transaction, I now lay before Congress," etc. _Ibid._, pp. 137-9.

~1818, Feb. 9. Congress (Senate): Bill to Register (?) Slaves.~

"A bill respecting the transportation of persons of color, for sale, or to be held to labor." Passed Senate, dropped in House; similar bill Dec. 9, 1818, also dropped in House. _Senate Journal_, 15 Cong. 1 sess. pp. 147, 152, 157, 165, 170, 188, 201, 203, 232, 237; 15 Cong. 2 sess. pp. 63, 74, 77, 202, 207, 285, 291, 297; _House Journal_, 15 Cong. 1 sess. p. 332; 15 Cong. 2 sess. pp. 303, 305, 316.

~1818, April 4. Congress (House): Proposition to Amend Constitution.~

Mr. Livermore's resolution:--

"No person shall be held to service or labour as a slave, nor shall slavery be tolerated in any state hereafter admitted into the Union, or made one of the United States of America." Read, and on the question, "Will the House consider the same?" it was determined in the negative. _House Journal_, 15 Cong. 1 sess. pp. 420-1; _Annals of Cong._, 15 Cong. 1 sess. pp. 1675-6.

~1818, April 20. United States Statute: Act in Addition to Act of 1807.~

"An Act in addition to 'An act to prohibit the introduction [importation] of slaves into any port or place within the jurisdiction of the United States, from and after the first day of January, in the year of our Lord one thousand eight hundred and eight,' and to repeal certain parts of the same." _Statutes at Large_, III. 450. For proceedings in Congress, see _Senate Journal_, 15 Cong. 1 sess. pp. 243, 304, 315, 333, 338, 340, 348, 377, 386, 388, 391, 403, 406; _House Journal_, 15 Cong. 1 sess. pp. 450, 452, 456, 468, 479, 484, 492,505.

~1818, May 4. [Great Britain and Netherlands: Treaty.~

Right of Search granted for the suppression of the slave-trade. _British and Foreign State Papers_, 1817-18, pp. 125-43.]

~1818, Dec. 19. Georgia: Act of 1817 Reinforced.~

No title found. "_Whereas_ numbers of African slaves have been illegally introduced into the State, in direct violation of the laws of the United States and of this State, _Be it therefore enacted_," etc. Informers are to receive one-tenth of the net proceeds from the sale of illegally imported Africans, "_Provided_, nothing herein contained shall be so construed as to extend farther back than the year 1817." Prince, _Digest_, p. 798.

~1819, Feb. 8. Congress (Senate): Bill in Addition to Former Acts.~

"A bill supplementary to an act, passed the 2d day of March, 1807, entitled," etc. Postponed. _Senate Journal_, 15 Cong. 2 sess. pp. 234, 244, 311-2, 347.

~1819, March 3. United States Statute: Cruisers Authorized, etc.~

"An Act in addition to the Acts prohibiting the slave trade." _Statutes at Large_, III. 532. For proceedings in Congress, see _Senate Journal_, 15 Cong. 2 sess. pp. 338, 339, 343, 345, 350, 362; _House Journal_, 15 Cong. 2 sess. pp. 9-19, 42-3, 150, 179, 330, 334, 341, 343, 352.

~1819, Dec. 7. President Monroe's Message.~

"Due attention has likewise been paid to the suppression of the slave trade, in compliance with a law of the last session. Orders have been given to the commanders of all our public ships to seize all vessels navigated under our flag, engaged in that trade, and to bring them in, to be proceeded against, in the manner prescribed by that law. It is hoped that these vigorous measures, supported by like acts by other nations, will soon terminate a commerce so disgraceful to the civilized world." _House Journal_, 16 Cong, 1 sess. p. 18.

~1820, Jan. 19. Congress (House): Proposed Registry of Slaves.~

"On motion of Mr. Cuthbert,

"Resolved, That the Committee on the Slave Trade be instructed to enquire into the expediency of establishing a registry of slaves, more effectually to prevent the importation of slaves into the United States, or the territories thereof." No further mention. _Ibid._, p. 150.

~1820, Feb. 5. Congress (House): Proposition on Slave-Trade.~

"Mr. Meigs submitted the following preamble and resolution:

"Whereas, slavery in the United States is an evil of great and increasing magnitude; one which merits the greatest efforts of this nation to remedy: Therefore,

"Resolved, That a committee be appointed to enquire into the expediency of devoting the public lands as a fund for the purpose of,

"1st, Employing a naval force competent to the annihilation of the slave trade;

"2dly, The emancipation of slaves in the United States; and,

"3dly, Colonizing them in such way as shall be conducive to their comfort and happiness, in Africa, their mother country." Read, and, on motion of Walker of North Carolina, ordered to lie on the table. Feb. 7, Mr. Meigs moved that the House now consider the above-mentioned resolution, but it was decided in the negative. Feb. 18, he made a similar motion and proceeded to discussion, but was ruled out of order by the Speaker. He appealed, but the Speaker was sustained, and the House refused to take up the resolution. No further record appears. _Ibid._, pp. 196, 200, 227.

~1820, Feb. 23. Massachusetts: Slavery in Western Territory.~

"Resolve respecting Slavery":--

"The Committee of both Houses, who were appointed to consider 'what measures it may be proper for the Legislature of this Commonwealth to adopt, in the expression of their sentiments and views, relative to the interesting subject, now before Congress,

of interdicting slavery in the New States, which may be admitted into the Union, beyond the River Mississippi,' respectfully submit the following report: ...

"Nor has this question less importance as to its influence on the slave trade. Should slavery be further permitted, an immense new market for slaves would be opened. It is well known that notwithstanding the strictness of our laws, and the vigilance of the government, thousands are now annually imported from Africa," etc. _Massachusetts Resolves_, May, 1819, to February, 1824, pp. 147-51.

~1820, May 12. Congress (House): Resolution for Negotiation.~

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be requested to negociate with all the governments where ministers of the United States are or shall be accredited, on the means of effecting an entire and immediate abolition of the slave trade." Passed House, May 12, 1820; lost in Senate, May 15, 1820. _House Journal_, 16 Cong. 1 sess. pp. 497, 518, 520-21, 526; _Annals of Cong._, 16 Cong. 1 sess. pp. 697-700.

~1820, May 15. United States Statute: Slave-Trade made Piracy.~

"An act to continue in force 'An act to protect the commerce of the United States, and punish the crime of piracy,' and also to make further provisions for punishing the crime of piracy." Continued by several statutes until passage of the Act of 1823, _q.v. Statutes at Large_, III. 600. For proceedings in Congress, see _Senate Journal_, 16 Cong. 1 sess. pp. 238, 241, 268, 286-7, 314, 331, 346, 350, 409, 412, 417, 422, 424, 425; _House Journal_, 16 Cong. 1 sess. pp. 453, 454, 494, 518, 520, 522, 537, 539, 540, 542. There was also a House bill, which was dropped: cf. _House Journal_, 16 Cong. 1 sess. pp. 21, 113, 280, 453, 494.

~1820, Nov. 14. President Monroe's Message.~

"In execution of the law of the last session, for the suppression of the slave trade, some of our public ships have also been employed on the coast of Africa, where several captures have already been made of vessels engaged in that disgraceful traffic." _Senate Journal_, 16 Cong. 2 sess. pp. 16-7.

~1821, Feb. 15. Congress (House): Meigs's Resolution.~

Mr. Meigs offered in modified form the resolutions submitted at the last session:--

"Whereas slavery, in the United States, is an evil, acknowledged to be of great and increasing magnitude, ... therefore,

"Resolved, That a committee be appointed to inquire into the expediency of devoting five hundred million acres of the public lands, next west of the Mississippi, as a fund for the purpose of, in the

"_First place_; Employing a naval force, competent to the annihilation of the slave trade," etc. Question to consider decided in the affirmative, 63 to 50; laid on the table, 66 to 55. _House Journal_, 16 Cong. 2 sess. p. 238; _Annals of Cong._, 16 Cong. 2 sess. pp. 1168-70.

~1821, Dec. 3. President Monroe's Message.~

"Like success has attended our efforts to suppress the slave trade. Under the flag of the United States, and the sanction of their papers, the trade may be considered as entirely suppressed; and, if any of our citizens are engaged in it, under the flag and papers of other powers, it is only from a respect to the rights of those powers, that these offenders are not seized and brought home, to receive the punishment which the laws inflict. If every other power should adopt the same policy, and pursue the same vigorous means for carrying it into effect, the trade could no longer exist." _House Journal_, 17 Cong. 1 sess. p. 22.

~1822, April 12. Congress (House): Proposed Resolution.~

"_Resolved_, That the President of the United States be requested to enter into such arrangements as he may deem suitable and proper, with one or more of the maritime powers of Europe, for the effectual abolition of the slave trade." _House Reports_, 17 Cong. 1 sess. II. No. 92, p. 4; _Annals of Cong._, 17 Cong. 1 sess. p. 1538.

~1822, June 18. Mississippi: Act on Importation, etc.~

"An act, to reduce into one, the several acts, concerning slaves, free negroes, and mulattoes."

§ 2. Slaves born and resident in the United States, and not criminals, may be imported.

§ 3. No slave born or resident outside the United States shall be brought in, under penalty of $1,000 per slave. Travellers are excepted. _Revised Code of the Laws of Mississippi_ (Natchez, 1824), p. 369.

~1822, Dec. 3. President Monroe's Message.~

"A cruise has also been maintained on the coast of Africa, when the season would permit, for the suppression of the slave-trade; and orders have been given to the commanders of all our public ships to seize our own vessels, should they find any engaged in that trade, and to bring them in for adjudication." _House Journal_, 17 Cong. 2 sess. pp. 12, 21.

~1823, Jan. 1. Alabama: Act to Dispose of Illegally Imported Slaves.~

"An Act to carry into effect the laws of the United States prohibiting the slave trade."

§ 1. "_Be it enacted_, ... That the Governor of this state be ... authorized and required to appoint some suitable person, as the agent of the state, to receive all and every slave or slaves or persons of colour, who may have been brought into this state in violation of the laws of the United States, prohibiting the slave trade: _Provided_, that the authority of the said agent is not to extend to slaves who have been condemned and sold."

§ 2. The agent must give bonds.

§ 3. "_And be it further enacted_, That the said slaves, when so placed in the possession of the state, as aforesaid, shall be employed on such public work or works, as shall be deemed by the Governor of most value and utility to the public interest."

§ 4. A part may be hired out to support those employed in public work.

§ 5. "_And be it further enacted_, That in all cases in which a decree of any court having competent authority, shall be in favor of any or claimant or claimants, the said slaves shall be truly and faithfully, by said agent, delivered to such claimant or claimants: but in case of their condemnation, they shall be sold by such agent for cash to the highest bidder, by giving sixty days notice," etc. _Acts of the Assembly of Alabama, 1822_ (Cahawba, 1823), p. 62.

~1823, Jan. 30. United States Statute: Piracy Act made Perpetual.~

"An Act in addition to 'An act to continue in force "An act to protect the commerce of the United States, and punish the crime of piracy,"'" etc. _Statutes at Large_, III. 510-14, 721, 789. For proceedings in Congress, see _Senate Journal_, 17 Cong. 2 sess. pp. 61, 64, 70, 83, 98, 101, 106, 110, 111, 122, 137; _House Journal_, 17 Cong. 2 sess. pp. 73, 76, 156, 183, 189.

~1823, Feb. 10. Congress (House): Resolution on Slave-Trade.~

Mr. Mercer offered the following resolution:--

"Resolved, That the President of the United States be requested to enter upon, and to prosecute, from time to time, such negotiations with the several maritime powers of Europe and America, as he may deem expedient, for the effectual abolition of the African slave trade, and its ultimate denunciation as piracy, under the law of nations, by the consent of the civilized world." Agreed to Feb. 28; passed Senate. _House Journal_, 17 Cong. 2 sess. pp. 212, 280-82; _Annals of Cong._, 17 Cong. 2 sess. pp. 928, 1147-55.

~1823, March 3. United States Statute: Appropriation.~

"An Act making appropriations for the support of the navy," etc.

"To enable the President of the United States to carry into effect the act" of 1819, $50,000. _Statutes at Large_, III. 763, 764

~1823. President: Proposed Treaties.~

Letters to various governments in accordance with the resolution of 1823: April 28, to Spain; May 17, to Buenos Ayres; May 27, to United States of Colombia; Aug. 14, to Portugal. See above, Feb. 10, 1823. _House Doc._, 18 Cong. 1 sess. VI. No. 119.

~1823, June 24. Great Britain: Proposed Treaty.~

Adams, March 31, proposes that the trade be made piracy. Canning, April 8, reminds Adams of the treaty of Ghent and asks for the granting of a mutual Right of Search to suppress the slave-trade. The matter is further discussed until June 24. Minister Rush is empowered to propose a treaty involving the Right of Search, etc. This treaty was substantially the one signed (see below, March 13, 1824), differing principally in the first article.

"Article I. The two high contracting Powers, having each separately, by its own laws, subjected their subjects and citizens, who may be convicted of carrying on the illicit traffic in slaves on the coast of Africa, to the penalties of piracy, do hereby agree to use their influence, respectively, with the other maritime and civilized nations of the world, to the end that the said African slave trade may be recognized, and declared to be, piracy, under the law of nations." _House Doc._, 18 Cong, 1 sess. VI. No. 119.

~1824, Feb. 6. Congress (House): Proposition to Amend Constitution.~

Mr. Abbot's resolution on persons of color:--

"That no part of the constitution of the United States ought to be construed, or shall be construed to authorize the importation or ingress of any person of color into any one of the United States, contrary to the laws of such state." Read first and second time and committed to the Committee of the Whole. _House Journal_, 18 Cong. 1 sess. p. 208; _Annals of Cong._, 18 Cong. 1 sess. p. 1399.

~1824, March 13. Great Britain: Proposed Treaty of 1824.~

"The Convention:"--

Art. I. "The commanders and commissioned officers of each of the two high contracting parties, duly authorized, under the regulations and instructions of their respective Governments, to cruize on the coasts of Africa, of America, and of the West Indies, for the suppression of the slave trade," shall have the power to seize and bring into port any vessel owned by subjects of the two contracting parties, found engaging in the slave-trade. The vessel shall be taken for trial to the country where she belongs.

Art. II. Provides that even if the vessel seized does not belong to a citizen or citizens of either of the two contracting parties, but is chartered by them, she may be seized in the same way as if she belonged to them.

Art. III. Requires that in all cases where any vessel of either party shall be boarded by any naval officer of the other party, on suspicion of being concerned in the slave-trade, the officer shall deliver to the captain of the vessel so boarded a certificate in writing, signed by the naval officer, specifying his rank, etc., and the object of his visit. Provision is made for the delivery of ships and papers to the tribunal before which they are brought.

Art. IV. Limits the Right of Search, recognized by the Convention, to such investigation as shall be necessary to ascertain the fact whether the said vessel is or is not engaged in the slave-trade. No person shall be taken out of the vessel so visited unless for reasons of health.

Art. V. Makes it the duty of the commander of either nation, having captured a vessel of the other under the treaty, to receive unto his custody the vessel captured, and send or carry it into some port of the vessel's own country for adjudication, in which case triplicate declarations are to be signed, etc.

Art. VI. Provides that in cases of capture by the officer of either party, on a station where no national vessel is cruising, the captor shall either send or carry his prize to some convenient port of its own country for adjudication, etc.

Art. VII. Provides that the commander and crew of the captured vessel shall be proceeded against as pirates, in the ports to which they are brought, etc.

Art. VIII. Confines the Right of Search, under this treaty, to such officers of both parties as are especially authorized to execute the laws of their countries in regard to the slave-trade. For every abusive exercise of this right, officers are to be personally liable in costs and damages, etc.

Art. IX. Provides that the government of either nation shall inquire into abuses of this Convention and of the laws of the two countries, and inflict on guilty officers the proper punishment.

Art. X. Declares that the right, reciprocally conceded by this treaty, is wholly and exclusively founded on the consideration that the two nations have by their laws made the slave-trade piracy, and is not to be taken to affect in any other way the rights of the parties, etc.; it further engages that each power shall use its influence with all other civilized powers, to procure from them the acknowledgment that the slave-trade is piracy under the law of nations.

Art. XI. Provides that the ratifications of the treaty shall be exchanged at London within twelve months, or as much sooner as possible. Signed by Mr. Rush, Minister to the Court of St. James, March 13, 1824.

The above is a synopsis of the treaty as it was laid before the Senate. It was ratified by the Senate with certain conditions, one of which was that the duration of this treaty should be limited to the pleasure of the two parties on six months' notice; another was that the Right of Search should be limited to the African and West Indian seas: i.e., the word "America" was struck out. This treaty as amended and passed by the Senate (cf. above, p. 141) was rejected by Great Britain. A counter project was suggested by her, but not accepted (cf. above, p. 144). The striking out of the word "America" was declared to be the insuperable objection. _Senate Doc._, 18 Cong. 2 sess. I. No. 1, pp. 15-20; _Niles's Register_, 3rd Series, XXVI. 230-2. For proceedings in Senate, see _Amer. State Papers, Foreign_, V. 360-2.

~1824, March 31. [Great Britain: Slave-Trade made Piracy.~

"An Act for the more effectual Suppression of the _African_ Slave Trade."

Any person engaging in the slave-trade "shall be deemed and adjudged guilty of Piracy, Felony and Robbery, and being convicted thereof shall suffer Death without Benefit of Clergy, and Loss of Lands, Goods and Chattels, as Pirates, Felons and Robbers upon the Seas ought to suffer," etc. _Statute 5 George IV._, ch. 17; _Amer. State Papers, Foreign_, V. 342.]

~1824, April 16. Congress (House): Bill to Suppress Slave-Trade.~

"Mr. Govan, from the committee to which was referred so much of the President's Message as relates to the suppression of the Slave Trade, reported a bill respecting the slave trade; which was read twice, and committed to a Committee of the Whole."

§ 1. Provided a fine not exceeding $5,000, imprisonment not exceeding 7 years, and forfeiture of ship, for equipping a slaver even for the foreign trade; and a fine not exceeding $3,000, and imprisonment not exceeding 5 years, for serving on board any slaver. _Annals of Cong._, 18 Cong. 1 sess. pp. 2397-8; _House Journal_, 18 Cong. 1 sess. pp. 26, 180, 181, 323, 329, 356, 423.

~1824, May 21. President Monroe's Message on Treaty of 1824.~

Amer. State Papers, Foreign, V. 344-6.

~1824, Nov. 6. [Great Britain and Sweden: Treaty.~

Right of Search granted for the suppression of the slave-trade. _British and Foreign State Papers_, 1824-5, pp. 3-28.]

~1824, Nov. 6. Great Britain: Counter Project of 1825.~

Great Britain proposes to conclude the treaty as amended by the Senate, if the word "America" is reinstated in Art. I. (Cf. above, March 13, 1824.) February 16, 1825, the House Committee favors this project; March 2, Addington reminds Adams of this counter proposal; April 6, Clay refuses to reopen negotiations on account of the failure of the Colombian treaty. _Amer. State Papers, Foreign_, V. 367; _House Reports_, 18 Cong. 2 sess. I. No. 70; _House Doc._, 19 Cong. 1 sess. I. No. 16.

~1824, Dec. 7. President Monroe's Message.~

"It is a cause of serious regret, that no arrangement has yet been finally concluded between the two Governments, to secure, by joint co-operation, the suppression of the slave trade. It was the object of the British Government, in the early stages of the negotiation, to adopt a plan for the suppression, which should include the concession of the mutual right of search by the ships of war of each party, of the vessels of the other, for suspected offenders. This was objected to by this Government, on the principle

that, as the right of search was a right of war of a belligerant towards a neutral power, it might have an ill effect to extend it, by treaty, to an offence which had been made comparatively mild, to a time of peace. Anxious, however, for the suppression of this trade, it was thought adviseable, in compliance with a resolution of the House of Representatives, founded on an act of Congress, to propose to the British Government an expedient, which should be free from that objection, and more effectual for the object, by making it piratical.... A convention to this effect was concluded and signed, in London," on the 13th of March, 1824, "by plenipotentiaries duly authorized by both Governments, to the ratification of which certain obstacles have arisen, which are not yet entirely removed." [For the removal of which, the documents relating to the negotiation are submitted for the action of Congress]....

"In execution of the laws for the suppression of the slave trade, a vessel has been occasionally sent from that squadron to the coast of Africa, with orders to return thence by the usual track of the slave ships, and to seize any of our vessels which might be engaged in that trade. None have been found, and, it is believed, that none are thus employed. It is well known, however, that the trade still exists under other flags." _House Journal_, 18 Cong. 2 sess. pp. 11, 12, 19, 27, 241; _House Reports_, 18 Cong. 2 sess. I. No. 70; Gales and Seaton, _Register of Debates_, I. 625-8, and Appendix, p. 2 ff.

~1825, Feb. 21. United States of Colombia: Proposed Treaty.~

The President sends to the Senate a treaty with the United States of Colombia drawn, as United States Minister Anderson said, similar to that signed at London, with the alterations made by the Senate. March 9, 1825, the Senate rejects this treaty. _Amer. State Papers, Foreign_, V. 729-35.

~1825, Feb. 28. Congress (House): Proposed Resolution on Slave-Trade.~

Mr. Mercer laid on the table the following resolution:--

"_Resolved_, That the President of the United States be requested to enter upon, and prosecute from time to time, such negotiations with the several maritime powers of Europe and America, as he may deem expedient for the effectual abolition of the slave trade, and its ultimate denunciation, as piracy, under the law of nations, by the consent of the civilized world." The House refused to consider the resolution. _House Journal_, 18 Cong. 2 sess. p. 280; Gales and Seaton, _Register of Debates_, I. 697, 736.

~1825, March 3. Congress (House): Proposed Resolution against Right of Search.~

"Mr. Forsyth submitted the following resolution:

"_Resolved_, That while this House anxiously desires that the Slave Trade should be, universally, denounced as Piracy, and, as such, should be detected and punished under the law of nations, it considers that it would be highly inexpedient to enter into engagements with any foreign power, by which _all_ the merchant vessels of the United States would be exposed to the inconveniences of any regulation of search, from which any merchant vessels of that foreign power would be exempted." Resolution laid on the table. _House Journal_, 18 Cong. 2 sess. pp. 308-9; Gales and Seaton, _Register of Debates_, I. 739.

~1825, Dec. 6. President Adams's Message.~

"The objects of the West India Squadron have been, to carry into execution the laws for the suppression of the African Slave Trade: for the protection of our commerce against vessels of piratical character.... These objects, during the present year, have been accomplished more effectually than at any former period. The African Slave Trade has long been excluded from the use of our flag; and if some few citizens of our country have continued to set the laws of the Union, as well as those of nature and humanity, at defiance, by persevering in that abominable traffic, it has been only by sheltering themselves under the banners of other nations, less earnest for the total extinction of the trade than ours." _House Journal_, 19 Cong. 1 sess. pp. 20, 96, 296-7, 305, 323, 329, 394-5, 399, 410, 414, 421, 451, 640.

~1826, Feb. 14. Congress (House): Proposition to Repeal Parts of Act of 1819.~

"Mr. Forsyth submitted the following resolutions, viz.:

1. "_Resolved_, That it is expedient to repeal so much of the act of the 3d March, 1819, entitled, 'An act in addition to the acts prohibiting the slave trade,' as provides for the appointment of agents on the coast of Africa.

2. "_Resolved_, That it is expedient so to modify the said act of the 3d of March, 1819, as to release the United States from all obligation to support the negroes already removed to the coast of Africa, and to provide for such a disposition of those taken in slave ships who now are in, or who may be, hereafter, brought into the United States, as shall secure to them a fair opportunity of obtaining a comfortable subsistence, without any aid from the public treasury." Read and laid on the table. _Ibid._, p. 258.

~1826, March 14. United States Statute: Appropriation.~

"An Act making appropriations for the support of the navy," etc.

"For the agency on the coast of Africa, for receiving the negroes," etc., $32,000. _Statutes at Large_, IV. 140, 141.

~1827, March 2. United States Statute: Appropriation.~

"An Act making appropriations for the support of the Navy," etc.

"For the agency on the coast of Africa," etc., $56,710. _Ibid._, W. 206, 208.

~1827, March 11. Texas: Introduction of Slaves Prohibited.~

Constitution of the State of Coahuila and Texas. Preliminary Provisions:--

Art. 13. "From and after the promulgation of the constitution in the capital of each district, no one shall be born a slave in the state, and after six months the introduction of slaves under any pretext shall not be permitted." _Laws and Decrees of Coahuila and Texas_ (Houston, 1839), p. 314.

~1827, Sept. 15. Texas: Decree against Slave-Trade.~

"The Congress of the State of Coahuila and Texas decrees as follows:"

Art. 1. All slaves to be registered.

Art. 2, 3. Births and deaths to be recorded.

Art. 4. "Those who introduce slaves, after the expiration of the term specified in article 13 of the Constitution, shall be subject to the penalties established by the general law of the 13th of July, 1824." _Ibid._, pp. 78-9.

~1828, Feb. 25. Congress (House): Proposed Bill to Abolish African Agency, etc.~

"Mr. McDuffie, from the Committee of Ways and Means, ... reported the following bill:

"A bill to abolish the Agency of the United States on the Coast of Africa, to provide other means of carrying into effect the laws prohibiting the slave trade, and for other purposes." This bill was amended so as to become the act of May 24, 1828 (see below). _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 278.

~1828, May 24. United States Statute: Appropriation.~

"An Act making an appropriation for the suppression of the slave trade." _Statutes at Large_, IV. 302; _House Journal_, 20 Cong. 1 sess., House Bill No. 190.

~1829, Jan. 28. Congress (House): Bill to Amend Act of 1807.~

The Committee on Commerce reported "a bill (No. 399) to amend an act, entitled 'An act to prohibit the importation of slaves,'" etc. Referred to Committee of the Whole. _House Journal_, 20 Cong. 2 sess. pp. 58, 84, 215. Cf. _Ibid._, 20 Cong. 1 sess. pp. 121, 135.

~1829, March 2. United States Statute: Appropriation.~

"An Act making additional appropriations for the support of the navy," etc.

"For the reimbursement of the marshal of Florida for expenses incurred in the case of certain Africans who were wrecked on the coast of the United States, and for the expense of exporting them to Africa," $16,000. _Statutes at Large_, IV. 353, 354.

~1830, April 7. Congress (House): Resolution against Slave-Trade.~

Mr. Mercer reported the following resolution:--

"_Resolved_, That the President of the United States be requested to consult and negotiate with all the Governments where Ministers of the United States are, or shall be accredited, on the means of effecting an entire and immediate abolition of the African slave trade; and especially, on the expediency, with that view, of causing it to be universally denounced as piratical." Referred to Committee of the Whole; no further action recorded. _House Journal_, 21 Cong. 1 sess. p. 512.

~1830, April 7. Congress (House): Proposition to Amend Act of March 3, 1819.~

Mr. Mercer, from the committee to which was referred the memorial of the American Colonization Society, and also memorials, from the inhabitants of Kentucky and Ohio, reported with a bill (No. 412) to amend "An act in addition to the acts prohibiting the slave trade," passed March 3, 1819. Read twice and referred to Committee of the Whole. _Ibid._

~1830, May 31. Congress (Statute): Appropriation.~

"An Act making a re-appropriation of a sum heretofore appropriated for the suppression of the slave trade." _Statutes at Large_, IV. 425; _Senate Journal_, 21 Cong. 1 sess. pp. 359, 360, 383; _House Journal_, 21 Cong. 1 sess. pp. 624, 808-11.

~1830. [Brazil: Prohibition of Slave-Trade.~

Slave-trade prohibited under severe penalties.]

~1831, 1833. [Great Britain and France: Treaty Granting Right of Search.~

Convention between Great Britain and France granting a mutual limited Right of Search on the East and West coasts of Africa, and on the coasts of the West Indies and Brazil. _British and Foreign State Papers_, 1830-1, p. 641 ff; 1832-3, p. 286 ff.]

~1831, Feb. 16. Congress (House): Proposed Resolution on Slave-Trade.~

"Mr. Mercer moved to suspend the rule of the House in regard to motions, for the purpose of enabling himself to submit a resolution requesting the Executive to enter into negotiations with the maritime Powers of Europe, to induce them to enact laws declaring the African slave trade piracy, and punishing it as such." The motion was lost. Gales and Seaton, _Register of Debates_, VII. 726.

~1831, March 2. United States Statute: Appropriation.~

"An Act making appropriations for the naval service," etc.

"For carrying into effect the acts for the suppression of the slave trade," etc., $16,000. _Statutes at Large_, IV. 460, 462.

~1831, March 3. Congress (House): Resolution as to Treaties.~

"Mr. Mercer moved to suspend the rule to enable him to submit the following resolution:

"_Resolved_, That the President of the United States be requested to renew, and to prosecute from time to time, such negotiations with the several maritime powers of Europe and America as he may deem expedient for the effectual abolition of the African slave trade, and its ultimate denunciation as piracy, under the laws of nations, by the consent of the civilized world." The rule was suspended by a vote of 108 to 36, and the resolution passed, 118 to 32. _House Journal_, 21 Cong. 2 sess. pp. 426-8.

~1833, Feb. 20. United States Statute: Appropriation.~

"An Act making appropriations for the naval service," etc.

" ... for carrying into effect the acts for the suppression of the slave trade," etc., $5,000. _Statutes at Large_, IV. 614, 615.

~1833, August. Great Britain and France: Proposed Treaty with the United States.~

British and French ministers simultaneously invited the United States to accede to the Convention just concluded between them for the suppression of the slave-trade. The Secretary of State, Mr. M'Lane, deferred answer until the meeting of Congress, and then postponed negotiations on account of the irritable state of the country on the slave question. Great Britain had proposed that "A reciprocal right of search ... be conceded by the United States, limited as to place, and subject to specified restrictions. It is to be employed only in repressing the Slave Trade, and to be exercised under a written and specific authority, conferred on the Commander of the visiting ship." In the act of accession, "it will be necessary that the right of search should be extended to the coasts of the United States," and Great Britain will in turn extend it to the British West Indies. This proposal was finally refused, March 24, 1834, chiefly, as stated, because of the extension of the Right of Search to the coasts of the United States. This part was waived by Great Britain, July 7, 1834. On Sept. 12 the French Minister joined in urging accession. On Oct. 4, 1834, Forsyth states that the determination has "been definitely formed, not to make the United States a party to any Convention on the subject of the Slave Trade." _Parliamentary Papers_, 1835, Vol. LI., _Slave Trade_, Class B., pp. 84-92.

~1833, Dec. 23. Georgia: Slave-Trade Acts Amended.~

"An Act to reform, amend, and consolidate the penal laws of the State of Georgia."

13th Division. "Offences relative to Slaves":--

§ 1. "If any person or persons shall bring, import, or introduce into this State, or aid or assist, or knowingly become concerned or interested, in bringing, importing, or introducing into this State, either by land or by water, or in any manner whatever, any slave or slaves, each and every such person or persons so offending, shall be deemed principals in law, and guilty of a high misdemeanor, and ... on conviction, shall be punished by a fine not exceeding five hundred dollars each, for each and every slave, ... and imprisonment and labor in the penitentiary for any time not less than one year, nor longer than four years." Residents, however, may bring slaves for their own use, but must register and swear they are not for sale, hire, mortgage, etc.

§ 6. Penalty for knowingly receiving such slaves, $500. Slightly amended Dec. 23, 1836, e.g., emigrants were allowed to hire slaves out, etc.; amended Dec. 19, 1849, so as to allow importation of slaves from "any other slave holding State of this Union." Prince, _Digest_, pp. 619, 653, 812; Cobb, _Digest_, II. 1018.

~1834, Jan. 24. United States Statute: Appropriation.~

"An Act making appropriations for the naval service," etc.

"For carrying into effect the acts for the suppression of the slave trade," etc., $5,000. _Statutes at Large_, IV. 670, 671.

~1836, March 17. Texas: African Slave-Trade Prohibited.~

Constitution of the Republic of Texas: General Provisions:--

§ 9. All persons of color who were slaves for life before coming to Texas shall remain so. "Congress shall pass no laws to prohibit emigrants from bringing their slaves into the republic with them, and holding them by the same tenure by which such slaves were held in the United States; ... the importation or admission of Africans or negroes into this republic, excepting from the United States of America, is forever prohibited, and declared to be piracy." _Laws of the Republic of Texas_ (Houston, 1838), I. 19.

~1836, Dec. 21. Texas: Slave-Trade made Piracy.~

"An Act supplementary to an act, for the punishment of Crimes and Misdemeanors."

§ 1. "_Be it enacted_ ..., That if any person or persons shall introduce any African negro or negroes, contrary to the true intent and meaning of the ninth section of the general provisions of the constitution, ... except such as are from the United States of America, and had been held as slaves therein, be considered guilty of piracy; and upon conviction thereof, before any court having cognizance of the same, shall suffer death, without the benefit of clergy."

§ 2. The introduction of Negroes from the United States of America, except of those legally held as slaves there, shall be piracy. _Ibid._, I. 197. Cf. _House Doc._, 27 Cong. 1 sess. No. 34, p. 42.

~1837, March 3. United States Statute: Appropriation.~

"An Act making appropriations for the naval service," etc.

"For carrying into effect the acts for the suppression of the slave trade," etc., $11,413.57. _Statutes at Large_, V. 155, 157.

~1838, March 19. Congress (Senate): Slave-Trade with Texas, etc.~

"Mr. Morris submitted the following motion for consideration:

"_Resolved_, That the Committee on the Judiciary be instructed to inquire whether the present laws of the United States, on the subject of the slave trade, will prohibit that trade being carried on between citizens of the United States and citizens of the Republic of Texas, either by land or by sea; and whether it would be lawful in vessels owned by citizens of that Republic, and not lawful in vessels owned by citizens of this, or lawful in both, and by citizens of both countries; and also whether a slave carried from the United States into a foreign country, and brought back, on returning into the United States, is considered a free person, or is liable to be sent back, if demanded, as a slave, into that country from which he or she last came; and also whether any additional legislation by Congress is necessary on any of these subjects." March 20, the motion of Mr. Walker that this resolution "lie on the table," was determined in the affirmative, 32 to 9. _Senate Journal_, 25 Cong. 2 sess. pp. 297-8, 300.

~1839, Feb. 5. Congress (Senate): Bill to Amend Slave-Trade Acts.~

"Mr. Strange, on leave, and in pursuance of notice given, introduced a bill to amend an act entitled an act to prohibit the importation of slaves into any port in the jurisdiction of the United States; which was read twice, and referred to the Committee on Commerce." March 1, the Committee was discharged from further consideration of the bill. _Congressional Globe_, 25 Cong. 3 sess. p. 172; _Senate Journal_, 25 Cong. 3 sess. pp. 200, 313.

~1839, Dec. 24. President Van Buren's Message.~

"It will be seen by the report of the Secretary of the navy respecting the disposition of our ships of war, that it has been deemed necessary to station a competent force on the coast of Africa, to prevent a fraudulent use of our flag by foreigners.

"Recent experience has shown that the provisions in our existing laws which relate to the sale and transfer of American vessels while abroad, are extremely defective. Advantage has been taken of these defects to give to vessels wholly belonging to foreigners, and navigating the ocean, an apparent American ownership. This character has been so well simulated as to afford them comparative security in prosecuting the slave trade, a traffic emphatically denounced in our statutes, regarded with abhorrence by our citizens, and of which the effectual suppression is nowhere more sincerely desired than in the United States. These circumstances make it proper to recommend to your early attention a careful revision of these laws, so that ... the integrity and honor of our flag may be carefully preserved." _House Journal_, 26 Cong. 1 sess. pp. 117-8.

~1840, Jan. 3. Congress (Senate): Bill to Amend Act of 1807.~

"Agreeably to notice, Mr. Strange asked and obtained leave to bring in a bill (Senate, No. 123) to amend an act entitled 'An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United States from and after the 1st day of January, in the year 1808,' approved the 2d day of March, 1807; which was read the first and second times, by unanimous consent, and referred to the Committee on the Judiciary." Jan. 8, it was reported without amendment; May 11, it was considered, and, on motion by Mr. King, "_Ordered_, That it lie on the table." _Senate Journal_, 26 Cong. 1 sess. pp. 73, 87, 363.

~1840, May 4. Congress (Senate): Bill on Slave-Trade.~

"Mr. Davis, from the Committee on Commerce, reported a bill (Senate, No. 335) making further provision to prevent the abuse of the flag of the United States, and the use of unauthorized papers in the foreign slavetrade, and for other purposes." This passed the Senate, but was dropped in the House. _Ibid._, pp. 356, 359, 440, 442; _House Journal_, 26 Cong. 1 sess. pp. 1138, 1228, 1257.

~1841, June 1. Congress (House): President Tyler's Message.~

"I shall also, at the proper season, invite your attention to the statutory enactments for the suppression of the slave trade, which may require to be rendered more efficient in their provisions. There is reason to believe that the traffic is on the increase. Whether such increase is to be ascribed to the abolition of slave labor in the British possessions in our vicinity, and an attendant diminution in the supply of those articles which enter into the general consumption of the world, thereby augmenting the demand from other

quarters, ... it were needless to inquire. The highest considerations of public honor, as well as the strongest promptings of humanity, require a resort to the most vigorous efforts to suppress the trade." _House Journal_, 27 Cong. 1 sess. pp. 31, 184.

~1841, Dec. 7. President Tyler's Message.~

Though the United States is desirous to suppress the slave-trade, she will not submit to interpolations into the maritime code at will by other nations. This government has expressed its repugnance to the trade by several laws. It is a matter for deliberation whether we will enter upon treaties containing mutual stipulations upon the subject with other governments. The United States will demand indemnity for all depredations by Great Britain.

"I invite your attention to existing laws for the suppression of the African slave trade, and recommend all such alterations as may give to them greater force and efficacy. That the American flag is grossly abused by the abandoned and profligate of other nations is but too probable. Congress has, not long since, had this subject under its consideration, and its importance well justifies renewed and anxious attention." _House Journal_, 27 Cong. 2 sess. pp. 14-5, 86, 113.

~1841, Dec. 20. [Great Britain, Austria, Russia, Prussia, and France: Quintuple Treaty.]~ _British and Foreign State Papers_, 1841-2, p. 269 ff.

~1842, Feb. 15. Right of Search: Cass's Protest.~

Cass writes to Webster, that, considering the fact that the signing of the Quintuple Treaty would oblige the participants to exercise the Right of Search denied by the United States, or to make a change in the hitherto recognized law of nations, he, on his own responsibility, addressed the following protest to the French Minister of Foreign Affairs, M. Guizot:--

"LEGATION OF THE UNITED STATES, "PARIS, FEBRUARY 13, 1842.

"SIR: The recent signature of a treaty, having for its object the suppression of the African slave trade, by five of the powers of Europe, and to which France is a party, is a fact of such general notoriety that it may be assumed as the basis of any diplomatic representations which the subject may fairly require."

The United States is no party to this treaty. She denies the Right of Visitation which England asserts. [Quotes from the presidential message of Dec. 7, 1841.] This principle is asserted by the treaty.

" ... The moral effect which such a union of five great powers, two of which are eminently maritime, but three of which have perhaps never had a vessel engaged in that traffic, is calculated to produce upon the United States, and upon other nations who, like them, may be indisposed to these combined movements, though it may be regretted, yet furnishes no just cause of complaint. But the subject assumes another aspect when they are told by one of the parties that their vessels are to be forcibly entered and examined, in order to carry into effect these stipulations. Certainly the American Government does not believe that the high powers, contracting parties to this treaty, have any wish to compel the United States, by force, to adopt their measures to its provisions, or to adopt its stipulations ...; and they will see with pleasure the prompt disavowal made by yourself, sir, in the name of your country, ... of any intentions of this nature. But were it otherwise, ... They would prepare themselves with apprehension, indeed, but without dismay--with regret, but with firmness--for one of those desperate struggles which have sometimes occurred in the history of the world."

If, as England says, these treaties cannot be executed without visiting United States ships, then France must pursue the same course. It is hoped, therefore, that his Majesty will, before signing this treaty, carefully examine the pretensions of England and their compatibility with the law of nations and the honor of the United States. _Senate Doc._, 27 Cong. 3 sess. II. No. 52, and IV. No. 223; 29 Cong. 1 sess. VIII. No. 377, pp. 192-5.

~1842, Feb. 26. Mississippi: Resolutions on Creole Case.~

The following resolutions were referred to the Committee on Foreign Affairs in the United States Congress, House of Representatives, May 10, 1842:

"Whereas, the right of search has never been yielded to Great Britain," and the brig Creole has not been surrendered by the British authorities, etc., therefore,

§ 1. "_Be it resolved by the Legislature of the State of Mississippi_, That ... the right of search cannot be conceded to Great Britain without a manifest servile submission, unworthy a free nation....

§ 2. "_Resolved_, That any attempt to detain and search our vessels, by British cruisers, should be held and esteemed an unjustifiable outrage on the part of the Queen's Government; and that any such outrage, which may have occurred since Lord Aberdeen's note to our envoy at the Court of St. James, of date October thirteen, eighteen hundred and forty-one, (if any,) may well be deemed, by our Government, just cause of war."

§ 3. "_Resolved_, That the Legislature of the State, in view of the late murderous insurrection of the slaves on board the Creole, their reception in a British port, the absolute connivance at their crimes, manifest in the protection extended to them by the British authorities, most solemnly declare their firm conviction that, if the conduct of those authorities be submitted to, compounded for by the payment of money, or in any other manner, or atoned for in any mode except by the surrender of the actual criminals to the Federal Government, and the delivery of the other identical slaves to their rightful owner or owners, or his or their agents, the slaveholding States would have most just cause to apprehend that the American flag is powerless to protect American property; that the Federal Government is not sufficiently energetic in the maintenance and preservation of their peculiar rights; and that these rights, therefore, are in imminent danger."

§ 4. _Resolved_, That restitution should be demanded "at all hazards." _House Doc._, 27 Cong. 2 sess. IV. No. 215.

~1842, March 21. Congress (House): Giddings's Resolutions.~

Mr. Giddings moved the following resolutions:--

§ 5. "_Resolved_, That when a ship belonging to the citizens of any State of this Union leaves the waters and territory of such State, and enters upon the high seas, the persons on board cease to be subject to the slave laws of such State, and therefore are governed in their relations to each other by, and are amenable to, the laws of the United States."

§ 6. _Resolved_, That the slaves in the brig Creole are amenable only to the laws of the United States.

§ 7. _Resolved_, That those slaves by resuming their natural liberty violated no laws of the United States.

§ 8. _Resolved_, That all attempts to re-enslave them are unconstitutional, etc.

Moved that these resolutions lie on the table; defeated, 53 to 125. Mr. Giddings withdrew the resolutions. Moved to censure Mr. Giddings, and he was finally censured. _House Journal_, 27 Cong. 2 sess. pp. 567-80.

~1842, May 10. Congress (House): Remonstrance of Mississippi against Right of Search.~

"Mr. Gwin presented resolutions of the Legislature of the State of Mississippi, against granting the right of search to Great Britain for the purpose of suppressing the African slave trade; urging the Government to demand of the British Government redress and restitution in relation to the case of the brig Creole and the slaves on board." Referred to the Committee on Foreign Affairs. _House Journal_, 27 Cong. 2 sess. p. 800.

~1842, Aug. 4. United States Statute: Appropriation.~

"An Act making appropriations for the naval service," etc.

"For carrying into effect the acts for the suppression of the slave trade," etc. $10,543.42. _Statutes at Large_, V. 500, 501.

~1842, Nov. 10. Joint-Cruising Treaty with Great Britain.~

"Treaty to settle and define boundaries; for the final suppression of the African slave-trade; and for the giving up of criminals fugitive from justice. Concluded August 9, 1842; ratifications exchanged at London October 13, 1842; proclaimed November 10, 1842." Articles VIII., and IX. Ratified by the Senate by a vote of 39 to 9, after several unsuccessful attempts to amend it. _U.S. Treaties and Conventions_ (1889), pp. 436-7; _Senate Exec. Journal_, VI. 118-32.

~1842, Dec. 7. President Tyler's Message.~

The treaty of Ghent binds the United States and Great Britain to the suppression of the slave-trade. The Right of Search was refused by the United States, and our Minister in France for that reason protested against the Quintuple Treaty; his conduct had the approval of the administration. On this account the eighth article was inserted, causing each government to keep a flotilla in African waters to enforce the laws. If this should be done by all the powers, the trade would be swept from the ocean. _House Journal_, 27 Cong. 3 sess. pp. 16-7.

~1843, Feb. 22. Congress (Senate): Appropriation Opposed.~

Motion by Mr. Benton, during debate on naval appropriations, to strike out appropriation "for the support of Africans recaptured on the coast of Africa or elsewhere, and returned to Africa by the armed vessels of the United States, $5,000." Lost; similar proposition by Bagby, lost. Proposition to strike out appropriation for squadron, lost. March 3, bill becomes a law, with appropriation for Africans, but without that for squadron. _Congressional Globe_, 27 Cong. 3 sess. pp. 328, 331-6; _Statutes at Large_, V. 615.

~1845, Feb. 20. President Tyler's Special Message to Congress.~

Message on violations of Brazilian slave-trade laws by Americans. _House Journal_, 28 Cong. 2 sess. pp. 425, 463; _House Doc._, 28 Cong. 2 sess. IV. No. 148. Cf. _Ibid._, 29 Cong. 1 sess. III. No. 43.

~1846, Aug. 10. United States Statute: Appropriation.~

"For carrying into effect the acts for the suppression of the slave trade, including the support of recaptured Africans, and their removal to their country, twenty-five thousand dollars." _Statutes at Large_, IX. 96.

~1849, Dec. 4. President Taylor's Message.~

"Your attention is earnestly invited to an amendment of our existing laws relating to the African slave-trade, with a view to the effectual suppression of that barbarous traffic. It is not to be denied that this trade is still, in part, carried on by means of vessels built in the United States, and owned or navigated by some of our citizens." _House Exec. Doc._, 31 Cong. 1 sess. III. No. 5, pp. 7-8.

~1850, Aug. 1. Congress (House): Bill for War Steamers.~

"A bill (House, No. 367) to establish a line of war steamers to the coast of Africa for the suppression of the slave trade and the promotion of commerce and colonization." Read twice, and referred to Committee of the Whole. _House Journal_, 31 Cong. 1 sess. pp. 1022, 1158, 1217.

~1850, Dec. 16. Congress (House): Treaty of Washington.~

"Mr. Burt, by unanimous consent, introduced a joint resolution (No. 28) 'to terminate the eighth article of the treaty between the United States and Great Britain concluded at Washington the ninth day of August, 1842.'" Read twice, and referred to the Committee on Naval Affairs. _Ibid._, 31 Cong. 2 sess. p. 64.

~1851, Jan. 22. Congress (Senate): Resolution on Sea Letters.~

"The following resolution, submitted by Mr. Clay the 20th instant, came up for consideration:--

"_Resolved_, That the Committee on Commerce be instructed to inquire into the expediency of making more effectual provision by law to prevent the employment of American vessels and American seamen in the African slave trade, and especially as to the expediency of granting sea letters or other evidence of national character to American vessels clearing out of the ports of the empire of Brazil for the western coast of Africa." Agreed to. _Congressional Globe_, 31 Cong. 2 sess. pp. 304-9; _Senate Journal_, 31 Cong. 2 sess. pp. 95, 102-3.

~1851, Feb. 19. Congress (Senate): Bill on Slave-Trade.~

"A bill (Senate, No. 472) concerning the intercourse and trade of vessels of the United States with certain places on the eastern and western coasts of Africa, and for other purposes." Read once. _Senate Journal_, 31 Cong. 2 sess. pp. 42, 45, 84, 94, 159, 193-4; _Congressional Globe_, 31 Cong. 2 sess. pp. 246-7.

~1851, Dec. 3. Congress (House): Bill to Amend Act of 1807.~

Mr. Giddings gave notice of a bill to repeal §§ 9 and 10 of the act to prohibit the importation of slaves, etc. from and after Jan. 1, 1808. _House Journal_, 32 Cong. 1 sess. p. 42. Cf. _Ibid._, 33 Cong. 1 sess. p. 147.

~1852, Feb. 5. Alabama: Illegal Importations.~

By code approved on this date:--

§§ 2058-2062. If slaves have been imported contrary to law, they are to be sold, and one fourth paid to the agent or informer and the residue to the treasury. An agent is to be appointed to take charge of such slaves, who is to give bond. Pending controversy, he may hire the slaves out. Ormond, _Code of Alabama_, pp. 392-3.

~1853, March 3. Congress (Senate): Appropriation Proposed.~

A bill making appropriations for the naval service for the year ending June 30, 1854. Mr. Underwood offered the following amendment:--

"For executing the provisions of the act approved 3d of March, 1819, entitled 'An act in addition to the acts prohibiting the slave trade,' $20,000." Amendment agreed to, and bill passed. It appears, however, to have been subsequently amended in the House, and the appropriation does not stand in the final act. _Congressional Globe_, 32 Cong. 2 sess. p. 1072; _Statutes at Large_, X. 214.

~1854, May 22. Congress (Senate): West India Slave-Trade.~

Mr. Clayton presented the following resolution, which was unanimously agreed to:--

"_Resolved_, That the Committee on Foreign Relations be instructed to inquire into the expediency of providing by law for such restrictions on the power of American consuls residing in the Spanish West India islands to issue sea letters on the transfer of American vessels in those islands, as will prevent the abuse of the American flag in protecting persons engaged in the African slave trade." June 26, 1854, this committee reported "a bill (Senate, No. 416) for the more effectual suppression of the slave-trade in American built vessels." Passed Senate, postponed in House. _Senate Journal_, 33 Cong. 1 sess. pp. 404, 457-8, 472-3, 476; _House Journal_, 33 Cong. 1 sess. pp. 1093, 1332-3; _Congressional Globe_, 33 Cong. 1 sess. pp. 1257-61, 1511-3, 1591-3, 2139.

~1854, May 29. Congress (Senate): Treaty of Washington.~

Resolved, "that, in the opinion of the Senate, it is expedient, and in conformity with the interests and sound policy of the United States, that the eighth article of the treaty between this government and Great Britain, of the 9th of August, 1842, should be abrogated." Introduced by Slidell, and favorably reported from Committee on Foreign Relations in Executive Session, June 13, 1854. _Senate Journal_, 34 Cong. 1-2 sess. pp. 396, 695-8; _Senate Reports_, 34 Cong. 1 sess. I. No. 195.

~1854, June 21. Congress (Senate): Bill Regulating Navigation.~

"Mr. Seward asked and obtained leave to bring in a bill (Senate, No. 407) to regulate navigation to the coast of Africa in vessels owned by citizens of the United States, in certain cases; which was read and passed to a second reading." June 22, ordered to be printed. _Senate Journal_, 33 Cong. 1 sess. pp. 448, 451; _Congressional Globe_, 33 Cong. 1 sess. pp. 1456, 1461, 1472.

~1854, June 26. Congress (Senate): Bill to Suppress Slave-Trade.~

"A bill for the more effectual suppression of the slave trade in American built vessels." See references to May 22, 1854, above.

~1856, June 23. Congress (House): Proposition to Amend Act of 1818.~

Notice given of a bill to amend the Act of April 20, 1818. _House Journal_, 34 Cong. 1 sess. II. 1101.

~1856, Aug. 18. United States Statute: Appropriation.~

To carry out the Act of March 3, 1819, and subsequent acts, $8,000. _Statutes at Large_, XI. 90.

~1856, Nov. 24. South Carolina: Governor's Message.~

Governor Adams, in his annual message to the legislature, said:--

"It is apprehended that the opening of this trade [_i.e._, the slave-trade] will lessen the value of slaves, and ultimately destroy the institution. It is a sufficient answer to point to the fact, that unrestricted immigration has not diminished the value of labor in the Northwestern section of the confederacy. The cry there is, want of labor, notwithstanding capital has the pauperism of the old world to press into its grinding service. If we cannot supply the demand for slave labor, then we must expect to be supplied with a species of labor we do not want, and which is, from the very nature of things, antagonistic to our institutions. It is much better that our drays should be driven by slaves--that our factories should be worked by slaves--that our hotels should be served by slaves--that our locomotives should be manned by slaves, than that we should be exposed to the introduction, from any quarter, of a population alien to us by birth, training, and education, and which, in the process of time, must lead to that conflict between capital and labor, 'which makes it so difficult to maintain free institutions in all wealthy and highly civilized nations where such institutions as ours do not exist.' In all slaveholding States, true policy dictates that the superior race should direct, and the inferior perform all menial service. Competition between the white and black man for this service, may not disturb Northern sensibility, but it does not exactly suit our latitude." _South Carolina House Journal_, 1856, p. 36; Cluskey, _Political Text-Book_, 14 edition, p. 585.

~1856, Dec. 15. Congress (House): Reopening of Slave-Trade.~

"_Resolved_, That this House of Representatives regards all suggestions and propositions of every kind, by whomsoever made, for a revival of the African slave trade, as shocking to the moral sentiment of the enlightened portion of mankind; and that any action on the part of Congress conniving at or legalizing that horrid and inhuman traffic would justly subject the government and citizens of the United States to the reproach and execration of all civilized and Christian people throughout the world." Offered by Mr. Etheridge; agreed to, 152 to 57. _House Journal_, 34 Cong. 3 sess. pp. 105-11; _Congressional Globe_, 34 Cong. 3 sess. pp. 123-5, and Appendix, pp. 364-70.

~1856, Dec. 15. Congress (House): Reopening of Slave-Trade.~

"_Resolved_, That it is inexpedient to repeal the laws prohibiting the African slave trade." Offered by Mr. Orr; not voted upon. _Congressional Globe_, 34 Cong. 3 sess. p. 123.

~1856, Dec. 15. Congress (House): Reopening of Slave-Trade.~

"_Resolved_, That it is inexpedient, unwise, and contrary to the settled policy of the United States, to repeal the laws prohibiting the African slave trade." Offered by Mr. Orr; agreed to, 183 to 8. _House Journal_, 34 Cong. 3 sess. pp. 111-3; _Congressional Globe_, 34 Cong. 3 sess. pp. 125-6.

~1856, Dec. 15. Congress (House): Reopening of Slave-Trade.~

"_Resolved_, That the House of Representatives, expressing, as they believe, public opinion both North and South, are utterly opposed to the reopening of the slave trade." Offered by Mr. Boyce; not voted upon. _Congressional Globe_, 34 Cong. 3 sess. p. 125.

~1857. South Carolina: Report of Legislative Committee.~

Special committee of seven on the slave-trade clause in the Governor's message report: majority report of six members, favoring the reopening of the African slave-trade; minority report of Pettigrew, opposing it. _Report of the Special Committee_, etc., published in 1857.

~1857, March 3. United States Statute: Appropriation.~

To carry out the Act of March 3, 1819, and subsequent acts, $8,000. _Statutes at Large_, XI. 227; _House Journal_, 34 Cong. 3 sess. p. 397. Cf. _House Exec. Doc._, 34 Cong. 3 sess. IX. No. 70.

~1858, March (?). Louisiana: Bill to Import Africans.~

Passed House; lost in Senate by two votes. Cf. _Congressional Globe_, 35 Cong. 1 sess. p. 1362.

~1858, Dec. 6. President Buchanan's Message.~

"The truth is, that Cuba in its existing colonial condition, is a constant source of injury and annoyance to the American people. It is the only spot in the civilized world where the African slave trade is tolerated; and we are bound by treaty with Great Britain to maintain a naval force on the coast of Africa, at much expense both of life and treasure, solely for the purpose of arresting slavers bound to that island. The late serious difficulties between the United States and Great Britain respecting the right of search, now so happily terminated, could never have arisen if Cuba had not afforded a market for slaves. As long as this market shall remain open, there can be no hope for the civilization of benighted Africa....

"It has been made known to the world by my predecessors that the United States have, on several occasions, endeavored to acquire Cuba from Spain by honorable negotiation. If this were accomplished, the last relic of the African slave trade would instantly disappear. We would not, if we could, acquire Cuba in any other manner. This is due to our national character.... This course we shall ever pursue, unless circumstances should occur, which we do not now anticipate, rendering a departure from it clearly justifiable, under the imperative and overruling law of self-preservation." _House Exec. Doc._, 35 Cong. 2 sess. II. No. 2, pp. 14-5. See also _Ibid._, pp. 31-3.

~1858, Dec. 23. Congress (House): Resolution on Slave-Trade.~

On motion of Mr. Farnsworth,

"_Resolved_, That the Committee on Naval Affairs be requested to inquire and report to this House if any, and what, further legislation is necessary on the part of the United States to fully carry out and perform the stipulations contained in the eighth article of the treaty with Great Britain (known as the 'Ashburton treaty') for the suppression of the slave trade." _House Journal_, 35 Cong. 2 sess. pp. 115-6.

~1859, Jan. 5. Congress (Senate): Resolution on Slave-Trade.~

On motion of Mr. Seward, Dec. 21, 1858,

"_Resolved_, That the Committee on the Judiciary inquire whether any amendments to existing laws ought to be made for the suppression of the African slave trade." _Senate Journal_, 35 Cong. 2 sess. pp. 80, 108, 115.

~1859, Jan. 13. Congress (Senate): Bill on Slave-Trade.~

Mr. Seward introduced "a bill (Senate, No. 510) in addition to the acts which prohibit the slave trade." Referred to committee, reported, and dropped. _Ibid._, pp. 134, 321.

~1859, Jan. 31. Congress (House): Reopening of Slave-Trade.~

"Mr. Kilgore moved that the rules be suspended, so as to enable him to submit the following preamble and resolutions, viz:

"Whereas the laws prohibiting the African slave trade have become a topic of discussion with newspaper writers and political agitators, many of them boldly denouncing these laws as unwise in policy and disgraceful in their provisions, and insisting on the justice and propriety of their repeal, and the revival of the odious traffic in African slaves; and whereas recent demonstrations afford strong reasons to apprehend that said laws are to be set at defiance, and their violation openly countenanced and encouraged by a portion of the citizens of some of the States of this Union; and whereas it is proper in view of said facts that the sentiments of the people's representatives in Congress should be made public in relation thereto: Therefore--

"_Resolved_, That while we recognize no right on the part of the federal government, or any other law-making power, save that of the States wherein it exists, to interfere with or disturb the institution of domestic slavery where it is established or protected by State legislation, we do hold that Congress has power to prohibit the foreign traffic, and that no legislation can be too thorough in its measures, nor can any penalty known to the catalogue of modern punishment for crime be too severe against a traffic so inhuman and unchristian.

"_Resolved_, That the laws in force against said traffic are founded upon the broadest principles of philanthropy, religion, and humanity; that they should remain unchanged, except so far as legislation may be needed to render them more efficient; that they should be faithfully and promptly executed by our government, and respected by all good citizens.

"_Resolved_, That the Executive should be sustained and commended for any proper efforts whenever and wherever made to enforce said laws, and to bring to speedy punishment the wicked violators thereof, and all their aiders and abettors."

Failed of the two-thirds vote necessary to suspend the rules--the vote being 115 to 84--and was dropped. _House Journal_, 35 Cong. 2 sess. pp. 298-9.

~1859, March 3. United States Statute: Appropriation.~

To carry out the Act of March 3, 1819, and subsequent acts, and to pay expenses already incurred, $75,000. _Statutes at Large_, XI. 404.

~1859, Dec. 19. President Buchanan's Message.~

"All lawful means at my command have been employed, and shall continue to be employed, to execute the laws against the African slave trade. After a most careful and rigorous examination of our coasts, and a thorough investigation of the subject, we have not been able to discover that any slaves have been imported into the United States except the cargo by the Wanderer, numbering between three and four hundred. Those engaged in this unlawful enterprise have been rigorously prosecuted, but not with as much success as their crimes have deserved. A number of them are still under prosecution. [Here follows a history of our slave-trade legislation.]

"These acts of Congress, it is believed, have, with very rare and insignificant exceptions, accomplished their purpose. For a period of more than half a century there has been no perceptible addition to the number of our domestic slaves.... Reopen the trade, and it would be difficult to determine whether the effect would be more deleterious on the interests of the master, or on those of the native born slave, ..." _Senate Exec. Doc._, 36 Cong. 1 sess. I. No. 2, pp. 5-8.

~1860, March 20. Congress (Senate): Proposed Resolution.~

"Mr. Wilson submitted the following resolution; which was considered, by unanimous consent, and agreed to:--

"_Resolved_, That the Committee on the Judiciary be instructed to inquire into the expediency of so amending the laws of the United States in relation to the suppression of the African slave trade as to provide a penalty of imprisonment for life for a participation in such trade, instead of the penalty of forfeiture of life, as now provided; and also an amendment of such laws as will include in the punishment for said offense all persons who fit out or are in any way connected with or interested in fitting out expeditions or vessels for the purpose of engaging in such slave trade." _Senate Journal_, 36 Cong. 1 sess. p. 274.

~1860, March 20. Congress (Senate): Right of Search.~

"Mr. Wilson asked, and by unanimous consent obtained, leave to bring in a joint resolution (Senate, No. 20) to secure the right of search on the coast of Africa, for the more effectual suppression of the African slave trade." Read twice, and referred to Committee on Foreign Relations. _Ibid._

~1860, March 20. Congress (Senate): Steam Vessels for Slave-Trade.~

"Mr. Wilson asked, and by unanimous consent obtained, leave to bring in a bill (Senate, No. 296) for the construction of five steam screw sloops-of-war, for service on the African coast." Read twice, and referred to Committee on Naval Affairs; May 23, reported with an amendment. _Ibid._, pp. 274, 494-5.

~1860 March 26. Congress (House): Proposed Resolutions.~

"Mr. Morse submitted ... the following resolutions; which were read and committed to the Committee of the Whole House on the state of the Union, viz:

"_Resolved_, That for the more effectual suppression of the African slave trade the treaty of 1842 ..., requiring each country to keep _eighty_ guns on the coast of Africa for that purpose, should be so changed as to require a specified and sufficient number of small

steamers and fast sailing brigs or schooners to be kept on said coast....

"_Resolved_, That as the African slave trade appears to be rapidly increasing, some effective mode of identifying the nationality of a vessel on the coast of Africa suspected of being in the slave trade or of wearing false colors should be immediately adopted and carried into effect by the leading maritime nations of the earth; and that the government of the United States has thus far, by refusing to aid in establishing such a system, shown a strange neglect of one of the best means of suppressing said trade.

"_Resolved_, That the African slave trade is against the moral sentiment of mankind and a crime against human nature; and that as the most highly civilized nations have made it a criminal offence or piracy under their own municipal laws, it ought at once and without hesitation to be declared a crime by the code of international law; and that ... the President be requested to open negotiations on this subject with the leading powers of Europe." ... _House Journal_, 36 Cong. 1 sess. I. 588-9.

~1860, April 16. Congress (Senate): Bill on Slave-Trade.~

"Mr. Wilson asked, and by unanimous consent obtained, leave to bring in a bill (Senate, No. 408) for the more effectual suppression of the slave trade." Bill read twice, and ordered to lie on the table; May 21, referred to Committee on the Judiciary, and printed. _Senate Journal_, 36 Cong. 1 sess. pp. 394, 485; _Congressional Globe_, 36 Cong. 1 sess. pp. 1721, 2207-11.

~1860, May 21. Congress (House): Buyers of Imported Negroes.~

"Mr. Wells submitted the following resolution, and debate arising thereon, it lies over under the rule, viz:

"_Resolved_, That the Committee on the Judiciary be instructed to report forthwith a bill providing that any person purchasing any negro or other person imported into this country in violation of the laws for suppressing the slave trade, shall not by reason of said purchase acquire any title to said negro or person; and where such purchase is made with a knowledge that such negro or other person has been so imported, shall forfeit not less than one thousand dollars, and be punished by imprisonment for a term not less than six months." _House Journal_, 36 Cong. 1 sess. II. 880.

~1860, May 26. United States Statute: Appropriation.~

To carry out the Act of March 3, 1819, and subsequent acts, $40,000. _Statutes at Large_, XII. 21.

~1860, June 16. United States Statute: Additional Act to Act of 1819.~

"An Act to amend an Act entitled 'An Act in addition to the Acts Prohibiting the Slave Trade.'" _Ibid._, XII. 40-1; _Senate Journal_, 36 Cong. 1 sess., Senate Bill No. 464.

~1860, July 11. Great Britain: Proposed Co-operation.~

Lord John Russell suggested for the suppression of the trade:--

"1st. A systematic plan of cruising on the coast of Cuba by the vessels of Great Britain, Spain, and the United States.

"2d. Laws of registration and inspection in the Island of Cuba, by which the employment of slaves, imported contrary to law, might be detected by the Spanish authorities.

"3d. A plan of emigration from China, regulated by the agents of European nations, in conjunction with the Chinese authorities." President Buchanan refused to co-operate on this plan. _House Exec. Doc._, 36 Cong. 2 sess. IV. No. 7, pp. 441-3, 446-8.

~1860, Dec. 3. President Buchanan's Message.~

"It is with great satisfaction I communicate the fact that since the date of my last annual message not a single slave has been imported into the United States in violation of the laws prohibiting the African slave trade. This statement is founded upon a thorough examination and investigation of the subject. Indeed, the spirit which prevailed some time since among a portion of our fellow-citizens in favor of this trade seems to have entirely subsided." _Senate Exec. Doc._, 36 Cong. 2 sess. I. No. 1, p. 24.

~1860, Dec. 12. Congress (House): Proposition to Amend Constitution.~

Mr. John Cochrane's resolution:--

"The migration or importation of slaves into the United States or any of the Territories thereof, from any foreign country, is hereby prohibited." _House Journal_, 36 Cong. 2 sess. pp. 61-2; _Congressional Globe_, 36 Cong. 2 sess. p. 77.

~1860, Dec. 24. Congress (Senate): Bill on Slave-Trade.~

"Mr. Wilson asked, and by unanimous consent obtained, leave to bring in a bill (Senate, No. 529) for the more effectual suppression of the slave trade." Read twice, and referred to Committee on the Judiciary; not mentioned again. _Senate Journal_, 36 Cong. 2 sess. p. 62; _Congressional Globe_, 36 Cong. 2 sess. p. 182.

~1861, Jan. 7. Congress (House): Proposition to Amend Constitution.~

Mr. Etheridge's resolution:--

§ 5. "The migration or importation of persons held to service or labor for life, or a term of years, into any of the States, or the Territories belonging to the United States, is perpetually prohibited; and Congress shall pass all laws necessary to make said prohibition effective." _Congressional Globe_, 36 Cong. 2 sess. p. 279.

~1861, Jan. 23. Congress (House): Proposition to Amend Constitution.~

Resolution of Mr. Morris of Pennsylvania:--"Neither Congress nor a Territorial Legislature shall make any law respecting slavery or involuntary servitude, except as a punishment for crime; but Congress may pass laws for the suppression of the African slave trade, and the rendition of fugitives from service or labor in the States." Mr. Morris asked to have it printed, that he might at the proper time move it as an amendment to the report of the select committee of thirty-three. It was ordered to be printed. _Ibid._, p. 527.

~1861, Feb. 1. Congress (House): Proposition to Amend Constitution.~

Resolution of Mr. Kellogg of Illinois:--

§ 16. "The migration or importation of persons held to service or involuntary servitude into any State, Territory, or place within the United States, from any place or country beyond the limits of the United States or Territories thereof, is forever prohibited." Considered Feb. 27, 1861, and lost. _Ibid._, pp. 690, 1243, 1259-60.

~1861, Feb. 8. Confederate States of America: Importation Prohibited.~

Constitution for the Provisional Government of the Confederate States of America, Article I. Section 7:--

"1. The importation of African negroes from any foreign country other than the slave-holding States of the United States, is hereby forbidden; and Congress are required to pass such laws as shall effectually prevent the same.

"2. The Congress shall also have power to prohibit the introduction of slaves from any State not a member of this Confederacy." March 11, 1861, this article was placed in the permanent Constitution. The first line was changed so as to read "negroes of the African race." _C.S.A. Statutes at Large, 1861-2_, pp. 3, 15.

~1861, Feb. 9. Confederate States of America: Statutory Prohibition.~

"_Be it enacted by the Confederate States of America in Congress assembled_, That all the laws of the United States of America in force and in use in the Confederate States of America on the first day of November last, and not inconsistent with the Constitution of the Confederate States, be and the same are hereby continued in force until altered or repealed by the Congress." _Ibid._, p. 27.

~1861, Feb. 19. United States Statute: Appropriation.~

To supply deficiencies in the fund hitherto appropriated to carry out the Act of March 3, 1819, and subsequent acts, $900,000. _Statutes at Large_, XII. 132.

~1861, March 2. United States Statute: Appropriation.~

To carry out the Act of March 3, 1819, and subsequent acts, and to provide compensation for district attorneys and marshals, $900,000. _Ibid._, XII. 218-9.

~1861, Dec. 3. President Lincoln's Message.~

"The execution of the laws for the suppression of the African slave trade has been confided to the Department of the Interior. It is a subject of gratulation that the efforts which have been made for the suppression of this inhuman traffic have been recently attended with unusual success. Five vessels being fitted out for the slave trade have been seized and condemned. Two mates of vessels engaged in the trade, and one person in equipping a vessel as a slaver, have been convicted and subjected to the penalty of fine and imprisonment, and one captain, taken with a cargo of Africans on board his vessel, has been convicted of the highest grade of offence under our laws, the punishment of which is death." _Senate Exec. Doc._, 37 Cong. 2 sess. I. No. 1, p. 13.

~1862, Jan. 27. Congress (Senate): Bill on Slave-Trade.~

"Agreeably to notice Mr. Wilson, of Massachusetts, asked and obtained leave to bring in a bill (Senate, No. 173), for the more effectual suppression of the slave trade." Read twice, and referred to Committee on the Judiciary; Feb. 11, 1863, reported adversely, and postponed indefinitely. _Senate Journal_, 37 Cong. 2 sess. p. 143; 37 Cong. 3 sess. pp. 231-2.

~1862, March 14. United States Statute: Appropriation.~

For compensation to United States marshals, district attorneys, etc., for services in the suppression of the slave-trade, so much of the appropriation of March 2, 1861, as may be expedient and proper, not exceeding in all $10,000. _Statutes at Large_, XII. 368-9.

~1862, March 25. United States Statute: Prize Law.~

"An Act to facilitate Judicial Proceedings in Adjudications upon Captured Property, and for the better Administration of the Law of Prize." Applied to captures under the slave-trade law. _Ibid._, XII. 374-5; _Congressional Globe_, 37 Cong. 2 sess., Appendix, pp. 346-7.

~1862, June 7. Great Britain: Treaty of 1862.~

"Treaty for the suppression of the African slave trade. Concluded at Washington April 7, 1862; ratifications exchanged at London May 20, 1862; proclaimed June 7, 1862." Ratified unanimously by the Senate. _U.S. Treaties and Conventions_ (1889), pp. 454-66. See also _Senate Exec. Journal_, XII. pp. 230, 231, 240, 254, 391, 400, 403.

~1862, July 11. United States Statute: Treaty of 1862 Carried into Effect.~

"An Act to carry into Effect the Treaty between the United States and her Britannic Majesty for the Suppression of the African Slave-Trade." _Statutes at Large_, XII. 531; _Senate Journal_ and _House Journal_, 37 Cong. 2 sess., Senate Bill No. 352.

~1862, July 17. United States Statute: Former Acts Amended.~

"An Act to amend an Act entitled 'An Act to amend an Act entitled "An Act in Addition to the Acts prohibiting the Slave Trade."'" _Statutes at Large_, XII. 592-3; _Senate Journal_ and _House Journal_, 37 Cong. 2 sess., Senate Bill No. 385.

~1863, Feb. 4. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $17,000. _Statutes at Large_, XII. 639.

~1863, March 3. Congress: Joint Resolution.~

"Joint Resolution respecting the Compensation of the Judges and so forth, under the Treaty with Great Britain and other Persons employed in the Suppression of the Slave Trade." _Statutes at Large_, XII. 829.

~1863, April 22. Great Britain: Treaty of 1862 Amended.~

"Additional article to the treaty for the suppression of the African slave trade of April 7, 1862." Concluded February 17, 1863; ratifications exchanged at London April 1, 1863; proclaimed April 22, 1863.

Right of Search extended. _U.S. Treaties and Conventions_ (1889), pp. 466-7.

~1863, Dec. 17. Congress (House): Resolution on Coastwise Slave-Trade.~

Mr. Julian introduced a bill to repeal portions of the Act of March 2, 1807, relative to the coastwise slave-trade. Read twice, and referred to Committee on the Judiciary. _Congressional Globe_, 38 Cong. 1 sess. p. 46.

~1864, July 2. United States Statute: Coastwise Slave-Trade Prohibited Forever.~

§ 9 of Appropriation Act repeals §§ 8 and 9 of Act of 1807. _Statutes at Large_, XIII. 353.

~1864, Dec. 7. Great Britain: International Proposition.~

"The crime of trading in human beings has been for many years branded by the reprobation of all civilized nations. Still the atrocious traffic subsists, and many persons flourish on the gains they have derived from that polluted source.

"Her Majesty's government, contemplating, on the one hand, with satisfaction the unanimous abhorrence which the crime inspires, and, on the other hand, with pain and disgust the slave-trading speculations which still subist [_sic_], have come to the conclusion that no measure would be so effectual to put a stop to these wicked acts as the punishment of all persons who can be proved to be guilty of carrying slaves across the sea. Her Majesty's government, therefore, invite the government of the United States to consider whether it would not be practicable, honorable, and humane--

"1st. To make a general declaration, that the governments who are parties to it denounce the slave trade as piracy.

"2d. That the aforesaid governments should propose to their legislatures to affix the penalties of piracy already existing in their laws--provided, only, that the penalty in this case be that of death--to all persons, being subjects or citizens of one of the contracting powers, who shall be convicted in a court which takes cognizance of piracy, of being concerned in carrying human beings across the sea for the purpose of sale, or for the purpose of serving as slaves, in any country or colony in the world." Signed, "RUSSELL."

Similar letters were addressed to France, Spain, Portugal, Austria, Prussia, Italy, Netherlands, and Russia. _Diplomatic Correspondence_, 1865, pt. ii. pp. 4, 58-9, etc.

~1865, Jan. 24. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $17,000. _Statutes at Large_, XIII. 424.

~1866, April 7. United States Statute: Compensation to Marshals, etc.~

For additional compensation to United States marshals, district attorneys, etc., for services in the suppression of the slave-trade, so much of the appropriation of March 2, 1861, as may be expedient and proper, not exceeding in all $10,000; and also so much as may be necessary to pay the salaries of judges and the expenses of mixed courts. _Ibid._, XIV. 23.

~1866, July 25. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $17,000. _Ibid._, XIV. 226.

~1867, Feb. 28. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $17,000. _Ibid._, XIV. 414-5.

~1868, March 30. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $12,500. _Ibid._, XV. 58.

~1869, Jan. 6. Congress (House): Abrogation of Treaty of 1862.~

Mr. Kelsey asked unanimous consent to introduce the following resolution:--

"Whereas the slave trade has been practically suppressed; and whereas by our treaty with Great Britain for the suppression of the slave trade large appropriations are annually required to carry out the provisions thereof: Therefore,

"_Resolved_, That the Committee on Foreign Affairs are hereby instructed to inquire into the expediency of taking proper steps to secure the abrogation or modification of the treaty with Great Britain for the suppression of the slave trade." Mr. Arnell objected. _Congressional Globe_, 40 Cong. 3 sess. p. 224.

~1869, March 3. United States Statute: Appropriation.~

To carry out the treaty with Great Britain, proclaimed July 11, 1862, $12,500; provided that the salaries of judges be paid only on condition that they reside where the courts are held, and that Great Britain be asked to consent to abolish mixed courts. _Statutes at Large_, XV. 321.

~1870, April 22. Congress (Senate): Bill to Repeal Act of 1803.~

Senate Bill No. 251, to repeal an act entitled "An act to prevent the importation of certain persons into certain States where by the laws thereof their admission is prohibited." Mr. Sumner said that the bill had passed the Senate once, and that he hoped it would now pass. Passed; title amended by adding "approved February 28, 1803;" June 29, bill passed over in House; July 14, consideration again postponed on Mr. Woodward's objection. _Congressional Globe_, 41 Cong. 2 sess. pp. 2894, 2932, 4953, 5594.

~1870, Sept. 16. Great Britain: Additional Treaty.~

"Additional convention to the treaty of April 7, 1862, respecting the African slave trade." Concluded June 3, 1870; ratifications exchanged at London August 10, 1870; proclaimed September 16, 1870. _U.S. Treaties and Conventions_ (1889), pp. 472-6.

~1871, Dec. 11. Congress (House): Bill on Slave-Trade.~

On the call of States, Mr. Banks introduced "a bill (House, No. 490) to carry into effect article thirteen of the Constitution of the United States, and to prohibit the owning or dealing in slaves by American citizens in foreign countries." _House Journal_, 42 Cong. 2 sess. p. 48.

APPENDIX C.

TYPICAL CASES OF VESSELS ENGAGED IN THE AMERICAN SLAVE-TRADE. 1619-1864.

This chronological list of certain typical American slavers is not intended to catalogue all known cases, but is designed merely to illustrate, by a few selected examples, the character of the licit and the illicit traffic to the United States.

~1619.~ ----. Dutch man-of-war, imports twenty Negroes into Virginia, the first slaves brought to the continent. Smith, _Generall Historie of Virginia_ (1626 and 1632), p. 126.

~1645.~ ~Rainbowe,~ under Captain Smith, captures and imports African slaves into Massachusetts. The slaves were forfeited and returned. _Massachusetts Colonial Records_, II. 115, 129, 136, 168, 176; III. 13, 46, 49, 58, 84.

~1655.~ ~Witte paert,~ first vessel to import slaves into New York. O'Callaghan, _Laws of New Netherland_ (ed. 1868), p. 191, note.

~1736, Oct.~ ----. Rhode Island slaver, under Capt. John Griffen. _American Historical Record_, I. 312.

~1746.~ ----. Spanish vessel, with certain free Negroes, captured by Captains John Dennis and Robert Morris, and Negroes sold by them in Rhode Island, Massachusetts, and New York; these Negroes afterward returned to Spanish colonies by the authorities of Rhode Island. _Rhode Island Colonial Records_, V. 170, 176-7; Dawson's _Historical Magazine_, XVIII. 98.

~1752.~ ~Sanderson,~ of Newport, trading to Africa and West Indies. _American Historical Record_, I. 315-9, 338-42. Cf. above, p. 35, note 4.

~1788~ (_circa_). ----. "One or two" vessels fitted out in Connecticut. W.C. Fowler, _Historical Status of the Negro in Connecticut_, in _Local Law_, etc., p. 125.

~1801.~ ~Sally,~ of Norfolk, Virginia, equipped slaver; libelled and acquitted; owners claimed damages. _American State Papers, Commerce and Navigation_, I. No. 128.

~1803~ (?). ----. Two slavers seized with slaves, and brought to Philadelphia; both condemned, and slaves apprenticed. Robert Sutcliff, _Travels in North America_, p. 219.

~1804.~ ----. Slaver, allowed by Governor Claiborne to land fifty Negroes in Louisiana. _American State Papers, Miscellaneous_, I. No. 177.

~1814.~ ~Saucy Jack~ carries off slaves from Africa and attacks British cruiser. _House Reports_, 17 Cong. 1 sess. II. No. 92, p. 46; 21 Cong. 1 sess. III. No. 348, p. 147.

~1816~ (_circa_). ~Paz,~ ~Rosa,~ ~Dolores,~ ~Nueva Paz,~ and ~Dorset,~ American slavers in Spanish-African trade. Many of these were formerly privateers. _Ibid._, 17 Cong. 1 sess. II. No. 92, pp. 45-6; 21 Cong. 1 sess. III. No. 348, pp. 144-7.

~1817, Jan. 17.~ ~Eugene,~ armed Mexican schooner, captured while attempting to smuggle slaves into the United States. _House Doc._, 15 Cong. 1 sess. II. No. 12, p. 22.

~1817, Nov. 19.~ ~Tentativa,~ captured with 128 slaves and brought into Savannah. _Ibid._, p. 38; _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 81. See _Friends' View of the African Slave Trade_ (1824), pp. 44-7.

~1818.~ ----. Three schooners unload slaves in Louisiana. Collector Chew to the Secretary of the Treasury, _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 70.

~1818, Jan. 23.~ English brig ~Neptune,~ detained by U.S.S. John Adams, for smuggling slaves into the United States. _House Doc._, 16 Cong. 1 sess. III. No. 36 (3).

~1818, June.~ ~Constitution,~ captured with 84 slaves on the Florida coast, by a United States army officer. See references under 1818, June, below.

~1818, June.~ ~Louisa~ and ~Merino,~ captured slavers, smuggling from Cuba to the United States; condemned after five years' litigation. _House Doc._, 15 Cong. 2 sess. VI. No. 107; 19 Cong. 1 sess. VI.-IX. Nos. 121, 126, 152, 163; _House Reports_, 19 Cong. 1 sess. II. No. 231; _American State Papers, Naval Affairs_, II. No. 308; Decisions of the United States Supreme Court in _9 Wheaton_, 391.

~1819.~ ~Antelope,~ or ~General Ramirez.~ The Colombia (or Arraganta), a Venezuelan privateer, fitted in the United States and manned by Americans, captures slaves from a Spanish slaver, the Antelope, and from other slavers; is wrecked, and transfers crew and slaves to Antelope; the latter, under the name of the General Ramirez, is captured with 280 slaves by a United States ship. The slaves were distributed, some to Spanish claimants, some sent to Africa, and some allowed to remain; many died. _House Reports_, 17 Cong. 1 sess. II. No. 92, pp. 5, 15; 21 Cong. 1 sess. III. No. 348, p. 186; _House Journal_, 20 Cong. 1 sess. pp. 59, 76, 123 to 692, _passim_. Gales and Seaton, _Register of Debates_, IV. pt. 1, pp. 915-6, 955-68, 998, 1005; _Ibid._, pt. 2, pp. 2501-3; _American State Papers, Naval Affairs_, II. No. 319, pp. 750-60; Decisions of the United States Supreme Court in _10 Wheaton_, 66, and _12 Ibid._, 546.

~1820.~ ~Endymion,~ ~Plattsburg,~ ~Science,~ ~Esperanza,~ and ~Alexander,~ captured on the African coast by United States ships, and sent to New York and Boston. _House Reports_, 17 Cong. 1 sess. II. No. 92, pp. 6, 15; 21 Cong. 1 sess. III. No. 348, pp. 122, 144, 187.

~1820.~ ~General Artigas~ imports twelve slaves into the United States. _Friends' View of the African Slave Trade_ (1824), p. 42.

~1821~ (?). ~Dolphin,~ captured by United States officers and sent to Charleston, South Carolina. _Ibid._, pp. 31-2.

~1821.~ ~La Jeune Eugène,~ ~La Daphnée,~ ~La Mathilde,~ and ~L'Elize,~ captured by U.S.S. Alligator; ~La Jeune Eugène~ sent to Boston; the rest escape, and are recaptured under the French flag; the French protest. _House Reports_, 21 Cong. 1 sess. III. No. 348, p. 187; _Friends' View of the African Slave Trade_ (1824), pp. 35-41.

~1821.~ ~La Pensée,~ captured with 220 slaves by the U.S.S. Hornet; taken to Louisiana. _House Reports_, 17 Cong. 1 sess. II. No. 92, p. 5; 21 Cong. 1 sess. III. No. 348, p. 186.

~1821.~ ~Esencia~ lands 113 Negroes at Matanzas. _Parliamentary Papers_, 1822, Vol. XXII., _Slave Trade, Further Papers_, III. p. 78.

~1826.~ ~Fell's Point~ attempts to land Negroes in the United States. The Negroes were seized. _American State Papers, Naval Affairs_, II. No. 319, p. 751.

~1827, Dec. 20.~ ~Guerrero,~ Spanish slaver, chased by British, cruiser and grounded on Key West, with 561 slaves; a part (121) were landed at Key West, where they were seized by the collector; 250 were seized by the Spanish and taken to Cuba, etc. _House Journal_, 20 Cong. 1 sess. p. 650; _House_ _Reports_, 24 Cong. 1 sess. I. No. 268; 25 Cong. 2 sess. I. No. 4; _American State Papers, Naval Affairs_, III. No. 370, p. 210; _Niles's Register_, XXXIII. 373.

~1828, March 11.~ ~General Geddes~ brought into St. Augustine for safe keeping 117 slaves, said to have been those taken from the wrecked ~Guerrero~ and landed at Key West (see above, 1827). _House Doc._, 20 Cong. 1 sess. VI. No. 262.

~1828.~ ~Blue-eyed Mary,~ of Baltimore, sold to Spaniards and captured with 405 slaves by a British cruiser. _Niles's Register_, XXXIV. 346.

~1830, June 4.~ ~Fenix,~ with 82 Africans, captured by U.S.S. Grampus, and brought to Pensacola; American built, with Spanish colors. _House Doc._, 21 Cong. 2 sess. III. No. 54; _House Reports_, 24 Cong. 1 sess. I. No. 223; _Niles's Register_, XXXVIII. 357.

~1831, Jan. 3.~ ~Comet,~ carrying slaves from the District of Columbia to New Orleans, was wrecked on Bahama banks and 164 slaves taken to Nassau, in New Providence, where they were freed. Great Britain finally paid indemnity for these slaves. _Senate Doc._, 24 Cong. 2 sess. II. No. 174; 25 Cong. 3 sess. III. No. 216.

~1834, Feb. 4.~ ~Encomium,~ bound from Charleston, South Carolina, to New Orleans, with 45 slaves, was wrecked near Fish Key, Abaco, and slaves were carried to Nassau and freed. Great Britain eventually paid indemnity for these slaves. _Ibid._

~1835, March.~ ~Enterprise,~ carrying 78 slaves from the District of Columbia to Charleston, was compelled by rough weather to put into the port of Hamilton, West Indies, where the slaves were freed. Great Britain refused to pay for these, because, before they landed, slavery in the West Indies had been abolished. _Ibid._

~1836, Aug.-Sept.~ ~Emanuel,~ ~Dolores,~ ~Anaconda,~ and ~Viper,~ built in the United States, clear from Havana for Africa. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 4-6, 221.

~1837.~ ----. Eleven American slavers clear from Havana for Africa. _Ibid._, p. 221.

~1837.~ ~Washington,~ allowed to proceed to Africa by the American consul at Havana. _Ibid._, pp. 488-90, 715 ff; 27 Cong, 1 sess. No. 34, pp. 18-21.

~1838.~ ~Prova~ spends three months refitting in the harbor of Charleston, South Carolina; afterwards captured by the British, with 225 slaves. _Ibid._, pp. 121, 163-6.

~1838.~ ----. Nineteen American slavers clear from Havana for Africa. _House Doc._, 26 Cong. 2 sess. V. No. 115, p. 221.

~1838-9.~ ~Venus,~ American built, manned partly by Americans, owned by Spaniards. _Ibid._, pp. 20-2, 106, 124-5, 132, 144-5, 330-2, 475-9.

~1839.~ ~Morris Cooper,~ of Philadelphia, lands 485 Negroes in Cuba. _Niles's Register_, LVII. 192.

~1839.~ ~Edwin~ and ~George Crooks,~ slavers, boarded by British cruisers. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 12-4, 61-4.

~1839.~ ~Eagle,~ ~Clara,~ and ~Wyoming,~ with American and Spanish flags and papers and an American crew, captured by British cruisers, and brought to New York. The United States government declined to interfere in case of the ~Eagle~ and the ~Clara,~ and they were taken to Jamaica. The ~Wyoming~ was forfeited to the United States. _Ibid._, pp. 92-104, 109, 112, 118-9, 180-4; _Niles's Register_, LVI. 256; LVII. 128, 208.

~1839.~ ~Florida,~ protected from British cruisers by American papers. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 113-5.

~1839.~ ----. Five American slavers arrive at Havana from Africa, under American flags. _Ibid._, p. 192.

~1839.~ ----. Twenty-three American slavers clear from Havana. _Ibid._, pp. 190-1, 221.

~1839.~ ~Rebecca,~ part Spanish, condemned at Sierra Leone. _House Reports_, 27 Cong. 3 sess. III. No. 283, pp. 649-54, 675-84.

~1839.~ ~Douglas~ and ~Iago,~ American slavers, visited by British cruisers, for which the United States demanded indemnity. _Ibid._, pp. 542-65, 731-55; _Senate Doc._, 29 Cong. 1 sess. VIII. No. 377, pp. 39-45, 107-12, 116-24, 160-1, 181-2.

~1839, April 9.~ ~Susan,~ suspected slaver, boarded by the British. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 34-41.

~1839, July-Sept.~ ~Dolphin~ (or ~Constitução),~ ~Hound,~ ~Mary Cushing~ (or ~Sete de Avril~), with American and Spanish flags and papers. _Ibid._, pp. 28, 51-5, 109-10, 136, 234-8; _House Reports_, 27 Cong. 3 sess. III. No. 283, pp. 709-15.

~1839, Aug.~ ~L'Amistad,~ slaver, with fifty-three Negroes on board, who mutinied; the vessel was then captured by a United States vessel and brought into Connecticut; the Negroes were declared free. _House Doc._, 26 Cong. 1 sess. IV. No. 185; 27 Cong. 3 sess. V. No. 191; 28 Cong. 1 sess. IV. No. 83; _House Exec. Doc._, 32 Cong. 2 sess. III. No. 20; _House Reports_, 26 Cong. 2 sess. No. 51; 28 Cong. 1 sess. II. No. 426; 29 Cong. 1 sess. IV. No. 753; _Senate Doc._, 26 Cong. 2 sess. IV. No. 179; _Senate Exec. Doc._, 31 Cong. 2 sess. III. No. 29; 32 Cong. 2 sess. III. No. 19; _Senate Reports_, 31 Cong. 2 sess. No. 301; 32 Cong. 1 sess. I. No. 158; 35 Cong. 1 sess. I. No. 36; Decisions of the United States Supreme Court in _15 Peters_, 518; _Opinions of the Attorneys-General_, III. 484-92.

~1839, Sept.~ ~My Boy,~ of New Orleans, seized by a British cruiser, and condemned at Sierra Leone. _Niles's Register_, LVII. 353.

~1839, Sept. 23.~ ~Butterfly,~ of New Orleans, fitted as a slaver, and captured by a British cruiser on the coast of Africa. _House Doc._, 26 Cong. 2 sess. No. 115, pp. 191, 244-7; _Niles's Register_, LVII. 223.

~1839, Oct.~ ~Catharine,~ of Baltimore, captured on the African coast by a British cruiser, and brought by her to New York. _House Doc._, 26 Cong. 2 sess. V No. 115, pp. 191, 215, 239-44; _Niles's Register_, LVII. 119, 159.

~1839.~ ~Asp,~ ~Laura,~ and ~Mary Ann Cassard,~ foreign slavers sailing under the American flag. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 126-7, 209-18; _House Reports_, 27 Cong. 3 sess. III. No. 283, p. 688 ff.

~1839.~ ~Two Friends,~ of New Orleans, equipped slaver, with Spanish, Portuguese, and American flags. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 120, 160-2, 305.

~1839.~ ~Euphrates,~ of Baltimore, with American papers, seized by British cruisers as Spanish property. Before this she had been boarded fifteen times. _Ibid._, pp. 41-4; A.H. Foote, _Africa and the American Flag_, pp. 152-6.

~1839.~ ~Ontario,~ American slaver, "sold" to the Spanish on shipping a cargo of slaves. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 45-50.

~1839.~ ~Mary,~ of Philadelphia; case of a slaver whose nationality was disputed. _House Reports_, 27 Cong. 3 sess. III. No. 283, pp. 736-8; _Senate Doc._, 29 Cong. 1 sess. VIII. No. 377, pp. 19, 24-5.

~1840, March.~ ~Sarah Ann,~ of New Orleans, captured with fraudulent papers. _House Doc._, 26 Cong. 2 sess. V. No. 115, pp. 184-7.

~1840, June.~ ~Caballero,~ ~Hudson,~ and ~Crawford;~ the arrival of these American slavers was publicly billed in Cuba. _Ibid._, pp. 65-6.

~1840.~ ~Tigris,~ captured by British cruisers and sent to Boston for kidnapping. _House Reports_, 27 Cong. 3 sess. III. No. 283, pp. 724-9; _Senate Doc._, 29 Cong. 1 sess. VIII. No. 377, P. 94.

~1840.~ ~Jones,~ seized by the British. _Senate Doc._, 29 Cong. 1 sess. VIII. No. 377, pp. 131-2, 143-7, 148-60.

~1841, Nov. 7.~ ~Creole,~ of Richmond, Virginia, transporting slaves to New Orleans; the crew mutiny and take her to Nassau, British West Indies. The slaves were freed and Great Britain refused indemnity. _Senate Doc._, 27 Cong. 2 sess. II. No. 51 and III. No. 137.

~1841.~ ~Sophia,~ of New York, ships 750 slaves for Brazil. _House Doc._, 29 Cong. 1 sess. III. No. 43, pp. 3-8.

~1841.~ ~Pilgrim,~ of Portsmouth, N.H., ~Solon,~ of Baltimore, ~William Jones~ and ~Himmaleh,~ of New York, clear from Rio Janeiro for Africa. _Ibid._, pp. 8-12.

~1842, May.~ ~Illinois,~ of Gloucester, saved from search by the American flag; escaped under the Spanish flag, loaded with slaves. _Senate Doc._, 28 Cong. 2 sess. IX. No. 150, p. 72 ff.

~1842, June.~ ~Shakespeare,~ of Baltimore, with 430 slaves, captured by British cruisers. _Ibid._

~1843.~ ~Kentucky,~ of New York, trading to Brazil. _Ibid._, 30 Cong. 1 sess. IV. No. 28, pp. 71-8; _House Exec. Doc._, 30 Cong. 2 sess. VII. No. 61, p. 72 ff.

~1844.~ ~Enterprise,~ of Boston, transferred in Brazil for slave-trade. _Senate Exec. Doc._, 30 Cong. 1 sess. IV. No. 28, pp. 79-90.

~1844.~ ~Uncas,~ of New Orleans, protected by United States papers; allowed to clear, in spite of her evident character. _Ibid._, 28 Cong. 2 sess. IX. No. 150, pp. 106-14.

~1844.~ ~Sooy,~ of Newport, without papers, captured by the British sloop Racer, after landing 600 slaves on the coast of Brazil. _House Doc._, 28 Cong. 2 sess. IV. No. 148, pp. 4, 36-62.

~1844.~ ~Cyrus,~ of New Orleans, suspected slaver, captured by the British cruiser Alert. _Ibid._, pp. 3-41.

~1844-5.~ ----. Nineteen slavers from Beverly, Boston, Baltimore, Philadelphia, New York, Providence, and Portland, make twenty-two trips. _Ibid._, 30 Cong. 2 sess. VII. No. 61, pp. 219-20.

~1844-9.~ ----. Ninety-three slavers in Brazilian trade. _Senate Exec. Doc._, 31 Cong. 2 sess. II. No. 6, pp. 37-8.

~1845.~ ~Porpoise,~ trading to Brazil. _House Exec. Doc._, 30 Cong. 2 sess. VII. No. 61, pp. 111-56, 212-4.

~1845, May 14.~ ~Spitfire,~ of New Orleans, captured on the coast of Africa, and the captain indicted in Boston. A.H. Foote, _Africa and the American Flag_, pp. 240-1; _Niles's Register_, LXVIII. 192, 224, 248-9.

~1845-6.~ ~Patuxent,~ ~Pons,~ ~Robert Wilson,~ ~Merchant,~ and ~Panther,~ captured by Commodore Skinner. _House Exec. Doc._, 31 Cong. 1 sess. IX. No. 73.

~1847.~ ~Fame,~ of New London, Connecticut, lands 700 slaves in Brazil. _House Exec. Doc._, 30 Cong. 2 sess. VII. No. 61, pp. 5-6, 15-21.

~1847.~ ~Senator,~ of Boston, brings 944 slaves to Brazil. _Ibid._, pp. 5-14.

~1849.~ ~Casco,~ slaver, with no papers; searched, and captured with 420 slaves, by a British cruiser. _Senate Exec. Doc._, 31 Cong. 1 sess. XIV No. 66, p. 13.

~1850.~ ~Martha,~ of New York, captured when about to embark 1800 slaves. The captain was admitted to bail, and escaped. A.H. Foote, _Africa and the American Flag_, pp. 285-92.

~1850.~ ~Lucy Ann,~ of Boston, captured with 547 slaves by the British. _Senate Exec. Doc._, 31 Cong. 1 sess. XIV No. 66, pp. 1-10 ff.

~1850.~ ~Navarre,~ American slaver, trading to Brazil, searched and finally seized by a British cruiser. _Ibid._

~1850~ (_circa_). ~Louisa Beaton,~ ~Pilot,~ ~Chatsworth,~ ~Meteor,~ ~R. de Zaldo,~ ~Chester,~ etc., American slavers, searched by British vessels. _Ibid., passim._

~1851, Sept. 18.~ ~Illinois~ brings seven kidnapped West India Negro boys into Norfolk, Virginia. _House Exec. Doc._, 34 Cong. 1 sess. XII. No. 105, pp. 12-14.

~1852-62.~ ----. Twenty-six ships arrested and bonded for slave-trading in the Southern District of New York. _Senate Exec. Doc._, 37 Cong. 2 sess. V. No. 53.

~1852.~ ~Advance~ and ~Rachel P. Brown,~ of New York; the capture of these was hindered by the United States consul in the Cape Verd Islands. _Ibid._, 34 Cong. 1 sess. XV. No. 99, pp. 41-5; _House Exec. Doc._, 34 Cong. 1 sess. XII. No. 105, pp. 15-19.

~1853.~ ~Silenus,~ of New York, and ~General de Kalb,~ of Baltimore, carry 900 slaves from Africa. _Senate Exec. Doc._, 34 Cong. 1 sess. XV. No. 99, pp. 46-52; _House Exec. Doc._, 34 Cong. 1 sess. XII. No. 105, pp. 20-26.

~1853.~ ~Jasper~ carries slaves to Cuba. _Senate Exec. Doc._, 34 Cong. 1 sess. XV. No. 99, pp. 52-7.

~1853.~ ~Camargo,~ of Portland, Maine, lands 500 slaves in Brazil. _Ibid._, 33 Cong. 1 sess. VIII. No. 47.

CRIME AND PUNISHMENT

By Fyodor Dostoevsky

Translated By Constance Garnett

TRANSLATOR'S PREFACE

A few words about Dostoevsky himself may help the English reader to understand his work.

Dostoevsky was the son of a doctor. His parents were very hard-working and deeply religious people, but so poor that they lived with their five children in only two rooms. The father and mother spent their evenings in reading aloud to their children, generally from books of a serious character.

Though always sickly and delicate Dostoevsky came out third in the final examination of the Petersburg school of Engineering. There he had already begun his first work, "Poor Folk."

This story was published by the poet Nekrassov in his review and was received with acclamations. The shy, unknown youth found himself instantly something of a celebrity. A brilliant and successful career seemed to open before him, but those hopes were soon dashed. In 1849 he was arrested.

Though neither by temperament nor conviction a revolutionist, Dostoevsky was one of a little group of young men who met together to read Fourier and Proudhon. He was accused of "taking part in conversations against the censorship, of reading a letter from Byelinsky to Gogol, and of knowing of the intention to set up a printing press." Under Nicholas I. (that "stern and just man," as Maurice Baring calls him) this was enough, and he was condemned to death. After eight months' imprisonment he was with twenty-one others taken out to the Semyonovsky Square to be shot. Writing to his brother Mihail, Dostoevsky says: "They snapped words over our heads, and they made us put on the white shirts worn by persons condemned to death. Thereupon we were bound in threes to stakes, to suffer execution. Being the third in the row, I concluded I had only a few minutes of life before me. I thought of you and your dear ones and I contrived to kiss Plestcheiev and Dourov, who were next to me, and to bid them farewell. Suddenly the troops beat a tattoo, we were unbound, brought back upon the scaffold, and informed that his Majesty had spared us our lives." The sentence was commuted to hard labour.

One of the prisoners, Grigoryev, went mad as soon as he was untied, and never regained his sanity.

The intense suffering of this experience left a lasting stamp on Dostoevsky's mind. Though his religious temper led him in the end to accept every suffering with resignation and to regard it as a blessing in his own case, he constantly recurs to the subject in his writings. He describes the awful agony of the condemned man and insists on the cruelty of inflicting such torture. Then followed four years of penal servitude, spent in the company of common criminals in Siberia, where he began the "Dead House," and some years of service in a disciplinary battalion.

He had shown signs of some obscure nervous disease before his arrest and this now developed into violent attacks of epilepsy, from which he suffered for the rest of his life. The fits occurred three or four times a year and were more frequent in periods of great strain. In 1859 he was allowed to return to Russia. He started a journal--"Vremya," which was forbidden by the Censorship through a misunderstanding. In 1864 he lost his first wife and his brother Mihail. He was in terrible poverty, yet he took upon himself the payment of his brother's debts. He started another journal--"The Epoch," which within a few months was also prohibited. He was weighed down by debt, his brother's family was dependent on him, he was forced to write at heart-breaking speed, and is said never to have corrected his work. The later years of his life were much softened by the tenderness and devotion of his second wife.

In June 1880 he made his famous speech at the unveiling of the monument to Pushkin in Moscow and he was received with extraordinary demonstrations of love and honour.

A few months later Dostoevsky died. He was followed to the grave by a vast multitude of mourners, who “gave the hapless man the funeral of a king.” He is still probably the most widely read writer in Russia.

In the words of a Russian critic, who seeks to explain the feeling inspired by Dostoevsky: “He was one of ourselves, a man of our blood and our bone, but one who has suffered and has seen so much more deeply than we have his insight impresses us as wisdom... that wisdom of the heart which we seek that we may learn from it how to live. All his other gifts came to him from nature, this he won for himself and through it he became great.”

CRIME AND PUNISHMENT

PART I

CHAPTER I

On an exceptionally hot evening early in July a young man came out of the garret in which he lodged in S. Place and walked slowly, as though in hesitation, towards K. bridge.

He had successfully avoided meeting his landlady on the staircase. His garret was under the roof of a high, five-storied house and was more like a cupboard than a room. The landlady who provided him with garret, dinners, and attendance, lived on the floor below, and every time he went out he was obliged to pass her kitchen, the door of which invariably stood open. And each time he passed, the young man had a sick, frightened feeling, which made him scowl and feel ashamed. He was hopelessly in debt to his landlady, and was afraid of meeting her.

This was not because he was cowardly and abject, quite the contrary; but for some time past he had been in an overstrained irritable condition, verging on hypochondria. He had become so completely absorbed in himself, and isolated from his fellows that he dreaded meeting, not only his landlady, but anyone at all. He was crushed by poverty, but the anxieties of his position had of late ceased to weigh upon him. He had given up attending to matters of practical importance; he had lost all desire to do so. Nothing that any landlady could do had a real terror for him. But to be stopped on the stairs, to be forced to listen to her trivial, irrelevant gossip, to pestering demands for payment, threats and complaints, and to rack his brains for excuses, to prevaricate, to lie--no, rather than that, he would creep down the stairs like a cat and slip out unseen.

This evening, however, on coming out into the street, he became acutely aware of his fears.

“I want to attempt a thing _like that_ and am frightened by these trifles,” he thought, with an odd smile. “Hm... yes, all is in a man’s hands and he lets it all slip from cowardice, that’s an axiom. It would be interesting to know what it is men are most afraid of. Taking a new step, uttering a new word is what they fear most.... But I am talking too much. It’s because I chatter that I do nothing. Or perhaps it is that I chatter because I do nothing. I’ve learned to chatter this last month, lying for days together in my den thinking... of Jack the Giant-killer. Why am I going there now? Am I capable of _that_? Is _that_ serious? It is not serious at all. It’s simply a fantasy to amuse myself; a plaything! Yes, maybe it is a plaything.”

The heat in the street was terrible: and the airlessness, the bustle and the plaster, scaffolding, bricks, and dust all about him, and that special Petersburg stench, so familiar to all who are unable to get out of town in summer--all worked painfully upon the young man’s already overwrought nerves. The insufferable stench from the pot-houses, which are particularly numerous in that part of the town, and the drunken men whom he met continually, although it was a working day, completed the revolting misery of the picture. An expression of the profoundest disgust gleamed for a moment in the young man’s refined face. He was, by the way, exceptionally handsome, above the average in height, slim, well-built, with beautiful dark eyes and dark brown hair. Soon he sank into deep thought, or more accurately speaking into a complete blankness of mind; he walked along not observing what was about him and not caring to observe it. From time to time, he would mutter something, from the habit of talking to himself, to which he had just confessed. At these moments he would become conscious that his ideas were sometimes in a tangle and that he was very weak; for two days he had scarcely tasted food.

He was so badly dressed that even a man accustomed to shabbiness would have been ashamed to be seen in the street in such rags. In that quarter of the town, however, scarcely any shortcoming in dress would have created surprise. Owing to the proximity of the Hay Market, the number of establishments of bad character, the preponderance of the trading and working class population crowded in these streets and alleys in the heart of Petersburg, types so various were to be seen in the streets that no figure,

however queer, would have caused surprise. But there was such accumulated bitterness and contempt in the young man's heart, that, in spite of all the fastidiousness of youth, he minded his rags least of all in the street. It was a different matter when he met with acquaintances or with former fellow students, whom, indeed, he disliked meeting at any time. And yet when a drunken man who, for some unknown reason, was being taken somewhere in a huge waggon dragged by a heavy dray horse, suddenly shouted at him as he drove past: "Hey there, German hatter" bawling at the top of his voice and pointing at him--the young man stopped suddenly and clutched tremulously at his hat. It was a tall round hat from Zimmerman's, but completely worn out, rusty with age, all torn and bespattered, brimless and bent on one side in a most unseemly fashion. Not shame, however, but quite another feeling akin to terror had overtaken him.

"I knew it," he muttered in confusion, "I thought so! That's the worst of all! Why, a stupid thing like this, the most trivial detail might spoil the whole plan. Yes, my hat is too noticeable.... It looks absurd and that makes it noticeable.... With my rags I ought to wear a cap, any sort of old pancake, but not this grotesque thing. Nobody wears such a hat, it would be noticed a mile off, it would be remembered.... What matters is that people would remember it, and that would give them a clue. For this business one should be as little conspicuous as possible.... Trifles, trifles are what matter! Why, it's just such trifles that always ruin everything...."

He had not far to go; he knew indeed how many steps it was from the gate of his lodging house: exactly seven hundred and thirty. He had counted them once when he had been lost in dreams. At the time he had put no faith in those dreams and was only tantalising himself by their hideous but daring recklessness. Now, a month later, he had begun to look upon them differently, and, in spite of the monologues in which he jeered at his own impotence and indecision, he had involuntarily come to regard this "hideous" dream as an exploit to be attempted, although he still did not realise this himself. He was positively going now for a "rehearsal" of his project, and at every step his excitement grew more and more violent.

With a sinking heart and a nervous tremor, he went up to a huge house which on one side looked on to the canal, and on the other into the street. This house was let out in tiny tenements and was inhabited by working people of all kinds--tailors, locksmiths, cooks, Germans of sorts, girls picking up a living as best they could, petty clerks, etc. There was a continual coming and going through the two gates and in the two courtyards of the house. Three or four door-keepers were employed on the building. The young man was very glad to meet none of them, and at once slipped unnoticed through the door on the right, and up the staircase. It was a back staircase, dark and narrow, but he was familiar with it already, and knew his way, and he liked all these surroundings: in such darkness even the most inquisitive eyes were not to be dreaded.

"If I am so scared now, what would it be if it somehow came to pass that I were really going to do it?" he could not help asking himself as he reached the fourth storey. There his progress was barred by some porters who were engaged in moving furniture out of a flat. He knew that the flat had been occupied by a German clerk in the civil service, and his family. This German was moving out then, and so the fourth floor on this staircase would be untenanted except by the old woman. "That's a good thing anyway," he thought to himself, as he rang the bell of the old woman's flat. The bell gave a faint tinkle as though it were made of tin and not of copper. The little flats in such houses always have bells that ring like that. He had forgotten the note of that bell, and now its peculiar tinkle seemed to remind him of something and to bring it clearly before him.... He started, his nerves were terribly overstrained by now. In a little while, the door was opened a tiny crack: the old woman eyed her visitor with evident distrust through the crack, and nothing could be seen but her little eyes, glittering in the darkness. But, seeing a number of people on the landing, she grew bolder, and opened the door wide. The young man stepped into the dark entry, which was partitioned off from the tiny kitchen. The old woman stood facing him in silence and looking inquiringly at him. She was a diminutive, withered up old woman of sixty, with sharp malignant eyes and a sharp little nose. Her colourless, somewhat grizzled hair was thickly smeared with oil, and she wore no kerchief over it. Round her thin long neck, which looked like a hen's leg, was knotted some sort of flannel rag, and, in spite of the heat, there hung flapping on her shoulders, a mangy fur cape, yellow with age. The old woman coughed and groaned at every instant. The young man must have looked at her with a rather peculiar expression, for a gleam of mistrust came into her eyes again.

"Raskolnikov, a student, I came here a month ago," the young man made haste to mutter, with a half bow, remembering that he ought to be more polite.

"I remember, my good sir, I remember quite well your coming here," the old woman said distinctly, still keeping her inquiring eyes on his face.

“And here... I am again on the same errand,” Raskolnikov continued, a little disconcerted and surprised at the old woman’s mistrust. “Perhaps she is always like that though, only I did not notice it the other time,” he thought with an uneasy feeling.

The old woman paused, as though hesitating; then stepped on one side, and pointing to the door of the room, she said, letting her visitor pass in front of her:

“Step in, my good sir.”

The little room into which the young man walked, with yellow paper on the walls, geraniums and muslin curtains in the windows, was brightly lighted up at that moment by the setting sun.

“So the sun will shine like this _then_ too!” flashed as it were by chance through Raskolnikov’s mind, and with a rapid glance he scanned everything in the room, trying as far as possible to notice and remember its arrangement. But there was nothing special in the room. The furniture, all very old and of yellow wood, consisted of a sofa with a huge bent wooden back, an oval table in front of the sofa, a dressing-table with a looking-glass fixed on it between the windows, chairs along the walls and two or three half-penny prints in yellow frames, representing German damsels with birds in their hands--that was all. In the corner a light was burning before a small ikon. Everything was very clean; the floor and the furniture were brightly polished; everything shone.

“Lizaveta’s work,” thought the young man. There was not a speck of dust to be seen in the whole flat.

“It’s in the houses of spiteful old widows that one finds such cleanliness,” Raskolnikov thought again, and he stole a curious glance at the cotton curtain over the door leading into another tiny room, in which stood the old woman’s bed and chest of drawers and into which he had never looked before. These two rooms made up the whole flat.

“What do you want?” the old woman said severely, coming into the room and, as before, standing in front of him so as to look him straight in the face.

“I’ve brought something to pawn here,” and he drew out of his pocket an old-fashioned flat silver watch, on the back of which was engraved a globe; the chain was of steel.

“But the time is up for your last pledge. The month was up the day before yesterday.”

“I will bring you the interest for another month; wait a little.”

“But that’s for me to do as I please, my good sir, to wait or to sell your pledge at once.”

“How much will you give me for the watch, Alyona Ivanovna?”

“You come with such trifles, my good sir, it’s scarcely worth anything. I gave you two roubles last time for your ring and one could buy it quite new at a jeweler’s for a rouble and a half.”

“Give me four roubles for it, I shall redeem it, it was my father’s. I shall be getting some money soon.”

“A rouble and a half, and interest in advance, if you like!”

“A rouble and a half!” cried the young man.

“Please yourself”--and the old woman handed him back the watch. The young man took it, and was so angry that he was on the point of going away; but checked himself at once, remembering that there was nowhere else he could go, and that he had had another object also in coming.

“Hand it over,” he said roughly.

The old woman fumbled in her pocket for her keys, and disappeared behind the curtain into the other room. The young man, left standing alone in the middle of the room, listened inquisitively, thinking. He could hear her unlocking the chest of drawers.

“It must be the top drawer,” he reflected. “So she carries the keys in a pocket on the right. All in one bunch on a steel ring.... And there’s one key there, three times as big as all the others, with deep notches; that can’t be the key of the chest of drawers... then there must be some other chest or strong-box... that’s worth knowing. Strong-boxes always have keys like that... but how degrading it all is.”

The old woman came back.

“Here, sir: as we say ten copecks the rouble a month, so I must take fifteen copecks from a rouble and a half for the month in advance. But for the two roubles I lent you before, you owe me now twenty copecks on the same reckoning in advance. That makes thirty-five copecks altogether. So I must give you a rouble and fifteen copecks for the watch. Here it is.”

“What! only a rouble and fifteen copecks now!”

“Just so.”

The young man did not dispute it and took the money. He looked at the old woman, and was in no hurry to get away, as though there was still something he wanted to say or to do, but he did not himself quite know what.

“I may be bringing you something else in a day or two, Alyona Ivanovna--a valuable thing--silver--a cigarette-box, as soon as I get it back from a friend...” he broke off in confusion.

“Well, we will talk about it then, sir.”

“Good-bye--are you always at home alone, your sister is not here with you?” He asked her as casually as possible as he went out into the passage.

“What business is she of yours, my good sir?”

“Oh, nothing particular, I simply asked. You are too quick.... Good-day, Alyona Ivanovna.”

Raskolnikov went out in complete confusion. This confusion became more and more intense. As he went down the stairs, he even stopped short, two or three times, as though suddenly struck by some thought. When he was in the street he cried out, “Oh, God, how loathsome it all is! and can I, can I possibly.... No, it’s nonsense, it’s rubbish!” he added resolutely. “And how could such an atrocious thing come into my head? What filthy things my heart is capable of. Yes, filthy above all, disgusting, loathsome, loathsome!--and for a whole month I’ve been....” But no words, no exclamations, could express his agitation. The feeling of intense repulsion, which had begun to oppress and torture his heart while he was on his way to the old woman, had by now reached such a pitch and had taken such a definite form that he did not know what to do with himself to escape from his wretchedness. He walked along the pavement like a drunken man, regardless of the passers-by, and jostling against them, and only came to his senses when he was in the next street. Looking round, he noticed that he was standing close to a tavern which was entered by steps leading from the pavement to the basement. At that instant two drunken men came out at the door, and abusing and supporting one another, they mounted the steps. Without stopping to think, Raskolnikov went down the steps at once. Till that moment he had never been into a tavern, but now he felt giddy and was tormented by a burning thirst. He longed for a drink of cold beer, and attributed his sudden weakness to the want of food. He sat down at a sticky little table in a dark and dirty corner; ordered some beer, and eagerly drank off the first glassful. At once he felt easier; and his thoughts became clear.

“All that’s nonsense,” he said hopefully, “and there is nothing in it all to worry about! It’s simply physical derangement. Just a glass of beer, a piece of dry bread--and in one moment the brain is stronger, the mind is clearer and the will is firm! Phew, how utterly petty it all is!”

But in spite of this scornful reflection, he was by now looking cheerful as though he were suddenly set free from a terrible burden: and he gazed round in a friendly way at the people in the room. But even at that moment he had a dim foreboding that this happier frame of mind was also not normal.

There were few people at the time in the tavern. Besides the two drunken men he had met on the steps, a group consisting of about five men and a girl with a concertina had gone out at the same time. Their departure left the room quiet and rather empty. The persons still in the tavern were a man who appeared to be an artisan, drunk, but not extremely so, sitting before a pot of beer, and his companion, a huge, stout man with a grey beard, in a short full-skirted coat. He was very drunk: and had dropped asleep on the bench; every now and then, he began as though in his sleep, cracking his fingers, with his arms wide apart and the upper part of his body bounding about on the bench, while he hummed some meaningless refrain, trying to recall some such lines as these:

“His wife a year he fondly loved His wife a--a year he--fondly loved.”

Or suddenly waking up again:

“Walking along the crowded row He met the one he used to know.”

But no one shared his enjoyment: his silent companion looked with positive hostility and mistrust at all these manifestations. There was another man in the room who looked somewhat like a retired government clerk. He was sitting apart, now and then sipping from his pot and looking round at the company. He, too, appeared to be in some agitation.

CHAPTER II

Raskolnikov was not used to crowds, and, as we said before, he avoided society of every sort, more especially of late. But now all at once he felt a desire to be with other people. Something new seemed to be taking place within him, and with it he felt a sort of thirst for company. He was so weary after a whole month of concentrated wretchedness and gloomy excitement that he longed to rest, if only for a moment, in some other world, whatever it might be; and, in spite of the filthiness of the surroundings, he was glad now to stay in the tavern.

The master of the establishment was in another room, but he frequently came down some steps into the main room, his jaunty, tarred boots with red turn-over tops coming into view each time before the rest of his person. He wore a full coat and a horribly greasy black satin waistcoat, with no cravat, and his whole face seemed smeared with oil like an iron lock. At the counter stood a boy of about fourteen, and there was another boy somewhat younger who handed whatever was wanted. On the counter lay some sliced cucumber, some pieces of dried black bread, and some fish, chopped up small, all smelling very bad. It was insufferably close, and so heavy with the fumes of spirits that five minutes in such an atmosphere might well make a man drunk.

There are chance meetings with strangers that interest us from the first moment, before a word is spoken. Such was the impression made on Raskolnikov by the person sitting a little distance from him, who looked like a retired clerk. The young man often recalled this impression afterwards, and even ascribed it to presentiment. He looked repeatedly at the clerk, partly no doubt because the latter was staring persistently at him, obviously anxious to enter into conversation. At the other persons in the room, including the tavern-keeper, the clerk looked as though he were used to their company, and weary of it, showing a shade of condescending contempt for them as persons of station and culture inferior to his own, with whom it would be useless for him to converse. He was a man over fifty, bald and grizzled, of medium height, and stoutly built. His face, bloated from continual drinking, was of a yellow, even greenish, tinge, with swollen eyelids out of which keen reddish eyes gleamed like little chinks. But there was something very strange in him; there was a light in his eyes as though of intense feeling--perhaps there were even thought and intelligence, but at the same time there was a gleam of something like madness. He was wearing an old and hopelessly ragged black dress coat, with all its buttons missing except one, and that one he had buttoned, evidently clinging to this last trace of respectability. A crumpled shirt front, covered with spots and stains, protruded from his canvas waistcoat. Like a clerk, he wore no beard, nor moustache, but had been so long unshaven that his chin looked like a stiff greyish brush. And there was something respectable and like an official about his manner too. But he was restless; he ruffled up his hair and from time to time let his head drop into his hands dejectedly resting his ragged elbows on the stained and sticky table. At last he looked straight at Raskolnikov, and said loudly and resolutely:

“May I venture, honoured sir, to engage you in polite conversation? Forasmuch as, though your exterior would not command respect, my experience admonishes me that you are a man of education and not accustomed to drinking. I have always respected education when in conjunction with genuine sentiments, and I am besides a titular counsellor in rank. Marmeladov--such is my name; titular counsellor. I make bold to inquire--have you been in the service?”

“No, I am studying,” answered the young man, somewhat surprised at the grandiloquent style of the speaker and also at being so directly addressed. In spite of the momentary desire he had just been feeling for company of any sort, on being actually spoken to he felt immediately his habitual irritable and uneasy aversion for any stranger who approached or attempted to approach him.

“A student then, or formerly a student,” cried the clerk. “Just what I thought! I’m a man of experience, immense experience, sir,” and he tapped his forehead with his fingers in self-approval. “You’ve been a student or have attended some learned institution!... But allow me....” He got up, staggered, took up his jug and glass, and sat down beside the young man, facing him a little sideways. He was drunk, but spoke fluently and boldly, only occasionally losing the thread of his sentences and drawling his words. He pounced upon Raskolnikov as greedily as though he too had not spoken to a soul for a month.

“Honoured sir,” he began almost with solemnity, “poverty is not a vice, that’s a true saying. Yet I know too that drunkenness is not a virtue, and that that’s even truer. But beggary, honoured sir, beggary is a vice. In poverty you may still retain your innate nobility of soul, but in beggary--never--no one. For beggary a man is not chased out of human society with a stick, he is swept out with a

broom, so as to make it as humiliating as possible; and quite right, too, forasmuch as in beggary I am ready to be the first to humiliate myself. Hence the pot-house! Honoured sir, a month ago Mr. Lebeziatnikov gave my wife a beating, and my wife is a very different matter from me! Do you understand? Allow me to ask you another question out of simple curiosity: have you ever spent a night on a hay barge, on the Neva?"

"No, I have not happened to," answered Raskolnikov. "What do you mean?"

"Well, I've just come from one and it's the fifth night I've slept so...." He filled his glass, emptied it and paused. Bits of hay were in fact clinging to his clothes and sticking to his hair. It seemed quite probable that he had not undressed or washed for the last five days. His hands, particularly, were filthy. They were fat and red, with black nails.

His conversation seemed to excite a general though languid interest. The boys at the counter fell to sniggering. The innkeeper came down from the upper room, apparently on purpose to listen to the "funny fellow" and sat down at a little distance, yawning lazily, but with dignity. Evidently Marmeladov was a familiar figure here, and he had most likely acquired his weakness for high-flown speeches from the habit of frequently entering into conversation with strangers of all sorts in the tavern. This habit develops into a necessity in some drunkards, and especially in those who are looked after sharply and kept in order at home. Hence in the company of other drinkers they try to justify themselves and even if possible obtain consideration.

"Funny fellow!" pronounced the innkeeper. "And why don't you work, why aren't you at your duty, if you are in the service?"

"Why am I not at my duty, honoured sir," Marmeladov went on, addressing himself exclusively to Raskolnikov, as though it had been he who put that question to him. "Why am I not at my duty? Does not my heart ache to think what a useless worm I am? A month ago when Mr. Lebeziatnikov beat my wife with his own hands, and I lay drunk, didn't I suffer? Excuse me, young man, has it ever happened to you... hm... well, to petition hopelessly for a loan?"

"Yes, it has. But what do you mean by hopelessly?"

"Hopelessly in the fullest sense, when you know beforehand that you will get nothing by it. You know, for instance, beforehand with positive certainty that this man, this most reputable and exemplary citizen, will on no consideration give you money; and indeed I ask you why should he? For he knows of course that I shan't pay it back. From compassion? But Mr. Lebeziatnikov who keeps up with modern ideas explained the other day that compassion is forbidden nowadays by science itself, and that that's what is done now in England, where there is political economy. Why, I ask you, should he give it to me? And yet though I know beforehand that he won't, I set off to him and..."

"Why do you go?" put in Raskolnikov.

"Well, when one has no one, nowhere else one can go! For every man must have somewhere to go. Since there are times when one absolutely must go somewhere! When my own daughter first went out with a yellow ticket, then I had to go... (for my daughter has a yellow passport)," he added in parenthesis, looking with a certain uneasiness at the young man. "No matter, sir, no matter!" he went on hurriedly and with apparent composure when both the boys at the counter guffawed and even the innkeeper smiled--"No matter, I am not confounded by the wagging of their heads; for everyone knows everything about it already, and all that is secret is made open. And I accept it all, not with contempt, but with humility. So be it! So be it! 'Behold the man!' Excuse me, young man, can you.... No, to put it more strongly and more distinctly; not _can_ you but _dare_ you, looking upon me, assert that I am not a pig?"

The young man did not answer a word.

"Well," the orator began again stolidly and with even increased dignity, after waiting for the laughter in the room to subside. "Well, so be it, I am a pig, but she is a lady! I have the semblance of a beast, but Katerina Ivanovna, my spouse, is a person of education and an officer's daughter. Granted, granted, I am a scoundrel, but she is a woman of a noble heart, full of sentiments, refined by education. And yet... oh, if only she felt for me! Honoured sir, honoured sir, you know every man ought to have at least one place where people feel for him! But Katerina Ivanovna, though she is magnanimous, she is unjust.... And yet, although I realise that when she pulls my hair she only does it out of pity--for I repeat without being ashamed, she pulls my hair, young man," he declared with redoubled dignity, hearing the sniggering again--"but, my God, if she would but once.... But no, no! It's all in vain and it's no use talking! No use talking! For more than once, my wish did come true and more than once she has felt for me but... such is my fate and I am a beast by nature!"

“Rather!” assented the innkeeper yawning. Marmeladov struck his fist resolutely on the table.

“Such is my fate! Do you know, sir, do you know, I have sold her very stockings for drink? Not her shoes--that would be more or less in the order of things, but her stockings, her stockings I have sold for drink! Her mohair shawl I sold for drink, a present to her long ago, her own property, not mine; and we live in a cold room and she caught cold this winter and has begun coughing and spitting blood too. We have three little children and Katerina Ivanovna is at work from morning till night; she is scrubbing and cleaning and washing the children, for she’s been used to cleanliness from a child. But her chest is weak and she has a tendency to consumption and I feel it! Do you suppose I don’t feel it? And the more I drink the more I feel it. That’s why I drink too. I try to find sympathy and feeling in drink.... I drink so that I may suffer twice as much!” And as though in despair he laid his head down on the table.

“Young man,” he went on, raising his head again, “in your face I seem to read some trouble of mind. When you came in I read it, and that was why I addressed you at once. For in unfolding to you the story of my life, I do not wish to make myself a laughing-stock before these idle listeners, who indeed know all about it already, but I am looking for a man of feeling and education. Know then that my wife was educated in a high-class school for the daughters of noblemen, and on leaving she danced the shawl dance before the governor and other personages for which she was presented with a gold medal and a certificate of merit. The medal... well, the medal of course was sold--long ago, hm... but the certificate of merit is in her trunk still and not long ago she showed it to our landlady. And although she is most continually on bad terms with the landlady, yet she wanted to tell someone or other of her past honours and of the happy days that are gone. I don’t condemn her for it, I don’t blame her, for the one thing left her is recollection of the past, and all the rest is dust and ashes. Yes, yes, she is a lady of spirit, proud and determined. She scrubs the floors herself and has nothing but black bread to eat, but won’t allow herself to be treated with disrespect. That’s why she would not overlook Mr. Lebeziatnikov’s rudeness to her, and so when he gave her a beating for it, she took to her bed more from the hurt to her feelings than from the blows. She was a widow when I married her, with three children, one smaller than the other. She married her first husband, an infantry officer, for love, and ran away with him from her father’s house. She was exceedingly fond of her husband; but he gave way to cards, got into trouble and with that he died. He used to beat her at the end: and although she paid him back, of which I have authentic documentary evidence, to this day she speaks of him with tears and she throws him up to me; and I am glad, I am glad that, though only in imagination, she should think of herself as having once been happy.... And she was left at his death with three children in a wild and remote district where I happened to be at the time; and she was left in such hopeless poverty that, although I have seen many ups and downs of all sort, I don’t feel equal to describing it even. Her relations had all thrown her off. And she was proud, too, excessively proud.... And then, honoured sir, and then, I, being at the time a widower, with a daughter of fourteen left me by my first wife, offered her my hand, for I could not bear the sight of such suffering. You can judge the extremity of her calamities, that she, a woman of education and culture and distinguished family, should have consented to be my wife. But she did! Weeping and sobbing and wringing her hands, she married me! For she had nowhere to turn! Do you understand, sir, do you understand what it means when you have absolutely nowhere to turn? No, that you don’t understand yet.... And for a whole year, I performed my duties conscientiously and faithfully, and did not touch this” (he tapped the jug with his finger), “for I have feelings. But even so, I could not please her; and then I lost my place too, and that through no fault of mine but through changes in the office; and then I did touch it!... It will be a year and a half ago soon since we found ourselves at last after many wanderings and numerous calamities in this magnificent capital, adorned with innumerable monuments. Here I obtained a situation.... I obtained it and I lost it again. Do you understand? This time it was through my own fault I lost it: for my weakness had come out.... We have now part of a room at Amalia Fyodorovna Lippevechsel’s; and what we live upon and what we pay our rent with, I could not say. There are a lot of people living there besides ourselves. Dirt and disorder, a perfect Bedlam... hm... yes... And meanwhile my daughter by my first wife has grown up; and what my daughter has had to put up with from her step-mother whilst she was growing up, I won’t speak of. For, though Katerina Ivanovna is full of generous feelings, she is a spirited lady, irritable and short-tempered.... Yes. But it’s no use going over that! Sonia, as you may well fancy, has had no education. I did make an effort four years ago to give her a course of geography and universal history, but as I was not very well up in those subjects myself and we had no suitable books, and what books we had... hm, anyway we have not even those now, so all our instruction came to an end. We stopped at Cyrus of Persia. Since she has attained years of maturity, she has read other books of romantic tendency and of late she had read with great interest a book she got through Mr. Lebeziatnikov, Lewes’ Physiology--do you know it?--and even recounted extracts from it to us: and that’s the whole of her education. And now may I venture to address you, honoured sir, on my own account with a private question. Do you suppose that a respectable poor girl can earn much by honest work? Not fifteen farthings a day can she earn, if she is respectable and has no special talent and that without putting her work down for an instant! And what’s more, Ivan Ivanitch Klopstock the civil counsellor--have you heard of him?--has not to this day

paid her for the half-dozen linen shirts she made him and drove her roughly away, stamping and reviling her, on the pretext that the shirt collars were not made like the pattern and were put in askew. And there are the little ones hungry.... And Katerina Ivanovna walking up and down and wringing her hands, her cheeks flushed red, as they always are in that disease: ‘Here you live with us,’ says she, ‘you eat and drink and are kept warm and you do nothing to help.’ And much she gets to eat and drink when there is not a crust for the little ones for three days! I was lying at the time... well, what of it! I was lying drunk and I heard my Sonia speaking (she is a gentle creature with a soft little voice... fair hair and such a pale, thin little face). She said: ‘Katerina Ivanovna, am I really to do a thing like that?’ And Darya Frantsovna, a woman of evil character and very well known to the police, had two or three times tried to get at her through the landlady. ‘And why not?’ said Katerina Ivanovna with a jeer, ‘you are something mighty precious to be so careful of!’ But don’t blame her, don’t blame her, honoured sir, don’t blame her! She was not herself when she spoke, but driven to distraction by her illness and the crying of the hungry children; and it was said more to wound her than anything else.... For that’s Katerina Ivanovna’s character, and when children cry, even from hunger, she falls to beating them at once. At six o’clock I saw Sonia get up, put on her kerchief and her cape, and go out of the room and about nine o’clock she came back. She walked straight up to Katerina Ivanovna and she laid thirty roubles on the table before her in silence. She did not utter a word, she did not even look at her, she simply picked up our big green _drap de dames_ shawl (we have a shawl, made of _drap de dames_), put it over her head and face and lay down on the bed with her face to the wall; only her little shoulders and her body kept shuddering.... And I went on lying there, just as before.... And then I saw, young man, I saw Katerina Ivanovna, in the same silence go up to Sonia’s little bed; she was on her knees all the evening kissing Sonia’s feet, and would not get up, and then they both fell asleep in each other’s arms... together, together... yes... and I... lay drunk.”

Marmeladov stopped short, as though his voice had failed him. Then he hurriedly filled his glass, drank, and cleared his throat.

“Since then, sir,” he went on after a brief pause--“Since then, owing to an unfortunate occurrence and through information given by evil-intentioned persons--in all which Darya Frantsovna took a leading part on the pretext that she had been treated with want of respect--since then my daughter Sofya Semyonovna has been forced to take a yellow ticket, and owing to that she is unable to go on living with us. For our landlady, Amalia Fyodorovna would not hear of it (though she had backed up Darya Frantsovna before) and Mr. Lebeziatnikov too... hm.... All the trouble between him and Katerina Ivanovna was on Sonia’s account. At first he was for making up to Sonia himself and then all of a sudden he stood on his dignity: ‘how,’ said he, ‘can a highly educated man like me live in the same rooms with a girl like that?’ And Katerina Ivanovna would not let it pass, she stood up for her... and so that’s how it happened. And Sonia comes to us now, mostly after dark; she comforts Katerina Ivanovna and gives her all she can.... She has a room at the Kapernaumovs’ the tailors, she lodges with them; Kapernaumov is a lame man with a cleft palate and all of his numerous family have cleft palates too. And his wife, too, has a cleft palate. They all live in one room, but Sonia has her own, partitioned off.... Hm... yes... very poor people and all with cleft palates... yes. Then I got up in the morning, and put on my rags, lifted up my hands to heaven and set off to his excellency Ivan Afanasyvitch. His excellency Ivan Afanasyvitch, do you know him? No? Well, then, it’s a man of God you don’t know. He is wax... wax before the face of the Lord; even as wax melteth!... His eyes were dim when he heard my story. ‘Marmeladov, once already you have deceived my expectations... I’ll take you once more on my own responsibility’--that’s what he said, ‘remember,’ he said, ‘and now you can go.’ I kissed the dust at his feet--in thought only, for in reality he would not have allowed me to do it, being a statesman and a man of modern political and enlightened ideas. I returned home, and when I announced that I’d been taken back into the service and should receive a salary, heavens, what a to-do there was!...”

Marmeladov stopped again in violent excitement. At that moment a whole party of revellers already drunk came in from the street, and the sounds of a hired concertina and the cracked piping voice of a child of seven singing “The Hamlet” were heard in the entry. The room was filled with noise. The tavern-keeper and the boys were busy with the new-comers. Marmeladov paying no attention to the new arrivals continued his story. He appeared by now to be extremely weak, but as he became more and more drunk, he became more and more talkative. The recollection of his recent success in getting the situation seemed to revive him, and was positively reflected in a sort of radiance on his face. Raskolnikov listened attentively.

“That was five weeks ago, sir. Yes.... As soon as Katerina Ivanovna and Sonia heard of it, mercy on us, it was as though I stepped into the kingdom of Heaven. It used to be: you can lie like a beast, nothing but abuse. Now they were walking on tiptoe, hushing the children. ‘Semyon Zaharovitch is tired with his work at the office, he is resting, shh!’ They made me coffee before I went to work and boiled cream for me! They began to get real cream for me, do you hear that? And how they managed to get together the money for a decent outfit--eleven roubles, fifty copecks, I can’t guess. Boots, cotton shirt-fronts--most magnificent, a uniform, they got up all in splendid style, for eleven roubles and a half. The first morning I came back from the office I found Katerina Ivanovna had cooked

two courses for dinner--soup and salt meat with horse radish--which we had never dreamed of till then. She had not any dresses... none at all, but she got herself up as though she were going on a visit; and not that she'd anything to do it with, she smartened herself up with nothing at all, she'd done her hair nicely, put on a clean collar of some sort, cuffs, and there she was, quite a different person, she was younger and better looking. Sonia, my little darling, had only helped with money 'for the time,' she said, 'it won't do for me to come and see you too often. After dark maybe when no one can see.' Do you hear, do you hear? I lay down for a nap after dinner and what do you think: though Katerina Ivanovna had quarrelled to the last degree with our landlady Amalia Fyodorovna only a week before, she could not resist then asking her in to coffee. For two hours they were sitting, whispering together. 'Semyon Zaharovitch is in the service again, now, and receiving a salary,' says she, 'and he went himself to his excellency and his excellency himself came out to him, made all the others wait and led Semyon Zaharovitch by the hand before everybody into his study.' Do you hear, do you hear? 'To be sure,' says he, 'Semyon Zaharovitch, remembering your past services,' says he, 'and in spite of your propensity to that foolish weakness, since you promise now and since moreover we've got on badly without you,' (do you hear, do you hear;) 'and so,' says he, 'I rely now on your word as a gentleman.' And all that, let me tell you, she has simply made up for herself, and not simply out of wantonness, for the sake of bragging; no, she believes it all herself, she amuses herself with her own fancies, upon my word she does! And I don't blame her for it, no, I don't blame her!... Six days ago when I brought her my first earnings in full--twenty-three roubles forty copecks altogether--she called me her poppet: 'poppet,' said she, 'my little poppet.' And when we were by ourselves, you understand? You would not think me a beauty, you would not think much of me as a husband, would you?... Well, she pinched my cheek, 'my little poppet,' said she."

Marmeladov broke off, tried to smile, but suddenly his chin began to twitch. He controlled himself however. The tavern, the degraded appearance of the man, the five nights in the hay barge, and the pot of spirits, and yet this poignant love for his wife and children bewildered his listener. Raskolnikov listened intently but with a sick sensation. He felt vexed that he had come here.

"Honoured sir, honoured sir," cried Marmeladov recovering himself--"Oh, sir, perhaps all this seems a laughing matter to you, as it does to others, and perhaps I am only worrying you with the stupidity of all the trivial details of my home life, but it is not a laughing matter to me. For I can feel it all.... And the whole of that heavenly day of my life and the whole of that evening I passed in fleeting dreams of how I would arrange it all, and how I would dress all the children, and how I should give her rest, and how I should rescue my own daughter from dishonour and restore her to the bosom of her family.... And a great deal more.... Quite excusable, sir. Well, then, sir" (Marmeladov suddenly gave a sort of start, raised his head and gazed intently at his listener) "well, on the very next day after all those dreams, that is to say, exactly five days ago, in the evening, by a cunning trick, like a thief in the night, I stole from Katerina Ivanovna the key of her box, took out what was left of my earnings, how much it was I have forgotten, and now look at me, all of you! It's the fifth day since I left home, and they are looking for me there and it's the end of my employment, and my uniform is lying in a tavern on the Egyptian bridge. I exchanged it for the garments I have on... and it's the end of everything!"

Marmeladov struck his forehead with his fist, clenched his teeth, closed his eyes and leaned heavily with his elbow on the table. But a minute later his face suddenly changed and with a certain assumed slyness and affectation of bravado, he glanced at Raskolnikov, laughed and said:

"This morning I went to see Sonia, I went to ask her for a pick-me-up! He-he-he!"

"You don't say she gave it to you?" cried one of the new-comers; he shouted the words and went off into a guffaw.

"This very quart was bought with her money," Marmeladov declared, addressing himself exclusively to Raskolnikov. "Thirty copecks she gave me with her own hands, her last, all she had, as I saw.... She said nothing, she only looked at me without a word.... Not on earth, but up yonder... they grieve over men, they weep, but they don't blame them, they don't blame them! But it hurts more, it hurts more when they don't blame! Thirty copecks yes! And maybe she needs them now, eh? What do you think, my dear sir? For now she's got to keep up her appearance. It costs money, that smartness, that special smartness, you know? Do you understand? And there's pomatum, too, you see, she must have things; petticoats, starched ones, shoes, too, real jaunty ones to show off her foot when she has to step over a puddle. Do you understand, sir, do you understand what all that smartness means? And here I, her own father, here I took thirty copecks of that money for a drink! And I am drinking it! And I have already drunk it! Come, who will have pity on a man like me, eh? Are you sorry for me, sir, or not? Tell me, sir, are you sorry or not? He-he-he!"

He would have filled his glass, but there was no drink left. The pot was empty.

"What are you to be pitied for?" shouted the tavern-keeper who was again near them.

Shouts of laughter and even oaths followed. The laughter and the oaths came from those who were listening and also from those who had heard nothing but were simply looking at the figure of the discharged government clerk.

“To be pitied! Why am I to be pitied?” Marmeladov suddenly declaimed, standing up with his arm outstretched, as though he had been only waiting for that question.

“Why am I to be pitied, you say? Yes! there’s nothing to pity me for! I ought to be crucified, crucified on a cross, not pitied! Crucify me, oh judge, crucify me but pity me! And then I will go of myself to be crucified, for it’s not merry-making I seek but tears and tribulation!... Do you suppose, you that sell, that this pint of yours has been sweet to me? It was tribulation I sought at the bottom of it, tears and tribulation, and have found it, and I have tasted it; but He will pity us Who has had pity on all men, Who has understood all men and all things, He is the One, He too is the judge. He will come in that day and He will ask: ‘Where is the daughter who gave herself for her cross, consumptive step-mother and for the little children of another? Where is the daughter who had pity upon the filthy drunkard, her earthly father, undismayed by his beastliness?’ And He will say, ‘Come to me! I have already forgiven thee once.... I have forgiven thee once.... Thy sins which are many are forgiven thee for thou hast loved much....’ And he will forgive my Sonia, He will forgive, I know it... I felt it in my heart when I was with her just now! And He will judge and will forgive all, the good and the evil, the wise and the meek.... And when He has done with all of them, then He will summon us. ‘You too come forth,’ He will say, ‘Come forth ye drunkards, come forth, ye weak ones, come forth, ye children of shame!’ And we shall all come forth, without shame and shall stand before him. And He will say unto us, ‘Ye are swine, made in the Image of the Beast and with his mark; but come ye also!’ And the wise ones and those of understanding will say, ‘Oh Lord, why dost Thou receive these men?’ And He will say, ‘This is why I receive them, oh ye wise, this is why I receive them, oh ye of understanding, that not one of them believed himself to be worthy of this.’ And He will hold out His hands to us and we shall fall down before him... and we shall weep... and we shall understand all things! Then we shall understand all!... and all will understand, Katerina Ivanovna even... she will understand.... Lord, Thy kingdom come!” And he sank down on the bench exhausted, and helpless, looking at no one, apparently oblivious of his surroundings and plunged in deep thought. His words had created a certain impression; there was a moment of silence; but soon laughter and oaths were heard again.

“That’s his notion!”

“Talked himself silly!”

“A fine clerk he is!”

And so on, and so on.

“Let us go, sir,” said Marmeladov all at once, raising his head and addressing Raskolnikov--“come along with me... Kozel’s house, looking into the yard. I’m going to Katerina Ivanovna--time I did.”

Raskolnikov had for some time been wanting to go and he had meant to help him. Marmeladov was much unsteadier on his legs than in his speech and leaned heavily on the young man. They had two or three hundred paces to go. The drunken man was more and more overcome by dismay and confusion as they drew nearer the house.

“It’s not Katerina Ivanovna I am afraid of now,” he muttered in agitation--“and that she will begin pulling my hair. What does my hair matter! Bother my hair! That’s what I say! Indeed it will be better if she does begin pulling it, that’s not what I am afraid of... it’s her eyes I am afraid of... yes, her eyes... the red on her cheeks, too, frightens me... and her breathing too.... Have you noticed how people in that disease breathe... when they are excited? I am frightened of the children’s crying, too.... For if Sonia has not taken them food... I don’t know what’s happened! I don’t know! But blows I am not afraid of.... Know, sir, that such blows are not a pain to me, but even an enjoyment. In fact I can’t get on without it.... It’s better so. Let her strike me, it relieves her heart... it’s better so... There is the house. The house of Kozel, the cabinet-maker... a German, well-to-do. Lead the way!”

They went in from the yard and up to the fourth storey. The staircase got darker and darker as they went up. It was nearly eleven o’clock and although in summer in Petersburg there is no real night, yet it was quite dark at the top of the stairs.

A grimy little door at the very top of the stairs stood ajar. A very poor-looking room about ten paces long was lighted up by a candle-end; the whole of it was visible from the entrance. It was all in disorder, littered up with rags of all sorts, especially children’s garments. Across the furthest corner was stretched a ragged sheet. Behind it probably was the bed. There was nothing in the room except two chairs and a sofa covered with American leather, full of holes, before which stood an old deal kitchen-table, unpainted

and uncovered. At the edge of the table stood a smoldering tallow-candle in an iron candlestick. It appeared that the family had a room to themselves, not part of a room, but their room was practically a passage. The door leading to the other rooms, or rather cupboards, into which Amalia Lippevechsel's flat was divided stood half open, and there was shouting, uproar and laughter within. People seemed to be playing cards and drinking tea there. Words of the most unceremonious kind flew out from time to time.

Raskolnikov recognised Katerina Ivanovna at once. She was a rather tall, slim and graceful woman, terribly emaciated, with magnificent dark brown hair and with a hectic flush in her cheeks. She was pacing up and down in her little room, pressing her hands against her chest; her lips were parched and her breathing came in nervous broken gasps. Her eyes glittered as in fever and looked about with a harsh immovable stare. And that consumptive and excited face with the last flickering light of the candle-end playing upon it made a sickening impression. She seemed to Raskolnikov about thirty years old and was certainly a strange wife for Marmeladov.... She had not heard them and did not notice them coming in. She seemed to be lost in thought, hearing and seeing nothing. The room was close, but she had not opened the window; a stench rose from the staircase, but the door on to the stairs was not closed. From the inner rooms clouds of tobacco smoke floated in, she kept coughing, but did not close the door. The youngest child, a girl of six, was asleep, sitting curled up on the floor with her head on the sofa. A boy a year older stood crying and shaking in the corner, probably he had just had a beating. Beside him stood a girl of nine years old, tall and thin, wearing a thin and ragged chemise with an ancient cashmere pelisse flung over her bare shoulders, long outgrown and barely reaching her knees. Her arm, as thin as a stick, was round her brother's neck. She was trying to comfort him, whispering something to him, and doing all she could to keep him from whimpering again. At the same time her large dark eyes, which looked larger still from the thinness of her frightened face, were watching her mother with alarm. Marmeladov did not enter the door, but dropped on his knees in the very doorway, pushing Raskolnikov in front of him. The woman seeing a stranger stopped indifferently facing him, coming to herself for a moment and apparently wondering what he had come for. But evidently she decided that he was going into the next room, as he had to pass through hers to get there. Taking no further notice of him, she walked towards the outer door to close it and uttered a sudden scream on seeing her husband on his knees in the doorway.

"Ah!" she cried out in a frenzy, "he has come back! The criminal! the monster!... And where is the money? What's in your pocket, show me! And your clothes are all different! Where are your clothes? Where is the money! Speak!"

And she fell to searching him. Marmeladov submissively and obediently held up both arms to facilitate the search. Not a farthing was there.

"Where is the money?" she cried--"Mercy on us, can he have drunk it all? There were twelve silver roubles left in the chest!" and in a fury she seized him by the hair and dragged him into the room. Marmeladov seconded her efforts by meekly crawling along on his knees.

"And this is a consolation to me! This does not hurt me, but is a positive con-so-la-tion, ho-nou-red sir," he called out, shaken to and fro by his hair and even once striking the ground with his forehead. The child asleep on the floor woke up, and began to cry. The boy in the corner losing all control began trembling and screaming and rushed to his sister in violent terror, almost in a fit. The eldest girl was shaking like a leaf.

"He's drunk it! he's drunk it all," the poor woman screamed in despair--"and his clothes are gone! And they are hungry, hungry!"--and wringing her hands she pointed to the children. "Oh, accursed life! And you, are you not ashamed?"--she pounced all at once upon Raskolnikov--"from the tavern! Have you been drinking with him? You have been drinking with him, too! Go away!"

The young man was hastening away without uttering a word. The inner door was thrown wide open and inquisitive faces were peering in at it. Coarse laughing faces with pipes and cigarettes and heads wearing caps thrust themselves in at the doorway. Further in could be seen figures in dressing gowns flung open, in costumes of unseemly scantiness, some of them with cards in their hands. They were particularly diverted, when Marmeladov, dragged about by his hair, shouted that it was a consolation to him. They even began to come into the room; at last a sinister shrill outcry was heard: this came from Amalia Lippevechsel herself pushing her way amongst them and trying to restore order after her own fashion and for the hundredth time to frighten the poor woman by ordering her with coarse abuse to clear out of the room next day. As he went out, Raskolnikov had time to put his hand into his pocket, to snatch up the coppers he had received in exchange for his rouble in the tavern and to lay them unnoticed on the window. Afterwards on the stairs, he changed his mind and would have gone back.

"What a stupid thing I've done," he thought to himself, "they have Sonia and I want it myself." But reflecting that it would be impossible to take it back now and that in any case he would not have taken it, he dismissed it with a wave of his hand and went

back to his lodging. “Sonia wants pomatum too,” he said as he walked along the street, and he laughed malignantly--“such smartness costs money.... Hm! And maybe Sonia herself will be bankrupt to-day, for there is always a risk, hunting big game... digging for gold... then they would all be without a crust to-morrow except for my money. Hurrah for Sonia! What a mine they’ve dug there! And they’re making the most of it! Yes, they are making the most of it! They’ve wept over it and grown used to it. Man grows used to everything, the scoundrel!”

He sank into thought.

“And what if I am wrong,” he cried suddenly after a moment’s thought. “What if man is not really a scoundrel, man in general, I mean, the whole race of mankind--then all the rest is prejudice, simply artificial terrors and there are no barriers and it’s all as it should be.”

CHAPTER III

He waked up late next day after a broken sleep. But his sleep had not refreshed him; he waked up bilious, irritable, ill-tempered, and looked with hatred at his room. It was a tiny cupboard of a room about six paces in length. It had a poverty-stricken appearance with its dusty yellow paper peeling off the walls, and it was so low-pitched that a man of more than average height was ill at ease in it and felt every moment that he would knock his head against the ceiling. The furniture was in keeping with the room: there were three old chairs, rather rickety; a painted table in the corner on which lay a few manuscripts and books; the dust that lay thick upon them showed that they had been long untouched. A big clumsy sofa occupied almost the whole of one wall and half the floor space of the room; it was once covered with chintz, but was now in rags and served Raskolnikov as a bed. Often he went to sleep on it, as he was, without undressing, without sheets, wrapped in his old student’s overcoat, with his head on one little pillow, under which he heaped up all the linen he had, clean and dirty, by way of a bolster. A little table stood in front of the sofa.

It would have been difficult to sink to a lower ebb of disorder, but to Raskolnikov in his present state of mind this was positively agreeable. He had got completely away from everyone, like a tortoise in its shell, and even the sight of a servant girl who had to wait upon him and looked sometimes into his room made him writhe with nervous irritation. He was in the condition that overtakes some monomaniacs entirely concentrated upon one thing. His landlady had for the last fortnight given up sending him in meals, and he had not yet thought of expostulating with her, though he went without his dinner. Nastasya, the cook and only servant, was rather pleased at the lodger’s mood and had entirely given up sweeping and doing his room, only once a week or so she would stray into his room with a broom. She waked him up that day.

“Get up, why are you asleep?” she called to him. “It’s past nine, I have brought you some tea; will you have a cup? I should think you’re fairly starving?”

Raskolnikov opened his eyes, started and recognised Nastasya.

“From the landlady, eh?” he asked, slowly and with a sickly face sitting up on the sofa.

“From the landlady, indeed!”

She set before him her own cracked teapot full of weak and stale tea and laid two yellow lumps of sugar by the side of it.

“Here, Nastasya, take it please,” he said, fumbling in his pocket (for he had slept in his clothes) and taking out a handful of coppers--“run and buy me a loaf. And get me a little sausage, the cheapest, at the pork-butcher’s.”

“The loaf I’ll fetch you this very minute, but wouldn’t you rather have some cabbage soup instead of sausage? It’s capital soup, yesterday’s. I saved it for you yesterday, but you came in late. It’s fine soup.”

When the soup had been brought, and he had begun upon it, Nastasya sat down beside him on the sofa and began chatting. She was a country peasant-woman and a very talkative one.

“Praskovya Pavlovna means to complain to the police about you,” she said.

He scowled.

“To the police? What does she want?”

“You don’t pay her money and you won’t turn out of the room. That’s what she wants, to be sure.”

“The devil, that’s the last straw,” he muttered, grinding his teeth, “no, that would not suit me... just now. She is a fool,” he added aloud. “I’ll go and talk to her to-day.”

“Fool she is and no mistake, just as I am. But why, if you are so clever, do you lie here like a sack and have nothing to show for it? One time you used to go out, you say, to teach children. But why is it you do nothing now?”

“I am doing...” Raskolnikov began sullenly and reluctantly.

“What are you doing?”

“Work...”

“What sort of work?”

“I am thinking,” he answered seriously after a pause.

Nastasya was overcome with a fit of laughter. She was given to laughter and when anything amused her, she laughed inaudibly, quivering and shaking all over till she felt ill.

“And have you made much money by your thinking?” she managed to articulate at last.

“One can’t go out to give lessons without boots. And I’m sick of it.”

“Don’t quarrel with your bread and butter.”

“They pay so little for lessons. What’s the use of a few coppers?” he answered, reluctantly, as though replying to his own thought.

“And you want to get a fortune all at once?”

He looked at her strangely.

“Yes, I want a fortune,” he answered firmly, after a brief pause.

“Don’t be in such a hurry, you quite frighten me! Shall I get you the loaf or not?”

“As you please.”

“Ah, I forgot! A letter came for you yesterday when you were out.”

“A letter? for me! from whom?”

“I can’t say. I gave three copecks of my own to the postman for it. Will you pay me back?”

“Then bring it to me, for God’s sake, bring it,” cried Raskolnikov greatly excited--“good God!”

A minute later the letter was brought him. That was it: from his mother, from the province of R----. He turned pale when he took it. It was a long while since he had received a letter, but another feeling also suddenly stabbed his heart.

“Nastasya, leave me alone, for goodness’ sake; here are your three copecks, but for goodness’ sake, make haste and go!”

The letter was quivering in his hand; he did not want to open it in her presence; he wanted to be left _alone_ with this letter. When Nastasya had gone out, he lifted it quickly to his lips and kissed it; then he gazed intently at the address, the small, sloping handwriting, so dear and familiar, of the mother who had once taught him to read and write. He delayed; he seemed almost afraid of something. At last he opened it; it was a thick heavy letter, weighing over two ounces, two large sheets of note paper were covered with very small handwriting.

“My dear Rodya,” wrote his mother--“it’s two months since I last had a talk with you by letter which has distressed me and even kept me awake at night, thinking. But I am sure you will not blame me for my inevitable silence. You know how I love you; you are all we have to look to, Dounia and I, you are our all, our one hope, our one stay. What a grief it was to me when I heard that you had given up the university some months ago, for want of means to keep yourself and that you had lost your lessons and your other work! How could I help you out of my hundred and twenty roubles a year pension? The fifteen roubles I sent you four months ago I borrowed, as you know, on security of my pension, from Vassily Ivanovitch Vahrushin a merchant of this town. He is a kind-hearted

man and was a friend of your father's too. But having given him the right to receive the pension, I had to wait till the debt was paid off and that is only just done, so that I've been unable to send you anything all this time. But now, thank God, I believe I shall be able to send you something more and in fact we may congratulate ourselves on our good fortune now, of which I hasten to inform you. In the first place, would you have guessed, dear Rodya, that your sister has been living with me for the last six weeks and we shall not be separated in the future. Thank God, her sufferings are over, but I will tell you everything in order, so that you may know just how everything has happened and all that we have hitherto concealed from you. When you wrote to me two months ago that you had heard that Dounia had a great deal to put up with in the Svidrigaïlovs' house, when you wrote that and asked me to tell you all about it--what could I write in answer to you? If I had written the whole truth to you, I dare say you would have thrown up everything and have come to us, even if you had to walk all the way, for I know your character and your feelings, and you would not let your sister be insulted. I was in despair myself, but what could I do? And, besides, I did not know the whole truth myself then. What made it all so difficult was that Dounia received a hundred roubles in advance when she took the place as governess in their family, on condition of part of her salary being deducted every month, and so it was impossible to throw up the situation without repaying the debt. This sum (now I can explain it all to you, my precious Rodya) she took chiefly in order to send you sixty roubles, which you needed so terribly then and which you received from us last year. We deceived you then, writing that this money came from Dounia's savings, but that was not so, and now I tell you all about it, because, thank God, things have suddenly changed for the better, and that you may know how Dounia loves you and what a heart she has. At first indeed Mr. Svidrigaïlov treated her very rudely and used to make disrespectful and jeering remarks at table.... But I don't want to go into all those painful details, so as not to worry you for nothing when it is now all over. In short, in spite of the kind and generous behaviour of Marfa Petrovna, Mr. Svidrigaïlov's wife, and all the rest of the household, Dounia had a very hard time, especially when Mr. Svidrigaïlov, relapsing into his old regimental habits, was under the influence of Bacchus. And how do you think it was all explained later on? Would you believe that the crazy fellow had conceived a passion for Dounia from the beginning, but had concealed it under a show of rudeness and contempt. Possibly he was ashamed and horrified himself at his own flighty hopes, considering his years and his being the father of a family; and that made him angry with Dounia. And possibly, too, he hoped by his rude and sneering behaviour to hide the truth from others. But at last he lost all control and had the face to make Dounia an open and shameful proposal, promising her all sorts of inducements and offering, besides, to throw up everything and take her to another estate of his, or even abroad. You can imagine all she went through! To leave her situation at once was impossible not only on account of the money debt, but also to spare the feelings of Marfa Petrovna, whose suspicions would have been aroused: and then Dounia would have been the cause of a rupture in the family. And it would have meant a terrible scandal for Dounia too; that would have been inevitable. There were various other reasons owing to which Dounia could not hope to escape from that awful house for another six weeks. You know Dounia, of course; you know how clever she is and what a strong will she has. Dounia can endure a great deal and even in the most difficult cases she has the fortitude to maintain her firmness. She did not even write to me about everything for fear of upsetting me, although we were constantly in communication. It all ended very unexpectedly. Marfa Petrovna accidentally overheard her husband imploring Dounia in the garden, and, putting quite a wrong interpretation on the position, threw the blame upon her, believing her to be the cause of it all. An awful scene took place between them on the spot in the garden; Marfa Petrovna went so far as to strike Dounia, refused to hear anything and was shouting at her for a whole hour and then gave orders that Dounia should be packed off at once to me in a plain peasant's cart, into which they flung all her things, her linen and her clothes, all pell-mell, without folding it up and packing it. And a heavy shower of rain came on, too, and Dounia, insulted and put to shame, had to drive with a peasant in an open cart all the seventeen versts into town. Only think now what answer could I have sent to the letter I received from you two months ago and what could I have written? I was in despair; I dared not write to you the truth because you would have been very unhappy, mortified and indignant, and yet what could you do? You could only perhaps ruin yourself, and, besides, Dounia would not allow it; and fill up my letter with trifles when my heart was so full of sorrow, I could not. For a whole month the town was full of gossip about this scandal, and it came to such a pass that Dounia and I dared not even go to church on account of the contemptuous looks, whispers, and even remarks made aloud about us. All our acquaintances avoided us, nobody even bowed to us in the street, and I learnt that some shopmen and clerks were intending to insult us in a shameful way, smearing the gates of our house with pitch, so that the landlord began to tell us we must leave. All this was set going by Marfa Petrovna who managed to slander Dounia and throw dirt at her in every family. She knows everyone in the neighbourhood, and that month she was continually coming into the town, and as she is rather talkative and fond of gossiping about her family affairs and particularly of complaining to all and each of her husband--which is not at all right--so in a short time she had spread her story not only in the town, but over the whole surrounding district. It made me ill, but Dounia bore it better than I did, and if only you could have seen how she endured it all and tried to comfort me and cheer me up! She is an angel! But by God's mercy, our sufferings were cut short: Mr. Svidrigaïlov returned to his senses and repented and, probably feeling sorry for Dounia, he laid before Marfa Petrovna a

complete and unmistakable proof of Dounia's innocence, in the form of a letter Dounia had been forced to write and give to him, before Marfa Petrovna came upon them in the garden. This letter, which remained in Mr. Svidrigaïlov's hands after her departure, she had written to refuse personal explanations and secret interviews, for which he was entreating her. In that letter she reproached him with great heat and indignation for the baseness of his behaviour in regard to Marfa Petrovna, reminding him that he was the father and head of a family and telling him how infamous it was of him to torment and make unhappy a defenceless girl, unhappy enough already. Indeed, dear Rodya, the letter was so nobly and touchingly written that I sobbed when I read it and to this day I cannot read it without tears. Moreover, the evidence of the servants, too, cleared Dounia's reputation; they had seen and known a great deal more than Mr. Svidrigaïlov had himself supposed--as indeed is always the case with servants. Marfa Petrovna was completely taken aback, and 'again crushed' as she said herself to us, but she was completely convinced of Dounia's innocence. The very next day, being Sunday, she went straight to the Cathedral, knelt down and prayed with tears to Our Lady to give her strength to bear this new trial and to do her duty. Then she came straight from the Cathedral to us, told us the whole story, wept bitterly and, fully penitent, she embraced Dounia and besought her to forgive her. The same morning without any delay, she went round to all the houses in the town and everywhere, shedding tears, she asserted in the most flattering terms Dounia's innocence and the nobility of her feelings and her behavior. What was more, she showed and read to everyone the letter in Dounia's own handwriting to Mr. Svidrigaïlov and even allowed them to take copies of it--which I must say I think was superfluous. In this way she was busy for several days in driving about the whole town, because some people had taken offence through precedence having been given to others. And therefore they had to take turns, so that in every house she was expected before she arrived, and everyone knew that on such and such a day Marfa Petrovna would be reading the letter in such and such a place and people assembled for every reading of it, even many who had heard it several times already both in their own houses and in other people's. In my opinion a great deal, a very great deal of all this was unnecessary; but that's Marfa Petrovna's character. Anyway she succeeded in completely re-establishing Dounia's reputation and the whole ignominy of this affair rested as an indelible disgrace upon her husband, as the only person to blame, so that I really began to feel sorry for him; it was really treating the crazy fellow too harshly. Dounia was at once asked to give lessons in several families, but she refused. All of a sudden everyone began to treat her with marked respect and all this did much to bring about the event by which, one may say, our whole fortunes are now transformed. You must know, dear Rodya, that Dounia has a suitor and that she has already consented to marry him. I hasten to tell you all about the matter, and though it has been arranged without asking your consent, I think you will not be aggrieved with me or with your sister on that account, for you will see that we could not wait and put off our decision till we heard from you. And you could not have judged all the facts without being on the spot. This was how it happened. He is already of the rank of a counsellor, Pyotr Petrovitch Luzhin, and is distantly related to Marfa Petrovna, who has been very active in bringing the match about. It began with his expressing through her his desire to make our acquaintance. He was properly received, drank coffee with us and the very next day he sent us a letter in which he very courteously made an offer and begged for a speedy and decided answer. He is a very busy man and is in a great hurry to get to Petersburg, so that every moment is precious to him. At first, of course, we were greatly surprised, as it had all happened so quickly and unexpectedly. We thought and talked it over the whole day. He is a well-to-do man, to be depended upon, he has two posts in the government and has already made his fortune. It is true that he is forty-five years old, but he is of a fairly prepossessing appearance and might still be thought attractive by women, and he is altogether a very respectable and presentable man, only he seems a little morose and somewhat conceited. But possibly that may only be the impression he makes at first sight. And beware, dear Rodya, when he comes to Petersburg, as he shortly will do, beware of judging him too hastily and severely, as your way is, if there is anything you do not like in him at first sight. I give you this warning, although I feel sure that he will make a favourable impression upon you. Moreover, in order to understand any man one must be deliberate and careful to avoid forming prejudices and mistaken ideas, which are very difficult to correct and get over afterwards. And Pyotr Petrovitch, judging by many indications, is a thoroughly estimable man. At his first visit, indeed, he told us that he was a practical man, but still he shares, as he expressed it, many of the convictions 'of our most rising generation' and he is an opponent of all prejudices. He said a good deal more, for he seems a little conceited and likes to be listened to, but this is scarcely a vice. I, of course, understood very little of it, but Dounia explained to me that, though he is not a man of great education, he is clever and seems to be good-natured. You know your sister's character, Rodya. She is a resolute, sensible, patient and generous girl, but she has a passionate heart, as I know very well. Of course, there is no great love either on his side, or on hers, but Dounia is a clever girl and has the heart of an angel, and will make it her duty to make her husband happy who on his side will make her happiness his care. Of that we have no good reason to doubt, though it must be admitted the matter has been arranged in great haste. Besides he is a man of great prudence and he will see, to be sure, of himself, that his own happiness will be the more secure, the happier Dounia is with him. And as for some defects of character, for some habits and even certain differences of opinion--which indeed are inevitable even in the happiest marriages--Dounia has said that, as regards all that, she relies on herself, that there is nothing to be

uneasy about, and that she is ready to put up with a great deal, if only their future relationship can be an honourable and straightforward one. He struck me, for instance, at first, as rather abrupt, but that may well come from his being an outspoken man, and that is no doubt how it is. For instance, at his second visit, after he had received Dounia's consent, in the course of conversation, he declared that before making Dounia's acquaintance, he had made up his mind to marry a girl of good reputation, without dowry and, above all, one who had experienced poverty, because, as he explained, a man ought not to be indebted to his wife, but that it is better for a wife to look upon her husband as her benefactor. I must add that he expressed it more nicely and politely than I have done, for I have forgotten his actual phrases and only remember the meaning. And, besides, it was obviously not said of design, but slipped out in the heat of conversation, so that he tried afterwards to correct himself and smooth it over, but all the same it did strike me as somewhat rude, and I said so afterwards to Dounia. But Dounia was vexed, and answered that 'words are not deeds,' and that, of course, is perfectly true. Dounia did not sleep all night before she made up her mind, and, thinking that I was asleep, she got out of bed and was walking up and down the room all night; at last she knelt down before the ikon and prayed long and fervently and in the morning she told me that she had decided.

"I have mentioned already that Pyotr Petrovitch is just setting off for Petersburg, where he has a great deal of business, and he wants to open a legal bureau. He has been occupied for many years in conducting civil and commercial litigation, and only the other day he won an important case. He has to be in Petersburg because he has an important case before the Senate. So, Rodya dear, he may be of the greatest use to you, in every way indeed, and Dounia and I have agreed that from this very day you could definitely enter upon your career and might consider that your future is marked out and assured for you. Oh, if only this comes to pass! This would be such a benefit that we could only look upon it as a providential blessing. Dounia is dreaming of nothing else. We have even ventured already to drop a few words on the subject to Pyotr Petrovitch. He was cautious in his answer, and said that, of course, as he could not get on without a secretary, it would be better to be paying a salary to a relation than to a stranger, if only the former were fitted for the duties (as though there could be doubt of your being fitted!) but then he expressed doubts whether your studies at the university would leave you time for work at his office. The matter dropped for the time, but Dounia is thinking of nothing else now. She has been in a sort of fever for the last few days, and has already made a regular plan for your becoming in the end an associate and even a partner in Pyotr Petrovitch's business, which might well be, seeing that you are a student of law. I am in complete agreement with her, Rodya, and share all her plans and hopes, and think there is every probability of realising them. And in spite of Pyotr Petrovitch's evasiveness, very natural at present (since he does not know you), Dounia is firmly persuaded that she will gain everything by her good influence over her future husband; this she is reckoning upon. Of course we are careful not to talk of any of these more remote plans to Pyotr Petrovitch, especially of your becoming his partner. He is a practical man and might take this very coldly, it might all seem to him simply a day-dream. Nor has either Dounia or I breathed a word to him of the great hopes we have of his helping us to pay for your university studies; we have not spoken of it in the first place, because it will come to pass of itself, later on, and he will no doubt without wasting words offer to do it of himself, (as though he could refuse Dounia that) the more readily since you may by your own efforts become his right hand in the office, and receive this assistance not as a charity, but as a salary earned by your own work. Dounia wants to arrange it all like this and I quite agree with her. And we have not spoken of our plans for another reason, that is, because I particularly wanted you to feel on an equal footing when you first meet him. When Dounia spoke to him with enthusiasm about you, he answered that one could never judge of a man without seeing him close, for oneself, and that he looked forward to forming his own opinion when he makes your acquaintance. Do you know, my precious Rodya, I think that perhaps for some reasons (nothing to do with Pyotr Petrovitch though, simply for my own personal, perhaps old-womanish, fancies) I should do better to go on living by myself, apart, than with them, after the wedding. I am convinced that he will be generous and delicate enough to invite me and to urge me to remain with my daughter for the future, and if he has said nothing about it hitherto, it is simply because it has been taken for granted; but I shall refuse. I have noticed more than once in my life that husbands don't quite get on with their mothers-in-law, and I don't want to be the least bit in anyone's way, and for my own sake, too, would rather be quite independent, so long as I have a crust of bread of my own, and such children as you and Dounia. If possible, I would settle somewhere near you, for the most joyful piece of news, dear Rodya, I have kept for the end of my letter: know then, my dear boy, that we may, perhaps, be all together in a very short time and may embrace one another again after a separation of almost three years! It is settled _for certain_ that Dounia and I are to set off for Petersburg, exactly when I don't know, but very, very soon, possibly in a week. It all depends on Pyotr Petrovitch who will let us know when he has had time to look round him in Petersburg. To suit his own arrangements he is anxious to have the ceremony as soon as possible, even before the fast of Our Lady, if it could be managed, or if that is too soon to be ready, immediately after. Oh, with what happiness I shall press you to my heart! Dounia is all excitement at the joyful thought of seeing you, she said one day in joke that she would be ready to marry Pyotr Petrovitch for that alone. She is an angel! She is not writing anything to you now, and has only told me to write that she has so much, so much to tell you that she is not going to take up her pen now, for a few lines

would tell you nothing, and it would only mean upsetting herself; she bids me send you her love and innumerable kisses. But although we shall be meeting so soon, perhaps I shall send you as much money as I can in a day or two. Now that everyone has heard that Dounia is to marry Pyotr Petrovitch, my credit has suddenly improved and I know that Afanasy Ivanovitch will trust me now even to seventy-five roubles on the security of my pension, so that perhaps I shall be able to send you twenty-five or even thirty roubles. I would send you more, but I am uneasy about our travelling expenses; for though Pyotr Petrovitch has been so kind as to undertake part of the expenses of the journey, that is to say, he has taken upon himself the conveyance of our bags and big trunk (which will be conveyed through some acquaintances of his), we must reckon upon some expense on our arrival in Petersburg, where we can't be left without a halfpenny, at least for the first few days. But we have calculated it all, Dounia and I, to the last penny, and we see that the journey will not cost very much. It is only ninety versts from us to the railway and we have come to an agreement with a driver we know, so as to be in readiness; and from there Dounia and I can travel quite comfortably third class. So that I may very likely be able to send to you not twenty-five, but thirty roubles. But enough; I have covered two sheets already and there is no space left for more; our whole history, but so many events have happened! And now, my precious Rodya, I embrace you and send you a mother's blessing till we meet. Love Dounia your sister, Rodya; love her as she loves you and understand that she loves you beyond everything, more than herself. She is an angel and you, Rodya, you are everything to us--our one hope, our one consolation. If only you are happy, we shall be happy. Do you still say your prayers, Rodya, and believe in the mercy of our Creator and our Redeemer? I am afraid in my heart that you may have been visited by the new spirit of infidelity that is abroad to-day; If it is so, I pray for you. Remember, dear boy, how in your childhood, when your father was living, you used to lisp your prayers at my knee, and how happy we all were in those days. Good-bye, till we meet then--I embrace you warmly, warmly, with many kisses.

"Yours till death,

"PULCHERIA RASKOLNIKOV."

Almost from the first, while he read the letter, Raskolnikov's face was wet with tears; but when he finished it, his face was pale and distorted and a bitter, wrathful and malignant smile was on his lips. He laid his head down on his threadbare dirty pillow and pondered, pondered a long time. His heart was beating violently, and his brain was in a turmoil. At last he felt cramped and stifled in the little yellow room that was like a cupboard or a box. His eyes and his mind craved for space. He took up his hat and went out, this time without dread of meeting anyone; he had forgotten his dread. He turned in the direction of the Vassilyevsky Ostrov, walking along Vassilyevsky Prospect, as though hastening on some business, but he walked, as his habit was, without noticing his way, muttering and even speaking aloud to himself, to the astonishment of the passers-by. Many of them took him to be drunk.

CHAPTER IV

His mother's letter had been a torture to him, but as regards the chief fact in it, he had felt not one moment's hesitation, even whilst he was reading the letter. The essential question was settled, and irrevocably settled, in his mind: "Never such a marriage while I am alive and Mr. Luzhin be damned!" "The thing is perfectly clear," he muttered to himself, with a malignant smile anticipating the triumph of his decision. "No, mother, no, Dounia, you won't deceive me! and then they apologise for not asking my advice and for taking the decision without me! I dare say! They imagine it is arranged now and can't be broken off; but we will see whether it can or not! A magnificent excuse: 'Pyotr Petrovitch is such a busy man that even his wedding has to be in post-haste, almost by express.' No, Dounia, I see it all and I know what you want to say to me; and I know too what you were thinking about, when you walked up and down all night, and what your prayers were like before the Holy Mother of Kazan who stands in mother's bedroom. Bitter is the ascent to Golgotha.... Hm... so it is finally settled; you have determined to marry a sensible business man, Avdotya Romanovna, one who has a fortune (has _already_ made his fortune, that is so much more solid and impressive), a man who holds two government posts and who shares the ideas of our most rising generation, as mother writes, and who _seems_ to be kind, as Dounia herself observes. That _seems_ beats everything! And that very Dounia for that very '_seems_' is marrying him! Splendid! splendid!

"... But I should like to know why mother has written to me about 'our most rising generation'? Simply as a descriptive touch, or with the idea of prepossessing me in favour of Mr. Luzhin? Oh, the cunning of them! I should like to know one thing more: how far they were open with one another that day and night and all this time since? Was it all put into _words_, or did both understand that they had the same thing at heart and in their minds, so that there was no need to speak of it aloud, and better not to speak of it. Most likely it was partly like that, from mother's letter it's evident: he struck her as rude _a little_, and mother in her simplicity took her

observations to Dounia. And she was sure to be vexed and ‘answered her angrily.’ I should think so! Who would not be angered when it was quite clear without any naïve questions and when it was understood that it was useless to discuss it. And why does she write to me, ‘love Dounia, Rodya, and she loves you more than herself’? Has she a secret conscience-prick at sacrificing her daughter to her son? ‘You are our one comfort, you are everything to us.’ Oh, mother!”

His bitterness grew more and more intense, and if he had happened to meet Mr. Luzhin at the moment, he might have murdered him.

“Hm... yes, that’s true,” he continued, pursuing the whirling ideas that chased each other in his brain, “it is true that ‘it needs time and care to get to know a man,’ but there is no mistake about Mr. Luzhin. The chief thing is he is ‘a man of business and _seems_ kind,’ that was something, wasn’t it, to send the bags and big box for them! A kind man, no doubt after that! But his _bride_ and her mother are to drive in a peasant’s cart covered with sacking (I know, I have been driven in it). No matter! It is only ninety versts and then they can ‘travel very comfortably, third class,’ for a thousand versts! Quite right, too. One must cut one’s coat according to one’s cloth, but what about you, Mr. Luzhin? She is your bride.... And you must be aware that her mother has to raise money on her pension for the journey. To be sure it’s a matter of business, a partnership for mutual benefit, with equal shares and expenses;--food and drink provided, but pay for your tobacco. The business man has got the better of them, too. The luggage will cost less than their fares and very likely go for nothing. How is it that they don’t both see all that, or is it that they don’t want to see? And they are pleased, pleased! And to think that this is only the first blossoming, and that the real fruits are to come! But what really matters is not the stinginess, is not the meanness, but the _tone_ of the whole thing. For that will be the tone after marriage, it’s a foretaste of it. And mother too, why should she be so lavish? What will she have by the time she gets to Petersburg? Three silver roubles or two ‘paper ones’ as _she_ says.... that old woman... hm. What does she expect to live upon in Petersburg afterwards? She has her reasons already for guessing that she _could not_ live with Dounia after the marriage, even for the first few months. The good man has no doubt let slip something on that subject also, though mother would deny it: ‘I shall refuse,’ says she. On whom is she reckoning then? Is she counting on what is left of her hundred and twenty roubles of pension when Afanasy Ivanovitch’s debt is paid? She knits woollen shawls and embroiders cuffs, ruining her old eyes. And all her shawls don’t add more than twenty roubles a year to her hundred and twenty, I know that. So she is building all her hopes all the time on Mr. Luzhin’s generosity; ‘he will offer it of himself, he will press it on me.’ You may wait a long time for that! That’s how it always is with these Schilleresque noble hearts; till the last moment every goose is a swan with them, till the last moment, they hope for the best and will see nothing wrong, and although they have an inkling of the other side of the picture, yet they won’t face the truth till they are forced to; the very thought of it makes them shiver; they thrust the truth away with both hands, until the man they deck out in false colours puts a fool’s cap on them with his own hands. I should like to know whether Mr. Luzhin has any orders of merit; I bet he has the Anna in his buttonhole and that he puts it on when he goes to dine with contractors or merchants. He will be sure to have it for his wedding, too! Enough of him, confound him!

“Well,... mother I don’t wonder at, it’s like her, God bless her, but how could Dounia? Dounia darling, as though I did not know you! You were nearly twenty when I saw you last: I understood you then. Mother writes that ‘Dounia can put up with a great deal.’ I know that very well. I knew that two years and a half ago, and for the last two and a half years I have been thinking about it, thinking of just that, that ‘Dounia can put up with a great deal.’ If she could put up with Mr. Svidrigaïlov and all the rest of it, she certainly can put up with a great deal. And now mother and she have taken it into their heads that she can put up with Mr. Luzhin, who propounds the theory of the superiority of wives raised from destitution and owing everything to their husband’s bounty--who propounds it, too, almost at the first interview. Granted that he ‘let it slip,’ though he is a sensible man, (yet maybe it was not a slip at all, but he meant to make himself clear as soon as possible) but Dounia, Dounia? She understands the man, of course, but she will have to live with the man. Why! she’d live on black bread and water, she would not sell her soul, she would not barter her moral freedom for comfort; she would not barter it for all Schleswig-Holstein, much less Mr. Luzhin’s money. No, Dounia was not that sort when I knew her and... she is still the same, of course! Yes, there’s no denying, the Svidrigaïlovs are a bitter pill! It’s a bitter thing to spend one’s life a governess in the provinces for two hundred roubles, but I know she would rather be a nigger on a plantation or a Lett with a German master than degrade her soul, and her moral dignity, by binding herself for ever to a man whom she does not respect and with whom she has nothing in common--for her own advantage. And if Mr. Luzhin had been of unalloyed gold, or one huge diamond, she would never have consented to become his legal concubine. Why is she consenting then? What’s the point of it? What’s the answer? It’s clear enough: for herself, for her comfort, to save her life she would not sell herself, but for someone else she is doing it! For one she loves, for one she adores, she will sell herself! That’s what it all amounts to; for her brother, for her mother, she will sell herself! She will sell everything! In such cases, ‘we overcome our moral feeling if necessary,’ freedom, peace, conscience even, all, all are brought into the market. Let my life go, if only my dear ones may be happy! More than that, we become

casuists, we learn to be Jesuitical and for a time maybe we can soothe ourselves, we can persuade ourselves that it is one's duty for a good object. That's just like us, it's as clear as daylight. It's clear that Rodion Romanovitch Raskolnikov is the central figure in the business, and no one else. Oh, yes, she can ensure his happiness, keep him in the university, make him a partner in the office, make his whole future secure; perhaps he may even be a rich man later on, prosperous, respected, and may even end his life a famous man! But my mother? It's all Rodya, precious Rodya, her first born! For such a son who would not sacrifice such a daughter! Oh, loving, over-partial hearts! Why, for his sake we would not shrink even from Sonia's fate. Sonia, Sonia Marmeladov, the eternal victim so long as the world lasts. Have you taken the measure of your sacrifice, both of you? Is it right? Can you bear it? Is it any use? Is there sense in it? And let me tell you, Dounia, Sonia's life is no worse than life with Mr. Luzhin. 'There can be no question of love,' mother writes. And what if there can be no respect either, if on the contrary there is aversion, contempt, repulsion, what then? So you will have to 'keep up your appearance,' too. Is not that so? Do you understand what that smartness means? Do you understand that the Luzhin smartness is just the same thing as Sonia's and may be worse, viler, baser, because in your case, Dounia, it's a bargain for luxuries, after all, but with Sonia it's simply a question of starvation. It has to be paid for, it has to be paid for, Dounia, this smartness. And what if it's more than you can bear afterwards, if you regret it? The bitterness, the misery, the curses, the tears hidden from all the world, for you are not a Marfa Petrovna. And how will your mother feel then? Even now she is uneasy, she is worried, but then, when she sees it all clearly? And I? Yes, indeed, what have you taken me for? I won't have your sacrifice, Dounia, I won't have it, mother! It shall not be, so long as I am alive, it shall not, it shall not! I won't accept it!"

He suddenly paused in his reflection and stood still.

"It shall not be? But what are you going to do to prevent it? You'll forbid it? And what right have you? What can you promise them on your side to give you such a right? Your whole life, your whole future, you will devote to them _when you have finished your studies and obtained a post_? Yes, we have heard all that before, and that's all _words_, but now? Now something must be done, now, do you understand that? And what are you doing now? You are living upon them. They borrow on their hundred roubles pension. They borrow from the Svidrigaïlovs. How are you going to save them from Svidrigaïlovs, from Afanasy Ivanovitch Vahrushin, oh, future millionaire Zeus who would arrange their lives for them? In another ten years? In another ten years, mother will be blind with knitting shawls, maybe with weeping too. She will be worn to a shadow with fasting; and my sister? Imagine for a moment what may have become of your sister in ten years? What may happen to her during those ten years? Can you fancy?"

So he tortured himself, fretting himself with such questions, and finding a kind of enjoyment in it. And yet all these questions were not new ones suddenly confronting him, they were old familiar aches. It was long since they had first begun to grip and rend his heart. Long, long ago his present anguish had its first beginnings; it had waxed and gathered strength, it had matured and concentrated, until it had taken the form of a fearful, frenzied and fantastic question, which tortured his heart and mind, clamouring insistently for an answer. Now his mother's letter had burst on him like a thunderclap. It was clear that he must not now suffer passively, worrying himself over unsolved questions, but that he must do something, do it at once, and do it quickly. Anyway he must decide on something, or else...

"Or throw up life altogether!" he cried suddenly, in a frenzy--"accept one's lot humbly as it is, once for all and stifle everything in oneself, giving up all claim to activity, life and love!"

"Do you understand, sir, do you understand what it means when you have absolutely nowhere to turn?" Marmeladov's question came suddenly into his mind, "for every man must have somewhere to turn...."

He gave a sudden start; another thought, that he had had yesterday, slipped back into his mind. But he did not start at the thought recurring to him, for he knew, he had _felt beforehand_, that it must come back, he was expecting it; besides it was not only yesterday's thought. The difference was that a month ago, yesterday even, the thought was a mere dream: but now... now it appeared not a dream at all, it had taken a new menacing and quite unfamiliar shape, and he suddenly became aware of this himself.... He felt a hammering in his head, and there was a darkness before his eyes.

He looked round hurriedly, he was searching for something. He wanted to sit down and was looking for a seat; he was walking along the K---- Boulevard. There was a seat about a hundred paces in front of him. He walked towards it as fast he could; but on the way he met with a little adventure which absorbed all his attention. Looking for the seat, he had noticed a woman walking some twenty paces in front of him, but at first he took no more notice of her than of other objects that crossed his path. It had happened to him many times going home not to notice the road by which he was going, and he was accustomed to walk like that. But there was at first sight something so strange about the woman in front of him, that gradually his attention was riveted upon her, at first

reluctantly and, as it were, resentfully, and then more and more intently. He felt a sudden desire to find out what it was that was so strange about the woman. In the first place, she appeared to be a girl quite young, and she was walking in the great heat bareheaded and with no parasol or gloves, waving her arms about in an absurd way. She had on a dress of some light silky material, but put on strangely awry, not properly hooked up, and torn open at the top of the skirt, close to the waist: a great piece was rent and hanging loose. A little kerchief was flung about her bare throat, but lay slanting on one side. The girl was walking unsteadily, too, stumbling and staggering from side to side. She drew Raskolnikov's whole attention at last. He overtook the girl at the seat, but, on reaching it, she dropped down on it, in the corner; she let her head sink on the back of the seat and closed her eyes, apparently in extreme exhaustion. Looking at her closely, he saw at once that she was completely drunk. It was a strange and shocking sight. He could hardly believe that he was not mistaken. He saw before him the face of a quite young, fair-haired girl--sixteen, perhaps not more than fifteen, years old, pretty little face, but flushed and heavy looking and, as it were, swollen. The girl seemed hardly to know what she was doing; she crossed one leg over the other, lifting it indecorously, and showed every sign of being unconscious that she was in the street.

Raskolnikov did not sit down, but he felt unwilling to leave her, and stood facing her in perplexity. This boulevard was never much frequented; and now, at two o'clock, in the stifling heat, it was quite deserted. And yet on the further side of the boulevard, about fifteen paces away, a gentleman was standing on the edge of the pavement. He, too, would apparently have liked to approach the girl with some object of his own. He, too, had probably seen her in the distance and had followed her, but found Raskolnikov in his way. He looked angrily at him, though he tried to escape his notice, and stood impatiently biding his time, till the unwelcome man in rags should have moved away. His intentions were unmistakable. The gentleman was a plump, thickly-set man, about thirty, fashionably dressed, with a high colour, red lips and moustaches. Raskolnikov felt furious; he had a sudden longing to insult this fat dandy in some way. He left the girl for a moment and walked towards the gentleman.

"Hey! You Svidrigaïlov! What do you want here?" he shouted, clenching his fists and laughing, spluttering with rage.

"What do you mean?" the gentleman asked sternly, scowling in haughty astonishment.

"Get away, that's what I mean."

"How dare you, you low fellow!"

He raised his cane. Raskolnikov rushed at him with his fists, without reflecting that the stout gentleman was a match for two men like himself. But at that instant someone seized him from behind, and a police constable stood between them.

"That's enough, gentlemen, no fighting, please, in a public place. What do you want? Who are you?" he asked Raskolnikov sternly, noticing his rags.

Raskolnikov looked at him intently. He had a straight-forward, sensible, soldierly face, with grey moustaches and whiskers.

"You are just the man I want," Raskolnikov cried, catching at his arm. "I am a student, Raskolnikov.... You may as well know that too," he added, addressing the gentleman, "come along, I have something to show you."

And taking the policeman by the hand he drew him towards the seat.

"Look here, hopelessly drunk, and she has just come down the boulevard. There is no telling who and what she is, she does not look like a professional. It's more likely she has been given drink and deceived somewhere... for the first time... you understand? and they've put her out into the street like that. Look at the way her dress is torn, and the way it has been put on: she has been dressed by somebody, she has not dressed herself, and dressed by unpractised hands, by a man's hands; that's evident. And now look there: I don't know that dandy with whom I was going to fight, I see him for the first time, but he, too, has seen her on the road, just now, drunk, not knowing what she is doing, and now he is very eager to get hold of her, to get her away somewhere while she is in this state... that's certain, believe me, I am not wrong. I saw him myself watching her and following her, but I prevented him, and he is just waiting for me to go away. Now he has walked away a little, and is standing still, pretending to make a cigarette.... Think how can we keep her out of his hands, and how are we to get her home?"

The policeman saw it all in a flash. The stout gentleman was easy to understand, he turned to consider the girl. The policeman bent over to examine her more closely, and his face worked with genuine compassion.

“Ah, what a pity!” he said, shaking his head--“why, she is quite a child! She has been deceived, you can see that at once. Listen, lady,” he began addressing her, “where do you live?” The girl opened her weary and sleepy-looking eyes, gazed blankly at the speaker and waved her hand.

“Here,” said Raskolnikov feeling in his pocket and finding twenty copecks, “here, call a cab and tell him to drive her to her address. The only thing is to find out her address!”

“Missy, missy!” the policeman began again, taking the money. “I’ll fetch you a cab and take you home myself. Where shall I take you, eh? Where do you live?”

“Go away! They won’t let me alone,” the girl muttered, and once more waved her hand.

“Ach, ach, how shocking! It’s shameful, missy, it’s a shame!” He shook his head again, shocked, sympathetic and indignant.

“It’s a difficult job,” the policeman said to Raskolnikov, and as he did so, he looked him up and down in a rapid glance. He, too, must have seemed a strange figure to him: dressed in rags and handing him money!

“Did you meet her far from here?” he asked him.

“I tell you she was walking in front of me, staggering, just here, in the boulevard. She only just reached the seat and sank down on it.”

“Ah, the shameful things that are done in the world nowadays, God have mercy on us! An innocent creature like that, drunk already! She has been deceived, that’s a sure thing. See how her dress has been torn too.... Ah, the vice one sees nowadays! And as likely as not she belongs to gentlefolk too, poor ones maybe.... There are many like that nowadays. She looks refined, too, as though she were a lady,” and he bent over her once more.

Perhaps he had daughters growing up like that, “looking like ladies and refined” with pretensions to gentility and smartness....

“The chief thing is,” Raskolnikov persisted, “to keep her out of this scoundrel’s hands! Why should he outrage her? It’s as clear as day what he is after; ah, the brute, he is not moving off!”

Raskolnikov spoke aloud and pointed to him. The gentleman heard him, and seemed about to fly into a rage again, but thought better of it, and confined himself to a contemptuous look. He then walked slowly another ten paces away and again halted.

“Keep her out of his hands we can,” said the constable thoughtfully, “if only she’d tell us where to take her, but as it is.... Missy, hey, missy!” he bent over her once more.

She opened her eyes fully all of a sudden, looked at him intently, as though realising something, got up from the seat and walked away in the direction from which she had come. “Oh shameful wretches, they won’t let me alone!” she said, waving her hand again. She walked quickly, though staggering as before. The dandy followed her, but along another avenue, keeping his eye on her.

“Don’t be anxious, I won’t let him have her,” the policeman said resolutely, and he set off after them.

“Ah, the vice one sees nowadays!” he repeated aloud, sighing.

At that moment something seemed to sting Raskolnikov; in an instant a complete revulsion of feeling came over him.

“Hey, here!” he shouted after the policeman.

The latter turned round.

“Let them be! What is it to do with you? Let her go! Let him amuse himself.” He pointed at the dandy, “What is it to do with you?”

The policeman was bewildered, and stared at him open-eyed. Raskolnikov laughed.

“Well!” ejaculated the policeman, with a gesture of contempt, and he walked after the dandy and the girl, probably taking Raskolnikov for a madman or something even worse.

“He has carried off my twenty copecks,” Raskolnikov murmured angrily when he was left alone. “Well, let him take as much from the other fellow to allow him to have the girl and so let it end. And why did I want to interfere? Is it for me to help? Have I any right to

help? Let them devour each other alive--what is it to me? How did I dare to give him twenty copecks? Were they mine?”

In spite of those strange words he felt very wretched. He sat down on the deserted seat. His thoughts strayed aimlessly.... He found it hard to fix his mind on anything at that moment. He longed to forget himself altogether, to forget everything, and then to wake up and begin life anew....

“Poor girl!” he said, looking at the empty corner where she had sat--“She will come to herself and weep, and then her mother will find out.... She will give her a beating, a horrible, shameful beating and then maybe, turn her out of doors.... And even if she does not, the Darya Frantsovnas will get wind of it, and the girl will soon be slipping out on the sly here and there. Then there will be the hospital directly (that’s always the luck of those girls with respectable mothers, who go wrong on the sly) and then... again the hospital... drink... the taverns... and more hospital, in two or three years--a wreck, and her life over at eighteen or nineteen.... Have not I seen cases like that? And how have they been brought to it? Why, they’ve all come to it like that. Ugh! But what does it matter? That’s as it should be, they tell us. A certain percentage, they tell us, must every year go... that way... to the devil, I suppose, so that the rest may remain chaste, and not be interfered with. A percentage! What splendid words they have; they are so scientific, so consolatory.... Once you’ve said ‘percentage’ there’s nothing more to worry about. If we had any other word... maybe we might feel more uneasy.... But what if Dounia were one of the percentage! Of another one if not that one?

“But where am I going?” he thought suddenly. “Strange, I came out for something. As soon as I had read the letter I came out.... I was going to Vassilyevsky Ostrov, to Razumihin. That’s what it was... now I remember. What for, though? And what put the idea of going to Razumihin into my head just now? That’s curious.”

He wondered at himself. Razumihin was one of his old comrades at the university. It was remarkable that Raskolnikov had hardly any friends at the university; he kept aloof from everyone, went to see no one, and did not welcome anyone who came to see him, and indeed everyone soon gave him up. He took no part in the students’ gatherings, amusements or conversations. He worked with great intensity without sparing himself, and he was respected for this, but no one liked him. He was very poor, and there was a sort of haughty pride and reserve about him, as though he were keeping something to himself. He seemed to some of his comrades to look down upon them all as children, as though he were superior in development, knowledge and convictions, as though their beliefs and interests were beneath him.

With Razumihin he had got on, or, at least, he was more unreserved and communicative with him. Indeed it was impossible to be on any other terms with Razumihin. He was an exceptionally good-humoured and candid youth, good-natured to the point of simplicity, though both depth and dignity lay concealed under that simplicity. The better of his comrades understood this, and all were fond of him. He was extremely intelligent, though he was certainly rather a simpleton at times. He was of striking appearance--tall, thin, black-haired and always badly shaved. He was sometimes uproarious and was reputed to be of great physical strength. One night, when out in a festive company, he had with one blow laid a gigantic policeman on his back. There was no limit to his drinking powers, but he could abstain from drink altogether; he sometimes went too far in his pranks; but he could do without pranks altogether. Another thing striking about Razumihin, no failure distressed him, and it seemed as though no unfavourable circumstances could crush him. He could lodge anywhere, and bear the extremes of cold and hunger. He was very poor, and kept himself entirely on what he could earn by work of one sort or another. He knew of no end of resources by which to earn money. He spent one whole winter without lighting his stove, and used to declare that he liked it better, because one slept more soundly in the cold. For the present he, too, had been obliged to give up the university, but it was only for a time, and he was working with all his might to save enough to return to his studies again. Raskolnikov had not been to see him for the last four months, and Razumihin did not even know his address. About two months before, they had met in the street, but Raskolnikov had turned away and even crossed to the other side that he might not be observed. And though Razumihin noticed him, he passed him by, as he did not want to annoy him.

CHAPTER V

“Of course, I’ve been meaning lately to go to Razumihin’s to ask for work, to ask him to get me lessons or something...” Raskolnikov thought, “but what help can he be to me now? Suppose he gets me lessons, suppose he shares his last farthing with me, if he has any farthings, so that I could get some boots and make myself tidy enough to give lessons... hm... Well and what then? What shall I do with the few coppers I earn? That’s not what I want now. It’s really absurd for me to go to Razumihin....”

The question why he was now going to Razumihin agitated him even more than he was himself aware; he kept uneasily seeking for some sinister significance in this apparently ordinary action.

“Could I have expected to set it all straight and to find a way out by means of Razumihin alone?” he asked himself in perplexity.

He pondered and rubbed his forehead, and, strange to say, after long musing, suddenly, as if it were spontaneously and by chance, a fantastic thought came into his head.

“Hm... to Razumihin’s,” he said all at once, calmly, as though he had reached a final determination. “I shall go to Razumihin’s of course, but... not now. I shall go to him... on the next day after It, when It will be over and everything will begin afresh....”

And suddenly he realised what he was thinking.

“After It,” he shouted, jumping up from the seat, “but is It really going to happen? Is it possible it really will happen?” He left the seat, and went off almost at a run; he meant to turn back, homewards, but the thought of going home suddenly filled him with intense loathing; in that hole, in that awful little cupboard of his, all _this_ had for a month past been growing up in him; and he walked on at random.

His nervous shudder had passed into a fever that made him feel shivering; in spite of the heat he felt cold. With a kind of effort he began almost unconsciously, from some inner craving, to stare at all the objects before him, as though looking for something to distract his attention; but he did not succeed, and kept dropping every moment into brooding. When with a start he lifted his head again and looked round, he forgot at once what he had just been thinking about and even where he was going. In this way he walked right across Vassilyevsky Ostrov, came out on to the Lesser Neva, crossed the bridge and turned towards the islands. The greenness and freshness were at first restful to his weary eyes after the dust of the town and the huge houses that hemmed him in and weighed upon him. Here there were no taverns, no stifling closeness, no stench. But soon these new pleasant sensations passed into morbid irritability. Sometimes he stood still before a brightly painted summer villa standing among green foliage, he gazed through the fence, he saw in the distance smartly dressed women on the verandahs and balconies, and children running in the gardens. The flowers especially caught his attention; he gazed at them longer than at anything. He was met, too, by luxurious carriages and by men and women on horseback; he watched them with curious eyes and forgot about them before they had vanished from his sight. Once he stood still and counted his money; he found he had thirty copecks. “Twenty to the policeman, three to Nastasya for the letter, so I must have given forty-seven or fifty to the Marmeladovs yesterday,” he thought, reckoning it up for some unknown reason, but he soon forgot with what object he had taken the money out of his pocket. He recalled it on passing an eating-house or tavern, and felt that he was hungry.... Going into the tavern he drank a glass of vodka and ate a pie of some sort. He finished eating it as he walked away. It was a long while since he had taken vodka and it had an effect upon him at once, though he only drank a wineglassful. His legs felt suddenly heavy and a great drowsiness came upon him. He turned homewards, but reaching Petrovsky Ostrov he stopped completely exhausted, turned off the road into the bushes, sank down upon the grass and instantly fell asleep.

In a morbid condition of the brain, dreams often have a singular actuality, vividness, and extraordinary semblance of reality. At times monstrous images are created, but the setting and the whole picture are so truth-like and filled with details so delicate, so unexpectedly, but so artistically consistent, that the dreamer, were he an artist like Pushkin or Turgenev even, could never have invented them in the waking state. Such sick dreams always remain long in the memory and make a powerful impression on the overwrought and deranged nervous system.

Raskolnikov had a fearful dream. He dreamt he was back in his childhood in the little town of his birth. He was a child about seven years old, walking into the country with his father on the evening of a holiday. It was a grey and heavy day, the country was exactly as he remembered it; indeed he recalled it far more vividly in his dream than he had done in memory. The little town stood on a level flat as bare as the hand, not even a willow near it; only in the far distance, a copse lay, a dark blur on the very edge of the horizon. A few paces beyond the last market garden stood a tavern, a big tavern, which had always aroused in him a feeling of aversion, even of fear, when he walked by it with his father. There was always a crowd there, always shouting, laughter and abuse, hideous hoarse singing and often fighting. Drunken and horrible-looking figures were hanging about the tavern. He used to cling close to his father, trembling all over when he met them. Near the tavern the road became a dusty track, the dust of which was always black. It was a winding road, and about a hundred paces further on, it turned to the right to the graveyard. In the middle of the graveyard stood a stone church with a green cupola where he used to go to mass two or three times a year with his father and mother, when a service was held in memory of his grandmother, who had long been dead, and whom he had never seen. On these

occasions they used to take on a white dish tied up in a table napkin a special sort of rice pudding with raisins stuck in it in the shape of a cross. He loved that church, the old-fashioned, unadorned ikons and the old priest with the shaking head. Near his grandmother's grave, which was marked by a stone, was the little grave of his younger brother who had died at six months old. He did not remember him at all, but he had been told about his little brother, and whenever he visited the graveyard he used religiously and reverently to cross himself and to bow down and kiss the little grave. And now he dreamt that he was walking with his father past the tavern on the way to the graveyard; he was holding his father's hand and looking with dread at the tavern. A peculiar circumstance attracted his attention: there seemed to be some kind of festivity going on, there were crowds of gaily dressed townspeople, peasant women, their husbands, and riff-raff of all sorts, all singing and all more or less drunk. Near the entrance of the tavern stood a cart, but a strange cart. It was one of those big carts usually drawn by heavy cart-horses and laden with casks of wine or other heavy goods. He always liked looking at those great cart-horses, with their long manes, thick legs, and slow even pace, drawing along a perfect mountain with no appearance of effort, as though it were easier going with a load than without it. But now, strange to say, in the shafts of such a cart he saw a thin little sorrel beast, one of those peasants' nags which he had often seen straining their utmost under a heavy load of wood or hay, especially when the wheels were stuck in the mud or in a rut. And the peasants would beat them so cruelly, sometimes even about the nose and eyes, and he felt so sorry, so sorry for them that he almost cried, and his mother always used to take him away from the window. All of a sudden there was a great uproar of shouting, singing and the balalaïka, and from the tavern a number of big and very drunken peasants came out, wearing red and blue shirts and coats thrown over their shoulders.

"Get in, get in!" shouted one of them, a young thick-necked peasant with a fleshy face red as a carrot. "I'll take you all, get in!"

But at once there was an outbreak of laughter and exclamations in the crowd.

"Take us all with a beast like that!"

"Why, Mikolka, are you crazy to put a nag like that in such a cart?"

"And this mare is twenty if she is a day, mates!"

"Get in, I'll take you all," Mikolka shouted again, leaping first into the cart, seizing the reins and standing straight up in front. "The bay has gone with Matvey," he shouted from the cart--"and this brute, mates, is just breaking my heart, I feel as if I could kill her. She's just eating her head off. Get in, I tell you! I'll make her gallop! She'll gallop!" and he picked up the whip, preparing himself with relish to flog the little mare.

"Get in! Come along!" The crowd laughed. "D'you hear, she'll gallop!"

"Gallop indeed! She has not had a gallop in her for the last ten years!"

"She'll jog along!"

"Don't you mind her, mates, bring a whip each of you, get ready!"

"All right! Give it to her!"

They all clambered into Mikolka's cart, laughing and making jokes. Six men got in and there was still room for more. They hauled in a fat, rosy-cheeked woman. She was dressed in red cotton, in a pointed, beaded headdress and thick leather shoes; she was cracking nuts and laughing. The crowd round them was laughing too and indeed, how could they help laughing? That wretched nag was to drag all the cartload of them at a gallop! Two young fellows in the cart were just getting whips ready to help Mikolka. With the cry of "now," the mare tugged with all her might, but far from galloping, could scarcely move forward; she struggled with her legs, gasping and shrinking from the blows of the three whips which were showered upon her like hail. The laughter in the cart and in the crowd was redoubled, but Mikolka flew into a rage and furiously thrashed the mare, as though he supposed she really could gallop.

"Let me get in, too, mates," shouted a young man in the crowd whose appetite was aroused.

"Get in, all get in," cried Mikolka, "she will draw you all. I'll beat her to death!" And he thrashed and thrashed at the mare, beside himself with fury.

"Father, father," he cried, "father, what are they doing? Father, they are beating the poor horse!"

“Come along, come along!” said his father. “They are drunken and foolish, they are in fun; come away, don’t look!” and he tried to draw him away, but he tore himself away from his hand, and, beside himself with horror, ran to the horse. The poor beast was in a bad way. She was gasping, standing still, then tugging again and almost falling.

“Beat her to death,” cried Mikolka, “it’s come to that. I’ll do for her!”

“What are you about, are you a Christian, you devil?” shouted an old man in the crowd.

“Did anyone ever see the like? A wretched nag like that pulling such a cartload,” said another.

“You’ll kill her,” shouted the third.

“Don’t meddle! It’s my property, I’ll do what I choose. Get in, more of you! Get in, all of you! I will have her go at a gallop!...”

All at once laughter broke into a roar and covered everything: the mare, roused by the shower of blows, began feebly kicking. Even the old man could not help smiling. To think of a wretched little beast like that trying to kick!

Two lads in the crowd snatched up whips and ran to the mare to beat her about the ribs. One ran each side.

“Hit her in the face, in the eyes, in the eyes,” cried Mikolka.

“Give us a song, mates,” shouted someone in the cart and everyone in the cart joined in a riotous song, jingling a tambourine and whistling. The woman went on cracking nuts and laughing.

... He ran beside the mare, ran in front of her, saw her being whipped across the eyes, right in the eyes! He was crying, he felt choking, his tears were streaming. One of the men gave him a cut with the whip across the face, he did not feel it. Wringing his hands and screaming, he rushed up to the grey-headed old man with the grey beard, who was shaking his head in disapproval. One woman seized him by the hand and would have taken him away, but he tore himself from her and ran back to the mare. She was almost at the last gasp, but began kicking once more.

“I’ll teach you to kick,” Mikolka shouted ferociously. He threw down the whip, bent forward and picked up from the bottom of the cart a long, thick shaft, he took hold of one end with both hands and with an effort brandished it over the mare.

“He’ll crush her,” was shouted round him. “He’ll kill her!”

“It’s my property,” shouted Mikolka and brought the shaft down with a swinging blow. There was a sound of a heavy thud.

“Thrash her, thrash her! Why have you stopped?” shouted voices in the crowd.

And Mikolka swung the shaft a second time and it fell a second time on the spine of the luckless mare. She sank back on her haunches, but lurched forward and tugged forward with all her force, tugged first on one side and then on the other, trying to move the cart. But the six whips were attacking her in all directions, and the shaft was raised again and fell upon her a third time, then a fourth, with heavy measured blows. Mikolka was in a fury that he could not kill her at one blow.

“She’s a tough one,” was shouted in the crowd.

“She’ll fall in a minute, mates, there will soon be an end of her,” said an admiring spectator in the crowd.

“Fetch an axe to her! Finish her off,” shouted a third.

“I’ll show you! Stand off,” Mikolka screamed frantically; he threw down the shaft, stooped down in the cart and picked up an iron crowbar. “Look out,” he shouted, and with all his might he dealt a stunning blow at the poor mare. The blow fell; the mare staggered, sank back, tried to pull, but the bar fell again with a swinging blow on her back and she fell on the ground like a log.

“Finish her off,” shouted Mikolka and he leapt beside himself, out of the cart. Several young men, also flushed with drink, seized anything they could come across--whips, sticks, poles, and ran to the dying mare. Mikolka stood on one side and began dealing random blows with the crowbar. The mare stretched out her head, drew a long breath and died.

“You butchered her,” someone shouted in the crowd.

“Why wouldn’t she gallop then?”

“My property!” shouted Mikolka, with bloodshot eyes, brandishing the bar in his hands. He stood as though regretting that he had nothing more to beat.

“No mistake about it, you are not a Christian,” many voices were shouting in the crowd.

But the poor boy, beside himself, made his way, screaming, through the crowd to the sorrel nag, put his arms round her bleeding dead head and kissed it, kissed the eyes and kissed the lips.... Then he jumped up and flew in a frenzy with his little fists out at Mikolka. At that instant his father, who had been running after him, snatched him up and carried him out of the crowd.

“Come along, come! Let us go home,” he said to him.

“Father! Why did they... kill... the poor horse!” he sobbed, but his voice broke and the words came in shrieks from his panting chest.

“They are drunk.... They are brutal... it’s not our business!” said his father. He put his arms round his father but he felt choked, choked. He tried to draw a breath, to cry out--and woke up.

He waked up, gasping for breath, his hair soaked with perspiration, and stood up in terror.

“Thank God, that was only a dream,” he said, sitting down under a tree and drawing deep breaths. “But what is it? Is it some fever coming on? Such a hideous dream!”

He felt utterly broken: darkness and confusion were in his soul. He rested his elbows on his knees and leaned his head on his hands.

“Good God!” he cried, “can it be, can it be, that I shall really take an axe, that I shall strike her on the head, split her skull open... that I shall tread in the sticky warm blood, break the lock, steal and tremble; hide, all spattered in the blood... with the axe.... Good God, can it be?”

He was shaking like a leaf as he said this.

“But why am I going on like this?” he continued, sitting up again, as it were in profound amazement. “I knew that I could never bring myself to it, so what have I been torturing myself for till now? Yesterday, yesterday, when I went to make that... _experiment_, yesterday I realised completely that I could never bear to do it.... Why am I going over it again, then? Why am I hesitating? As I came down the stairs yesterday, I said myself that it was base, loathsome, vile, vile... the very thought of it made me feel sick and filled me with horror.

“No, I couldn’t do it, I couldn’t do it! Granted, granted that there is no flaw in all that reasoning, that all that I have concluded this last month is clear as day, true as arithmetic.... My God! Anyway I couldn’t bring myself to it! I couldn’t do it, I couldn’t do it! Why, why then am I still...?”

He rose to his feet, looked round in wonder as though surprised at finding himself in this place, and went towards the bridge. He was pale, his eyes glowed, he was exhausted in every limb, but he seemed suddenly to breathe more easily. He felt he had cast off that fearful burden that had so long been weighing upon him, and all at once there was a sense of relief and peace in his soul. “Lord,” he prayed, “show me my path--I renounce that accursed... dream of mine.”

Crossing the bridge, he gazed quietly and calmly at the Neva, at the glowing red sun setting in the glowing sky. In spite of his weakness he was not conscious of fatigue. It was as though an abscess that had been forming for a month past in his heart had suddenly broken. Freedom, freedom! He was free from that spell, that sorcery, that obsession!

Later on, when he recalled that time and all that happened to him during those days, minute by minute, point by point, he was superstitiously impressed by one circumstance, which, though in itself not very exceptional, always seemed to him afterwards the predestined turning-point of his fate. He could never understand and explain to himself why, when he was tired and worn out, when it would have been more convenient for him to go home by the shortest and most direct way, he had returned by the Hay Market where he had no need to go. It was obviously and quite unnecessarily out of his way, though not much so. It is true that it happened to him dozens of times to return home without noticing what streets he passed through. But why, he was always asking himself, why had such an important, such a decisive and at the same time such an absolutely chance meeting happened in the Hay Market (where he had moreover no reason to go) at the very hour, the very minute of his life when he was just in the very mood and in the very circumstances in which that meeting was able to exert the gravest and most decisive influence on his whole destiny? As

though it had been lying in wait for him on purpose!

It was about nine o'clock when he crossed the Hay Market. At the tables and the barrows, at the booths and the shops, all the market people were closing their establishments or clearing away and packing up their wares and, like their customers, were going home. Rag pickers and costermongers of all kinds were crowding round the taverns in the dirty and stinking courtyards of the Hay Market. Raskolnikov particularly liked this place and the neighbouring alleys, when he wandered aimlessly in the streets. Here his rags did not attract contemptuous attention, and one could walk about in any attire without scandalising people. At the corner of an alley a huckster and his wife had two tables set out with tapes, thread, cotton handkerchiefs, etc. They, too, had got up to go home, but were lingering in conversation with a friend, who had just come up to them. This friend was Lizaveta Ivanovna, or, as everyone called her, Lizaveta, the younger sister of the old pawnbroker, Alyona Ivanovna, whom Raskolnikov had visited the previous day to pawn his watch and make his _experiment_.... He already knew all about Lizaveta and she knew him a little too. She was a single woman of about thirty-five, tall, clumsy, timid, submissive and almost idiotic. She was a complete slave and went in fear and trembling of her sister, who made her work day and night, and even beat her. She was standing with a bundle before the huckster and his wife, listening earnestly and doubtfully. They were talking of something with special warmth. The moment Raskolnikov caught sight of her, he was overcome by a strange sensation as it were of intense astonishment, though there was nothing astonishing about this meeting.

"You could make up your mind for yourself, Lizaveta Ivanovna," the huckster was saying aloud. "Come round to-morrow about seven. They will be here too."

"To-morrow?" said Lizaveta slowly and thoughtfully, as though unable to make up her mind.

"Upon my word, what a fright you are in of Alyona Ivanovna," gabbled the huckster's wife, a lively little woman. "I look at you, you are like some little babe. And she is not your own sister either--nothing but a step-sister and what a hand she keeps over you!"

"But this time don't say a word to Alyona Ivanovna," her husband interrupted; "that's my advice, but come round to us without asking. It will be worth your while. Later on your sister herself may have a notion."

"Am I to come?"

"About seven o'clock to-morrow. And they will be here. You will be able to decide for yourself."

"And we'll have a cup of tea," added his wife.

"All right, I'll come," said Lizaveta, still pondering, and she began slowly moving away.

Raskolnikov had just passed and heard no more. He passed softly, unnoticed, trying not to miss a word. His first amazement was followed by a thrill of horror, like a shiver running down his spine. He had learnt, he had suddenly quite unexpectedly learnt, that the next day at seven o'clock Lizaveta, the old woman's sister and only companion, would be away from home and that therefore at seven o'clock precisely the old woman _would be left alone_.

He was only a few steps from his lodging. He went in like a man condemned to death. He thought of nothing and was incapable of thinking; but he felt suddenly in his whole being that he had no more freedom of thought, no will, and that everything was suddenly and irrevocably decided.

Certainly, if he had to wait whole years for a suitable opportunity, he could not reckon on a more certain step towards the success of the plan than that which had just presented itself. In any case, it would have been difficult to find out beforehand and with certainty, with greater exactness and less risk, and without dangerous inquiries and investigations, that next day at a certain time an old woman, on whose life an attempt was contemplated, would be at home and entirely alone.

CHAPTER VI

Later on Raskolnikov happened to find out why the huckster and his wife had invited Lizaveta. It was a very ordinary matter and there was nothing exceptional about it. A family who had come to the town and been reduced to poverty were selling their household goods and clothes, all women's things. As the things would have fetched little in the market, they were looking for a dealer. This was Lizaveta's business. She undertook such jobs and was frequently employed, as she was very honest and always fixed a fair price and stuck to it. She spoke as a rule little and, as we have said already, she was very submissive and timid.

But Raskolnikov had become superstitious of late. The traces of superstition remained in him long after, and were almost ineradicable. And in all this he was always afterwards disposed to see something strange and mysterious, as it were, the presence of some peculiar influences and coincidences. In the previous winter a student he knew called Pokorev, who had left for Harkov, had chanced in conversation to give him the address of Alyona Ivanovna, the old pawnbroker, in case he might want to pawn anything. For a long while he did not go to her, for he had lessons and managed to get along somehow. Six weeks ago he had remembered the address; he had two articles that could be pawned: his father's old silver watch and a little gold ring with three red stones, a present from his sister at parting. He decided to take the ring. When he found the old woman he had felt an insurmountable repulsion for her at the first glance, though he knew nothing special about her. He got two roubles from her and went into a miserable little tavern on his way home. He asked for tea, sat down and sank into deep thought. A strange idea was pecking at his brain like a chicken in the egg, and very, very much absorbed him.

Almost beside him at the next table there was sitting a student, whom he did not know and had never seen, and with him a young officer. They had played a game of billiards and began drinking tea. All at once he heard the student mention to the officer the pawnbroker Alyona Ivanovna and give him her address. This of itself seemed strange to Raskolnikov; he had just come from her and here at once he heard her name. Of course it was a chance, but he could not shake off a very extraordinary impression, and here someone seemed to be speaking expressly for him; the student began telling his friend various details about Alyona Ivanovna.

"She is first-rate," he said. "You can always get money from her. She is as rich as a Jew, she can give you five thousand roubles at a time and she is not above taking a pledge for a rouble. Lots of our fellows have had dealings with her. But she is an awful old harpy...."

And he began describing how spiteful and uncertain she was, how if you were only a day late with your interest the pledge was lost; how she gave a quarter of the value of an article and took five and even seven percent a month on it and so on. The student chattered on, saying that she had a sister Lizaveta, whom the wretched little creature was continually beating, and kept in complete bondage like a small child, though Lizaveta was at least six feet high.

"There's a phenomenon for you," cried the student and he laughed.

They began talking about Lizaveta. The student spoke about her with a peculiar relish and was continually laughing and the officer listened with great interest and asked him to send Lizaveta to do some mending for him. Raskolnikov did not miss a word and learned everything about her. Lizaveta was younger than the old woman and was her half-sister, being the child of a different mother. She was thirty-five. She worked day and night for her sister, and besides doing the cooking and the washing, she did sewing and worked as a charwoman and gave her sister all she earned. She did not dare to accept an order or job of any kind without her sister's permission. The old woman had already made her will, and Lizaveta knew of it, and by this will she would not get a farthing; nothing but the movables, chairs and so on; all the money was left to a monastery in the province of N----, that prayers might be said for her in perpetuity. Lizaveta was of lower rank than her sister, unmarried and awfully uncouth in appearance, remarkably tall with long feet that looked as if they were bent outwards. She always wore battered goatskin shoes, and was clean in her person. What the student expressed most surprise and amusement about was the fact that Lizaveta was continually with child.

"But you say she is hideous?" observed the officer.

"Yes, she is so dark-skinned and looks like a soldier dressed up, but you know she is not at all hideous. She has such a good-natured face and eyes. Strikingly so. And the proof of it is that lots of people are attracted by her. She is such a soft, gentle creature, ready to put up with anything, always willing, willing to do anything. And her smile is really very sweet."

"You seem to find her attractive yourself," laughed the officer.

"From her queerness. No, I'll tell you what. I could kill that damned old woman and make off with her money, I assure you, without the faintest conscience-prick," the student added with warmth. The officer laughed again while Raskolnikov shuddered. How strange it was!

"Listen, I want to ask you a serious question," the student said hotly. "I was joking of course, but look here; on one side we have a stupid, senseless, worthless, spiteful, ailing, horrid old woman, not simply useless but doing actual mischief, who has not an idea what she is living for herself, and who will die in a day or two in any case. You understand? You understand?"

“Yes, yes, I understand,” answered the officer, watching his excited companion attentively.

“Well, listen then. On the other side, fresh young lives thrown away for want of help and by thousands, on every side! A hundred thousand good deeds could be done and helped, on that old woman’s money which will be buried in a monastery! Hundreds, thousands perhaps, might be set on the right path; dozens of families saved from destitution, from ruin, from vice, from the Lock hospitals--and all with her money. Kill her, take her money and with the help of it devote oneself to the service of humanity and the good of all. What do you think, would not one tiny crime be wiped out by thousands of good deeds? For one life thousands would be saved from corruption and decay. One death, and a hundred lives in exchange--it’s simple arithmetic! Besides, what value has the life of that sickly, stupid, ill-natured old woman in the balance of existence! No more than the life of a louse, of a black-beetle, less in fact because the old woman is doing harm. She is wearing out the lives of others; the other day she bit Lizaveta’s finger out of spite; it almost had to be amputated.”

“Of course she does not deserve to live,” remarked the officer, “but there it is, it’s nature.”

“Oh, well, brother, but we have to correct and direct nature, and, but for that, we should drown in an ocean of prejudice. But for that, there would never have been a single great man. They talk of duty, conscience--I don’t want to say anything against duty and conscience;--but the point is, what do we mean by them? Stay, I have another question to ask you. Listen!”

“No, you stay, I’ll ask you a question. Listen!”

“Well?”

“You are talking and speechifying away, but tell me, would you kill the old woman _yourself_?”

“Of course not! I was only arguing the justice of it.... It’s nothing to do with me....”

“But I think, if you would not do it yourself, there’s no justice about it.... Let us have another game.”

Raskolnikov was violently agitated. Of course, it was all ordinary youthful talk and thought, such as he had often heard before in different forms and on different themes. But why had he happened to hear such a discussion and such ideas at the very moment when his own brain was just conceiving... _the very same ideas_? And why, just at the moment when he had brought away the embryo of his idea from the old woman had he dropped at once upon a conversation about her? This coincidence always seemed strange to him. This trivial talk in a tavern had an immense influence on him in his later action; as though there had really been in it something preordained, some guiding hint....

*****

On returning from the Hay Market he flung himself on the sofa and sat for a whole hour without stirring. Meanwhile it got dark; he had no candle and, indeed, it did not occur to him to light up. He could never recollect whether he had been thinking about anything at that time. At last he was conscious of his former fever and shivering, and he realised with relief that he could lie down on the sofa. Soon heavy, leaden sleep came over him, as it were crushing him.

He slept an extraordinarily long time and without dreaming. Nastasya, coming into his room at ten o’clock the next morning, had difficulty in rousing him. She brought him in tea and bread. The tea was again the second brew and again in her own tea-pot.

“My goodness, how he sleeps!” she cried indignantly. “And he is always asleep.”

He got up with an effort. His head ached, he stood up, took a turn in his garret and sank back on the sofa again.

“Going to sleep again,” cried Nastasya. “Are you ill, eh?”

He made no reply.

“Do you want some tea?”

“Afterwards,” he said with an effort, closing his eyes again and turning to the wall.

Nastasya stood over him.

“Perhaps he really is ill,” she said, turned and went out. She came in again at two o’clock with soup. He was lying as before. The tea stood untouched. Nastasya felt positively offended and began wrathfully rousing him.

“Why are you lying like a log?” she shouted, looking at him with repulsion.

He got up, and sat down again, but said nothing and stared at the floor.

“Are you ill or not?” asked Nastasya and again received no answer. “You’d better go out and get a breath of air,” she said after a pause. “Will you eat it or not?”

“Afterwards,” he said weakly. “You can go.”

And he motioned her out.

She remained a little longer, looked at him with compassion and went out.

A few minutes afterwards, he raised his eyes and looked for a long while at the tea and the soup. Then he took the bread, took up a spoon and began to eat.

He ate a little, three or four spoonfuls, without appetite, as it were mechanically. His head ached less. After his meal he stretched himself on the sofa again, but now he could not sleep; he lay without stirring, with his face in the pillow. He was haunted by day-dreams and such strange day-dreams; in one, that kept recurring, he fancied that he was in Africa, in Egypt, in some sort of oasis. The caravan was resting, the camels were peacefully lying down; the palms stood all around in a complete circle; all the party were at dinner. But he was drinking water from a spring which flowed gurgling close by. And it was so cool, it was wonderful, wonderful, blue, cold water running among the parti-coloured stones and over the clean sand which glistened here and there like gold.... Suddenly he heard a clock strike. He started, roused himself, raised his head, looked out of the window, and seeing how late it was, suddenly jumped up wide awake as though someone had pulled him off the sofa. He crept on tiptoe to the door, stealthily opened it and began listening on the staircase. His heart beat terribly. But all was quiet on the stairs as if everyone was asleep.... It seemed to him strange and monstrous that he could have slept in such forgetfulness from the previous day and had done nothing, had prepared nothing yet.... And meanwhile perhaps it had struck six. And his drowsiness and stupefaction were followed by an extraordinary, feverish, as it were distracted haste. But the preparations to be made were few. He concentrated all his energies on thinking of everything and forgetting nothing; and his heart kept beating and thumping so that he could hardly breathe. First he had to make a noose and sew it into his overcoat--a work of a moment. He rummaged under his pillow and picked out amongst the linen stuffed away under it, a worn out, old unwashed shirt. From its rags he tore a long strip, a couple of inches wide and about sixteen inches long. He folded this strip in two, took off his wide, strong summer overcoat of some stout cotton material (his only outer garment) and began sewing the two ends of the rag on the inside, under the left armhole. His hands shook as he sewed, but he did it successfully so that nothing showed outside when he put the coat on again. The needle and thread he had got ready long before and they lay on his table in a piece of paper. As for the noose, it was a very ingenious device of his own; the noose was intended for the axe. It was impossible for him to carry the axe through the street in his hands. And if hidden under his coat he would still have had to support it with his hand, which would have been noticeable. Now he had only to put the head of the axe in the noose, and it would hang quietly under his arm on the inside. Putting his hand in his coat pocket, he could hold the end of the handle all the way, so that it did not swing; and as the coat was very full, a regular sack in fact, it could not be seen from outside that he was holding something with the hand that was in the pocket. This noose, too, he had designed a fortnight before.

When he had finished with this, he thrust his hand into a little opening between his sofa and the floor, fumbled in the left corner and drew out the _pledge_, which he had got ready long before and hidden there. This pledge was, however, only a smoothly planed piece of wood the size and thickness of a silver cigarette case. He picked up this piece of wood in one of his wanderings in a courtyard where there was some sort of a workshop. Afterwards he had added to the wood a thin smooth piece of iron, which he had also picked up at the same time in the street. Putting the iron which was a little the smaller on the piece of wood, he fastened them very firmly, crossing and re-crossing the thread round them; then wrapped them carefully and daintily in clean white paper and tied up the parcel so that it would be very difficult to untie it. This was in order to divert the attention of the old woman for a time, while she was trying to undo the knot, and so to gain a moment. The iron strip was added to give weight, so that the woman might not guess the first minute that the “thing” was made of wood. All this had been stored by him beforehand under the sofa. He had only just got the pledge out when he heard someone suddenly about in the yard.

“It struck six long ago.”

“Long ago! My God!”

He rushed to the door, listened, caught up his hat and began to descend his thirteen steps cautiously, noiselessly, like a cat. He had still the most important thing to do--to steal the axe from the kitchen. That the deed must be done with an axe he had decided long ago. He had also a pocket pruning-knife, but he could not rely on the knife and still less on his own strength, and so resolved finally on the axe. We may note in passing, one peculiarity in regard to all the final resolutions taken by him in the matter; they had one strange characteristic: the more final they were, the more hideous and the more absurd they at once became in his eyes. In spite of all his agonising inward struggle, he never for a single instant all that time could believe in the carrying out of his plans.

And, indeed, if it had ever happened that everything to the least point could have been considered and finally settled, and no uncertainty of any kind had remained, he would, it seems, have renounced it all as something absurd, monstrous and impossible. But a whole mass of unsettled points and uncertainties remained. As for getting the axe, that trifling business cost him no anxiety, for nothing could be easier. Nastasya was continually out of the house, especially in the evenings; she would run in to the neighbours or to a shop, and always left the door ajar. It was the one thing the landlady was always scolding her about. And so, when the time came, he would only have to go quietly into the kitchen and to take the axe, and an hour later (when everything was over) go in and put it back again. But these were doubtful points. Supposing he returned an hour later to put it back, and Nastasya had come back and was on the spot. He would of course have to go by and wait till she went out again. But supposing she were in the meantime to miss the axe, look for it, make an outcry--that would mean suspicion or at least grounds for suspicion.

But those were all trifles which he had not even begun to consider, and indeed he had no time. He was thinking of the chief point, and put off trifling details, until _he could believe in it all_. But that seemed utterly unattainable. So it seemed to himself at least. He could not imagine, for instance, that he would sometime leave off thinking, get up and simply go there.... Even his late experiment (i.e. his visit with the object of a final survey of the place) was simply an attempt at an experiment, far from being the real thing, as though one should say “come, let us go and try it--why dream about it!”--and at once he had broken down and had run away cursing, in a frenzy with himself. Meanwhile it would seem, as regards the moral question, that his analysis was complete; his casuistry had become keen as a razor, and he could not find rational objections in himself. But in the last resort he simply ceased to believe in himself, and doggedly, slavishly sought arguments in all directions, fumbling for them, as though someone were forcing and drawing him to it.

At first--long before indeed--he had been much occupied with one question; why almost all crimes are so badly concealed and so easily detected, and why almost all criminals leave such obvious traces? He had come gradually to many different and curious conclusions, and in his opinion the chief reason lay not so much in the material impossibility of concealing the crime, as in the criminal himself. Almost every criminal is subject to a failure of will and reasoning power by a childish and phenomenal heedlessness, at the very instant when prudence and caution are most essential. It was his conviction that this eclipse of reason and failure of will power attacked a man like a disease, developed gradually and reached its highest point just before the perpetration of the crime, continued with equal violence at the moment of the crime and for longer or shorter time after, according to the individual case, and then passed off like any other disease. The question whether the disease gives rise to the crime, or whether the crime from its own peculiar nature is always accompanied by something of the nature of disease, he did not yet feel able to decide.

When he reached these conclusions, he decided that in his own case there could not be such a morbid reaction, that his reason and will would remain unimpaired at the time of carrying out his design, for the simple reason that his design was “not a crime....” We will omit all the process by means of which he arrived at this last conclusion; we have run too far ahead already.... We may add only that the practical, purely material difficulties of the affair occupied a secondary position in his mind. “One has but to keep all one’s will-power and reason to deal with them, and they will all be overcome at the time when once one has familiarised oneself with the minutest details of the business....” But this preparation had never been begun. His final decisions were what he came to trust least, and when the hour struck, it all came to pass quite differently, as it were accidentally and unexpectedly.

One trifling circumstance upset his calculations, before he had even left the staircase. When he reached the landlady’s kitchen, the door of which was open as usual, he glanced cautiously in to see whether, in Nastasya’s absence, the landlady herself was there, or if not, whether the door to her own room was closed, so that she might not peep out when he went in for the axe. But what was his amazement when he suddenly saw that Nastasya was not only at home in the kitchen, but was occupied there, taking linen out of a basket and hanging it on a line. Seeing him, she left off hanging the clothes, turned to him and stared at him all the time he was passing. He turned away his eyes, and walked past as though he noticed nothing. But it was the end of everything; he had not the

axe! He was overwhelmed.

“What made me think,” he reflected, as he went under the gateway, “what made me think that she would be sure not to be at home at that moment! Why, why, why did I assume this so certainly?”

He was crushed and even humiliated. He could have laughed at himself in his anger.... A dull animal rage boiled within him.

He stood hesitating in the gateway. To go into the street, to go a walk for appearance’ sake was revolting; to go back to his room, even more revolting. “And what a chance I have lost for ever!” he muttered, standing aimlessly in the gateway, just opposite the porter’s little dark room, which was also open. Suddenly he started. From the porter’s room, two paces away from him, something shining under the bench to the right caught his eye.... He looked about him--nobody. He approached the room on tiptoe, went down two steps into it and in a faint voice called the porter. “Yes, not at home! Somewhere near though, in the yard, for the door is wide open.” He dashed to the axe (it was an axe) and pulled it out from under the bench, where it lay between two chunks of wood; at once, before going out, he made it fast in the noose, he thrust both hands into his pockets and went out of the room; no one had noticed him! “When reason fails, the devil helps!” he thought with a strange grin. This chance raised his spirits extraordinarily.

He walked along quietly and sedately, without hurry, to avoid awakening suspicion. He scarcely looked at the passers-by, tried to escape looking at their faces at all, and to be as little noticeable as possible. Suddenly he thought of his hat. “Good heavens! I had the money the day before yesterday and did not get a cap to wear instead!” A curse rose from the bottom of his soul.

Glancing out of the corner of his eye into a shop, he saw by a clock on the wall that it was ten minutes past seven. He had to make haste and at the same time to go someway round, so as to approach the house from the other side....

When he had happened to imagine all this beforehand, he had sometimes thought that he would be very much afraid. But he was not very much afraid now, was not afraid at all, indeed. His mind was even occupied by irrelevant matters, but by nothing for long. As he passed the Yusupov garden, he was deeply absorbed in considering the building of great fountains, and of their refreshing effect on the atmosphere in all the squares. By degrees he passed to the conviction that if the summer garden were extended to the field of Mars, and perhaps joined to the garden of the Mihailovsky Palace, it would be a splendid thing and a great benefit to the town. Then he was interested by the question why in all great towns men are not simply driven by necessity, but in some peculiar way inclined to live in those parts of the town where there are no gardens nor fountains; where there is most dirt and smell and all sorts of nastiness. Then his own walks through the Hay Market came back to his mind, and for a moment he waked up to reality. “What nonsense!” he thought, “better think of nothing at all!”

“So probably men led to execution clutch mentally at every object that meets them on the way,” flashed through his mind, but simply flashed, like lightning; he made haste to dismiss this thought.... And by now he was near; here was the house, here was the gate. Suddenly a clock somewhere struck once. “What! can it be half-past seven? Impossible, it must be fast!”

Luckily for him, everything went well again at the gates. At that very moment, as though expressly for his benefit, a huge waggon of hay had just driven in at the gate, completely screening him as he passed under the gateway, and the waggon had scarcely had time to drive through into the yard, before he had slipped in a flash to the right. On the other side of the waggon he could hear shouting and quarrelling; but no one noticed him and no one met him. Many windows looking into that huge quadrangular yard were open at that moment, but he did not raise his head--he had not the strength to. The staircase leading to the old woman’s room was close by, just on the right of the gateway. He was already on the stairs....

Drawing a breath, pressing his hand against his throbbing heart, and once more feeling for the axe and setting it straight, he began softly and cautiously ascending the stairs, listening every minute. But the stairs, too, were quite deserted; all the doors were shut; he met no one. One flat indeed on the first floor was wide open and painters were at work in it, but they did not glance at him. He stood still, thought a minute and went on. “Of course it would be better if they had not been here, but... it’s two storeys above them.”

And there was the fourth storey, here was the door, here was the flat opposite, the empty one. The flat underneath the old woman’s was apparently empty also; the visiting card nailed on the door had been torn off--they had gone away!... He was out of breath. For one instant the thought floated through his mind, “Shall I go back?” But he made no answer and began listening at the old woman’s door, a dead silence. Then he listened again on the staircase, listened long and intently... then looked about him for the last time, pulled himself together, drew himself up, and once more tried the axe in the noose. “Am I very pale?” he wondered. “Am I not evidently agitated? She is mistrustful.... Had I better wait a little longer... till my heart leaves off thumping?”

But his heart did not leave off. On the contrary, as though to spite him, it throbbed more and more violently. He could stand it no longer, he slowly put out his hand to the bell and rang. Half a minute later he rang again, more loudly.

No answer. To go on ringing was useless and out of place. The old woman was, of course, at home, but she was suspicious and alone. He had some knowledge of her habits... and once more he put his ear to the door. Either his senses were peculiarly keen (which it is difficult to suppose), or the sound was really very distinct. Anyway, he suddenly heard something like the cautious touch of a hand on the lock and the rustle of a skirt at the very door. Someone was standing stealthily close to the lock and just as he was doing on the outside was secretly listening within, and seemed to have her ear to the door.... He moved a little on purpose and muttered something aloud that he might not have the appearance of hiding, then rang a third time, but quietly, soberly, and without impatience, Recalling it afterwards, that moment stood out in his mind vividly, distinctly, for ever; he could not make out how he had had such cunning, for his mind was as it were clouded at moments and he was almost unconscious of his body.... An instant later he heard the latch unfastened.

CHAPTER VII

The door was as before opened a tiny crack, and again two sharp and suspicious eyes stared at him out of the darkness. Then Raskolnikov lost his head and nearly made a great mistake.

Fearing the old woman would be frightened by their being alone, and not hoping that the sight of him would disarm her suspicions, he took hold of the door and drew it towards him to prevent the old woman from attempting to shut it again. Seeing this she did not pull the door back, but she did not let go the handle so that he almost dragged her out with it on to the stairs. Seeing that she was standing in the doorway not allowing him to pass, he advanced straight upon her. She stepped back in alarm, tried to say something, but seemed unable to speak and stared with open eyes at him.

“Good evening, Alyona Ivanovna,” he began, trying to speak easily, but his voice would not obey him, it broke and shook. “I have come... I have brought something... but we’d better come in... to the light....”

And leaving her, he passed straight into the room uninvited. The old woman ran after him; her tongue was unloosed.

“Good heavens! What it is? Who is it? What do you want?”

“Why, Alyona Ivanovna, you know me... Raskolnikov... here, I brought you the pledge I promised the other day...” And he held out the pledge.

The old woman glanced for a moment at the pledge, but at once stared in the eyes of her uninvited visitor. She looked intently, maliciously and mistrustfully. A minute passed; he even fancied something like a sneer in her eyes, as though she had already guessed everything. He felt that he was losing his head, that he was almost frightened, so frightened that if she were to look like that and not say a word for another half minute, he thought he would have run away from her.

“Why do you look at me as though you did not know me?” he said suddenly, also with malice. “Take it if you like, if not I’ll go elsewhere, I am in a hurry.”

He had not even thought of saying this, but it was suddenly said of itself. The old woman recovered herself, and her visitor’s resolute tone evidently restored her confidence.

“But why, my good sir, all of a minute.... What is it?” she asked, looking at the pledge.

“The silver cigarette case; I spoke of it last time, you know.”

She held out her hand.

“But how pale you are, to be sure... and your hands are trembling too? Have you been bathing, or what?”

“Fever,” he answered abruptly. “You can’t help getting pale... if you’ve nothing to eat,” he added, with difficulty articulating the words.

His strength was failing him again. But his answer sounded like the truth; the old woman took the pledge.

“What is it?” she asked once more, scanning Raskolnikov intently, and weighing the pledge in her hand.

“A thing... cigarette case.... Silver.... Look at it.”

“It does not seem somehow like silver.... How he has wrapped it up!”

Trying to untie the string and turning to the window, to the light (all her windows were shut, in spite of the stifling heat), she left him altogether for some seconds and stood with her back to him. He unbuttoned his coat and freed the axe from the noose, but did not yet take it out altogether, simply holding it in his right hand under the coat. His hands were fearfully weak, he felt them every moment growing more numb and more wooden. He was afraid he would let the axe slip and fall.... A sudden giddiness came over him.

“But what has he tied it up like this for?” the old woman cried with vexation and moved towards him.

He had not a minute more to lose. He pulled the axe quite out, swung it with both arms, scarcely conscious of himself, and almost without effort, almost mechanically, brought the blunt side down on her head. He seemed not to use his own strength in this. But as soon as he had once brought the axe down, his strength returned to him.

The old woman was as always bareheaded. Her thin, light hair, streaked with grey, thickly smeared with grease, was plaited in a rat’s tail and fastened by a broken horn comb which stood out on the nape of her neck. As she was so short, the blow fell on the very top of her skull. She cried out, but very faintly, and suddenly sank all of a heap on the floor, raising her hands to her head. In one hand she still held “the pledge.” Then he dealt her another and another blow with the blunt side and on the same spot. The blood gushed as from an overturned glass, the body fell back. He stepped back, let it fall, and at once bent over her face; she was dead. Her eyes seemed to be starting out of their sockets, the brow and the whole face were drawn and contorted convulsively.

He laid the axe on the ground near the dead body and felt at once in her pocket (trying to avoid the streaming body)--the same right-hand pocket from which she had taken the key on his last visit. He was in full possession of his faculties, free from confusion or giddiness, but his hands were still trembling. He remembered afterwards that he had been particularly collected and careful, trying all the time not to get smeared with blood.... He pulled out the keys at once, they were all, as before, in one bunch on a steel ring. He ran at once into the bedroom with them. It was a very small room with a whole shrine of holy images. Against the other wall stood a big bed, very clean and covered with a silk patchwork wadded quilt. Against a third wall was a chest of drawers. Strange to say, so soon as he began to fit the keys into the chest, so soon as he heard their jingling, a convulsive shudder passed over him. He suddenly felt tempted again to give it all up and go away. But that was only for an instant; it was too late to go back. He positively smiled at himself, when suddenly another terrifying idea occurred to his mind. He suddenly fancied that the old woman might be still alive and might recover her senses. Leaving the keys in the chest, he ran back to the body, snatched up the axe and lifted it once more over the old woman, but did not bring it down. There was no doubt that she was dead. Bending down and examining her again more closely, he saw clearly that the skull was broken and even battered in on one side. He was about to feel it with his finger, but drew back his hand and indeed it was evident without that. Meanwhile there was a perfect pool of blood. All at once he noticed a string on her neck; he tugged at it, but the string was strong and did not snap and besides, it was soaked with blood. He tried to pull it out from the front of the dress, but something held it and prevented its coming. In his impatience he raised the axe again to cut the string from above on the body, but did not dare, and with difficulty, smearing his hand and the axe in the blood, after two minutes’ hurried effort, he cut the string and took it off without touching the body with the axe; he was not mistaken--it was a purse. On the string were two crosses, one of Cyprus wood and one of copper, and an image in silver filigree, and with them a small greasy chamois leather purse with a steel rim and ring. The purse was stuffed very full; Raskolnikov thrust it in his pocket without looking at it, flung the crosses on the old woman’s body and rushed back into the bedroom, this time taking the axe with him.

He was in terrible haste, he snatched the keys, and began trying them again. But he was unsuccessful. They would not fit in the locks. It was not so much that his hands were shaking, but that he kept making mistakes; though he saw for instance that a key was not the right one and would not fit, still he tried to put it in. Suddenly he remembered and realised that the big key with the deep notches, which was hanging there with the small keys could not possibly belong to the chest of drawers (on his last visit this had struck him), but to some strong box, and that everything perhaps was hidden in that box. He left the chest of drawers, and at once felt under the bedstead, knowing that old women usually keep boxes under their beds. And so it was; there was a good-sized box under the bed, at least a yard in length, with an arched lid covered with red leather and studded with steel nails. The notched key fitted at once and unlocked it. At the top, under a white sheet, was a coat of red brocade lined with hareskin; under it was a silk dress, then a shawl and it seemed as though there was nothing below but clothes. The first thing he did was to wipe his

blood-stained hands on the red brocade. “It’s red, and on red blood will be less noticeable,” the thought passed through his mind; then he suddenly came to himself. “Good God, am I going out of my senses?” he thought with terror.

But no sooner did he touch the clothes than a gold watch slipped from under the fur coat. He made haste to turn them all over. There turned out to be various articles made of gold among the clothes--probably all pledges, unredeemed or waiting to be redeemed--bracelets, chains, ear-rings, pins and such things. Some were in cases, others simply wrapped in newspaper, carefully and exactly folded, and tied round with tape. Without any delay, he began filling up the pockets of his trousers and overcoat without examining or undoing the parcels and cases; but he had not time to take many....

He suddenly heard steps in the room where the old woman lay. He stopped short and was still as death. But all was quiet, so it must have been his fancy. All at once he heard distinctly a faint cry, as though someone had uttered a low broken moan. Then again dead silence for a minute or two. He sat squatting on his heels by the box and waited holding his breath. Suddenly he jumped up, seized the axe and ran out of the bedroom.

In the middle of the room stood Lizaveta with a big bundle in her arms. She was gazing in stupefaction at her murdered sister, white as a sheet and seeming not to have the strength to cry out. Seeing him run out of the bedroom, she began faintly quivering all over, like a leaf, a shudder ran down her face; she lifted her hand, opened her mouth, but still did not scream. She began slowly backing away from him into the corner, staring intently, persistently at him, but still uttered no sound, as though she could not get breath to scream. He rushed at her with the axe; her mouth twitched piteously, as one sees babies’ mouths, when they begin to be frightened, stare intently at what frightens them and are on the point of screaming. And this hapless Lizaveta was so simple and had been so thoroughly crushed and scared that she did not even raise a hand to guard her face, though that was the most necessary and natural action at the moment, for the axe was raised over her face. She only put up her empty left hand, but not to her face, slowly holding it out before her as though motioning him away. The axe fell with the sharp edge just on the skull and split at one blow all the top of the head. She fell heavily at once. Raskolnikov completely lost his head, snatching up her bundle, dropped it again and ran into the entry.

Fear gained more and more mastery over him, especially after this second, quite unexpected murder. He longed to run away from the place as fast as possible. And if at that moment he had been capable of seeing and reasoning more correctly, if he had been able to realise all the difficulties of his position, the hopelessness, the hideousness and the absurdity of it, if he could have understood how many obstacles and, perhaps, crimes he had still to overcome or to commit, to get out of that place and to make his way home, it is very possible that he would have flung up everything, and would have gone to give himself up, and not from fear, but from simple horror and loathing of what he had done. The feeling of loathing especially surged up within him and grew stronger every minute. He would not now have gone to the box or even into the room for anything in the world.

But a sort of blankness, even dreaminess, had begun by degrees to take possession of him; at moments he forgot himself, or rather, forgot what was of importance, and caught at trifles. Glancing, however, into the kitchen and seeing a bucket half full of water on a bench, he bethought him of washing his hands and the axe. His hands were sticky with blood. He dropped the axe with the blade in the water, snatched a piece of soap that lay in a broken saucer on the window, and began washing his hands in the bucket. When they were clean, he took out the axe, washed the blade and spent a long time, about three minutes, washing the wood where there were spots of blood rubbing them with soap. Then he wiped it all with some linen that was hanging to dry on a line in the kitchen and then he was a long while attentively examining the axe at the window. There was no trace left on it, only the wood was still damp. He carefully hung the axe in the noose under his coat. Then as far as was possible, in the dim light in the kitchen, he looked over his overcoat, his trousers and his boots. At the first glance there seemed to be nothing but stains on the boots. He wetted the rag and rubbed the boots. But he knew he was not looking thoroughly, that there might be something quite noticeable that he was overlooking. He stood in the middle of the room, lost in thought. Dark agonising ideas rose in his mind--the idea that he was mad and that at that moment he was incapable of reasoning, of protecting himself, that he ought perhaps to be doing something utterly different from what he was now doing. “Good God!” he muttered, “I must fly, fly,” and he rushed into the entry. But here a shock of terror awaited him such as he had never known before.

He stood and gazed and could not believe his eyes: the door, the outer door from the stairs, at which he had not long before waited and rung, was standing unfastened and at least six inches open. No lock, no bolt, all the time, all that time! The old woman had not shut it after him perhaps as a precaution. But, good God! Why, he had seen Lizaveta afterwards! And how could he, how could he have failed to reflect that she must have come in somehow! She could not have come through the wall!

He dashed to the door and fastened the latch.

“But no, the wrong thing again! I must get away, get away....”

He unfastened the latch, opened the door and began listening on the staircase.

He listened a long time. Somewhere far away, it might be in the gateway, two voices were loudly and shrilly shouting, quarrelling and scolding. “What are they about?” He waited patiently. At last all was still, as though suddenly cut off; they had separated. He was meaning to go out, but suddenly, on the floor below, a door was noisily opened and someone began going downstairs humming a tune. “How is it they all make such a noise?” flashed through his mind. Once more he closed the door and waited. At last all was still, not a soul stirring. He was just taking a step towards the stairs when he heard fresh footsteps.

The steps sounded very far off, at the very bottom of the stairs, but he remembered quite clearly and distinctly that from the first sound he began for some reason to suspect that this was someone coming _there_, to the fourth floor, to the old woman. Why? Were the sounds somehow peculiar, significant? The steps were heavy, even and unhurried. Now _he_ had passed the first floor, now he was mounting higher, it was growing more and more distinct! He could hear his heavy breathing. And now the third storey had been reached. Coming here! And it seemed to him all at once that he was turned to stone, that it was like a dream in which one is being pursued, nearly caught and will be killed, and is rooted to the spot and cannot even move one’s arms.

At last when the unknown was mounting to the fourth floor, he suddenly started, and succeeded in slipping neatly and quickly back into the flat and closing the door behind him. Then he took the hook and softly, noiselessly, fixed it in the catch. Instinct helped him. When he had done this, he crouched holding his breath, by the door. The unknown visitor was by now also at the door. They were now standing opposite one another, as he had just before been standing with the old woman, when the door divided them and he was listening.

The visitor panted several times. “He must be a big, fat man,” thought Raskolnikov, squeezing the axe in his hand. It seemed like a dream indeed. The visitor took hold of the bell and rang it loudly.

As soon as the tin bell tinkled, Raskolnikov seemed to be aware of something moving in the room. For some seconds he listened quite seriously. The unknown rang again, waited and suddenly tugged violently and impatiently at the handle of the door. Raskolnikov gazed in horror at the hook shaking in its fastening, and in blank terror expected every minute that the fastening would be pulled out. It certainly did seem possible, so violently was he shaking it. He was tempted to hold the fastening, but _he_ might be aware of it. A giddiness came over him again. “I shall fall down!” flashed through his mind, but the unknown began to speak and he recovered himself at once.

“What’s up? Are they asleep or murdered? D-damn them!” he bawled in a thick voice, “Hey, Alyona Ivanovna, old witch! Lizaveta Ivanovna, hey, my beauty! open the door! Oh, damn them! Are they asleep or what?”

And again, enraged, he tugged with all his might a dozen times at the bell. He must certainly be a man of authority and an intimate acquaintance.

At this moment light hurried steps were heard not far off, on the stairs. Someone else was approaching. Raskolnikov had not heard them at first.

“You don’t say there’s no one at home,” the new-comer cried in a cheerful, ringing voice, addressing the first visitor, who still went on pulling the bell. “Good evening, Koch.”

“From his voice he must be quite young,” thought Raskolnikov.

“Who the devil can tell? I’ve almost broken the lock,” answered Koch. “But how do you come to know me?”

“Why! The day before yesterday I beat you three times running at billiards at Gambrinus’.”

“Oh!”

“So they are not at home? That’s queer. It’s awfully stupid though. Where could the old woman have gone? I’ve come on business.”

“Yes; and I have business with her, too.”

“Well, what can we do? Go back, I suppose, Aie--aie! And I was hoping to get some money!” cried the young man.

“We must give it up, of course, but what did she fix this time for? The old witch fixed the time for me to come herself. It’s out of my way. And where the devil she can have got to, I can’t make out. She sits here from year’s end to year’s end, the old hag; her legs are bad and yet here all of a sudden she is out for a walk!”

“Hadn’t we better ask the porter?”

“What?”

“Where she’s gone and when she’ll be back.”

“Hm.... Damn it all!... We might ask.... But you know she never does go anywhere.”

And he once more tugged at the door-handle.

“Damn it all. There’s nothing to be done, we must go!”

“Stay!” cried the young man suddenly. “Do you see how the door shakes if you pull it?”

“Well?”

“That shows it’s not locked, but fastened with the hook! Do you hear how the hook clanks?”

“Well?”

“Why, don’t you see? That proves that one of them is at home. If they were all out, they would have locked the door from the outside with the key and not with the hook from inside. There, do you hear how the hook is clanking? To fasten the hook on the inside they must be at home, don’t you see? So there they are sitting inside and don’t open the door!”

“Well! And so they must be!” cried Koch, astonished. “What are they about in there?” And he began furiously shaking the door.

“Stay!” cried the young man again. “Don’t pull at it! There must be something wrong.... Here, you’ve been ringing and pulling at the door and still they don’t open! So either they’ve both fainted or...”

“What?”

“I tell you what. Let’s go fetch the porter, let him wake them up.”

“All right.”

Both were going down.

“Stay. You stop here while I run down for the porter.”

“What for?”

“Well, you’d better.”

“All right.”

“I’m studying the law you see! It’s evident, e-vi-dent there’s something wrong here!” the young man cried hotly, and he ran downstairs.

Koch remained. Once more he softly touched the bell which gave one tinkle, then gently, as though reflecting and looking about him, began touching the door-handle pulling it and letting it go to make sure once more that it was only fastened by the hook. Then puffing and panting he bent down and began looking at the keyhole: but the key was in the lock on the inside and so nothing could be seen.

Raskolnikov stood keeping tight hold of the axe. He was in a sort of delirium. He was even making ready to fight when they should come in. While they were knocking and talking together, the idea several times occurred to him to end it all at once and shout to them through the door. Now and then he was tempted to swear at them, to jeer at them, while they could not open the door! “Only make haste!” was the thought that flashed through his mind.

“But what the devil is he about?...” Time was passing, one minute, and another--no one came. Koch began to be restless.

“What the devil?” he cried suddenly and in impatience deserting his sentry duty, he, too, went down, hurrying and thumping with his heavy boots on the stairs. The steps died away.

“Good heavens! What am I to do?”

Raskolnikov unfastened the hook, opened the door--there was no sound. Abruptly, without any thought at all, he went out, closing the door as thoroughly as he could, and went downstairs.

He had gone down three flights when he suddenly heard a loud voice below--where could he go! There was nowhere to hide. He was just going back to the flat.

“Hey there! Catch the brute!”

Somebody dashed out of a flat below, shouting, and rather fell than ran down the stairs, bawling at the top of his voice.

“Mitka! Mitka! Mitka! Mitka! Mitka! Blast him!”

The shout ended in a shriek; the last sounds came from the yard; all was still. But at the same instant several men talking loud and fast began noisily mounting the stairs. There were three or four of them. He distinguished the ringing voice of the young man. “Hey!”

Filled with despair he went straight to meet them, feeling “come what must!” If they stopped him--all was lost; if they let him pass--all was lost too; they would remember him. They were approaching; they were only a flight from him--and suddenly deliverance! A few steps from him on the right, there was an empty flat with the door wide open, the flat on the second floor where the painters had been at work, and which, as though for his benefit, they had just left. It was they, no doubt, who had just run down, shouting. The floor had only just been painted, in the middle of the room stood a pail and a broken pot with paint and brushes. In one instant he had whisked in at the open door and hidden behind the wall and only in the nick of time; they had already reached the landing. Then they turned and went on up to the fourth floor, talking loudly. He waited, went out on tiptoe and ran down the stairs.

No one was on the stairs, nor in the gateway. He passed quickly through the gateway and turned to the left in the street.

He knew, he knew perfectly well that at that moment they were at the flat, that they were greatly astonished at finding it unlocked, as the door had just been fastened, that by now they were looking at the bodies, that before another minute had passed they would guess and completely realise that the murderer had just been there, and had succeeded in hiding somewhere, slipping by them and escaping. They would guess most likely that he had been in the empty flat, while they were going upstairs. And meanwhile he dared not quicken his pace much, though the next turning was still nearly a hundred yards away. “Should he slip through some gateway and wait somewhere in an unknown street? No, hopeless! Should he fling away the axe? Should he take a cab? Hopeless, hopeless!”

At last he reached the turning. He turned down it more dead than alive. Here he was half way to safety, and he understood it; it was less risky because there was a great crowd of people, and he was lost in it like a grain of sand. But all he had suffered had so weakened him that he could scarcely move. Perspiration ran down him in drops, his neck was all wet. “My word, he has been going it!” someone shouted at him when he came out on the canal bank.

He was only dimly conscious of himself now, and the farther he went the worse it was. He remembered however, that on coming out on to the canal bank, he was alarmed at finding few people there and so being more conspicuous, and he had thought of turning back. Though he was almost falling from fatigue, he went a long way round so as to get home from quite a different direction.

He was not fully conscious when he passed through the gateway of his house! He was already on the staircase before he recollected the axe. And yet he had a very grave problem before him, to put it back and to escape observation as far as possible in doing so. He was of course incapable of reflecting that it might perhaps be far better not to restore the axe at all, but to drop it later on in somebody’s yard. But it all happened fortunately, the door of the porter’s room was closed but not locked, so that it seemed most likely that the porter was at home. But he had so completely lost all power of reflection that he walked straight to the door and opened it. If the porter had asked him, “What do you want?” he would perhaps have simply handed him the axe. But again the porter was not at home, and he succeeded in putting the axe back under the bench, and even covering it with the chunk of wood as

before. He met no one, not a soul, afterwards on the way to his room; the landlady's door was shut. When he was in his room, he flung himself on the sofa just as he was--he did not sleep, but sank into blank forgetfulness. If anyone had come into his room then, he would have jumped up at once and screamed. Scraps and shreds of thoughts were simply swarming in his brain, but he could not catch at one, he could not rest on one, in spite of all his efforts....

PART II

CHAPTER I

So he lay a very long while. Now and then he seemed to wake up, and at such moments he noticed that it was far into the night, but it did not occur to him to get up. At last he noticed that it was beginning to get light. He was lying on his back, still dazed from his recent oblivion. Fearful, despairing cries rose shrilly from the street, sounds which he heard every night, indeed, under his window after two o'clock. They woke him up now.

"Ah! the drunken men are coming out of the taverns," he thought, "it's past two o'clock," and at once he leaped up, as though someone had pulled him from the sofa.

"What! Past two o'clock!"

He sat down on the sofa--and instantly recollected everything! All at once, in one flash, he recollected everything.

For the first moment he thought he was going mad. A dreadful chill came over him; but the chill was from the fever that had begun long before in his sleep. Now he was suddenly taken with violent shivering, so that his teeth chattered and all his limbs were shaking. He opened the door and began listening--everything in the house was asleep. With amazement he gazed at himself and everything in the room around him, wondering how he could have come in the night before without fastening the door, and have flung himself on the sofa without undressing, without even taking his hat off. It had fallen off and was lying on the floor near his pillow.

"If anyone had come in, what would he have thought? That I'm drunk but..."

He rushed to the window. There was light enough, and he began hurriedly looking himself all over from head to foot, all his clothes; were there no traces? But there was no doing it like that; shivering with cold, he began taking off everything and looking over again. He turned everything over to the last threads and rags, and mistrusting himself, went through his search three times.

But there seemed to be nothing, no trace, except in one place, where some thick drops of congealed blood were clinging to the frayed edge of his trousers. He picked up a big claspknife and cut off the frayed threads. There seemed to be nothing more.

Suddenly he remembered that the purse and the things he had taken out of the old woman's box were still in his pockets! He had not thought till then of taking them out and hiding them! He had not even thought of them while he was examining his clothes! What next? Instantly he rushed to take them out and fling them on the table. When he had pulled out everything, and turned the pocket inside out to be sure there was nothing left, he carried the whole heap to the corner. The paper had come off the bottom of the wall and hung there in tatters. He began stuffing all the things into the hole under the paper: "They're in! All out of sight, and the purse too!" he thought gleefully, getting up and gazing blankly at the hole which bulged out more than ever. Suddenly he shuddered all over with horror; "My God!" he whispered in despair: "what's the matter with me? Is that hidden? Is that the way to hide things?"

He had not reckoned on having trinkets to hide. He had only thought of money, and so had not prepared a hiding-place.

"But now, now, what am I glad of?" he thought, "Is that hiding things? My reason's deserting me--simply!"

He sat down on the sofa in exhaustion and was at once shaken by another unbearable fit of shivering. Mechanically he drew from a chair beside him his old student's winter coat, which was still warm though almost in rags, covered himself up with it and once more sank into drowsiness and delirium. He lost consciousness.

Not more than five minutes had passed when he jumped up a second time, and at once pounced in a frenzy on his clothes again.

"How could I go to sleep again with nothing done? Yes, yes; I have not taken the loop off the armhole! I forgot it, forgot a thing like that! Such a piece of evidence!"

He pulled off the noose, hurriedly cut it to pieces and threw the bits among his linen under the pillow.

“Pieces of torn linen couldn’t rouse suspicion, whatever happened; I think not, I think not, any way!” he repeated, standing in the middle of the room, and with painful concentration he fell to gazing about him again, at the floor and everywhere, trying to make sure he had not forgotten anything. The conviction that all his faculties, even memory, and the simplest power of reflection were failing him, began to be an insufferable torture.

“Surely it isn’t beginning already! Surely it isn’t my punishment coming upon me? It is!”

The frayed rags he had cut off his trousers were actually lying on the floor in the middle of the room, where anyone coming in would see them!

“What is the matter with me!” he cried again, like one distraught.

Then a strange idea entered his head; that, perhaps, all his clothes were covered with blood, that, perhaps, there were a great many stains, but that he did not see them, did not notice them because his perceptions were failing, were going to pieces... his reason was clouded.... Suddenly he remembered that there had been blood on the purse too. “Ah! Then there must be blood on the pocket too, for I put the wet purse in my pocket!”

In a flash he had turned the pocket inside out and, yes!--there were traces, stains on the lining of the pocket!

“So my reason has not quite deserted me, so I still have some sense and memory, since I guessed it of myself,” he thought triumphantly, with a deep sigh of relief; “it’s simply the weakness of fever, a moment’s delirium,” and he tore the whole lining out of the left pocket of his trousers. At that instant the sunlight fell on his left boot; on the sock which poked out from the boot, he fancied there were traces! He flung off his boots; “traces indeed! The tip of the sock was soaked with blood;” he must have unwarily stepped into that pool.... “But what am I to do with this now? Where am I to put the sock and rags and pocket?”

He gathered them all up in his hands and stood in the middle of the room.

“In the stove? But they would ransack the stove first of all. Burn them? But what can I burn them with? There are no matches even. No, better go out and throw it all away somewhere. Yes, better throw it away,” he repeated, sitting down on the sofa again, “and at once, this minute, without lingering...”

But his head sank on the pillow instead. Again the unbearable icy shivering came over him; again he drew his coat over him.

And for a long while, for some hours, he was haunted by the impulse to “go off somewhere at once, this moment, and fling it all away, so that it may be out of sight and done with, at once, at once!” Several times he tried to rise from the sofa, but could not.

He was thoroughly waked up at last by a violent knocking at his door.

“Open, do, are you dead or alive? He keeps sleeping here!” shouted Nastasya, banging with her fist on the door. “For whole days together he’s snoring here like a dog! A dog he is too. Open, I tell you. It’s past ten.”

“Maybe he’s not at home,” said a man’s voice.

“Ha! that’s the porter’s voice.... What does he want?”

He jumped up and sat on the sofa. The beating of his heart was a positive pain.

“Then who can have latched the door?” retorted Nastasya. “He’s taken to bolting himself in! As if he were worth stealing! Open, you stupid, wake up!”

“What do they want? Why the porter? All’s discovered. Resist or open? Come what may!...”

He half rose, stooped forward and unlatched the door.

His room was so small that he could undo the latch without leaving the bed. Yes; the porter and Nastasya were standing there.

Nastasya stared at him in a strange way. He glanced with a defiant and desperate air at the porter, who without a word held out a grey folded paper sealed with bottle-wax.

“A notice from the office,” he announced, as he gave him the paper.

“From what office?”

“A summons to the police office, of course. You know which office.”

“To the police?... What for?...”

“How can I tell? You’re sent for, so you go.”

The man looked at him attentively, looked round the room and turned to go away.

“He’s downright ill!” observed Nastasya, not taking her eyes off him. The porter turned his head for a moment. “He’s been in a fever since yesterday,” she added.

Raskolnikov made no response and held the paper in his hands, without opening it. “Don’t you get up then,” Nastasya went on compassionately, seeing that he was letting his feet down from the sofa. “You’re ill, and so don’t go; there’s no such hurry. What have you got there?”

He looked; in his right hand he held the shreds he had cut from his trousers, the sock, and the rags of the pocket. So he had been asleep with them in his hand. Afterwards reflecting upon it, he remembered that half waking up in his fever, he had grasped all this tightly in his hand and so fallen asleep again.

“Look at the rags he’s collected and sleeps with them, as though he has got hold of a treasure...”

And Nastasya went off into her hysterical giggle.

Instantly he thrust them all under his great coat and fixed his eyes intently upon her. Far as he was from being capable of rational reflection at that moment, he felt that no one would behave like that with a person who was going to be arrested. “But... the police?”

“You’d better have some tea! Yes? I’ll bring it, there’s some left.”

“No... I’m going; I’ll go at once,” he muttered, getting on to his feet.

“Why, you’ll never get downstairs!”

“Yes, I’ll go.”

“As you please.”

She followed the porter out.

At once he rushed to the light to examine the sock and the rags.

“There are stains, but not very noticeable; all covered with dirt, and rubbed and already discoloured. No one who had no suspicion could distinguish anything. Nastasya from a distance could not have noticed, thank God!” Then with a tremor he broke the seal of the notice and began reading; he was a long while reading, before he understood. It was an ordinary summons from the district police-station to appear that day at half-past nine at the office of the district superintendent.

“But when has such a thing happened? I never have anything to do with the police! And why just to-day?” he thought in agonising bewilderment. “Good God, only get it over soon!”

He was flinging himself on his knees to pray, but broke into laughter--not at the idea of prayer, but at himself.

He began, hurriedly dressing. “If I’m lost, I am lost, I don’t care! Shall I put the sock on?” he suddenly wondered, “it will get dustier still and the traces will be gone.”

But no sooner had he put it on than he pulled it off again in loathing and horror. He pulled it off, but reflecting that he had no other socks, he picked it up and put it on again--and again he laughed.

“That’s all conventional, that’s all relative, merely a way of looking at it,” he thought in a flash, but only on the top surface of his mind, while he was shuddering all over, “there, I’ve got it on! I have finished by getting it on!”

But his laughter was quickly followed by despair.

“No, it’s too much for me...” he thought. His legs shook. “From fear,” he muttered. His head swam and ached with fever. “It’s a trick! They want to decoy me there and confound me over everything,” he mused, as he went out on to the stairs--“the worst of it is I’m almost light-headed... I may blurt out something stupid...”

On the stairs he remembered that he was leaving all the things just as they were in the hole in the wall, “and very likely, it’s on purpose to search when I’m out,” he thought, and stopped short. But he was possessed by such despair, such cynicism of misery, if one may so call it, that with a wave of his hand he went on. “Only to get it over!”

In the street the heat was insufferable again; not a drop of rain had fallen all those days. Again dust, bricks and mortar, again the stench from the shops and pot-houses, again the drunken men, the Finnish pedlars and half-broken-down cabs. The sun shone straight in his eyes, so that it hurt him to look out of them, and he felt his head going round--as a man in a fever is apt to feel when he comes out into the street on a bright sunny day.

When he reached the turning into _the_ street, in an agony of trepidation he looked down it... at _the_ house... and at once averted his eyes.

“If they question me, perhaps I’ll simply tell,” he thought, as he drew near the police-station.

The police-station was about a quarter of a mile off. It had lately been moved to new rooms on the fourth floor of a new house. He had been once for a moment in the old office but long ago. Turning in at the gateway, he saw on the right a flight of stairs which a peasant was mounting with a book in his hand. “A house-porter, no doubt; so then, the office is here,” and he began ascending the stairs on the chance. He did not want to ask questions of anyone.

“I’ll go in, fall on my knees, and confess everything...” he thought, as he reached the fourth floor.

The staircase was steep, narrow and all sloppy with dirty water. The kitchens of the flats opened on to the stairs and stood open almost the whole day. So there was a fearful smell and heat. The staircase was crowded with porters going up and down with their books under their arms, policemen, and persons of all sorts and both sexes. The door of the office, too, stood wide open. Peasants stood waiting within. There, too, the heat was stifling and there was a sickening smell of fresh paint and stale oil from the newly decorated rooms.

After waiting a little, he decided to move forward into the next room. All the rooms were small and low-pitched. A fearful impatience drew him on and on. No one paid attention to him. In the second room some clerks sat writing, dressed hardly better than he was, and rather a queer-looking set. He went up to one of them.

“What is it?”

He showed the notice he had received.

“You are a student?” the man asked, glancing at the notice.

“Yes, formerly a student.”

The clerk looked at him, but without the slightest interest. He was a particularly unkempt person with the look of a fixed idea in his eye.

“There would be no getting anything out of him, because he has no interest in anything,” thought Raskolnikov.

“Go in there to the head clerk,” said the clerk, pointing towards the furthest room.

He went into that room--the fourth in order; it was a small room and packed full of people, rather better dressed than in the outer rooms. Among them were two ladies. One, poorly dressed in mourning, sat at the table opposite the chief clerk, writing something at his dictation. The other, a very stout, buxom woman with a purplish-red, blotchy face, excessively smartly dressed with a brooch on her bosom as big as a saucer, was standing on one side, apparently waiting for something. Raskolnikov thrust his notice upon the head clerk. The latter glanced at it, said: “Wait a minute,” and went on attending to the lady in mourning.

He breathed more freely. “It can’t be that!”

By degrees he began to regain confidence, he kept urging himself to have courage and be calm.

“Some foolishness, some trifling carelessness, and I may betray myself! Hm... it’s a pity there’s no air here,” he added, “it’s stifling.... It makes one’s head dizzier than ever... and one’s mind too...”

He was conscious of a terrible inner turmoil. He was afraid of losing his self-control; he tried to catch at something and fix his mind on it, something quite irrelevant, but he could not succeed in this at all. Yet the head clerk greatly interested him, he kept hoping to see through him and guess something from his face.

He was a very young man, about two and twenty, with a dark mobile face that looked older than his years. He was fashionably dressed and foppish, with his hair parted in the middle, well combed and pomaded, and wore a number of rings on his well-scrubbed fingers and a gold chain on his waistcoat. He said a couple of words in French to a foreigner who was in the room, and said them fairly correctly.

“Luise Ivanovna, you can sit down,” he said casually to the gaily-dressed, purple-faced lady, who was still standing as though not venturing to sit down, though there was a chair beside her.

“Ich danke,” said the latter, and softly, with a rustle of silk she sank into the chair. Her light blue dress trimmed with white lace floated about the table like an air-balloon and filled almost half the room. She smelt of scent. But she was obviously embarrassed at filling half the room and smelling so strongly of scent; and though her smile was impudent as well as cringing, it betrayed evident uneasiness.

The lady in mourning had done at last, and got up. All at once, with some noise, an officer walked in very jauntily, with a peculiar swing of his shoulders at each step. He tossed his cockaded cap on the table and sat down in an easy-chair. The small lady positively skipped from her seat on seeing him, and fell to curtsying in a sort of ecstasy; but the officer took not the smallest notice of her, and she did not venture to sit down again in his presence. He was the assistant superintendent. He had a reddish moustache that stood out horizontally on each side of his face, and extremely small features, expressive of nothing much except a certain insolence. He looked askance and rather indignantly at Raskolnikov; he was so very badly dressed, and in spite of his humiliating position, his bearing was by no means in keeping with his clothes. Raskolnikov had unwarily fixed a very long and direct look on him, so that he felt positively affronted.

“What do you want?” he shouted, apparently astonished that such a ragged fellow was not annihilated by the majesty of his glance.

“I was summoned... by a notice...” Raskolnikov faltered.

“For the recovery of money due, from _the student_,” the head clerk interfered hurriedly, tearing himself from his papers. “Here!” and he flung Raskolnikov a document and pointed out the place. “Read that!”

“Money? What money?” thought Raskolnikov, “but... then... it’s certainly not _that_.”

And he trembled with joy. He felt sudden intense indescribable relief. A load was lifted from his back.

“And pray, what time were you directed to appear, sir?” shouted the assistant superintendent, seeming for some unknown reason more and more aggrieved. “You are told to come at nine, and now it’s twelve!”

“The notice was only brought me a quarter of an hour ago,” Raskolnikov answered loudly over his shoulder. To his own surprise he, too, grew suddenly angry and found a certain pleasure in it. “And it’s enough that I have come here ill with fever.”

“Kindly refrain from shouting!”

“I’m not shouting, I’m speaking very quietly, it’s you who are shouting at me. I’m a student, and allow no one to shout at me.”

The assistant superintendent was so furious that for the first minute he could only splutter inarticulately. He leaped up from his seat.

“Be silent! You are in a government office. Don’t be impudent, sir!”

“You’re in a government office, too,” cried Raskolnikov, “and you’re smoking a cigarette as well as shouting, so you are showing disrespect to all of us.”

He felt an indescribable satisfaction at having said this.

The head clerk looked at him with a smile. The angry assistant superintendent was obviously disconcerted.

“That’s not your business!” he shouted at last with unnatural loudness. “Kindly make the declaration demanded of you. Show him. Alexandr Grigorievitch. There is a complaint against you! You don’t pay your debts! You’re a fine bird!”

But Raskolnikov was not listening now; he had eagerly clutched at the paper, in haste to find an explanation. He read it once, and a second time, and still did not understand.

“What is this?” he asked the head clerk.

“It is for the recovery of money on an I O U, a writ. You must either pay it, with all expenses, costs and so on, or give a written declaration when you can pay it, and at the same time an undertaking not to leave the capital without payment, and nor to sell or conceal your property. The creditor is at liberty to sell your property, and proceed against you according to the law.”

“But I... am not in debt to anyone!”

“That’s not our business. Here, an I O U for a hundred and fifteen roubles, legally attested, and due for payment, has been brought us for recovery, given by you to the widow of the assessor Zarnitsyn, nine months ago, and paid over by the widow Zarnitsyn to one Mr. Tchebarov. We therefore summon you, hereupon.”

“But she is my landlady!”

“And what if she is your landlady?”

The head clerk looked at him with a condescending smile of compassion, and at the same time with a certain triumph, as at a novice under fire for the first time--as though he would say: “Well, how do you feel now?” But what did he care now for an I O U, for a writ of recovery! Was that worth worrying about now, was it worth attention even! He stood, he read, he listened, he answered, he even asked questions himself, but all mechanically. The triumphant sense of security, of deliverance from overwhelming danger, that was what filled his whole soul that moment without thought for the future, without analysis, without suppositions or surmises, without doubts and without questioning. It was an instant of full, direct, purely instinctive joy. But at that very moment something like a thunderstorm took place in the office. The assistant superintendent, still shaken by Raskolnikov’s disrespect, still fuming and obviously anxious to keep up his wounded dignity, pounced on the unfortunate smart lady, who had been gazing at him ever since he came in with an exceedingly silly smile.

“You shameful hussy!” he shouted suddenly at the top of his voice. (The lady in mourning had left the office.) “What was going on at your house last night? Eh! A disgrace again, you’re a scandal to the whole street. Fighting and drinking again. Do you want the house of correction? Why, I have warned you ten times over that I would not let you off the eleventh! And here you are again, again, you... you...!”

The paper fell out of Raskolnikov’s hands, and he looked wildly at the smart lady who was so unceremoniously treated. But he soon saw what it meant, and at once began to find positive amusement in the scandal. He listened with pleasure, so that he longed to laugh and laugh... all his nerves were on edge.

“Ilya Petrovitch!” the head clerk was beginning anxiously, but stopped short, for he knew from experience that the enraged assistant could not be stopped except by force.

As for the smart lady, at first she positively trembled before the storm. But, strange to say, the more numerous and violent the terms of abuse became, the more amiable she looked, and the more seductive the smiles she lavished on the terrible assistant. She moved uneasily, and curtsied incessantly, waiting impatiently for a chance of putting in her word: and at last she found it.

“There was no sort of noise or fighting in my house, Mr. Captain,” she pattered all at once, like peas dropping, speaking Russian confidently, though with a strong German accent, “and no sort of scandal, and his honour came drunk, and it’s the whole truth I am telling, Mr. Captain, and I am not to blame.... Mine is an honourable house, Mr. Captain, and honourable behaviour, Mr. Captain, and I always, always dislike any scandal myself. But he came quite tipsy, and asked for three bottles again, and then he lifted up one leg, and began playing the pianoforte with one foot, and that is not at all right in an honourable house, and he _ganz_ broke the piano, and it was very bad manners indeed and I said so. And he took up a bottle and began hitting everyone with it. And then I called the porter, and Karl came, and he took Karl and hit him in the eye; and he hit Henriette in the eye, too, and gave me five

slaps on the cheek. And it was so ungentlemanly in an honourable house, Mr. Captain, and I screamed. And he opened the window over the canal, and stood in the window, squealing like a little pig; it was a disgrace. The idea of squealing like a little pig at the window into the street! Fie upon him! And Karl pulled him away from the window by his coat, and it is true, Mr. Captain, he tore _sein rock_. And then he shouted that _man muss_ pay him fifteen roubles damages. And I did pay him, Mr. Captain, five roubles for _sein rock_. And he is an ungentlemanly visitor and caused all the scandal. 'I will show you up,' he said, 'for I can write to all the papers about you.'"

"Then he was an author?"

"Yes, Mr. Captain, and what an ungentlemanly visitor in an honourable house...."

"Now then! Enough! I have told you already..."

"Ilya Petrovitch!" the head clerk repeated significantly.

The assistant glanced rapidly at him; the head clerk slightly shook his head.

"... So I tell you this, most respectable Luise Ivanovna, and I tell it you for the last time," the assistant went on. "If there is a scandal in your honourable house once again, I will put you yourself in the lock-up, as it is called in polite society. Do you hear? So a literary man, an author took five roubles for his coat-tail in an 'honourable house'? A nice set, these authors!"

And he cast a contemptuous glance at Raskolnikov. "There was a scandal the other day in a restaurant, too. An author had eaten his dinner and would not pay; 'I'll write a satire on you,' says he. And there was another of them on a steamer last week used the most disgraceful language to the respectable family of a civil councillor, his wife and daughter. And there was one of them turned out of a confectioner's shop the other day. They are like that, authors, literary men, students, town-criers.... Pfoo! You get along! I shall look in upon you myself one day. Then you had better be careful! Do you hear?"

With hurried deference, Luise Ivanovna fell to curtsying in all directions, and so curtsied herself to the door. But at the door, she stumbled backwards against a good-looking officer with a fresh, open face and splendid thick fair whiskers. This was the superintendent of the district himself, Nikodim Fomitch. Luise Ivanovna made haste to curtsy almost to the ground, and with mincing little steps, she fluttered out of the office.

"Again thunder and lightning--a hurricane!" said Nikodim Fomitch to Ilya Petrovitch in a civil and friendly tone. "You are aroused again, you are fuming again! I heard it on the stairs!"

"Well, what then!" Ilya Petrovitch drawled with gentlemanly nonchalance; and he walked with some papers to another table, with a jaunty swing of his shoulders at each step. "Here, if you will kindly look: an author, or a student, has been one at least, does not pay his debts, has given an I O U, won't clear out of his room, and complaints are constantly being lodged against him, and here he has been pleased to make a protest against my smoking in his presence! He behaves like a cad himself, and just look at him, please. Here's the gentleman, and very attractive he is!"

"Poverty is not a vice, my friend, but we know you go off like powder, you can't bear a slight, I daresay you took offence at something and went too far yourself," continued Nikodim Fomitch, turning affably to Raskolnikov. "But you were wrong there; he is a capital fellow, I assure you, but explosive, explosive! He gets hot, fires up, boils over, and no stopping him! And then it's all over! And at the bottom he's a heart of gold! His nickname in the regiment was the Explosive Lieutenant...."

"And what a regiment it was, too," cried Ilya Petrovitch, much gratified at this agreeable banter, though still sulky.

Raskolnikov had a sudden desire to say something exceptionally pleasant to them all. "Excuse me, Captain," he began easily, suddenly addressing Nikodim Fomitch, "will you enter into my position?... I am ready to ask pardon, if I have been ill-mannered. I am a poor student, sick and shattered (shattered was the word he used) by poverty. I am not studying, because I cannot keep myself now, but I shall get money.... I have a mother and sister in the province of X. They will send it to me, and I will pay. My landlady is a good-hearted woman, but she is so exasperated at my having lost my lessons, and not paying her for the last four months, that she does not even send up my dinner... and I don't understand this I O U at all. She is asking me to pay her on this I O U. How am I to pay her? Judge for yourselves!..."

"But that is not our business, you know," the head clerk was observing.

“Yes, yes. I perfectly agree with you. But allow me to explain...” Raskolnikov put in again, still addressing Nikodim Fomitch, but trying his best to address Ilya Petrovitch also, though the latter persistently appeared to be rummaging among his papers and to be contemptuously oblivious of him. “Allow me to explain that I have been living with her for nearly three years and at first... at first... for why should I not confess it, at the very beginning I promised to marry her daughter, it was a verbal promise, freely given... she was a girl... indeed, I liked her, though I was not in love with her... a youthful affair in fact... that is, I mean to say, that my landlady gave me credit freely in those days, and I led a life of... I was very heedless...”

“Nobody asks you for these personal details, sir, we’ve no time to waste,” Ilya Petrovitch interposed roughly and with a note of triumph; but Raskolnikov stopped him hotly, though he suddenly found it exceedingly difficult to speak.

“But excuse me, excuse me. It is for me to explain... how it all happened... In my turn... though I agree with you... it is unnecessary. But a year ago, the girl died of typhus. I remained lodging there as before, and when my landlady moved into her present quarters, she said to me... and in a friendly way... that she had complete trust in me, but still, would I not give her an I O U for one hundred and fifteen roubles, all the debt I owed her. She said if only I gave her that, she would trust me again, as much as I liked, and that she would never, never--those were her own words--make use of that I O U till I could pay of myself... and now, when I have lost my lessons and have nothing to eat, she takes action against me. What am I to say to that?”

“All these affecting details are no business of ours.” Ilya Petrovitch interrupted rudely. “You must give a written undertaking but as for your love affairs and all these tragic events, we have nothing to do with that.”

“Come now... you are harsh,” muttered Nikodim Fomitch, sitting down at the table and also beginning to write. He looked a little ashamed.

“Write!” said the head clerk to Raskolnikov.

“Write what?” the latter asked, gruffly.

“I will dictate to you.”

Raskolnikov fancied that the head clerk treated him more casually and contemptuously after his speech, but strange to say he suddenly felt completely indifferent to anyone’s opinion, and this revulsion took place in a flash, in one instant. If he had cared to think a little, he would have been amazed indeed that he could have talked to them like that a minute before, forcing his feelings upon them. And where had those feelings come from? Now if the whole room had been filled, not with police officers, but with those nearest and dearest to him, he would not have found one human word for them, so empty was his heart. A gloomy sensation of agonising, everlasting solitude and remoteness, took conscious form in his soul. It was not the meanness of his sentimental effusions before Ilya Petrovitch, nor the meanness of the latter’s triumph over him that had caused this sudden revulsion in his heart. Oh, what had he to do now with his own baseness, with all these petty vanities, officers, German women, debts, police-offices? If he had been sentenced to be burnt at that moment, he would not have stirred, would hardly have heard the sentence to the end. Something was happening to him entirely new, sudden and unknown. It was not that he understood, but he felt clearly with all the intensity of sensation that he could never more appeal to these people in the police-office with sentimental effusions like his recent outburst, or with anything whatever; and that if they had been his own brothers and sisters and not police-officers, it would have been utterly out of the question to appeal to them in any circumstance of life. He had never experienced such a strange and awful sensation. And what was most agonising--it was more a sensation than a conception or idea, a direct sensation, the most agonising of all the sensations he had known in his life.

The head clerk began dictating to him the usual form of declaration, that he could not pay, that he undertook to do so at a future date, that he would not leave the town, nor sell his property, and so on.

“But you can’t write, you can hardly hold the pen,” observed the head clerk, looking with curiosity at Raskolnikov. “Are you ill?”

“Yes, I am giddy. Go on!”

“That’s all. Sign it.”

The head clerk took the paper, and turned to attend to others.

Raskolnikov gave back the pen; but instead of getting up and going away, he put his elbows on the table and pressed his head in his hands. He felt as if a nail were being driven into his skull. A strange idea suddenly occurred to him, to get up at once, to go up to

Nikodim Fomitch, and tell him everything that had happened yesterday, and then to go with him to his lodgings and to show him the things in the hole in the corner. The impulse was so strong that he got up from his seat to carry it out. “Hadn’t I better think a minute?” flashed through his mind. “No, better cast off the burden without thinking.” But all at once he stood still, rooted to the spot. Nikodim Fomitch was talking eagerly with Ilya Petrovitch, and the words reached him:

“It’s impossible, they’ll both be released. To begin with, the whole story contradicts itself. Why should they have called the porter, if it had been their doing? To inform against themselves? Or as a blind? No, that would be too cunning! Besides, Pestryakov, the student, was seen at the gate by both the porters and a woman as he went in. He was walking with three friends, who left him only at the gate, and he asked the porters to direct him, in the presence of the friends. Now, would he have asked his way if he had been going with such an object? As for Koch, he spent half an hour at the silversmith’s below, before he went up to the old woman and he left him at exactly a quarter to eight. Now just consider...”

“But excuse me, how do you explain this contradiction? They state themselves that they knocked and the door was locked; yet three minutes later when they went up with the porter, it turned out the door was unfastened.”

“That’s just it; the murderer must have been there and bolted himself in; and they’d have caught him for a certainty if Koch had not been an ass and gone to look for the porter too. _He_ must have seized the interval to get downstairs and slip by them somehow. Koch keeps crossing himself and saying: ‘If I had been there, he would have jumped out and killed me with his axe.’ He is going to have a thanksgiving service--ha, ha!”

“And no one saw the murderer?”

“They might well not see him; the house is a regular Noah’s Ark,” said the head clerk, who was listening.

“It’s clear, quite clear,” Nikodim Fomitch repeated warmly.

“No, it is anything but clear,” Ilya Petrovitch maintained.

Raskolnikov picked up his hat and walked towards the door, but he did not reach it....

When he recovered consciousness, he found himself sitting in a chair, supported by someone on the right side, while someone else was standing on the left, holding a yellowish glass filled with yellow water, and Nikodim Fomitch standing before him, looking intently at him. He got up from the chair.

“What’s this? Are you ill?” Nikodim Fomitch asked, rather sharply.

“He could hardly hold his pen when he was signing,” said the head clerk, settling back in his place, and taking up his work again.

“Have you been ill long?” cried Ilya Petrovitch from his place, where he, too, was looking through papers. He had, of course, come to look at the sick man when he fainted, but retired at once when he recovered.

“Since yesterday,” muttered Raskolnikov in reply.

“Did you go out yesterday?”

“Yes.”

“Though you were ill?”

“Yes.”

“At what time?”

“About seven.”

“And where did you go, may I ask?”

“Along the street.”

“Short and clear.”

Raskolnikov, white as a handkerchief, had answered sharply, jerkily, without dropping his black feverish eyes before Ilya Petrovitch's stare.

"He can scarcely stand upright. And you..." Nikodim Fomitch was beginning.

"No matter," Ilya Petrovitch pronounced rather peculiarly.

Nikodim Fomitch would have made some further protest, but glancing at the head clerk who was looking very hard at him, he did not speak. There was a sudden silence. It was strange.

"Very well, then," concluded Ilya Petrovitch, "we will not detain you."

Raskolnikov went out. He caught the sound of eager conversation on his departure, and above the rest rose the questioning voice of Nikodim Fomitch. In the street, his faintness passed off completely.

"A search--there will be a search at once," he repeated to himself, hurrying home. "The brutes! they suspect."

His former terror mastered him completely again.

CHAPTER II

"And what if there has been a search already? What if I find them in my room?"

But here was his room. Nothing and no one in it. No one had peeped in. Even Nastasya had not touched it. But heavens! how could he have left all those things in the hole?

He rushed to the corner, slipped his hand under the paper, pulled the things out and lined his pockets with them. There were eight articles in all: two little boxes with ear-rings or something of the sort, he hardly looked to see; then four small leather cases. There was a chain, too, merely wrapped in newspaper and something else in newspaper, that looked like a decoration.... He put them all in the different pockets of his overcoat, and the remaining pocket of his trousers, trying to conceal them as much as possible. He took the purse, too. Then he went out of his room, leaving the door open. He walked quickly and resolutely, and though he felt shattered, he had his senses about him. He was afraid of pursuit, he was afraid that in another half-hour, another quarter of an hour perhaps, instructions would be issued for his pursuit, and so at all costs, he must hide all traces before then. He must clear everything up while he still had some strength, some reasoning power left him.... Where was he to go?

That had long been settled: "Fling them into the canal, and all traces hidden in the water, the thing would be at an end." So he had decided in the night of his delirium when several times he had had the impulse to get up and go away, to make haste, and get rid of it all. But to get rid of it, turned out to be a very difficult task. He wandered along the bank of the Ekaterininsky Canal for half an hour or more and looked several times at the steps running down to the water, but he could not think of carrying out his plan; either rafts stood at the steps' edge, and women were washing clothes on them, or boats were moored there, and people were swarming everywhere. Moreover he could be seen and noticed from the banks on all sides; it would look suspicious for a man to go down on purpose, stop, and throw something into the water. And what if the boxes were to float instead of sinking? And of course they would. Even as it was, everyone he met seemed to stare and look round, as if they had nothing to do but to watch him. "Why is it, or can it be my fancy?" he thought.

At last the thought struck him that it might be better to go to the Neva. There were not so many people there, he would be less observed, and it would be more convenient in every way, above all it was further off. He wondered how he could have been wandering for a good half-hour, worried and anxious in this dangerous past without thinking of it before. And that half-hour he had lost over an irrational plan, simply because he had thought of it in delirium! He had become extremely absent and forgetful and he was aware of it. He certainly must make haste.

He walked towards the Neva along V---- Prospect, but on the way another idea struck him. "Why to the Neva? Would it not be better to go somewhere far off, to the Islands again, and there hide the things in some solitary place, in a wood or under a bush, and mark the spot perhaps?" And though he felt incapable of clear judgment, the idea seemed to him a sound one. But he was not destined to go there. For coming out of V---- Prospect towards the square, he saw on the left a passage leading between two blank walls to a courtyard. On the right hand, the blank unwhitewashed wall of a four-storied house stretched far into the court; on the left, a wooden hoarding ran parallel with it for twenty paces into the court, and then turned sharply to the left. Here was a deserted

fenced-off place where rubbish of different sorts was lying. At the end of the court, the corner of a low, smutty, stone shed, apparently part of some workshop, peeped from behind the hoarding. It was probably a carriage builder's or carpenter's shed; the whole place from the entrance was black with coal dust. Here would be the place to throw it, he thought. Not seeing anyone in the yard, he slipped in, and at once saw near the gate a sink, such as is often put in yards where there are many workmen or cab-drivers; and on the hoarding above had been scribbled in chalk the time-honoured witticism, "Standing here strictly forbidden." This was all the better, for there would be nothing suspicious about his going in. "Here I could throw it all in a heap and get away!"

Looking round once more, with his hand already in his pocket, he noticed against the outer wall, between the entrance and the sink, a big unhewn stone, weighing perhaps sixty pounds. The other side of the wall was a street. He could hear passers-by, always numerous in that part, but he could not be seen from the entrance, unless someone came in from the street, which might well happen indeed, so there was need of haste.

He bent down over the stone, seized the top of it firmly in both hands, and using all his strength turned it over. Under the stone was a small hollow in the ground, and he immediately emptied his pocket into it. The purse lay at the top, and yet the hollow was not filled up. Then he seized the stone again and with one twist turned it back, so that it was in the same position again, though it stood a very little higher. But he scraped the earth about it and pressed it at the edges with his foot. Nothing could be noticed.

Then he went out, and turned into the square. Again an intense, almost unbearable joy overwhelmed him for an instant, as it had in the police-office. "I have buried my tracks! And who, who can think of looking under that stone? It has been lying there most likely ever since the house was built, and will lie as many years more. And if it were found, who would think of me? It is all over! No clue!" And he laughed. Yes, he remembered that he began laughing a thin, nervous noiseless laugh, and went on laughing all the time he was crossing the square. But when he reached the K---- Boulevard where two days before he had come upon that girl, his laughter suddenly ceased. Other ideas crept into his mind. He felt all at once that it would be loathsome to pass that seat on which after the girl was gone, he had sat and pondered, and that it would be hateful, too, to meet that whiskered policeman to whom he had given the twenty copecks: "Damn him!"

He walked, looking about him angrily and distractedly. All his ideas now seemed to be circling round some single point, and he felt that there really was such a point, and that now, now, he was left facing that point--and for the first time, indeed, during the last two months.

"Damn it all!" he thought suddenly, in a fit of ungovernable fury. "If it has begun, then it has begun. Hang the new life! Good Lord, how stupid it is!... And what lies I told to-day! How despicably I fawned upon that wretched Ilya Petrovitch! But that is all folly! What do I care for them all, and my fawning upon them! It is not that at all! It is not that at all!"

Suddenly he stopped; a new utterly unexpected and exceedingly simple question perplexed and bitterly confounded him.

"If it all has really been done deliberately and not idiotically, if I really had a certain and definite object, how is it I did not even glance into the purse and don't know what I had there, for which I have undergone these agonies, and have deliberately undertaken this base, filthy degrading business? And here I wanted at once to throw into the water the purse together with all the things which I had not seen either... how's that?"

Yes, that was so, that was all so. Yet he had known it all before, and it was not a new question for him, even when it was decided in the night without hesitation and consideration, as though so it must be, as though it could not possibly be otherwise.... Yes, he had known it all, and understood it all; it surely had all been settled even yesterday at the moment when he was bending over the box and pulling the jewel-cases out of it.... Yes, so it was.

"It is because I am very ill," he decided grimly at last, "I have been worrying and fretting myself, and I don't know what I am doing.... Yesterday and the day before yesterday and all this time I have been worrying myself.... I shall get well and I shall not worry.... But what if I don't get well at all? Good God, how sick I am of it all!"

He walked on without resting. He had a terrible longing for some distraction, but he did not know what to do, what to attempt. A new overwhelming sensation was gaining more and more mastery over him every moment; this was an immeasurable, almost physical, repulsion for everything surrounding him, an obstinate, malignant feeling of hatred. All who met him were loathsome to him--he loathed their faces, their movements, their gestures. If anyone had addressed him, he felt that he might have spat at him or bitten him....

He stopped suddenly, on coming out on the bank of the Little Neva, near the bridge to Vassilyevsky Ostrov. “Why, he lives here, in that house,” he thought, “why, I have not come to Razumihin of my own accord! Here it’s the same thing over again.... Very interesting to know, though; have I come on purpose or have I simply walked here by chance? Never mind, I said the day before yesterday that I would go and see him the day _after_; well, and so I will! Besides I really cannot go further now.”

He went up to Razumihin’s room on the fifth floor.

The latter was at home in his garret, busily writing at the moment, and he opened the door himself. It was four months since they had seen each other. Razumihin was sitting in a ragged dressing-gown, with slippers on his bare feet, unkempt, unshaven and unwashed. His face showed surprise.

“Is it you?” he cried. He looked his comrade up and down; then after a brief pause, he whistled. “As hard up as all that! Why, brother, you’ve cut me out!” he added, looking at Raskolnikov’s rags. “Come sit down, you are tired, I’ll be bound.”

And when he had sunk down on the American leather sofa, which was in even worse condition than his own, Razumihin saw at once that his visitor was ill.

“Why, you are seriously ill, do you know that?” He began feeling his pulse. Raskolnikov pulled away his hand.

“Never mind,” he said, “I have come for this: I have no lessons.... I wanted,... but I don’t really want lessons....”

“But I say! You are delirious, you know!” Razumihin observed, watching him carefully.

“No, I am not.”

Raskolnikov got up from the sofa. As he had mounted the stairs to Razumihin’s, he had not realised that he would be meeting his friend face to face. Now, in a flash, he knew, that what he was least of all disposed for at that moment was to be face to face with anyone in the wide world. His spleen rose within him. He almost choked with rage at himself as soon as he crossed Razumihin’s threshold.

“Good-bye,” he said abruptly, and walked to the door.

“Stop, stop! You queer fish.”

“I don’t want to,” said the other, again pulling away his hand.

“Then why the devil have you come? Are you mad, or what? Why, this is... almost insulting! I won’t let you go like that.”

“Well, then, I came to you because I know no one but you who could help... to begin... because you are kinder than anyone--cleverer, I mean, and can judge... and now I see that I want nothing. Do you hear? Nothing at all... no one’s services... no one’s sympathy. I am by myself... alone. Come, that’s enough. Leave me alone.”

“Stay a minute, you sweep! You are a perfect madman. As you like for all I care. I have no lessons, do you see, and I don’t care about that, but there’s a bookseller, Heruvimov--and he takes the place of a lesson. I would not exchange him for five lessons. He’s doing publishing of a kind, and issuing natural science manuals and what a circulation they have! The very titles are worth the money! You always maintained that I was a fool, but by Jove, my boy, there are greater fools than I am! Now he is setting up for being advanced, not that he has an inkling of anything, but, of course, I encourage him. Here are two signatures of the German text--in my opinion, the crudest charlatanism; it discusses the question, ‘Is woman a human being?’ And, of course, triumphantly proves that she is. Heruvimov is going to bring out this work as a contribution to the woman question; I am translating it; he will expand these two and a half signatures into six, we shall make up a gorgeous title half a page long and bring it out at half a rouble. It will do! He pays me six roubles the signature, it works out to about fifteen roubles for the job, and I’ve had six already in advance. When we have finished this, we are going to begin a translation about whales, and then some of the dullest scandals out of the second part of _Les Confessions_ we have marked for translation; somebody has told Heruvimov, that Rousseau was a kind of Radishchev. You may be sure I don’t contradict him, hang him! Well, would you like to do the second signature of ‘_Is woman a human being?_’ If you would, take the German and pens and paper--all those are provided, and take three roubles; for as I have had six roubles in advance on the whole thing, three roubles come to you for your share. And when you have finished the signature there will be another three roubles for you. And please don’t think I am doing you a service; quite the contrary, as soon as you came in, I saw how you could help me; to begin with, I am weak in spelling, and secondly, I am sometimes utterly adrift in German,

so that I make it up as I go along for the most part. The only comfort is, that it's bound to be a change for the better. Though who can tell, maybe it's sometimes for the worse. Will you take it?"

Raskolnikov took the German sheets in silence, took the three roubles and without a word went out. Razumihin gazed after him in astonishment. But when Raskolnikov was in the next street, he turned back, mounted the stairs to Razumihin's again and laying on the table the German article and the three roubles, went out again, still without uttering a word.

"Are you raving, or what?" Razumihin shouted, roused to fury at last. "What farce is this? You'll drive me crazy too... what did you come to see me for, damn you?"

"I don't want... translation," muttered Raskolnikov from the stairs.

"Then what the devil do you want?" shouted Razumihin from above. Raskolnikov continued descending the staircase in silence.

"Hey, there! Where are you living?"

No answer.

"Well, confound you then!"

But Raskolnikov was already stepping into the street. On the Nikolaevsky Bridge he was roused to full consciousness again by an unpleasant incident. A coachman, after shouting at him two or three times, gave him a violent lash on the back with his whip, for having almost fallen under his horses' hoofs. The lash so infuriated him that he dashed away to the railing (for some unknown reason he had been walking in the very middle of the bridge in the traffic). He angrily clenched and ground his teeth. He heard laughter, of course.

"Serves him right!"

"A pickpocket I dare say."

"Pretending to be drunk, for sure, and getting under the wheels on purpose; and you have to answer for him."

"It's a regular profession, that's what it is."

But while he stood at the railing, still looking angry and bewildered after the retreating carriage, and rubbing his back, he suddenly felt someone thrust money into his hand. He looked. It was an elderly woman in a kerchief and goatskin shoes, with a girl, probably her daughter, wearing a hat, and carrying a green parasol.

"Take it, my good man, in Christ's name."

He took it and they passed on. It was a piece of twenty copecks. From his dress and appearance they might well have taken him for a beggar asking alms in the streets, and the gift of the twenty copecks he doubtless owed to the blow, which made them feel sorry for him.

He closed his hand on the twenty copecks, walked on for ten paces, and turned facing the Neva, looking towards the palace. The sky was without a cloud and the water was almost bright blue, which is so rare in the Neva. The cupola of the cathedral, which is seen at its best from the bridge about twenty paces from the chapel, glittered in the sunlight, and in the pure air every ornament on it could be clearly distinguished. The pain from the lash went off, and Raskolnikov forgot about it; one uneasy and not quite definite idea occupied him now completely. He stood still, and gazed long and intently into the distance; this spot was especially familiar to him. When he was attending the university, he had hundreds of times--generally on his way home--stood still on this spot, gazed at this truly magnificent spectacle and almost always marvelled at a vague and mysterious emotion it roused in him. It left him strangely cold; this gorgeous picture was for him blank and lifeless. He wondered every time at his sombre and enigmatic impression and, mistrusting himself, put off finding the explanation of it. He vividly recalled those old doubts and perplexities, and it seemed to him that it was no mere chance that he recalled them now. It struck him as strange and grotesque, that he should have stopped at the same spot as before, as though he actually imagined he could think the same thoughts, be interested in the same theories and pictures that had interested him... so short a time ago. He felt it almost amusing, and yet it wrung his heart. Deep down, hidden far away out of sight all that seemed to him now--all his old past, his old thoughts, his old problems and theories, his old impressions and that picture and himself and all, all.... He felt as though he were flying upwards, and everything were vanishing from his sight. Making an unconscious movement with his hand, he suddenly became aware of the piece of money in his fist. He

opened his hand, stared at the coin, and with a sweep of his arm flung it into the water; then he turned and went home. It seemed to him, he had cut himself off from everyone and from everything at that moment.

Evening was coming on when he reached home, so that he must have been walking about six hours. How and where he came back he did not remember. Undressing, and quivering like an overdriven horse, he lay down on the sofa, drew his greatcoat over him, and at once sank into oblivion....

It was dusk when he was waked up by a fearful scream. Good God, what a scream! Such unnatural sounds, such howling, wailing, grinding, tears, blows and curses he had never heard.

He could never have imagined such brutality, such frenzy. In terror he sat up in bed, almost swooning with agony. But the fighting, wailing and cursing grew louder and louder. And then to his intense amazement he caught the voice of his landlady. She was howling, shrieking and wailing, rapidly, hurriedly, incoherently, so that he could not make out what she was talking about; she was beseeching, no doubt, not to be beaten, for she was being mercilessly beaten on the stairs. The voice of her assailant was so horrible from spite and rage that it was almost a croak; but he, too, was saying something, and just as quickly and indistinctly, hurrying and spluttering. All at once Raskolnikov trembled; he recognised the voice--it was the voice of Ilya Petrovitch. Ilya Petrovitch here and beating the landlady! He is kicking her, banging her head against the steps--that's clear, that can be told from the sounds, from the cries and the thuds. How is it, is the world topsy-turvy? He could hear people running in crowds from all the storeys and all the staircases; he heard voices, exclamations, knocking, doors banging. "But why, why, and how could it be?" he repeated, thinking seriously that he had gone mad. But no, he heard too distinctly! And they would come to him then next, "for no doubt... it's all about that... about yesterday.... Good God!" He would have fastened his door with the latch, but he could not lift his hand... besides, it would be useless. Terror gripped his heart like ice, tortured him and numbed him.... But at last all this uproar, after continuing about ten minutes, began gradually to subside. The landlady was moaning and groaning; Ilya Petrovitch was still uttering threats and curses.... But at last he, too, seemed to be silent, and now he could not be heard. "Can he have gone away? Good Lord!" Yes, and now the landlady is going too, still weeping and moaning... and then her door slammed.... Now the crowd was going from the stairs to their rooms, exclaiming, disputing, calling to one another, raising their voices to a shout, dropping them to a whisper. There must have been numbers of them--almost all the inmates of the block. "But, good God, how could it be! And why, why had he come here!"

Raskolnikov sank worn out on the sofa, but could not close his eyes. He lay for half an hour in such anguish, such an intolerable sensation of infinite terror as he had never experienced before. Suddenly a bright light flashed into his room. Nastasya came in with a candle and a plate of soup. Looking at him carefully and ascertaining that he was not asleep, she set the candle on the table and began to lay out what she had brought--bread, salt, a plate, a spoon.

"You've eaten nothing since yesterday, I warrant. You've been trudging about all day, and you're shaking with fever."

"Nastasya... what were they beating the landlady for?"

She looked intently at him.

"Who beat the landlady?"

"Just now... half an hour ago, Ilya Petrovitch, the assistant superintendent, on the stairs.... Why was he ill-treating her like that, and... why was he here?"

Nastasya scrutinised him, silent and frowning, and her scrutiny lasted a long time. He felt uneasy, even frightened at her searching eyes.

"Nastasya, why don't you speak?" he said timidly at last in a weak voice.

"It's the blood," she answered at last softly, as though speaking to herself.

"Blood? What blood?" he muttered, growing white and turning towards the wall.

Nastasya still looked at him without speaking.

"Nobody has been beating the landlady," she declared at last in a firm, resolute voice.

He gazed at her, hardly able to breathe.

“I heard it myself.... I was not asleep... I was sitting up,” he said still more timidly. “I listened a long while. The assistant superintendent came.... Everyone ran out on to the stairs from all the flats.”

“No one has been here. That’s the blood crying in your ears. When there’s no outlet for it and it gets clotted, you begin fancying things.... Will you eat something?”

He made no answer. Nastasya still stood over him, watching him.

“Give me something to drink... Nastasya.”

She went downstairs and returned with a white earthenware jug of water. He remembered only swallowing one sip of the cold water and spilling some on his neck. Then followed forgetfulness.

CHAPTER III

He was not completely unconscious, however, all the time he was ill; he was in a feverish state, sometimes delirious, sometimes half conscious. He remembered a great deal afterwards. Sometimes it seemed as though there were a number of people round him; they wanted to take him away somewhere, there was a great deal of squabbling and discussing about him. Then he would be alone in the room; they had all gone away afraid of him, and only now and then opened the door a crack to look at him; they threatened him, plotted something together, laughed, and mocked at him. He remembered Nastasya often at his bedside; he distinguished another person, too, whom he seemed to know very well, though he could not remember who he was, and this fretted him, even made him cry. Sometimes he fancied he had been lying there a month; at other times it all seemed part of the same day. But of _that_--of _that_ he had no recollection, and yet every minute he felt that he had forgotten something he ought to remember. He worried and tormented himself trying to remember, moaned, flew into a rage, or sank into awful, intolerable terror. Then he struggled to get up, would have run away, but someone always prevented him by force, and he sank back into impotence and forgetfulness. At last he returned to complete consciousness.

It happened at ten o’clock in the morning. On fine days the sun shone into the room at that hour, throwing a streak of light on the right wall and the corner near the door. Nastasya was standing beside him with another person, a complete stranger, who was looking at him very inquisitively. He was a young man with a beard, wearing a full, short-waisted coat, and looked like a messenger. The landlady was peeping in at the half-opened door. Raskolnikov sat up.

“Who is this, Nastasya?” he asked, pointing to the young man.

“I say, he’s himself again!” she said.

“He is himself,” echoed the man.

Concluding that he had returned to his senses, the landlady closed the door and disappeared. She was always shy and dreaded conversations or discussions. She was a woman of forty, not at all bad-looking, fat and buxom, with black eyes and eyebrows, good-natured from fatness and laziness, and absurdly bashful.

“Who... are you?” he went on, addressing the man. But at that moment the door was flung open, and, stooping a little, as he was so tall, Razumihin came in.

“What a cabin it is!” he cried. “I am always knocking my head. You call this a lodging! So you are conscious, brother? I’ve just heard the news from Pashenka.”

“He has just come to,” said Nastasya.

“Just come to,” echoed the man again, with a smile.

“And who are you?” Razumihin asked, suddenly addressing him. “My name is Vrazumihin, at your service; not Razumihin, as I am always called, but Vrazumihin, a student and gentleman; and he is my friend. And who are you?”

“I am the messenger from our office, from the merchant Shelopaev, and I’ve come on business.”

“Please sit down.” Razumihin seated himself on the other side of the table. “It’s a good thing you’ve come to, brother,” he went on to Raskolnikov. “For the last four days you have scarcely eaten or drunk anything. We had to give you tea in spoonfuls. I brought

Zossimov to see you twice. You remember Zossimov? He examined you carefully and said at once it was nothing serious--something seemed to have gone to your head. Some nervous nonsense, the result of bad feeding, he says you have not had enough beer and radish, but it's nothing much, it will pass and you will be all right. Zossimov is a first-rate fellow! He is making quite a name. Come, I won't keep you," he said, addressing the man again. "Will you explain what you want? You must know, Rodya, this is the second time they have sent from the office; but it was another man last time, and I talked to him. Who was it came before?"

"That was the day before yesterday, I venture to say, if you please, sir. That was Alexey Semyonovitch; he is in our office, too."

"He was more intelligent than you, don't you think so?"

"Yes, indeed, sir, he is of more weight than I am."

"Quite so; go on."

"At your mamma's request, through Afanasy Ivanovitch Vahrushin, of whom I presume you have heard more than once, a remittance is sent to you from our office," the man began, addressing Raskolnikov. "If you are in an intelligible condition, I've thirty-five roubles to remit to you, as Semyon Semyonovitch has received from Afanasy Ivanovitch at your mamma's request instructions to that effect, as on previous occasions. Do you know him, sir?"

"Yes, I remember... Vahrushin," Raskolnikov said dreamily.

"You hear, he knows Vahrushin," cried Razumihin. "He is in 'an intelligible condition'! And I see you are an intelligent man too. Well, it's always pleasant to hear words of wisdom."

"That's the gentleman, Vahrushin, Afanasy Ivanovitch. And at the request of your mamma, who has sent you a remittance once before in the same manner through him, he did not refuse this time also, and sent instructions to Semyon Semyonovitch some days since to hand you thirty-five roubles in the hope of better to come."

"That 'hoping for better to come' is the best thing you've said, though 'your mamma' is not bad either. Come then, what do you say? Is he fully conscious, eh?"

"That's all right. If only he can sign this little paper."

"He can scrawl his name. Have you got the book?"

"Yes, here's the book."

"Give it to me. Here, Rodya, sit up. I'll hold you. Take the pen and scribble 'Raskolnikov' for him. For just now, brother, money is sweeter to us than treacle."

"I don't want it," said Raskolnikov, pushing away the pen.

"Not want it?"

"I won't sign it."

"How the devil can you do without signing it?"

"I don't want... the money."

"Don't want the money! Come, brother, that's nonsense, I bear witness. Don't trouble, please, it's only that he is on his travels again. But that's pretty common with him at all times though.... You are a man of judgment and we will take him in hand, that is, more simply, take his hand and he will sign it. Here."

"But I can come another time."

"No, no. Why should we trouble you? You are a man of judgment.... Now, Rodya, don't keep your visitor, you see he is waiting," and he made ready to hold Raskolnikov's hand in earnest.

"Stop, I'll do it alone," said the latter, taking the pen and signing his name.

The messenger took out the money and went away.

“Bravo! And now, brother, are you hungry?”

“Yes,” answered Raskolnikov.

“Is there any soup?”

“Some of yesterday’s,” answered Nastasya, who was still standing there.

“With potatoes and rice in it?”

“Yes.”

“I know it by heart. Bring soup and give us some tea.”

“Very well.”

Raskolnikov looked at all this with profound astonishment and a dull, unreasoning terror. He made up his mind to keep quiet and see what would happen. “I believe I am not wandering. I believe it’s reality,” he thought.

In a couple of minutes Nastasya returned with the soup, and announced that the tea would be ready directly. With the soup she brought two spoons, two plates, salt, pepper, mustard for the beef, and so on. The table was set as it had not been for a long time. The cloth was clean.

“It would not be amiss, Nastasya, if Praskovya Pavlovna were to send us up a couple of bottles of beer. We could empty them.”

“Well, you are a cool hand,” muttered Nastasya, and she departed to carry out his orders.

Raskolnikov still gazed wildly with strained attention. Meanwhile Razumihin sat down on the sofa beside him, as clumsily as a bear put his left arm round Raskolnikov’s head, although he was able to sit up, and with his right hand gave him a spoonful of soup, blowing on it that it might not burn him. But the soup was only just warm. Raskolnikov swallowed one spoonful greedily, then a second, then a third. But after giving him a few more spoonfuls of soup, Razumihin suddenly stopped, and said that he must ask Zossimov whether he ought to have more.

Nastasya came in with two bottles of beer.

“And will you have tea?”

“Yes.”

“Cut along, Nastasya, and bring some tea, for tea we may venture on without the faculty. But here is the beer!” He moved back to his chair, pulled the soup and meat in front of him, and began eating as though he had not touched food for three days.

“I must tell you, Rodya, I dine like this here every day now,” he mumbled with his mouth full of beef, “and it’s all Pashenka, your dear little landlady, who sees to that; she loves to do anything for me. I don’t ask for it, but, of course, I don’t object. And here’s Nastasya with the tea. She is a quick girl. Nastasya, my dear, won’t you have some beer?”

“Get along with your nonsense!”

“A cup of tea, then?”

“A cup of tea, maybe.”

“Pour it out. Stay, I’ll pour it out myself. Sit down.”

He poured out two cups, left his dinner, and sat on the sofa again. As before, he put his left arm round the sick man’s head, raised him up and gave him tea in spoonfuls, again blowing each spoonful steadily and earnestly, as though this process was the principal and most effective means towards his friend’s recovery. Raskolnikov said nothing and made no resistance, though he felt quite strong enough to sit up on the sofa without support and could not merely have held a cup or a spoon, but even perhaps could have walked about. But from some queer, almost animal, cunning he conceived the idea of hiding his strength and lying low for a time, pretending if necessary not to be yet in full possession of his faculties, and meanwhile listening to find out what was going on. Yet

he could not overcome his sense of repugnance. After sipping a dozen spoonfuls of tea, he suddenly released his head, pushed the spoon away capriciously, and sank back on the pillow. There were actually real pillows under his head now, down pillows in clean cases, he observed that, too, and took note of it.

“Pashenka must give us some raspberry jam to-day to make him some raspberry tea,” said Razumihin, going back to his chair and attacking his soup and beer again.

“And where is she to get raspberries for you?” asked Nastasya, balancing a saucer on her five outspread fingers and sipping tea through a lump of sugar.

“She’ll get it at the shop, my dear. You see, Rodya, all sorts of things have been happening while you have been laid up. When you decamped in that rascally way without leaving your address, I felt so angry that I resolved to find you out and punish you. I set to work that very day. How I ran about making inquiries for you! This lodging of yours I had forgotten, though I never remembered it, indeed, because I did not know it; and as for your old lodgings, I could only remember it was at the Five Corners, Harlamov’s house. I kept trying to find that Harlamov’s house, and afterwards it turned out that it was not Harlamov’s, but Buch’s. How one muddles up sound sometimes! So I lost my temper, and I went on the chance to the address bureau next day, and only fancy, in two minutes they looked you up! Your name is down there.”

“My name!”

“I should think so; and yet a General Kobelev they could not find while I was there. Well, it’s a long story. But as soon as I did land on this place, I soon got to know all your affairs--all, all, brother, I know everything; Nastasya here will tell you. I made the acquaintance of Nikodim Fomitch and Ilya Petrovitch, and the house-porter and Mr. Zametov, Alexandr Grigorievitch, the head clerk in the police office, and, last, but not least, of Pashenka; Nastasya here knows....”

“He’s got round her,” Nastasya murmured, smiling slyly.

“Why don’t you put the sugar in your tea, Nastasya Nikiforovna?”

“You are a one!” Nastasya cried suddenly, going off into a giggle. “I am not Nikiforovna, but Petrovna,” she added suddenly, recovering from her mirth.

“I’ll make a note of it. Well, brother, to make a long story short, I was going in for a regular explosion here to uproot all malignant influences in the locality, but Pashenka won the day. I had not expected, brother, to find her so... prepossessing. Eh, what do you think?”

Raskolnikov did not speak, but he still kept his eyes fixed upon him, full of alarm.

“And all that could be wished, indeed, in every respect,” Razumihin went on, not at all embarrassed by his silence.

“Ah, the sly dog!” Nastasya shrieked again. This conversation afforded her unspeakable delight.

“It’s a pity, brother, that you did not set to work in the right way at first. You ought to have approached her differently. She is, so to speak, a most unaccountable character. But we will talk about her character later.... How could you let things come to such a pass that she gave up sending you your dinner? And that I O U? You must have been mad to sign an I O U. And that promise of marriage when her daughter, Natalya Yegorovna, was alive?... I know all about it! But I see that’s a delicate matter and I am an ass; forgive me. But, talking of foolishness, do you know Praskovya Pavlovna is not nearly so foolish as you would think at first sight?”

“No,” mumbled Raskolnikov, looking away, but feeling that it was better to keep up the conversation.

“She isn’t, is she?” cried Razumihin, delighted to get an answer out of him. “But she is not very clever either, eh? She is essentially, essentially an unaccountable character! I am sometimes quite at a loss, I assure you.... She must be forty; she says she is thirty-six, and of course she has every right to say so. But I swear I judge her intellectually, simply from the metaphysical point of view; there is a sort of symbolism sprung up between us, a sort of algebra or what not! I don’t understand it! Well, that’s all nonsense. Only, seeing that you are not a student now and have lost your lessons and your clothes, and that through the young lady’s death she has no need to treat you as a relation, she suddenly took fright; and as you hid in your den and dropped all your old relations with her, she planned to get rid of you. And she’s been cherishing that design a long time, but was sorry to lose the I O U, for you assured her yourself that your mother would pay.”

“It was base of me to say that.... My mother herself is almost a beggar... and I told a lie to keep my lodging... and be fed,” Raskolnikov said loudly and distinctly.

“Yes, you did very sensibly. But the worst of it is that at that point Mr. Tchebarov turns up, a business man. Pashenka would never have thought of doing anything on her own account, she is too retiring; but the business man is by no means retiring, and first thing he puts the question, ‘Is there any hope of realising the I O U?’ Answer: there is, because he has a mother who would save her Rodya with her hundred and twenty-five roubles pension, if she has to starve herself; and a sister, too, who would go into bondage for his sake. That’s what he was building upon.... Why do you start? I know all the ins and outs of your affairs now, my dear boy--it’s not for nothing that you were so open with Pashenka when you were her prospective son-in-law, and I say all this as a friend.... But I tell you what it is; an honest and sensitive man is open; and a business man ‘listens and goes on eating’ you up. Well, then she gave the I O U by way of payment to this Tchebarov, and without hesitation he made a formal demand for payment. When I heard of all this I wanted to blow him up, too, to clear my conscience, but by that time harmony reigned between me and Pashenka, and I insisted on stopping the whole affair, engaging that you would pay. I went security for you, brother. Do you understand? We called Tchebarov, flung him ten roubles and got the I O U back from him, and here I have the honour of presenting it to you. She trusts your word now. Here, take it, you see I have torn it.”

Razumihin put the note on the table. Raskolnikov looked at him and turned to the wall without uttering a word. Even Razumihin felt a twinge.

“I see, brother,” he said a moment later, “that I have been playing the fool again. I thought I should amuse you with my chatter, and I believe I have only made you cross.”

“Was it you I did not recognise when I was delirious?” Raskolnikov asked, after a moment’s pause without turning his head.

“Yes, and you flew into a rage about it, especially when I brought Zametov one day.”

“Zametov? The head clerk? What for?” Raskolnikov turned round quickly and fixed his eyes on Razumihin.

“What’s the matter with you?... What are you upset about? He wanted to make your acquaintance because I talked to him a lot about you.... How could I have found out so much except from him? He is a capital fellow, brother, first-rate... in his own way, of course. Now we are friends--see each other almost every day. I have moved into this part, you know. I have only just moved. I’ve been with him to Luise Ivanovna once or twice.... Do you remember Luise, Luise Ivanovna?”

“Did I say anything in delirium?”

“I should think so! You were beside yourself.”

“What did I rave about?”

“What next? What did you rave about? What people do rave about.... Well, brother, now I must not lose time. To work.” He got up from the table and took up his cap.

“What did I rave about?”

“How he keeps on! Are you afraid of having let out some secret? Don’t worry yourself; you said nothing about a countess. But you said a lot about a bulldog, and about ear-rings and chains, and about Krestovsky Island, and some porter, and Nikodim Fomitch and Ilya Petrovitch, the assistant superintendent. And another thing that was of special interest to you was your own sock. You whined, ‘Give me my sock.’ Zametov hunted all about your room for your socks, and with his own scented, ring-bedecked fingers he gave you the rag. And only then were you comforted, and for the next twenty-four hours you held the wretched thing in your hand; we could not get it from you. It is most likely somewhere under your quilt at this moment. And then you asked so piteously for fringe for your trousers. We tried to find out what sort of fringe, but we could not make it out. Now to business! Here are thirty-five roubles; I take ten of them, and shall give you an account of them in an hour or two. I will let Zossimov know at the same time, though he ought to have been here long ago, for it is nearly twelve. And you, Nastasya, look in pretty often while I am away, to see whether he wants a drink or anything else. And I will tell Pashenka what is wanted myself. Good-bye!”

“He calls her Pashenka! Ah, he’s a deep one!” said Nastasya as he went out; then she opened the door and stood listening, but could not resist running downstairs after him. She was very eager to hear what he would say to the landlady. She was evidently quite fascinated by Razumihin.

No sooner had she left the room than the sick man flung off the bedclothes and leapt out of bed like a madman. With burning, twitching impatience he had waited for them to be gone so that he might set to work. But to what work? Now, as though to spite him, it eluded him.

“Good God, only tell me one thing: do they know of it yet or not? What if they know it and are only pretending, mocking me while I am laid up, and then they will come in and tell me that it’s been discovered long ago and that they have only... What am I to do now? That’s what I’ve forgotten, as though on purpose; forgotten it all at once, I remembered a minute ago.”

He stood in the middle of the room and gazed in miserable bewilderment about him; he walked to the door, opened it, listened; but that was not what he wanted. Suddenly, as though recalling something, he rushed to the corner where there was a hole under the paper, began examining it, put his hand into the hole, fumbled--but that was not it. He went to the stove, opened it and began rummaging in the ashes; the frayed edges of his trousers and the rags cut off his pocket were lying there just as he had thrown them. No one had looked, then! Then he remembered the sock about which Razumihin had just been telling him. Yes, there it lay on the sofa under the quilt, but it was so covered with dust and grime that Zametov could not have seen anything on it.

“Bah, Zametov! The police office! And why am I sent for to the police office? Where’s the notice? Bah! I am mixing it up; that was then. I looked at my sock then, too, but now... now I have been ill. But what did Zametov come for? Why did Razumihin bring him?” he muttered, helplessly sitting on the sofa again. “What does it mean? Am I still in delirium, or is it real? I believe it is real.... Ah, I remember; I must escape! Make haste to escape. Yes, I must, I must escape! Yes... but where? And where are my clothes? I’ve no boots. They’ve taken them away! They’ve hidden them! I understand! Ah, here is my coat--they passed that over! And here is money on the table, thank God! And here’s the I O U... I’ll take the money and go and take another lodging. They won’t find me!... Yes, but the address bureau? They’ll find me, Razumihin will find me. Better escape altogether... far away... to America, and let them do their worst! And take the I O U... it would be of use there.... What else shall I take? They think I am ill! They don’t know that I can walk, ha-ha-ha! I could see by their eyes that they know all about it! If only I could get downstairs! And what if they have set a watch there--policemen! What’s this tea? Ah, and here is beer left, half a bottle, cold!”

He snatched up the bottle, which still contained a glassful of beer, and gulped it down with relish, as though quenching a flame in his breast. But in another minute the beer had gone to his head, and a faint and even pleasant shiver ran down his spine. He lay down and pulled the quilt over him. His sick and incoherent thoughts grew more and more disconnected, and soon a light, pleasant drowsiness came upon him. With a sense of comfort he nestled his head into the pillow, wrapped more closely about him the soft, wadded quilt which had replaced the old, ragged greatcoat, sighed softly and sank into a deep, sound, refreshing sleep.

He woke up, hearing someone come in. He opened his eyes and saw Razumihin standing in the doorway, uncertain whether to come in or not. Raskolnikov sat up quickly on the sofa and gazed at him, as though trying to recall something.

“Ah, you are not asleep! Here I am! Nastasya, bring in the parcel!” Razumihin shouted down the stairs. “You shall have the account directly.”

“What time is it?” asked Raskolnikov, looking round uneasily.

“Yes, you had a fine sleep, brother, it’s almost evening, it will be six o’clock directly. You have slept more than six hours.”

“Good heavens! Have I?”

“And why not? It will do you good. What’s the hurry? A tryst, is it? We’ve all time before us. I’ve been waiting for the last three hours for you; I’ve been up twice and found you asleep. I’ve called on Zossimov twice; not at home, only fancy! But no matter, he will turn up. And I’ve been out on my own business, too. You know I’ve been moving to-day, moving with my uncle. I have an uncle living with me now. But that’s no matter, to business. Give me the parcel, Nastasya. We will open it directly. And how do you feel now, brother?”

“I am quite well, I am not ill. Razumihin, have you been here long?”

“I tell you I’ve been waiting for the last three hours.”

“No, before.”

“How do you mean?”

“How long have you been coming here?”

“Why I told you all about it this morning. Don’t you remember?”

Raskolnikov pondered. The morning seemed like a dream to him. He could not remember alone, and looked inquiringly at Razumihin.

“Hm!” said the latter, “he has forgotten. I fancied then that you were not quite yourself. Now you are better for your sleep.... You really look much better. First-rate! Well, to business. Look here, my dear boy.”

He began untying the bundle, which evidently interested him.

“Believe me, brother, this is something specially near my heart. For we must make a man of you. Let’s begin from the top. Do you see this cap?” he said, taking out of the bundle a fairly good though cheap and ordinary cap. “Let me try it on.”

“Presently, afterwards,” said Raskolnikov, waving it off pettishly.

“Come, Rodya, my boy, don’t oppose it, afterwards will be too late; and I shan’t sleep all night, for I bought it by guess, without measure. Just right!” he cried triumphantly, fitting it on, “just your size! A proper head-covering is the first thing in dress and a recommendation in its own way. Tolstyakov, a friend of mine, is always obliged to take off his pudding basin when he goes into any public place where other people wear their hats or caps. People think he does it from slavish politeness, but it’s simply because he is ashamed of his bird’s nest; he is such a boastful fellow! Look, Nastasya, here are two specimens of headgear: this Palmerston”--he took from the corner Raskolnikov’s old, battered hat, which for some unknown reason, he called a Palmerston--“or this jewel! Guess the price, Rodya, what do you suppose I paid for it, Nastasya!” he said, turning to her, seeing that Raskolnikov did not speak.

“Twenty copecks, no more, I dare say,” answered Nastasya.

“Twenty copecks, silly!” he cried, offended. “Why, nowadays you would cost more than that--eighty copecks! And that only because it has been worn. And it’s bought on condition that when’s it’s worn out, they will give you another next year. Yes, on my word! Well, now let us pass to the United States of America, as they called them at school. I assure you I am proud of these breeches,” and he exhibited to Raskolnikov a pair of light, summer trousers of grey woollen material. “No holes, no spots, and quite respectable, although a little worn; and a waistcoat to match, quite in the fashion. And its being worn really is an improvement, it’s softer, smoother.... You see, Rodya, to my thinking, the great thing for getting on in the world is always to keep to the seasons; if you don’t insist on having asparagus in January, you keep your money in your purse; and it’s the same with this purchase. It’s summer now, so I’ve been buying summer things--warmer materials will be wanted for autumn, so you will have to throw these away in any case... especially as they will be done for by then from their own lack of coherence if not your higher standard of luxury. Come, price them! What do you say? Two roubles twenty-five copecks! And remember the condition: if you wear these out, you will have another suit for nothing! They only do business on that system at Fedyaev’s; if you’ve bought a thing once, you are satisfied for life, for you will never go there again of your own free will. Now for the boots. What do you say? You see that they are a bit worn, but they’ll last a couple of months, for it’s foreign work and foreign leather; the secretary of the English Embassy sold them last week--he had only worn them six days, but he was very short of cash. Price--a rouble and a half. A bargain?”

“But perhaps they won’t fit,” observed Nastasya.

“Not fit? Just look!” and he pulled out of his pocket Raskolnikov’s old, broken boot, stiffly coated with dry mud. “I did not go empty-handed--they took the size from this monster. We all did our best. And as to your linen, your landlady has seen to that. Here, to begin with are three shirts, hempen but with a fashionable front.... Well now then, eighty copecks the cap, two roubles twenty-five copecks the suit--together three roubles five copecks--a rouble and a half for the boots--for, you see, they are very good--and that makes four roubles fifty-five copecks; five roubles for the underclothes--they were bought in the lot--which makes exactly nine roubles fifty-five copecks. Forty-five copecks change in coppers. Will you take it? And so, Rodya, you are set up with a complete new rig-out, for your overcoat will serve, and even has a style of its own. That comes from getting one’s clothes from Sharmer’s! As for your socks and other things, I leave them to you; we’ve twenty-five roubles left. And as for Pashenka and paying for your lodging, don’t you worry. I tell you she’ll trust you for anything. And now, brother, let me change your linen, for I daresay you will throw off your illness with your shirt.”

“Let me be! I don’t want to!” Raskolnikov waved him off. He had listened with disgust to Razumihin’s efforts to be playful about his purchases.

“Come, brother, don’t tell me I’ve been trudging around for nothing,” Razumihin insisted. “Nastasya, don’t be bashful, but help me--that’s it,” and in spite of Raskolnikov’s resistance he changed his linen. The latter sank back on the pillows and for a minute or two said nothing.

“It will be long before I get rid of them,” he thought. “What money was all that bought with?” he asked at last, gazing at the wall.

“Money? Why, your own, what the messenger brought from Vahrushin, your mother sent it. Have you forgotten that, too?”

“I remember now,” said Raskolnikov after a long, sullen silence. Razumihin looked at him, frowning and uneasy.

The door opened and a tall, stout man whose appearance seemed familiar to Raskolnikov came in.

CHAPTER IV

Zossimov was a tall, fat man with a puffy, colourless, clean-shaven face and straight flaxen hair. He wore spectacles, and a big gold ring on his fat finger. He was twenty-seven. He had on a light grey fashionable loose coat, light summer trousers, and everything about him loose, fashionable and spick and span; his linen was irreproachable, his watch-chain was massive. In manner he was slow and, as it were, nonchalant, and at the same time studiously free and easy; he made efforts to conceal his self-importance, but it was apparent at every instant. All his acquaintances found him tedious, but said he was clever at his work.

“I’ve been to you twice to-day, brother. You see, he’s come to himself,” cried Razumihin.

“I see, I see; and how do we feel now, eh?” said Zossimov to Raskolnikov, watching him carefully and, sitting down at the foot of the sofa, he settled himself as comfortably as he could.

“He is still depressed,” Razumihin went on. “We’ve just changed his linen and he almost cried.”

“That’s very natural; you might have put it off if he did not wish it.... His pulse is first-rate. Is your head still aching, eh?”

“I am well, I am perfectly well!” Raskolnikov declared positively and irritably. He raised himself on the sofa and looked at them with glittering eyes, but sank back on to the pillow at once and turned to the wall. Zossimov watched him intently.

“Very good.... Going on all right,” he said lazily. “Has he eaten anything?”

They told him, and asked what he might have.

“He may have anything... soup, tea... mushrooms and cucumbers, of course, you must not give him; he’d better not have meat either, and... but no need to tell you that!” Razumihin and he looked at each other. “No more medicine or anything. I’ll look at him again to-morrow. Perhaps, to-day even... but never mind...”

“To-morrow evening I shall take him for a walk,” said Razumihin. “We are going to the Yusupov garden and then to the Palais de Cristal.”

“I would not disturb him to-morrow at all, but I don’t know... a little, maybe... but we’ll see.”

“Ach, what a nuisance! I’ve got a house-warming party to-night; it’s only a step from here. Couldn’t he come? He could lie on the sofa. You are coming?” Razumihin said to Zossimov. “Don’t forget, you promised.”

“All right, only rather later. What are you going to do?”

“Oh, nothing--tea, vodka, herrings. There will be a pie... just our friends.”

“And who?”

“All neighbours here, almost all new friends, except my old uncle, and he is new too--he only arrived in Petersburg yesterday to see to some business of his. We meet once in five years.”

“What is he?”

“He’s been stagnating all his life as a district postmaster; gets a little pension. He is sixty-five--not worth talking about.... But I am fond of him. Porfiry Petrovitch, the head of the Investigation Department here... But you know him.”

“Is he a relation of yours, too?”

“A very distant one. But why are you scowling? Because you quarrelled once, won’t you come then?”

“I don’t care a damn for him.”

“So much the better. Well, there will be some students, a teacher, a government clerk, a musician, an officer and Zametov.”

“Do tell me, please, what you or he”--Zossimov nodded at Raskolnikov--“can have in common with this Zametov?”

“Oh, you particular gentleman! Principles! You are worked by principles, as it were by springs; you won’t venture to turn round on your own account. If a man is a nice fellow, that’s the only principle I go upon. Zametov is a delightful person.”

“Though he does take bribes.”

“Well, he does! and what of it? I don’t care if he does take bribes,” Razumihin cried with unnatural irritability. “I don’t praise him for taking bribes. I only say he is a nice man in his own way! But if one looks at men in all ways--are there many good ones left? Why, I am sure I shouldn’t be worth a baked onion myself... perhaps with you thrown in.”

“That’s too little; I’d give two for you.”

“And I wouldn’t give more than one for you. No more of your jokes! Zametov is no more than a boy. I can pull his hair and one must draw him not repel him. You’ll never improve a man by repelling him, especially a boy. One has to be twice as careful with a boy. Oh, you progressive dullards! You don’t understand. You harm yourselves running another man down.... But if you want to know, we really have something in common.”

“I should like to know what.”

“Why, it’s all about a house-painter.... We are getting him out of a mess! Though indeed there’s nothing to fear now. The matter is absolutely self-evident. We only put on steam.”

“A painter?”

“Why, haven’t I told you about it? I only told you the beginning then about the murder of the old pawnbroker-woman. Well, the painter is mixed up in it...”

“Oh, I heard about that murder before and was rather interested in it... partly... for one reason.... I read about it in the papers, too....”

“Lizaveta was murdered, too,” Nastasya blurted out, suddenly addressing Raskolnikov. She remained in the room all the time, standing by the door listening.

“Lizaveta,” murmured Raskolnikov hardly audibly.

“Lizaveta, who sold old clothes. Didn’t you know her? She used to come here. She mended a shirt for you, too.”

Raskolnikov turned to the wall where in the dirty, yellow paper he picked out one clumsy, white flower with brown lines on it and began examining how many petals there were in it, how many scallops in the petals and how many lines on them. He felt his arms and legs as lifeless as though they had been cut off. He did not attempt to move, but stared obstinately at the flower.

“But what about the painter?” Zossimov interrupted Nastasya’s chatter with marked displeasure. She sighed and was silent.

“Why, he was accused of the murder,” Razumihin went on hotly.

“Was there evidence against him then?”

“Evidence, indeed! Evidence that was no evidence, and that’s what we have to prove. It was just as they pitched on those fellows, Koch and Pestryakov, at first. Foo! how stupidly it’s all done, it makes one sick, though it’s not one’s business! Pestryakov may be coming to-night.... By the way, Rodya, you’ve heard about the business already; it happened before you were ill, the day before you fainted at the police office while they were talking about it.”

Zossimov looked curiously at Raskolnikov. He did not stir.

“But I say, Razumihin, I wonder at you. What a busybody you are!” Zossimov observed.

“Maybe I am, but we will get him off anyway,” shouted Razumihin, bringing his fist down on the table. “What’s the most offensive is not their lying--one can always forgive lying--lying is a delightful thing, for it leads to truth--what is offensive is that they lie and worship their own lying.... I respect Porfiry, but... What threw them out at first? The door was locked, and when they came back with the porter it was open. So it followed that Koch and Pestryakov were the murderers--that was their logic!”

“But don’t excite yourself; they simply detained them, they could not help that.... And, by the way, I’ve met that man Koch. He used to buy unredeemed pledges from the old woman? Eh?”

“Yes, he is a swindler. He buys up bad debts, too. He makes a profession of it. But enough of him! Do you know what makes me angry? It’s their sickening rotten, petrified routine.... And this case might be the means of introducing a new method. One can show from the psychological data alone how to get on the track of the real man. ‘We have facts,’ they say. But facts are not everything--at least half the business lies in how you interpret them!”

“Can you interpret them, then?”

“Anyway, one can’t hold one’s tongue when one has a feeling, a tangible feeling, that one might be a help if only.... Eh! Do you know the details of the case?”

“I am waiting to hear about the painter.”

“Oh, yes! Well, here’s the story. Early on the third day after the murder, when they were still dandling Koch and Pestryakov--though they accounted for every step they took and it was as plain as a pikestaff--an unexpected fact turned up. A peasant called Dushkin, who keeps a dram-shop facing the house, brought to the police office a jeweller’s case containing some gold ear-rings, and told a long rigamarole. ‘The day before yesterday, just after eight o’clock’--mark the day and the hour!--‘a journeyman house-painter, Nikolay, who had been in to see me already that day, brought me this box of gold ear-rings and stones, and asked me to give him two roubles for them. When I asked him where he got them, he said that he picked them up in the street. I did not ask him anything more.’ I am telling you Dushkin’s story. ‘I gave him a note’--a rouble that is--‘for I thought if he did not pawn it with me he would with another. It would all come to the same thing--he’d spend it on drink, so the thing had better be with me. The further you hide it the quicker you will find it, and if anything turns up, if I hear any rumours, I’ll take it to the police.’ Of course, that’s all taradiddle; he lies like a horse, for I know this Dushkin, he is a pawnbroker and a receiver of stolen goods, and he did not cheat Nikolay out of a thirty-rouble trinket in order to give it to the police. He was simply afraid. But no matter, to return to Dushkin’s story. ‘I’ve known this peasant, Nikolay Dementyev, from a child; he comes from the same province and district of Zaraïsk, we are both Ryazan men. And though Nikolay is not a drunkard, he drinks, and I knew he had a job in that house, painting work with Dmitri, who comes from the same village, too. As soon as he got the rouble he changed it, had a couple of glasses, took his change and went out. But I did not see Dmitri with him then. And the next day I heard that someone had murdered Alyona Ivanovna and her sister, Lizaveta Ivanovna, with an axe. I knew them, and I felt suspicious about the ear-rings at once, for I knew the murdered woman lent money on pledges. I went to the house, and began to make careful inquiries without saying a word to anyone. First of all I asked, “Is Nikolay here?” Dmitri told me that Nikolay had gone off on the spree; he had come home at daybreak drunk, stayed in the house about ten minutes, and went out again. Dmitri didn’t see him again and is finishing the job alone. And their job is on the same staircase as the murder, on the second floor. When I heard all that I did not say a word to anyone’--that’s Dushkin’s tale--‘but I found out what I could about the murder, and went home feeling as suspicious as ever. And at eight o’clock this morning’--that was the third day, you understand--‘I saw Nikolay coming in, not sober, though not to say very drunk--he could understand what was said to him. He sat down on the bench and did not speak. There was only one stranger in the bar and a man I knew asleep on a bench and our two boys. “Have you seen Dmitri?” said I. “No, I haven’t,” said he. “And you’ve not been here either?” “Not since the day before yesterday,” said he. “And where did you sleep last night?” “In Peski, with the Kolomensky men.” “And where did you get those ear-rings?” I asked. “I found them in the street,” and the way he said it was a bit queer; he did not look at me. “Did you hear what happened that very evening, at that very hour, on that same staircase?” said I. “No,” said he, “I had not heard,” and all the while he was listening, his eyes were staring out of his head and he turned as white as chalk. I told him all about it and he took his hat and began getting up. I wanted to keep him. “Wait a bit, Nikolay,” said I, “won’t you have a drink?” And I signed to the boy to hold the door, and I came out from behind the bar; but he darted out and down the street to the turning at a run. I have not seen him since. Then my doubts were at an end--it was his doing, as clear as could be....’”

“I should think so,” said Zossimov.

“Wait! Hear the end. Of course they sought high and low for Nikolay; they detained Dushkin and searched his house; Dmitri, too, was arrested; the Kolomensky men also were turned inside out. And the day before yesterday they arrested Nikolay in a tavern at the end of the town. He had gone there, taken the silver cross off his neck and asked for a dram for it. They gave it to him. A few minutes afterwards the woman went to the cowshed, and through a crack in the wall she saw in the stable adjoining he had made a noose of his sash from the beam, stood on a block of wood, and was trying to put his neck in the noose. The woman screeched her hardest; people ran in. ‘So that’s what you are up to!’ ‘Take me,’ he says, ‘to such-and-such a police officer; I’ll confess everything.’ Well, they took him to that police station--that is here--with a suitable escort. So they asked him this and that, how old he is, ‘twenty-two,’ and so on. At the question, ‘When you were working with Dmitri, didn’t you see anyone on the staircase at such-and-such a time?’--answer: ‘To be sure folks may have gone up and down, but I did not notice them.’ ‘And didn’t you hear anything, any noise, and so on?’ ‘We heard nothing special.’ ‘And did you hear, Nikolay, that on the same day Widow So-and-so and her sister were murdered and robbed?’ ‘I never knew a thing about it. The first I heard of it was from Afanasy Pavlovitch the day before yesterday.’ ‘And where did you find the ear-rings?’ ‘I found them on the pavement.’ ‘Why didn’t you go to work with Dmitri the other day?’ ‘Because I was drinking.’ ‘And where were you drinking?’ ‘Oh, in such-and-such a place.’ ‘Why did you run away from Dushkin’s?’ ‘Because I was awfully frightened.’ ‘What were you frightened of?’ ‘That I should be accused.’ ‘How could you be frightened, if you felt free from guilt?’ Now, Zossimov, you may not believe me, that question was put literally in those words. I know it for a fact, it was repeated to me exactly! What do you say to that?”

“Well, anyway, there’s the evidence.”

“I am not talking of the evidence now, I am talking about that question, of their own idea of themselves. Well, so they squeezed and squeezed him and he confessed: ‘I did not find it in the street, but in the flat where I was painting with Dmitri.’ ‘And how was that?’ ‘Why, Dmitri and I were painting there all day, and we were just getting ready to go, and Dmitri took a brush and painted my face, and he ran off and I after him. I ran after him, shouting my hardest, and at the bottom of the stairs I ran right against the porter and some gentlemen--and how many gentlemen were there I don’t remember. And the porter swore at me, and the other porter swore, too, and the porter’s wife came out, and swore at us, too; and a gentleman came into the entry with a lady, and he swore at us, too, for Dmitri and I lay right across the way. I got hold of Dmitri’s hair and knocked him down and began beating him. And Dmitri, too, caught me by the hair and began beating me. But we did it all not for temper but in a friendly way, for sport. And then Dmitri escaped and ran into the street, and I ran after him; but I did not catch him, and went back to the flat alone; I had to clear up my things. I began putting them together, expecting Dmitri to come, and there in the passage, in the corner by the door, I stepped on the box. I saw it lying there wrapped up in paper. I took off the paper, saw some little hooks, undid them, and in the box were the ear-rings....’”

“Behind the door? Lying behind the door? Behind the door?” Raskolnikov cried suddenly, staring with a blank look of terror at Razumihin, and he slowly sat up on the sofa, leaning on his hand.

“Yes... why? What’s the matter? What’s wrong?” Razumihin, too, got up from his seat.

“Nothing,” Raskolnikov answered faintly, turning to the wall. All were silent for a while.

“He must have waked from a dream,” Razumihin said at last, looking inquiringly at Zossimov. The latter slightly shook his head.

“Well, go on,” said Zossimov. “What next?”

“What next? As soon as he saw the ear-rings, forgetting Dmitri and everything, he took up his cap and ran to Dushkin and, as we know, got a rouble from him. He told a lie saying he found them in the street, and went off drinking. He keeps repeating his old story about the murder: ‘I know nothing of it, never heard of it till the day before yesterday.’ ‘And why didn’t you come to the police till now?’ ‘I was frightened.’ ‘And why did you try to hang yourself?’ ‘From anxiety.’ ‘What anxiety?’ ‘That I should be accused of it.’ Well, that’s the whole story. And now what do you suppose they deduced from that?”

“Why, there’s no supposing. There’s a clue, such as it is, a fact. You wouldn’t have your painter set free?”

“Now they’ve simply taken him for the murderer. They haven’t a shadow of doubt.”

“That’s nonsense. You are excited. But what about the ear-rings? You must admit that, if on the very same day and hour ear-rings from the old woman’s box have come into Nikolay’s hands, they must have come there somehow. That’s a good deal in such a

case."

"How did they get there? How did they get there?" cried Razumihin. "How can you, a doctor, whose duty it is to study man and who has more opportunity than anyone else for studying human nature--how can you fail to see the character of the man in the whole story? Don't you see at once that the answers he has given in the examination are the holy truth? They came into his hand precisely as he has told us--he stepped on the box and picked it up."

"The holy truth! But didn't he own himself that he told a lie at first?"

"Listen to me, listen attentively. The porter and Koch and Pestryakov and the other porter and the wife of the first porter and the woman who was sitting in the porter's lodge and the man Kryukov, who had just got out of a cab at that minute and went in at the entry with a lady on his arm, that is eight or ten witnesses, agree that Nikolay had Dmitri on the ground, was lying on him beating him, while Dmitri hung on to his hair, beating him, too. They lay right across the way, blocking the thoroughfare. They were sworn at on all sides while they 'like children' (the very words of the witnesses) were falling over one another, squealing, fighting and laughing with the funniest faces, and, chasing one another like children, they ran into the street. Now take careful note. The bodies upstairs were warm, you understand, warm when they found them! If they, or Nikolay alone, had murdered them and broken open the boxes, or simply taken part in the robbery, allow me to ask you one question: do their state of mind, their squeals and giggles and childish scuffling at the gate fit in with axes, bloodshed, fiendish cunning, robbery? They'd just killed them, not five or ten minutes before, for the bodies were still warm, and at once, leaving the flat open, knowing that people would go there at once, flinging away their booty, they rolled about like children, laughing and attracting general attention. And there are a dozen witnesses to swear to that!"

"Of course it is strange! It's impossible, indeed, but..."

"No, brother, no _buts_. And if the ear-rings being found in Nikolay's hands at the very day and hour of the murder constitutes an important piece of circumstantial evidence against him--although the explanation given by him accounts for it, and therefore it does not tell seriously against him--one must take into consideration the facts which prove him innocent, especially as they are facts that _cannot be denied_. And do you suppose, from the character of our legal system, that they will accept, or that they are in a position to accept, this fact--resting simply on a psychological impossibility--as irrefutable and conclusively breaking down the circumstantial evidence for the prosecution? No, they won't accept it, they certainly won't, because they found the jewel-case and the man tried to hang himself, 'which he could not have done if he hadn't felt guilty.' That's the point, that's what excites me, you must understand!"

"Oh, I see you are excited! Wait a bit. I forgot to ask you; what proof is there that the box came from the old woman?"

"That's been proved," said Razumihin with apparent reluctance, frowning. "Koch recognised the jewel-case and gave the name of the owner, who proved conclusively that it was his."

"That's bad. Now another point. Did anyone see Nikolay at the time that Koch and Pestryakov were going upstairs at first, and is there no evidence about that?"

"Nobody did see him," Razumihin answered with vexation. "That's the worst of it. Even Koch and Pestryakov did not notice them on their way upstairs, though, indeed, their evidence could not have been worth much. They said they saw the flat was open, and that there must be work going on in it, but they took no special notice and could not remember whether there actually were men at work in it."

"Hm!... So the only evidence for the defence is that they were beating one another and laughing. That constitutes a strong presumption, but... How do you explain the facts yourself?"

"How do I explain them? What is there to explain? It's clear. At any rate, the direction in which explanation is to be sought is clear, and the jewel-case points to it. The real murderer dropped those ear-rings. The murderer was upstairs, locked in, when Koch and Pestryakov knocked at the door. Koch, like an ass, did not stay at the door; so the murderer popped out and ran down, too; for he had no other way of escape. He hid from Koch, Pestryakov and the porter in the flat when Nikolay and Dmitri had just run out of it. He stopped there while the porter and others were going upstairs, waited till they were out of hearing, and then went calmly downstairs at the very minute when Dmitri and Nikolay ran out into the street and there was no one in the entry; possibly he was seen, but not noticed. There are lots of people going in and out. He must have dropped the ear-rings out of his pocket when he stood behind the door, and did not notice he dropped them, because he had other things to think of. The jewel-case is a conclusive

proof that he did stand there.... That's how I explain it."

"Too clever! No, my boy, you're too clever. That beats everything."

"But, why, why?"

"Why, because everything fits too well... it's too melodramatic."

"A-ach!" Razumihin was exclaiming, but at that moment the door opened and a personage came in who was a stranger to all present.

CHAPTER V

This was a gentleman no longer young, of a stiff and portly appearance, and a cautious and sour countenance. He began by stopping short in the doorway, staring about him with offensive and undisguised astonishment, as though asking himself what sort of place he had come to. Mistrustfully and with an affectation of being alarmed and almost affronted, he scanned Raskolnikov's low and narrow "cabin." With the same amazement he stared at Raskolnikov, who lay undressed, dishevelled, unwashed, on his miserable dirty sofa, looking fixedly at him. Then with the same deliberation he scrutinised the uncouth, unkempt figure and unshaven face of Razumihin, who looked him boldly and inquiringly in the face without rising from his seat. A constrained silence lasted for a couple of minutes, and then, as might be expected, some scene-shifting took place. Reflecting, probably from certain fairly unmistakable signs, that he would get nothing in this "cabin" by attempting to overawe them, the gentleman softened somewhat, and civilly, though with some severity, emphasising every syllable of his question, addressed Zossimov:

"Rodion Romanovitch Raskolnikov, a student, or formerly a student?"

Zossimov made a slight movement, and would have answered, had not Razumihin anticipated him.

"Here he is lying on the sofa! What do you want?"

This familiar "what do you want" seemed to cut the ground from the feet of the pompous gentleman. He was turning to Razumihin, but checked himself in time and turned to Zossimov again.

"This is Raskolnikov," mumbled Zossimov, nodding towards him. Then he gave a prolonged yawn, opening his mouth as wide as possible. Then he lazily put his hand into his waistcoat-pocket, pulled out a huge gold watch in a round hunter's case, opened it, looked at it and as slowly and lazily proceeded to put it back.

Raskolnikov himself lay without speaking, on his back, gazing persistently, though without understanding, at the stranger. Now that his face was turned away from the strange flower on the paper, it was extremely pale and wore a look of anguish, as though he had just undergone an agonising operation or just been taken from the rack. But the new-comer gradually began to arouse his attention, then his wonder, then suspicion and even alarm. When Zossimov said "This is Raskolnikov" he jumped up quickly, sat on the sofa and with an almost defiant, but weak and breaking, voice articulated:

"Yes, I am Raskolnikov! What do you want?"

The visitor scrutinised him and pronounced impressively:

"Pyotr Petrovitch Luzhin. I believe I have reason to hope that my name is not wholly unknown to you?"

But Raskolnikov, who had expected something quite different, gazed blankly and dreamily at him, making no reply, as though he heard the name of Pyotr Petrovitch for the first time.

"Is it possible that you can up to the present have received no information?" asked Pyotr Petrovitch, somewhat disconcerted.

In reply Raskolnikov sank languidly back on the pillow, put his hands behind his head and gazed at the ceiling. A look of dismay came into Luzhin's face. Zossimov and Razumihin stared at him more inquisitively than ever, and at last he showed unmistakable signs of embarrassment.

"I had presumed and calculated," he faltered, "that a letter posted more than ten days, if not a fortnight ago..."

“I say, why are you standing in the doorway?” Razumihin interrupted suddenly. “If you’ve something to say, sit down. Nastasya and you are so crowded. Nastasya, make room. Here’s a chair, thread your way in!”

He moved his chair back from the table, made a little space between the table and his knees, and waited in a rather cramped position for the visitor to “thread his way in.” The minute was so chosen that it was impossible to refuse, and the visitor squeezed his way through, hurrying and stumbling. Reaching the chair, he sat down, looking suspiciously at Razumihin.

“No need to be nervous,” the latter blurted out. “Rodya has been ill for the last five days and delirious for three, but now he is recovering and has got an appetite. This is his doctor, who has just had a look at him. I am a comrade of Rodya’s, like him, formerly a student, and now I am nursing him; so don’t you take any notice of us, but go on with your business.”

“Thank you. But shall I not disturb the invalid by my presence and conversation?” Pyotr Petrovitch asked of Zossimov.

“N-no,” mumbled Zossimov; “you may amuse him.” He yawned again.

“He has been conscious a long time, since the morning,” went on Razumihin, whose familiarity seemed so much like unaffected good-nature that Pyotr Petrovitch began to be more cheerful, partly, perhaps, because this shabby and impudent person had introduced himself as a student.

“Your mamma,” began Luzhin.

“Hm!” Razumihin cleared his throat loudly. Luzhin looked at him inquiringly.

“That’s all right, go on.”

Luzhin shrugged his shoulders.

“Your mamma had commenced a letter to you while I was sojourning in her neighbourhood. On my arrival here I purposely allowed a few days to elapse before coming to see you, in order that I might be fully assured that you were in full possession of the tidings; but now, to my astonishment...”

“I know, I know!” Raskolnikov cried suddenly with impatient vexation. “So you are the _fiancé_? I know, and that’s enough!”

There was no doubt about Pyotr Petrovitch’s being offended this time, but he said nothing. He made a violent effort to understand what it all meant. There was a moment’s silence.

Meanwhile Raskolnikov, who had turned a little towards him when he answered, began suddenly staring at him again with marked curiosity, as though he had not had a good look at him yet, or as though something new had struck him; he rose from his pillow on purpose to stare at him. There certainly was something peculiar in Pyotr Petrovitch’s whole appearance, something which seemed to justify the title of “fiancé” so unceremoniously applied to him. In the first place, it was evident, far too much so indeed, that Pyotr Petrovitch had made eager use of his few days in the capital to get himself up and rig himself out in expectation of his betrothed--a perfectly innocent and permissible proceeding, indeed. Even his own, perhaps too complacent, consciousness of the agreeable improvement in his appearance might have been forgiven in such circumstances, seeing that Pyotr Petrovitch had taken up the rôle of fiancé. All his clothes were fresh from the tailor’s and were all right, except for being too new and too distinctly appropriate. Even the stylish new round hat had the same significance. Pyotr Petrovitch treated it too respectfully and held it too carefully in his hands. The exquisite pair of lavender gloves, real Louvain, told the same tale, if only from the fact of his not wearing them, but carrying them in his hand for show. Light and youthful colours predominated in Pyotr Petrovitch’s attire. He wore a charming summer jacket of a fawn shade, light thin trousers, a waistcoat of the same, new and fine linen, a cravat of the lightest cambric with pink stripes on it, and the best of it was, this all suited Pyotr Petrovitch. His very fresh and even handsome face looked younger than his forty-five years at all times. His dark, mutton-chop whiskers made an agreeable setting on both sides, growing thickly upon his shining, clean-shaven chin. Even his hair, touched here and there with grey, though it had been combed and curled at a hairdresser’s, did not give him a stupid appearance, as curled hair usually does, by inevitably suggesting a German on his wedding-day. If there really was something unpleasing and repulsive in his rather good-looking and imposing countenance, it was due to quite other causes. After scanning Mr. Luzhin unceremoniously, Raskolnikov smiled malignantly, sank back on the pillow and stared at the ceiling as before.

But Mr. Luzhin hardened his heart and seemed to determine to take no notice of their oddities.

“I feel the greatest regret at finding you in this situation,” he began, again breaking the silence with an effort. “If I had been aware of your illness I should have come earlier. But you know what business is. I have, too, a very important legal affair in the Senate, not to mention other preoccupations which you may well conjecture. I am expecting your mamma and sister any minute.”

Raskolnikov made a movement and seemed about to speak; his face showed some excitement. Pyotr Petrovitch paused, waited, but as nothing followed, he went on:

“... Any minute. I have found a lodging for them on their arrival.”

“Where?” asked Raskolnikov weakly.

“Very near here, in Bakaleyev’s house.”

“That’s in Voskresensky,” put in Razumihin. “There are two storeys of rooms, let by a merchant called Yushin; I’ve been there.”

“Yes, rooms...”

“A disgusting place--filthy, stinking and, what’s more, of doubtful character. Things have happened there, and there are all sorts of queer people living there. And I went there about a scandalous business. It’s cheap, though...”

“I could not, of course, find out so much about it, for I am a stranger in Petersburg myself,” Pyotr Petrovitch replied huffily. “However, the two rooms are exceedingly clean, and as it is for so short a time... I have already taken a permanent, that is, our future flat,” he said, addressing Raskolnikov, “and I am having it done up. And meanwhile I am myself cramped for room in a lodging with my friend Andrey Semyonovitch Lebeziatnikov, in the flat of Madame Lippevechsel; it was he who told me of Bakaleyev’s house, too...”

“Lebeziatnikov?” said Raskolnikov slowly, as if recalling something.

“Yes, Andrey Semyonovitch Lebeziatnikov, a clerk in the Ministry. Do you know him?”

“Yes... no,” Raskolnikov answered.

“Excuse me, I fancied so from your inquiry. I was once his guardian.... A very nice young man and advanced. I like to meet young people: one learns new things from them.” Luzhin looked round hopefully at them all.

“How do you mean?” asked Razumihin.

“In the most serious and essential matters,” Pyotr Petrovitch replied, as though delighted at the question. “You see, it’s ten years since I visited Petersburg. All the novelties, reforms, ideas have reached us in the provinces, but to see it all more clearly one must be in Petersburg. And it’s my notion that you observe and learn most by watching the younger generation. And I confess I am delighted...”

“At what?”

“Your question is a wide one. I may be mistaken, but I fancy I find clearer views, more, so to say, criticism, more practicality...”

“That’s true,” Zossimov let drop.

“Nonsense! There’s no practicality.” Razumihin flew at him. “Practicality is a difficult thing to find; it does not drop down from heaven. And for the last two hundred years we have been divorced from all practical life. Ideas, if you like, are fermenting,” he said to Pyotr Petrovitch, “and desire for good exists, though it’s in a childish form, and honesty you may find, although there are crowds of brigands. Anyway, there’s no practicality. Practicality goes well shod.”

“I don’t agree with you,” Pyotr Petrovitch replied, with evident enjoyment. “Of course, people do get carried away and make mistakes, but one must have indulgence; those mistakes are merely evidence of enthusiasm for the cause and of abnormal external environment. If little has been done, the time has been but short; of means I will not speak. It’s my personal view, if you care to know, that something has been accomplished already. New valuable ideas, new valuable works are circulating in the place of our old dreamy and romantic authors. Literature is taking a maturer form, many injurious prejudices have been rooted up and turned into ridicule.... In a word, we have cut ourselves off irrevocably from the past, and that, to my thinking, is a great thing...”

“He’s learnt it by heart to show off!” Raskolnikov pronounced suddenly.

“What?” asked Pyotr Petrovitch, not catching his words; but he received no reply.

“That’s all true,” Zossimov hastened to interpose.

“Isn’t it so?” Pyotr Petrovitch went on, glancing affably at Zossimov. “You must admit,” he went on, addressing Razumihin with a shade of triumph and superciliousness--he almost added “young man”--“that there is an advance, or, as they say now, progress in the name of science and economic truth...”

“A commonplace.”

“No, not a commonplace! Hitherto, for instance, if I were told, ‘love thy neighbour,’ what came of it?” Pyotr Petrovitch went on, perhaps with excessive haste. “It came to my tearing my coat in half to share with my neighbour and we both were left half naked. As a Russian proverb has it, ‘Catch several hares and you won’t catch one.’ Science now tells us, love yourself before all men, for everything in the world rests on self-interest. You love yourself and manage your own affairs properly and your coat remains whole. Economic truth adds that the better private affairs are organised in society--the more whole coats, so to say--the firmer are its foundations and the better is the common welfare organised too. Therefore, in acquiring wealth solely and exclusively for myself, I am acquiring, so to speak, for all, and helping to bring to pass my neighbour’s getting a little more than a torn coat; and that not from private, personal liberality, but as a consequence of the general advance. The idea is simple, but unhappily it has been a long time reaching us, being hindered by idealism and sentimentality. And yet it would seem to want very little wit to perceive it...”

“Excuse me, I’ve very little wit myself,” Razumihin cut in sharply, “and so let us drop it. I began this discussion with an object, but I’ve grown so sick during the last three years of this chattering to amuse oneself, of this incessant flow of commonplaces, always the same, that, by Jove, I blush even when other people talk like that. You are in a hurry, no doubt, to exhibit your acquirements; and I don’t blame you, that’s quite pardonable. I only wanted to find out what sort of man you are, for so many unscrupulous people have got hold of the progressive cause of late and have so distorted in their own interests everything they touched, that the whole cause has been dragged in the mire. That’s enough!”

“Excuse me, sir,” said Luzhin, affronted, and speaking with excessive dignity. “Do you mean to suggest so unceremoniously that I too...”

“Oh, my dear sir... how could I?... Come, that’s enough,” Razumihin concluded, and he turned abruptly to Zossimov to continue their previous conversation.

Pyotr Petrovitch had the good sense to accept the disavowal. He made up his mind to take leave in another minute or two.

“I trust our acquaintance,” he said, addressing Raskolnikov, “may, upon your recovery and in view of the circumstances of which you are aware, become closer... Above all, I hope for your return to health...”

Raskolnikov did not even turn his head. Pyotr Petrovitch began getting up from his chair.

“One of her customers must have killed her,” Zossimov declared positively.

“Not a doubt of it,” replied Razumihin. “Porfiry doesn’t give his opinion, but is examining all who have left pledges with her there.”

“Examining them?” Raskolnikov asked aloud.

“Yes. What then?”

“Nothing.”

“How does he get hold of them?” asked Zossimov.

“Koch has given the names of some of them, other names are on the wrappers of the pledges and some have come forward of themselves.”

“It must have been a cunning and practised ruffian! The boldness of it! The coolness!”

“That’s just what it wasn’t!” interposed Razumihin. “That’s what throws you all off the scent. But I maintain that he is not cunning, not practised, and probably this was his first crime! The supposition that it was a calculated crime and a cunning criminal doesn’t work. Suppose him to have been inexperienced, and it’s clear that it was only a chance that saved him--and chance may do anything. Why, he did not foresee obstacles, perhaps! And how did he set to work? He took jewels worth ten or twenty roubles, stuffing his pockets with them, ransacked the old woman’s trunks, her rags--and they found fifteen hundred roubles, besides notes, in a box in the top drawer of the chest! He did not know how to rob; he could only murder. It was his first crime, I assure you, his first crime; he lost his head. And he got off more by luck than good counsel!”

“You are talking of the murder of the old pawnbroker, I believe?” Pyotr Petrovitch put in, addressing Zossimov. He was standing, hat and gloves in hand, but before departing he felt disposed to throw off a few more intellectual phrases. He was evidently anxious to make a favourable impression and his vanity overcame his prudence.

“Yes. You’ve heard of it?”

“Oh, yes, being in the neighbourhood.”

“Do you know the details?”

“I can’t say that; but another circumstance interests me in the case--the whole question, so to say. Not to speak of the fact that crime has been greatly on the increase among the lower classes during the last five years, not to speak of the cases of robbery and arson everywhere, what strikes me as the strangest thing is that in the higher classes, too, crime is increasing proportionately. In one place one hears of a student’s robbing the mail on the high road; in another place people of good social position forge false banknotes; in Moscow of late a whole gang has been captured who used to forge lottery tickets, and one of the ringleaders was a lecturer in universal history; then our secretary abroad was murdered from some obscure motive of gain.... And if this old woman, the pawnbroker, has been murdered by someone of a higher class in society--for peasants don’t pawn gold trinkets--how are we to explain this demoralisation of the civilised part of our society?”

“There are many economic changes,” put in Zossimov.

“How are we to explain it?” Razumihin caught him up. “It might be explained by our inveterate impracticality.”

“How do you mean?”

“What answer had your lecturer in Moscow to make to the question why he was forging notes? ‘Everybody is getting rich one way or another, so I want to make haste to get rich too.’ I don’t remember the exact words, but the upshot was that he wants money for nothing, without waiting or working! We’ve grown used to having everything ready-made, to walking on crutches, to having our food chewed for us. Then the great hour struck,[*] and every man showed himself in his true colours.”

[*] The emancipation of the serfs in 1861 is meant. --TRANSLATOR’S NOTE.

“But morality? And so to speak, principles...”

“But why do you worry about it?” Raskolnikov interposed suddenly. “It’s in accordance with your theory!”

“In accordance with my theory?”

“Why, carry out logically the theory you were advocating just now, and it follows that people may be killed...”

“Upon my word!” cried Luzhin.

“No, that’s not so,” put in Zossimov.

Raskolnikov lay with a white face and twitching upper lip, breathing painfully.

“There’s a measure in all things,” Luzhin went on superciliously. “Economic ideas are not an incitement to murder, and one has but to suppose...”

“And is it true,” Raskolnikov interposed once more suddenly, again in a voice quivering with fury and delight in insulting him, “is it true that you told your _fiancée_... within an hour of her acceptance, that what pleased you most... was that she was a beggar... because it was better to raise a wife from poverty, so that you may have complete control over her, and reproach her with your

being her benefactor?”

“Upon my word,” Luzhin cried wrathfully and irritably, crimson with confusion, “to distort my words in this way! Excuse me, allow me to assure you that the report which has reached you, or rather, let me say, has been conveyed to you, has no foundation in truth, and I... suspect who... in a word... this arrow... in a word, your mamma... She seemed to me in other things, with all her excellent qualities, of a somewhat high-flown and romantic way of thinking.... But I was a thousand miles from supposing that she would misunderstand and misrepresent things in so fanciful a way.... And indeed... indeed...”

“I tell you what,” cried Raskolnikov, raising himself on his pillow and fixing his piercing, glittering eyes upon him, “I tell you what.”

“What?” Luzhin stood still, waiting with a defiant and offended face. Silence lasted for some seconds.

“Why, if ever again... you dare to mention a single word... about my mother... I shall send you flying downstairs!”

“What’s the matter with you?” cried Razumihin.

“So that’s how it is?” Luzhin turned pale and bit his lip. “Let me tell you, sir,” he began deliberately, doing his utmost to restrain himself but breathing hard, “at the first moment I saw you you were ill-disposed to me, but I remained here on purpose to find out more. I could forgive a great deal in a sick man and a connection, but you... never after this...”

“I am not ill,” cried Raskolnikov.

“So much the worse...”

“Go to hell!”

But Luzhin was already leaving without finishing his speech, squeezing between the table and the chair; Razumihin got up this time to let him pass. Without glancing at anyone, and not even nodding to Zossimov, who had for some time been making signs to him to let the sick man alone, he went out, lifting his hat to the level of his shoulders to avoid crushing it as he stooped to go out of the door. And even the curve of his spine was expressive of the horrible insult he had received.

“How could you--how could you!” Razumihin said, shaking his head in perplexity.

“Let me alone--let me alone all of you!” Raskolnikov cried in a frenzy. “Will you ever leave off tormenting me? I am not afraid of you! I am not afraid of anyone, anyone now! Get away from me! I want to be alone, alone, alone!”

“Come along,” said Zossimov, nodding to Razumihin.

“But we can’t leave him like this!”

“Come along,” Zossimov repeated insistently, and he went out. Razumihin thought a minute and ran to overtake him.

“It might be worse not to obey him,” said Zossimov on the stairs. “He mustn’t be irritated.”

“What’s the matter with him?”

“If only he could get some favourable shock, that’s what would do it! At first he was better.... You know he has got something on his mind! Some fixed idea weighing on him.... I am very much afraid so; he must have!”

“Perhaps it’s that gentleman, Pyotr Petrovitch. From his conversation I gather he is going to marry his sister, and that he had received a letter about it just before his illness....”

“Yes, confound the man! he may have upset the case altogether. But have you noticed, he takes no interest in anything, he does not respond to anything except one point on which he seems excited--that’s the murder?”

“Yes, yes,” Razumihin agreed, “I noticed that, too. He is interested, frightened. It gave him a shock on the day he was ill in the police office; he fainted.”

“Tell me more about that this evening and I’ll tell you something afterwards. He interests me very much! In half an hour I’ll go and see him again.... There’ll be no inflammation though.”

“Thanks! And I’ll wait with Pashenka meantime and will keep watch on him through Nastasya....”

Raskolnikov, left alone, looked with impatience and misery at Nastasya, but she still lingered.

“Won’t you have some tea now?” she asked.

“Later! I am sleepy! Leave me.”

He turned abruptly to the wall; Nastasya went out.

CHAPTER VI

But as soon as she went out, he got up, latched the door, undid the parcel which Razumihin had brought in that evening and had tied up again and began dressing. Strange to say, he seemed immediately to have become perfectly calm; not a trace of his recent delirium nor of the panic fear that had haunted him of late. It was the first moment of a strange sudden calm. His movements were precise and definite; a firm purpose was evident in them. “To-day, to-day,” he muttered to himself. He understood that he was still weak, but his intense spiritual concentration gave him strength and self-confidence. He hoped, moreover, that he would not fall down in the street. When he had dressed in entirely new clothes, he looked at the money lying on the table, and after a moment’s thought put it in his pocket. It was twenty-five roubles. He took also all the copper change from the ten roubles spent by Razumihin on the clothes. Then he softly unlatched the door, went out, slipped downstairs and glanced in at the open kitchen door. Nastasya was standing with her back to him, blowing up the landlady’s samovar. She heard nothing. Who would have dreamed of his going out, indeed? A minute later he was in the street.

It was nearly eight o’clock, the sun was setting. It was as stifling as before, but he eagerly drank in the stinking, dusty town air. His head felt rather dizzy; a sort of savage energy gleamed suddenly in his feverish eyes and his wasted, pale and yellow face. He did not know and did not think where he was going, he had one thought only: “that all _this_ must be ended to-day, once for all, immediately; that he would not return home without it, because he _would not go on living like that_.” How, with what to make an end? He had not an idea about it, he did not even want to think of it. He drove away thought; thought tortured him. All he knew, all he felt was that everything must be changed “one way or another,” he repeated with desperate and immovable self-confidence and determination.

From old habit he took his usual walk in the direction of the Hay Market. A dark-haired young man with a barrel organ was standing in the road in front of a little general shop and was grinding out a very sentimental song. He was accompanying a girl of fifteen, who stood on the pavement in front of him. She was dressed up in a crinoline, a mantle and a straw hat with a flame-coloured feather in it, all very old and shabby. In a strong and rather agreeable voice, cracked and coarsened by street singing, she sang in hope of getting a copper from the shop. Raskolnikov joined two or three listeners, took out a five copeck piece and put it in the girl’s hand. She broke off abruptly on a sentimental high note, shouted sharply to the organ grinder “Come on,” and both moved on to the next shop.

“Do you like street music?” said Raskolnikov, addressing a middle-aged man standing idly by him. The man looked at him, startled and wondering.

“I love to hear singing to a street organ,” said Raskolnikov, and his manner seemed strangely out of keeping with the subject--“I like it on cold, dark, damp autumn evenings--they must be damp--when all the passers-by have pale green, sickly faces, or better still when wet snow is falling straight down, when there’s no wind--you know what I mean?--and the street lamps shine through it...”

“I don’t know.... Excuse me...” muttered the stranger, frightened by the question and Raskolnikov’s strange manner, and he crossed over to the other side of the street.

Raskolnikov walked straight on and came out at the corner of the Hay Market, where the huckster and his wife had talked with Lizaveta; but they were not there now. Recognising the place, he stopped, looked round and addressed a young fellow in a red shirt who stood gaping before a corn chandler’s shop.

“Isn’t there a man who keeps a booth with his wife at this corner?”

“All sorts of people keep booths here,” answered the young man, glancing superciliously at Raskolnikov.

“What’s his name?”

“What he was christened.”

“Aren’t you a Zaraïsky man, too? Which province?”

The young man looked at Raskolnikov again.

“It’s not a province, your excellency, but a district. Graciously forgive me, your excellency!”

“Is that a tavern at the top there?”

“Yes, it’s an eating-house and there’s a billiard-room and you’ll find princesses there too.... La-la!”

Raskolnikov crossed the square. In that corner there was a dense crowd of peasants. He pushed his way into the thickest part of it, looking at the faces. He felt an unaccountable inclination to enter into conversation with people. But the peasants took no notice of him; they were all shouting in groups together. He stood and thought a little and took a turning to the right in the direction of V.

He had often crossed that little street which turns at an angle, leading from the market-place to Sadovy Street. Of late he had often felt drawn to wander about this district, when he felt depressed, that he might feel more so.

Now he walked along, thinking of nothing. At that point there is a great block of buildings, entirely let out in dram shops and eating-houses; women were continually running in and out, bare-headed and in their indoor clothes. Here and there they gathered in groups, on the pavement, especially about the entrances to various festive establishments in the lower storeys. From one of these a loud din, sounds of singing, the tinkling of a guitar and shouts of merriment, floated into the street. A crowd of women were thronging round the door; some were sitting on the steps, others on the pavement, others were standing talking. A drunken soldier, smoking a cigarette, was walking near them in the road, swearing; he seemed to be trying to find his way somewhere, but had forgotten where. One beggar was quarrelling with another, and a man dead drunk was lying right across the road. Raskolnikov joined the throng of women, who were talking in husky voices. They were bare-headed and wore cotton dresses and goatskin shoes. There were women of forty and some not more than seventeen; almost all had blackened eyes.

He felt strangely attracted by the singing and all the noise and uproar in the saloon below.... someone could be heard within dancing frantically, marking time with his heels to the sounds of the guitar and of a thin falsetto voice singing a jaunty air. He listened intently, gloomily and dreamily, bending down at the entrance and peeping inquisitively in from the pavement.

“Oh, my handsome soldier Don’t beat me for nothing,”

trilled the thin voice of the singer. Raskolnikov felt a great desire to make out what he was singing, as though everything depended on that.

“Shall I go in?” he thought. “They are laughing. From drink. Shall I get drunk?”

“Won’t you come in?” one of the women asked him. Her voice was still musical and less thick than the others, she was young and not repulsive--the only one of the group.

“Why, she’s pretty,” he said, drawing himself up and looking at her.

She smiled, much pleased at the compliment.

“You’re very nice looking yourself,” she said.

“Isn’t he thin though!” observed another woman in a deep bass. “Have you just come out of a hospital?”

“They’re all generals’ daughters, it seems, but they have all snub noses,” interposed a tipsy peasant with a sly smile on his face, wearing a loose coat. “See how jolly they are.”

“Go along with you!”

“I’ll go, sweetie!”

And he darted down into the saloon below. Raskolnikov moved on.

“I say, sir,” the girl shouted after him.

“What is it?”

She hesitated.

“I’ll always be pleased to spend an hour with you, kind gentleman, but now I feel shy. Give me six copecks for a drink, there’s a nice young man!”

Raskolnikov gave her what came first--fifteen copecks.

“Ah, what a good-natured gentleman!”

“What’s your name?”

“Ask for Duclida.”

“Well, that’s too much,” one of the women observed, shaking her head at Duclida. “I don’t know how you can ask like that. I believe I should drop with shame....”

Raskolnikov looked curiously at the speaker. She was a pock-marked wench of thirty, covered with bruises, with her upper lip swollen. She made her criticism quietly and earnestly. “Where is it,” thought Raskolnikov. “Where is it I’ve read that someone condemned to death says or thinks, an hour before his death, that if he had to live on some high rock, on such a narrow ledge that he’d only room to stand, and the ocean, everlasting darkness, everlasting solitude, everlasting tempest around him, if he had to remain standing on a square yard of space all his life, a thousand years, eternity, it were better to live so than to die at once! Only to live, to live and live! Life, whatever it may be!... How true it is! Good God, how true! Man is a vile creature!... And vile is he who calls him vile for that,” he added a moment later.

He went into another street. “Bah, the Palais de Cristal! Razumihin was just talking of the Palais de Cristal. But what on earth was it I wanted? Yes, the newspapers.... Zossimov said he’d read it in the papers. Have you the papers?” he asked, going into a very spacious and positively clean restaurant, consisting of several rooms, which were, however, rather empty. Two or three people were drinking tea, and in a room further away were sitting four men drinking champagne. Raskolnikov fancied that Zametov was one of them, but he could not be sure at that distance. “What if it is?” he thought.

“Will you have vodka?” asked the waiter.

“Give me some tea and bring me the papers, the old ones for the last five days, and I’ll give you something.”

“Yes, sir, here’s to-day’s. No vodka?”

The old newspapers and the tea were brought. Raskolnikov sat down and began to look through them.

“Oh, damn... these are the items of intelligence. An accident on a staircase, spontaneous combustion of a shopkeeper from alcohol, a fire in Peski... a fire in the Petersburg quarter... another fire in the Petersburg quarter... and another fire in the Petersburg quarter.... Ah, here it is!” He found at last what he was seeking and began to read it. The lines danced before his eyes, but he read it all and began eagerly seeking later additions in the following numbers. His hands shook with nervous impatience as he turned the sheets. Suddenly someone sat down beside him at his table. He looked up, it was the head clerk Zametov, looking just the same, with the rings on his fingers and the watch-chain, with the curly, black hair, parted and pomaded, with the smart waistcoat, rather shabby coat and doubtful linen. He was in a good humour, at least he was smiling very gaily and good-humouredly. His dark face was rather flushed from the champagne he had drunk.

“What, you here?” he began in surprise, speaking as though he’d known him all his life. “Why, Razumihin told me only yesterday you were unconscious. How strange! And do you know I’ve been to see you?”

Raskolnikov knew he would come up to him. He laid aside the papers and turned to Zametov. There was a smile on his lips, and a new shade of irritable impatience was apparent in that smile.

“I know you have,” he answered. “I’ve heard it. You looked for my sock.... And you know Razumihin has lost his heart to you? He says you’ve been with him to Luise Ivanovna’s--you know, the woman you tried to befriend, for whom you winked to the Explosive Lieutenant and he would not understand. Do you remember? How could he fail to understand--it was quite clear, wasn’t it?”

“What a hot head he is!”

“The explosive one?”

“No, your friend Razumihin.”

“You must have a jolly life, Mr. Zametov; entrance free to the most agreeable places. Who’s been pouring champagne into you just now?”

“We’ve just been... having a drink together.... You talk about pouring it into me!”

“By way of a fee! You profit by everything!” Raskolnikov laughed, “it’s all right, my dear boy,” he added, slapping Zametov on the shoulder. “I am not speaking from temper, but in a friendly way, for sport, as that workman of yours said when he was scuffling with Dmitri, in the case of the old woman....”

“How do you know about it?”

“Perhaps I know more about it than you do.”

“How strange you are.... I am sure you are still very unwell. You oughtn’t to have come out.”

“Oh, do I seem strange to you?”

“Yes. What are you doing, reading the papers?”

“Yes.”

“There’s a lot about the fires.”

“No, I am not reading about the fires.” Here he looked mysteriously at Zametov; his lips were twisted again in a mocking smile. “No, I am not reading about the fires,” he went on, winking at Zametov. “But confess now, my dear fellow, you’re awfully anxious to know what I am reading about?”

“I am not in the least. Mayn’t I ask a question? Why do you keep on...?”

“Listen, you are a man of culture and education?”

“I was in the sixth class at the gymnasium,” said Zametov with some dignity.

“Sixth class! Ah, my cock-sparrow! With your parting and your rings--you are a gentleman of fortune. Foo! what a charming boy!” Here Raskolnikov broke into a nervous laugh right in Zametov’s face. The latter drew back, more amazed than offended.

“Foo! how strange you are!” Zametov repeated very seriously. “I can’t help thinking you are still delirious.”

“I am delirious? You are fibbing, my cock-sparrow! So I am strange? You find me curious, do you?”

“Yes, curious.”

“Shall I tell you what I was reading about, what I was looking for? See what a lot of papers I’ve made them bring me. Suspicious, eh?”

“Well, what is it?”

“You prick up your ears?”

“How do you mean--‘prick up my ears’?”

“I’ll explain that afterwards, but now, my boy, I declare to you... no, better ‘I confess’... No, that’s not right either; ‘I make a deposition and you take it.’ I depose that I was reading, that I was looking and searching....” he screwed up his eyes and paused. “I was searching--and came here on purpose to do it--for news of the murder of the old pawnbroker woman,” he articulated at last, almost in a whisper, bringing his face exceedingly close to the face of Zametov. Zametov looked at him steadily, without moving or drawing his face away. What struck Zametov afterwards as the strangest part of it all was that silence followed for exactly a minute, and that they gazed at one another all the while.

“What if you have been reading about it?” he cried at last, perplexed and impatient. “That’s no business of mine! What of it?”

“The same old woman,” Raskolnikov went on in the same whisper, not heeding Zametov’s explanation, “about whom you were talking in the police-office, you remember, when I fainted. Well, do you understand now?”

“What do you mean? Understand... what?” Zametov brought out, almost alarmed.

Raskolnikov’s set and earnest face was suddenly transformed, and he suddenly went off into the same nervous laugh as before, as though utterly unable to restrain himself. And in one flash he recalled with extraordinary vividness of sensation a moment in the recent past, that moment when he stood with the axe behind the door, while the latch trembled and the men outside swore and shook it, and he had a sudden desire to shout at them, to swear at them, to put out his tongue at them, to mock them, to laugh, and laugh, and laugh!

“You are either mad, or...” began Zametov, and he broke off, as though stunned by the idea that had suddenly flashed into his mind.

“Or? Or what? What? Come, tell me!”

“Nothing,” said Zametov, getting angry, “it’s all nonsense!”

Both were silent. After his sudden fit of laughter Raskolnikov became suddenly thoughtful and melancholy. He put his elbow on the table and leaned his head on his hand. He seemed to have completely forgotten Zametov. The silence lasted for some time.

“Why don’t you drink your tea? It’s getting cold,” said Zametov.

“What! Tea? Oh, yes....” Raskolnikov sipped the glass, put a morsel of bread in his mouth and, suddenly looking at Zametov, seemed to remember everything and pulled himself together. At the same moment his face resumed its original mocking expression. He went on drinking tea.

“There have been a great many of these crimes lately,” said Zametov. “Only the other day I read in the _Moscow News_ that a whole gang of false coiners had been caught in Moscow. It was a regular society. They used to forge tickets!”

“Oh, but it was a long time ago! I read about it a month ago,” Raskolnikov answered calmly. “So you consider them criminals?” he added, smiling.

“Of course they are criminals.”

“They? They are children, simpletons, not criminals! Why, half a hundred people meeting for such an object--what an idea! Three would be too many, and then they want to have more faith in one another than in themselves! One has only to blab in his cups and it all collapses. Simpletons! They engaged untrustworthy people to change the notes--what a thing to trust to a casual stranger! Well, let us suppose that these simpletons succeed and each makes a million, and what follows for the rest of their lives? Each is dependent on the others for the rest of his life! Better hang oneself at once! And they did not know how to change the notes either; the man who changed the notes took five thousand roubles, and his hands trembled. He counted the first four thousand, but did not count the fifth thousand--he was in such a hurry to get the money into his pocket and run away. Of course he roused suspicion. And the whole thing came to a crash through one fool! Is it possible?”

“That his hands trembled?” observed Zametov, “yes, that’s quite possible. That, I feel quite sure, is possible. Sometimes one can’t stand things.”

“Can’t stand that?”

“Why, could you stand it then? No, I couldn’t. For the sake of a hundred roubles to face such a terrible experience? To go with false notes into a bank where it’s their business to spot that sort of thing! No, I should not have the face to do it. Would you?”

Raskolnikov had an intense desire again “to put his tongue out.” Shivers kept running down his spine.

“I should do it quite differently,” Raskolnikov began. “This is how I would change the notes: I’d count the first thousand three or four times backwards and forwards, looking at every note and then I’d set to the second thousand; I’d count that half-way through and then hold some fifty-rouble note to the light, then turn it, then hold it to the light again--to see whether it was a good one. ‘I am afraid,’ I would say, ‘a relation of mine lost twenty-five roubles the other day through a false note,’ and then I’d tell them the whole story. And after I began counting the third, ‘No, excuse me,’ I would say, ‘I fancy I made a mistake in the seventh hundred in that

second thousand, I am not sure.' And so I would give up the third thousand and go back to the second and so on to the end. And when I had finished, I'd pick out one from the fifth and one from the second thousand and take them again to the light and ask again, 'Change them, please,' and put the clerk into such a stew that he would not know how to get rid of me. When I'd finished and had gone out, I'd come back, 'No, excuse me,' and ask for some explanation. That's how I'd do it."

"Foo! what terrible things you say!" said Zametov, laughing. "But all that is only talk. I dare say when it came to deeds you'd make a slip. I believe that even a practised, desperate man cannot always reckon on himself, much less you and I. To take an example near home--that old woman murdered in our district. The murderer seems to have been a desperate fellow, he risked everything in open daylight, was saved by a miracle--but his hands shook, too. He did not succeed in robbing the place, he couldn't stand it. That was clear from the..."

Raskolnikov seemed offended.

"Clear? Why don't you catch him then?" he cried, maliciously gibing at Zametov.

"Well, they will catch him."

"Who? You? Do you suppose you could catch him? You've a tough job! A great point for you is whether a man is spending money or not. If he had no money and suddenly begins spending, he must be the man. So that any child can mislead you."

"The fact is they always do that, though," answered Zametov. "A man will commit a clever murder at the risk of his life and then at once he goes drinking in a tavern. They are caught spending money, they are not all as cunning as you are. You wouldn't go to a tavern, of course?"

Raskolnikov frowned and looked steadily at Zametov.

"You seem to enjoy the subject and would like to know how I should behave in that case, too?" he asked with displeasure.

"I should like to," Zametov answered firmly and seriously. Somewhat too much earnestness began to appear in his words and looks.

"Very much?"

"Very much!"

"All right then. This is how I should behave," Raskolnikov began, again bringing his face close to Zametov's, again staring at him and speaking in a whisper, so that the latter positively shuddered. "This is what I should have done. I should have taken the money and jewels, I should have walked out of there and have gone straight to some deserted place with fences round it and scarcely anyone to be seen, some kitchen garden or place of that sort. I should have looked out beforehand some stone weighing a hundredweight or more which had been lying in the corner from the time the house was built. I would lift that stone--there would sure to be a hollow under it, and I would put the jewels and money in that hole. Then I'd roll the stone back so that it would look as before, would press it down with my foot and walk away. And for a year or two, three maybe, I would not touch it. And, well, they could search! There'd be no trace."

"You are a madman," said Zametov, and for some reason he too spoke in a whisper, and moved away from Raskolnikov, whose eyes were glittering. He had turned fearfully pale and his upper lip was twitching and quivering. He bent down as close as possible to Zametov, and his lips began to move without uttering a word. This lasted for half a minute; he knew what he was doing, but could not restrain himself. The terrible word trembled on his lips, like the latch on that door; in another moment it will break out, in another moment he will let it go, he will speak out.

"And what if it was I who murdered the old woman and Lizaveta?" he said suddenly and--realised what he had done.

Zametov looked wildly at him and turned white as the tablecloth. His face wore a contorted smile.

"But is it possible?" he brought out faintly. Raskolnikov looked wrathfully at him.

"Own up that you believed it, yes, you did?"

"Not a bit of it, I believe it less than ever now," Zametov cried hastily.

“I’ve caught my cock-sparrow! So you did believe it before, if now you believe less than ever?”

“Not at all,” cried Zametov, obviously embarrassed. “Have you been frightening me so as to lead up to this?”

“You don’t believe it then? What were you talking about behind my back when I went out of the police-office? And why did the explosive lieutenant question me after I fainted? Hey, there,” he shouted to the waiter, getting up and taking his cap, “how much?”

“Thirty copecks,” the latter replied, running up.

“And there is twenty copecks for vodka. See what a lot of money!” he held out his shaking hand to Zametov with notes in it. “Red notes and blue, twenty-five roubles. Where did I get them? And where did my new clothes come from? You know I had not a copeck. You’ve cross-examined my landlady, I’ll be bound.... Well, that’s enough! _Assez causé!_ Till we meet again!”

He went out, trembling all over from a sort of wild hysterical sensation, in which there was an element of insufferable rapture. Yet he was gloomy and terribly tired. His face was twisted as after a fit. His fatigue increased rapidly. Any shock, any irritating sensation stimulated and revived his energies at once, but his strength failed as quickly when the stimulus was removed.

Zametov, left alone, sat for a long time in the same place, plunged in thought. Raskolnikov had unwittingly worked a revolution in his brain on a certain point and had made up his mind for him conclusively.

“Ilya Petrovitch is a blockhead,” he decided.

Raskolnikov had hardly opened the door of the restaurant when he stumbled against Razumihin on the steps. They did not see each other till they almost knocked against each other. For a moment they stood looking each other up and down. Razumihin was greatly astounded, then anger, real anger gleamed fiercely in his eyes.

“So here you are!” he shouted at the top of his voice--“you ran away from your bed! And here I’ve been looking for you under the sofa! We went up to the garret. I almost beat Nastasya on your account. And here he is after all. Rodya! What is the meaning of it? Tell me the whole truth! Confess! Do you hear?”

“It means that I’m sick to death of you all and I want to be alone,” Raskolnikov answered calmly.

“Alone? When you are not able to walk, when your face is as white as a sheet and you are gasping for breath! Idiot!... What have you been doing in the Palais de Cristal? Own up at once!”

“Let me go!” said Raskolnikov and tried to pass him. This was too much for Razumihin; he gripped him firmly by the shoulder.

“Let you go? You dare tell me to let you go? Do you know what I’ll do with you directly? I’ll pick you up, tie you up in a bundle, carry you home under my arm and lock you up!”

“Listen, Razumihin,” Raskolnikov began quietly, apparently calm--“can’t you see that I don’t want your benevolence? A strange desire you have to shower benefits on a man who... curses them, who feels them a burden in fact! Why did you seek me out at the beginning of my illness? Maybe I was very glad to die. Didn’t I tell you plainly enough to-day that you were torturing me, that I was... sick of you! You seem to want to torture people! I assure you that all that is seriously hindering my recovery, because it’s continually irritating me. You saw Zossimov went away just now to avoid irritating me. You leave me alone too, for goodness’ sake! What right have you, indeed, to keep me by force? Don’t you see that I am in possession of all my faculties now? How, how can I persuade you not to persecute me with your kindness? I may be ungrateful, I may be mean, only let me be, for God’s sake, let me be! Let me be, let me be!”

He began calmly, gloating beforehand over the venomous phrases he was about to utter, but finished, panting for breath, in a frenzy, as he had been with Luzhin.

Razumihin stood a moment, thought and let his hand drop.

“Well, go to hell then,” he said gently and thoughtfully. “Stay,” he roared, as Raskolnikov was about to move. “Listen to me. Let me tell you, that you are all a set of babbling, posing idiots! If you’ve any little trouble you brood over it like a hen over an egg. And you are plagiarists even in that! There isn’t a sign of independent life in you! You are made of spermaceti ointment and you’ve lymph in your veins instead of blood. I don’t believe in anyone of you! In any circumstances the first thing for all of you is to be unlike a human being! Stop!” he cried with redoubled fury, noticing that Raskolnikov was again making a movement--“hear me out! You

know I’m having a house-warming this evening, I dare say they’ve arrived by now, but I left my uncle there--I just ran in--to receive the guests. And if you weren’t a fool, a common fool, a perfect fool, if you were an original instead of a translation... you see, Rodya, I recognise you’re a clever fellow, but you’re a fool!--and if you weren’t a fool you’d come round to me this evening instead of wearing out your boots in the street! Since you have gone out, there’s no help for it! I’d give you a snug easy chair, my landlady has one... a cup of tea, company.... Or you could lie on the sofa--any way you would be with us.... Zossimov will be there too. Will you come?”

“No.”

“R-rubbish!” Razumihin shouted, out of patience. “How do you know? You can’t answer for yourself! You don’t know anything about it.... Thousands of times I’ve fought tooth and nail with people and run back to them afterwards.... One feels ashamed and goes back to a man! So remember, Potchinkov’s house on the third storey....”

“Why, Mr. Razumihin, I do believe you’d let anybody beat you from sheer benevolence.”

“Beat? Whom? Me? I’d twist his nose off at the mere idea! Potchinkov’s house, 47, Babushkin’s flat....”

“I shall not come, Razumihin.” Raskolnikov turned and walked away.

“I bet you will,” Razumihin shouted after him. “I refuse to know you if you don’t! Stay, hey, is Zametov in there?”

“Yes.”

“Did you see him?”

“Yes.”

“Talked to him?”

“Yes.”

“What about? Confound you, don’t tell me then. Potchinkov’s house, 47, Babushkin’s flat, remember!”

Raskolnikov walked on and turned the corner into Sadovy Street. Razumihin looked after him thoughtfully. Then with a wave of his hand he went into the house but stopped short of the stairs.

“Confound it,” he went on almost aloud. “He talked sensibly but yet... I am a fool! As if madmen didn’t talk sensibly! And this was just what Zossimov seemed afraid of.” He struck his finger on his forehead. “What if... how could I let him go off alone? He may drown himself.... Ach, what a blunder! I can’t.” And he ran back to overtake Raskolnikov, but there was no trace of him. With a curse he returned with rapid steps to the Palais de Cristal to question Zametov.

Raskolnikov walked straight to X---- Bridge, stood in the middle, and leaning both elbows on the rail stared into the distance. On parting with Razumihin, he felt so much weaker that he could scarcely reach this place. He longed to sit or lie down somewhere in the street. Bending over the water, he gazed mechanically at the last pink flush of the sunset, at the row of houses growing dark in the gathering twilight, at one distant attic window on the left bank, flashing as though on fire in the last rays of the setting sun, at the darkening water of the canal, and the water seemed to catch his attention. At last red circles flashed before his eyes, the houses seemed moving, the passers-by, the canal banks, the carriages, all danced before his eyes. Suddenly he started, saved again perhaps from swooning by an uncanny and hideous sight. He became aware of someone standing on the right side of him; he looked and saw a tall woman with a kerchief on her head, with a long, yellow, wasted face and red sunken eyes. She was looking straight at him, but obviously she saw nothing and recognised no one. Suddenly she leaned her right hand on the parapet, lifted her right leg over the railing, then her left and threw herself into the canal. The filthy water parted and swallowed up its victim for a moment, but an instant later the drowning woman floated to the surface, moving slowly with the current, her head and legs in the water, her skirt inflated like a balloon over her back.

“A woman drowning! A woman drowning!” shouted dozens of voices; people ran up, both banks were thronged with spectators, on the bridge people crowded about Raskolnikov, pressing up behind him.

“Mercy on it! it’s our Afrosinya!” a woman cried tearfully close by. “Mercy! save her! kind people, pull her out!”

“A boat, a boat!” was shouted in the crowd. But there was no need of a boat; a policeman ran down the steps to the canal, threw off his great coat and his boots and rushed into the water. It was easy to reach her: she floated within a couple of yards from the steps, he caught hold of her clothes with his right hand and with his left seized a pole which a comrade held out to him; the drowning woman was pulled out at once. They laid her on the granite pavement of the embankment. She soon recovered consciousness, raised her head, sat up and began sneezing and coughing, stupidly wiping her wet dress with her hands. She said nothing.

“She’s drunk herself out of her senses,” the same woman’s voice wailed at her side. “Out of her senses. The other day she tried to hang herself, we cut her down. I ran out to the shop just now, left my little girl to look after her--and here she’s in trouble again! A neighbour, gentleman, a neighbour, we live close by, the second house from the end, see yonder....”

The crowd broke up. The police still remained round the woman, someone mentioned the police station.... Raskolnikov looked on with a strange sensation of indifference and apathy. He felt disgusted. “No, that’s loathsome... water... it’s not good enough,” he muttered to himself. “Nothing will come of it,” he added, “no use to wait. What about the police office...? And why isn’t Zametov at the police office? The police office is open till ten o’clock....” He turned his back to the railing and looked about him.

“Very well then!” he said resolutely; he moved from the bridge and walked in the direction of the police office. His heart felt hollow and empty. He did not want to think. Even his depression had passed, there was not a trace now of the energy with which he had set out “to make an end of it all.” Complete apathy had succeeded to it.

“Well, it’s a way out of it,” he thought, walking slowly and listlessly along the canal bank. “Anyway, I’ll make an end, for I want to.... But is it a way out? What does it matter! There’ll be the square yard of space--ha! But what an end! Is it really the end? Shall I tell them or not? Ah... damn! How tired I am! If I could find somewhere to sit or lie down soon! What I am most ashamed of is its being so stupid. But I don’t care about that either! What idiotic ideas come into one’s head.”

To reach the police office he had to go straight forward and take the second turning to the left. It was only a few paces away. But at the first turning he stopped and, after a minute’s thought, turned into a side street and went two streets out of his way, possibly without any object, or possibly to delay a minute and gain time. He walked, looking at the ground; suddenly someone seemed to whisper in his ear; he lifted his head and saw that he was standing at the very gate of _the_ house. He had not passed it, he had not been near it since _that_ evening. An overwhelming, unaccountable prompting drew him on. He went into the house, passed through the gateway, then into the first entrance on the right, and began mounting the familiar staircase to the fourth storey. The narrow, steep staircase was very dark. He stopped at each landing and looked round him with curiosity; on the first landing the framework of the window had been taken out. “That wasn’t so then,” he thought. Here was the flat on the second storey where Nikolay and Dmitri had been working. “It’s shut up and the door newly painted. So it’s to let.” Then the third storey and the fourth. “Here!” He was perplexed to find the door of the flat wide open. There were men there, he could hear voices; he had not expected that. After brief hesitation he mounted the last stairs and went into the flat. It, too, was being done up; there were workmen in it. This seemed to amaze him; he somehow fancied that he would find everything as he left it, even perhaps the corpses in the same places on the floor. And now, bare walls, no furniture; it seemed strange. He walked to the window and sat down on the window-sill. There were two workmen, both young fellows, but one much younger than the other. They were papering the walls with a new white paper covered with lilac flowers, instead of the old, dirty, yellow one. Raskolnikov for some reason felt horribly annoyed by this. He looked at the new paper with dislike, as though he felt sorry to have it all so changed. The workmen had obviously stayed beyond their time and now they were hurriedly rolling up their paper and getting ready to go home. They took no notice of Raskolnikov’s coming in; they were talking. Raskolnikov folded his arms and listened.

“She comes to me in the morning,” said the elder to the younger, “very early, all dressed up. ‘Why are you preening and prinking?’ says I. ‘I am ready to do anything to please you, Tit Vassilitch!’ That’s a way of going on! And she dressed up like a regular fashion book!”

“And what is a fashion book?” the younger one asked. He obviously regarded the other as an authority.

“A fashion book is a lot of pictures, coloured, and they come to the tailors here every Saturday, by post from abroad, to show folks how to dress, the male sex as well as the female. They’re pictures. The gentlemen are generally wearing fur coats and for the ladies’ fluffles, they’re beyond anything you can fancy.”

“There’s nothing you can’t find in Petersburg,” the younger cried enthusiastically, “except father and mother, there’s everything!”

“Except them, there’s everything to be found, my boy,” the elder declared sententiously.

Raskolnikov got up and walked into the other room where the strong box, the bed, and the chest of drawers had been; the room seemed to him very tiny without furniture in it. The paper was the same; the paper in the corner showed where the case of ikons had stood. He looked at it and went to the window. The elder workman looked at him askance.

“What do you want?” he asked suddenly.

Instead of answering Raskolnikov went into the passage and pulled the bell. The same bell, the same cracked note. He rang it a second and a third time; he listened and remembered. The hideous and agonisingly fearful sensation he had felt then began to come back more and more vividly. He shuddered at every ring and it gave him more and more satisfaction.

“Well, what do you want? Who are you?” the workman shouted, going out to him. Raskolnikov went inside again.

“I want to take a flat,” he said. “I am looking round.”

“It’s not the time to look at rooms at night! and you ought to come up with the porter.”

“The floors have been washed, will they be painted?” Raskolnikov went on. “Is there no blood?”

“What blood?”

“Why, the old woman and her sister were murdered here. There was a perfect pool there.”

“But who are you?” the workman cried, uneasy.

“Who am I?”

“Yes.”

“You want to know? Come to the police station, I’ll tell you.”

The workmen looked at him in amazement.

“It’s time for us to go, we are late. Come along, Alyoshka. We must lock up,” said the elder workman.

“Very well, come along,” said Raskolnikov indifferently, and going out first, he went slowly downstairs. “Hey, porter,” he cried in the gateway.

At the entrance several people were standing, staring at the passers-by; the two porters, a peasant woman, a man in a long coat and a few others. Raskolnikov went straight up to them.

“What do you want?” asked one of the porters.

“Have you been to the police office?”

“I’ve just been there. What do you want?”

“Is it open?”

“Of course.”

“Is the assistant there?”

“He was there for a time. What do you want?”

Raskolnikov made no reply, but stood beside them lost in thought.

“He’s been to look at the flat,” said the elder workman, coming forward.

“Which flat?”

“Where we are at work. ‘Why have you washed away the blood?’ says he. ‘There has been a murder here,’ says he, ‘and I’ve come to take it.’ And he began ringing at the bell, all but broke it. ‘Come to the police station,’ says he. ‘I’ll tell you everything there.’ He wouldn’t leave us.”

The porter looked at Raskolnikov, frowning and perplexed.

“Who are you?” he shouted as impressively as he could.

“I am Rodion Romanovitch Raskolnikov, formerly a student, I live in Shil’s house, not far from here, flat Number 14, ask the porter, he knows me.” Raskolnikov said all this in a lazy, dreamy voice, not turning round, but looking intently into the darkening street.

“Why have you been to the flat?”

“To look at it.”

“What is there to look at?”

“Take him straight to the police station,” the man in the long coat jerked in abruptly.

Raskolnikov looked intently at him over his shoulder and said in the same slow, lazy tones:

“Come along.”

“Yes, take him,” the man went on more confidently. “Why was he going into _that_, what’s in his mind, eh?”

“He’s not drunk, but God knows what’s the matter with him,” muttered the workman.

“But what do you want?” the porter shouted again, beginning to get angry in earnest--“Why are you hanging about?”

“You funk the police station then?” said Raskolnikov jeeringly.

“How funk it? Why are you hanging about?”

“He’s a rogue!” shouted the peasant woman.

“Why waste time talking to him?” cried the other porter, a huge peasant in a full open coat and with keys on his belt. “Get along! He is a rogue and no mistake. Get along!”

And seizing Raskolnikov by the shoulder he flung him into the street. He lurched forward, but recovered his footing, looked at the spectators in silence and walked away.

“Strange man!” observed the workman.

“There are strange folks about nowadays,” said the woman.

“You should have taken him to the police station all the same,” said the man in the long coat.

“Better have nothing to do with him,” decided the big porter. “A regular rogue! Just what he wants, you may be sure, but once take him up, you won’t get rid of him.... We know the sort!”

“Shall I go there or not?” thought Raskolnikov, standing in the middle of the thoroughfare at the cross-roads, and he looked about him, as though expecting from someone a decisive word. But no sound came, all was dead and silent like the stones on which he walked, dead to him, to him alone.... All at once at the end of the street, two hundred yards away, in the gathering dusk he saw a crowd and heard talk and shouts. In the middle of the crowd stood a carriage.... A light gleamed in the middle of the street. “What is it?” Raskolnikov turned to the right and went up to the crowd. He seemed to clutch at everything and smiled coldly when he recognised it, for he had fully made up his mind to go to the police station and knew that it would all soon be over.

CHAPTER VII

An elegant carriage stood in the middle of the road with a pair of spirited grey horses; there was no one in it, and the coachman had got off his box and stood by; the horses were being held by the bridle.... A mass of people had gathered round, the police standing in front. One of them held a lighted lantern which he was turning on something lying close to the wheels. Everyone was talking, shouting, exclaiming; the coachman seemed at a loss and kept repeating:

“What a misfortune! Good Lord, what a misfortune!”

Raskolnikov pushed his way in as far as he could, and succeeded at last in seeing the object of the commotion and interest. On the ground a man who had been run over lay apparently unconscious, and covered with blood; he was very badly dressed, but not like a workman. Blood was flowing from his head and face; his face was crushed, mutilated and disfigured. He was evidently badly injured.

“Merciful heaven!” wailed the coachman, “what more could I do? If I’d been driving fast or had not shouted to him, but I was going quietly, not in a hurry. Everyone could see I was going along just like everybody else. A drunken man can’t walk straight, we all know.... I saw him crossing the street, staggering and almost falling. I shouted again and a second and a third time, then I held the horses in, but he fell straight under their feet! Either he did it on purpose or he was very tipsy.... The horses are young and ready to take fright... they started, he screamed... that made them worse. That’s how it happened!”

“That’s just how it was,” a voice in the crowd confirmed.

“He shouted, that’s true, he shouted three times,” another voice declared.

“Three times it was, we all heard it,” shouted a third.

But the coachman was not very much distressed and frightened. It was evident that the carriage belonged to a rich and important person who was awaiting it somewhere; the police, of course, were in no little anxiety to avoid upsetting his arrangements. All they had to do was to take the injured man to the police station and the hospital. No one knew his name.

Meanwhile Raskolnikov had squeezed in and stooped closer over him. The lantern suddenly lighted up the unfortunate man’s face. He recognised him.

“I know him! I know him!” he shouted, pushing to the front. “It’s a government clerk retired from the service, Marmeladov. He lives close by in Kozel’s house.... Make haste for a doctor! I will pay, see?” He pulled money out of his pocket and showed it to the policeman. He was in violent agitation.

The police were glad that they had found out who the man was. Raskolnikov gave his own name and address, and, as earnestly as if it had been his father, he besought the police to carry the unconscious Marmeladov to his lodging at once.

“Just here, three houses away,” he said eagerly, “the house belongs to Kozel, a rich German. He was going home, no doubt drunk. I know him, he is a drunkard. He has a family there, a wife, children, he has one daughter.... It will take time to take him to the hospital, and there is sure to be a doctor in the house. I’ll pay, I’ll pay! At least he will be looked after at home... they will help him at once. But he’ll die before you get him to the hospital.” He managed to slip something unseen into the policeman’s hand. But the thing was straightforward and legitimate, and in any case help was closer here. They raised the injured man; people volunteered to help.

Kozel’s house was thirty yards away. Raskolnikov walked behind, carefully holding Marmeladov’s head and showing the way.

“This way, this way! We must take him upstairs head foremost. Turn round! I’ll pay, I’ll make it worth your while,” he muttered.

Katerina Ivanovna had just begun, as she always did at every free moment, walking to and fro in her little room from window to stove and back again, with her arms folded across her chest, talking to herself and coughing. Of late she had begun to talk more than ever to her eldest girl, Polenka, a child of ten, who, though there was much she did not understand, understood very well that her mother needed her, and so always watched her with her big clever eyes and strove her utmost to appear to understand. This time Polenka was undressing her little brother, who had been unwell all day and was going to bed. The boy was waiting for her to take off his shirt, which had to be washed at night. He was sitting straight and motionless on a chair, with a silent, serious face, with his legs stretched out straight before him--heels together and toes turned out.

He was listening to what his mother was saying to his sister, sitting perfectly still with pouting lips and wide-open eyes, just as all good little boys have to sit when they are undressed to go to bed. A little girl, still younger, dressed literally in rags, stood at the screen, waiting for her turn. The door on to the stairs was open to relieve them a little from the clouds of tobacco smoke which floated in from the other rooms and brought on long terrible fits of coughing in the poor, consumptive woman. Katerina Ivanovna seemed to have grown even thinner during that week and the hectic flush on her face was brighter than ever.

“You wouldn’t believe, you can’t imagine, Polenka,” she said, walking about the room, “what a happy luxurious life we had in my papa’s house and how this drunkard has brought me, and will bring you all, to ruin! Papa was a civil colonel and only a step from

being a governor; so that everyone who came to see him said, ‘We look upon you, Ivan Mihailovitch, as our governor!’ When I... when...” she coughed violently, “oh, cursed life,” she cried, clearing her throat and pressing her hands to her breast, “when I... when at the last ball... at the marshal’s... Princess Bezzemelny saw me--who gave me the blessing when your father and I were married, Polenka--she asked at once ‘Isn’t that the pretty girl who danced the shawl dance at the breaking-up?’ (You must mend that tear, you must take your needle and darn it as I showed you, or to-morrow--cough, cough, cough--he will make the hole bigger,” she articulated with effort.) “Prince Schegolskoy, a kammerjunker, had just come from Petersburg then... he danced the mazurka with me and wanted to make me an offer next day; but I thanked him in flattering expressions and told him that my heart had long been another’s. That other was your father, Polya; papa was fearfully angry.... Is the water ready? Give me the shirt, and the stockings! Lida,” said she to the youngest one, “you must manage without your chemise to-night... and lay your stockings out with it... I’ll wash them together.... How is it that drunken vagabond doesn’t come in? He has worn his shirt till it looks like a dish-clout, he has torn it to rags! I’d do it all together, so as not to have to work two nights running! Oh, dear! (Cough, cough, cough, cough!) Again! What’s this?” she cried, noticing a crowd in the passage and the men, who were pushing into her room, carrying a burden. “What is it? What are they bringing? Mercy on us!”

“Where are we to put him?” asked the policeman, looking round when Marmeladov, unconscious and covered with blood, had been carried in.

“On the sofa! Put him straight on the sofa, with his head this way,” Raskolnikov showed him.

“Run over in the road! Drunk!” someone shouted in the passage.

Katerina Ivanovna stood, turning white and gasping for breath. The children were terrified. Little Lida screamed, rushed to Polenka and clutched at her, trembling all over.

Having laid Marmeladov down, Raskolnikov flew to Katerina Ivanovna.

“For God’s sake be calm, don’t be frightened!” he said, speaking quickly, “he was crossing the road and was run over by a carriage, don’t be frightened, he will come to, I told them bring him here... I’ve been here already, you remember? He will come to; I’ll pay!”

“He’s done it this time!” Katerina Ivanovna cried despairingly and she rushed to her husband.

Raskolnikov noticed at once that she was not one of those women who swoon easily. She instantly placed under the luckless man’s head a pillow, which no one had thought of and began undressing and examining him. She kept her head, forgetting herself, biting her trembling lips and stifling the screams which were ready to break from her.

Raskolnikov meanwhile induced someone to run for a doctor. There was a doctor, it appeared, next door but one.

“I’ve sent for a doctor,” he kept assuring Katerina Ivanovna, “don’t be uneasy, I’ll pay. Haven’t you water?... and give me a napkin or a towel, anything, as quick as you can.... He is injured, but not killed, believe me.... We shall see what the doctor says!”

Katerina Ivanovna ran to the window; there, on a broken chair in the corner, a large earthenware basin full of water had been stood, in readiness for washing her children’s and husband’s linen that night. This washing was done by Katerina Ivanovna at night at least twice a week, if not oftener. For the family had come to such a pass that they were practically without change of linen, and Katerina Ivanovna could not endure uncleanliness and, rather than see dirt in the house, she preferred to wear herself out at night, working beyond her strength when the rest were asleep, so as to get the wet linen hung on a line and dry by the morning. She took up the basin of water at Raskolnikov’s request, but almost fell down with her burden. But the latter had already succeeded in finding a towel, wetted it and began washing the blood off Marmeladov’s face.

Katerina Ivanovna stood by, breathing painfully and pressing her hands to her breast. She was in need of attention herself. Raskolnikov began to realise that he might have made a mistake in having the injured man brought here. The policeman, too, stood in hesitation.

“Polenka,” cried Katerina Ivanovna, “run to Sonia, make haste. If you don’t find her at home, leave word that her father has been run over and that she is to come here at once... when she comes in. Run, Polenka! there, put on the shawl.”

“Run your fastest!” cried the little boy on the chair suddenly, after which he relapsed into the same dumb rigidity, with round eyes, his heels thrust forward and his toes spread out.

Meanwhile the room had become so full of people that you couldn't have dropped a pin. The policemen left, all except one, who remained for a time, trying to drive out the people who came in from the stairs. Almost all Madame Lippevechsel's lodgers had streamed in from the inner rooms of the flat; at first they were squeezed together in the doorway, but afterwards they overflowed into the room. Katerina Ivanovna flew into a fury.

"You might let him die in peace, at least," she shouted at the crowd, "is it a spectacle for you to gape at? With cigarettes! (Cough, cough, cough!) You might as well keep your hats on.... And there is one in his hat!... Get away! You should respect the dead, at least!"

Her cough choked her--but her reproaches were not without result. They evidently stood in some awe of Katerina Ivanovna. The lodgers, one after another, squeezed back into the doorway with that strange inner feeling of satisfaction which may be observed in the presence of a sudden accident, even in those nearest and dearest to the victim, from which no living man is exempt, even in spite of the sincerest sympathy and compassion.

Voices outside were heard, however, speaking of the hospital and saying that they'd no business to make a disturbance here.

"No business to die!" cried Katerina Ivanovna, and she was rushing to the door to vent her wrath upon them, but in the doorway came face to face with Madame Lippevechsel who had only just heard of the accident and ran in to restore order. She was a particularly quarrelsome and irresponsible German.

"Ah, my God!" she cried, clasping her hands, "your husband drunken horses have trampled! To the hospital with him! I am the landlady!"

"Amalia Ludwigovna, I beg you to recollect what you are saying," Katerina Ivanovna began haughtily (she always took a haughty tone with the landlady that she might "remember her place" and even now could not deny herself this satisfaction). "Amalia Ludwigovna..."

"I have you once before told that you to call me Amalia Ludwigovna may not dare; I am Amalia Ivanovna."

"You are not Amalia Ivanovna, but Amalia Ludwigovna, and as I am not one of your despicable flatterers like Mr. Lebeziatnikov, who's laughing behind the door at this moment (a laugh and a cry of 'they are at it again' was in fact audible at the door) so I shall always call you Amalia Ludwigovna, though I fail to understand why you dislike that name. You can see for yourself what has happened to Semyon Zaharovitch; he is dying. I beg you to close that door at once and to admit no one. Let him at least die in peace! Or I warn you the Governor-General, himself, shall be informed of your conduct to-morrow. The prince knew me as a girl; he remembers Semyon Zaharovitch well and has often been a benefactor to him. Everyone knows that Semyon Zaharovitch had many friends and protectors, whom he abandoned himself from an honourable pride, knowing his unhappy weakness, but now (she pointed to Raskolnikov) a generous young man has come to our assistance, who has wealth and connections and whom Semyon Zaharovitch has known from a child. You may rest assured, Amalia Ludwigovna..."

All this was uttered with extreme rapidity, getting quicker and quicker, but a cough suddenly cut short Katerina Ivanovna's eloquence. At that instant the dying man recovered consciousness and uttered a groan; she ran to him. The injured man opened his eyes and without recognition or understanding gazed at Raskolnikov who was bending over him. He drew deep, slow, painful breaths; blood oozed at the corners of his mouth and drops of perspiration came out on his forehead. Not recognising Raskolnikov, he began looking round uneasily. Katerina Ivanovna looked at him with a sad but stern face, and tears trickled from her eyes.

"My God! His whole chest is crushed! How he is bleeding," she said in despair. "We must take off his clothes. Turn a little, Semyon Zaharovitch, if you can," she cried to him.

Marmeladov recognised her.

"A priest," he articulated huskily.

Katerina Ivanovna walked to the window, laid her head against the window frame and exclaimed in despair:

"Oh, cursed life!"

"A priest," the dying man said again after a moment's silence.

“They’ve gone for him,” Katerina Ivanovna shouted to him, he obeyed her shout and was silent. With sad and timid eyes he looked for her; she returned and stood by his pillow. He seemed a little easier but not for long.

Soon his eyes rested on little Lida, his favourite, who was shaking in the corner, as though she were in a fit, and staring at him with her wondering childish eyes.

“A-ah,” he signed towards her uneasily. He wanted to say something.

“What now?” cried Katerina Ivanovna.

“Barefoot, barefoot!” he muttered, indicating with frenzied eyes the child’s bare feet.

“Be silent,” Katerina Ivanovna cried irritably, “you know why she is barefooted.”

“Thank God, the doctor,” exclaimed Raskolnikov, relieved.

The doctor came in, a precise little old man, a German, looking about him mistrustfully; he went up to the sick man, took his pulse, carefully felt his head and with the help of Katerina Ivanovna he unbuttoned the blood-stained shirt, and bared the injured man’s chest. It was gashed, crushed and fractured, several ribs on the right side were broken. On the left side, just over the heart, was a large, sinister-looking yellowish-black bruise--a cruel kick from the horse’s hoof. The doctor frowned. The policeman told him that he was caught in the wheel and turned round with it for thirty yards on the road.

“It’s wonderful that he has recovered consciousness,” the doctor whispered softly to Raskolnikov.

“What do you think of him?” he asked.

“He will die immediately.”

“Is there really no hope?”

“Not the faintest! He is at the last gasp.... His head is badly injured, too... Hm... I could bleed him if you like, but... it would be useless. He is bound to die within the next five or ten minutes.”

“Better bleed him then.”

“If you like.... But I warn you it will be perfectly useless.”

At that moment other steps were heard; the crowd in the passage parted, and the priest, a little, grey old man, appeared in the doorway bearing the sacrament. A policeman had gone for him at the time of the accident. The doctor changed places with him, exchanging glances with him. Raskolnikov begged the doctor to remain a little while. He shrugged his shoulders and remained.

All stepped back. The confession was soon over. The dying man probably understood little; he could only utter indistinct broken sounds. Katerina Ivanovna took little Lida, lifted the boy from the chair, knelt down in the corner by the stove and made the children kneel in front of her. The little girl was still trembling; but the boy, kneeling on his little bare knees, lifted his hand rhythmically, crossing himself with precision and bowed down, touching the floor with his forehead, which seemed to afford him especial satisfaction. Katerina Ivanovna bit her lips and held back her tears; she prayed, too, now and then pulling straight the boy’s shirt, and managed to cover the girl’s bare shoulders with a kerchief, which she took from the chest without rising from her knees or ceasing to pray. Meanwhile the door from the inner rooms was opened inquisitively again. In the passage the crowd of spectators from all the flats on the staircase grew denser and denser, but they did not venture beyond the threshold. A single candle-end lighted up the scene.

At that moment Polenka forced her way through the crowd at the door. She came in panting from running so fast, took off her kerchief, looked for her mother, went up to her and said, “She’s coming, I met her in the street.” Her mother made her kneel beside her.

Timidly and noiselessly a young girl made her way through the crowd, and strange was her appearance in that room, in the midst of want, rags, death and despair. She, too, was in rags, her attire was all of the cheapest, but decked out in gutter finery of a special stamp, unmistakably betraying its shameful purpose. Sonia stopped short in the doorway and looked about her bewildered, unconscious of everything. She forgot her fourth-hand, gaudy silk dress, so unseemly here with its ridiculous long train, and her immense crinoline that filled up the whole doorway, and her light-coloured shoes, and the parasol she brought with her, though it

was no use at night, and the absurd round straw hat with its flaring flame-coloured feather. Under this rakishly-tilted hat was a pale, frightened little face with lips parted and eyes staring in terror. Sonia was a small thin girl of eighteen with fair hair, rather pretty, with wonderful blue eyes. She looked intently at the bed and the priest; she too was out of breath with running. At last whispers, some words in the crowd probably, reached her. She looked down and took a step forward into the room, still keeping close to the door.

The service was over. Katerina Ivanovna went up to her husband again. The priest stepped back and turned to say a few words of admonition and consolation to Katerina Ivanovna on leaving.

“What am I to do with these?” she interrupted sharply and irritably, pointing to the little ones.

“God is merciful; look to the Most High for succour,” the priest began.

“Ach! He is merciful, but not to us.”

“That’s a sin, a sin, madam,” observed the priest, shaking his head.

“And isn’t that a sin?” cried Katerina Ivanovna, pointing to the dying man.

“Perhaps those who have involuntarily caused the accident will agree to compensate you, at least for the loss of his earnings.”

“You don’t understand!” cried Katerina Ivanovna angrily waving her hand. “And why should they compensate me? Why, he was drunk and threw himself under the horses! What earnings? He brought us in nothing but misery. He drank everything away, the drunkard! He robbed us to get drink, he wasted their lives and mine for drink! And thank God he’s dying! One less to keep!”

“You must forgive in the hour of death, that’s a sin, madam, such feelings are a great sin.”

Katerina Ivanovna was busy with the dying man; she was giving him water, wiping the blood and sweat from his head, setting his pillow straight, and had only turned now and then for a moment to address the priest. Now she flew at him almost in a frenzy.

“Ah, father! That’s words and only words! Forgive! If he’d not been run over, he’d have come home to-day drunk and his only shirt dirty and in rags and he’d have fallen asleep like a log, and I should have been sousing and rinsing till daybreak, washing his rags and the children’s and then drying them by the window and as soon as it was daylight I should have been darning them. That’s how I spend my nights!... What’s the use of talking of forgiveness! I have forgiven as it is!”

A terrible hollow cough interrupted her words. She put her handkerchief to her lips and showed it to the priest, pressing her other hand to her aching chest. The handkerchief was covered with blood. The priest bowed his head and said nothing.

Marmeladov was in the last agony; he did not take his eyes off the face of Katerina Ivanovna, who was bending over him again. He kept trying to say something to her; he began moving his tongue with difficulty and articulating indistinctly, but Katerina Ivanovna, understanding that he wanted to ask her forgiveness, called peremptorily to him:

“Be silent! No need! I know what you want to say!” And the sick man was silent, but at the same instant his wandering eyes strayed to the doorway and he saw Sonia.

Till then he had not noticed her: she was standing in the shadow in a corner.

“Who’s that? Who’s that?” he said suddenly in a thick gasping voice, in agitation, turning his eyes in horror towards the door where his daughter was standing, and trying to sit up.

“Lie down! Lie do-own!” cried Katerina Ivanovna.

With unnatural strength he had succeeded in propping himself on his elbow. He looked wildly and fixedly for some time on his daughter, as though not recognising her. He had never seen her before in such attire. Suddenly he recognised her, crushed and ashamed in her humiliation and gaudy finery, meekly awaiting her turn to say good-bye to her dying father. His face showed intense suffering.

“Sonia! Daughter! Forgive!” he cried, and he tried to hold out his hand to her, but losing his balance, he fell off the sofa, face downwards on the floor. They rushed to pick him up, they put him on the sofa; but he was dying. Sonia with a faint cry ran up, embraced him and remained so without moving. He died in her arms.

“He’s got what he wanted,” Katerina Ivanovna cried, seeing her husband’s dead body. “Well, what’s to be done now? How am I to bury him! What can I give them to-morrow to eat?”

Raskolnikov went up to Katerina Ivanovna.

“Katerina Ivanovna,” he began, “last week your husband told me all his life and circumstances.... Believe me, he spoke of you with passionate reverence. From that evening, when I learnt how devoted he was to you all and how he loved and respected you especially, Katerina Ivanovna, in spite of his unfortunate weakness, from that evening we became friends.... Allow me now... to do something... to repay my debt to my dead friend. Here are twenty roubles, I think--and if that can be of any assistance to you, then... I... in short, I will come again, I will be sure to come again... I shall, perhaps, come again to-morrow.... Good-bye!”

And he went quickly out of the room, squeezing his way through the crowd to the stairs. But in the crowd he suddenly jostled against Nikodim Fomitch, who had heard of the accident and had come to give instructions in person. They had not met since the scene at the police station, but Nikodim Fomitch knew him instantly.

“Ah, is that you?” he asked him.

“He’s dead,” answered Raskolnikov. “The doctor and the priest have been, all as it should have been. Don’t worry the poor woman too much, she is in consumption as it is. Try and cheer her up, if possible... you are a kind-hearted man, I know...” he added with a smile, looking straight in his face.

“But you are spattered with blood,” observed Nikodim Fomitch, noticing in the lamplight some fresh stains on Raskolnikov’s waistcoat.

“Yes... I’m covered with blood,” Raskolnikov said with a peculiar air; then he smiled, nodded and went downstairs.

He walked down slowly and deliberately, feverish but not conscious of it, entirely absorbed in a new overwhelming sensation of life and strength that surged up suddenly within him. This sensation might be compared to that of a man condemned to death who has suddenly been pardoned. Halfway down the staircase he was overtaken by the priest on his way home; Raskolnikov let him pass, exchanging a silent greeting with him. He was just descending the last steps when he heard rapid footsteps behind him. Someone overtook him; it was Polenka. She was running after him, calling “Wait! wait!”

He turned round. She was at the bottom of the staircase and stopped short a step above him. A dim light came in from the yard. Raskolnikov could distinguish the child’s thin but pretty little face, looking at him with a bright childish smile. She had run after him with a message which she was evidently glad to give.

“Tell me, what is your name?... and where do you live?” she said hurriedly in a breathless voice.

He laid both hands on her shoulders and looked at her with a sort of rapture. It was such a joy to him to look at her, he could not have said why.

“Who sent you?”

“Sister Sonia sent me,” answered the girl, smiling still more brightly.

“I knew it was sister Sonia sent you.”

“Mamma sent me, too... when sister Sonia was sending me, mamma came up, too, and said ‘Run fast, Polenka.’”

“Do you love sister Sonia?”

“I love her more than anyone,” Polenka answered with a peculiar earnestness, and her smile became graver.

“And will you love me?”

By way of answer he saw the little girl’s face approaching him, her full lips naïvely held out to kiss him. Suddenly her arms as thin as sticks held him tightly, her head rested on his shoulder and the little girl wept softly, pressing her face against him.

“I am sorry for father,” she said a moment later, raising her tear-stained face and brushing away the tears with her hands. “It’s nothing but misfortunes now,” she added suddenly with that peculiarly sedate air which children try hard to assume when they want

to speak like grown-up people.

“Did your father love you?”

“He loved Lida most,” she went on very seriously without a smile, exactly like grown-up people, “he loved her because she is little and because she is ill, too. And he always used to bring her presents. But he taught us to read and me grammar and scripture, too,” she added with dignity. “And mother never used to say anything, but we knew that she liked it and father knew it, too. And mother wants to teach me French, for it’s time my education began.”

“And do you know your prayers?”

“Of course, we do! We knew them long ago. I say my prayers to myself as I am a big girl now, but Kolya and Lida say them aloud with mother. First they repeat the ‘Ave Maria’ and then another prayer: ‘Lord, forgive and bless sister Sonia,’ and then another, ‘Lord, forgive and bless our second father.’ For our elder father is dead and this is another one, but we do pray for the other as well.”

“Polenka, my name is Rodion. Pray sometimes for me, too. ‘And Thy servant Rodion,’ nothing more.”

“I’ll pray for you all the rest of my life,” the little girl declared hotly, and suddenly smiling again she rushed at him and hugged him warmly once more.

Raskolnikov told her his name and address and promised to be sure to come next day. The child went away quite enchanted with him. It was past ten when he came out into the street. In five minutes he was standing on the bridge at the spot where the woman had jumped in.

“Enough,” he pronounced resolutely and triumphantly. “I’ve done with fancies, imaginary terrors and phantoms! Life is real! haven’t I lived just now? My life has not yet died with that old woman! The Kingdom of Heaven to her--and now enough, madam, leave me in peace! Now for the reign of reason and light... and of will, and of strength... and now we will see! We will try our strength!” he added defiantly, as though challenging some power of darkness. “And I was ready to consent to live in a square of space!

“I am very weak at this moment, but... I believe my illness is all over. I knew it would be over when I went out. By the way, Potchinkov’s house is only a few steps away. I certainly must go to Razumihin even if it were not close by... let him win his bet! Let us give him some satisfaction, too--no matter! Strength, strength is what one wants, you can get nothing without it, and strength must be won by strength--that’s what they don’t know,” he added proudly and self-confidently and he walked with flagging footsteps from the bridge. Pride and self-confidence grew continually stronger in him; he was becoming a different man every moment. What was it had happened to work this revolution in him? He did not know himself; like a man catching at a straw, he suddenly felt that he, too, ‘could live, that there was still life for him, that his life had not died with the old woman.’ Perhaps he was in too great a hurry with his conclusions, but he did not think of that.

“But I did ask her to remember ‘Thy servant Rodion’ in her prayers,” the idea struck him. “Well, that was... in case of emergency,” he added and laughed himself at his boyish sally. He was in the best of spirits.

He easily found Razumihin; the new lodger was already known at Potchinkov’s and the porter at once showed him the way. Half-way upstairs he could hear the noise and animated conversation of a big gathering of people. The door was wide open on the stairs; he could hear exclamations and discussion. Razumihin’s room was fairly large; the company consisted of fifteen people. Raskolnikov stopped in the entry, where two of the landlady’s servants were busy behind a screen with two samovars, bottles, plates and dishes of pie and savouries, brought up from the landlady’s kitchen. Raskolnikov sent in for Razumihin. He ran out delighted. At the first glance it was apparent that he had had a great deal to drink and, though no amount of liquor made Razumihin quite drunk, this time he was perceptibly affected by it.

“Listen,” Raskolnikov hastened to say, “I’ve only just come to tell you you’ve won your bet and that no one really knows what may not happen to him. I can’t come in; I am so weak that I shall fall down directly. And so good evening and good-bye! Come and see me to-morrow.”

“Do you know what? I’ll see you home. If you say you’re weak yourself, you must...”

“And your visitors? Who is the curly-headed one who has just peeped out?”

“He? Goodness only knows! Some friend of uncle’s, I expect, or perhaps he has come without being invited... I’ll leave uncle with them, he is an invaluable person, pity I can’t introduce you to him now. But confound them all now! They won’t notice me, and I need a little fresh air, for you’ve come just in the nick of time--another two minutes and I should have come to blows! They are talking such a lot of wild stuff... you simply can’t imagine what men will say! Though why shouldn’t you imagine? Don’t we talk nonsense ourselves? And let them... that’s the way to learn not to!... Wait a minute, I’ll fetch Zossimov.”

Zossimov pounced upon Raskolnikov almost greedily; he showed a special interest in him; soon his face brightened.

“You must go to bed at once,” he pronounced, examining the patient as far as he could, “and take something for the night. Will you take it? I got it ready some time ago... a powder.”

“Two, if you like,” answered Raskolnikov. The powder was taken at once.

“It’s a good thing you are taking him home,” observed Zossimov to Razumihin--“we shall see how he is to-morrow, to-day he’s not at all amiss--a considerable change since the afternoon. Live and learn...”

“Do you know what Zossimov whispered to me when we were coming out?” Razumihin blurted out, as soon as they were in the street. “I won’t tell you everything, brother, because they are such fools. Zossimov told me to talk freely to you on the way and get you to talk freely to me, and afterwards I am to tell him about it, for he’s got a notion in his head that you are... mad or close on it. Only fancy! In the first place, you’ve three times the brains he has; in the second, if you are not mad, you needn’t care a hang that he has got such a wild idea; and thirdly, that piece of beef whose specialty is surgery has gone mad on mental diseases, and what’s brought him to this conclusion about you was your conversation to-day with Zametov.”

“Zametov told you all about it?”

“Yes, and he did well. Now I understand what it all means and so does Zametov.... Well, the fact is, Rodya... the point is... I am a little drunk now.... But that’s... no matter... the point is that this idea... you understand? was just being hatched in their brains... you understand? That is, no one ventured to say it aloud, because the idea is too absurd and especially since the arrest of that painter, that bubble’s burst and gone for ever. But why are they such fools? I gave Zametov a bit of a thrashing at the time--that’s between ourselves, brother; please don’t let out a hint that you know of it; I’ve noticed he is a ticklish subject; it was at Luise Ivanovna’s. But to-day, to-day it’s all cleared up. That Ilya Petrovitch is at the bottom of it! He took advantage of your fainting at the police station, but he is ashamed of it himself now; I know that...”

Raskolnikov listened greedily. Razumihin was drunk enough to talk too freely.

“I fainted then because it was so close and the smell of paint,” said Raskolnikov.

“No need to explain that! And it wasn’t the paint only: the fever had been coming on for a month; Zossimov testifies to that! But how crushed that boy is now, you wouldn’t believe! ‘I am not worth his little finger,’ he says. Yours, he means. He has good feelings at times, brother. But the lesson, the lesson you gave him to-day in the Palais de Cristal, that was too good for anything! You frightened him at first, you know, he nearly went into convulsions! You almost convinced him again of the truth of all that hideous nonsense, and then you suddenly--put out your tongue at him: ‘There now, what do you make of it?’ It was perfect! He is crushed, annihilated now! It was masterly, by Jove, it’s what they deserve! Ah, that I wasn’t there! He was hoping to see you awfully. Porfiry, too, wants to make your acquaintance...”

“Ah!... he too... but why did they put me down as mad?”

“Oh, not mad. I must have said too much, brother.... What struck him, you see, was that only that subject seemed to interest you; now it’s clear why it did interest you; knowing all the circumstances... and how that irritated you and worked in with your illness... I am a little drunk, brother, only, confound him, he has some idea of his own... I tell you, he’s mad on mental diseases. But don’t you mind him...”

For half a minute both were silent.

“Listen, Razumihin,” began Raskolnikov, “I want to tell you plainly: I’ve just been at a death-bed, a clerk who died... I gave them all my money... and besides I’ve just been kissed by someone who, if I had killed anyone, would just the same... in fact I saw someone else there... with a flame-coloured feather... but I am talking nonsense; I am very weak, support me... we shall be at the stairs directly...”

“What’s the matter? What’s the matter with you?” Razumihin asked anxiously.

“I am a little giddy, but that’s not the point, I am so sad, so sad... like a woman. Look, what’s that? Look, look!”

“What is it?”

“Don’t you see? A light in my room, you see? Through the crack...”

They were already at the foot of the last flight of stairs, at the level of the landlady’s door, and they could, as a fact, see from below that there was a light in Raskolnikov’s garret.

“Queer! Nastasya, perhaps,” observed Razumihin.

“She is never in my room at this time and she must be in bed long ago, but... I don’t care! Good-bye!”

“What do you mean? I am coming with you, we’ll come in together!”

“I know we are going in together, but I want to shake hands here and say good-bye to you here. So give me your hand, good-bye!”

“What’s the matter with you, Rodya?”

“Nothing... come along... you shall be witness.”

They began mounting the stairs, and the idea struck Razumihin that perhaps Zossimov might be right after all. “Ah, I’ve upset him with my chatter!” he muttered to himself.

When they reached the door they heard voices in the room.

“What is it?” cried Razumihin. Raskolnikov was the first to open the door; he flung it wide and stood still in the doorway, dumbfoundered.

His mother and sister were sitting on his sofa and had been waiting an hour and a half for him. Why had he never expected, never thought of them, though the news that they had started, were on their way and would arrive immediately, had been repeated to him only that day? They had spent that hour and a half plying Nastasya with questions. She was standing before them and had told them everything by now. They were beside themselves with alarm when they heard of his “running away” to-day, ill and, as they understood from her story, delirious! “Good Heavens, what had become of him?” Both had been weeping, both had been in anguish for that hour and a half.

A cry of joy, of ecstasy, greeted Raskolnikov’s entrance. Both rushed to him. But he stood like one dead; a sudden intolerable sensation struck him like a thunderbolt. He did not lift his arms to embrace them, he could not. His mother and sister clasped him in their arms, kissed him, laughed and cried. He took a step, tottered and fell to the ground, fainting.

Anxiety, cries of horror, moans... Razumihin who was standing in the doorway flew into the room, seized the sick man in his strong arms and in a moment had him on the sofa.

“It’s nothing, nothing!” he cried to the mother and sister--“it’s only a faint, a mere trifle! Only just now the doctor said he was much better, that he is perfectly well! Water! See, he is coming to himself, he is all right again!”

And seizing Dounia by the arm so that he almost dislocated it, he made her bend down to see that “he is all right again.” The mother and sister looked on him with emotion and gratitude, as their Providence. They had heard already from Nastasya all that had been done for their Rodya during his illness, by this “very competent young man,” as Pulcheria Alexandrovna Raskolnikov called him that evening in conversation with Dounia.

PART III

CHAPTER I

Raskolnikov got up, and sat down on the sofa. He waved his hand weakly to Razumihin to cut short the flow of warm and incoherent consolations he was addressing to his mother and sister, took them both by the hand and for a minute or two gazed from one to the other without speaking. His mother was alarmed by his expression. It revealed an emotion agonisingly poignant,

and at the same time something immovable, almost insane. Pulcheria Alexandrovna began to cry.

Avdotya Romanovna was pale; her hand trembled in her brother's.

"Go home... with him," he said in a broken voice, pointing to Razumihin, "good-bye till to-morrow; to-morrow everything... Is it long since you arrived?"

"This evening, Rodya," answered Pulcheria Alexandrovna, "the train was awfully late. But, Rodya, nothing would induce me to leave you now! I will spend the night here, near you..."

"Don't torture me!" he said with a gesture of irritation.

"I will stay with him," cried Razumihin, "I won't leave him for a moment. Bother all my visitors! Let them rage to their hearts' content! My uncle is presiding there."

"How, how can I thank you!" Pulcheria Alexandrovna was beginning, once more pressing Razumihin's hands, but Raskolnikov interrupted her again.

"I can't have it! I can't have it!" he repeated irritably, "don't worry me! Enough, go away... I can't stand it!"

"Come, mamma, come out of the room at least for a minute," Dounia whispered in dismay; "we are distressing him, that's evident."

"Mayn't I look at him after three years?" wept Pulcheria Alexandrovna.

"Stay," he stopped them again, "you keep interrupting me, and my ideas get muddled.... Have you seen Luzhin?"

"No, Rodya, but he knows already of our arrival. We have heard, Rodya, that Pyotr Petrovitch was so kind as to visit you today," Pulcheria Alexandrovna added somewhat timidly.

"Yes... he was so kind... Dounia, I promised Luzhin I'd throw him downstairs and told him to go to hell...."

"Rodya, what are you saying! Surely, you don't mean to tell us..." Pulcheria Alexandrovna began in alarm, but she stopped, looking at Dounia.

Avdotya Romanovna was looking attentively at her brother, waiting for what would come next. Both of them had heard of the quarrel from Nastasya, so far as she had succeeded in understanding and reporting it, and were in painful perplexity and suspense.

"Dounia," Raskolnikov continued with an effort, "I don't want that marriage, so at the first opportunity to-morrow you must refuse Luzhin, so that we may never hear his name again."

"Good Heavens!" cried Pulcheria Alexandrovna.

"Brother, think what you are saying!" Avdotya Romanovna began impetuously, but immediately checked herself. "You are not fit to talk now, perhaps; you are tired," she added gently.

"You think I am delirious? No... You are marrying Luzhin for _my_ sake. But I won't accept the sacrifice. And so write a letter before to-morrow, to refuse him... Let me read it in the morning and that will be the end of it!"

"That I can't do!" the girl cried, offended, "what right have you..."

"Dounia, you are hasty, too, be quiet, to-morrow... Don't you see..." the mother interposed in dismay. "Better come away!"

"He is raving," Razumihin cried tipsily, "or how would he dare! To-morrow all this nonsense will be over... to-day he certainly did drive him away. That was so. And Luzhin got angry, too.... He made speeches here, wanted to show off his learning and he went out crest-fallen...."

"Then it's true?" cried Pulcheria Alexandrovna.

"Good-bye till to-morrow, brother," said Dounia compassionately--"let us go, mother... Good-bye, Rodya."

"Do you hear, sister," he repeated after them, making a last effort, "I am not delirious; this marriage is--an infamy. Let me act like a scoundrel, but you mustn't... one is enough... and though I am a scoundrel, I wouldn't own such a sister. It's me or Luzhin! Go

now....”

“But you’re out of your mind! Despot!” roared Razumihin; but Raskolnikov did not and perhaps could not answer. He lay down on the sofa, and turned to the wall, utterly exhausted. Avdotya Romanovna looked with interest at Razumihin; her black eyes flashed; Razumihin positively started at her glance.

Pulcheria Alexandrovna stood overwhelmed.

“Nothing would induce me to go,” she whispered in despair to Razumihin. “I will stay somewhere here... escort Dounia home.”

“You’ll spoil everything,” Razumihin answered in the same whisper, losing patience--“come out on to the stairs, anyway. Nastasya, show a light! I assure you,” he went on in a half whisper on the stairs--“that he was almost beating the doctor and me this afternoon! Do you understand? The doctor himself! Even he gave way and left him, so as not to irritate him. I remained downstairs on guard, but he dressed at once and slipped off. And he will slip off again if you irritate him, at this time of night, and will do himself some mischief....”

“What are you saying?”

“And Avdotya Romanovna can’t possibly be left in those lodgings without you. Just think where you are staying! That blackguard Pyotr Petrovitch couldn’t find you better lodgings... But you know I’ve had a little to drink, and that’s what makes me... swear; don’t mind it....”

“But I’ll go to the landlady here,” Pulcheria Alexandrovna insisted, “I’ll beseech her to find some corner for Dounia and me for the night. I can’t leave him like that, I cannot!”

This conversation took place on the landing just before the landlady’s door. Nastasya lighted them from a step below. Razumihin was in extraordinary excitement. Half an hour earlier, while he was bringing Raskolnikov home, he had indeed talked too freely, but he was aware of it himself, and his head was clear in spite of the vast quantities he had imbibed. Now he was in a state bordering on ecstasy, and all that he had drunk seemed to fly to his head with redoubled effect. He stood with the two ladies, seizing both by their hands, persuading them, and giving them reasons with astonishing plainness of speech, and at almost every word he uttered, probably to emphasise his arguments, he squeezed their hands painfully as in a vise. He stared at Avdotya Romanovna without the least regard for good manners. They sometimes pulled their hands out of his huge bony paws, but far from noticing what was the matter, he drew them all the closer to him. If they’d told him to jump head foremost from the staircase, he would have done it without thought or hesitation in their service. Though Pulcheria Alexandrovna felt that the young man was really too eccentric and pinched her hand too much, in her anxiety over her Rodya she looked on his presence as providential, and was unwilling to notice all his peculiarities. But though Avdotya Romanovna shared her anxiety, and was not of timorous disposition, she could not see the glowing light in his eyes without wonder and almost alarm. It was only the unbounded confidence inspired by Nastasya’s account of her brother’s queer friend, which prevented her from trying to run away from him, and to persuade her mother to do the same. She realised, too, that even running away was perhaps impossible now. Ten minutes later, however, she was considerably reassured; it was characteristic of Razumihin that he showed his true nature at once, whatever mood he might be in, so that people quickly saw the sort of man they had to deal with.

“You can’t go to the landlady, that’s perfect nonsense!” he cried. “If you stay, though you are his mother, you’ll drive him to a frenzy, and then goodness knows what will happen! Listen, I’ll tell you what I’ll do: Nastasya will stay with him now, and I’ll conduct you both home, you can’t be in the streets alone; Petersburg is an awful place in that way.... But no matter! Then I’ll run straight back here and a quarter of an hour later, on my word of honour, I’ll bring you news how he is, whether he is asleep, and all that. Then, listen! Then I’ll run home in a twinkling--I’ve a lot of friends there, all drunk--I’ll fetch Zossimov--that’s the doctor who is looking after him, he is there, too, but he is not drunk; he is not drunk, he is never drunk! I’ll drag him to Rodya, and then to you, so that you’ll get two reports in the hour--from the doctor, you understand, from the doctor himself, that’s a very different thing from my account of him! If there’s anything wrong, I swear I’ll bring you here myself, but, if it’s all right, you go to bed. And I’ll spend the night here, in the passage, he won’t hear me, and I’ll tell Zossimov to sleep at the landlady’s, to be at hand. Which is better for him: you or the doctor? So come home then! But the landlady is out of the question; it’s all right for me, but it’s out of the question for you: she wouldn’t take you, for she’s... for she’s a fool... She’d be jealous on my account of Avdotya Romanovna and of you, too, if you want to know... of Avdotya Romanovna certainly. She is an absolutely, absolutely unaccountable character! But I am a fool, too!... No matter! Come along! Do you trust me? Come, do you trust me or not?”

“Let us go, mother,” said Avdotya Romanovna, “he will certainly do what he has promised. He has saved Rodya already, and if the doctor really will consent to spend the night here, what could be better?”

“You see, you... you... understand me, because you are an angel!” Razumihin cried in ecstasy, “let us go! Nastasya! Fly upstairs and sit with him with a light; I’ll come in a quarter of an hour.”

Though Pulcheria Alexandrovna was not perfectly convinced, she made no further resistance. Razumihin gave an arm to each and drew them down the stairs. He still made her uneasy, as though he was competent and good-natured, was he capable of carrying out his promise? He seemed in such a condition....

“Ah, I see you think I am in such a condition!” Razumihin broke in upon her thoughts, guessing them, as he strolled along the pavement with huge steps, so that the two ladies could hardly keep up with him, a fact he did not observe, however. “Nonsense! That is... I am drunk like a fool, but that’s not it; I am not drunk from wine. It’s seeing you has turned my head... But don’t mind me! Don’t take any notice: I am talking nonsense, I am not worthy of you.... I am utterly unworthy of you! The minute I’ve taken you home, I’ll pour a couple of pailfuls of water over my head in the gutter here, and then I shall be all right.... If only you knew how I love you both! Don’t laugh, and don’t be angry! You may be angry with anyone, but not with me! I am his friend, and therefore I am your friend, too, I want to be... I had a presentiment... Last year there was a moment... though it wasn’t a presentiment really, for you seem to have fallen from heaven. And I expect I shan’t sleep all night... Zossimov was afraid a little time ago that he would go mad... that’s why he mustn’t be irritated.”

“What do you say?” cried the mother.

“Did the doctor really say that?” asked Avdotya Romanovna, alarmed.

“Yes, but it’s not so, not a bit of it. He gave him some medicine, a powder, I saw it, and then your coming here.... Ah! It would have been better if you had come to-morrow. It’s a good thing we went away. And in an hour Zossimov himself will report to you about everything. He is not drunk! And I shan’t be drunk.... And what made me get so tight? Because they got me into an argument, damn them! I’ve sworn never to argue! They talk such trash! I almost came to blows! I’ve left my uncle to preside. Would you believe, they insist on complete absence of individualism and that’s just what they relish! Not to be themselves, to be as unlike themselves as they can. That’s what they regard as the highest point of progress. If only their nonsense were their own, but as it is...”

“Listen!” Pulcheria Alexandrovna interrupted timidly, but it only added fuel to the flames.

“What do you think?” shouted Razumihin, louder than ever, “you think I am attacking them for talking nonsense? Not a bit! I like them to talk nonsense. That’s man’s one privilege over all creation. Through error you come to the truth! I am a man because I err! You never reach any truth without making fourteen mistakes and very likely a hundred and fourteen. And a fine thing, too, in its way; but we can’t even make mistakes on our own account! Talk nonsense, but talk your own nonsense, and I’ll kiss you for it. To go wrong in one’s own way is better than to go right in someone else’s. In the first case you are a man, in the second you’re no better than a bird. Truth won’t escape you, but life can be cramped. There have been examples. And what are we doing now? In science, development, thought, invention, ideals, aims, liberalism, judgment, experience and everything, everything, everything, we are still in the preparatory class at school. We prefer to live on other people’s ideas, it’s what we are used to! Am I right, am I right?” cried Razumihin, pressing and shaking the two ladies’ hands.

“Oh, mercy, I do not know,” cried poor Pulcheria Alexandrovna.

“Yes, yes... though I don’t agree with you in everything,” added Avdotya Romanovna earnestly and at once uttered a cry, for he squeezed her hand so painfully.

“Yes, you say yes... well after that you... you...” he cried in a transport, “you are a fount of goodness, purity, sense... and perfection. Give me your hand... you give me yours, too! I want to kiss your hands here at once, on my knees...” and he fell on his knees on the pavement, fortunately at that time deserted.

“Leave off, I entreat you, what are you doing?” Pulcheria Alexandrovna cried, greatly distressed.

“Get up, get up!” said Dounia laughing, though she, too, was upset.

“Not for anything till you let me kiss your hands! That’s it! Enough! I get up and we’ll go on! I am a luckless fool, I am unworthy of you and drunk... and I am ashamed.... I am not worthy to love you, but to do homage to you is the duty of every man who is not a

perfect beast! And I've done homage.... Here are your lodgings, and for that alone Rodya was right in driving your Pyotr Petrovitch away.... How dare he! how dare he put you in such lodgings! It's a scandal! Do you know the sort of people they take in here? And you his betrothed! You are his betrothed? Yes? Well, then, I'll tell you, your _fiancé_ is a scoundrel."

"Excuse me, Mr. Razumihin, you are forgetting..." Pulcheria Alexandrovna was beginning.

"Yes, yes, you are right, I did forget myself, I am ashamed of it," Razumihin made haste to apologise. "But... but you can't be angry with me for speaking so! For I speak sincerely and not because... hm, hm! That would be disgraceful; in fact not because I'm in... hm! Well, anyway, I won't say why, I daren't.... But we all saw to-day when he came in that that man is not of our sort. Not because he had his hair curled at the barber's, not because he was in such a hurry to show his wit, but because he is a spy, a speculator, because he is a skin-flint and a buffoon. That's evident. Do you think him clever? No, he is a fool, a fool. And is he a match for you? Good heavens! Do you see, ladies?" he stopped suddenly on the way upstairs to their rooms, "though all my friends there are drunk, yet they are all honest, and though we do talk a lot of trash, and I do, too, yet we shall talk our way to the truth at last, for we are on the right path, while Pyotr Petrovitch... is not on the right path. Though I've been calling them all sorts of names just now, I do respect them all... though I don't respect Zametov, I like him, for he is a puppy, and that bullock Zossimov, because he is an honest man and knows his work. But enough, it's all said and forgiven. Is it forgiven? Well, then, let's go on. I know this corridor, I've been here, there was a scandal here at Number 3.... Where are you here? Which number? eight? Well, lock yourselves in for the night, then. Don't let anybody in. In a quarter of an hour I'll come back with news, and half an hour later I'll bring Zossimov, you'll see! Good-bye, I'll run."

"Good heavens, Dounia, what is going to happen?" said Pulcheria Alexandrovna, addressing her daughter with anxiety and dismay.

"Don't worry yourself, mother," said Dounia, taking off her hat and cape. "God has sent this gentleman to our aid, though he has come from a drinking party. We can depend on him, I assure you. And all that he has done for Rodya...."

"Ah. Dounia, goodness knows whether he will come! How could I bring myself to leave Rodya?... And how different, how different I had fancied our meeting! How sullen he was, as though not pleased to see us...."

Tears came into her eyes.

"No, it's not that, mother. You didn't see, you were crying all the time. He is quite unhinged by serious illness--that's the reason."

"Ah, that illness! What will happen, what will happen? And how he talked to you, Dounia!" said the mother, looking timidly at her daughter, trying to read her thoughts and, already half consoled by Dounia's standing up for her brother, which meant that she had already forgiven him. "I am sure he will think better of it to-morrow," she added, probing her further.

"And I am sure that he will say the same to-morrow... about that," Avdotya Romanovna said finally. And, of course, there was no going beyond that, for this was a point which Pulcheria Alexandrovna was afraid to discuss. Dounia went up and kissed her mother. The latter warmly embraced her without speaking. Then she sat down to wait anxiously for Razumihin's return, timidly watching her daughter who walked up and down the room with her arms folded, lost in thought. This walking up and down when she was thinking was a habit of Avdotya Romanovna's and the mother was always afraid to break in on her daughter's mood at such moments.

Razumihin, of course, was ridiculous in his sudden drunken infatuation for Avdotya Romanovna. Yet apart from his eccentric condition, many people would have thought it justified if they had seen Avdotya Romanovna, especially at that moment when she was walking to and fro with folded arms, pensive and melancholy. Avdotya Romanovna was remarkably good-looking; she was tall, strikingly well-proportioned, strong and self-reliant--the latter quality was apparent in every gesture, though it did not in the least detract from the grace and softness of her movements. In face she resembled her brother, but she might be described as really beautiful. Her hair was dark brown, a little lighter than her brother's; there was a proud light in her almost black eyes and yet at times a look of extraordinary kindness. She was pale, but it was a healthy pallor; her face was radiant with freshness and vigour. Her mouth was rather small; the full red lower lip projected a little as did her chin; it was the only irregularity in her beautiful face, but it gave it a peculiarly individual and almost haughty expression. Her face was always more serious and thoughtful than gay; but how well smiles, how well youthful, lighthearted, irresponsible, laughter suited her face! It was natural enough that a warm, open, simple-hearted, honest giant like Razumihin, who had never seen anyone like her and was not quite sober at the time, should lose his head immediately. Besides, as chance would have it, he saw Dounia for the first time transfigured by her love for her brother and her joy at meeting him. Afterwards he saw her lower lip quiver with indignation at her brother's insolent, cruel and ungrateful words--and his fate was sealed.

He had spoken the truth, moreover, when he blurted out in his drunken talk on the stairs that Praskovya Pavlovna, Raskolnikov's eccentric landlady, would be jealous of Pulcheria Alexandrovna as well as of Avdotya Romanovna on his account. Although Pulcheria Alexandrovna was forty-three, her face still retained traces of her former beauty; she looked much younger than her age, indeed, which is almost always the case with women who retain serenity of spirit, sensitiveness and pure sincere warmth of heart to old age. We may add in parenthesis that to preserve all this is the only means of retaining beauty to old age. Her hair had begun to grow grey and thin, there had long been little crow's foot wrinkles round her eyes, her cheeks were hollow and sunken from anxiety and grief, and yet it was a handsome face. She was Dounia over again, twenty years older, but without the projecting underlip. Pulcheria Alexandrovna was emotional, but not sentimental, timid and yielding, but only to a certain point. She could give way and accept a great deal even of what was contrary to her convictions, but there was a certain barrier fixed by honesty, principle and the deepest convictions which nothing would induce her to cross.

Exactly twenty minutes after Razumihin's departure, there came two subdued but hurried knocks at the door: he had come back.

"I won't come in, I haven't time," he hastened to say when the door was opened. "He sleeps like a top, soundly, quietly, and God grant he may sleep ten hours. Nastasya's with him; I told her not to leave till I came. Now I am fetching Zossimov, he will report to you and then you'd better turn in; I can see you are too tired to do anything...."

And he ran off down the corridor.

"What a very competent and... devoted young man!" cried Pulcheria Alexandrovna exceedingly delighted.

"He seems a splendid person!" Avdotya Romanovna replied with some warmth, resuming her walk up and down the room.

It was nearly an hour later when they heard footsteps in the corridor and another knock at the door. Both women waited this time completely relying on Razumihin's promise; he actually had succeeded in bringing Zossimov. Zossimov had agreed at once to desert the drinking party to go to Raskolnikov's, but he came reluctantly and with the greatest suspicion to see the ladies, mistrusting Razumihin in his exhilarated condition. But his vanity was at once reassured and flattered; he saw that they were really expecting him as an oracle. He stayed just ten minutes and succeeded in completely convincing and comforting Pulcheria Alexandrovna. He spoke with marked sympathy, but with the reserve and extreme seriousness of a young doctor at an important consultation. He did not utter a word on any other subject and did not display the slightest desire to enter into more personal relations with the two ladies. Remarking at his first entrance the dazzling beauty of Avdotya Romanovna, he endeavoured not to notice her at all during his visit and addressed himself solely to Pulcheria Alexandrovna. All this gave him extraordinary inward satisfaction. He declared that he thought the invalid at this moment going on very satisfactorily. According to his observations the patient's illness was due partly to his unfortunate material surroundings during the last few months, but it had partly also a moral origin, "was, so to speak, the product of several material and moral influences, anxieties, apprehensions, troubles, certain ideas... and so on." Noticing stealthily that Avdotya Romanovna was following his words with close attention, Zossimov allowed himself to enlarge on this theme. On Pulcheria Alexandrovna's anxiously and timidly inquiring as to "some suspicion of insanity," he replied with a composed and candid smile that his words had been exaggerated; that certainly the patient had some fixed idea, something approaching a monomania--he, Zossimov, was now particularly studying this interesting branch of medicine--but that it must be recollected that until to-day the patient had been in delirium and... and that no doubt the presence of his family would have a favourable effect on his recovery and distract his mind, "if only all fresh shocks can be avoided," he added significantly. Then he got up, took leave with an impressive and affable bow, while blessings, warm gratitude, and entreaties were showered upon him, and Avdotya Romanovna spontaneously offered her hand to him. He went out exceedingly pleased with his visit and still more so with himself.

"We'll talk to-morrow; go to bed at once!" Razumihin said in conclusion, following Zossimov out. "I'll be with you to-morrow morning as early as possible with my report."

"That's a fetching little girl, Avdotya Romanovna," remarked Zossimov, almost licking his lips as they both came out into the street.

"Fetching? You said fetching?" roared Razumihin and he flew at Zossimov and seized him by the throat. "If you ever dare.... Do you understand? Do you understand?" he shouted, shaking him by the collar and squeezing him against the wall. "Do you hear?"

"Let me go, you drunken devil," said Zossimov, struggling and when he had let him go, he stared at him and went off into a sudden guffaw. Razumihin stood facing him in gloomy and earnest reflection.

“Of course, I am an ass,” he observed, sombre as a storm cloud, “but still... you are another.”

“No, brother, not at all such another. I am not dreaming of any folly.”

They walked along in silence and only when they were close to Raskolnikov’s lodgings, Razumihin broke the silence in considerable anxiety.

“Listen,” he said, “you’re a first-rate fellow, but among your other failings, you’re a loose fish, that I know, and a dirty one, too. You are a feeble, nervous wretch, and a mass of whims, you’re getting fat and lazy and can’t deny yourself anything--and I call that dirty because it leads one straight into the dirt. You’ve let yourself get so slack that I don’t know how it is you are still a good, even a devoted doctor. You--a doctor--sleep on a feather bed and get up at night to your patients! In another three or four years you won’t get up for your patients... But hang it all, that’s not the point!... You are going to spend to-night in the landlady’s flat here. (Hard work I’ve had to persuade her!) And I’ll be in the kitchen. So here’s a chance for you to get to know her better.... It’s not as you think! There’s not a trace of anything of the sort, brother...!”

“But I don’t think!”

“Here you have modesty, brother, silence, bashfulness, a savage virtue... and yet she’s sighing and melting like wax, simply melting! Save me from her, by all that’s unholy! She’s most prepossessing... I’ll repay you, I’ll do anything....”

Zossimov laughed more violently than ever.

“Well, you are smitten! But what am I to do with her?”

“It won’t be much trouble, I assure you. Talk any rot you like to her, as long as you sit by her and talk. You’re a doctor, too; try curing her of something. I swear you won’t regret it. She has a piano, and you know, I strum a little. I have a song there, a genuine Russian one: ‘I shed hot tears.’ She likes the genuine article--and well, it all began with that song; Now you’re a regular performer, a _maître_, a Rubinstein.... I assure you, you won’t regret it!”

“But have you made her some promise? Something signed? A promise of marriage, perhaps?”

“Nothing, nothing, absolutely nothing of the kind! Besides she is not that sort at all.... Tchebarov tried that....”

“Well then, drop her!”

“But I can’t drop her like that!”

“Why can’t you?”

“Well, I can’t, that’s all about it! There’s an element of attraction here, brother.”

“Then why have you fascinated her?”

“I haven’t fascinated her; perhaps I was fascinated myself in my folly. But she won’t care a straw whether it’s you or I, so long as somebody sits beside her, sighing.... I can’t explain the position, brother... look here, you are good at mathematics, and working at it now... begin teaching her the integral calculus; upon my soul, I’m not joking, I’m in earnest, it’ll be just the same to her. She will gaze at you and sigh for a whole year together. I talked to her once for two days at a time about the Prussian House of Lords (for one must talk of something)--she just sighed and perspired! And you mustn’t talk of love--she’s bashful to hysterics--but just let her see you can’t tear yourself away--that’s enough. It’s fearfully comfortable; you’re quite at home, you can read, sit, lie about, write. You may even venture on a kiss, if you’re careful.”

“But what do I want with her?”

“Ach, I can’t make you understand! You see, you are made for each other! I have often been reminded of you!... You’ll come to it in the end! So does it matter whether it’s sooner or later? There’s the feather-bed element here, brother--ach! and not only that! There’s an attraction here--here you have the end of the world, an anchorage, a quiet haven, the navel of the earth, the three fishes that are the foundation of the world, the essence of pancakes, of savoury fish-pies, of the evening samovar, of soft sighs and warm shawls, and hot stoves to sleep on--as snug as though you were dead, and yet you’re alive--the advantages of both at once! Well, hang it, brother, what stuff I’m talking, it’s bedtime! Listen. I sometimes wake up at night; so I’ll go in and look at him. But there’s no need, it’s all right. Don’t you worry yourself, yet if you like, you might just look in once, too. But if you notice anything--delirium or

fever--wake me at once. But there can't be...."

CHAPTER II

Razumihin waked up next morning at eight o'clock, troubled and serious. He found himself confronted with many new and unlooked-for perplexities. He had never expected that he would ever wake up feeling like that. He remembered every detail of the previous day and he knew that a perfectly novel experience had befallen him, that he had received an impression unlike anything he had known before. At the same time he recognised clearly that the dream which had fired his imagination was hopelessly unattainable--so unattainable that he felt positively ashamed of it, and he hastened to pass to the other more practical cares and difficulties bequeathed him by that "thrice accursed yesterday."

The most awful recollection of the previous day was the way he had shown himself "base and mean," not only because he had been drunk, but because he had taken advantage of the young girl's position to abuse her _fiancé_ in his stupid jealousy, knowing nothing of their mutual relations and obligations and next to nothing of the man himself. And what right had he to criticise him in that hasty and unguarded manner? Who had asked for his opinion? Was it thinkable that such a creature as Avdotya Romanovna would be marrying an unworthy man for money? So there must be something in him. The lodgings? But after all how could he know the character of the lodgings? He was furnishing a flat... Foo! how despicable it all was! And what justification was it that he was drunk? Such a stupid excuse was even more degrading! In wine is truth, and the truth had all come out, "that is, all the uncleanness of his coarse and envious heart"! And would such a dream ever be permissible to him, Razumihin? What was he beside such a girl--he, the drunken noisy braggart of last night? Was it possible to imagine so absurd and cynical a juxtaposition? Razumihin blushed desperately at the very idea and suddenly the recollection forced itself vividly upon him of how he had said last night on the stairs that the landlady would be jealous of Avdotya Romanovna... that was simply intolerable. He brought his fist down heavily on the kitchen stove, hurt his hand and sent one of the bricks flying.

"Of course," he muttered to himself a minute later with a feeling of self-abasement, "of course, all these infamies can never be wiped out or smoothed over... and so it's useless even to think of it, and I must go to them in silence and do my duty... in silence, too... and not ask forgiveness, and say nothing... for all is lost now!"

And yet as he dressed he examined his attire more carefully than usual. He hadn't another suit--if he had had, perhaps he wouldn't have put it on. "I would have made a point of not putting it on." But in any case he could not remain a cynic and a dirty sloven; he had no right to offend the feelings of others, especially when they were in need of his assistance and asking him to see them. He brushed his clothes carefully. His linen was always decent; in that respect he was especially clean.

He washed that morning scrupulously--he got some soap from Nastasya--he washed his hair, his neck and especially his hands. When it came to the question whether to shave his stubbly chin or not (Praskovya Pavlovna had capital razors that had been left by her late husband), the question was angrily answered in the negative. "Let it stay as it is! What if they think that I shaved on purpose to...? They certainly would think so! Not on any account!"

"And... the worst of it was he was so coarse, so dirty, he had the manners of a pothouse; and... and even admitting that he knew he had some of the essentials of a gentleman... what was there in that to be proud of? Everyone ought to be a gentleman and more than that... and all the same (he remembered) he, too, had done little things... not exactly dishonest, and yet.... And what thoughts he sometimes had; hm... and to set all that beside Avdotya Romanovna! Confound it! So be it! Well, he'd make a point then of being dirty, greasy, pothouse in his manners and he wouldn't care! He'd be worse!"

He was engaged in such monologues when Zossimov, who had spent the night in Praskovya Pavlovna's parlour, came in.

He was going home and was in a hurry to look at the invalid first. Razumihin informed him that Raskolnikov was sleeping like a dormouse. Zossimov gave orders that they shouldn't wake him and promised to see him again about eleven.

"If he is still at home," he added. "Damn it all! If one can't control one's patients, how is one to cure them? Do you know whether _he_ will go to them, or whether _they_ are coming here?"

"They are coming, I think," said Razumihin, understanding the object of the question, "and they will discuss their family affairs, no doubt. I'll be off. You, as the doctor, have more right to be here than I."

"But I am not a father confessor; I shall come and go away; I've plenty to do besides looking after them."

“One thing worries me,” interposed Razumihin, frowning. “On the way home I talked a lot of drunken nonsense to him... all sorts of things... and amongst them that you were afraid that he... might become insane.”

“You told the ladies so, too.”

“I know it was stupid! You may beat me if you like! Did you think so seriously?”

“That’s nonsense, I tell you, how could I think it seriously? You, yourself, described him as a monomaniac when you fetched me to him... and we added fuel to the fire yesterday, you did, that is, with your story about the painter; it was a nice conversation, when he was, perhaps, mad on that very point! If only I’d known what happened then at the police station and that some wretch... had insulted him with this suspicion! Hm... I would not have allowed that conversation yesterday. These monomaniacs will make a mountain out of a mole-hill... and see their fancies as solid realities.... As far as I remember, it was Zametov’s story that cleared up half the mystery, to my mind. Why, I know one case in which a hypochondriac, a man of forty, cut the throat of a little boy of eight, because he couldn’t endure the jokes he made every day at table! And in this case his rags, the insolent police officer, the fever and this suspicion! All that working upon a man half frantic with hypochondria, and with his morbid exceptional vanity! That may well have been the starting-point of illness. Well, bother it all!... And, by the way, that Zametov certainly is a nice fellow, but hm... he shouldn’t have told all that last night. He is an awful chatterbox!”

“But whom did he tell it to? You and me?”

“And Porfiry.”

“What does that matter?”

“And, by the way, have you any influence on them, his mother and sister? Tell them to be more careful with him to-day....”

“They’ll get on all right!” Razumihin answered reluctantly.

“Why is he so set against this Luzhin? A man with money and she doesn’t seem to dislike him... and they haven’t a farthing, I suppose? eh?”

“But what business is it of yours?” Razumihin cried with annoyance. “How can I tell whether they’ve a farthing? Ask them yourself and perhaps you’ll find out....”

“Foo! what an ass you are sometimes! Last night’s wine has not gone off yet.... Good-bye; thank your Praskovya Pavlovna from me for my night’s lodging. She locked herself in, made no reply to my _bonjour_ through the door; she was up at seven o’clock, the samovar was taken into her from the kitchen. I was not vouchsafed a personal interview....”

At nine o’clock precisely Razumihin reached the lodgings at Bakaleyev’s house. Both ladies were waiting for him with nervous impatience. They had risen at seven o’clock or earlier. He entered looking as black as night, bowed awkwardly and was at once furious with himself for it. He had reckoned without his host: Pulcheria Alexandrovna fairly rushed at him, seized him by both hands and was almost kissing them. He glanced timidly at Avdotya Romanovna, but her proud countenance wore at that moment an expression of such gratitude and friendliness, such complete and unlooked-for respect (in place of the sneering looks and ill-disguised contempt he had expected), that it threw him into greater confusion than if he had been met with abuse. Fortunately there was a subject for conversation, and he made haste to snatch at it.

Hearing that everything was going well and that Rodya had not yet waked, Pulcheria Alexandrovna declared that she was glad to hear it, because “she had something which it was very, very necessary to talk over beforehand.” Then followed an inquiry about breakfast and an invitation to have it with them; they had waited to have it with him. Avdotya Romanovna rang the bell: it was answered by a ragged dirty waiter, and they asked him to bring tea which was served at last, but in such a dirty and disorderly way that the ladies were ashamed. Razumihin vigorously attacked the lodgings, but, remembering Luzhin, stopped in embarrassment and was greatly relieved by Pulcheria Alexandrovna’s questions, which showered in a continual stream upon him.

He talked for three quarters of an hour, being constantly interrupted by their questions, and succeeded in describing to them all the most important facts he knew of the last year of Raskolnikov’s life, concluding with a circumstantial account of his illness. He omitted, however, many things, which were better omitted, including the scene at the police station with all its consequences. They listened eagerly to his story, and, when he thought he had finished and satisfied his listeners, he found that they considered he had hardly begun.

“Tell me, tell me! What do you think...? Excuse me, I still don’t know your name!” Pulcheria Alexandrovna put in hastily.

“Dmitri Prokofitch.”

“I should like very, very much to know, Dmitri Prokofitch... how he looks... on things in general now, that is, how can I explain, what are his likes and dislikes? Is he always so irritable? Tell me, if you can, what are his hopes and, so to say, his dreams? Under what influences is he now? In a word, I should like...”

“Ah, mother, how can he answer all that at once?” observed Dounia.

“Good heavens, I had not expected to find him in the least like this, Dmitri Prokofitch!”

“Naturally,” answered Razumihin. “I have no mother, but my uncle comes every year and almost every time he can scarcely recognise me, even in appearance, though he is a clever man; and your three years’ separation means a great deal. What am I to tell you? I have known Rodion for a year and a half; he is morose, gloomy, proud and haughty, and of late--and perhaps for a long time before--he has been suspicious and fanciful. He has a noble nature and a kind heart. He does not like showing his feelings and would rather do a cruel thing than open his heart freely. Sometimes, though, he is not at all morbid, but simply cold and inhumanly callous; it’s as though he were alternating between two characters. Sometimes he is fearfully reserved! He says he is so busy that everything is a hindrance, and yet he lies in bed doing nothing. He doesn’t jeer at things, not because he hasn’t the wit, but as though he hadn’t time to waste on such trifles. He never listens to what is said to him. He is never interested in what interests other people at any given moment. He thinks very highly of himself and perhaps he is right. Well, what more? I think your arrival will have a most beneficial influence upon him.”

“God grant it may,” cried Pulcheria Alexandrovna, distressed by Razumihin’s account of her Rodya.

And Razumihin ventured to look more boldly at Avdotya Romanovna at last. He glanced at her often while he was talking, but only for a moment and looked away again at once. Avdotya Romanovna sat at the table, listening attentively, then got up again and began walking to and fro with her arms folded and her lips compressed, occasionally putting in a question, without stopping her walk. She had the same habit of not listening to what was said. She was wearing a dress of thin dark stuff and she had a white transparent scarf round her neck. Razumihin soon detected signs of extreme poverty in their belongings. Had Avdotya Romanovna been dressed like a queen, he felt that he would not be afraid of her, but perhaps just because she was poorly dressed and that he noticed all the misery of her surroundings, his heart was filled with dread and he began to be afraid of every word he uttered, every gesture he made, which was very trying for a man who already felt diffident.

“You’ve told us a great deal that is interesting about my brother’s character... and have told it impartially. I am glad. I thought that you were too uncritically devoted to him,” observed Avdotya Romanovna with a smile. “I think you are right that he needs a woman’s care,” she added thoughtfully.

“I didn’t say so; but I daresay you are right, only...”

“What?”

“He loves no one and perhaps he never will,” Razumihin declared decisively.

“You mean he is not capable of love?”

“Do you know, Avdotya Romanovna, you are awfully like your brother, in everything, indeed!” he blurted out suddenly to his own surprise, but remembering at once what he had just before said of her brother, he turned as red as a crab and was overcome with confusion. Avdotya Romanovna couldn’t help laughing when she looked at him.

“You may both be mistaken about Rodya,” Pulcheria Alexandrovna remarked, slightly piqued. “I am not talking of our present difficulty, Dounia. What Pyotr Petrovitch writes in this letter and what you and I have supposed may be mistaken, but you can’t imagine, Dmitri Prokofitch, how moody and, so to say, capricious he is. I never could depend on what he would do when he was only fifteen. And I am sure that he might do something now that nobody else would think of doing... Well, for instance, do you know how a year and a half ago he astounded me and gave me a shock that nearly killed me, when he had the idea of marrying that girl--what was her name--his landlady’s daughter?”

“Did you hear about that affair?” asked Avdotya Romanovna.

“Do you suppose----” Pulcheria Alexandrovna continued warmly. “Do you suppose that my tears, my entreaties, my illness, my possible death from grief, our poverty would have made him pause? No, he would calmly have disregarded all obstacles. And yet it isn’t that he doesn’t love us!”

“He has never spoken a word of that affair to me,” Razumihin answered cautiously. “But I did hear something from Praskovya Pavlovna herself, though she is by no means a gossip. And what I heard certainly was rather strange.”

“And what did you hear?” both the ladies asked at once.

“Well, nothing very special. I only learned that the marriage, which only failed to take place through the girl’s death, was not at all to Praskovya Pavlovna’s liking. They say, too, the girl was not at all pretty, in fact I am told positively ugly... and such an invalid... and queer. But she seems to have had some good qualities. She must have had some good qualities or it’s quite inexplicable.... She had no money either and he wouldn’t have considered her money.... But it’s always difficult to judge in such matters.”

“I am sure she was a good girl,” Avdotya Romanovna observed briefly.

“God forgive me, I simply rejoiced at her death. Though I don’t know which of them would have caused most misery to the other--he to her or she to him,” Pulcheria Alexandrovna concluded. Then she began tentatively questioning him about the scene on the previous day with Luzhin, hesitating and continually glancing at Dounia, obviously to the latter’s annoyance. This incident more than all the rest evidently caused her uneasiness, even consternation. Razumihin described it in detail again, but this time he added his own conclusions: he openly blamed Raskolnikov for intentionally insulting Pyotr Petrovitch, not seeking to excuse him on the score of his illness.

“He had planned it before his illness,” he added.

“I think so, too,” Pulcheria Alexandrovna agreed with a dejected air. But she was very much surprised at hearing Razumihin express himself so carefully and even with a certain respect about Pyotr Petrovitch. Avdotya Romanovna, too, was struck by it.

“So this is your opinion of Pyotr Petrovitch?” Pulcheria Alexandrovna could not resist asking.

“I can have no other opinion of your daughter’s future husband,” Razumihin answered firmly and with warmth, “and I don’t say it simply from vulgar politeness, but because... simply because Avdotya Romanovna has of her own free will deigned to accept this man. If I spoke so rudely of him last night, it was because I was disgustingly drunk and... mad besides; yes, mad, crazy, I lost my head completely... and this morning I am ashamed of it.”

He crimsoned and ceased speaking. Avdotya Romanovna flushed, but did not break the silence. She had not uttered a word from the moment they began to speak of Luzhin.

Without her support Pulcheria Alexandrovna obviously did not know what to do. At last, faltering and continually glancing at her daughter, she confessed that she was exceedingly worried by one circumstance.

“You see, Dmitri Prokofitch,” she began. “I’ll be perfectly open with Dmitri Prokofitch, Dounia?”

“Of course, mother,” said Avdotya Romanovna emphatically.

“This is what it is,” she began in haste, as though the permission to speak of her trouble lifted a weight off her mind. “Very early this morning we got a note from Pyotr Petrovitch in reply to our letter announcing our arrival. He promised to meet us at the station, you know; instead of that he sent a servant to bring us the address of these lodgings and to show us the way; and he sent a message that he would be here himself this morning. But this morning this note came from him. You’d better read it yourself; there is one point in it which worries me very much... you will soon see what that is, and... tell me your candid opinion, Dmitri Prokofitch! You know Rodya’s character better than anyone and no one can advise us better than you can. Dounia, I must tell you, made her decision at once, but I still don’t feel sure how to act and I... I’ve been waiting for your opinion.”

Razumihin opened the note which was dated the previous evening and read as follows:

“Dear Madam, Pulcheria Alexandrovna, I have the honour to inform you that owing to unforeseen obstacles I was rendered unable to meet you at the railway station; I sent a very competent person with the same object in view. I likewise shall be deprived of the honour of an interview with you to-morrow morning by business in the Senate that does not admit of delay, and also that I may not

intrude on your family circle while you are meeting your son, and Avdotya Romanovna her brother. I shall have the honour of visiting you and paying you my respects at your lodgings not later than to-morrow evening at eight o'clock precisely, and herewith I venture to present my earnest and, I may add, imperative request that Rodion Romanovitch may not be present at our interview--as he offered me a gross and unprecedented affront on the occasion of my visit to him in his illness yesterday, and, moreover, since I desire from you personally an indispensable and circumstantial explanation upon a certain point, in regard to which I wish to learn your own interpretation. I have the honour to inform you, in anticipation, that if, in spite of my request, I meet Rodion Romanovitch, I shall be compelled to withdraw immediately and then you have only yourself to blame. I write on the assumption that Rodion Romanovitch who appeared so ill at my visit, suddenly recovered two hours later and so, being able to leave the house, may visit you also. I was confirmed in that belief by the testimony of my own eyes in the lodging of a drunken man who was run over and has since died, to whose daughter, a young woman of notorious behaviour, he gave twenty-five roubles on the pretext of the funeral, which gravely surprised me knowing what pains you were at to raise that sum. Herewith expressing my special respect to your estimable daughter, Avdotya Romanovna, I beg you to accept the respectful homage of

"Your humble servant,

"P. LUZHIN."

"What am I to do now, Dmitri Prokofitch?" began Pulcheria Alexandrovna, almost weeping. "How can I ask Rodya not to come? Yesterday he insisted so earnestly on our refusing Pyotr Petrovitch and now we are ordered not to receive Rodya! He will come on purpose if he knows, and... what will happen then?"

"Act on Avdotya Romanovna's decision," Razumihin answered calmly at once.

"Oh, dear me! She says... goodness knows what she says, she doesn't explain her object! She says that it would be best, at least, not that it would be best, but that it's absolutely necessary that Rodya should make a point of being here at eight o'clock and that they must meet.... I didn't want even to show him the letter, but to prevent him from coming by some stratagem with your help... because he is so irritable.... Besides I don't understand about that drunkard who died and that daughter, and how he could have given the daughter all the money... which..."

"Which cost you such sacrifice, mother," put in Avdotya Romanovna.

"He was not himself yesterday," Razumihin said thoughtfully, "if you only knew what he was up to in a restaurant yesterday, though there was sense in it too.... Hm! He did say something, as we were going home yesterday evening, about a dead man and a girl, but I didn't understand a word.... But last night, I myself..."

"The best thing, mother, will be for us to go to him ourselves and there I assure you we shall see at once what's to be done. Besides, it's getting late--good heavens, it's past ten," she cried looking at a splendid gold enamelled watch which hung round her neck on a thin Venetian chain, and looked entirely out of keeping with the rest of her dress. "A present from her _fiancé_," thought Razumihin.

"We must start, Dounia, we must start," her mother cried in a flutter. "He will be thinking we are still angry after yesterday, from our coming so late. Merciful heavens!"

While she said this she was hurriedly putting on her hat and mantle; Dounia, too, put on her things. Her gloves, as Razumihin noticed, were not merely shabby but had holes in them, and yet this evident poverty gave the two ladies an air of special dignity, which is always found in people who know how to wear poor clothes. Razumihin looked reverently at Dounia and felt proud of escorting her. "The queen who mended her stockings in prison," he thought, "must have looked then every inch a queen and even more a queen than at sumptuous banquets and levées."

"My God!" exclaimed Pulcheria Alexandrovna, "little did I think that I should ever fear seeing my son, my darling, darling Rodya! I am afraid, Dmitri Prokofitch," she added, glancing at him timidly.

"Don't be afraid, mother," said Dounia, kissing her, "better have faith in him."

"Oh, dear, I have faith in him, but I haven't slept all night," exclaimed the poor woman.

They came out into the street.

“Do you know, Dounia, when I dozed a little this morning I dreamed of Marfa Petrovna... she was all in white... she came up to me, took my hand, and shook her head at me, but so sternly as though she were blaming me.... Is that a good omen? Oh, dear me! You don’t know, Dmitri Prokofitch, that Marfa Petrovna’s dead!”

“No, I didn’t know; who is Marfa Petrovna?”

“She died suddenly; and only fancy...”

“Afterwards, mamma,” put in Dounia. “He doesn’t know who Marfa Petrovna is.”

“Ah, you don’t know? And I was thinking that you knew all about us. Forgive me, Dmitri Prokofitch, I don’t know what I am thinking about these last few days. I look upon you really as a providence for us, and so I took it for granted that you knew all about us. I look on you as a relation.... Don’t be angry with me for saying so. Dear me, what’s the matter with your right hand? Have you knocked it?”

“Yes, I bruised it,” muttered Razumihin overjoyed.

“I sometimes speak too much from the heart, so that Dounia finds fault with me.... But, dear me, what a cupboard he lives in! I wonder whether he is awake? Does this woman, his landlady, consider it a room? Listen, you say he does not like to show his feelings, so perhaps I shall annoy him with my... weaknesses? Do advise me, Dmitri Prokofitch, how am I to treat him? I feel quite distracted, you know.”

“Don’t question him too much about anything if you see him frown; don’t ask him too much about his health; he doesn’t like that.”

“Ah, Dmitri Prokofitch, how hard it is to be a mother! But here are the stairs.... What an awful staircase!”

“Mother, you are quite pale, don’t distress yourself, darling,” said Dounia caressing her, then with flashing eyes she added: “He ought to be happy at seeing you, and you are tormenting yourself so.”

“Wait, I’ll peep in and see whether he has waked up.”

The ladies slowly followed Razumihin, who went on before, and when they reached the landlady’s door on the fourth storey, they noticed that her door was a tiny crack open and that two keen black eyes were watching them from the darkness within. When their eyes met, the door was suddenly shut with such a slam that Pulcheria Alexandrovna almost cried out.

CHAPTER III

“He is well, quite well!” Zossimov cried cheerfully as they entered.

He had come in ten minutes earlier and was sitting in the same place as before, on the sofa. Raskolnikov was sitting in the opposite corner, fully dressed and carefully washed and combed, as he had not been for some time past. The room was immediately crowded, yet Nastasya managed to follow the visitors in and stayed to listen.

Raskolnikov really was almost well, as compared with his condition the day before, but he was still pale, listless, and sombre. He looked like a wounded man or one who has undergone some terrible physical suffering. His brows were knitted, his lips compressed, his eyes feverish. He spoke little and reluctantly, as though performing a duty, and there was a restlessness in his movements.

He only wanted a sling on his arm or a bandage on his finger to complete the impression of a man with a painful abscess or a broken arm. The pale, sombre face lighted up for a moment when his mother and sister entered, but this only gave it a look of more intense suffering, in place of its listless dejection. The light soon died away, but the look of suffering remained, and Zossimov, watching and studying his patient with all the zest of a young doctor beginning to practise, noticed in him no joy at the arrival of his mother and sister, but a sort of bitter, hidden determination to bear another hour or two of inevitable torture. He saw later that almost every word of the following conversation seemed to touch on some sore place and irritate it. But at the same time he marvelled at the power of controlling himself and hiding his feelings in a patient who the previous day had, like a monomaniac, fallen into a frenzy at the slightest word.

“Yes, I see myself now that I am almost well,” said Raskolnikov, giving his mother and sister a kiss of welcome which made Pulcheria Alexandrovna radiant at once. “And I don’t say this _as I did yesterday_,” he said, addressing Razumihin, with a friendly

pressure of his hand.

“Yes, indeed, I am quite surprised at him to-day,” began Zossimov, much delighted at the ladies’ entrance, for he had not succeeded in keeping up a conversation with his patient for ten minutes. “In another three or four days, if he goes on like this, he will be just as before, that is, as he was a month ago, or two... or perhaps even three. This has been coming on for a long while.... eh? Confess, now, that it has been perhaps your own fault?” he added, with a tentative smile, as though still afraid of irritating him.

“It is very possible,” answered Raskolnikov coldly.

“I should say, too,” continued Zossimov with zest, “that your complete recovery depends solely on yourself. Now that one can talk to you, I should like to impress upon you that it is essential to avoid the elementary, so to speak, fundamental causes tending to produce your morbid condition: in that case you will be cured, if not, it will go from bad to worse. These fundamental causes I don’t know, but they must be known to you. You are an intelligent man, and must have observed yourself, of course. I fancy the first stage of your derangement coincides with your leaving the university. You must not be left without occupation, and so, work and a definite aim set before you might, I fancy, be very beneficial.”

“Yes, yes; you are perfectly right.... I will make haste and return to the university: and then everything will go smoothly....”

Zossimov, who had begun his sage advice partly to make an effect before the ladies, was certainly somewhat mystified, when, glancing at his patient, he observed unmistakable mockery on his face. This lasted an instant, however. Pulcheria Alexandrovna began at once thanking Zossimov, especially for his visit to their lodging the previous night.

“What! he saw you last night?” Raskolnikov asked, as though startled. “Then you have not slept either after your journey.”

“Ach, Rodya, that was only till two o’clock. Dounia and I never go to bed before two at home.”

“I don’t know how to thank him either,” Raskolnikov went on, suddenly frowning and looking down. “Setting aside the question of payment--forgive me for referring to it (he turned to Zossimov)--I really don’t know what I have done to deserve such special attention from you! I simply don’t understand it... and... and... it weighs upon me, indeed, because I don’t understand it. I tell you so candidly.”

“Don’t be irritated.” Zossimov forced himself to laugh. “Assume that you are my first patient--well--we fellows just beginning to practise love our first patients as if they were our children, and some almost fall in love with them. And, of course, I am not rich in patients.”

“I say nothing about him,” added Raskolnikov, pointing to Razumihin, “though he has had nothing from me either but insult and trouble.”

“What nonsense he is talking! Why, you are in a sentimental mood to-day, are you?” shouted Razumihin.

If he had had more penetration he would have seen that there was no trace of sentimentality in him, but something indeed quite the opposite. But Avdotya Romanovna noticed it. She was intently and uneasily watching her brother.

“As for you, mother, I don’t dare to speak,” he went on, as though repeating a lesson learned by heart. “It is only to-day that I have been able to realise a little how distressed you must have been here yesterday, waiting for me to come back.”

When he had said this, he suddenly held out his hand to his sister, smiling without a word. But in this smile there was a flash of real unfeigned feeling. Dounia caught it at once, and warmly pressed his hand, overjoyed and thankful. It was the first time he had addressed her since their dispute the previous day. The mother’s face lighted up with ecstatic happiness at the sight of this conclusive unspoken reconciliation. “Yes, that is what I love him for,” Razumihin, exaggerating it all, muttered to himself, with a vigorous turn in his chair. “He has these movements.”

“And how well he does it all,” the mother was thinking to herself. “What generous impulses he has, and how simply, how delicately he put an end to all the misunderstanding with his sister--simply by holding out his hand at the right minute and looking at her like that.... And what fine eyes he has, and how fine his whole face is!... He is even better looking than Dounia.... But, good heavens, what a suit--how terribly he’s dressed!... Vasya, the messenger boy in Afanasy Ivanitch’s shop, is better dressed! I could rush at him and hug him... weep over him--but I am afraid.... Oh, dear, he’s so strange! He’s talking kindly, but I’m afraid! Why, what am I afraid of?...”

“Oh, Rodya, you wouldn’t believe,” she began suddenly, in haste to answer his words to her, “how unhappy Dounia and I were yesterday! Now that it’s all over and done with and we are quite happy again--I can tell you. Fancy, we ran here almost straight from the train to embrace you and that woman--ah, here she is! Good morning, Nastasya!... She told us at once that you were lying in a high fever and had just run away from the doctor in delirium, and they were looking for you in the streets. You can’t imagine how we felt! I couldn’t help thinking of the tragic end of Lieutenant Potanchikov, a friend of your father’s--you can’t remember him, Rodya--who ran out in the same way in a high fever and fell into the well in the court-yard and they couldn’t pull him out till next day. Of course, we exaggerated things. We were on the point of rushing to find Pyotr Petrovitch to ask him to help.... Because we were alone, utterly alone,” she said plaintively and stopped short, suddenly, recollecting it was still somewhat dangerous to speak of Pyotr Petrovitch, although “we are quite happy again.”

“Yes, yes.... Of course it’s very annoying....” Raskolnikov muttered in reply, but with such a preoccupied and inattentive air that Dounia gazed at him in perplexity.

“What else was it I wanted to say?” He went on trying to recollect. “Oh, yes; mother, and you too, Dounia, please don’t think that I didn’t mean to come and see you to-day and was waiting for you to come first.”

“What are you saying, Rodya?” cried Pulcheria Alexandrovna. She, too, was surprised.

“Is he answering us as a duty?” Dounia wondered. “Is he being reconciled and asking forgiveness as though he were performing a rite or repeating a lesson?”

“I’ve only just waked up, and wanted to go to you, but was delayed owing to my clothes; I forgot yesterday to ask her... Nastasya... to wash out the blood... I’ve only just dressed.”

“Blood! What blood?” Pulcheria Alexandrovna asked in alarm.

“Oh, nothing--don’t be uneasy. It was when I was wandering about yesterday, rather delirious, I chanced upon a man who had been run over... a clerk...”

“Delirious? But you remember everything!” Razumihin interrupted.

“That’s true,” Raskolnikov answered with special carefulness. “I remember everything even to the slightest detail, and yet--why I did that and went there and said that, I can’t clearly explain now.”

“A familiar phenomenon,” interposed Zossimov, “actions are sometimes performed in a masterly and most cunning way, while the direction of the actions is deranged and dependent on various morbid impressions--it’s like a dream.”

“Perhaps it’s a good thing really that he should think me almost a madman,” thought Raskolnikov.

“Why, people in perfect health act in the same way too,” observed Dounia, looking uneasily at Zossimov.

“There is some truth in your observation,” the latter replied. “In that sense we are certainly all not infrequently like madmen, but with the slight difference that the deranged are somewhat madder, for we must draw a line. A normal man, it is true, hardly exists. Among dozens--perhaps hundreds of thousands--hardly one is to be met with.”

At the word “madman,” carelessly dropped by Zossimov in his chatter on his favourite subject, everyone frowned.

Raskolnikov sat seeming not to pay attention, plunged in thought with a strange smile on his pale lips. He was still meditating on something.

“Well, what about the man who was run over? I interrupted you!” Razumihin cried hastily.

“What?” Raskolnikov seemed to wake up. “Oh... I got spattered with blood helping to carry him to his lodging. By the way, mamma, I did an unpardonable thing yesterday. I was literally out of my mind. I gave away all the money you sent me... to his wife for the funeral. She’s a widow now, in consumption, a poor creature... three little children, starving... nothing in the house... there’s a daughter, too... perhaps you’d have given it yourself if you’d seen them. But I had no right to do it I admit, especially as I knew how you needed the money yourself. To help others one must have the right to do it, or else _Crevez, chiens, si vous n’êtes pas contents_.” He laughed, “That’s right, isn’t it, Dounia?”

“No, it’s not,” answered Dounia firmly.

“Bah! you, too, have ideals,” he muttered, looking at her almost with hatred, and smiling sarcastically. “I ought to have considered that.... Well, that’s praiseworthy, and it’s better for you... and if you reach a line you won’t overstep, you will be unhappy... and if you overstep it, maybe you will be still unhappier.... But all that’s nonsense,” he added irritably, vexed at being carried away. “I only meant to say that I beg your forgiveness, mother,” he concluded, shortly and abruptly.

“That’s enough, Rodya, I am sure that everything you do is very good,” said his mother, delighted.

“Don’t be too sure,” he answered, twisting his mouth into a smile.

A silence followed. There was a certain constraint in all this conversation, and in the silence, and in the reconciliation, and in the forgiveness, and all were feeling it.

“It is as though they were afraid of me,” Raskolnikov was thinking to himself, looking askance at his mother and sister. Pulcheria Alexandrovna was indeed growing more timid the longer she kept silent.

“Yet in their absence I seemed to love them so much,” flashed through his mind.

“Do you know, Rodya, Marfa Petrovna is dead,” Pulcheria Alexandrovna suddenly blurted out.

“What Marfa Petrovna?”

“Oh, mercy on us--Marfa Petrovna Svidrigaïlov. I wrote you so much about her.”

“A-a-h! Yes, I remember.... So she’s dead! Oh, really?” he roused himself suddenly, as if waking up. “What did she die of?”

“Only imagine, quite suddenly,” Pulcheria Alexandrovna answered hurriedly, encouraged by his curiosity. “On the very day I was sending you that letter! Would you believe it, that awful man seems to have been the cause of her death. They say he beat her dreadfully.”

“Why, were they on such bad terms?” he asked, addressing his sister.

“Not at all. Quite the contrary indeed. With her, he was always very patient, considerate even. In fact, all those seven years of their married life he gave way to her, too much so indeed, in many cases. All of a sudden he seems to have lost patience.”

“Then he could not have been so awful if he controlled himself for seven years? You seem to be defending him, Dounia?”

“No, no, he’s an awful man! I can imagine nothing more awful!” Dounia answered, almost with a shudder, knitting her brows, and sinking into thought.

“That had happened in the morning,” Pulcheria Alexandrovna went on hurriedly. “And directly afterwards she ordered the horses to be harnessed to drive to the town immediately after dinner. She always used to drive to the town in such cases. She ate a very good dinner, I am told....”

“After the beating?”

“That was always her... habit; and immediately after dinner, so as not to be late in starting, she went to the bath-house.... You see, she was undergoing some treatment with baths. They have a cold spring there, and she used to bathe in it regularly every day, and no sooner had she got into the water when she suddenly had a stroke!”

“I should think so,” said Zossimov.

“And did he beat her badly?”

“What does that matter!” put in Dounia.

“H’m! But I don’t know why you want to tell us such gossip, mother,” said Raskolnikov irritably, as it were in spite of himself.

“Ah, my dear, I don’t know what to talk about,” broke from Pulcheria Alexandrovna.

“Why, are you all afraid of me?” he asked, with a constrained smile.

“That’s certainly true,” said Dounia, looking directly and sternly at her brother. “Mother was crossing herself with terror as she came up the stairs.”

His face worked, as though in convulsion.

“Ach, what are you saying, Dounia! Don’t be angry, please, Rodya.... Why did you say that, Dounia?” Pulcheria Alexandrovna began, overwhelmed--“You see, coming here, I was dreaming all the way, in the train, how we should meet, how we should talk over everything together.... And I was so happy, I did not notice the journey! But what am I saying? I am happy now.... You should not, Dounia.... I am happy now--simply in seeing you, Rodya....”

“Hush, mother,” he muttered in confusion, not looking at her, but pressing her hand. “We shall have time to speak freely of everything!”

As he said this, he was suddenly overwhelmed with confusion and turned pale. Again that awful sensation he had known of late passed with deadly chill over his soul. Again it became suddenly plain and perceptible to him that he had just told a fearful lie--that he would never now be able to speak freely of everything--that he would never again be able to _speak_ of anything to anyone. The anguish of this thought was such that for a moment he almost forgot himself. He got up from his seat, and not looking at anyone walked towards the door.

“What are you about?” cried Razumihin, clutching him by the arm.

He sat down again, and began looking about him, in silence. They were all looking at him in perplexity.

“But what are you all so dull for?” he shouted, suddenly and quite unexpectedly. “Do say something! What’s the use of sitting like this? Come, do speak. Let us talk.... We meet together and sit in silence.... Come, anything!”

“Thank God; I was afraid the same thing as yesterday was beginning again,” said Pulcheria Alexandrovna, crossing herself.

“What is the matter, Rodya?” asked Avdotya Romanovna, distrustfully.

“Oh, nothing! I remembered something,” he answered, and suddenly laughed.

“Well, if you remembered something; that’s all right!... I was beginning to think...” muttered Zossimov, getting up from the sofa. “It is time for me to be off. I will look in again perhaps... if I can...” He made his bows, and went out.

“What an excellent man!” observed Pulcheria Alexandrovna.

“Yes, excellent, splendid, well-educated, intelligent,” Raskolnikov began, suddenly speaking with surprising rapidity, and a liveliness he had not shown till then. “I can’t remember where I met him before my illness.... I believe I have met him somewhere----... And this is a good man, too,” he nodded at Razumihin. “Do you like him, Dounia?” he asked her; and suddenly, for some unknown reason, laughed.

“Very much,” answered Dounia.

“Foo!--what a pig you are!” Razumihin protested, blushing in terrible confusion, and he got up from his chair. Pulcheria Alexandrovna smiled faintly, but Raskolnikov laughed aloud.

“Where are you off to?”

“I must go.”

“You need not at all. Stay. Zossimov has gone, so you must. Don’t go. What’s the time? Is it twelve o’clock? What a pretty watch you have got, Dounia. But why are you all silent again? I do all the talking.”

“It was a present from Marfa Petrovna,” answered Dounia.

“And a very expensive one!” added Pulcheria Alexandrovna.

“A-ah! What a big one! Hardly like a lady’s.”

“I like that sort,” said Dounia.

“So it is not a present from her _fiancé_,” thought Razumihin, and was unreasonably delighted.

“I thought it was Luzhin’s present,” observed Raskolnikov.

“No, he has not made Dounia any presents yet.”

“A-ah! And do you remember, mother, I was in love and wanted to get married?” he said suddenly, looking at his mother, who was disconcerted by the sudden change of subject and the way he spoke of it.

“Oh, yes, my dear.”

Pulcheria Alexandrovna exchanged glances with Dounia and Razumihin.

“H’m, yes. What shall I tell you? I don’t remember much indeed. She was such a sickly girl,” he went on, growing dreamy and looking down again. “Quite an invalid. She was fond of giving alms to the poor, and was always dreaming of a nunnery, and once she burst into tears when she began talking to me about it. Yes, yes, I remember. I remember very well. She was an ugly little thing. I really don’t know what drew me to her then--I think it was because she was always ill. If she had been lame or hunchback, I believe I should have liked her better still,” he smiled dreamily. “Yes, it was a sort of spring delirium.”

“No, it was not only spring delirium,” said Dounia, with warm feeling.

He fixed a strained intent look on his sister, but did not hear or did not understand her words. Then, completely lost in thought, he got up, went up to his mother, kissed her, went back to his place and sat down.

“You love her even now?” said Pulcheria Alexandrovna, touched.

“Her? Now? Oh, yes.... You ask about her? No... that’s all now, as it were, in another world... and so long ago. And indeed everything happening here seems somehow far away.” He looked attentively at them. “You, now... I seem to be looking at you from a thousand miles away... but, goodness knows why we are talking of that! And what’s the use of asking about it?” he added with annoyance, and biting his nails, fell into dreamy silence again.

“What a wretched lodging you have, Rodya! It’s like a tomb,” said Pulcheria Alexandrovna, suddenly breaking the oppressive silence. “I am sure it’s quite half through your lodging you have become so melancholy.”

“My lodging,” he answered, listlessly. “Yes, the lodging had a great deal to do with it.... I thought that, too.... If only you knew, though, what a strange thing you said just now, mother,” he said, laughing strangely.

A little more, and their companionship, this mother and this sister, with him after three years’ absence, this intimate tone of conversation, in face of the utter impossibility of really speaking about anything, would have been beyond his power of endurance. But there was one urgent matter which must be settled one way or the other that day--so he had decided when he woke. Now he was glad to remember it, as a means of escape.

“Listen, Dounia,” he began, gravely and drily, “of course I beg your pardon for yesterday, but I consider it my duty to tell you again that I do not withdraw from my chief point. It is me or Luzhin. If I am a scoundrel, you must not be. One is enough. If you marry Luzhin, I cease at once to look on you as a sister.”

“Rodya, Rodya! It is the same as yesterday again,” Pulcheria Alexandrovna cried, mournfully. “And why do you call yourself a scoundrel? I can’t bear it. You said the same yesterday.”

“Brother,” Dounia answered firmly and with the same dryness. “In all this there is a mistake on your part. I thought it over at night, and found out the mistake. It is all because you seem to fancy I am sacrificing myself to someone and for someone. That is not the case at all. I am simply marrying for my own sake, because things are hard for me. Though, of course, I shall be glad if I succeed in being useful to my family. But that is not the chief motive for my decision....”

“She is lying,” he thought to himself, biting his nails vindictively. “Proud creature! She won’t admit she wants to do it out of charity! Too haughty! Oh, base characters! They even love as though they hate.... Oh, how I... hate them all!”

“In fact,” continued Dounia, “I am marrying Pyotr Petrovitch because of two evils I choose the less. I intend to do honestly all he expects of me, so I am not deceiving him.... Why did you smile just now?” She, too, flushed, and there was a gleam of anger in her eyes.

“All?” he asked, with a malignant grin.

“Within certain limits. Both the manner and form of Pyotr Petrovitch’s courtship showed me at once what he wanted. He may, of course, think too well of himself, but I hope he esteems me, too.... Why are you laughing again?”

“And why are you blushing again? You are lying, sister. You are intentionally lying, simply from feminine obstinacy, simply to hold your own against me.... You cannot respect Luzhin. I have seen him and talked with him. So you are selling yourself for money, and so in any case you are acting basely, and I am glad at least that you can blush for it.”

“It is not true. I am not lying,” cried Dounia, losing her composure. “I would not marry him if I were not convinced that he esteems me and thinks highly of me. I would not marry him if I were not firmly convinced that I can respect him. Fortunately, I can have convincing proof of it this very day... and such a marriage is not a vileness, as you say! And even if you were right, if I really had determined on a vile action, is it not merciless on your part to speak to me like that? Why do you demand of me a heroism that perhaps you have not either? It is despotism; it is tyranny. If I ruin anyone, it is only myself.... I am not committing a murder. Why do you look at me like that? Why are you so pale? Rodya, darling, what’s the matter?”

“Good heavens! You have made him faint,” cried Pulcheria Alexandrovna.

“No, no, nonsense! It’s nothing. A little giddiness--not fainting. You have fainting on the brain. H’m, yes, what was I saying? Oh, yes. In what way will you get convincing proof to-day that you can respect him, and that he... esteems you, as you said. I think you said to-day?”

“Mother, show Rodya Pyotr Petrovitch’s letter,” said Dounia.

With trembling hands, Pulcheria Alexandrovna gave him the letter. He took it with great interest, but, before opening it, he suddenly looked with a sort of wonder at Dounia.

“It is strange,” he said, slowly, as though struck by a new idea. “What am I making such a fuss for? What is it all about? Marry whom you like!”

He said this as though to himself, but said it aloud, and looked for some time at his sister, as though puzzled. He opened the letter at last, still with the same look of strange wonder on his face. Then, slowly and attentively, he began reading, and read it through twice. Pulcheria Alexandrovna showed marked anxiety, and all indeed expected something particular.

“What surprises me,” he began, after a short pause, handing the letter to his mother, but not addressing anyone in particular, “is that he is a business man, a lawyer, and his conversation is pretentious indeed, and yet he writes such an uneducated letter.”

They all started. They had expected something quite different.

“But they all write like that, you know,” Razumihin observed, abruptly.

“Have you read it?”

“Yes.”

“We showed him, Rodya. We... consulted him just now,” Pulcheria Alexandrovna began, embarrassed.

“That’s just the jargon of the courts,” Razumihin put in. “Legal documents are written like that to this day.”

“Legal? Yes, it’s just legal--business language--not so very uneducated, and not quite educated--business language!”

“Pyotr Petrovitch makes no secret of the fact that he had a cheap education, he is proud indeed of having made his own way,” Avdotya Romanovna observed, somewhat offended by her brother’s tone.

“Well, if he’s proud of it, he has reason, I don’t deny it. You seem to be offended, sister, at my making only such a frivolous criticism on the letter, and to think that I speak of such trifling matters on purpose to annoy you. It is quite the contrary, an observation apropos of the style occurred to me that is by no means irrelevant as things stand. There is one expression, ‘blame yourselves’, put in very significantly and plainly, and there is besides a threat that he will go away at once if I am present. That threat to go away is equivalent to a threat to abandon you both if you are disobedient, and to abandon you now after summoning you to Petersburg. Well, what do you think? Can one resent such an expression from Luzhin, as we should if he (he pointed to Razumihin) had written

it, or Zossimov, or one of us?”

“N-no,” answered Dounia, with more animation. “I saw clearly that it was too naïvely expressed, and that perhaps he simply has no skill in writing... that is a true criticism, brother. I did not expect, indeed...”

“It is expressed in legal style, and sounds coarser than perhaps he intended. But I must disillusion you a little. There is one expression in the letter, one slander about me, and rather a contemptible one. I gave the money last night to the widow, a woman in consumption, crushed with trouble, and not ‘on the pretext of the funeral,’ but simply to pay for the funeral, and not to the daughter--a young woman, as he writes, of notorious behaviour (whom I saw last night for the first time in my life)--but to the widow. In all this I see a too hasty desire to slander me and to raise dissension between us. It is expressed again in legal jargon, that is to say, with a too obvious display of the aim, and with a very naïve eagerness. He is a man of intelligence, but to act sensibly, intelligence is not enough. It all shows the man and... I don’t think he has a great esteem for you. I tell you this simply to warn you, because I sincerely wish for your good...”

Dounia did not reply. Her resolution had been taken. She was only awaiting the evening.

“Then what is your decision, Rodya?” asked Pulcheria Alexandrovna, who was more uneasy than ever at the sudden, new businesslike tone of his talk.

“What decision?”

“You see Pyotr Petrovitch writes that you are not to be with us this evening, and that he will go away if you come. So will you... come?”

“That, of course, is not for me to decide, but for you first, if you are not offended by such a request; and secondly, by Dounia, if she, too, is not offended. I will do what you think best,” he added, drily.

“Dounia has already decided, and I fully agree with her,” Pulcheria Alexandrovna hastened to declare.

“I decided to ask you, Rodya, to urge you not to fail to be with us at this interview,” said Dounia. “Will you come?”

“Yes.”

“I will ask you, too, to be with us at eight o’clock,” she said, addressing Razumihin. “Mother, I am inviting him, too.”

“Quite right, Dounia. Well, since you have decided,” added Pulcheria Alexandrovna, “so be it. I shall feel easier myself. I do not like concealment and deception. Better let us have the whole truth.... Pyotr Petrovitch may be angry or not, now!”

CHAPTER IV

At that moment the door was softly opened, and a young girl walked into the room, looking timidly about her. Everyone turned towards her with surprise and curiosity. At first sight, Raskolnikov did not recognise her. It was Sofya Semyonovna Marmeladov. He had seen her yesterday for the first time, but at such a moment, in such surroundings and in such a dress, that his memory retained a very different image of her. Now she was a modestly and poorly-dressed young girl, very young, indeed, almost like a child, with a modest and refined manner, with a candid but somewhat frightened-looking face. She was wearing a very plain indoor dress, and had on a shabby old-fashioned hat, but she still carried a parasol. Unexpectedly finding the room full of people, she was not so much embarrassed as completely overwhelmed with shyness, like a little child. She was even about to retreat. “Oh... it’s you!” said Raskolnikov, extremely astonished, and he, too, was confused. He at once recollected that his mother and sister knew through Luzhin’s letter of “some young woman of notorious behaviour.” He had only just been protesting against Luzhin’s calumny and declaring that he had seen the girl last night for the first time, and suddenly she had walked in. He remembered, too, that he had not protested against the expression “of notorious behaviour.” All this passed vaguely and fleetingly through his brain, but looking at her more intently, he saw that the humiliated creature was so humiliated that he felt suddenly sorry for her. When she made a movement to retreat in terror, it sent a pang to his heart.

“I did not expect you,” he said, hurriedly, with a look that made her stop. “Please sit down. You come, no doubt, from Katerina Ivanovna. Allow me--not there. Sit here....”

At Sonia's entrance, Razumihin, who had been sitting on one of Raskolnikov's three chairs, close to the door, got up to allow her to enter. Raskolnikov had at first shown her the place on the sofa where Zossimov had been sitting, but feeling that the sofa which served him as a bed, was too _familiar_ a place, he hurriedly motioned her to Razumihin's chair.

"You sit here," he said to Razumihin, putting him on the sofa.

Sonia sat down, almost shaking with terror, and looked timidly at the two ladies. It was evidently almost inconceivable to herself that she could sit down beside them. At the thought of it, she was so frightened that she hurriedly got up again, and in utter confusion addressed Raskolnikov.

"I... I... have come for one minute. Forgive me for disturbing you," she began falteringly. "I come from Katerina Ivanovna, and she had no one to send. Katerina Ivanovna told me to beg you... to be at the service... in the morning... at Mitrofanievsky... and then... to us... to her... to do her the honour... she told me to beg you..." Sonia stammered and ceased speaking.

"I will try, certainly, most certainly," answered Raskolnikov. He, too, stood up, and he, too, faltered and could not finish his sentence. "Please sit down," he said, suddenly. "I want to talk to you. You are perhaps in a hurry, but please, be so kind, spare me two minutes," and he drew up a chair for her.

Sonia sat down again, and again timidly she took a hurried, frightened look at the two ladies, and dropped her eyes. Raskolnikov's pale face flushed, a shudder passed over him, his eyes glowed.

"Mother," he said, firmly and insistently, "this is Sofya Semyonovna Marmeladov, the daughter of that unfortunate Mr. Marmeladov, who was run over yesterday before my eyes, and of whom I was just telling you."

Pulcheria Alexandrovna glanced at Sonia, and slightly screwed up her eyes. In spite of her embarrassment before Rodya's urgent and challenging look, she could not deny herself that satisfaction. Dounia gazed gravely and intently into the poor girl's face, and scrutinised her with perplexity. Sonia, hearing herself introduced, tried to raise her eyes again, but was more embarrassed than ever.

"I wanted to ask you," said Raskolnikov, hastily, "how things were arranged yesterday. You were not worried by the police, for instance?"

"No, that was all right... it was too evident, the cause of death... they did not worry us... only the lodgers are angry."

"Why?"

"At the body's remaining so long. You see it is hot now. So that, to-day, they will carry it to the cemetery, into the chapel, until to-morrow. At first Katerina Ivanovna was unwilling, but now she sees herself that it's necessary..."

"To-day, then?"

"She begs you to do us the honour to be in the church to-morrow for the service, and then to be present at the funeral lunch."

"She is giving a funeral lunch?"

"Yes... just a little.... She told me to thank you very much for helping us yesterday. But for you, we should have had nothing for the funeral."

All at once her lips and chin began trembling, but, with an effort, she controlled herself, looking down again.

During the conversation, Raskolnikov watched her carefully. She had a thin, very thin, pale little face, rather irregular and angular, with a sharp little nose and chin. She could not have been called pretty, but her blue eyes were so clear, and when they lighted up, there was such a kindliness and simplicity in her expression that one could not help being attracted. Her face, and her whole figure indeed, had another peculiar characteristic. In spite of her eighteen years, she looked almost a little girl--almost a child. And in some of her gestures, this childishness seemed almost absurd.

"But has Katerina Ivanovna been able to manage with such small means? Does she even mean to have a funeral lunch?" Raskolnikov asked, persistently keeping up the conversation.

“The coffin will be plain, of course... and everything will be plain, so it won’t cost much. Katerina Ivanovna and I have reckoned it all out, so that there will be enough left... and Katerina Ivanovna was very anxious it should be so. You know one can’t... it’s a comfort to her... she is like that, you know....”

“I understand, I understand... of course... why do you look at my room like that? My mother has just said it is like a tomb.”

“You gave us everything yesterday,” Sonia said suddenly, in reply, in a loud rapid whisper; and again she looked down in confusion. Her lips and chin were trembling once more. She had been struck at once by Raskolnikov’s poor surroundings, and now these words broke out spontaneously. A silence followed. There was a light in Dounia’s eyes, and even Pulcheria Alexandrovna looked kindly at Sonia.

“Rodya,” she said, getting up, “we shall have dinner together, of course. Come, Dounia.... And you, Rodya, had better go for a little walk, and then rest and lie down before you come to see us.... I am afraid we have exhausted you....”

“Yes, yes, I’ll come,” he answered, getting up fussily. “But I have something to see to.”

“But surely you will have dinner together?” cried Razumihin, looking in surprise at Raskolnikov. “What do you mean?”

“Yes, yes, I am coming... of course, of course! And you stay a minute. You do not want him just now, do you, mother? Or perhaps I am taking him from you?”

“Oh, no, no. And will you, Dmitri Prokofitch, do us the favour of dining with us?”

“Please do,” added Dounia.

Razumihin bowed, positively radiant. For one moment, they were all strangely embarrassed.

“Good-bye, Rodya, that is till we meet. I do not like saying good-bye. Good-bye, Nastasya. Ah, I have said good-bye again.”

Pulcheria Alexandrovna meant to greet Sonia, too; but it somehow failed to come off, and she went in a flutter out of the room.

But Avdotya Romanovna seemed to await her turn, and following her mother out, gave Sonia an attentive, courteous bow. Sonia, in confusion, gave a hurried, frightened curtsy. There was a look of poignant discomfort in her face, as though Avdotya Romanovna’s courtesy and attention were oppressive and painful to her.

“Dounia, good-bye,” called Raskolnikov, in the passage. “Give me your hand.”

“Why, I did give it to you. Have you forgotten?” said Dounia, turning warmly and awkwardly to him.

“Never mind, give it to me again.” And he squeezed her fingers warmly.

Dounia smiled, flushed, pulled her hand away, and went off quite happy.

“Come, that’s capital,” he said to Sonia, going back and looking brightly at her. “God give peace to the dead, the living have still to live. That is right, isn’t it?”

Sonia looked surprised at the sudden brightness of his face. He looked at her for some moments in silence. The whole history of the dead father floated before his memory in those moments....

*****

“Heavens, Dounia,” Pulcheria Alexandrovna began, as soon as they were in the street, “I really feel relieved myself at coming away--more at ease. How little did I think yesterday in the train that I could ever be glad of that.”

“I tell you again, mother, he is still very ill. Don’t you see it? Perhaps worrying about us upset him. We must be patient, and much, much can be forgiven.”

“Well, you were not very patient!” Pulcheria Alexandrovna caught her up, hotly and jealously. “Do you know, Dounia, I was looking at you two. You are the very portrait of him, and not so much in face as in soul. You are both melancholy, both morose and hot-tempered, both haughty and both generous.... Surely he can’t be an egoist, Dounia. Eh? When I think of what is in store for us this evening, my heart sinks!”

“Don’t be uneasy, mother. What must be, will be.”

“Dounia, only think what a position we are in! What if Pyotr Petrovitch breaks it off?” poor Pulcheria Alexandrovna blurted out, incautiously.

“He won’t be worth much if he does,” answered Dounia, sharply and contemptuously.

“We did well to come away,” Pulcheria Alexandrovna hurriedly broke in. “He was in a hurry about some business or other. If he gets out and has a breath of air... it is fearfully close in his room.... But where is one to get a breath of air here? The very streets here feel like shut-up rooms. Good heavens! what a town!... stay... this side... they will crush you--carrying something. Why, it is a piano they have got, I declare... how they push!... I am very much afraid of that young woman, too.”

“What young woman, mother?”

“Why, that Sofya Semyonovna, who was there just now.”

“Why?”

“I have a presentiment, Dounia. Well, you may believe it or not, but as soon as she came in, that very minute, I felt that she was the chief cause of the trouble....”

“Nothing of the sort!” cried Dounia, in vexation. “What nonsense, with your presentiments, mother! He only made her acquaintance the evening before, and he did not know her when she came in.”

“Well, you will see.... She worries me; but you will see, you will see! I was so frightened. She was gazing at me with those eyes. I could scarcely sit still in my chair when he began introducing her, do you remember? It seems so strange, but Pyotr Petrovitch writes like that about her, and he introduces her to us--to you! So he must think a great deal of her.”

“People will write anything. We were talked about and written about, too. Have you forgotten? I am sure that she is a good girl, and that it is all nonsense.”

“God grant it may be!”

“And Pyotr Petrovitch is a contemptible slanderer,” Dounia snapped out, suddenly.

Pulcheria Alexandrovna was crushed; the conversation was not resumed.

*****

“I will tell you what I want with you,” said Raskolnikov, drawing Razumihin to the window.

“Then I will tell Katerina Ivanovna that you are coming,” Sonia said hurriedly, preparing to depart.

“One minute, Sofya Semyonovna. We have no secrets. You are not in our way. I want to have another word or two with you. Listen!” he turned suddenly to Razumihin again. “You know that... what’s his name... Porfiry Petrovitch?”

“I should think so! He is a relation. Why?” added the latter, with interest.

“Is not he managing that case... you know, about that murder?... You were speaking about it yesterday.”

“Yes... well?” Razumihin’s eyes opened wide.

“He was inquiring for people who had pawned things, and I have some pledges there, too--trifles--a ring my sister gave me as a keepsake when I left home, and my father’s silver watch--they are only worth five or six roubles altogether... but I value them. So what am I to do now? I do not want to lose the things, especially the watch. I was quaking just now, for fear mother would ask to look at it, when we spoke of Dounia’s watch. It is the only thing of father’s left us. She would be ill if it were lost. You know what women are. So tell me what to do. I know I ought to have given notice at the police station, but would it not be better to go straight to Porfiry? Eh? What do you think? The matter might be settled more quickly. You see, mother may ask for it before dinner.”

“Certainly not to the police station. Certainly to Porfiry,” Razumihin shouted in extraordinary excitement. “Well, how glad I am. Let us go at once. It is a couple of steps. We shall be sure to find him.”

“Very well, let us go.”

“And he will be very, very glad to make your acquaintance. I have often talked to him of you at different times. I was speaking of you yesterday. Let us go. So you knew the old woman? So that’s it! It is all turning out splendidly.... Oh, yes, Sofya Ivanovna...”

“Sofya Semyonovna,” corrected Raskolnikov. “Sofya Semyonovna, this is my friend Razumihin, and he is a good man.”

“If you have to go now,” Sonia was beginning, not looking at Razumihin at all, and still more embarrassed.

“Let us go,” decided Raskolnikov. “I will come to you to-day, Sofya Semyonovna. Only tell me where you live.”

He was not exactly ill at ease, but seemed hurried, and avoided her eyes. Sonia gave her address, and flushed as she did so. They all went out together.

“Don’t you lock up?” asked Razumihin, following him on to the stairs.

“Never,” answered Raskolnikov. “I have been meaning to buy a lock for these two years. People are happy who have no need of locks,” he said, laughing, to Sonia. They stood still in the gateway.

“Do you go to the right, Sofya Semyonovna? How did you find me, by the way?” he added, as though he wanted to say something quite different. He wanted to look at her soft clear eyes, but this was not easy.

“Why, you gave your address to Polenka yesterday.”

“Polenka? Oh, yes; Polenka, that is the little girl. She is your sister? Did I give her the address?”

“Why, had you forgotten?”

“No, I remember.”

“I had heard my father speak of you... only I did not know your name, and he did not know it. And now I came... and as I had learnt your name, I asked to-day, ‘Where does Mr. Raskolnikov live?’ I did not know you had only a room too.... Good-bye, I will tell Katerina Ivanovna.”

She was extremely glad to escape at last; she went away looking down, hurrying to get out of sight as soon as possible, to walk the twenty steps to the turning on the right and to be at last alone, and then moving rapidly along, looking at no one, noticing nothing, to think, to remember, to meditate on every word, every detail. Never, never had she felt anything like this. Dimly and unconsciously a whole new world was opening before her. She remembered suddenly that Raskolnikov meant to come to her that day, perhaps at once!

“Only not to-day, please, not to-day!” she kept muttering with a sinking heart, as though entreating someone, like a frightened child. “Mercy! to me... to that room... he will see... oh, dear!”

She was not capable at that instant of noticing an unknown gentleman who was watching her and following at her heels. He had accompanied her from the gateway. At the moment when Razumihin, Raskolnikov, and she stood still at parting on the pavement, this gentleman, who was just passing, started on hearing Sonia’s words: “and I asked where Mr. Raskolnikov lived?” He turned a rapid but attentive look upon all three, especially upon Raskolnikov, to whom Sonia was speaking; then looked back and noted the house. All this was done in an instant as he passed, and trying not to betray his interest, he walked on more slowly as though waiting for something. He was waiting for Sonia; he saw that they were parting, and that Sonia was going home.

“Home? Where? I’ve seen that face somewhere,” he thought. “I must find out.”

At the turning he crossed over, looked round, and saw Sonia coming the same way, noticing nothing. She turned the corner. He followed her on the other side. After about fifty paces he crossed over again, overtook her and kept two or three yards behind her.

He was a man about fifty, rather tall and thickly set, with broad high shoulders which made him look as though he stooped a little. He wore good and fashionable clothes, and looked like a gentleman of position. He carried a handsome cane, which he tapped on the pavement at each step; his gloves were spotless. He had a broad, rather pleasant face with high cheek-bones and a fresh colour, not often seen in Petersburg. His flaxen hair was still abundant, and only touched here and there with grey, and his thick square beard was even lighter than his hair. His eyes were blue and had a cold and thoughtful look; his lips were crimson. He was

a remarkedly well-preserved man and looked much younger than his years.

When Sonia came out on the canal bank, they were the only two persons on the pavement. He observed her dreaminess and preoccupation. On reaching the house where she lodged, Sonia turned in at the gate; he followed her, seeming rather surprised. In the courtyard she turned to the right corner. “Bah!” muttered the unknown gentleman, and mounted the stairs behind her. Only then Sonia noticed him. She reached the third storey, turned down the passage, and rang at No. 9. On the door was inscribed in chalk, “Kapernaumov, Tailor.” “Bah!” the stranger repeated again, wondering at the strange coincidence, and he rang next door, at No. 8. The doors were two or three yards apart.

“You lodge at Kapernaumov’s,” he said, looking at Sonia and laughing. “He altered a waistcoat for me yesterday. I am staying close here at Madame Resslich’s. How odd!” Sonia looked at him attentively.

“We are neighbours,” he went on gaily. “I only came to town the day before yesterday. Good-bye for the present.”

Sonia made no reply; the door opened and she slipped in. She felt for some reason ashamed and uneasy.

*****

On the way to Porfiry’s, Razumihin was obviously excited.

“That’s capital, brother,” he repeated several times, “and I am glad! I am glad!”

“What are you glad about?” Raskolnikov thought to himself.

“I didn’t know that you pledged things at the old woman’s, too. And... was it long ago? I mean, was it long since you were there?”

“What a simple-hearted fool he is!”

“When was it?” Raskolnikov stopped still to recollect. “Two or three days before her death it must have been. But I am not going to redeem the things now,” he put in with a sort of hurried and conspicuous solicitude about the things. “I’ve not more than a silver rouble left... after last night’s accursed delirium!”

He laid special emphasis on the delirium.

“Yes, yes,” Razumihin hastened to agree--with what was not clear. “Then that’s why you... were stuck... partly... you know in your delirium you were continually mentioning some rings or chains! Yes, yes... that’s clear, it’s all clear now.”

“Hullo! How that idea must have got about among them. Here this man will go to the stake for me, and I find him delighted at having it _cleared up_ why I spoke of rings in my delirium! What a hold the idea must have on all of them!”

“Shall we find him?” he asked suddenly.

“Oh, yes,” Razumihin answered quickly. “He is a nice fellow, you will see, brother. Rather clumsy, that is to say, he is a man of polished manners, but I mean clumsy in a different sense. He is an intelligent fellow, very much so indeed, but he has his own range of ideas.... He is incredulous, sceptical, cynical... he likes to impose on people, or rather to make fun of them. His is the old, circumstantial method.... But he understands his work... thoroughly.... Last year he cleared up a case of murder in which the police had hardly a clue. He is very, very anxious to make your acquaintance!”

“On what grounds is he so anxious?”

“Oh, it’s not exactly... you see, since you’ve been ill I happen to have mentioned you several times.... So, when he heard about you... about your being a law student and not able to finish your studies, he said, ‘What a pity!’ And so I concluded... from everything together, not only that; yesterday Zametov... you know, Rodya, I talked some nonsense on the way home to you yesterday, when I was drunk... I am afraid, brother, of your exaggerating it, you see.”

“What? That they think I am a madman? Maybe they are right,” he said with a constrained smile.

“Yes, yes.... That is, pooh, no!... But all that I said (and there was something else too) it was all nonsense, drunken nonsense.”

“But why are you apologising? I am so sick of it all!” Raskolnikov cried with exaggerated irritability. It was partly assumed, however.

“I know, I know, I understand. Believe me, I understand. One’s ashamed to speak of it.”

“If you are ashamed, then don’t speak of it.”

Both were silent. Razumihin was more than ecstatic and Raskolnikov perceived it with repulsion. He was alarmed, too, by what Razumihin had just said about Porfiry.

“I shall have to pull a long face with him too,” he thought, with a beating heart, and he turned white, “and do it naturally, too. But the most natural thing would be to do nothing at all. Carefully do nothing at all! No, _carefully_ would not be natural again.... Oh, well, we shall see how it turns out.... We shall see... directly. Is it a good thing to go or not? The butterfly flies to the light. My heart is beating, that’s what’s bad!”

“In this grey house,” said Razumihin.

“The most important thing, does Porfiry know that I was at the old hag’s flat yesterday... and asked about the blood? I must find that out instantly, as soon as I go in, find out from his face; otherwise... I’ll find out, if it’s my ruin.”

“I say, brother,” he said suddenly, addressing Razumihin, with a sly smile, “I have been noticing all day that you seem to be curiously excited. Isn’t it so?”

“Excited? Not a bit of it,” said Razumihin, stung to the quick.

“Yes, brother, I assure you it’s noticeable. Why, you sat on your chair in a way you never do sit, on the edge somehow, and you seemed to be writhing all the time. You kept jumping up for nothing. One moment you were angry, and the next your face looked like a sweetmeat. You even blushed; especially when you were invited to dinner, you blushed awfully.”

“Nothing of the sort, nonsense! What do you mean?”

“But why are you wriggling out of it, like a schoolboy? By Jove, there he’s blushing again.”

“What a pig you are!”

“But why are you so shamefaced about it? Romeo! Stay, I’ll tell of you to-day. Ha-ha-ha! I’ll make mother laugh, and someone else, too...”

“Listen, listen, listen, this is serious.... What next, you fiend!” Razumihin was utterly overwhelmed, turning cold with horror. “What will you tell them? Come, brother... foo! what a pig you are!”

“You are like a summer rose. And if only you knew how it suits you; a Romeo over six foot high! And how you’ve washed to-day--you cleaned your nails, I declare. Eh? That’s something unheard of! Why, I do believe you’ve got pomatum on your hair! Bend down.”

“Pig!”

Raskolnikov laughed as though he could not restrain himself. So laughing, they entered Porfiry Petrovitch’s flat. This is what Raskolnikov wanted: from within they could be heard laughing as they came in, still guffawing in the passage.

“Not a word here or I’ll... brain you!” Razumihin whispered furiously, seizing Raskolnikov by the shoulder.

CHAPTER V

Raskolnikov was already entering the room. He came in looking as though he had the utmost difficulty not to burst out laughing again. Behind him Razumihin strode in gawky and awkward, shamefaced and red as a peony, with an utterly crestfallen and ferocious expression. His face and whole figure really were ridiculous at that moment and amply justified Raskolnikov’s laughter. Raskolnikov, not waiting for an introduction, bowed to Porfiry Petrovitch, who stood in the middle of the room looking inquiringly at them. He held out his hand and shook hands, still apparently making desperate efforts to subdue his mirth and utter a few words to introduce himself. But he had no sooner succeeded in assuming a serious air and muttering something when he suddenly glanced again as though accidentally at Razumihin, and could no longer control himself: his stifled laughter broke out the more irresistibly the more he tried to restrain it. The extraordinary ferocity with which Razumihin received this “spontaneous” mirth gave the whole scene the appearance of most genuine fun and naturalness. Razumihin strengthened this impression as though on purpose.

“Fool! You fiend,” he roared, waving his arm which at once struck a little round table with an empty tea-glass on it. Everything was sent flying and crashing.

“But why break chairs, gentlemen? You know it’s a loss to the Crown,” Porfiry Petrovitch quoted gaily.

Raskolnikov was still laughing, with his hand in Porfiry Petrovitch’s, but anxious not to overdo it, awaited the right moment to put a natural end to it. Razumihin, completely put to confusion by upsetting the table and smashing the glass, gazed gloomily at the fragments, cursed and turned sharply to the window where he stood looking out with his back to the company with a fiercely scowling countenance, seeing nothing. Porfiry Petrovitch laughed and was ready to go on laughing, but obviously looked for explanations. Zametov had been sitting in the corner, but he rose at the visitors’ entrance and was standing in expectation with a smile on his lips, though he looked with surprise and even it seemed incredulity at the whole scene and at Raskolnikov with a certain embarrassment. Zametov’s unexpected presence struck Raskolnikov unpleasantly.

“I’ve got to think of that,” he thought. “Excuse me, please,” he began, affecting extreme embarrassment. “Raskolnikov.”

“Not at all, very pleasant to see you... and how pleasantly you’ve come in.... Why, won’t he even say good-morning?” Porfiry Petrovitch nodded at Razumihin.

“Upon my honour I don’t know why he is in such a rage with me. I only told him as we came along that he was like Romeo... and proved it. And that was all, I think!”

“Pig!” ejaculated Razumihin, without turning round.

“There must have been very grave grounds for it, if he is so furious at the word,” Porfiry laughed.

“Oh, you sharp lawyer!... Damn you all!” snapped Razumihin, and suddenly bursting out laughing himself, he went up to Porfiry with a more cheerful face as though nothing had happened. “That’ll do! We are all fools. To come to business. This is my friend Rodion Romanovitch Raskolnikov; in the first place he has heard of you and wants to make your acquaintance, and secondly, he has a little matter of business with you. Bah! Zametov, what brought you here? Have you met before? Have you known each other long?”

“What does this mean?” thought Raskolnikov uneasily.

Zametov seemed taken aback, but not very much so.

“Why, it was at your rooms we met yesterday,” he said easily.

“Then I have been spared the trouble. All last week he was begging me to introduce him to you. Porfiry and you have sniffed each other out without me. Where is your tobacco?”

Porfiry Petrovitch was wearing a dressing-gown, very clean linen, and trodden-down slippers. He was a man of about five and thirty, short, stout even to corpulence, and clean shaven. He wore his hair cut short and had a large round head, particularly prominent at the back. His soft, round, rather snub-nosed face was of a sickly yellowish colour, but had a vigorous and rather ironical expression. It would have been good-natured except for a look in the eyes, which shone with a watery, mawkish light under almost white, blinking eyelashes. The expression of those eyes was strangely out of keeping with his somewhat womanish figure, and gave it something far more serious than could be guessed at first sight.

As soon as Porfiry Petrovitch heard that his visitor had a little matter of business with him, he begged him to sit down on the sofa and sat down himself on the other end, waiting for him to explain his business, with that careful and over-serious attention which is at once oppressive and embarrassing, especially to a stranger, and especially if what you are discussing is in your opinion of far too little importance for such exceptional solemnity. But in brief and coherent phrases Raskolnikov explained his business clearly and exactly, and was so well satisfied with himself that he even succeeded in taking a good look at Porfiry. Porfiry Petrovitch did not once take his eyes off him. Razumihin, sitting opposite at the same table, listened warmly and impatiently, looking from one to the other every moment with rather excessive interest.

“Fool,” Raskolnikov swore to himself.

“You have to give information to the police,” Porfiry replied, with a most businesslike air, “that having learnt of this incident, that is of the murder, you beg to inform the lawyer in charge of the case that such and such things belong to you, and that you desire to

redeem them... or... but they will write to you."

"That's just the point, that at the present moment," Raskolnikov tried his utmost to feign embarrassment, "I am not quite in funds... and even this trifling sum is beyond me... I only wanted, you see, for the present to declare that the things are mine, and that when I have money...."

"That's no matter," answered Porfiry Petrovitch, receiving his explanation of his pecuniary position coldly, "but you can, if you prefer, write straight to me, to say, that having been informed of the matter, and claiming such and such as your property, you beg..."

"On an ordinary sheet of paper?" Raskolnikov interrupted eagerly, again interested in the financial side of the question.

"Oh, the most ordinary," and suddenly Porfiry Petrovitch looked with obvious irony at him, screwing up his eyes and, as it were, winking at him. But perhaps it was Raskolnikov's fancy, for it all lasted but a moment. There was certainly something of the sort, Raskolnikov could have sworn he winked at him, goodness knows why.

"He knows," flashed through his mind like lightning.

"Forgive my troubling you about such trifles," he went on, a little disconcerted, "the things are only worth five roubles, but I prize them particularly for the sake of those from whom they came to me, and I must confess that I was alarmed when I heard..."

"That's why you were so much struck when I mentioned to Zossimov that Porfiry was inquiring for everyone who had pledges!" Razumihin put in with obvious intention.

This was really unbearable. Raskolnikov could not help glancing at him with a flash of vindictive anger in his black eyes, but immediately recollected himself.

"You seem to be jeering at me, brother?" he said to him, with a well-feigned irritability. "I dare say I do seem to you absurdly anxious about such trash; but you mustn't think me selfish or grasping for that, and these two things may be anything but trash in my eyes. I told you just now that the silver watch, though it's not worth a cent, is the only thing left us of my father's. You may laugh at me, but my mother is here," he turned suddenly to Porfiry, "and if she knew," he turned again hurriedly to Razumihin, carefully making his voice tremble, "that the watch was lost, she would be in despair! You know what women are!"

"Not a bit of it! I didn't mean that at all! Quite the contrary!" shouted Razumihin distressed.

"Was it right? Was it natural? Did I overdo it?" Raskolnikov asked himself in a tremor. "Why did I say that about women?"

"Oh, your mother is with you?" Porfiry Petrovitch inquired.

"Yes."

"When did she come?"

"Last night."

Porfiry paused as though reflecting.

"Your things would not in any case be lost," he went on calmly and coldly. "I have been expecting you here for some time."

And as though that was a matter of no importance, he carefully offered the ash-tray to Razumihin, who was ruthlessly scattering cigarette ash over the carpet. Raskolnikov shuddered, but Porfiry did not seem to be looking at him, and was still concerned with Razumihin's cigarette.

"What? Expecting him? Why, did you know that he had pledges _there_?" cried Razumihin.

Porfiry Petrovitch addressed himself to Raskolnikov.

"Your things, the ring and the watch, were wrapped up together, and on the paper your name was legibly written in pencil, together with the date on which you left them with her..."

“How observant you are!” Raskolnikov smiled awkwardly, doing his very utmost to look him straight in the face, but he failed, and suddenly added:

“I say that because I suppose there were a great many pledges... that it must be difficult to remember them all.... But you remember them all so clearly, and... and...”

“Stupid! Feeble!” he thought. “Why did I add that?”

“But we know all who had pledges, and you are the only one who hasn’t come forward,” Porfiry answered with hardly perceptible irony.

“I haven’t been quite well.”

“I heard that too. I heard, indeed, that you were in great distress about something. You look pale still.”

“I am not pale at all.... No, I am quite well,” Raskolnikov snapped out rudely and angrily, completely changing his tone. His anger was mounting, he could not repress it. “And in my anger I shall betray myself,” flashed through his mind again. “Why are they torturing me?”

“Not quite well!” Razumihin caught him up. “What next! He was unconscious and delirious all yesterday. Would you believe, Porfiry, as soon as our backs were turned, he dressed, though he could hardly stand, and gave us the slip and went off on a spree somewhere till midnight, delirious all the time! Would you believe it! Extraordinary!”

“Really delirious? You don’t say so!” Porfiry shook his head in a womanish way.

“Nonsense! Don’t you believe it! But you don’t believe it anyway,” Raskolnikov let slip in his anger. But Porfiry Petrovitch did not seem to catch those strange words.

“But how could you have gone out if you hadn’t been delirious?” Razumihin got hot suddenly. “What did you go out for? What was the object of it? And why on the sly? Were you in your senses when you did it? Now that all danger is over I can speak plainly.”

“I was awfully sick of them yesterday.” Raskolnikov addressed Porfiry suddenly with a smile of insolent defiance, “I ran away from them to take lodgings where they wouldn’t find me, and took a lot of money with me. Mr. Zametov there saw it. I say, Mr. Zametov, was I sensible or delirious yesterday; settle our dispute.”

He could have strangled Zametov at that moment, so hateful were his expression and his silence to him.

“In my opinion you talked sensibly and even artfully, but you were extremely irritable,” Zametov pronounced dryly.

“And Nikodim Fomitch was telling me to-day,” put in Porfiry Petrovitch, “that he met you very late last night in the lodging of a man who had been run over.”

“And there,” said Razumihin, “weren’t you mad then? You gave your last penny to the widow for the funeral. If you wanted to help, give fifteen or twenty even, but keep three roubles for yourself at least, but he flung away all the twenty-five at once!”

“Maybe I found a treasure somewhere and you know nothing of it? So that’s why I was liberal yesterday.... Mr. Zametov knows I’ve found a treasure! Excuse us, please, for disturbing you for half an hour with such trivialities,” he said, turning to Porfiry Petrovitch, with trembling lips. “We are boring you, aren’t we?”

“Oh no, quite the contrary, quite the contrary! If only you knew how you interest me! It’s interesting to look on and listen... and I am really glad you have come forward at last.”

“But you might give us some tea! My throat’s dry,” cried Razumihin.

“Capital idea! Perhaps we will all keep you company. Wouldn’t you like... something more essential before tea?”

“Get along with you!”

Porfiry Petrovitch went out to order tea.

Raskolnikov’s thoughts were in a whirl. He was in terrible exasperation.

“The worst of it is they don’t disguise it; they don’t care to stand on ceremony! And how if you didn’t know me at all, did you come to talk to Nikodim Fomitch about me? So they don’t care to hide that they are tracking me like a pack of dogs. They simply spit in my face.” He was shaking with rage. “Come, strike me openly, don’t play with me like a cat with a mouse. It’s hardly civil, Porfiry Petrovitch, but perhaps I won’t allow it! I shall get up and throw the whole truth in your ugly faces, and you’ll see how I despise you.” He could hardly breathe. “And what if it’s only my fancy? What if I am mistaken, and through inexperience I get angry and don’t keep up my nasty part? Perhaps it’s all unintentional. All their phrases are the usual ones, but there is something about them.... It all might be said, but there is something. Why did he say bluntly, ‘With her’? Why did Zametov add that I spoke artfully? Why do they speak in that tone? Yes, the tone.... Razumihin is sitting here, why does he see nothing? That innocent blockhead never does see anything! Feverish again! Did Porfiry wink at me just now? Of course it’s nonsense! What could he wink for? Are they trying to upset my nerves or are they teasing me? Either it’s ill fancy or they know! Even Zametov is rude.... Is Zametov rude? Zametov has changed his mind. I foresaw he would change his mind! He is at home here, while it’s my first visit. Porfiry does not consider him a visitor; sits with his back to him. They’re as thick as thieves, no doubt, over me! Not a doubt they were talking about me before we came. Do they know about the flat? If only they’d make haste! When I said that I ran away to take a flat he let it pass.... I put that in cleverly about a flat, it may be of use afterwards.... Delirious, indeed... ha-ha-ha! He knows all about last night! He didn’t know of my mother’s arrival! The hag had written the date on in pencil! You are wrong, you won’t catch me! There are no facts... it’s all supposition! You produce facts! The flat even isn’t a fact but delirium. I know what to say to them.... Do they know about the flat? I won’t go without finding out. What did I come for? But my being angry now, maybe is a fact! Fool, how irritable I am! Perhaps that’s right; to play the invalid.... He is feeling me. He will try to catch me. Why did I come?”

All this flashed like lightning through his mind.

Porfiry Petrovitch returned quickly. He became suddenly more jovial.

“Your party yesterday, brother, has left my head rather.... And I am out of sorts altogether,” he began in quite a different tone, laughing to Razumihin.

“Was it interesting? I left you yesterday at the most interesting point. Who got the best of it?”

“Oh, no one, of course. They got on to everlasting questions, floated off into space.”

“Only fancy, Rodya, what we got on to yesterday. Whether there is such a thing as crime. I told you that we talked our heads off.”

“What is there strange? It’s an everyday social question,” Raskolnikov answered casually.

“The question wasn’t put quite like that,” observed Porfiry.

“Not quite, that’s true,” Razumihin agreed at once, getting warm and hurried as usual. “Listen, Rodion, and tell us your opinion, I want to hear it. I was fighting tooth and nail with them and wanted you to help me. I told them you were coming.... It began with the socialist doctrine. You know their doctrine; crime is a protest against the abnormality of the social organisation and nothing more, and nothing more; no other causes admitted!...”

“You are wrong there,” cried Porfiry Petrovitch; he was noticeably animated and kept laughing as he looked at Razumihin, which made him more excited than ever.

“Nothing is admitted,” Razumihin interrupted with heat.

“I am not wrong. I’ll show you their pamphlets. Everything with them is ‘the influence of environment,’ and nothing else. Their favourite phrase! From which it follows that, if society is normally organised, all crime will cease at once, since there will be nothing to protest against and all men will become righteous in one instant. Human nature is not taken into account, it is excluded, it’s not supposed to exist! They don’t recognise that humanity, developing by a historical living process, will become at last a normal society, but they believe that a social system that has come out of some mathematical brain is going to organise all humanity at once and make it just and sinless in an instant, quicker than any living process! That’s why they instinctively dislike history, ‘nothing but ugliness and stupidity in it,’ and they explain it all as stupidity! That’s why they so dislike the _living_ process of life; they don’t want a _living soul_! The living soul demands life, the soul won’t obey the rules of mechanics, the soul is an object of suspicion, the soul is retrograde! But what they want though it smells of death and can be made of India-rubber, at least is not alive, has no will, is servile and won’t revolt! And it comes in the end to their reducing everything to the building of walls and the planning of rooms and passages in a phalanstery! The phalanstery is ready, indeed, but your human nature is not ready for the phalanstery--it wants life, it

hasn’t completed its vital process, it’s too soon for the graveyard! You can’t skip over nature by logic. Logic presupposes three possibilities, but there are millions! Cut away a million, and reduce it all to the question of comfort! That’s the easiest solution of the problem! It’s seductively clear and you musn’t think about it. That’s the great thing, you mustn’t think! The whole secret of life in two pages of print!”

“Now he is off, beating the drum! Catch hold of him, do!” laughed Porfiry. “Can you imagine,” he turned to Raskolnikov, “six people holding forth like that last night, in one room, with punch as a preliminary! No, brother, you are wrong, environment accounts for a great deal in crime; I can assure you of that.”

“Oh, I know it does, but just tell me: a man of forty violates a child of ten; was it environment drove him to it?”

“Well, strictly speaking, it did,” Porfiry observed with noteworthy gravity; “a crime of that nature may be very well ascribed to the influence of environment.”

Razumihin was almost in a frenzy. “Oh, if you like,” he roared. “I’ll prove to you that your white eyelashes may very well be ascribed to the Church of Ivan the Great’s being two hundred and fifty feet high, and I will prove it clearly, exactly, progressively, and even with a Liberal tendency! I undertake to! Will you bet on it?”

“Done! Let’s hear, please, how he will prove it!”

“He is always humbugging, confound him,” cried Razumihin, jumping up and gesticulating. “What’s the use of talking to you? He does all that on purpose; you don’t know him, Rodion! He took their side yesterday, simply to make fools of them. And the things he said yesterday! And they were delighted! He can keep it up for a fortnight together. Last year he persuaded us that he was going into a monastery: he stuck to it for two months. Not long ago he took it into his head to declare he was going to get married, that he had everything ready for the wedding. He ordered new clothes indeed. We all began to congratulate him. There was no bride, nothing, all pure fantasy!”

“Ah, you are wrong! I got the clothes before. It was the new clothes in fact that made me think of taking you in.”

“Are you such a good dissembler?” Raskolnikov asked carelessly.

“You wouldn’t have supposed it, eh? Wait a bit, I shall take you in, too. Ha-ha-ha! No, I’ll tell you the truth. All these questions about crime, environment, children, recall to my mind an article of yours which interested me at the time. ‘On Crime’... or something of the sort, I forget the title, I read it with pleasure two months ago in the _Periodical Review_.”

“My article? In the _Periodical Review_?” Raskolnikov asked in astonishment. “I certainly did write an article upon a book six months ago when I left the university, but I sent it to the _Weekly Review_.”

“But it came out in the _Periodical_.”

“And the _Weekly Review_ ceased to exist, so that’s why it wasn’t printed at the time.”

“That’s true; but when it ceased to exist, the _Weekly Review_ was amalgamated with the _Periodical_, and so your article appeared two months ago in the latter. Didn’t you know?”

Raskolnikov had not known.

“Why, you might get some money out of them for the article! What a strange person you are! You lead such a solitary life that you know nothing of matters that concern you directly. It’s a fact, I assure you.”

“Bravo, Rodya! I knew nothing about it either!” cried Razumihin. “I’ll run to-day to the reading-room and ask for the number. Two months ago? What was the date? It doesn’t matter though, I will find it. Think of not telling us!”

“How did you find out that the article was mine? It’s only signed with an initial.”

“I only learnt it by chance, the other day. Through the editor; I know him.... I was very much interested.”

“I analysed, if I remember, the psychology of a criminal before and after the crime.”

“Yes, and you maintained that the perpetration of a crime is always accompanied by illness. Very, very original, but... it was not that part of your article that interested me so much, but an idea at the end of the article which I regret to say you merely suggested without working it out clearly. There is, if you recollect, a suggestion that there are certain persons who can... that is, not precisely are able to, but have a perfect right to commit breaches of morality and crimes, and that the law is not for them.”

Raskolnikov smiled at the exaggerated and intentional distortion of his idea.

“What? What do you mean? A right to crime? But not because of the influence of environment?” Razumihin inquired with some alarm even.

“No, not exactly because of it,” answered Porfiry. “In his article all men are divided into ‘ordinary’ and ‘extraordinary.’ Ordinary men have to live in submission, have no right to transgress the law, because, don’t you see, they are ordinary. But extraordinary men have a right to commit any crime and to transgress the law in any way, just because they are extraordinary. That was your idea, if I am not mistaken?”

“What do you mean? That can’t be right?” Razumihin muttered in bewilderment.

Raskolnikov smiled again. He saw the point at once, and knew where they wanted to drive him. He decided to take up the challenge.

“That wasn’t quite my contention,” he began simply and modestly. “Yet I admit that you have stated it almost correctly; perhaps, if you like, perfectly so.” (It almost gave him pleasure to admit this.) “The only difference is that I don’t contend that extraordinary people are always bound to commit breaches of morals, as you call it. In fact, I doubt whether such an argument could be published. I simply hinted that an ‘extraordinary’ man has the right... that is not an official right, but an inner right to decide in his own conscience to overstep... certain obstacles, and only in case it is essential for the practical fulfilment of his idea (sometimes, perhaps, of benefit to the whole of humanity). You say that my article isn’t definite; I am ready to make it as clear as I can. Perhaps I am right in thinking you want me to; very well. I maintain that if the discoveries of Kepler and Newton could not have been made known except by sacrificing the lives of one, a dozen, a hundred, or more men, Newton would have had the right, would indeed have been in duty-bound... to _eliminate_ the dozen or the hundred men for the sake of making his discoveries known to the whole of humanity. But it does not follow from that that Newton had a right to murder people right and left and to steal every day in the market. Then, I remember, I maintain in my article that all... well, legislators and leaders of men, such as Lycurgus, Solon, Mahomet, Napoleon, and so on, were all without exception criminals, from the very fact that, making a new law, they transgressed the ancient one, handed down from their ancestors and held sacred by the people, and they did not stop short at bloodshed either, if that bloodshed--often of innocent persons fighting bravely in defence of ancient law--were of use to their cause. It’s remarkable, in fact, that the majority, indeed, of these benefactors and leaders of humanity were guilty of terrible carnage. In short, I maintain that all great men or even men a little out of the common, that is to say capable of giving some new word, must from their very nature be criminals--more or less, of course. Otherwise it’s hard for them to get out of the common rut; and to remain in the common rut is what they can’t submit to, from their very nature again, and to my mind they ought not, indeed, to submit to it. You see that there is nothing particularly new in all that. The same thing has been printed and read a thousand times before. As for my division of people into ordinary and extraordinary, I acknowledge that it’s somewhat arbitrary, but I don’t insist upon exact numbers. I only believe in my leading idea that men are _in general_ divided by a law of nature into two categories, inferior (ordinary), that is, so to say, material that serves only to reproduce its kind, and men who have the gift or the talent to utter _a new word_. There are, of course, innumerable sub-divisions, but the distinguishing features of both categories are fairly well marked. The first category, generally speaking, are men conservative in temperament and law-abiding; they live under control and love to be controlled. To my thinking it is their duty to be controlled, because that’s their vocation, and there is nothing humiliating in it for them. The second category all transgress the law; they are destroyers or disposed to destruction according to their capacities. The crimes of these men are of course relative and varied; for the most part they seek in very varied ways the destruction of the present for the sake of the better. But if such a one is forced for the sake of his idea to step over a corpse or wade through blood, he can, I maintain, find within himself, in his conscience, a sanction for wading through blood--that depends on the idea and its dimensions, note that. It’s only in that sense I speak of their right to crime in my article (you remember it began with the legal question). There’s no need for such anxiety, however; the masses will scarcely ever admit this right, they punish them or hang them (more or less), and in doing so fulfil quite justly their conservative vocation. But the same masses set these criminals on a pedestal in the next generation and worship them (more or less). The first category is always the man of the present, the second the man of the future. The first preserve the world and people it, the second move the world and lead it to its goal. Each class has an equal right to exist. In fact, all have equal

rights with me--and _vive la guerre éternelle_--till the New Jerusalem, of course!”

“Then you believe in the New Jerusalem, do you?”

“I do,” Raskolnikov answered firmly; as he said these words and during the whole preceding tirade he kept his eyes on one spot on the carpet.

“And... and do you believe in God? Excuse my curiosity.”

“I do,” repeated Raskolnikov, raising his eyes to Porfiry.

“And... do you believe in Lazarus’ rising from the dead?”

“I... I do. Why do you ask all this?”

“You believe it literally?”

“Literally.”

“You don’t say so.... I asked from curiosity. Excuse me. But let us go back to the question; they are not always executed. Some, on the contrary...”

“Triumph in their lifetime? Oh, yes, some attain their ends in this life, and then...”

“They begin executing other people?”

“If it’s necessary; indeed, for the most part they do. Your remark is very witty.”

“Thank you. But tell me this: how do you distinguish those extraordinary people from the ordinary ones? Are there signs at their birth? I feel there ought to be more exactitude, more external definition. Excuse the natural anxiety of a practical law-abiding citizen, but couldn’t they adopt a special uniform, for instance, couldn’t they wear something, be branded in some way? For you know if confusion arises and a member of one category imagines that he belongs to the other, begins to ‘eliminate obstacles’ as you so happily expressed it, then...”

“Oh, that very often happens! That remark is wittier than the other.”

“Thank you.”

“No reason to; but take note that the mistake can only arise in the first category, that is among the ordinary people (as I perhaps unfortunately called them). In spite of their predisposition to obedience very many of them, through a playfulness of nature, sometimes vouchsafed even to the cow, like to imagine themselves advanced people, ‘destroyers,’ and to push themselves into the ‘new movement,’ and this quite sincerely. Meanwhile the really _new_ people are very often unobserved by them, or even despised as reactionaries of grovelling tendencies. But I don’t think there is any considerable danger here, and you really need not be uneasy for they never go very far. Of course, they might have a thrashing sometimes for letting their fancy run away with them and to teach them their place, but no more; in fact, even this isn’t necessary as they castigate themselves, for they are very conscientious: some perform this service for one another and others chastise themselves with their own hands.... They will impose various public acts of penitence upon themselves with a beautiful and edifying effect; in fact you’ve nothing to be uneasy about.... It’s a law of nature.”

“Well, you have certainly set my mind more at rest on that score; but there’s another thing worries me. Tell me, please, are there many people who have the right to kill others, these extraordinary people? I am ready to bow down to them, of course, but you must admit it’s alarming if there are a great many of them, eh?”

“Oh, you needn’t worry about that either,” Raskolnikov went on in the same tone. “People with new ideas, people with the faintest capacity for saying something _new_, are extremely few in number, extraordinarily so in fact. One thing only is clear, that the appearance of all these grades and sub-divisions of men must follow with unfailing regularity some law of nature. That law, of course, is unknown at present, but I am convinced that it exists, and one day may become known. The vast mass of mankind is mere material, and only exists in order by some great effort, by some mysterious process, by means of some crossing of races and stocks, to bring into the world at last perhaps one man out of a thousand with a spark of independence. One in ten thousand perhaps--I speak roughly, approximately--is born with some independence, and with still greater independence one in a hundred

thousand. The man of genius is one of millions, and the great geniuses, the crown of humanity, appear on earth perhaps one in many thousand millions. In fact I have not peeped into the retort in which all this takes place. But there certainly is and must be a definite law, it cannot be a matter of chance."

"Why, are you both joking?" Razumihin cried at last. "There you sit, making fun of one another. Are you serious, Rodya?"

Raskolnikov raised his pale and almost mournful face and made no reply. And the unconcealed, persistent, nervous, and _discourteous_ sarcasm of Porfiry seemed strange to Razumihin beside that quiet and mournful face.

"Well, brother, if you are really serious... You are right, of course, in saying that it's not new, that it's like what we've read and heard a thousand times already; but what is really original in all this, and is exclusively your own, to my horror, is that you sanction bloodshed _in the name of conscience_, and, excuse my saying so, with such fanaticism.... That, I take it, is the point of your article. But that sanction of bloodshed _by conscience_ is to my mind... more terrible than the official, legal sanction of bloodshed...."

"You are quite right, it is more terrible," Porfiry agreed.

"Yes, you must have exaggerated! There is some mistake, I shall read it. You can't think that! I shall read it."

"All that is not in the article, there's only a hint of it," said Raskolnikov.

"Yes, yes." Porfiry couldn't sit still. "Your attitude to crime is pretty clear to me now, but... excuse me for my impertinence (I am really ashamed to be worrying you like this), you see, you've removed my anxiety as to the two grades getting mixed, but... there are various practical possibilities that make me uneasy! What if some man or youth imagines that he is a Lycurgus or Mahomet--a future one of course--and suppose he begins to remove all obstacles.... He has some great enterprise before him and needs money for it... and tries to get it... do you see?"

Zametov gave a sudden guffaw in his corner. Raskolnikov did not even raise his eyes to him.

"I must admit," he went on calmly, "that such cases certainly must arise. The vain and foolish are particularly apt to fall into that snare; young people especially."

"Yes, you see. Well then?"

"What then?" Raskolnikov smiled in reply; "that's not my fault. So it is and so it always will be. He said just now (he nodded at Razumihin) that I sanction bloodshed. Society is too well protected by prisons, banishment, criminal investigators, penal servitude. There's no need to be uneasy. You have but to catch the thief."

"And what if we do catch him?"

"Then he gets what he deserves."

"You are certainly logical. But what of his conscience?"

"Why do you care about that?"

"Simply from humanity."

"If he has a conscience he will suffer for his mistake. That will be his punishment--as well as the prison."

"But the real geniuses," asked Razumihin frowning, "those who have the right to murder? Oughtn't they to suffer at all even for the blood they've shed?"

"Why the word _ought_? It's not a matter of permission or prohibition. He will suffer if he is sorry for his victim. Pain and suffering are always inevitable for a large intelligence and a deep heart. The really great men must, I think, have great sadness on earth," he added dreamily, not in the tone of the conversation.

He raised his eyes, looked earnestly at them all, smiled, and took his cap. He was too quiet by comparison with his manner at his entrance, and he felt this. Everyone got up.

“Well, you may abuse me, be angry with me if you like,” Porfiry Petrovitch began again, “but I can’t resist. Allow me one little question (I know I am troubling you). There is just one little notion I want to express, simply that I may not forget it.”

“Very good, tell me your little notion,” Raskolnikov stood waiting, pale and grave before him.

“Well, you see... I really don’t know how to express it properly.... It’s a playful, psychological idea.... When you were writing your article, surely you couldn’t have helped, he-he! fancying yourself... just a little, an ‘extraordinary’ man, uttering a _new word_ in your sense.... That’s so, isn’t it?”

“Quite possibly,” Raskolnikov answered contemptuously.

Razumihin made a movement.

“And, if so, could you bring yourself in case of worldly difficulties and hardship or for some service to humanity--to overstep obstacles?... For instance, to rob and murder?”

And again he winked with his left eye, and laughed noiselessly just as before.

“If I did I certainly should not tell you,” Raskolnikov answered with defiant and haughty contempt.

“No, I was only interested on account of your article, from a literary point of view...”

“Foo! how obvious and insolent that is!” Raskolnikov thought with repulsion.

“Allow me to observe,” he answered dryly, “that I don’t consider myself a Mahomet or a Napoleon, nor any personage of that kind, and not being one of them I cannot tell you how I should act.”

“Oh, come, don’t we all think ourselves Napoleons now in Russia?” Porfiry Petrovitch said with alarming familiarity.

Something peculiar betrayed itself in the very intonation of his voice.

“Perhaps it was one of these future Napoleons who did for Alyona Ivanovna last week?” Zametov blurted out from the corner.

Raskolnikov did not speak, but looked firmly and intently at Porfiry. Razumihin was scowling gloomily. He seemed before this to be noticing something. He looked angrily around. There was a minute of gloomy silence. Raskolnikov turned to go.

“Are you going already?” Porfiry said amiably, holding out his hand with excessive politeness. “Very, very glad of your acquaintance. As for your request, have no uneasiness, write just as I told you, or, better still, come to me there yourself in a day or two... to-morrow, indeed. I shall be there at eleven o’clock for certain. We’ll arrange it all; we’ll have a talk. As one of the last to be _there_, you might perhaps be able to tell us something,” he added with a most good-natured expression.

“You want to cross-examine me officially in due form?” Raskolnikov asked sharply.

“Oh, why? That’s not necessary for the present. You misunderstand me. I lose no opportunity, you see, and... I’ve talked with all who had pledges.... I obtained evidence from some of them, and you are the last.... Yes, by the way,” he cried, seemingly suddenly delighted, “I just remember, what was I thinking of?” he turned to Razumihin, “you were talking my ears off about that Nikolay... of course, I know, I know very well,” he turned to Raskolnikov, “that the fellow is innocent, but what is one to do? We had to trouble Dmitri too.... This is the point, this is all: when you went up the stairs it was past seven, wasn’t it?”

“Yes,” answered Raskolnikov, with an unpleasant sensation at the very moment he spoke that he need not have said it.

“Then when you went upstairs between seven and eight, didn’t you see in a flat that stood open on a second storey, do you remember? two workmen or at least one of them? They were painting there, didn’t you notice them? It’s very, very important for them.”

“Painters? No, I didn’t see them,” Raskolnikov answered slowly, as though ransacking his memory, while at the same instant he was racking every nerve, almost swooning with anxiety to conjecture as quickly as possible where the trap lay and not to overlook anything. “No, I didn’t see them, and I don’t think I noticed a flat like that open.... But on the fourth storey” (he had mastered the trap now and was triumphant) “I remember now that someone was moving out of the flat opposite Alyona Ivanovna’s.... I remember... I remember it clearly. Some porters were carrying out a sofa and they squeezed me against the wall. But painters... no, I don’t

remember that there were any painters, and I don't think that there was a flat open anywhere, no, there wasn't."

"What do you mean?" Razumihin shouted suddenly, as though he had reflected and realised. "Why, it was on the day of the murder the painters were at work, and he was there three days before? What are you asking?"

"Foo! I have muddled it!" Porfiry slapped himself on the forehead. "Deuce take it! This business is turning my brain!" he addressed Raskolnikov somewhat apologetically. "It would be such a great thing for us to find out whether anyone had seen them between seven and eight at the flat, so I fancied you could perhaps have told us something.... I quite muddled it."

"Then you should be more careful," Razumihin observed grimly.

The last words were uttered in the passage. Porfiry Petrovitch saw them to the door with excessive politeness.

They went out into the street gloomy and sullen, and for some steps they did not say a word. Raskolnikov drew a deep breath.

CHAPTER VI

"I don't believe it, I can't believe it!" repeated Razumihin, trying in perplexity to refute Raskolnikov's arguments.

They were by now approaching Bakaleyev's lodgings, where Pulcheria Alexandrovna and Dounia had been expecting them a long while. Razumihin kept stopping on the way in the heat of discussion, confused and excited by the very fact that they were for the first time speaking openly about _it_.

"Don't believe it, then!" answered Raskolnikov, with a cold, careless smile. "You were noticing nothing as usual, but I was weighing every word."

"You are suspicious. That is why you weighed their words... h'm... certainly, I agree, Porfiry's tone was rather strange, and still more that wretch Zametov!... You are right, there was something about him--but why? Why?"

"He has changed his mind since last night."

"Quite the contrary! If they had that brainless idea, they would do their utmost to hide it, and conceal their cards, so as to catch you afterwards.... But it was all impudent and careless."

"If they had had facts--I mean, real facts--or at least grounds for suspicion, then they would certainly have tried to hide their game, in the hope of getting more (they would have made a search long ago besides). But they have no facts, not one. It is all mirage--all ambiguous. Simply a floating idea. So they try to throw me out by impudence. And perhaps, he was irritated at having no facts, and blurted it out in his vexation--or perhaps he has some plan... he seems an intelligent man. Perhaps he wanted to frighten me by pretending to know. They have a psychology of their own, brother. But it is loathsome explaining it all. Stop!"

"And it's insulting, insulting! I understand you. But... since we have spoken openly now (and it is an excellent thing that we have at last--I am glad) I will own now frankly that I noticed it in them long ago, this idea. Of course the merest hint only--an insinuation--but why an insinuation even? How dare they? What foundation have they? If only you knew how furious I have been. Think only! Simply because a poor student, unhinged by poverty and hypochondria, on the eve of a severe delirious illness (note that), suspicious, vain, proud, who has not seen a soul to speak to for six months, in rags and in boots without soles, has to face some wretched policemen and put up with their insolence; and the unexpected debt thrust under his nose, the I.O.U. presented by Tchebarov, the new paint, thirty degrees Reaumur and a stifling atmosphere, a crowd of people, the talk about the murder of a person where he had been just before, and all that on an empty stomach--he might well have a fainting fit! And that, that is what they found it all on! Damn them! I understand how annoying it is, but in your place, Rodya, I would laugh at them, or better still, spit in their ugly faces, and spit a dozen times in all directions. I'd hit out in all directions, neatly too, and so I'd put an end to it. Damn them! Don't be downhearted. It's a shame!"

"He really has put it well, though," Raskolnikov thought.

"Damn them? But the cross-examination again, to-morrow?" he said with bitterness. "Must I really enter into explanations with them? I feel vexed as it is, that I condescended to speak to Zametov yesterday in the restaurant...."

"Damn it! I will go myself to Porfiry. I will squeeze it out of him, as one of the family: he must let me know the ins and outs of it all! And as for Zametov..."

“At last he sees through him!” thought Raskolnikov.

“Stay!” cried Razumihin, seizing him by the shoulder again. “Stay! you were wrong. I have thought it out. You are wrong! How was that a trap? You say that the question about the workmen was a trap. But if you had done _that_, could you have said you had seen them painting the flat... and the workmen? On the contrary, you would have seen nothing, even if you had seen it. Who would own it against himself?”

“If I had done _that thing_, I should certainly have said that I had seen the workmen and the flat,” Raskolnikov answered, with reluctance and obvious disgust.

“But why speak against yourself?”

“Because only peasants, or the most inexperienced novices deny everything flatly at examinations. If a man is ever so little developed and experienced, he will certainly try to admit all the external facts that can’t be avoided, but will seek other explanations of them, will introduce some special, unexpected turn, that will give them another significance and put them in another light. Porfiry might well reckon that I should be sure to answer so, and say I had seen them to give an air of truth, and then make some explanation.”

“But he would have told you at once that the workmen could not have been there two days before, and that therefore you must have been there on the day of the murder at eight o’clock. And so he would have caught you over a detail.”

“Yes, that is what he was reckoning on, that I should not have time to reflect, and should be in a hurry to make the most likely answer, and so would forget that the workmen could not have been there two days before.”

“But how could you forget it?”

“Nothing easier. It is in just such stupid things clever people are most easily caught. The more cunning a man is, the less he suspects that he will be caught in a simple thing. The more cunning a man is, the simpler the trap he must be caught in. Porfiry is not such a fool as you think....”

“He is a knave then, if that is so!”

Raskolnikov could not help laughing. But at the very moment, he was struck by the strangeness of his own frankness, and the eagerness with which he had made this explanation, though he had kept up all the preceding conversation with gloomy repulsion, obviously with a motive, from necessity.

“I am getting a relish for certain aspects!” he thought to himself. But almost at the same instant he became suddenly uneasy, as though an unexpected and alarming idea had occurred to him. His uneasiness kept on increasing. They had just reached the entrance to Bakaleyev’s.

“Go in alone!” said Raskolnikov suddenly. “I will be back directly.”

“Where are you going? Why, we are just here.”

“I can’t help it.... I will come in half an hour. Tell them.”

“Say what you like, I will come with you.”

“You, too, want to torture me!” he screamed, with such bitter irritation, such despair in his eyes that Razumihin’s hands dropped. He stood for some time on the steps, looking gloomily at Raskolnikov striding rapidly away in the direction of his lodging. At last, gritting his teeth and clenching his fist, he swore he would squeeze Porfiry like a lemon that very day, and went up the stairs to reassure Pulcheria Alexandrovna, who was by now alarmed at their long absence.

When Raskolnikov got home, his hair was soaked with sweat and he was breathing heavily. He went rapidly up the stairs, walked into his unlocked room and at once fastened the latch. Then in senseless terror he rushed to the corner, to that hole under the paper where he had put the things; put his hand in, and for some minutes felt carefully in the hole, in every crack and fold of the paper. Finding nothing, he got up and drew a deep breath. As he was reaching the steps of Bakaleyev’s, he suddenly fancied that something, a chain, a stud or even a bit of paper in which they had been wrapped with the old woman’s handwriting on it, might somehow have slipped out and been lost in some crack, and then might suddenly turn up as unexpected, conclusive evidence

against him.

He stood as though lost in thought, and a strange, humiliated, half senseless smile strayed on his lips. He took his cap at last and went quietly out of the room. His ideas were all tangled. He went dreamily through the gateway.

“Here he is himself,” shouted a loud voice.

He raised his head.

The porter was standing at the door of his little room and was pointing him out to a short man who looked like an artisan, wearing a long coat and a waistcoat, and looking at a distance remarkably like a woman. He stooped, and his head in a greasy cap hung forward. From his wrinkled flabby face he looked over fifty; his little eyes were lost in fat and they looked out grimly, sternly and discontentedly.

“What is it?” Raskolnikov asked, going up to the porter.

The man stole a look at him from under his brows and he looked at him attentively, deliberately; then he turned slowly and went out of the gate into the street without saying a word.

“What is it?” cried Raskolnikov.

“Why, he there was asking whether a student lived here, mentioned your name and whom you lodged with. I saw you coming and pointed you out and he went away. It’s funny.”

The porter too seemed rather puzzled, but not much so, and after wondering for a moment he turned and went back to his room.

Raskolnikov ran after the stranger, and at once caught sight of him walking along the other side of the street with the same even, deliberate step with his eyes fixed on the ground, as though in meditation. He soon overtook him, but for some time walked behind him. At last, moving on to a level with him, he looked at his face. The man noticed him at once, looked at him quickly, but dropped his eyes again; and so they walked for a minute side by side without uttering a word.

“You were inquiring for me... of the porter?” Raskolnikov said at last, but in a curiously quiet voice.

The man made no answer; he didn’t even look at him. Again they were both silent.

“Why do you... come and ask for me... and say nothing.... What’s the meaning of it?”

Raskolnikov’s voice broke and he seemed unable to articulate the words clearly.

The man raised his eyes this time and turned a gloomy sinister look at Raskolnikov.

“Murderer!” he said suddenly in a quiet but clear and distinct voice.

Raskolnikov went on walking beside him. His legs felt suddenly weak, a cold shiver ran down his spine, and his heart seemed to stand still for a moment, then suddenly began throbbing as though it were set free. So they walked for about a hundred paces, side by side in silence.

The man did not look at him.

“What do you mean... what is.... Who is a murderer?” muttered Raskolnikov hardly audibly.

“_You_ are a murderer,” the man answered still more articulately and emphatically, with a smile of triumphant hatred, and again he looked straight into Raskolnikov’s pale face and stricken eyes.

They had just reached the cross-roads. The man turned to the left without looking behind him. Raskolnikov remained standing, gazing after him. He saw him turn round fifty paces away and look back at him still standing there. Raskolnikov could not see clearly, but he fancied that he was again smiling the same smile of cold hatred and triumph.

With slow faltering steps, with shaking knees, Raskolnikov made his way back to his little garret, feeling chilled all over. He took off his cap and put it on the table, and for ten minutes he stood without moving. Then he sank exhausted on the sofa and with a weak moan of pain he stretched himself on it. So he lay for half an hour.

He thought of nothing. Some thoughts or fragments of thoughts, some images without order or coherence floated before his mind--faces of people he had seen in his childhood or met somewhere once, whom he would never have recalled, the belfry of the church at V., the billiard table in a restaurant and some officers playing billiards, the smell of cigars in some underground tobacco shop, a tavern room, a back staircase quite dark, all sloppy with dirty water and strewn with egg-shells, and the Sunday bells floating in from somewhere.... The images followed one another, whirling like a hurricane. Some of them he liked and tried to clutch at, but they faded and all the while there was an oppression within him, but it was not overwhelming, sometimes it was even pleasant.... The slight shivering still persisted, but that too was an almost pleasant sensation.

He heard the hurried footsteps of Razumihin; he closed his eyes and pretended to be asleep. Razumihin opened the door and stood for some time in the doorway as though hesitating, then he stepped softly into the room and went cautiously to the sofa. Raskolnikov heard Nastasya's whisper:

"Don't disturb him! Let him sleep. He can have his dinner later."

"Quite so," answered Razumihin. Both withdrew carefully and closed the door. Another half-hour passed. Raskolnikov opened his eyes, turned on his back again, clasping his hands behind his head.

"Who is he? Who is that man who sprang out of the earth? Where was he, what did he see? He has seen it all, that's clear. Where was he then? And from where did he see? Why has he only now sprung out of the earth? And how could he see? Is it possible? Hm..." continued Raskolnikov, turning cold and shivering, "and the jewel case Nikolay found behind the door--was that possible? A clue? You miss an infinitesimal line and you can build it into a pyramid of evidence! A fly flew by and saw it! Is it possible?" He felt with sudden loathing how weak, how physically weak he had become. "I ought to have known it," he thought with a bitter smile. "And how dared I, knowing myself, knowing how I should be, take up an axe and shed blood! I ought to have known beforehand.... Ah, but I did know!" he whispered in despair. At times he came to a standstill at some thought.

"No, those men are not made so. The real _Master_ to whom all is permitted storms Toulon, makes a massacre in Paris, _forgets_ an army in Egypt, _wastes_ half a million men in the Moscow expedition and gets off with a jest at Vilna. And altars are set up to him after his death, and so _all_ is permitted. No, such people, it seems, are not of flesh but of bronze!"

One sudden irrelevant idea almost made him laugh. Napoleon, the pyramids, Waterloo, and a wretched skinny old woman, a pawnbroker with a red trunk under her bed--it's a nice hash for Porfiry Petrovitch to digest! How can they digest it! It's too inartistic. "A Napoleon creep under an old woman's bed! Ugh, how loathsome!"

At moments he felt he was raving. He sank into a state of feverish excitement. "The old woman is of no consequence," he thought, hotly and incoherently. "The old woman was a mistake perhaps, but she is not what matters! The old woman was only an illness.... I was in a hurry to overstep.... I didn't kill a human being, but a principle! I killed the principle, but I didn't overstep, I stopped on this side.... I was only capable of killing. And it seems I wasn't even capable of that... Principle? Why was that fool Razumihin abusing the socialists? They are industrious, commercial people; 'the happiness of all' is their case. No, life is only given to me once and I shall never have it again; I don't want to wait for 'the happiness of all.' I want to live myself, or else better not live at all. I simply couldn't pass by my mother starving, keeping my rouble in my pocket while I waited for the 'happiness of all.' I am putting my little brick into the happiness of all and so my heart is at peace. Ha-ha! Why have you let me slip? I only live once, I too want.... Ech, I am an æsthetic louse and nothing more," he added suddenly, laughing like a madman. "Yes, I am certainly a louse," he went on, clutching at the idea, gloating over it and playing with it with vindictive pleasure. "In the first place, because I can reason that I am one, and secondly, because for a month past I have been troubling benevolent Providence, calling it to witness that not for my own fleshly lusts did I undertake it, but with a grand and noble object--ha-ha! Thirdly, because I aimed at carrying it out as justly as possible, weighing, measuring and calculating. Of all the lice I picked out the most useless one and proposed to take from her only as much as I needed for the first step, no more nor less (so the rest would have gone to a monastery, according to her will, ha-ha!). And what shows that I am utterly a louse," he added, grinding his teeth, "is that I am perhaps viler and more loathsome than the louse I killed, and _I felt beforehand_ that I should tell myself so _after_ killing her. Can anything be compared with the horror of that? The vulgarity! The abjectness! I understand the 'prophet' with his sabre, on his steed: Allah commands and 'trembling' creation must obey! The 'prophet' is right, he is right when he sets a battery across the street and blows up the innocent and the guilty without deigning to explain! It's for you to obey, trembling creation, and not _to have desires_, for that's not for you!... I shall never, never forgive the old woman!"

His hair was soaked with sweat, his quivering lips were parched, his eyes were fixed on the ceiling.

“Mother, sister--how I loved them! Why do I hate them now? Yes, I hate them, I feel a physical hatred for them, I can’t bear them near me.... I went up to my mother and kissed her, I remember.... To embrace her and think if she only knew... shall I tell her then? That’s just what I might do.... _She_ must be the same as I am,” he added, straining himself to think, as it were struggling with delirium. “Ah, how I hate the old woman now! I feel I should kill her again if she came to life! Poor Lizaveta! Why did she come in?... It’s strange though, why is it I scarcely ever think of her, as though I hadn’t killed her? Lizaveta! Sonia! Poor gentle things, with gentle eyes.... Dear women! Why don’t they weep? Why don’t they moan? They give up everything... their eyes are soft and gentle.... Sonia, Sonia! Gentle Sonia!”

He lost consciousness; it seemed strange to him that he didn’t remember how he got into the street. It was late evening. The twilight had fallen and the full moon was shining more and more brightly; but there was a peculiar breathlessness in the air. There were crowds of people in the street; workmen and business people were making their way home; other people had come out for a walk; there was a smell of mortar, dust and stagnant water. Raskolnikov walked along, mournful and anxious; he was distinctly aware of having come out with a purpose, of having to do something in a hurry, but what it was he had forgotten. Suddenly he stood still and saw a man standing on the other side of the street, beckoning to him. He crossed over to him, but at once the man turned and walked away with his head hanging, as though he had made no sign to him. “Stay, did he really beckon?” Raskolnikov wondered, but he tried to overtake him. When he was within ten paces he recognised him and was frightened; it was the same man with stooping shoulders in the long coat. Raskolnikov followed him at a distance; his heart was beating; they went down a turning; the man still did not look round. “Does he know I am following him?” thought Raskolnikov. The man went into the gateway of a big house. Raskolnikov hastened to the gate and looked in to see whether he would look round and sign to him. In the court-yard the man did turn round and again seemed to beckon him. Raskolnikov at once followed him into the yard, but the man was gone. He must have gone up the first staircase. Raskolnikov rushed after him. He heard slow measured steps two flights above. The staircase seemed strangely familiar. He reached the window on the first floor; the moon shone through the panes with a melancholy and mysterious light; then he reached the second floor. Bah! this is the flat where the painters were at work... but how was it he did not recognise it at once? The steps of the man above had died away. “So he must have stopped or hidden somewhere.” He reached the third storey, should he go on? There was a stillness that was dreadful.... But he went on. The sound of his own footsteps scared and frightened him. How dark it was! The man must be hiding in some corner here. Ah! the flat was standing wide open, he hesitated and went in. It was very dark and empty in the passage, as though everything had been removed; he crept on tiptoe into the parlour which was flooded with moonlight. Everything there was as before, the chairs, the looking-glass, the yellow sofa and the pictures in the frames. A huge, round, copper-red moon looked in at the windows. “It’s the moon that makes it so still, weaving some mystery,” thought Raskolnikov. He stood and waited, waited a long while, and the more silent the moonlight, the more violently his heart beat, till it was painful. And still the same hush. Suddenly he heard a momentary sharp crack like the snapping of a splinter and all was still again. A fly flew up suddenly and struck the window pane with a plaintive buzz. At that moment he noticed in the corner between the window and the little cupboard something like a cloak hanging on the wall. “Why is that cloak here?” he thought, “it wasn’t there before....” He went up to it quietly and felt that there was someone hiding behind it. He cautiously moved the cloak and saw, sitting on a chair in the corner, the old woman bent double so that he couldn’t see her face; but it was she. He stood over her. “She is afraid,” he thought. He stealthily took the axe from the noose and struck her one blow, then another on the skull. But strange to say she did not stir, as though she were made of wood. He was frightened, bent down nearer and tried to look at her; but she, too, bent her head lower. He bent right down to the ground and peeped up into her face from below, he peeped and turned cold with horror: the old woman was sitting and laughing, shaking with noiseless laughter, doing her utmost that he should not hear it. Suddenly he fancied that the door from the bedroom was opened a little and that there was laughter and whispering within. He was overcome with frenzy and he began hitting the old woman on the head with all his force, but at every blow of the axe the laughter and whispering from the bedroom grew louder and the old woman was simply shaking with mirth. He was rushing away, but the passage was full of people, the doors of the flats stood open and on the landing, on the stairs and everywhere below there were people, rows of heads, all looking, but huddled together in silence and expectation. Something gripped his heart, his legs were rooted to the spot, they would not move.... He tried to scream and woke up.

He drew a deep breath--but his dream seemed strangely to persist: his door was flung open and a man whom he had never seen stood in the doorway watching him intently.

Raskolnikov had hardly opened his eyes and he instantly closed them again. He lay on his back without stirring.

“Is it still a dream?” he wondered and again raised his eyelids hardly perceptibly; the stranger was standing in the same place, still watching him.

He stepped cautiously into the room, carefully closing the door after him, went up to the table, paused a moment, still keeping his eyes on Raskolnikov, and noiselessly seated himself on the chair by the sofa; he put his hat on the floor beside him and leaned his hands on his cane and his chin on his hands. It was evident that he was prepared to wait indefinitely. As far as Raskolnikov could make out from his stolen glances, he was a man no longer young, stout, with a full, fair, almost whitish beard.

Ten minutes passed. It was still light, but beginning to get dusk. There was complete stillness in the room. Not a sound came from the stairs. Only a big fly buzzed and fluttered against the window pane. It was unbearable at last. Raskolnikov suddenly got up and sat on the sofa.

“Come, tell me what you want.”

“I knew you were not asleep, but only pretending,” the stranger answered oddly, laughing calmly. “Arkady Ivanovitch Svidrigaïlov, allow me to introduce myself....”

PART IV

CHAPTER I

“Can this be still a dream?” Raskolnikov thought once more.

He looked carefully and suspiciously at the unexpected visitor.

“Svidrigaïlov! What nonsense! It can’t be!” he said at last aloud in bewilderment.

His visitor did not seem at all surprised at this exclamation.

“I’ve come to you for two reasons. In the first place, I wanted to make your personal acquaintance, as I have already heard a great deal about you that is interesting and flattering; secondly, I cherish the hope that you may not refuse to assist me in a matter directly concerning the welfare of your sister, Avdotya Romanovna. For without your support she might not let me come near her now, for she is prejudiced against me, but with your assistance I reckon on...”

“You reckon wrongly,” interrupted Raskolnikov.

“They only arrived yesterday, may I ask you?”

Raskolnikov made no reply.

“It was yesterday, I know. I only arrived myself the day before. Well, let me tell you this, Rodion Romanovitch, I don’t consider it necessary to justify myself, but kindly tell me what was there particularly criminal on my part in all this business, speaking without prejudice, with common sense?”

Raskolnikov continued to look at him in silence.

“That in my own house I persecuted a defenceless girl and ‘insulted her with my infamous proposals’--is that it? (I am anticipating you.) But you’ve only to assume that I, too, am a man _et nihil humanum_... in a word, that I am capable of being attracted and falling in love (which does not depend on our will), then everything can be explained in the most natural manner. The question is, am I a monster, or am I myself a victim? And what if I am a victim? In proposing to the object of my passion to elope with me to America or Switzerland, I may have cherished the deepest respect for her and may have thought that I was promoting our mutual happiness! Reason is the slave of passion, you know; why, probably, I was doing more harm to myself than anyone!”

“But that’s not the point,” Raskolnikov interrupted with disgust. “It’s simply that whether you are right or wrong, we dislike you. We don’t want to have anything to do with you. We show you the door. Go out!”

Svidrigaïlov broke into a sudden laugh.

“But you’re... but there’s no getting round you,” he said, laughing in the frankest way. “I hoped to get round you, but you took up the right line at once!”

“But you are trying to get round me still!”

“What of it? What of it?” cried Svidrigaïlov, laughing openly. “But this is what the French call _bonne guerre_, and the most innocent form of deception!... But still you have interrupted me; one way or another, I repeat again: there would never have been any unpleasantness except for what happened in the garden. Marfa Petrovna...”

“You have got rid of Marfa Petrovna, too, so they say?” Raskolnikov interrupted rudely.

“Oh, you’ve heard that, too, then? You’d be sure to, though.... But as for your question, I really don’t know what to say, though my own conscience is quite at rest on that score. Don’t suppose that I am in any apprehension about it. All was regular and in order; the medical inquiry diagnosed apoplexy due to bathing immediately after a heavy dinner and a bottle of wine, and indeed it could have proved nothing else. But I’ll tell you what I have been thinking to myself of late, on my way here in the train, especially: didn’t I contribute to all that... calamity, morally, in a way, by irritation or something of the sort. But I came to the conclusion that that, too, was quite out of the question.”

Raskolnikov laughed.

“I wonder you trouble yourself about it!”

“But what are you laughing at? Only consider, I struck her just twice with a switch--there were no marks even... don’t regard me as a cynic, please; I am perfectly aware how atrocious it was of me and all that; but I know for certain, too, that Marfa Petrovna was very likely pleased at my, so to say, warmth. The story of your sister had been wrung out to the last drop; for the last three days Marfa Petrovna had been forced to sit at home; she had nothing to show herself with in the town. Besides, she had bored them so with that letter (you heard about her reading the letter). And all of a sudden those two switches fell from heaven! Her first act was to order the carriage to be got out.... Not to speak of the fact that there are cases when women are very, very glad to be insulted in spite of all their show of indignation. There are instances of it with everyone; human beings in general, indeed, greatly love to be insulted, have you noticed that? But it’s particularly so with women. One might even say it’s their only amusement.”

At one time Raskolnikov thought of getting up and walking out and so finishing the interview. But some curiosity and even a sort of prudence made him linger for a moment.

“You are fond of fighting?” he asked carelessly.

“No, not very,” Svidrigaïlov answered, calmly. “And Marfa Petrovna and I scarcely ever fought. We lived very harmoniously, and she was always pleased with me. I only used the whip twice in all our seven years (not counting a third occasion of a very ambiguous character). The first time, two months after our marriage, immediately after we arrived in the country, and the last time was that of which we are speaking. Did you suppose I was such a monster, such a reactionary, such a slave driver? Ha, ha! By the way, do you remember, Rodion Romanovitch, how a few years ago, in those days of beneficent publicity, a nobleman, I’ve forgotten his name, was put to shame everywhere, in all the papers, for having thrashed a German woman in the railway train. You remember? It was in those days, that very year I believe, the ‘disgraceful action of the _Age_’ took place (you know, ‘The Egyptian Nights,’ that public reading, you remember? The dark eyes, you know! Ah, the golden days of our youth, where are they?). Well, as for the gentleman who thrashed the German, I feel no sympathy with him, because after all what need is there for sympathy? But I must say that there are sometimes such provoking ‘Germans’ that I don’t believe there is a progressive who could quite answer for himself. No one looked at the subject from that point of view then, but that’s the truly humane point of view, I assure you.”

After saying this, Svidrigaïlov broke into a sudden laugh again. Raskolnikov saw clearly that this was a man with a firm purpose in his mind and able to keep it to himself.

“I expect you’ve not talked to anyone for some days?” he asked.

“Scarcely anyone. I suppose you are wondering at my being such an adaptable man?”

“No, I am only wondering at your being too adaptable a man.”

“Because I am not offended at the rudeness of your questions? Is that it? But why take offence? As you asked, so I answered,” he replied, with a surprising expression of simplicity. “You know, there’s hardly anything I take interest in,” he went on, as it were dreamily, “especially now, I’ve nothing to do.... You are quite at liberty to imagine though that I am making up to you with a motive, particularly as I told you I want to see your sister about something. But I’ll confess frankly, I am very much bored. The last three days especially, so I am delighted to see you.... Don’t be angry, Rodion Romanovitch, but you seem to be somehow awfully strange

yourself. Say what you like, there's something wrong with you, and now, too... not this very minute, I mean, but now, generally.... Well, well, I won't, I won't, don't scowl! I am not such a bear, you know, as you think."

Raskolnikov looked gloomily at him.

"You are not a bear, perhaps, at all," he said. "I fancy indeed that you are a man of very good breeding, or at least know how on occasion to behave like one."

"I am not particularly interested in anyone's opinion," Svidrigaïlov answered, dryly and even with a shade of haughtiness, "and therefore why not be vulgar at times when vulgarity is such a convenient cloak for our climate... and especially if one has a natural propensity that way," he added, laughing again.

"But I've heard you have many friends here. You are, as they say, 'not without connections.' What can you want with me, then, unless you've some special object?"

"That's true that I have friends here," Svidrigaïlov admitted, not replying to the chief point. "I've met some already. I've been lounging about for the last three days, and I've seen them, or they've seen me. That's a matter of course. I am well dressed and reckoned not a poor man; the emancipation of the serfs hasn't affected me; my property consists chiefly of forests and water meadows. The revenue has not fallen off; but... I am not going to see them, I was sick of them long ago. I've been here three days and have called on no one.... What a town it is! How has it come into existence among us, tell me that? A town of officials and students of all sorts. Yes, there's a great deal I didn't notice when I was here eight years ago, kicking up my heels.... My only hope now is in anatomy, by Jove, it is!"

"Anatomy?"

"But as for these clubs, Dussauts, parades, or progress, indeed, maybe--well, all that can go on without me," he went on, again without noticing the question. "Besides, who wants to be a card-sharper?"

"Why, have you been a card-sharper then?"

"How could I help being? There was a regular set of us, men of the best society, eight years ago; we had a fine time. And all men of breeding, you know, poets, men of property. And indeed as a rule in our Russian society the best manners are found among those who've been thrashed, have you noticed that? I've deteriorated in the country. But I did get into prison for debt, through a low Greek who came from Nezhin. Then Marfa Petrovna turned up; she bargained with him and bought me off for thirty thousand silver pieces (I owed seventy thousand). We were united in lawful wedlock and she bore me off into the country like a treasure. You know she was five years older than I. She was very fond of me. For seven years I never left the country. And, take note, that all my life she held a document over me, the IOU for thirty thousand roubles, so if I were to elect to be restive about anything I should be trapped at once! And she would have done it! Women find nothing incompatible in that."

"If it hadn't been for that, would you have given her the slip?"

"I don't know what to say. It was scarcely the document restrained me. I didn't want to go anywhere else. Marfa Petrovna herself invited me to go abroad, seeing I was bored, but I've been abroad before, and always felt sick there. For no reason, but the sunrise, the bay of Naples, the sea--you look at them and it makes you sad. What's most revolting is that one is really sad! No, it's better at home. Here at least one blames others for everything and excuses oneself. I should have gone perhaps on an expedition to the North Pole, because _j'ai le vin mauvais_ and hate drinking, and there's nothing left but wine. I have tried it. But, I say, I've been told Berg is going up in a great balloon next Sunday from the Yusupov Garden and will take up passengers at a fee. Is it true?"

"Why, would you go up?"

"I... No, oh, no," muttered Svidrigaïlov really seeming to be deep in thought.

"What does he mean? Is he in earnest?" Raskolnikov wondered.

"No, the document didn't restrain me," Svidrigaïlov went on, meditatively. "It was my own doing, not leaving the country, and nearly a year ago Marfa Petrovna gave me back the document on my name-day and made me a present of a considerable sum of money, too. She had a fortune, you know. 'You see how I trust you, Arkady Ivanovitch'--that was actually her expression. You don't believe she used it? But do you know I managed the estate quite decently, they know me in the neighbourhood. I ordered books, too. Marfa

Petrovna at first approved, but afterwards she was afraid of my over-studying."

"You seem to be missing Marfa Petrovna very much?"

"Missing her? Perhaps. Really, perhaps I am. And, by the way, do you believe in ghosts?"

"What ghosts?"

"Why, ordinary ghosts."

"Do you believe in them?"

"Perhaps not, _pour vous plaire_.... I wouldn't say no exactly."

"Do you see them, then?"

Svidrigaïlov looked at him rather oddly.

"Marfa Petrovna is pleased to visit me," he said, twisting his mouth into a strange smile.

"How do you mean 'she is pleased to visit you'?"

"She has been three times. I saw her first on the very day of the funeral, an hour after she was buried. It was the day before I left to come here. The second time was the day before yesterday, at daybreak, on the journey at the station of Malaya Vishera, and the third time was two hours ago in the room where I am staying. I was alone."

"Were you awake?"

"Quite awake. I was wide awake every time. She comes, speaks to me for a minute and goes out at the door--always at the door. I can almost hear her."

"What made me think that something of the sort must be happening to you?" Raskolnikov said suddenly.

At the same moment he was surprised at having said it. He was much excited.

"What! Did you think so?" Svidrigaïlov asked in astonishment. "Did you really? Didn't I say that there was something in common between us, eh?"

"You never said so!" Raskolnikov cried sharply and with heat.

"Didn't I?"

"No!"

"I thought I did. When I came in and saw you lying with your eyes shut, pretending, I said to myself at once, 'Here's the man.'"

"What do you mean by 'the man?' What are you talking about?" cried Raskolnikov.

"What do I mean? I really don't know...." Svidrigaïlov muttered ingenuously, as though he, too, were puzzled.

For a minute they were silent. They stared in each other's faces.

"That's all nonsense!" Raskolnikov shouted with vexation. "What does she say when she comes to you?"

"She! Would you believe it, she talks of the silliest trifles and--man is a strange creature--it makes me angry. The first time she came in (I was tired you know: the funeral service, the funeral ceremony, the lunch afterwards. At last I was left alone in my study. I lighted a cigar and began to think), she came in at the door. 'You've been so busy to-day, Arkady Ivanovitch, you have forgotten to wind the dining-room clock,' she said. All those seven years I've wound that clock every week, and if I forgot it she would always remind me. The next day I set off on my way here. I got out at the station at daybreak; I'd been asleep, tired out, with my eyes half open, I was drinking some coffee. I looked up and there was suddenly Marfa Petrovna sitting beside me with a pack of cards in her hands. 'Shall I tell your fortune for the journey, Arkady Ivanovitch?' She was a great hand at telling fortunes. I shall never forgive myself for not asking her to. I ran away in a fright, and, besides, the bell rang. I was sitting to-day, feeling very heavy after a miserable dinner from a cookshop; I was sitting smoking, all of a sudden Marfa Petrovna again. She came in very smart in a new

green silk dress with a long train. ‘Good day, Arkady Ivanovitch! How do you like my dress? Aniska can’t make like this.’ (Aniska was a dressmaker in the country, one of our former serf girls who had been trained in Moscow, a pretty wench.) She stood turning round before me. I looked at the dress, and then I looked carefully, very carefully, at her face. ‘I wonder you trouble to come to me about such trifles, Marfa Petrovna.’ ‘Good gracious, you won’t let one disturb you about anything!’ To tease her I said, ‘I want to get married, Marfa Petrovna.’ ‘That’s just like you, Arkady Ivanovitch; it does you very little credit to come looking for a bride when you’ve hardly buried your wife. And if you could make a good choice, at least, but I know it won’t be for your happiness or hers, you will only be a laughing-stock to all good people.’ Then she went out and her train seemed to rustle. Isn’t it nonsense, eh?”

“But perhaps you are telling lies?” Raskolnikov put in.

“I rarely lie,” answered Svidrigaïlov thoughtfully, apparently not noticing the rudeness of the question.

“And in the past, have you ever seen ghosts before?”

“Y-yes, I have seen them, but only once in my life, six years ago. I had a serf, Filka; just after his burial I called out forgetting ‘Filka, my pipe!’ He came in and went to the cupboard where my pipes were. I sat still and thought ‘he is doing it out of revenge,’ because we had a violent quarrel just before his death. ‘How dare you come in with a hole in your elbow?’ I said. ‘Go away, you scamp!’ He turned and went out, and never came again. I didn’t tell Marfa Petrovna at the time. I wanted to have a service sung for him, but I was ashamed.”

“You should go to a doctor.”

“I know I am not well, without your telling me, though I don’t know what’s wrong; I believe I am five times as strong as you are. I didn’t ask you whether you believe that ghosts are seen, but whether you believe that they exist.”

“No, I won’t believe it!” Raskolnikov cried, with positive anger.

“What do people generally say?” muttered Svidrigaïlov, as though speaking to himself, looking aside and bowing his head. “They say, ‘You are ill, so what appears to you is only unreal fantasy.’ But that’s not strictly logical. I agree that ghosts only appear to the sick, but that only proves that they are unable to appear except to the sick, not that they don’t exist.”

“Nothing of the sort,” Raskolnikov insisted irritably.

“No? You don’t think so?” Svidrigaïlov went on, looking at him deliberately. “But what do you say to this argument (help me with it): ghosts are, as it were, shreds and fragments of other worlds, the beginning of them. A man in health has, of course, no reason to see them, because he is above all a man of this earth and is bound for the sake of completeness and order to live only in this life. But as soon as one is ill, as soon as the normal earthly order of the organism is broken, one begins to realise the possibility of another world; and the more seriously ill one is, the closer becomes one’s contact with that other world, so that as soon as the man dies he steps straight into that world. I thought of that long ago. If you believe in a future life, you could believe in that, too.”

“I don’t believe in a future life,” said Raskolnikov.

Svidrigaïlov sat lost in thought.

“And what if there are only spiders there, or something of that sort,” he said suddenly.

“He is a madman,” thought Raskolnikov.

“We always imagine eternity as something beyond our conception, something vast, vast! But why must it be vast? Instead of all that, what if it’s one little room, like a bath house in the country, black and grimy and spiders in every corner, and that’s all eternity is? I sometimes fancy it like that.”

“Can it be you can imagine nothing juster and more comforting than that?” Raskolnikov cried, with a feeling of anguish.

“Juster? And how can we tell, perhaps that is just, and do you know it’s what I would certainly have made it,” answered Svidrigaïlov, with a vague smile.

This horrible answer sent a cold chill through Raskolnikov. Svidrigaïlov raised his head, looked at him, and suddenly began laughing.

“Only think,” he cried, “half an hour ago we had never seen each other, we regarded each other as enemies; there is a matter unsettled between us; we’ve thrown it aside, and away we’ve gone into the abstract! Wasn’t I right in saying that we were birds of a feather?”

“Kindly allow me,” Raskolnikov went on irritably, “to ask you to explain why you have honoured me with your visit... and... and I am in a hurry, I have no time to waste. I want to go out.”

“By all means, by all means. Your sister, Avdotya Romanovna, is going to be married to Mr. Luzhin, Pyotr Petrovitch?”

“Can you refrain from any question about my sister and from mentioning her name? I can’t understand how you dare utter her name in my presence, if you really are Svidrigaïlov.”

“Why, but I’ve come here to speak about her; how can I avoid mentioning her?”

“Very good, speak, but make haste.”

“I am sure that you must have formed your own opinion of this Mr. Luzhin, who is a connection of mine through my wife, if you have only seen him for half an hour, or heard any facts about him. He is no match for Avdotya Romanovna. I believe Avdotya Romanovna is sacrificing herself generously and imprudently for the sake of... for the sake of her family. I fancied from all I had heard of you that you would be very glad if the match could be broken off without the sacrifice of worldly advantages. Now I know you personally, I am convinced of it.”

“All this is very naïve... excuse me, I should have said impudent on your part,” said Raskolnikov.

“You mean to say that I am seeking my own ends. Don’t be uneasy, Rodion Romanovitch, if I were working for my own advantage, I would not have spoken out so directly. I am not quite a fool. I will confess something psychologically curious about that: just now, defending my love for Avdotya Romanovna, I said I was myself the victim. Well, let me tell you that I’ve no feeling of love now, not the slightest, so that I wonder myself indeed, for I really did feel something...”

“Through idleness and depravity,” Raskolnikov put in.

“I certainly am idle and depraved, but your sister has such qualities that even I could not help being impressed by them. But that’s all nonsense, as I see myself now.”

“Have you seen that long?”

“I began to be aware of it before, but was only perfectly sure of it the day before yesterday, almost at the moment I arrived in Petersburg. I still fancied in Moscow, though, that I was coming to try to get Avdotya Romanovna’s hand and to cut out Mr. Luzhin.”

“Excuse me for interrupting you; kindly be brief, and come to the object of your visit. I am in a hurry, I want to go out...”

“With the greatest pleasure. On arriving here and determining on a certain... journey, I should like to make some necessary preliminary arrangements. I left my children with an aunt; they are well provided for; and they have no need of me personally. And a nice father I should make, too! I have taken nothing but what Marfa Petrovna gave me a year ago. That’s enough for me. Excuse me, I am just coming to the point. Before the journey which may come off, I want to settle Mr. Luzhin, too. It’s not that I detest him so much, but it was through him I quarrelled with Marfa Petrovna when I learned that she had dished up this marriage. I want now to see Avdotya Romanovna through your mediation, and if you like in your presence, to explain to her that in the first place she will never gain anything but harm from Mr. Luzhin. Then, begging her pardon for all past unpleasantness, to make her a present of ten thousand roubles and so assist the rupture with Mr. Luzhin, a rupture to which I believe she is herself not disinclined, if she could see the way to it.”

“You are certainly mad,” cried Raskolnikov not so much angered as astonished. “How dare you talk like that!”

“I knew you would scream at me; but in the first place, though I am not rich, this ten thousand roubles is perfectly free; I have absolutely no need for it. If Avdotya Romanovna does not accept it, I shall waste it in some more foolish way. That’s the first thing. Secondly, my conscience is perfectly easy; I make the offer with no ulterior motive. You may not believe it, but in the end Avdotya Romanovna and you will know. The point is, that I did actually cause your sister, whom I greatly respect, some trouble and unpleasantness, and so, sincerely regretting it, I want--not to compensate, not to repay her for the unpleasantness, but simply to do something to her advantage, to show that I am not, after all, privileged to do nothing but harm. If there were a millionth fraction of

self-interest in my offer, I should not have made it so openly; and I should not have offered her ten thousand only, when five weeks ago I offered her more, Besides, I may, perhaps, very soon marry a young lady, and that alone ought to prevent suspicion of any design on Avdotya Romanovna. In conclusion, let me say that in marrying Mr. Luzhin, she is taking money just the same, only from another man. Don't be angry, Rodion Romanovitch, think it over coolly and quietly."

Svidrigaïlov himself was exceedingly cool and quiet as he was saying this.

"I beg you to say no more," said Raskolnikov. "In any case this is unpardonable impertinence."

"Not in the least. Then a man may do nothing but harm to his neighbour in this world, and is prevented from doing the tiniest bit of good by trivial conventional formalities. That's absurd. If I died, for instance, and left that sum to your sister in my will, surely she wouldn't refuse it?"

"Very likely she would."

"Oh, no, indeed. However, if you refuse it, so be it, though ten thousand roubles is a capital thing to have on occasion. In any case I beg you to repeat what I have said to Avdotya Romanovna."

"No, I won't."

"In that case, Rodion Romanovitch, I shall be obliged to try and see her myself and worry her by doing so."

"And if I do tell her, will you not try to see her?"

"I don't know really what to say. I should like very much to see her once more."

"Don't hope for it."

"I'm sorry. But you don't know me. Perhaps we may become better friends."

"You think we may become friends?"

"And why not?" Svidrigaïlov said, smiling. He stood up and took his hat. "I didn't quite intend to disturb you and I came here without reckoning on it... though I was very much struck by your face this morning."

"Where did you see me this morning?" Raskolnikov asked uneasily.

"I saw you by chance.... I kept fancying there is something about you like me.... But don't be uneasy. I am not intrusive; I used to get on all right with card-sharpers, and I never bored Prince Svirbey, a great personage who is a distant relation of mine, and I could write about Raphael's _Madonna_ in Madam Prilukov's album, and I never left Marfa Petrovna's side for seven years, and I used to stay the night at Viazemsky's house in the Hay Market in the old days, and I may go up in a balloon with Berg, perhaps."

"Oh, all right. Are you starting soon on your travels, may I ask?"

"What travels?"

"Why, on that 'journey'; you spoke of it yourself."

"A journey? Oh, yes. I did speak of a journey. Well, that's a wide subject.... if only you knew what you are asking," he added, and gave a sudden, loud, short laugh. "Perhaps I'll get married instead of the journey. They're making a match for me."

"Here?"

"Yes."

"How have you had time for that?"

"But I am very anxious to see Avdotya Romanovna once. I earnestly beg it. Well, good-bye for the present. Oh, yes. I have forgotten something. Tell your sister, Rodion Romanovitch, that Marfa Petrovna remembered her in her will and left her three thousand roubles. That's absolutely certain. Marfa Petrovna arranged it a week before her death, and it was done in my presence. Avdotya Romanovna will be able to receive the money in two or three weeks."

“Are you telling the truth?”

“Yes, tell her. Well, your servant. I am staying very near you.”

As he went out, Svidrigaïlov ran up against Razumihin in the doorway.

CHAPTER II

It was nearly eight o’clock. The two young men hurried to Bakaleyev’s, to arrive before Luzhin.

“Why, who was that?” asked Razumihin, as soon as they were in the street.

“It was Svidrigaïlov, that landowner in whose house my sister was insulted when she was their governess. Through his persecuting her with his attentions, she was turned out by his wife, Marfa Petrovna. This Marfa Petrovna begged Dounia’s forgiveness afterwards, and she’s just died suddenly. It was of her we were talking this morning. I don’t know why I’m afraid of that man. He came here at once after his wife’s funeral. He is very strange, and is determined on doing something.... We must guard Dounia from him... that’s what I wanted to tell you, do you hear?”

“Guard her! What can he do to harm Avdotya Romanovna? Thank you, Rodya, for speaking to me like that.... We will, we will guard her. Where does he live?”

“I don’t know.”

“Why didn’t you ask? What a pity! I’ll find out, though.”

“Did you see him?” asked Raskolnikov after a pause.

“Yes, I noticed him, I noticed him well.”

“You did really see him? You saw him clearly?” Raskolnikov insisted.

“Yes, I remember him perfectly, I should know him in a thousand; I have a good memory for faces.”

They were silent again.

“Hm!... that’s all right,” muttered Raskolnikov. “Do you know, I fancied... I keep thinking that it may have been an hallucination.”

“What do you mean? I don’t understand you.”

“Well, you all say,” Raskolnikov went on, twisting his mouth into a smile, “that I am mad. I thought just now that perhaps I really am mad, and have only seen a phantom.”

“What do you mean?”

“Why, who can tell? Perhaps I am really mad, and perhaps everything that happened all these days may be only imagination.”

“Ach, Rodya, you have been upset again!... But what did he say, what did he come for?”

Raskolnikov did not answer. Razumihin thought a minute.

“Now let me tell you my story,” he began, “I came to you, you were asleep. Then we had dinner and then I went to Porfiry’s, Zametov was still with him. I tried to begin, but it was no use. I couldn’t speak in the right way. They don’t seem to understand and can’t understand, but are not a bit ashamed. I drew Porfiry to the window, and began talking to him, but it was still no use. He looked away and I looked away. At last I shook my fist in his ugly face, and told him as a cousin I’d brain him. He merely looked at me, I cursed and came away. That was all. It was very stupid. To Zametov I didn’t say a word. But, you see, I thought I’d made a mess of it, but as I went downstairs a brilliant idea struck me: why should we trouble? Of course if you were in any danger or anything, but why need you care? You needn’t care a hang for them. We shall have a laugh at them afterwards, and if I were in your place I’d mystify them more than ever. How ashamed they’ll be afterwards! Hang them! We can thrash them afterwards, but let’s laugh at them now!”

“To be sure,” answered Raskolnikov. “But what will you say to-morrow?” he thought to himself. Strange to say, till that moment it had never occurred to him to wonder what Razumihin would think when he knew. As he thought it, Raskolnikov looked at him. Razumihin’s account of his visit to Porfiry had very little interest for him, so much had come and gone since then.

In the corridor they came upon Luzhin; he had arrived punctually at eight, and was looking for the number, so that all three went in together without greeting or looking at one another. The young men walked in first, while Pyotr Petrovitch, for good manners, lingered a little in the passage, taking off his coat. Pulcheria Alexandrovna came forward at once to greet him in the doorway, Dounia was welcoming her brother. Pyotr Petrovitch walked in and quite amiably, though with redoubled dignity, bowed to the ladies. He looked, however, as though he were a little put out and could not yet recover himself. Pulcheria Alexandrovna, who seemed also a little embarrassed, hastened to make them all sit down at the round table where a samovar was boiling. Dounia and Luzhin were facing one another on opposite sides of the table. Razumihin and Raskolnikov were facing Pulcheria Alexandrovna, Razumihin was next to Luzhin and Raskolnikov was beside his sister.

A moment’s silence followed. Pyotr Petrovitch deliberately drew out a cambric handkerchief reeking of scent and blew his nose with an air of a benevolent man who felt himself slighted, and was firmly resolved to insist on an explanation. In the passage the idea had occurred to him to keep on his overcoat and walk away, and so give the two ladies a sharp and emphatic lesson and make them feel the gravity of the position. But he could not bring himself to do this. Besides, he could not endure uncertainty, and he wanted an explanation: if his request had been so openly disobeyed, there was something behind it, and in that case it was better to find it out beforehand; it rested with him to punish them and there would always be time for that.

“I trust you had a favourable journey,” he inquired officially of Pulcheria Alexandrovna.

“Oh, very, Pyotr Petrovitch.”

“I am gratified to hear it. And Avdotya Romanovna is not over-fatigued either?”

“I am young and strong, I don’t get tired, but it was a great strain for mother,” answered Dounia.

“That’s unavoidable! our national railways are of terrible length. ‘Mother Russia,’ as they say, is a vast country.... In spite of all my desire to do so, I was unable to meet you yesterday. But I trust all passed off without inconvenience?”

“Oh, no, Pyotr Petrovitch, it was all terribly disheartening,” Pulcheria Alexandrovna hastened to declare with peculiar intonation, “and if Dmitri Prokofitch had not been sent us, I really believe by God Himself, we should have been utterly lost. Here, he is! Dmitri Prokofitch Razumihin,” she added, introducing him to Luzhin.

“I had the pleasure... yesterday,” muttered Pyotr Petrovitch with a hostile glance sidelong at Razumihin; then he scowled and was silent.

Pyotr Petrovitch belonged to that class of persons, on the surface very polite in society, who make a great point of punctiliousness, but who, directly they are crossed in anything, are completely disconcerted, and become more like sacks of flour than elegant and lively men of society. Again all was silent; Raskolnikov was obstinately mute, Avdotya Romanovna was unwilling to open the conversation too soon. Razumihin had nothing to say, so Pulcheria Alexandrovna was anxious again.

“Marfa Petrovna is dead, have you heard?” she began having recourse to her leading item of conversation.

“To be sure, I heard so. I was immediately informed, and I have come to make you acquainted with the fact that Arkady Ivanovitch Svidrigaïlov set off in haste for Petersburg immediately after his wife’s funeral. So at least I have excellent authority for believing.”

“To Petersburg? here?” Dounia asked in alarm and looked at her mother.

“Yes, indeed, and doubtless not without some design, having in view the rapidity of his departure, and all the circumstances preceding it.”

“Good heavens! won’t he leave Dounia in peace even here?” cried Pulcheria Alexandrovna.

“I imagine that neither you nor Avdotya Romanovna have any grounds for uneasiness, unless, of course, you are yourselves desirous of getting into communication with him. For my part I am on my guard, and am now discovering where he is lodging.”

“Oh, Pyotr Petrovitch, you would not believe what a fright you have given me,” Pulcheria Alexandrovna went on: “I’ve only seen him twice, but I thought him terrible, terrible! I am convinced that he was the cause of Marfa Petrovna’s death.”

“It’s impossible to be certain about that. I have precise information. I do not dispute that he may have contributed to accelerate the course of events by the moral influence, so to say, of the affront; but as to the general conduct and moral characteristics of that personage, I am in agreement with you. I do not know whether he is well off now, and precisely what Marfa Petrovna left him; this will be known to me within a very short period; but no doubt here in Petersburg, if he has any pecuniary resources, he will relapse at once into his old ways. He is the most depraved, and abjectly vicious specimen of that class of men. I have considerable reason to believe that Marfa Petrovna, who was so unfortunate as to fall in love with him and to pay his debts eight years ago, was of service to him also in another way. Solely by her exertions and sacrifices, a criminal charge, involving an element of fantastic and homicidal brutality for which he might well have been sentenced to Siberia, was hushed up. That’s the sort of man he is, if you care to know.”

“Good heavens!” cried Pulcheria Alexandrovna. Raskolnikov listened attentively.

“Are you speaking the truth when you say that you have good evidence of this?” Dounia asked sternly and emphatically.

“I only repeat what I was told in secret by Marfa Petrovna. I must observe that from the legal point of view the case was far from clear. There was, and I believe still is, living here a woman called Resslich, a foreigner, who lent small sums of money at interest, and did other commissions, and with this woman Svidrigaïlov had for a long while close and mysterious relations. She had a relation, a niece I believe, living with her, a deaf and dumb girl of fifteen, or perhaps not more than fourteen. Resslich hated this girl, and grudged her every crust; she used to beat her mercilessly. One day the girl was found hanging in the garret. At the inquest the verdict was suicide. After the usual proceedings the matter ended, but, later on, information was given that the child had been... cruelly outraged by Svidrigaïlov. It is true, this was not clearly established, the information was given by another German woman of loose character whose word could not be trusted; no statement was actually made to the police, thanks to Marfa Petrovna’s money and exertions; it did not get beyond gossip. And yet the story is a very significant one. You heard, no doubt, Avdotya Romanovna, when you were with them the story of the servant Philip who died of ill treatment he received six years ago, before the abolition of serfdom.”

“I heard, on the contrary, that this Philip hanged himself.”

“Quite so, but what drove him, or rather perhaps disposed him, to suicide was the systematic persecution and severity of Mr. Svidrigaïlov.”

“I don’t know that,” answered Dounia, dryly. “I only heard a queer story that Philip was a sort of hypochondriac, a sort of domestic philosopher, the servants used to say, ‘he read himself silly,’ and that he hanged himself partly on account of Mr. Svidrigaïlov’s mockery of him and not his blows. When I was there he behaved well to the servants, and they were actually fond of him, though they certainly did blame him for Philip’s death.”

“I perceive, Avdotya Romanovna, that you seem disposed to undertake his defence all of a sudden,” Luzhin observed, twisting his lips into an ambiguous smile, “there’s no doubt that he is an astute man, and insinuating where ladies are concerned, of which Marfa Petrovna, who has died so strangely, is a terrible instance. My only desire has been to be of service to you and your mother with my advice, in view of the renewed efforts which may certainly be anticipated from him. For my part it’s my firm conviction, that he will end in a debtor’s prison again. Marfa Petrovna had not the slightest intention of settling anything substantial on him, having regard for his children’s interests, and, if she left him anything, it would only be the merest sufficiency, something insignificant and ephemeral, which would not last a year for a man of his habits.”

“Pyotr Petrovitch, I beg you,” said Dounia, “say no more of Mr. Svidrigaïlov. It makes me miserable.”

“He has just been to see me,” said Raskolnikov, breaking his silence for the first time.

There were exclamations from all, and they all turned to him. Even Pyotr Petrovitch was roused.

“An hour and a half ago, he came in when I was asleep, waked me, and introduced himself,” Raskolnikov continued. “He was fairly cheerful and at ease, and quite hopes that we shall become friends. He is particularly anxious, by the way, Dounia, for an interview with you, at which he asked me to assist. He has a proposition to make to you, and he told me about it. He told me, too, that a week before her death Marfa Petrovna left you three thousand roubles in her will, Dounia, and that you can receive the money very

shortly.”

“Thank God!” cried Pulcheria Alexandrovna, crossing herself. “Pray for her soul, Dounia!”

“It’s a fact!” broke from Luzhin.

“Tell us, what more?” Dounia urged Raskolnikov.

“Then he said that he wasn’t rich and all the estate was left to his children who are now with an aunt, then that he was staying somewhere not far from me, but where, I don’t know, I didn’t ask....”

“But what, what does he want to propose to Dounia?” cried Pulcheria Alexandrovna in a fright. “Did he tell you?”

“Yes.”

“What was it?”

“I’ll tell you afterwards.”

Raskolnikov ceased speaking and turned his attention to his tea.

Pyotr Petrovitch looked at his watch.

“I am compelled to keep a business engagement, and so I shall not be in your way,” he added with an air of some pique and he began getting up.

“Don’t go, Pyotr Petrovitch,” said Dounia, “you intended to spend the evening. Besides, you wrote yourself that you wanted to have an explanation with mother.”

“Precisely so, Avdotya Romanovna,” Pyotr Petrovitch answered impressively, sitting down again, but still holding his hat. “I certainly desired an explanation with you and your honoured mother upon a very important point indeed. But as your brother cannot speak openly in my presence of some proposals of Mr. Svidrigaïlov, I, too, do not desire and am not able to speak openly... in the presence of others... of certain matters of the greatest gravity. Moreover, my most weighty and urgent request has been disregarded....”

Assuming an aggrieved air, Luzhin relapsed into dignified silence.

“Your request that my brother should not be present at our meeting was disregarded solely at my insistence,” said Dounia. “You wrote that you had been insulted by my brother; I think that this must be explained at once, and you must be reconciled. And if Rodya really has insulted you, then he _should_ and _will_ apologise.”

Pyotr Petrovitch took a stronger line.

“There are insults, Avdotya Romanovna, which no goodwill can make us forget. There is a line in everything which it is dangerous to overstep; and when it has been overstepped, there is no return.”

“That wasn’t what I was speaking of exactly, Pyotr Petrovitch,” Dounia interrupted with some impatience. “Please understand that our whole future depends now on whether all this is explained and set right as soon as possible. I tell you frankly at the start that I cannot look at it in any other light, and if you have the least regard for me, all this business must be ended to-day, however hard that may be. I repeat that if my brother is to blame he will ask your forgiveness.”

“I am surprised at your putting the question like that,” said Luzhin, getting more and more irritated. “Esteeming, and so to say, adoring you, I may at the same time, very well indeed, be able to dislike some member of your family. Though I lay claim to the happiness of your hand, I cannot accept duties incompatible with...”

“Ah, don’t be so ready to take offence, Pyotr Petrovitch,” Dounia interrupted with feeling, “and be the sensible and generous man I have always considered, and wish to consider, you to be. I’ve given you a great promise, I am your betrothed. Trust me in this matter and, believe me, I shall be capable of judging impartially. My assuming the part of judge is as much a surprise for my brother as for you. When I insisted on his coming to our interview to-day after your letter, I told him nothing of what I meant to do. Understand that, if you are not reconciled, I must choose between you--it must be either you or he. That is how the question rests

on your side and on his. I don't want to be mistaken in my choice, and I must not be. For your sake I must break off with my brother, for my brother's sake I must break off with you. I can find out for certain now whether he is a brother to me, and I want to know it; and of you, whether I am dear to you, whether you esteem me, whether you are the husband for me."

"Avdotya Romanovna," Luzhin declared huffily, "your words are of too much consequence to me; I will say more, they are offensive in view of the position I have the honour to occupy in relation to you. To say nothing of your strange and offensive setting me on a level with an impertinent boy, you admit the possibility of breaking your promise to me. You say 'you or he,' showing thereby of how little consequence I am in your eyes... I cannot let this pass considering the relationship and... the obligations existing between us."

"What!" cried Dounia, flushing. "I set your interest beside all that has hitherto been most precious in my life, what has made up the _whole_ of my life, and here you are offended at my making too _little_ account of you."

Raskolnikov smiled sarcastically, Razumihin fidgeted, but Pyotr Petrovitch did not accept the reproof; on the contrary, at every word he became more persistent and irritable, as though he relished it.

"Love for the future partner of your life, for your husband, ought to outweigh your love for your brother," he pronounced sententiously, "and in any case I cannot be put on the same level.... Although I said so emphatically that I would not speak openly in your brother's presence, nevertheless, I intend now to ask your honoured mother for a necessary explanation on a point of great importance closely affecting my dignity. Your son," he turned to Pulcheria Alexandrovna, "yesterday in the presence of Mr. Razsudkin (or... I think that's it? excuse me, I have forgotten your surname") (he bowed politely to Razumihin), "insulted me by misrepresenting the idea I expressed to you in a private conversation, drinking coffee, that is, that marriage with a poor girl who has had experience of trouble is more advantageous from the conjugal point of view than with one who has lived in luxury, since it is more profitable for the moral character. Your son intentionally exaggerated the significance of my words and made them ridiculous, accusing me of malicious intentions, and, as far as I could see, relied upon your correspondence with him. I shall consider myself happy, Pulcheria Alexandrovna, if it is possible for you to convince me of an opposite conclusion, and thereby considerately reassure me. Kindly let me know in what terms precisely you repeated my words in your letter to Rodion Romanovitch."

"I don't remember," faltered Pulcheria Alexandrovna. "I repeated them as I understood them. I don't know how Rodya repeated them to you, perhaps he exaggerated."

"He could not have exaggerated them, except at your instigation."

"Pyotr Petrovitch," Pulcheria Alexandrovna declared with dignity, "the proof that Dounia and I did not take your words in a very bad sense is the fact that we are here."

"Good, mother," said Dounia approvingly.

"Then this is my fault again," said Luzhin, aggrieved.

"Well, Pyotr Petrovitch, you keep blaming Rodion, but you yourself have just written what was false about him," Pulcheria Alexandrovna added, gaining courage.

"I don't remember writing anything false."

"You wrote," Raskolnikov said sharply, not turning to Luzhin, "that I gave money yesterday not to the widow of the man who was killed, as was the fact, but to his daughter (whom I had never seen till yesterday). You wrote this to make dissension between me and my family, and for that object added coarse expressions about the conduct of a girl whom you don't know. All that is mean slander."

"Excuse me, sir," said Luzhin, quivering with fury. "I enlarged upon your qualities and conduct in my letter solely in response to your sister's and mother's inquiries, how I found you, and what impression you made on me. As for what you've alluded to in my letter, be so good as to point out one word of falsehood, show, that is, that you didn't throw away your money, and that there are not worthless persons in that family, however unfortunate."

"To my thinking, you, with all your virtues, are not worth the little finger of that unfortunate girl at whom you throw stones."

"Would you go so far then as to let her associate with your mother and sister?"

"I have done so already, if you care to know. I made her sit down to-day with mother and Dounia."

“Rodya!” cried Pulcheria Alexandrovna. Dounia crimsoned, Razumihin knitted his brows. Luzhin smiled with lofty sarcasm.

“You may see for yourself, Avdotya Romanovna,” he said, “whether it is possible for us to agree. I hope now that this question is at an end, once and for all. I will withdraw, that I may not hinder the pleasures of family intimacy, and the discussion of secrets.” He got up from his chair and took his hat. “But in withdrawing, I venture to request that for the future I may be spared similar meetings, and, so to say, compromises. I appeal particularly to you, honoured Pulcheria Alexandrovna, on this subject, the more as my letter was addressed to you and to no one else.”

Pulcheria Alexandrovna was a little offended.

“You seem to think we are completely under your authority, Pyotr Petrovitch. Dounia has told you the reason your desire was disregarded, she had the best intentions. And indeed you write as though you were laying commands upon me. Are we to consider every desire of yours as a command? Let me tell you on the contrary that you ought to show particular delicacy and consideration for us now, because we have thrown up everything, and have come here relying on you, and so we are in any case in a sense in your hands.”

“That is not quite true, Pulcheria Alexandrovna, especially at the present moment, when the news has come of Marfa Petrovna’s legacy, which seems indeed very apropos, judging from the new tone you take to me,” he added sarcastically.

“Judging from that remark, we may certainly presume that you were reckoning on our helplessness,” Dounia observed irritably.

“But now in any case I cannot reckon on it, and I particularly desire not to hinder your discussion of the secret proposals of Arkady Ivanovitch Svidrigaïlov, which he has entrusted to your brother and which have, I perceive, a great and possibly a very agreeable interest for you.”

“Good heavens!” cried Pulcheria Alexandrovna.

Razumihin could not sit still on his chair.

“Aren’t you ashamed now, sister?” asked Raskolnikov.

“I am ashamed, Rodya,” said Dounia. “Pyotr Petrovitch, go away,” she turned to him, white with anger.

Pyotr Petrovitch had apparently not at all expected such a conclusion. He had too much confidence in himself, in his power and in the helplessness of his victims. He could not believe it even now. He turned pale, and his lips quivered.

“Avdotya Romanovna, if I go out of this door now, after such a dismissal, then, you may reckon on it, I will never come back. Consider what you are doing. My word is not to be shaken.”

“What insolence!” cried Dounia, springing up from her seat. “I don’t want you to come back again.”

“What! So that’s how it stands!” cried Luzhin, utterly unable to the last moment to believe in the rupture and so completely thrown out of his reckoning now. “So that’s how it stands! But do you know, Avdotya Romanovna, that I might protest?”

“What right have you to speak to her like that?” Pulcheria Alexandrovna intervened hotly. “And what can you protest about? What rights have you? Am I to give my Dounia to a man like you? Go away, leave us altogether! We are to blame for having agreed to a wrong action, and I above all....”

“But you have bound me, Pulcheria Alexandrovna,” Luzhin stormed in a frenzy, “by your promise, and now you deny it and... besides... I have been led on account of that into expenses....”

This last complaint was so characteristic of Pyotr Petrovitch, that Raskolnikov, pale with anger and with the effort of restraining it, could not help breaking into laughter. But Pulcheria Alexandrovna was furious.

“Expenses? What expenses? Are you speaking of our trunk? But the conductor brought it for nothing for you. Mercy on us, we have bound you! What are you thinking about, Pyotr Petrovitch, it was you bound us, hand and foot, not we!”

“Enough, mother, no more please,” Avdotya Romanovna implored. “Pyotr Petrovitch, do be kind and go!”

“I am going, but one last word,” he said, quite unable to control himself. “Your mamma seems to have entirely forgotten that I made up my mind to take you, so to speak, after the gossip of the town had spread all over the district in regard to your reputation. Disregarding public opinion for your sake and reinstating your reputation, I certainly might very well reckon on a fitting return, and might indeed look for gratitude on your part. And my eyes have only now been opened! I see myself that I may have acted very, very recklessly in disregarding the universal verdict....”

“Does the fellow want his head smashed?” cried Razumihin, jumping up.

“You are a mean and spiteful man!” cried Dounia.

“Not a word! Not a movement!” cried Raskolnikov, holding Razumihin back; then going close up to Luzhin, “Kindly leave the room!” he said quietly and distinctly, “and not a word more or...”

Pyotr Petrovitch gazed at him for some seconds with a pale face that worked with anger, then he turned, went out, and rarely has any man carried away in his heart such vindictive hatred as he felt against Raskolnikov. Him, and him alone, he blamed for everything. It is noteworthy that as he went downstairs he still imagined that his case was perhaps not utterly lost, and that, so far as the ladies were concerned, all might “very well indeed” be set right again.

CHAPTER III

The fact was that up to the last moment he had never expected such an ending; he had been overbearing to the last degree, never dreaming that two destitute and defenceless women could escape from his control. This conviction was strengthened by his vanity and conceit, a conceit to the point of fatuity. Pyotr Petrovitch, who had made his way up from insignificance, was morbidly given to self-admiration, had the highest opinion of his intelligence and capacities, and sometimes even gloated in solitude over his image in the glass. But what he loved and valued above all was the money he had amassed by his labour, and by all sorts of devices: that money made him the equal of all who had been his superiors.

When he had bitterly reminded Dounia that he had decided to take her in spite of evil report, Pyotr Petrovitch had spoken with perfect sincerity and had, indeed, felt genuinely indignant at such “black ingratitude.” And yet, when he made Dounia his offer, he was fully aware of the groundlessness of all the gossip. The story had been everywhere contradicted by Marfa Petrovna, and was by then disbelieved by all the townspeople, who were warm in Dounia’s defence. And he would not have denied that he knew all that at the time. Yet he still thought highly of his own resolution in lifting Dounia to his level and regarded it as something heroic. In speaking of it to Dounia, he had let out the secret feeling he cherished and admired, and he could not understand that others should fail to admire it too. He had called on Raskolnikov with the feelings of a benefactor who is about to reap the fruits of his good deeds and to hear agreeable flattery. And as he went downstairs now, he considered himself most undeservedly injured and unrecognised.

Dounia was simply essential to him; to do without her was unthinkable. For many years he had had voluptuous dreams of marriage, but he had gone on waiting and amassing money. He brooded with relish, in profound secret, over the image of a girl--virtuous, poor (she must be poor), very young, very pretty, of good birth and education, very timid, one who had suffered much, and was completely humbled before him, one who would all her life look on him as her saviour, worship him, admire him and only him. How many scenes, how many amorous episodes he had imagined on this seductive and playful theme, when his work was over! And, behold, the dream of so many years was all but realised; the beauty and education of Avdotya Romanovna had impressed him; her helpless position had been a great allurement; in her he had found even more than he dreamed of. Here was a girl of pride, character, virtue, of education and breeding superior to his own (he felt that), and this creature would be slavishly grateful all her life for his heroic condescension, and would humble herself in the dust before him, and he would have absolute, unbounded power over her!... Not long before, he had, too, after long reflection and hesitation, made an important change in his career and was now entering on a wider circle of business. With this change his cherished dreams of rising into a higher class of society seemed likely to be realised.... He was, in fact, determined to try his fortune in Petersburg. He knew that women could do a very great deal. The fascination of a charming, virtuous, highly educated woman might make his way easier, might do wonders in attracting people to him, throwing an aureole round him, and now everything was in ruins! This sudden horrible rupture affected him like a clap of thunder; it was like a hideous joke, an absurdity. He had only been a tiny bit masterful, had not even time to speak out, had simply made a joke, been carried away--and it had ended so seriously. And, of course, too, he did love Dounia in his own way; he already possessed her in his dreams--and all at once! No! The next day, the very next day, it must all be set right, smoothed over, settled.

Above all he must crush that conceited milksop who was the cause of it all. With a sick feeling he could not help recalling Razumihin too, but, he soon reassured himself on that score; as though a fellow like that could be put on a level with him! The man he really dreaded in earnest was Svidrigaïlov.... He had, in short, a great deal to attend to....

*****

“No, I, I am more to blame than anyone!” said Dounia, kissing and embracing her mother. “I was tempted by his money, but on my honour, brother, I had no idea he was such a base man. If I had seen through him before, nothing would have tempted me! Don’t blame me, brother!”

“God has delivered us! God has delivered us!” Pulcheria Alexandrovna muttered, but half consciously, as though scarcely able to realise what had happened.

They were all relieved, and in five minutes they were laughing. Only now and then Dounia turned white and frowned, remembering what had passed. Pulcheria Alexandrovna was surprised to find that she, too, was glad: she had only that morning thought rupture with Luzhin a terrible misfortune. Razumihin was delighted. He did not yet dare to express his joy fully, but he was in a fever of excitement as though a ton-weight had fallen off his heart. Now he had the right to devote his life to them, to serve them.... Anything might happen now! But he felt afraid to think of further possibilities and dared not let his imagination range. But Raskolnikov sat still in the same place, almost sullen and indifferent. Though he had been the most insistent on getting rid of Luzhin, he seemed now the least concerned at what had happened. Dounia could not help thinking that he was still angry with her, and Pulcheria Alexandrovna watched him timidly.

“What did Svidrigaïlov say to you?” said Dounia, approaching him.

“Yes, yes!” cried Pulcheria Alexandrovna.

Raskolnikov raised his head.

“He wants to make you a present of ten thousand roubles and he desires to see you once in my presence.”

“See her! On no account!” cried Pulcheria Alexandrovna. “And how dare he offer her money!”

Then Raskolnikov repeated (rather dryly) his conversation with Svidrigaïlov, omitting his account of the ghostly visitations of Marfa Petrovna, wishing to avoid all unnecessary talk.

“What answer did you give him?” asked Dounia.

“At first I said I would not take any message to you. Then he said that he would do his utmost to obtain an interview with you without my help. He assured me that his passion for you was a passing infatuation, now he has no feeling for you. He doesn’t want you to marry Luzhin.... His talk was altogether rather muddled.”

“How do you explain him to yourself, Rodya? How did he strike you?”

“I must confess I don’t quite understand him. He offers you ten thousand, and yet says he is not well off. He says he is going away, and in ten minutes he forgets he has said it. Then he says he is going to be married and has already fixed on the girl.... No doubt he has a motive, and probably a bad one. But it’s odd that he should be so clumsy about it if he had any designs against you.... Of course, I refused this money on your account, once for all. Altogether, I thought him very strange.... One might almost think he was mad. But I may be mistaken; that may only be the part he assumes. The death of Marfa Petrovna seems to have made a great impression on him.”

“God rest her soul,” exclaimed Pulcheria Alexandrovna. “I shall always, always pray for her! Where should we be now, Dounia, without this three thousand! It’s as though it had fallen from heaven! Why, Rodya, this morning we had only three roubles in our pocket and Dounia and I were just planning to pawn her watch, so as to avoid borrowing from that man until he offered help.”

Dounia seemed strangely impressed by Svidrigaïlov’s offer. She still stood meditating.

“He has got some terrible plan,” she said in a half whisper to herself, almost shuddering.

Raskolnikov noticed this disproportionate terror.

“I fancy I shall have to see him more than once again,” he said to Dounia.

“We will watch him! I will track him out!” cried Razumihin, vigorously. “I won’t lose sight of him. Rodya has given me leave. He said to me himself just now. ‘Take care of my sister.’ Will you give me leave, too, Avdotya Romanovna?”

Dounia smiled and held out her hand, but the look of anxiety did not leave her face. Pulcheria Alexandrovna gazed at her timidly, but the three thousand roubles had obviously a soothing effect on her.

A quarter of an hour later, they were all engaged in a lively conversation. Even Raskolnikov listened attentively for some time, though he did not talk. Razumihin was the speaker.

“And why, why should you go away?” he flowed on ecstatically. “And what are you to do in a little town? The great thing is, you are all here together and you need one another--you do need one another, believe me. For a time, anyway.... Take me into partnership, and I assure you we’ll plan a capital enterprise. Listen! I’ll explain it all in detail to you, the whole project! It all flashed into my head this morning, before anything had happened... I tell you what; I have an uncle, I must introduce him to you (a most accommodating and respectable old man). This uncle has got a capital of a thousand roubles, and he lives on his pension and has no need of that money. For the last two years he has been bothering me to borrow it from him and pay him six per cent interest. I know what that means; he simply wants to help me. Last year I had no need of it, but this year I resolved to borrow it as soon as he arrived. Then you lend me another thousand of your three and we have enough for a start, so we’ll go into partnership, and what are we going to do?”

Then Razumihin began to unfold his project, and he explained at length that almost all our publishers and booksellers know nothing at all of what they are selling, and for that reason they are usually bad publishers, and that any decent publications pay as a rule and give a profit, sometimes a considerable one. Razumihin had, indeed, been dreaming of setting up as a publisher. For the last two years he had been working in publishers’ offices, and knew three European languages well, though he had told Raskolnikov six days before that he was “schwach” in German with an object of persuading him to take half his translation and half the payment for it. He had told a lie then, and Raskolnikov knew he was lying.

“Why, why should we let our chance slip when we have one of the chief means of success--money of our own!” cried Razumihin warmly. “Of course there will be a lot of work, but we will work, you, Avdotya Romanovna, I, Rodion.... You get a splendid profit on some books nowadays! And the great point of the business is that we shall know just what wants translating, and we shall be translating, publishing, learning all at once. I can be of use because I have experience. For nearly two years I’ve been scuttling about among the publishers, and now I know every detail of their business. You need not be a saint to make pots, believe me! And why, why should we let our chance slip! Why, I know--and I kept the secret--two or three books which one might get a hundred roubles simply for thinking of translating and publishing. Indeed, and I would not take five hundred for the very idea of one of them. And what do you think? If I were to tell a publisher, I dare say he’d hesitate--they are such blockheads! And as for the business side, printing, paper, selling, you trust to me, I know my way about. We’ll begin in a small way and go on to a large. In any case it will get us our living and we shall get back our capital.”

Dounia’s eyes shone.

“I like what you are saying, Dmitri Prokofitch!” she said.

“I know nothing about it, of course,” put in Pulcheria Alexandrovna, “it may be a good idea, but again God knows. It’s new and untried. Of course, we must remain here at least for a time.” She looked at Rodya.

“What do you think, brother?” said Dounia.

“I think he’s got a very good idea,” he answered. “Of course, it’s too soon to dream of a publishing firm, but we certainly might bring out five or six books and be sure of success. I know of one book myself which would be sure to go well. And as for his being able to manage it, there’s no doubt about that either. He knows the business.... But we can talk it over later....”

“Hurrah!” cried Razumihin. “Now, stay, there’s a flat here in this house, belonging to the same owner. It’s a special flat apart, not communicating with these lodgings. It’s furnished, rent moderate, three rooms. Suppose you take them to begin with. I’ll pawn your watch to-morrow and bring you the money, and everything can be arranged then. You can all three live together, and Rodya will be with you. But where are you off to, Rodya?”

“What, Rodya, you are going already?” Pulcheria Alexandrovna asked in dismay.

“At such a minute?” cried Razumihin.

Dounia looked at her brother with incredulous wonder. He held his cap in his hand, he was preparing to leave them.

“One would think you were burying me or saying good-bye for ever,” he said somewhat oddly. He attempted to smile, but it did not turn out a smile. “But who knows, perhaps it is the last time we shall see each other...” he let slip accidentally. It was what he was thinking, and it somehow was uttered aloud.

“What is the matter with you?” cried his mother.

“Where are you going, Rodya?” asked Dounia rather strangely.

“Oh, I’m quite obliged to...” he answered vaguely, as though hesitating what he would say. But there was a look of sharp determination in his white face.

“I meant to say... as I was coming here... I meant to tell you, mother, and you, Dounia, that it would be better for us to part for a time. I feel ill, I am not at peace.... I will come afterwards, I will come of myself... when it’s possible. I remember you and love you.... Leave me, leave me alone. I decided this even before... I’m absolutely resolved on it. Whatever may come to me, whether I come to ruin or not, I want to be alone. Forget me altogether, it’s better. Don’t inquire about me. When I can, I’ll come of myself or... I’ll send for you. Perhaps it will all come back, but now if you love me, give me up... else I shall begin to hate you, I feel it.... Good-bye!”

“Good God!” cried Pulcheria Alexandrovna. Both his mother and his sister were terribly alarmed. Razumihin was also.

“Rodya, Rodya, be reconciled with us! Let us be as before!” cried his poor mother.

He turned slowly to the door and slowly went out of the room. Dounia overtook him.

“Brother, what are you doing to mother?” she whispered, her eyes flashing with indignation.

He looked dully at her.

“No matter, I shall come.... I’m coming,” he muttered in an undertone, as though not fully conscious of what he was saying, and he went out of the room.

“Wicked, heartless egoist!” cried Dounia.

“He is insane, but not heartless. He is mad! Don’t you see it? You’re heartless after that!” Razumihin whispered in her ear, squeezing her hand tightly. “I shall be back directly,” he shouted to the horror-stricken mother, and he ran out of the room.

Raskolnikov was waiting for him at the end of the passage.

“I knew you would run after me,” he said. “Go back to them--be with them... be with them to-morrow and always.... I... perhaps I shall come... if I can. Good-bye.”

And without holding out his hand he walked away.

“But where are you going? What are you doing? What’s the matter with you? How can you go on like this?” Razumihin muttered, at his wits’ end.

Raskolnikov stopped once more.

“Once for all, never ask me about anything. I have nothing to tell you. Don’t come to see me. Maybe I’ll come here.... Leave me, but _don’t leave_ them. Do you understand me?”

It was dark in the corridor, they were standing near the lamp. For a minute they were looking at one another in silence. Razumihin remembered that minute all his life. Raskolnikov’s burning and intent eyes grew more penetrating every moment, piercing into his soul, into his consciousness. Suddenly Razumihin started. Something strange, as it were, passed between them.... Some idea, some hint, as it were, slipped, something awful, hideous, and suddenly understood on both sides.... Razumihin turned pale.

“Do you understand now?” said Raskolnikov, his face twitching nervously. “Go back, go to them,” he said suddenly, and turning quickly, he went out of the house.

I will not attempt to describe how Razumihin went back to the ladies, how he soothed them, how he protested that Rodya needed rest in his illness, protested that Rodya was sure to come, that he would come every day, that he was very, very much upset, that he must not be irritated, that he, Razumihin, would watch over him, would get him a doctor, the best doctor, a consultation.... In fact from that evening Razumihin took his place with them as a son and a brother.

CHAPTER IV

Raskolnikov went straight to the house on the canal bank where Sonia lived. It was an old green house of three storeys. He found the porter and obtained from him vague directions as to the whereabouts of Kapernaumov, the tailor. Having found in the corner of the courtyard the entrance to the dark and narrow staircase, he mounted to the second floor and came out into a gallery that ran round the whole second storey over the yard. While he was wandering in the darkness, uncertain where to turn for Kapernaumov’s door, a door opened three paces from him; he mechanically took hold of it.

“Who is there?” a woman’s voice asked uneasily.

“It’s I... come to see you,” answered Raskolnikov, and he walked into the tiny entry.

On a broken chair stood a candle in a battered copper candlestick.

“It’s you! Good heavens!” cried Sonia weakly, and she stood rooted to the spot.

“Which is your room? This way?” and Raskolnikov, trying not to look at her, hastened in.

A minute later Sonia, too, came in with the candle, set down the candlestick and, completely disconcerted, stood before him inexpressibly agitated and apparently frightened by his unexpected visit. The colour rushed suddenly to her pale face and tears came into her eyes... She felt sick and ashamed and happy, too.... Raskolnikov turned away quickly and sat on a chair by the table. He scanned the room in a rapid glance.

It was a large but exceedingly low-pitched room, the only one let by the Kapernaumovs, to whose rooms a closed door led in the wall on the left. In the opposite side on the right hand wall was another door, always kept locked. That led to the next flat, which formed a separate lodging. Sonia’s room looked like a barn; it was a very irregular quadrangle and this gave it a grotesque appearance. A wall with three windows looking out on to the canal ran aslant so that one corner formed a very acute angle, and it was difficult to see in it without very strong light. The other corner was disproportionately obtuse. There was scarcely any furniture in the big room: in the corner on the right was a bedstead, beside it, nearest the door, a chair. A plain, deal table covered by a blue cloth stood against the same wall, close to the door into the other flat. Two rush-bottom chairs stood by the table. On the opposite wall near the acute angle stood a small plain wooden chest of drawers looking, as it were, lost in a desert. That was all there was in the room. The yellow, scratched and shabby wall-paper was black in the corners. It must have been damp and full of fumes in the winter. There was every sign of poverty; even the bedstead had no curtain.

Sonia looked in silence at her visitor, who was so attentively and unceremoniously scrutinising her room, and even began at last to tremble with terror, as though she was standing before her judge and the arbiter of her destinies.

“I am late.... It’s eleven, isn’t it?” he asked, still not lifting his eyes.

“Yes,” muttered Sonia, “oh yes, it is,” she added, hastily, as though in that lay her means of escape. “My landlady’s clock has just struck... I heard it myself....”

“I’ve come to you for the last time,” Raskolnikov went on gloomily, although this was the first time. “I may perhaps not see you again...”

“Are you... going away?”

“I don’t know... to-morrow....”

“Then you are not coming to Katerina Ivanovna to-morrow?” Sonia’s voice shook.

“I don’t know. I shall know to-morrow morning.... Never mind that: I’ve come to say one word....”

He raised his brooding eyes to her and suddenly noticed that he was sitting down while she was all the while standing before him.

“Why are you standing? Sit down,” he said in a changed voice, gentle and friendly.

She sat down. He looked kindly and almost compassionately at her.

“How thin you are! What a hand! Quite transparent, like a dead hand.”

He took her hand. Sonia smiled faintly.

“I have always been like that,” she said.

“Even when you lived at home?”

“Yes.”

“Of course, you were,” he added abruptly and the expression of his face and the sound of his voice changed again suddenly.

He looked round him once more.

“You rent this room from the Kapernaumovs?”

“Yes....”

“They live there, through that door?”

“Yes.... They have another room like this.”

“All in one room?”

“Yes.”

“I should be afraid in your room at night,” he observed gloomily.

“They are very good people, very kind,” answered Sonia, who still seemed bewildered, “and all the furniture, everything... everything is theirs. And they are very kind and the children, too, often come to see me.”

“They all stammer, don’t they?”

“Yes.... He stammers and he’s lame. And his wife, too.... It’s not exactly that she stammers, but she can’t speak plainly. She is a very kind woman. And he used to be a house serf. And there are seven children... and it’s only the eldest one that stammers and the others are simply ill... but they don’t stammer.... But where did you hear about them?” she added with some surprise.

“Your father told me, then. He told me all about you.... And how you went out at six o’clock and came back at nine and how Katerina Ivanovna knelt down by your bed.”

Sonia was confused.

“I fancied I saw him to-day,” she whispered hesitatingly.

“Whom?”

“Father. I was walking in the street, out there at the corner, about ten o’clock and he seemed to be walking in front. It looked just like him. I wanted to go to Katerina Ivanovna....”

“You were walking in the streets?”

“Yes,” Sonia whispered abruptly, again overcome with confusion and looking down.

“Katerina Ivanovna used to beat you, I dare say?”

“Oh no, what are you saying? No!” Sonia looked at him almost with dismay.

“You love her, then?”

“Love her? Of course!” said Sonia with plaintive emphasis, and she clasped her hands in distress. “Ah, you don’t.... If you only knew! You see, she is quite like a child.... Her mind is quite unhinged, you see... from sorrow. And how clever she used to be... how generous... how kind! Ah, you don’t understand, you don’t understand!”

Sonia said this as though in despair, wringing her hands in excitement and distress. Her pale cheeks flushed, there was a look of anguish in her eyes. It was clear that she was stirred to the very depths, that she was longing to speak, to champion, to express something. A sort of _insatiable_ compassion, if one may so express it, was reflected in every feature of her face.

“Beat me! how can you? Good heavens, beat me! And if she did beat me, what then? What of it? You know nothing, nothing about it.... She is so unhappy... ah, how unhappy! And ill.... She is seeking righteousness, she is pure. She has such faith that there must be righteousness everywhere and she expects it.... And if you were to torture her, she wouldn’t do wrong. She doesn’t see that it’s impossible for people to be righteous and she is angry at it. Like a child, like a child. She is good!”

“And what will happen to you?”

Sonia looked at him inquiringly.

“They are left on your hands, you see. They were all on your hands before, though.... And your father came to you to beg for drink. Well, how will it be now?”

“I don’t know,” Sonia articulated mournfully.

“Will they stay there?”

“I don’t know.... They are in debt for the lodging, but the landlady, I hear, said to-day that she wanted to get rid of them, and Katerina Ivanovna says that she won’t stay another minute.”

“How is it she is so bold? She relies upon you?”

“Oh, no, don’t talk like that.... We are one, we live like one.” Sonia was agitated again and even angry, as though a canary or some other little bird were to be angry. “And what could she do? What, what could she do?” she persisted, getting hot and excited. “And how she cried to-day! Her mind is unhinged, haven’t you noticed it? At one minute she is worrying like a child that everything should be right to-morrow, the lunch and all that.... Then she is wringing her hands, spitting blood, weeping, and all at once she will begin knocking her head against the wall, in despair. Then she will be comforted again. She builds all her hopes on you; she says that you will help her now and that she will borrow a little money somewhere and go to her native town with me and set up a boarding school for the daughters of gentlemen and take me to superintend it, and we will begin a new splendid life. And she kisses and hugs me, comforts me, and you know she has such faith, such faith in her fancies! One can’t contradict her. And all the day long she has been washing, cleaning, mending. She dragged the wash tub into the room with her feeble hands and sank on the bed, gasping for breath. We went this morning to the shops to buy shoes for Polenka and Lida for theirs are quite worn out. Only the money we’d reckoned wasn’t enough, not nearly enough. And she picked out such dear little boots, for she has taste, you don’t know. And there in the shop she burst out crying before the shopmen because she hadn’t enough.... Ah, it was sad to see her....”

“Well, after that I can understand your living like this,” Raskolnikov said with a bitter smile.

“And aren’t you sorry for them? Aren’t you sorry?” Sonia flew at him again. “Why, I know, you gave your last penny yourself, though you’d seen nothing of it, and if you’d seen everything, oh dear! And how often, how often I’ve brought her to tears! Only last week! Yes, I! Only a week before his death. I was cruel! And how often I’ve done it! Ah, I’ve been wretched at the thought of it all day!”

Sonia wrung her hands as she spoke at the pain of remembering it.

“You were cruel?”

“Yes, I--I. I went to see them,” she went on, weeping, “and father said, ‘read me something, Sonia, my head aches, read to me, here’s a book.’ He had a book he had got from Andrey Semyonovitch Lebeziatnikov, he lives there, he always used to get hold of such funny books. And I said, ‘I can’t stay,’ as I didn’t want to read, and I’d gone in chiefly to show Katerina Ivanovna some collars. Lizaveta, the pedlar, sold me some collars and cuffs cheap, pretty, new, embroidered ones. Katerina Ivanovna liked them very much; she put them on and looked at herself in the glass and was delighted with them. ‘Make me a present of them, Sonia,’ she

said, ‘please do.’ ‘_Please do_,’ she said, she wanted them so much. And when could she wear them? They just reminded her of her old happy days. She looked at herself in the glass, admired herself, and she has no clothes at all, no things of her own, hasn’t had all these years! And she never asks anyone for anything; she is proud, she’d sooner give away everything. And these she asked for, she liked them so much. And I was sorry to give them. ‘What use are they to you, Katerina Ivanovna?’ I said. I spoke like that to her, I ought not to have said that! She gave me such a look. And she was so grieved, so grieved at my refusing her. And it was so sad to see.... And she was not grieved for the collars, but for my refusing, I saw that. Ah, if only I could bring it all back, change it, take back those words! Ah, if I... but it’s nothing to you!”

“Did you know Lizaveta, the pedlar?”

“Yes.... Did you know her?” Sonia asked with some surprise.

“Katerina Ivanovna is in consumption, rapid consumption; she will soon die,” said Raskolnikov after a pause, without answering her question.

“Oh, no, no, no!”

And Sonia unconsciously clutched both his hands, as though imploring that she should not.

“But it will be better if she does die.”

“No, not better, not at all better!” Sonia unconsciously repeated in dismay.

“And the children? What can you do except take them to live with you?”

“Oh, I don’t know,” cried Sonia, almost in despair, and she put her hands to her head.

It was evident that that idea had very often occurred to her before and he had only roused it again.

“And, what, if even now, while Katerina Ivanovna is alive, you get ill and are taken to the hospital, what will happen then?” he persisted pitilessly.

“How can you? That cannot be!”

And Sonia’s face worked with awful terror.

“Cannot be?” Raskolnikov went on with a harsh smile. “You are not insured against it, are you? What will happen to them then? They will be in the street, all of them, she will cough and beg and knock her head against some wall, as she did to-day, and the children will cry.... Then she will fall down, be taken to the police station and to the hospital, she will die, and the children...”

“Oh, no.... God will not let it be!” broke at last from Sonia’s overburdened bosom.

She listened, looking imploringly at him, clasping her hands in dumb entreaty, as though it all depended upon him.

Raskolnikov got up and began to walk about the room. A minute passed. Sonia was standing with her hands and her head hanging in terrible dejection.

“And can’t you save? Put by for a rainy day?” he asked, stopping suddenly before her.

“No,” whispered Sonia.

“Of course not. Have you tried?” he added almost ironically.

“Yes.”

“And it didn’t come off! Of course not! No need to ask.”

And again he paced the room. Another minute passed.

“You don’t get money every day?”

Sonia was more confused than ever and colour rushed into her face again.

“No,” she whispered with a painful effort.

“It will be the same with Polenka, no doubt,” he said suddenly.

“No, no! It can’t be, no!” Sonia cried aloud in desperation, as though she had been stabbed. “God would not allow anything so awful!”

“He lets others come to it.”

“No, no! God will protect her, God!” she repeated beside herself.

“But, perhaps, there is no God at all,” Raskolnikov answered with a sort of malignance, laughed and looked at her.

Sonia’s face suddenly changed; a tremor passed over it. She looked at him with unutterable reproach, tried to say something, but could not speak and broke into bitter, bitter sobs, hiding her face in her hands.

“You say Katerina Ivanovna’s mind is unhinged; your own mind is unhinged,” he said after a brief silence.

Five minutes passed. He still paced up and down the room in silence, not looking at her. At last he went up to her; his eyes glittered. He put his two hands on her shoulders and looked straight into her tearful face. His eyes were hard, feverish and piercing, his lips were twitching. All at once he bent down quickly and dropping to the ground, kissed her foot. Sonia drew back from him as from a madman. And certainly he looked like a madman.

“What are you doing to me?” she muttered, turning pale, and a sudden anguish clutched at her heart.

He stood up at once.

“I did not bow down to you, I bowed down to all the suffering of humanity,” he said wildly and walked away to the window. “Listen,” he added, turning to her a minute later. “I said just now to an insolent man that he was not worth your little finger... and that I did my sister honour making her sit beside you.”

“Ach, you said that to them! And in her presence?” cried Sonia, frightened. “Sit down with me! An honour! Why, I’m... dishonourable.... Ah, why did you say that?”

“It was not because of your dishonour and your sin I said that of you, but because of your great suffering. But you are a great sinner, that’s true,” he added almost solemnly, “and your worst sin is that you have destroyed and betrayed yourself _for nothing_. Isn’t that fearful? Isn’t it fearful that you are living in this filth which you loathe so, and at the same time you know yourself (you’ve only to open your eyes) that you are not helping anyone by it, not saving anyone from anything? Tell me,” he went on almost in a frenzy, “how this shame and degradation can exist in you side by side with other, opposite, holy feelings? It would be better, a thousand times better and wiser to leap into the water and end it all!”

“But what would become of them?” Sonia asked faintly, gazing at him with eyes of anguish, but not seeming surprised at his suggestion.

Raskolnikov looked strangely at her. He read it all in her face; so she must have had that thought already, perhaps many times, and earnestly she had thought out in her despair how to end it and so earnestly, that now she scarcely wondered at his suggestion. She had not even noticed the cruelty of his words. (The significance of his reproaches and his peculiar attitude to her shame she had, of course, not noticed either, and that, too, was clear to him.) But he saw how monstrously the thought of her disgraceful, shameful position was torturing her and had long tortured her. “What, what,” he thought, “could hitherto have hindered her from putting an end to it?” Only then he realised what those poor little orphan children and that pitiful half-crazy Katerina Ivanovna, knocking her head against the wall in her consumption, meant for Sonia.

But, nevertheless, it was clear to him again that with her character and the amount of education she had after all received, she could not in any case remain so. He was still confronted by the question, how could she have remained so long in that position without going out of her mind, since she could not bring herself to jump into the water? Of course he knew that Sonia’s position was an exceptional case, though unhappily not unique and not infrequent, indeed; but that very exceptionalness, her tinge of education, her previous life might, one would have thought, have killed her at the first step on that revolting path. What held her up--surely not depravity? All that infamy had obviously only touched her mechanically, not one drop of real depravity had penetrated to her heart; he saw that. He saw through her as she stood before him....

“There are three ways before her,” he thought, “the canal, the madhouse, or... at last to sink into depravity which obscures the mind and turns the heart to stone.”

The last idea was the most revolting, but he was a sceptic, he was young, abstract, and therefore cruel, and so he could not help believing that the last end was the most likely.

“But can that be true?” he cried to himself. “Can that creature who has still preserved the purity of her spirit be consciously drawn at last into that sink of filth and iniquity? Can the process already have begun? Can it be that she has only been able to bear it till now, because vice has begun to be less loathsome to her? No, no, that cannot be!” he cried, as Sonia had just before. “No, what has kept her from the canal till now is the idea of sin and they, the children.... And if she has not gone out of her mind... but who says she has not gone out of her mind? Is she in her senses? Can one talk, can one reason as she does? How can she sit on the edge of the abyss of loathsomeness into which she is slipping and refuse to listen when she is told of danger? Does she expect a miracle? No doubt she does. Doesn’t that all mean madness?”

He stayed obstinately at that thought. He liked that explanation indeed better than any other. He began looking more intently at her.

“So you pray to God a great deal, Sonia?” he asked her.

Sonia did not speak; he stood beside her waiting for an answer.

“What should I be without God?” she whispered rapidly, forcibly, glancing at him with suddenly flashing eyes, and squeezing his hand.

“Ah, so that is it!” he thought.

“And what does God do for you?” he asked, probing her further.

Sonia was silent a long while, as though she could not answer. Her weak chest kept heaving with emotion.

“Be silent! Don’t ask! You don’t deserve!” she cried suddenly, looking sternly and wrathfully at him.

“That’s it, that’s it,” he repeated to himself.

“He does everything,” she whispered quickly, looking down again.

“That’s the way out! That’s the explanation,” he decided, scrutinising her with eager curiosity, with a new, strange, almost morbid feeling. He gazed at that pale, thin, irregular, angular little face, those soft blue eyes, which could flash with such fire, such stern energy, that little body still shaking with indignation and anger--and it all seemed to him more and more strange, almost impossible. “She is a religious maniac!” he repeated to himself.

There was a book lying on the chest of drawers. He had noticed it every time he paced up and down the room. Now he took it up and looked at it. It was the New Testament in the Russian translation. It was bound in leather, old and worn.

“Where did you get that?” he called to her across the room.

She was still standing in the same place, three steps from the table.

“It was brought me,” she answered, as it were unwillingly, not looking at him.

“Who brought it?”

“Lizaveta, I asked her for it.”

“Lizaveta! strange!” he thought.

Everything about Sonia seemed to him stranger and more wonderful every moment. He carried the book to the candle and began to turn over the pages.

“Where is the story of Lazarus?” he asked suddenly.

Sonia looked obstinately at the ground and would not answer. She was standing sideways to the table.

“Where is the raising of Lazarus? Find it for me, Sonia.”

She stole a glance at him.

“You are not looking in the right place.... It’s in the fourth gospel,” she whispered sternly, without looking at him.

“Find it and read it to me,” he said. He sat down with his elbow on the table, leaned his head on his hand and looked away sullenly, prepared to listen.

“In three weeks’ time they’ll welcome me in the madhouse! I shall be there if I am not in a worse place,” he muttered to himself.

Sonia heard Raskolnikov’s request distrustfully and moved hesitatingly to the table. She took the book however.

“Haven’t you read it?” she asked, looking up at him across the table.

Her voice became sterner and sterner.

“Long ago.... When I was at school. Read!”

“And haven’t you heard it in church?”

“I... haven’t been. Do you often go?”

“N-no,” whispered Sonia.

Raskolnikov smiled.

“I understand.... And you won’t go to your father’s funeral to-morrow?”

“Yes, I shall. I was at church last week, too... I had a requiem service.”

“For whom?”

“For Lizaveta. She was killed with an axe.”

His nerves were more and more strained. His head began to go round.

“Were you friends with Lizaveta?”

“Yes.... She was good... she used to come... not often... she couldn’t.... We used to read together and... talk. She will see God.”

The last phrase sounded strange in his ears. And here was something new again: the mysterious meetings with Lizaveta and both of them--religious maniacs.

“I shall be a religious maniac myself soon! It’s infectious!”

“Read!” he cried irritably and insistently.

Sonia still hesitated. Her heart was throbbing. She hardly dared to read to him. He looked almost with exasperation at the “unhappy lunatic.”

“What for? You don’t believe?...” she whispered softly and as it were breathlessly.

“Read! I want you to,” he persisted. “You used to read to Lizaveta.”

Sonia opened the book and found the place. Her hands were shaking, her voice failed her. Twice she tried to begin and could not bring out the first syllable.

“Now a certain man was sick named Lazarus of Bethany...” she forced herself at last to read, but at the third word her voice broke like an overstrained string. There was a catch in her breath.

Raskolnikov saw in part why Sonia could not bring herself to read to him and the more he saw this, the more roughly and irritably he insisted on her doing so. He understood only too well how painful it was for her to betray and unveil all that was her _own_. He understood that these feelings really were her _secret treasure_, which she had kept perhaps for years, perhaps from childhood,

while she lived with an unhappy father and a distracted stepmother crazed by grief, in the midst of starving children and unseemly abuse and reproaches. But at the same time he knew now and knew for certain that, although it filled her with dread and suffering, yet she had a tormenting desire to read and to read to _him_ that he might hear it, and to read _now_ whatever might come of it!... He read this in her eyes, he could see it in her intense emotion. She mastered herself, controlled the spasm in her throat and went on reading the eleventh chapter of St. John. She went on to the nineteenth verse:

“And many of the Jews came to Martha and Mary to comfort them concerning their brother.

“Then Martha as soon as she heard that Jesus was coming went and met Him: but Mary sat still in the house.

“Then said Martha unto Jesus, Lord, if Thou hadst been here, my brother had not died.

“But I know that even now whatsoever Thou wilt ask of God, God will give it Thee....”

Then she stopped again with a shamefaced feeling that her voice would quiver and break again.

“Jesus said unto her, thy brother shall rise again.

“Martha saith unto Him, I know that he shall rise again in the resurrection, at the last day.

“Jesus said unto her, I am the resurrection and the life: he that believeth in Me though he were dead, yet shall he live.

“And whosoever liveth and believeth in Me shall never die. Believest thou this?

“She saith unto Him,”

(And drawing a painful breath, Sonia read distinctly and forcibly as though she were making a public confession of faith.)

“Yea, Lord: I believe that Thou art the Christ, the Son of God Which should come into the world.”

She stopped and looked up quickly at him, but controlling herself went on reading. Raskolnikov sat without moving, his elbows on the table and his eyes turned away. She read to the thirty-second verse.

“Then when Mary was come where Jesus was and saw Him, she fell down at His feet, saying unto Him, Lord if Thou hadst been here, my brother had not died.

“When Jesus therefore saw her weeping, and the Jews also weeping which came with her, He groaned in the spirit and was troubled,

“And said, Where have ye laid him? They said unto Him, Lord, come and see.

“Jesus wept.

“Then said the Jews, behold how He loved him!

“And some of them said, could not this Man which opened the eyes of the blind, have caused that even this man should not have died?”

Raskolnikov turned and looked at her with emotion. Yes, he had known it! She was trembling in a real physical fever. He had expected it. She was getting near the story of the greatest miracle and a feeling of immense triumph came over her. Her voice rang out like a bell; triumph and joy gave it power. The lines danced before her eyes, but she knew what she was reading by heart. At the last verse “Could not this Man which opened the eyes of the blind...” dropping her voice she passionately reproduced the doubt, the reproach and censure of the blind disbelieving Jews, who in another moment would fall at His feet as though struck by thunder, sobbing and believing.... “And _he, he_--too, is blinded and unbelieving, he, too, will hear, he, too, will believe, yes, yes! At once, now,” was what she was dreaming, and she was quivering with happy anticipation.

“Jesus therefore again groaning in Himself cometh to the grave. It was a cave, and a stone lay upon it.

“Jesus said, Take ye away the stone. Martha, the sister of him that was dead, saith unto Him, Lord by this time he stinketh: for he hath been dead four days.”

She laid emphasis on the word _four_.

“Jesus saith unto her, Said I not unto thee that if thou wouldest believe, thou shouldest see the glory of God?

“Then they took away the stone from the place where the dead was laid. And Jesus lifted up His eyes and said, Father, I thank Thee that Thou hast heard Me.

“And I knew that Thou hearest Me always; but because of the people which stand by I said it, that they may believe that Thou hast sent Me.

“And when He thus had spoken, He cried with a loud voice, Lazarus, come forth.

“And he that was dead came forth.”

(She read loudly, cold and trembling with ecstasy, as though she were seeing it before her eyes.)

“Bound hand and foot with graveclothes; and his face was bound about with a napkin. Jesus saith unto them, Loose him and let him go.

“Then many of the Jews which came to Mary and had seen the things which Jesus did believed on Him.”

She could read no more, closed the book and got up from her chair quickly.

“That is all about the raising of Lazarus,” she whispered severely and abruptly, and turning away she stood motionless, not daring to raise her eyes to him. She still trembled feverishly. The candle-end was flickering out in the battered candlestick, dimly lighting up in the poverty-stricken room the murderer and the harlot who had so strangely been reading together the eternal book. Five minutes or more passed.

“I came to speak of something,” Raskolnikov said aloud, frowning. He got up and went to Sonia. She lifted her eyes to him in silence. His face was particularly stern and there was a sort of savage determination in it.

“I have abandoned my family to-day,” he said, “my mother and sister. I am not going to see them. I’ve broken with them completely.”

“What for?” asked Sonia amazed. Her recent meeting with his mother and sister had left a great impression which she could not analyse. She heard his news almost with horror.

“I have only you now,” he added. “Let us go together.... I’ve come to you, we are both accursed, let us go our way together!”

His eyes glittered “as though he were mad,” Sonia thought, in her turn.

“Go where?” she asked in alarm and she involuntarily stepped back.

“How do I know? I only know it’s the same road, I know that and nothing more. It’s the same goal!”

She looked at him and understood nothing. She knew only that he was terribly, infinitely unhappy.

“No one of them will understand, if you tell them, but I have understood. I need you, that is why I have come to you.”

“I don’t understand,” whispered Sonia.

“You’ll understand later. Haven’t you done the same? You, too, have transgressed... have had the strength to transgress. You have laid hands on yourself, you have destroyed a life... _your own_ (it’s all the same!). You might have lived in spirit and understanding, but you’ll end in the Hay Market.... But you won’t be able to stand it, and if you remain alone you’ll go out of your mind like me. You are like a mad creature already. So we must go together on the same road! Let us go!”

“What for? What’s all this for?” said Sonia, strangely and violently agitated by his words.

“What for? Because you can’t remain like this, that’s why! You must look things straight in the face at last, and not weep like a child and cry that God won’t allow it. What will happen, if you should really be taken to the hospital to-morrow? She is mad and in consumption, she’ll soon die and the children? Do you mean to tell me Polenka won’t come to grief? Haven’t you seen children here at the street corners sent out by their mothers to beg? I’ve found out where those mothers live and in what surroundings. Children can’t remain children there! At seven the child is vicious and a thief. Yet children, you know, are the image of Christ: ‘theirs

is the kingdom of Heaven.' He bade us honour and love them, they are the humanity of the future...."

"What's to be done, what's to be done?" repeated Sonia, weeping hysterically and wringing her hands.

"What's to be done? Break what must be broken, once for all, that's all, and take the suffering on oneself. What, you don't understand? You'll understand later.... Freedom and power, and above all, power! Over all trembling creation and all the ant-heap!... That's the goal, remember that! That's my farewell message. Perhaps it's the last time I shall speak to you. If I don't come to-morrow, you'll hear of it all, and then remember these words. And some day later on, in years to come, you'll understand perhaps what they meant. If I come to-morrow, I'll tell you who killed Lizaveta.... Good-bye."

Sonia started with terror.

"Why, do you know who killed her?" she asked, chilled with horror, looking wildly at him.

"I know and will tell... you, only you. I have chosen you out. I'm not coming to you to ask forgiveness, but simply to tell you. I chose you out long ago to hear this, when your father talked of you and when Lizaveta was alive, I thought of it. Good-bye, don't shake hands. To-morrow!"

He went out. Sonia gazed at him as at a madman. But she herself was like one insane and felt it. Her head was going round.

"Good heavens, how does he know who killed Lizaveta? What did those words mean? It's awful!" But at the same time _the idea_ did not enter her head, not for a moment! "Oh, he must be terribly unhappy!... He has abandoned his mother and sister.... What for? What has happened? And what had he in his mind? What did he say to her? He had kissed her foot and said... said (yes, he had said it clearly) that he could not live without her.... Oh, merciful heavens!"

Sonia spent the whole night feverish and delirious. She jumped up from time to time, wept and wrung her hands, then sank again into feverish sleep and dreamt of Polenka, Katerina Ivanovna and Lizaveta, of reading the gospel and him... him with pale face, with burning eyes... kissing her feet, weeping.

On the other side of the door on the right, which divided Sonia's room from Madame Resslich's flat, was a room which had long stood empty. A card was fixed on the gate and a notice stuck in the windows over the canal advertising it to let. Sonia had long been accustomed to the room's being uninhabited. But all that time Mr. Svidrigaïlov had been standing, listening at the door of the empty room. When Raskolnikov went out he stood still, thought a moment, went on tiptoe to his own room which adjoined the empty one, brought a chair and noiselessly carried it to the door that led to Sonia's room. The conversation had struck him as interesting and remarkable, and he had greatly enjoyed it--so much so that he brought a chair that he might not in the future, to-morrow, for instance, have to endure the inconvenience of standing a whole hour, but might listen in comfort.

CHAPTER V

When next morning at eleven o'clock punctually Raskolnikov went into the department of the investigation of criminal causes and sent his name in to Porfiry Petrovitch, he was surprised at being kept waiting so long: it was at least ten minutes before he was summoned. He had expected that they would pounce upon him. But he stood in the waiting-room, and people, who apparently had nothing to do with him, were continually passing to and fro before him. In the next room which looked like an office, several clerks were sitting writing and obviously they had no notion who or what Raskolnikov might be. He looked uneasily and suspiciously about him to see whether there was not some guard, some mysterious watch being kept on him to prevent his escape. But there was nothing of the sort: he saw only the faces of clerks absorbed in petty details, then other people, no one seemed to have any concern with him. He might go where he liked for them. The conviction grew stronger in him that if that enigmatic man of yesterday, that phantom sprung out of the earth, had seen everything, they would not have let him stand and wait like that. And would they have waited till he elected to appear at eleven? Either the man had not yet given information, or... or simply he knew nothing, had seen nothing (and how could he have seen anything?) and so all that had happened to him the day before was again a phantom exaggerated by his sick and overstrained imagination. This conjecture had begun to grow strong the day before, in the midst of all his alarm and despair. Thinking it all over now and preparing for a fresh conflict, he was suddenly aware that he was trembling--and he felt a rush of indignation at the thought that he was trembling with fear at facing that hateful Porfiry Petrovitch. What he dreaded above all was meeting that man again; he hated him with an intense, unmitigated hatred and was afraid his hatred might betray him. His indignation was such that he ceased trembling at once; he made ready to go in with a cold and arrogant bearing and vowed to himself to keep as silent as possible, to watch and listen and for once at least to control his overstrained nerves. At that

moment he was summoned to Porfiry Petrovitch.

He found Porfiry Petrovitch alone in his study. His study was a room neither large nor small, furnished with a large writing-table, that stood before a sofa, upholstered in checked material, a bureau, a bookcase in the corner and several chairs--all government furniture, of polished yellow wood. In the further wall there was a closed door, beyond it there were no doubt other rooms. On Raskolnikov's entrance Porfiry Petrovitch had at once closed the door by which he had come in and they remained alone. He met his visitor with an apparently genial and good-tempered air, and it was only after a few minutes that Raskolnikov saw signs of a certain awkwardness in him, as though he had been thrown out of his reckoning or caught in something very secret.

"Ah, my dear fellow! Here you are... in our domain"... began Porfiry, holding out both hands to him. "Come, sit down, old man... or perhaps you don't like to be called 'my dear fellow' and 'old man!'--_tout court_? Please don't think it too familiar.... Here, on the sofa."

Raskolnikov sat down, keeping his eyes fixed on him. "In our domain," the apologies for familiarity, the French phrase _tout court_, were all characteristic signs.

"He held out both hands to me, but he did not give me one--he drew it back in time," struck him suspiciously. Both were watching each other, but when their eyes met, quick as lightning they looked away.

"I brought you this paper... about the watch. Here it is. Is it all right or shall I copy it again?"

"What? A paper? Yes, yes, don't be uneasy, it's all right," Porfiry Petrovitch said as though in haste, and after he had said it he took the paper and looked at it. "Yes, it's all right. Nothing more is needed," he declared with the same rapidity and he laid the paper on the table.

A minute later when he was talking of something else he took it from the table and put it on his bureau.

"I believe you said yesterday you would like to question me... formally... about my acquaintance with the murdered woman?" Raskolnikov was beginning again. "Why did I put in 'I believe'" passed through his mind in a flash. "Why am I so uneasy at having put in that '_I believe_'?" came in a second flash. And he suddenly felt that his uneasiness at the mere contact with Porfiry, at the first words, at the first looks, had grown in an instant to monstrous proportions, and that this was fearfully dangerous. His nerves were quivering, his emotion was increasing. "It's bad, it's bad! I shall say too much again."

"Yes, yes, yes! There's no hurry, there's no hurry," muttered Porfiry Petrovitch, moving to and fro about the table without any apparent aim, as it were making dashes towards the window, the bureau and the table, at one moment avoiding Raskolnikov's suspicious glance, then again standing still and looking him straight in the face.

His fat round little figure looked very strange, like a ball rolling from one side to the other and rebounding back.

"We've plenty of time. Do you smoke? have you your own? Here, a cigarette!" he went on, offering his visitor a cigarette. "You know I am receiving you here, but my own quarters are through there, you know, my government quarters. But I am living outside for the time, I had to have some repairs done here. It's almost finished now.... Government quarters, you know, are a capital thing. Eh, what do you think?"

"Yes, a capital thing," answered Raskolnikov, looking at him almost ironically.

"A capital thing, a capital thing," repeated Porfiry Petrovitch, as though he had just thought of something quite different. "Yes, a capital thing," he almost shouted at last, suddenly staring at Raskolnikov and stopping short two steps from him.

This stupid repetition was too incongruous in its ineptitude with the serious, brooding and enigmatic glance he turned upon his visitor.

But this stirred Raskolnikov's spleen more than ever and he could not resist an ironical and rather incautious challenge.

"Tell me, please," he asked suddenly, looking almost insolently at him and taking a kind of pleasure in his own insolence. "I believe it's a sort of legal rule, a sort of legal tradition--for all investigating lawyers--to begin their attack from afar, with a trivial, or at least an irrelevant subject, so as to encourage, or rather, to divert the man they are cross-examining, to disarm his caution and then all at once to give him an unexpected knock-down blow with some fatal question. Isn't that so? It's a sacred tradition, mentioned, I fancy, in all the manuals of the art?"

“Yes, yes.... Why, do you imagine that was why I spoke about government quarters... eh?”

And as he said this Porfiry Petrovitch screwed up his eyes and winked; a good-humoured, crafty look passed over his face. The wrinkles on his forehead were smoothed out, his eyes contracted, his features broadened and he suddenly went off into a nervous prolonged laugh, shaking all over and looking Raskolnikov straight in the face. The latter forced himself to laugh, too, but when Porfiry, seeing that he was laughing, broke into such a guffaw that he turned almost crimson, Raskolnikov’s repulsion overcame all precaution; he left off laughing, scowled and stared with hatred at Porfiry, keeping his eyes fixed on him while his intentionally prolonged laughter lasted. There was lack of precaution on both sides, however, for Porfiry Petrovitch seemed to be laughing in his visitor’s face and to be very little disturbed at the annoyance with which the visitor received it. The latter fact was very significant in Raskolnikov’s eyes: he saw that Porfiry Petrovitch had not been embarrassed just before either, but that he, Raskolnikov, had perhaps fallen into a trap; that there must be something, some motive here unknown to him; that, perhaps, everything was in readiness and in another moment would break upon him...

He went straight to the point at once, rose from his seat and took his cap.

“Porfiry Petrovitch,” he began resolutely, though with considerable irritation, “yesterday you expressed a desire that I should come to you for some inquiries” (he laid special stress on the word “inquiries”). “I have come and if you have anything to ask me, ask it, and if not, allow me to withdraw. I have no time to spare.... I have to be at the funeral of that man who was run over, of whom you... know also,” he added, feeling angry at once at having made this addition and more irritated at his anger. “I am sick of it all, do you hear? and have long been. It’s partly what made me ill. In short,” he shouted, feeling that the phrase about his illness was still more out of place, “in short, kindly examine me or let me go, at once. And if you must examine me, do so in the proper form! I will not allow you to do so otherwise, and so meanwhile, good-bye, as we have evidently nothing to keep us now.”

“Good heavens! What do you mean? What shall I question you about?” cackled Porfiry Petrovitch with a change of tone, instantly leaving off laughing. “Please don’t disturb yourself,” he began fidgeting from place to place and fussily making Raskolnikov sit down. “There’s no hurry, there’s no hurry, it’s all nonsense. Oh, no, I’m very glad you’ve come to see me at last... I look upon you simply as a visitor. And as for my confounded laughter, please excuse it, Rodion Romanovitch. Rodion Romanovitch? That is your name?... It’s my nerves, you tickled me so with your witty observation; I assure you, sometimes I shake with laughter like an india-rubber ball for half an hour at a time.... I’m often afraid of an attack of paralysis. Do sit down. Please do, or I shall think you are angry...”

Raskolnikov did not speak; he listened, watching him, still frowning angrily. He did sit down, but still held his cap.

“I must tell you one thing about myself, my dear Rodion Romanovitch,” Porfiry Petrovitch continued, moving about the room and again avoiding his visitor’s eyes. “You see, I’m a bachelor, a man of no consequence and not used to society; besides, I have nothing before me, I’m set, I’m running to seed and... and have you noticed, Rodion Romanovitch, that in our Petersburg circles, if two clever men meet who are not intimate, but respect each other, like you and me, it takes them half an hour before they can find a subject for conversation--they are dumb, they sit opposite each other and feel awkward. Everyone has subjects of conversation, ladies for instance... people in high society always have their subjects of conversation, _c’est de rigueur_, but people of the middle sort like us, thinking people that is, are always tongue-tied and awkward. What is the reason of it? Whether it is the lack of public interest, or whether it is we are so honest we don’t want to deceive one another, I don’t know. What do you think? Do put down your cap, it looks as if you were just going, it makes me uncomfortable... I am so delighted...”

Raskolnikov put down his cap and continued listening in silence with a serious frowning face to the vague and empty chatter of Porfiry Petrovitch. “Does he really want to distract my attention with his silly babble?”

“I can’t offer you coffee here; but why not spend five minutes with a friend?” Porfiry pattered on, “and you know all these official duties... please don’t mind my running up and down, excuse it, my dear fellow, I am very much afraid of offending you, but exercise is absolutely indispensable for me. I’m always sitting and so glad to be moving about for five minutes... I suffer from my sedentary life... I always intend to join a gymnasium; they say that officials of all ranks, even Privy Councillors, may be seen skipping gaily there; there you have it, modern science... yes, yes.... But as for my duties here, inquiries and all such formalities... you mentioned inquiries yourself just now... I assure you these interrogations are sometimes more embarrassing for the interrogator than for the interrogated.... You made the observation yourself just now very aptly and wittily.” (Raskolnikov had made no observation of the kind.) “One gets into a muddle! A regular muddle! One keeps harping on the same note, like a drum! There is to be a reform and we shall be called by a different name, at least, he-he-he! And as for our legal tradition, as you so wittily called it, I thoroughly agree

with you. Every prisoner on trial, even the rudest peasant, knows that they begin by disarming him with irrelevant questions (as you so happily put it) and then deal him a knock-down blow, he-he-he!--your felicitous comparison, he-he! So you really imagined that I meant by 'government quarters'... he-he! You are an ironical person. Come. I won't go on! Ah, by the way, yes! One word leads to another. You spoke of formality just now, apropos of the inquiry, you know. But what's the use of formality? In many cases it's nonsense. Sometimes one has a friendly chat and gets a good deal more out of it. One can always fall back on formality, allow me to assure you. And after all, what does it amount to? An examining lawyer cannot be bounded by formality at every step. The work of investigation is, so to speak, a free art in its own way, he-he-he!"

Porfiry Petrovitch took breath a moment. He had simply babbled on uttering empty phrases, letting slip a few enigmatic words and again reverting to incoherence. He was almost running about the room, moving his fat little legs quicker and quicker, looking at the ground, with his right hand behind his back, while with his left making gesticulations that were extraordinarily incongruous with his words. Raskolnikov suddenly noticed that as he ran about the room he seemed twice to stop for a moment near the door, as though he were listening.

"Is he expecting anything?"

"You are certainly quite right about it," Porfiry began gaily, looking with extraordinary simplicity at Raskolnikov (which startled him and instantly put him on his guard); "certainly quite right in laughing so wittily at our legal forms, he-he! Some of these elaborate psychological methods are exceedingly ridiculous and perhaps useless, if one adheres too closely to the forms. Yes... I am talking of forms again. Well, if I recognise, or more strictly speaking, if I suspect someone or other to be a criminal in any case entrusted to me... you're reading for the law, of course, Rodion Romanovitch?"

"Yes, I was..."

"Well, then it is a precedent for you for the future--though don't suppose I should venture to instruct you after the articles you publish about crime! No, I simply make bold to state it by way of fact, if I took this man or that for a criminal, why, I ask, should I worry him prematurely, even though I had evidence against him? In one case I may be bound, for instance, to arrest a man at once, but another may be in quite a different position, you know, so why shouldn't I let him walk about the town a bit? he-he-he! But I see you don't quite understand, so I'll give you a clearer example. If I put him in prison too soon, I may very likely give him, so to speak, moral support, he-he! You're laughing?"

Raskolnikov had no idea of laughing. He was sitting with compressed lips, his feverish eyes fixed on Porfiry Petrovitch's.

"Yet that is the case, with some types especially, for men are so different. You say 'evidence'. Well, there may be evidence. But evidence, you know, can generally be taken two ways. I am an examining lawyer and a weak man, I confess it. I should like to make a proof, so to say, mathematically clear. I should like to make a chain of evidence such as twice two are four, it ought to be a direct, irrefutable proof! And if I shut him up too soon--even though I might be convinced _he_ was the man, I should very likely be depriving myself of the means of getting further evidence against him. And how? By giving him, so to speak, a definite position, I shall put him out of suspense and set his mind at rest, so that he will retreat into his shell. They say that at Sevastopol, soon after Alma, the clever people were in a terrible fright that the enemy would attack openly and take Sevastopol at once. But when they saw that the enemy preferred a regular siege, they were delighted, I am told and reassured, for the thing would drag on for two months at least. You're laughing, you don't believe me again? Of course, you're right, too. You're right, you're right. These are special cases, I admit. But you must observe this, my dear Rodion Romanovitch, the general case, the case for which all legal forms and rules are intended, for which they are calculated and laid down in books, does not exist at all, for the reason that every case, every crime, for instance, so soon as it actually occurs, at once becomes a thoroughly special case and sometimes a case unlike any that's gone before. Very comic cases of that sort sometimes occur. If I leave one man quite alone, if I don't touch him and don't worry him, but let him know or at least suspect every moment that I know all about it and am watching him day and night, and if he is in continual suspicion and terror, he'll be bound to lose his head. He'll come of himself, or maybe do something which will make it as plain as twice two are four--it's delightful. It may be so with a simple peasant, but with one of our sort, an intelligent man cultivated on a certain side, it's a dead certainty. For, my dear fellow, it's a very important matter to know on what side a man is cultivated. And then there are nerves, there are nerves, you have overlooked them! Why, they are all sick, nervous and irritable!... And then how they all suffer from spleen! That I assure you is a regular gold-mine for us. And it's no anxiety to me, his running about the town free! Let him, let him walk about for a bit! I know well enough that I've caught him and that he won't escape me. Where could he escape to, he-he? Abroad, perhaps? A Pole will escape abroad, but not here, especially as I am watching and

have taken measures. Will he escape into the depths of the country perhaps? But you know, peasants live there, real rude Russian peasants. A modern cultivated man would prefer prison to living with such strangers as our peasants. He-he! But that's all nonsense, and on the surface. It's not merely that he has nowhere to run to, he is _psychologically_ unable to escape me, he-he! What an expression! Through a law of nature he can't escape me if he had anywhere to go. Have you seen a butterfly round a candle? That's how he will keep circling and circling round me. Freedom will lose its attractions. He'll begin to brood, he'll weave a tangle round himself, he'll worry himself to death! What's more, he will provide me with a mathematical proof--if I only give him long enough interval.... And he'll keep circling round me, getting nearer and nearer and then--flop! He'll fly straight into my mouth and I'll swallow him, and that will be very amusing, he-he-he! You don't believe me?"

Raskolnikov made no reply; he sat pale and motionless, still gazing with the same intensity into Porfiry's face.

"It's a lesson," he thought, turning cold. "This is beyond the cat playing with a mouse, like yesterday. He can't be showing off his power with no motive... prompting me; he is far too clever for that... he must have another object. What is it? It's all nonsense, my friend, you are pretending, to scare me! You've no proofs and the man I saw had no real existence. You simply want to make me lose my head, to work me up beforehand and so to crush me. But you are wrong, you won't do it! But why give me such a hint? Is he reckoning on my shattered nerves? No, my friend, you are wrong, you won't do it even though you have some trap for me... let us see what you have in store for me."

And he braced himself to face a terrible and unknown ordeal. At times he longed to fall on Porfiry and strangle him. This anger was what he dreaded from the beginning. He felt that his parched lips were flecked with foam, his heart was throbbing. But he was still determined not to speak till the right moment. He realised that this was the best policy in his position, because instead of saying too much he would be irritating his enemy by his silence and provoking him into speaking too freely. Anyhow, this was what he hoped for.

"No, I see you don't believe me, you think I am playing a harmless joke on you," Porfiry began again, getting more and more lively, chuckling at every instant and again pacing round the room. "And to be sure you're right: God has given me a figure that can awaken none but comic ideas in other people; a buffoon; but let me tell you, and I repeat it, excuse an old man, my dear Rodion Romanovitch, you are a man still young, so to say, in your first youth and so you put intellect above everything, like all young people. Playful wit and abstract arguments fascinate you and that's for all the world like the old Austrian _Hof-kriegsrath_, as far as I can judge of military matters, that is: on paper they'd beaten Napoleon and taken him prisoner, and there in their study they worked it all out in the cleverest fashion, but look you, General Mack surrendered with all his army, he-he-he! I see, I see, Rodion Romanovitch, you are laughing at a civilian like me, taking examples out of military history! But I can't help it, it's my weakness. I am fond of military science. And I'm ever so fond of reading all military histories. I've certainly missed my proper career. I ought to have been in the army, upon my word I ought. I shouldn't have been a Napoleon, but I might have been a major, he-he! Well, I'll tell you the whole truth, my dear fellow, about this _special case_, I mean: actual fact and a man's temperament, my dear sir, are weighty matters and it's astonishing how they sometimes deceive the sharpest calculation! I--listen to an old man--am speaking seriously, Rodion Romanovitch" (as he said this Porfiry Petrovitch, who was scarcely five-and-thirty, actually seemed to have grown old; even his voice changed and he seemed to shrink together) "Moreover, I'm a candid man... am I a candid man or not? What do you say? I fancy I really am: I tell you these things for nothing and don't even expect a reward for it, he-he! Well, to proceed, wit in my opinion is a splendid thing, it is, so to say, an adornment of nature and a consolation of life, and what tricks it can play! So that it sometimes is hard for a poor examining lawyer to know where he is, especially when he's liable to be carried away by his own fancy, too, for you know he is a man after all! But the poor fellow is saved by the criminal's temperament, worse luck for him! But young people carried away by their own wit don't think of that 'when they overstep all obstacles,' as you wittily and cleverly expressed it yesterday. He will lie--that is, the man who is a _special case_, the incognito, and he will lie well, in the cleverest fashion; you might think he would triumph and enjoy the fruits of his wit, but at the most interesting, the most flagrant moment he will faint. Of course there may be illness and a stuffy room as well, but anyway! Anyway he's given us the idea! He lied incomparably, but he didn't reckon on his temperament. That's what betrays him! Another time he will be carried away by his playful wit into making fun of the man who suspects him, he will turn pale as it were on purpose to mislead, but his paleness will be _too natural_, too much like the real thing, again he has given us an idea! Though his questioner may be deceived at first, he will think differently next day if he is not a fool, and, of course, it is like that at every step! He puts himself forward where he is not wanted, speaks continually when he ought to keep silent, brings in all sorts of allegorical allusions, he-he! Comes and asks why didn't you take me long ago? he-he-he! And that can happen, you know, with the cleverest man, the psychologist, the literary man. The temperament reflects everything like a mirror! Gaze into it and admire what you see! But why are you so pale, Rodion

Romanovitch? Is the room stuffy? Shall I open the window?”

“Oh, don’t trouble, please,” cried Raskolnikov and he suddenly broke into a laugh. “Please don’t trouble.”

Porfiry stood facing him, paused a moment and suddenly he too laughed. Raskolnikov got up from the sofa, abruptly checking his hysterical laughter.

“Porfiry Petrovitch,” he began, speaking loudly and distinctly, though his legs trembled and he could scarcely stand. “I see clearly at last that you actually suspect me of murdering that old woman and her sister Lizaveta. Let me tell you for my part that I am sick of this. If you find that you have a right to prosecute me legally, to arrest me, then prosecute me, arrest me. But I will not let myself be jeered at to my face and worried...”

His lips trembled, his eyes glowed with fury and he could not restrain his voice.

“I won’t allow it!” he shouted, bringing his fist down on the table. “Do you hear that, Porfiry Petrovitch? I won’t allow it.”

“Good heavens! What does it mean?” cried Porfiry Petrovitch, apparently quite frightened. “Rodion Romanovitch, my dear fellow, what is the matter with you?”

“I won’t allow it,” Raskolnikov shouted again.

“Hush, my dear man! They’ll hear and come in. Just think, what could we say to them?” Porfiry Petrovitch whispered in horror, bringing his face close to Raskolnikov’s.

“I won’t allow it, I won’t allow it,” Raskolnikov repeated mechanically, but he too spoke in a sudden whisper.

Porfiry turned quickly and ran to open the window.

“Some fresh air! And you must have some water, my dear fellow. You’re ill!” and he was running to the door to call for some when he found a decanter of water in the corner. “Come, drink a little,” he whispered, rushing up to him with the decanter. “It will be sure to do you good.”

Porfiry Petrovitch’s alarm and sympathy were so natural that Raskolnikov was silent and began looking at him with wild curiosity. He did not take the water, however.

“Rodion Romanovitch, my dear fellow, you’ll drive yourself out of your mind, I assure you, ach, ach! Have some water, do drink a little.”

He forced him to take the glass. Raskolnikov raised it mechanically to his lips, but set it on the table again with disgust.

“Yes, you’ve had a little attack! You’ll bring back your illness again, my dear fellow,” Porfiry Petrovitch cackled with friendly sympathy, though he still looked rather disconcerted. “Good heavens, you must take more care of yourself! Dmitri Prokofitch was here, came to see me yesterday--I know, I know, I’ve a nasty, ironical temper, but what they made of it!... Good heavens, he came yesterday after you’d been. We dined and he talked and talked away, and I could only throw up my hands in despair! Did he come from you? But do sit down, for mercy’s sake, sit down!”

“No, not from me, but I knew he went to you and why he went,” Raskolnikov answered sharply.

“You knew?”

“I knew. What of it?”

“Why this, Rodion Romanovitch, that I know more than that about you; I know about everything. I know how you went _to take a flat_ at night when it was dark and how you rang the bell and asked about the blood, so that the workmen and the porter did not know what to make of it. Yes, I understand your state of mind at that time... but you’ll drive yourself mad like that, upon my word! You’ll lose your head! You’re full of generous indignation at the wrongs you’ve received, first from destiny, and then from the police officers, and so you rush from one thing to another to force them to speak out and make an end of it all, because you are sick of all this suspicion and foolishness. That’s so, isn’t it? I have guessed how you feel, haven’t I? Only in that way you’ll lose your head and Razumihin’s, too; he’s too _good_ a man for such a position, you must know that. You are ill and he is good and your illness is infectious for him... I’ll tell you about it when you are more yourself.... But do sit down, for goodness’ sake. Please rest, you look

shocking, do sit down."

Raskolnikov sat down; he no longer shivered, he was hot all over. In amazement he listened with strained attention to Porfiry Petrovitch who still seemed frightened as he looked after him with friendly solicitude. But he did not believe a word he said, though he felt a strange inclination to believe. Porfiry's unexpected words about the flat had utterly overwhelmed him. "How can it be, he knows about the flat then," he thought suddenly, "and he tells it me himself!"

"Yes, in our legal practice there was a case almost exactly similar, a case of morbid psychology," Porfiry went on quickly. "A man confessed to murder and how he kept it up! It was a regular hallucination; he brought forward facts, he imposed upon everyone and why? He had been partly, but only partly, unintentionally the cause of a murder and when he knew that he had given the murderers the opportunity, he sank into dejection, it got on his mind and turned his brain, he began imagining things and he persuaded himself that he was the murderer. But at last the High Court of Appeal went into it and the poor fellow was acquitted and put under proper care. Thanks to the Court of Appeal! Tut-tut-tut! Why, my dear fellow, you may drive yourself into delirium if you have the impulse to work upon your nerves, to go ringing bells at night and asking about blood! I've studied all this morbid psychology in my practice. A man is sometimes tempted to jump out of a window or from a belfry. Just the same with bell-ringing.... It's all illness, Rodion Romanovitch! You have begun to neglect your illness. You should consult an experienced doctor, what's the good of that fat fellow? You are lightheaded! You were delirious when you did all this!"

For a moment Raskolnikov felt everything going round.

"Is it possible, is it possible," flashed through his mind, "that he is still lying? He can't be, he can't be." He rejected that idea, feeling to what a degree of fury it might drive him, feeling that that fury might drive him mad.

"I was not delirious. I knew what I was doing," he cried, straining every faculty to penetrate Porfiry's game, "I was quite myself, do you hear?"

"Yes, I hear and understand. You said yesterday you were not delirious, you were particularly emphatic about it! I understand all you can tell me! A-ach!... Listen, Rodion Romanovitch, my dear fellow. If you were actually a criminal, or were somehow mixed up in this damnable business, would you insist that you were not delirious but in full possession of your faculties? And so emphatically and persistently? Would it be possible? Quite impossible, to my thinking. If you had anything on your conscience, you certainly ought to insist that you were delirious. That's so, isn't it?"

There was a note of slyness in this inquiry. Raskolnikov drew back on the sofa as Porfiry bent over him and stared in silent perplexity at him.

"Another thing about Razumihin--you certainly ought to have said that he came of his own accord, to have concealed your part in it! But you don't conceal it! You lay stress on his coming at your instigation."

Raskolnikov had not done so. A chill went down his back.

"You keep telling lies," he said slowly and weakly, twisting his lips into a sickly smile, "you are trying again to show that you know all my game, that you know all I shall say beforehand," he said, conscious himself that he was not weighing his words as he ought. "You want to frighten me... or you are simply laughing at me..."

He still stared at him as he said this and again there was a light of intense hatred in his eyes.

"You keep lying," he said. "You know perfectly well that the best policy for the criminal is to tell the truth as nearly as possible... to conceal as little as possible. I don't believe you!"

"What a wily person you are!" Porfiry tittered, "there's no catching you; you've a perfect monomania. So you don't believe me? But still you do believe me, you believe a quarter; I'll soon make you believe the whole, because I have a sincere liking for you and genuinely wish you good."

Raskolnikov's lips trembled.

"Yes, I do," went on Porfiry, touching Raskolnikov's arm genially, "you must take care of your illness. Besides, your mother and sister are here now; you must think of them. You must soothe and comfort them and you do nothing but frighten them..."

“What has that to do with you? How do you know it? What concern is it of yours? You are keeping watch on me and want to let me know it?”

“Good heavens! Why, I learnt it all from you yourself! You don’t notice that in your excitement you tell me and others everything. From Razumihin, too, I learnt a number of interesting details yesterday. No, you interrupted me, but I must tell you that, for all your wit, your suspiciousness makes you lose the common-sense view of things. To return to bell-ringing, for instance. I, an examining lawyer, have betrayed a precious thing like that, a real fact (for it is a fact worth having), and you see nothing in it! Why, if I had the slightest suspicion of you, should I have acted like that? No, I should first have disarmed your suspicions and not let you see I knew of that fact, should have diverted your attention and suddenly have dealt you a knock-down blow (your expression) saying: ‘And what were you doing, sir, pray, at ten or nearly eleven at the murdered woman’s flat and why did you ring the bell and why did you ask about blood? And why did you invite the porters to go with you to the police station, to the lieutenant?’ That’s how I ought to have acted if I had a grain of suspicion of you. I ought to have taken your evidence in due form, searched your lodging and perhaps have arrested you, too... so I have no suspicion of you, since I have not done that! But you can’t look at it normally and you see nothing, I say again.”

Raskolnikov started so that Porfiry Petrovitch could not fail to perceive it.

“You are lying all the while,” he cried, “I don’t know your object, but you are lying. You did not speak like that just now and I cannot be mistaken!”

“I am lying?” Porfiry repeated, apparently incensed, but preserving a good-humoured and ironical face, as though he were not in the least concerned at Raskolnikov’s opinion of him. “I am lying... but how did I treat you just now, I, the examining lawyer? Prompting you and giving you every means for your defence; illness, I said, delirium, injury, melancholy and the police officers and all the rest of it? Ah! He-he-he! Though, indeed, all those psychological means of defence are not very reliable and cut both ways: illness, delirium, I don’t remember--that’s all right, but why, my good sir, in your illness and in your delirium were you haunted by just those delusions and not by any others? There may have been others, eh? He-he-he!”

Raskolnikov looked haughtily and contemptuously at him.

“Briefly,” he said loudly and imperiously, rising to his feet and in so doing pushing Porfiry back a little, “briefly, I want to know, do you acknowledge me perfectly free from suspicion or not? Tell me, Porfiry Petrovitch, tell me once for all and make haste!”

“What a business I’m having with you!” cried Porfiry with a perfectly good-humoured, sly and composed face. “And why do you want to know, why do you want to know so much, since they haven’t begun to worry you? Why, you are like a child asking for matches! And why are you so uneasy? Why do you force yourself upon us, eh? He-he-he!”

“I repeat,” Raskolnikov cried furiously, “that I can’t put up with it!”

“With what? Uncertainty?” interrupted Porfiry.

“Don’t jeer at me! I won’t have it! I tell you I won’t have it. I can’t and I won’t, do you hear, do you hear?” he shouted, bringing his fist down on the table again.

“Hush! Hush! They’ll overhear! I warn you seriously, take care of yourself. I am not joking,” Porfiry whispered, but this time there was not the look of old womanish good nature and alarm in his face. Now he was peremptory, stern, frowning and for once laying aside all mystification.

But this was only for an instant. Raskolnikov, bewildered, suddenly fell into actual frenzy, but, strange to say, he again obeyed the command to speak quietly, though he was in a perfect paroxysm of fury.

“I will not allow myself to be tortured,” he whispered, instantly recognising with hatred that he could not help obeying the command and driven to even greater fury by the thought. “Arrest me, search me, but kindly act in due form and don’t play with me! Don’t dare!”

“Don’t worry about the form,” Porfiry interrupted with the same sly smile, as it were, gloating with enjoyment over Raskolnikov. “I invited you to see me quite in a friendly way.”

“I don’t want your friendship and I spit on it! Do you hear? And, here, I take my cap and go. What will you say now if you mean to arrest me?”

He took up his cap and went to the door.

“And won’t you see my little surprise?” chuckled Porfiry, again taking him by the arm and stopping him at the door.

He seemed to become more playful and good-humoured, which maddened Raskolnikov.

“What surprise?” he asked, standing still and looking at Porfiry in alarm.

“My little surprise, it’s sitting there behind the door, he-he-he!” (He pointed to the locked door.) “I locked him in that he should not escape.”

“What is it? Where? What?...”

Raskolnikov walked to the door and would have opened it, but it was locked.

“It’s locked, here is the key!”

And he brought a key out of his pocket.

“You are lying,” roared Raskolnikov without restraint, “you lie, you damned punchinello!” and he rushed at Porfiry who retreated to the other door, not at all alarmed.

“I understand it all! You are lying and mocking so that I may betray myself to you...”

“Why, you could not betray yourself any further, my dear Rodion Romanovitch. You are in a passion. Don’t shout, I shall call the clerks.”

“You are lying! Call the clerks! You knew I was ill and tried to work me into a frenzy to make me betray myself, that was your object! Produce your facts! I understand it all. You’ve no evidence, you have only wretched rubbishly suspicions like Zametov’s! You knew my character, you wanted to drive me to fury and then to knock me down with priests and deputies.... Are you waiting for them? eh! What are you waiting for? Where are they? Produce them?”

“Why deputies, my good man? What things people will imagine! And to do so would not be acting in form as you say, you don’t know the business, my dear fellow.... And there’s no escaping form, as you see,” Porfiry muttered, listening at the door through which a noise could be heard.

“Ah, they’re coming,” cried Raskolnikov. “You’ve sent for them! You expected them! Well, produce them all: your deputies, your witnesses, what you like!... I am ready!”

But at this moment a strange incident occurred, something so unexpected that neither Raskolnikov nor Porfiry Petrovitch could have looked for such a conclusion to their interview.

CHAPTER VI

When he remembered the scene afterwards, this is how Raskolnikov saw it.

The noise behind the door increased, and suddenly the door was opened a little.

“What is it?” cried Porfiry Petrovitch, annoyed. “Why, I gave orders...”

For an instant there was no answer, but it was evident that there were several persons at the door, and that they were apparently pushing somebody back.

“What is it?” Porfiry Petrovitch repeated, uneasily.

“The prisoner Nikolay has been brought,” someone answered.

“He is not wanted! Take him away! Let him wait! What’s he doing here? How irregular!” cried Porfiry, rushing to the door.

“But he...” began the same voice, and suddenly ceased.

Two seconds, not more, were spent in actual struggle, then someone gave a violent shove, and then a man, very pale, strode into the room.

This man’s appearance was at first sight very strange. He stared straight before him, as though seeing nothing. There was a determined gleam in his eyes; at the same time there was a deathly pallor in his face, as though he were being led to the scaffold. His white lips were faintly twitching.

He was dressed like a workman and was of medium height, very young, slim, his hair cut in round crop, with thin spare features. The man whom he had thrust back followed him into the room and succeeded in seizing him by the shoulder; he was a warder; but Nikolay pulled his arm away.

Several persons crowded inquisitively into the doorway. Some of them tried to get in. All this took place almost instantaneously.

“Go away, it’s too soon! Wait till you are sent for!... Why have you brought him so soon?” Porfiry Petrovitch muttered, extremely annoyed, and as it were thrown out of his reckoning.

But Nikolay suddenly knelt down.

“What’s the matter?” cried Porfiry, surprised.

“I am guilty! Mine is the sin! I am the murderer,” Nikolay articulated suddenly, rather breathless, but speaking fairly loudly.

For ten seconds there was silence as though all had been struck dumb; even the warder stepped back, mechanically retreated to the door, and stood immovable.

“What is it?” cried Porfiry Petrovitch, recovering from his momentary stupefaction.

“I... am the murderer,” repeated Nikolay, after a brief pause.

“What... you... what... whom did you kill?” Porfiry Petrovitch was obviously bewildered.

Nikolay again was silent for a moment.

“Alyona Ivanovna and her sister Lizaveta Ivanovna, I... killed... with an axe. Darkness came over me,” he added suddenly, and was again silent.

He still remained on his knees. Porfiry Petrovitch stood for some moments as though meditating, but suddenly roused himself and waved back the uninvited spectators. They instantly vanished and closed the door. Then he looked towards Raskolnikov, who was standing in the corner, staring wildly at Nikolay and moved towards him, but stopped short, looked from Nikolay to Raskolnikov and then again at Nikolay, and seeming unable to restrain himself darted at the latter.

“You’re in too great a hurry,” he shouted at him, almost angrily. “I didn’t ask you what came over you.... Speak, did you kill them?”

“I am the murderer.... I want to give evidence,” Nikolay pronounced.

“Ach! What did you kill them with?”

“An axe. I had it ready.”

“Ach, he is in a hurry! Alone?”

Nikolay did not understand the question.

“Did you do it alone?”

“Yes, alone. And Mitka is not guilty and had no share in it.”

“Don’t be in a hurry about Mitka! A-ach! How was it you ran downstairs like that at the time? The porters met you both!”

“It was to put them off the scent... I ran after Mitka,” Nikolay replied hurriedly, as though he had prepared the answer.

“I knew it!” cried Porfiry, with vexation. “It’s not his own tale he is telling,” he muttered as though to himself, and suddenly his eyes rested on Raskolnikov again.

He was apparently so taken up with Nikolay that for a moment he had forgotten Raskolnikov. He was a little taken aback.

“My dear Rodion Romanovitch, excuse me!” he flew up to him, “this won’t do; I’m afraid you must go... it’s no good your staying... I will... you see, what a surprise!... Good-bye!”

And taking him by the arm, he showed him to the door.

“I suppose you didn’t expect it?” said Raskolnikov who, though he had not yet fully grasped the situation, had regained his courage.

“You did not expect it either, my friend. See how your hand is trembling! He-he!”

“You’re trembling, too, Porfiry Petrovitch!”

“Yes, I am; I didn’t expect it.”

They were already at the door; Porfiry was impatient for Raskolnikov to be gone.

“And your little surprise, aren’t you going to show it to me?” Raskolnikov said, sarcastically.

“Why, his teeth are chattering as he asks, he-he! You are an ironical person! Come, till we meet!”

“I believe we can say _good-bye_!”

“That’s in God’s hands,” muttered Porfiry, with an unnatural smile.

As he walked through the office, Raskolnikov noticed that many people were looking at him. Among them he saw the two porters from _the_ house, whom he had invited that night to the police station. They stood there waiting. But he was no sooner on the stairs than he heard the voice of Porfiry Petrovitch behind him. Turning round, he saw the latter running after him, out of breath.

“One word, Rodion Romanovitch; as to all the rest, it’s in God’s hands, but as a matter of form there are some questions I shall have to ask you... so we shall meet again, shan’t we?”

And Porfiry stood still, facing him with a smile.

“Shan’t we?” he added again.

He seemed to want to say something more, but could not speak out.

“You must forgive me, Porfiry Petrovitch, for what has just passed... I lost my temper,” began Raskolnikov, who had so far regained his courage that he felt irresistibly inclined to display his coolness.

“Don’t mention it, don’t mention it,” Porfiry replied, almost gleefully. “I myself, too... I have a wicked temper, I admit it! But we shall meet again. If it’s God’s will, we may see a great deal of one another.”

“And will get to know each other through and through?” added Raskolnikov.

“Yes; know each other through and through,” assented Porfiry Petrovitch, and he screwed up his eyes, looking earnestly at Raskolnikov. “Now you’re going to a birthday party?”

“To a funeral.”

“Of course, the funeral! Take care of yourself, and get well.”

“I don’t know what to wish you,” said Raskolnikov, who had begun to descend the stairs, but looked back again. “I should like to wish you success, but your office is such a comical one.”

“Why comical?” Porfiry Petrovitch had turned to go, but he seemed to prick up his ears at this.

“Why, how you must have been torturing and harassing that poor Nikolay psychologically, after your fashion, till he confessed! You must have been at him day and night, proving to him that he was the murderer, and now that he has confessed, you’ll begin

vivisecting him again. ‘You are lying,’ you’ll say. ‘You are not the murderer! You can’t be! It’s not your own tale you are telling!’ You must admit it’s a comical business!”

“He-he-he! You noticed then that I said to Nikolay just now that it was not his own tale he was telling?”

“How could I help noticing it!”

“He-he! You are quick-witted. You notice everything! You’ve really a playful mind! And you always fasten on the comic side... he-he! They say that was the marked characteristic of Gogol, among the writers.”

“Yes, of Gogol.”

“Yes, of Gogol.... I shall look forward to meeting you.”

“So shall I.”

Raskolnikov walked straight home. He was so muddled and bewildered that on getting home he sat for a quarter of an hour on the sofa, trying to collect his thoughts. He did not attempt to think about Nikolay; he was stupefied; he felt that his confession was something inexplicable, amazing--something beyond his understanding. But Nikolay’s confession was an actual fact. The consequences of this fact were clear to him at once, its falsehood could not fail to be discovered, and then they would be after him again. Till then, at least, he was free and must do something for himself, for the danger was imminent.

But how imminent? His position gradually became clear to him. Remembering, sketchily, the main outlines of his recent scene with Porfiry, he could not help shuddering again with horror. Of course, he did not yet know all Porfiry’s aims, he could not see into all his calculations. But he had already partly shown his hand, and no one knew better than Raskolnikov how terrible Porfiry’s “lead” had been for him. A little more and he _might_ have given himself away completely, circumstantially. Knowing his nervous temperament and from the first glance seeing through him, Porfiry, though playing a bold game, was bound to win. There’s no denying that Raskolnikov had compromised himself seriously, but no _facts_ had come to light as yet; there was nothing positive. But was he taking a true view of the position? Wasn’t he mistaken? What had Porfiry been trying to get at? Had he really some surprise prepared for him? And what was it? Had he really been expecting something or not? How would they have parted if it had not been for the unexpected appearance of Nikolay?

Porfiry had shown almost all his cards--of course, he had risked something in showing them--and if he had really had anything up his sleeve (Raskolnikov reflected), he would have shown that, too. What was that “surprise”? Was it a joke? Had it meant anything? Could it have concealed anything like a fact, a piece of positive evidence? His yesterday’s visitor? What had become of him? Where was he to-day? If Porfiry really had any evidence, it must be connected with him....

He sat on the sofa with his elbows on his knees and his face hidden in his hands. He was still shivering nervously. At last he got up, took his cap, thought a minute, and went to the door.

He had a sort of presentiment that for to-day, at least, he might consider himself out of danger. He had a sudden sense almost of joy; he wanted to make haste to Katerina Ivanovna’s. He would be too late for the funeral, of course, but he would be in time for the memorial dinner, and there at once he would see Sonia.

He stood still, thought a moment, and a suffering smile came for a moment on to his lips.

“To-day! To-day,” he repeated to himself. “Yes, to-day! So it must be....”

But as he was about to open the door, it began opening of itself. He started and moved back. The door opened gently and slowly, and there suddenly appeared a figure--yesterday’s visitor _from underground_.

The man stood in the doorway, looked at Raskolnikov without speaking, and took a step forward into the room. He was exactly the same as yesterday; the same figure, the same dress, but there was a great change in his face; he looked dejected and sighed deeply. If he had only put his hand up to his cheek and leaned his head on one side he would have looked exactly like a peasant woman.

“What do you want?” asked Raskolnikov, numb with terror. The man was still silent, but suddenly he bowed down almost to the ground, touching it with his finger.

“What is it?” cried Raskolnikov.

“I have sinned,” the man articulated softly.

“How?”

“By evil thoughts.”

They looked at one another.

“I was vexed. When you came, perhaps in drink, and bade the porters go to the police station and asked about the blood, I was vexed that they let you go and took you for drunken. I was so vexed that I lost my sleep. And remembering the address we came here yesterday and asked for you....”

“Who came?” Raskolnikov interrupted, instantly beginning to recollect.

“I did, I’ve wronged you.”

“Then you come from that house?”

“I was standing at the gate with them... don’t you remember? We have carried on our trade in that house for years past. We cure and prepare hides, we take work home... most of all I was vexed....”

And the whole scene of the day before yesterday in the gateway came clearly before Raskolnikov’s mind; he recollected that there had been several people there besides the porters, women among them. He remembered one voice had suggested taking him straight to the police-station. He could not recall the face of the speaker, and even now he did not recognise it, but he remembered that he had turned round and made him some answer....

So this was the solution of yesterday’s horror. The most awful thought was that he had been actually almost lost, had almost done for himself on account of such a _trivial_ circumstance. So this man could tell nothing except his asking about the flat and the blood stains. So Porfiry, too, had nothing but that _delirium_, no facts but this _psychology_ which _cuts both ways_, nothing positive. So if no more facts come to light (and they must not, they must not!) then... then what can they do to him? How can they convict him, even if they arrest him? And Porfiry then had only just heard about the flat and had not known about it before.

“Was it you who told Porfiry... that I’d been there?” he cried, struck by a sudden idea.

“What Porfiry?”

“The head of the detective department?”

“Yes. The porters did not go there, but I went.”

“To-day?”

“I got there two minutes before you. And I heard, I heard it all, how he worried you.”

“Where? What? When?”

“Why, in the next room. I was sitting there all the time.”

“What? Why, then you were the surprise? But how could it happen? Upon my word!”

“I saw that the porters did not want to do what I said,” began the man; “for it’s too late, said they, and maybe he’ll be angry that we did not come at the time. I was vexed and I lost my sleep, and I began making inquiries. And finding out yesterday where to go, I went to-day. The first time I went he wasn’t there, when I came an hour later he couldn’t see me. I went the third time, and they showed me in. I informed him of everything, just as it happened, and he began skipping about the room and punching himself on the chest. ‘What do you scoundrels mean by it? If I’d known about it I should have arrested him!’ Then he ran out, called somebody and began talking to him in the corner, then he turned to me, scolding and questioning me. He scolded me a great deal; and I told him everything, and I told him that you didn’t dare to say a word in answer to me yesterday and that you didn’t recognise me. And he fell to running about again and kept hitting himself on the chest, and getting angry and running about, and when you were announced he told me to go into the next room. ‘Sit there a bit,’ he said. ‘Don’t move, whatever you may hear.’ And he set a chair

there for me and locked me in. ‘Perhaps,’ he said, ‘I may call you.’ And when Nikolay’d been brought he let me out as soon as you were gone. ‘I shall send for you again and question you,’ he said.”

“And did he question Nikolay while you were there?”

“He got rid of me as he did of you, before he spoke to Nikolay.”

The man stood still, and again suddenly bowed down, touching the ground with his finger.

“Forgive me for my evil thoughts, and my slander.”

“May God forgive you,” answered Raskolnikov.

And as he said this, the man bowed down again, but not to the ground, turned slowly and went out of the room.

“It all cuts both ways, now it all cuts both ways,” repeated Raskolnikov, and he went out more confident than ever.

“Now we’ll make a fight for it,” he said, with a malicious smile, as he went down the stairs. His malice was aimed at himself; with shame and contempt he recollected his “cowardice.”

PART V

CHAPTER I

The morning that followed the fateful interview with Dounia and her mother brought sobering influences to bear on Pyotr Petrovitch. Intensely unpleasant as it was, he was forced little by little to accept as a fact beyond recall what had seemed to him only the day before fantastic and incredible. The black snake of wounded vanity had been gnawing at his heart all night. When he got out of bed, Pyotr Petrovitch immediately looked in the looking-glass. He was afraid that he had jaundice. However his health seemed unimpaired so far, and looking at his noble, clear-skinned countenance which had grown fattish of late, Pyotr Petrovitch for an instant was positively comforted in the conviction that he would find another bride and, perhaps, even a better one. But coming back to the sense of his present position, he turned aside and spat vigorously, which excited a sarcastic smile in Andrey Semyonovitch Lebeziatnikov, the young friend with whom he was staying. That smile Pyotr Petrovitch noticed, and at once set it down against his young friend’s account. He had set down a good many points against him of late. His anger was redoubled when he reflected that he ought not to have told Andrey Semyonovitch about the result of yesterday’s interview. That was the second mistake he had made in temper, through impulsiveness and irritability.... Moreover, all that morning one unpleasantness followed another. He even found a hitch awaiting him in his legal case in the senate. He was particularly irritated by the owner of the flat which had been taken in view of his approaching marriage and was being redecorated at his own expense; the owner, a rich German tradesman, would not entertain the idea of breaking the contract which had just been signed and insisted on the full forfeit money, though Pyotr Petrovitch would be giving him back the flat practically redecorated. In the same way the upholsterers refused to return a single rouble of the instalment paid for the furniture purchased but not yet removed to the flat.

“Am I to get married simply for the sake of the furniture?” Pyotr Petrovitch ground his teeth and at the same time once more he had a gleam of desperate hope. “Can all that be really so irrevocably over? Is it no use to make another effort?” The thought of Dounia sent a voluptuous pang through his heart. He endured anguish at that moment, and if it had been possible to slay Raskolnikov instantly by wishing it, Pyotr Petrovitch would promptly have uttered the wish.

“It was my mistake, too, not to have given them money,” he thought, as he returned dejectedly to Lebeziatnikov’s room, “and why on earth was I such a Jew? It was false economy! I meant to keep them without a penny so that they should turn to me as their providence, and look at them! foo! If I’d spent some fifteen hundred roubles on them for the trousseau and presents, on knick-knacks, dressing-cases, jewellery, materials, and all that sort of trash from Knopp’s and the English shop, my position would have been better and... stronger! They could not have refused me so easily! They are the sort of people that would feel bound to return money and presents if they broke it off; and they would find it hard to do it! And their conscience would prick them: how can we dismiss a man who has hitherto been so generous and delicate?.... H’m! I’ve made a blunder.”

And grinding his teeth again, Pyotr Petrovitch called himself a fool--but not aloud, of course.

He returned home, twice as irritated and angry as before. The preparations for the funeral dinner at Katerina Ivanovna's excited his curiosity as he passed. He had heard about it the day before; he fancied, indeed, that he had been invited, but absorbed in his own cares he had paid no attention. Inquiring of Madame Lippevechsel who was busy laying the table while Katerina Ivanovna was away at the cemetery, he heard that the entertainment was to be a great affair, that all the lodgers had been invited, among them some who had not known the dead man, that even Andrey Semyonovitch Lebeziatnikov was invited in spite of his previous quarrel with Katerina Ivanovna, that he, Pyotr Petrovitch, was not only invited, but was eagerly expected as he was the most important of the lodgers. Amalia Ivanovna herself had been invited with great ceremony in spite of the recent unpleasantness, and so she was very busy with preparations and was taking a positive pleasure in them; she was moreover dressed up to the nines, all in new black silk, and she was proud of it. All this suggested an idea to Pyotr Petrovitch and he went into his room, or rather Lebeziatnikov's, somewhat thoughtful. He had learnt that Raskolnikov was to be one of the guests.

Andrey Semyonovitch had been at home all the morning. The attitude of Pyotr Petrovitch to this gentleman was strange, though perhaps natural. Pyotr Petrovitch had despised and hated him from the day he came to stay with him and at the same time he seemed somewhat afraid of him. He had not come to stay with him on his arrival in Petersburg simply from parsimony, though that had been perhaps his chief object. He had heard of Andrey Semyonovitch, who had once been his ward, as a leading young progressive who was taking an important part in certain interesting circles, the doings of which were a legend in the provinces. It had impressed Pyotr Petrovitch. These powerful omniscient circles who despised everyone and showed everyone up had long inspired in him a peculiar but quite vague alarm. He had not, of course, been able to form even an approximate notion of what they meant. He, like everyone, had heard that there were, especially in Petersburg, progressives of some sort, nihilists and so on, and, like many people, he exaggerated and distorted the significance of those words to an absurd degree. What for many years past he had feared more than anything was _being shown up_ and this was the chief ground for his continual uneasiness at the thought of transferring his business to Petersburg. He was afraid of this as little children are sometimes panic-stricken. Some years before, when he was just entering on his own career, he had come upon two cases in which rather important personages in the province, patrons of his, had been cruelly shown up. One instance had ended in great scandal for the person attacked and the other had very nearly ended in serious trouble. For this reason Pyotr Petrovitch intended to go into the subject as soon as he reached Petersburg and, if necessary, to anticipate contingencies by seeking the favour of "our younger generation." He relied on Andrey Semyonovitch for this and before his visit to Raskolnikov he had succeeded in picking up some current phrases. He soon discovered that Andrey Semyonovitch was a commonplace simpleton, but that by no means reassured Pyotr Petrovitch. Even if he had been certain that all the progressives were fools like him, it would not have allayed his uneasiness. All the doctrines, the ideas, the systems, with which Andrey Semyonovitch pestered him had no interest for him. He had his own object--he simply wanted to find out at once what was happening _here_. Had these people any power or not? Had he anything to fear from them? Would they expose any enterprise of his? And what precisely was now the object of their attacks? Could he somehow make up to them and get round them if they really were powerful? Was this the thing to do or not? Couldn't he gain something through them? In fact hundreds of questions presented themselves.

Andrey Semyonovitch was an anæmic, scrofulous little man, with strangely flaxen mutton-chop whiskers of which he was very proud. He was a clerk and had almost always something wrong with his eyes. He was rather soft-hearted, but self-confident and sometimes extremely conceited in speech, which had an absurd effect, incongruous with his little figure. He was one of the lodgers most respected by Amalia Ivanovna, for he did not get drunk and paid regularly for his lodgings. Andrey Semyonovitch really was rather stupid; he attached himself to the cause of progress and "our younger generation" from enthusiasm. He was one of the numerous and varied legion of dullards, of half-animate abortions, conceited, half-educated coxcombs, who attach themselves to the idea most in fashion only to vulgarise it and who caricature every cause they serve, however sincerely.

Though Lebeziatnikov was so good-natured, he, too, was beginning to dislike Pyotr Petrovitch. This happened on both sides unconsciously. However simple Andrey Semyonovitch might be, he began to see that Pyotr Petrovitch was duping him and secretly despising him, and that "he was not the right sort of man." He had tried expounding to him the system of Fourier and the Darwinian theory, but of late Pyotr Petrovitch began to listen too sarcastically and even to be rude. The fact was he had begun instinctively to guess that Lebeziatnikov was not merely a commonplace simpleton, but, perhaps, a liar, too, and that he had no connections of any consequence even in his own circle, but had simply picked things up third-hand; and that very likely he did not even know much about his own work of propaganda, for he was in too great a muddle. A fine person he would be to show anyone up! It must be noted, by the way, that Pyotr Petrovitch had during those ten days eagerly accepted the strangest praise from Andrey Semyonovitch; he had not protested, for instance, when Andrey Semyonovitch belauded him for being ready to contribute to the establishment of the new "commune," or to abstain from christening his future children, or to acquiesce if Dounia were to take a

lover a month after marriage, and so on. Pyotr Petrovitch so enjoyed hearing his own praises that he did not disdain even such virtues when they were attributed to him.

Pyotr Petrovitch had had occasion that morning to realise some five-per-cent bonds and now he sat down to the table and counted over bundles of notes. Andrey Semyonovitch who hardly ever had any money walked about the room pretending to himself to look at all those bank notes with indifference and even contempt. Nothing would have convinced Pyotr Petrovitch that Andrey Semyonovitch could really look on the money unmoved, and the latter, on his side, kept thinking bitterly that Pyotr Petrovitch was capable of entertaining such an idea about him and was, perhaps, glad of the opportunity of teasing his young friend by reminding him of his inferiority and the great difference between them.

He found him incredibly inattentive and irritable, though he, Andrey Semyonovitch, began enlarging on his favourite subject, the foundation of a new special “commune.” The brief remarks that dropped from Pyotr Petrovitch between the clicking of the beads on the reckoning frame betrayed unmistakable and discourteous irony. But the “humane” Andrey Semyonovitch ascribed Pyotr Petrovitch’s ill-humour to his recent breach with Dounia and he was burning with impatience to discourse on that theme. He had something progressive to say on the subject which might console his worthy friend and “could not fail” to promote his development.

“There is some sort of festivity being prepared at that... at the widow’s, isn’t there?” Pyotr Petrovitch asked suddenly, interrupting Andrey Semyonovitch at the most interesting passage.

“Why, don’t you know? Why, I was telling you last night what I think about all such ceremonies. And she invited you too, I heard. You were talking to her yesterday...”

“I should never have expected that beggarly fool would have spent on this feast all the money she got from that other fool, Raskolnikov. I was surprised just now as I came through at the preparations there, the wines! Several people are invited. It’s beyond everything!” continued Pyotr Petrovitch, who seemed to have some object in pursuing the conversation. “What? You say I am asked too? When was that? I don’t remember. But I shan’t go. Why should I? I only said a word to her in passing yesterday of the possibility of her obtaining a year’s salary as a destitute widow of a government clerk. I suppose she has invited me on that account, hasn’t she? He-he-he!”

“I don’t intend to go either,” said Lebeziatnikov.

“I should think not, after giving her a thrashing! You might well hesitate, he-he!”

“Who thrashed? Whom?” cried Lebeziatnikov, flustered and blushing.

“Why, you thrashed Katerina Ivanovna a month ago. I heard so yesterday... so that’s what your convictions amount to... and the woman question, too, wasn’t quite sound, he-he-he!” and Pyotr Petrovitch, as though comforted, went back to clicking his beads.

“It’s all slander and nonsense!” cried Lebeziatnikov, who was always afraid of allusions to the subject. “It was not like that at all, it was quite different. You’ve heard it wrong; it’s a libel. I was simply defending myself. She rushed at me first with her nails, she pulled out all my whiskers.... It’s permissable for anyone, I should hope, to defend himself and I never allow anyone to use violence to me on principle, for it’s an act of despotism. What was I to do? I simply pushed her back.”

“He-he-he!” Luzhin went on laughing maliciously.

“You keep on like that because you are out of humour yourself.... But that’s nonsense and it has nothing, nothing whatever to do with the woman question! You don’t understand; I used to think, indeed, that if women are equal to men in all respects, even in strength (as is maintained now) there ought to be equality in that, too. Of course, I reflected afterwards that such a question ought not really to arise, for there ought not to be fighting and in the future society fighting is unthinkable... and that it would be a queer thing to seek for equality in fighting. I am not so stupid... though, of course, there is fighting... there won’t be later, but at present there is... confound it! How muddled one gets with you! It’s not on that account that I am not going. I am not going on principle, not to take part in the revolting convention of memorial dinners, that’s why! Though, of course, one might go to laugh at it.... I am sorry there won’t be any priests at it. I should certainly go if there were.”

“Then you would sit down at another man’s table and insult it and those who invited you. Eh?”

“Certainly not insult, but protest. I should do it with a good object. I might indirectly assist the cause of enlightenment and propaganda. It’s a duty of every man to work for enlightenment and propaganda and the more harshly, perhaps, the better. I might

drop a seed, an idea.... And something might grow up from that seed. How should I be insulting them? They might be offended at first, but afterwards they'd see I'd done them a service. You know, Terebyeva (who is in the community now) was blamed because when she left her family and... devoted... herself, she wrote to her father and mother that she wouldn't go on living conventionally and was entering on a free marriage and it was said that that was too harsh, that she might have spared them and have written more kindly. I think that's all nonsense and there's no need of softness; on the contrary, what's wanted is protest. Varents had been married seven years, she abandoned her two children, she told her husband straight out in a letter: 'I have realised that I cannot be happy with you. I can never forgive you that you have deceived me by concealing from me that there is another organisation of society by means of the communities. I have only lately learned it from a great-hearted man to whom I have given myself and with whom I am establishing a community. I speak plainly because I consider it dishonest to deceive you. Do as you think best. Do not hope to get me back, you are too late. I hope you will be happy.' That's how letters like that ought to be written!"

"Is that Terebyeva the one you said had made a third free marriage?"

"No, it's only the second, really! But what if it were the fourth, what if it were the fifteenth, that's all nonsense! And if ever I regretted the death of my father and mother, it is now, and I sometimes think if my parents were living what a protest I would have aimed at them! I would have done something on purpose... I would have shown them! I would have astonished them! I am really sorry there is no one!"

"To surprise! He-he! Well, be that as you will," Pyotr Petrovitch interrupted, "but tell me this; do you know the dead man's daughter, the delicate-looking little thing? It's true what they say about her, isn't it?"

"What of it? I think, that is, it is my own personal conviction that this is the normal condition of women. Why not? I mean, _distinguons_. In our present society it is not altogether normal, because it is compulsory, but in the future society it will be perfectly normal, because it will be voluntary. Even as it is, she was quite right: she was suffering and that was her asset, so to speak, her capital which she had a perfect right to dispose of. Of course, in the future society there will be no need of assets, but her part will have another significance, rational and in harmony with her environment. As to Sofya Semyonovna personally, I regard her action as a vigorous protest against the organisation of society, and I respect her deeply for it; I rejoice indeed when I look at her!"

"I was told that you got her turned out of these lodgings."

Lebeziatnikov was enraged.

"That's another slander," he yelled. "It was not so at all! That was all Katerina Ivanovna's invention, for she did not understand! And I never made love to Sofya Semyonovna! I was simply developing her, entirely disinterestedly, trying to rouse her to protest.... All I wanted was her protest and Sofya Semyonovna could not have remained here anyway!"

"Have you asked her to join your community?"

"You keep on laughing and very inappropriately, allow me to tell you. You don't understand! There is no such rôle in a community. The community is established that there should be no such rôles. In a community, such a rôle is essentially transformed and what is stupid here is sensible there, what, under present conditions, is unnatural becomes perfectly natural in the community. It all depends on the environment. It's all the environment and man himself is nothing. And I am on good terms with Sofya Semyonovna to this day, which is a proof that she never regarded me as having wronged her. I am trying now to attract her to the community, but on quite, quite a different footing. What are you laughing at? We are trying to establish a community of our own, a special one, on a broader basis. We have gone further in our convictions. We reject more! And meanwhile I'm still developing Sofya Semyonovna. She has a beautiful, beautiful character!"

"And you take advantage of her fine character, eh? He-he!"

"No, no! Oh, no! On the contrary."

"Oh, on the contrary! He-he-he! A queer thing to say!"

"Believe me! Why should I disguise it? In fact, I feel it strange myself how timid, chaste and modern she is with me!"

"And you, of course, are developing her... he-he! trying to prove to her that all that modesty is nonsense?"

“Not at all, not at all! How coarsely, how stupidly--excuse me saying so--you misunderstand the word development! Good heavens, how... crude you still are! We are striving for the freedom of women and you have only one idea in your head.... Setting aside the general question of chastity and feminine modesty as useless in themselves and indeed prejudices, I fully accept her chastity with me, because that’s for her to decide. Of course if she were to tell me herself that she wanted me, I should think myself very lucky, because I like the girl very much; but as it is, no one has ever treated her more courteously than I, with more respect for her dignity... I wait in hopes, that’s all!”

“You had much better make her a present of something. I bet you never thought of that.”

“You don’t understand, as I’ve told you already! Of course, she is in such a position, but it’s another question. Quite another question! You simply despise her. Seeing a fact which you mistakenly consider deserving of contempt, you refuse to take a humane view of a fellow creature. You don’t know what a character she is! I am only sorry that of late she has quite given up reading and borrowing books. I used to lend them to her. I am sorry, too, that with all the energy and resolution in protesting--which she has already shown once--she has little self-reliance, little, so to say, independence, so as to break free from certain prejudices and certain foolish ideas. Yet she thoroughly understands some questions, for instance about kissing of hands, that is, that it’s an insult to a woman for a man to kiss her hand, because it’s a sign of inequality. We had a debate about it and I described it to her. She listened attentively to an account of the workmen’s associations in France, too. Now I am explaining the question of coming into the room in the future society.”

“And what’s that, pray?”

“We had a debate lately on the question: Has a member of the community the right to enter another member’s room, whether man or woman, at any time... and we decided that he has!”

“It might be at an inconvenient moment, he-he!”

Lebeziatnikov was really angry.

“You are always thinking of something unpleasant,” he cried with aversion. “Tfoo! How vexed I am that when I was expounding our system, I referred prematurely to the question of personal privacy! It’s always a stumbling-block to people like you, they turn it into ridicule before they understand it. And how proud they are of it, too! Tfoo! I’ve often maintained that that question should not be approached by a novice till he has a firm faith in the system. And tell me, please, what do you find so shameful even in cesspools? I should be the first to be ready to clean out any cesspool you like. And it’s not a question of self-sacrifice, it’s simply work, honourable, useful work which is as good as any other and much better than the work of a Raphael and a Pushkin, because it is more useful.”

“And more honourable, more honourable, he-he-he!”

“What do you mean by ‘more honourable’? I don’t understand such expressions to describe human activity. ‘More honourable,’ ‘nobler’--all those are old-fashioned prejudices which I reject. Everything which is _of use_ to mankind is honourable. I only understand one word: _useful_! You can snigger as much as you like, but that’s so!”

Pyotr Petrovitch laughed heartily. He had finished counting the money and was putting it away. But some of the notes he left on the table. The “cesspool question” had already been a subject of dispute between them. What was absurd was that it made Lebeziatnikov really angry, while it amused Luzhin and at that moment he particularly wanted to anger his young friend.

“It’s your ill-luck yesterday that makes you so ill-humoured and annoying,” blurted out Lebeziatnikov, who in spite of his “independence” and his “protests” did not venture to oppose Pyotr Petrovitch and still behaved to him with some of the respect habitual in earlier years.

“You’d better tell me this,” Pyotr Petrovitch interrupted with haughty displeasure, “can you... or rather are you really friendly enough with that young person to ask her to step in here for a minute? I think they’ve all come back from the cemetery... I heard the sound of steps... I want to see her, that young person.”

“What for?” Lebeziatnikov asked with surprise.

“Oh, I want to. I am leaving here to-day or to-morrow and therefore I wanted to speak to her about... However, you may be present during the interview. It’s better you should be, indeed. For there’s no knowing what you might imagine.”

“I shan’t imagine anything. I only asked and, if you’ve anything to say to her, nothing is easier than to call her in. I’ll go directly and you may be sure I won’t be in your way.”

Five minutes later Lebeziatnikov came in with Sonia. She came in very much surprised and overcome with shyness as usual. She was always shy in such circumstances and was always afraid of new people, she had been as a child and was even more so now.... Pyotr Petrovitch met her “politely and affably,” but with a certain shade of bantering familiarity which in his opinion was suitable for a man of his respectability and weight in dealing with a creature so young and so _interesting_ as she. He hastened to “reassure” her and made her sit down facing him at the table. Sonia sat down, looked about her--at Lebeziatnikov, at the notes lying on the table and then again at Pyotr Petrovitch and her eyes remained riveted on him. Lebeziatnikov was moving to the door. Pyotr Petrovitch signed to Sonia to remain seated and stopped Lebeziatnikov.

“Is Raskolnikov in there? Has he come?” he asked him in a whisper.

“Raskolnikov? Yes. Why? Yes, he is there. I saw him just come in.... Why?”

“Well, I particularly beg you to remain here with us and not to leave me alone with this... young woman. I only want a few words with her, but God knows what they may make of it. I shouldn’t like Raskolnikov to repeat anything.... You understand what I mean?”

“I understand!” Lebeziatnikov saw the point. “Yes, you are right.... Of course, I am convinced personally that you have no reason to be uneasy, but... still, you are right. Certainly I’ll stay. I’ll stand here at the window and not be in your way... I think you are right...”

Pyotr Petrovitch returned to the sofa, sat down opposite Sonia, looked attentively at her and assumed an extremely dignified, even severe expression, as much as to say, “don’t you make any mistake, madam.” Sonia was overwhelmed with embarrassment.

“In the first place, Sofya Semyonovna, will you make my excuses to your respected mamma.... That’s right, isn’t it? Katerina Ivanovna stands in the place of a mother to you?” Pyotr Petrovitch began with great dignity, though affably.

It was evident that his intentions were friendly.

“Quite so, yes; the place of a mother,” Sonia answered, timidly and hurriedly.

“Then will you make my apologies to her? Through inevitable circumstances I am forced to be absent and shall not be at the dinner in spite of your mamma’s kind invitation.”

“Yes... I’ll tell her... at once.”

And Sonia hastily jumped up from her seat.

“Wait, that’s not all,” Pyotr Petrovitch detained her, smiling at her simplicity and ignorance of good manners, “and you know me little, my dear Sofya Semyonovna, if you suppose I would have ventured to trouble a person like you for a matter of so little consequence affecting myself only. I have another object.”

Sonia sat down hurriedly. Her eyes rested again for an instant on the grey-and-rainbow-coloured notes that remained on the table, but she quickly looked away and fixed her eyes on Pyotr Petrovitch. She felt it horribly indecorous, especially for _her_, to look at another person’s money. She stared at the gold eye-glass which Pyotr Petrovitch held in his left hand and at the massive and extremely handsome ring with a yellow stone on his middle finger. But suddenly she looked away and, not knowing where to turn, ended by staring Pyotr Petrovitch again straight in the face. After a pause of still greater dignity he continued.

“I chanced yesterday in passing to exchange a couple of words with Katerina Ivanovna, poor woman. That was sufficient to enable me to ascertain that she is in a position--preternatural, if one may so express it.”

“Yes... preternatural...” Sonia hurriedly assented.

“Or it would be simpler and more comprehensible to say, ill.”

“Yes, simpler and more comprehen... yes, ill.”

“Quite so. So then from a feeling of humanity and so to speak compassion, I should be glad to be of service to her in any way, foreseeing her unfortunate position. I believe the whole of this poverty-stricken family depends now entirely on you?”

“Allow me to ask,” Sonia rose to her feet, “did you say something to her yesterday of the possibility of a pension? Because she told me you had undertaken to get her one. Was that true?”

“Not in the slightest, and indeed it’s an absurdity! I merely hinted at her obtaining temporary assistance as the widow of an official who had died in the service--if only she has patronage... but apparently your late parent had not served his full term and had not indeed been in the service at all of late. In fact, if there could be any hope, it would be very ephemeral, because there would be no claim for assistance in that case, far from it.... And she is dreaming of a pension already, he-he-he!... A go-ahead lady!”

“Yes, she is. For she is credulous and good-hearted, and she believes everything from the goodness of her heart and... and... and she is like that... yes... You must excuse her,” said Sonia, and again she got up to go.

“But you haven’t heard what I have to say.”

“No, I haven’t heard,” muttered Sonia.

“Then sit down.” She was terribly confused; she sat down again a third time.

“Seeing her position with her unfortunate little ones, I should be glad, as I have said before, so far as lies in my power, to be of service, that is, so far as is in my power, not more. One might for instance get up a subscription for her, or a lottery, something of the sort, such as is always arranged in such cases by friends or even outsiders desirous of assisting people. It was of that I intended to speak to you; it might be done.”

“Yes, yes... God will repay you for it,” faltered Sonia, gazing intently at Pyotr Petrovitch.

“It might be, but we will talk of it later. We might begin it to-day, we will talk it over this evening and lay the foundation so to speak. Come to me at seven o’clock. Mr. Lebeziatnikov, I hope, will assist us. But there is one circumstance of which I ought to warn you beforehand and for which I venture to trouble you, Sofya Semyonovna, to come here. In my opinion money cannot be, indeed it’s unsafe to put it into Katerina Ivanovna’s own hands. The dinner to-day is a proof of that. Though she has not, so to speak, a crust of bread for to-morrow and... well, boots or shoes, or anything; she has bought to-day Jamaica rum, and even, I believe, Madeira and... and coffee. I saw it as I passed through. To-morrow it will all fall upon you again, they won’t have a crust of bread. It’s absurd, really, and so, to my thinking, a subscription ought to be raised so that the unhappy widow should not know of the money, but only you, for instance. Am I right?”

“I don’t know... this is only to-day, once in her life.... She was so anxious to do honour, to celebrate the memory.... And she is very sensible... but just as you think and I shall be very, very... they will all be... and God will reward... and the orphans...”

Sonia burst into tears.

“Very well, then, keep it in mind; and now will you accept for the benefit of your relation the small sum that I am able to spare, from me personally. I am very anxious that my name should not be mentioned in connection with it. Here... having so to speak anxieties of my own, I cannot do more...”

And Pyotr Petrovitch held out to Sonia a ten-rouble note carefully unfolded. Sonia took it, flushed crimson, jumped up, muttered something and began taking leave. Pyotr Petrovitch accompanied her ceremoniously to the door. She got out of the room at last, agitated and distressed, and returned to Katerina Ivanovna, overwhelmed with confusion.

All this time Lebeziatnikov had stood at the window or walked about the room, anxious not to interrupt the conversation; when Sonia had gone he walked up to Pyotr Petrovitch and solemnly held out his hand.

“I heard and _saw_ everything,” he said, laying stress on the last verb. “That is honourable, I mean to say, it’s humane! You wanted to avoid gratitude, I saw! And although I cannot, I confess, in principle sympathise with private charity, for it not only fails to eradicate the evil but even promotes it, yet I must admit that I saw your action with pleasure--yes, yes, I like it.”

“That’s all nonsense,” muttered Pyotr Petrovitch, somewhat disconcerted, looking carefully at Lebeziatnikov.

“No, it’s not nonsense! A man who has suffered distress and annoyance as you did yesterday and who yet can sympathise with the misery of others, such a man... even though he is making a social mistake--is still deserving of respect! I did not expect it indeed of you, Pyotr Petrovitch, especially as according to your ideas... oh, what a drawback your ideas are to you! How distressed you are for instance by your ill-luck yesterday,” cried the simple-hearted Lebeziatnikov, who felt a return of affection for Pyotr Petrovitch.

“And, what do you want with marriage, with _legal_ marriage, my dear, noble Pyotr Petrovitch? Why do you cling to this _legality_ of marriage? Well, you may beat me if you like, but I am glad, positively glad it hasn’t come off, that you are free, that you are not quite lost for humanity.... you see, I’ve spoken my mind!”

“Because I don’t want in your free marriage to be made a fool of and to bring up another man’s children, that’s why I want legal marriage,” Luzhin replied in order to make some answer.

He seemed preoccupied by something.

“Children? You referred to children,” Lebeziatnikov started off like a warhorse at the trumpet call. “Children are a social question and a question of first importance, I agree; but the question of children has another solution. Some refuse to have children altogether, because they suggest the institution of the family. We’ll speak of children later, but now as to the question of honour, I confess that’s my weak point. That horrid, military, Pushkin expression is unthinkable in the dictionary of the future. What does it mean indeed? It’s nonsense, there will be no deception in a free marriage! That is only the natural consequence of a legal marriage, so to say, its corrective, a protest. So that indeed it’s not humiliating... and if I ever, to suppose an absurdity, were to be legally married, I should be positively glad of it. I should say to my wife: ‘My dear, hitherto I have loved you, now I respect you, for you’ve shown you can protest!’ You laugh! That’s because you are incapable of getting away from prejudices. Confound it all! I understand now where the unpleasantness is of being deceived in a legal marriage, but it’s simply a despicable consequence of a despicable position in which both are humiliated. When the deception is open, as in a free marriage, then it does not exist, it’s unthinkable. Your wife will only prove how she respects you by considering you incapable of opposing her happiness and avenging yourself on her for her new husband. Damn it all! I sometimes dream if I were to be married, pfoo! I mean if I were to marry, legally or not, it’s just the same, I should present my wife with a lover if she had not found one for herself. ‘My dear,’ I should say, ‘I love you, but even more than that I desire you to respect me. See!’ Am I not right?”

Pyotr Petrovitch sniggered as he listened, but without much merriment. He hardly heard it indeed. He was preoccupied with something else and even Lebeziatnikov at last noticed it. Pyotr Petrovitch seemed excited and rubbed his hands. Lebeziatnikov remembered all this and reflected upon it afterwards.

CHAPTER II

It would be difficult to explain exactly what could have originated the idea of that senseless dinner in Katerina Ivanovna’s disordered brain. Nearly ten of the twenty roubles, given by Raskolnikov for Marmeladov’s funeral, were wasted upon it. Possibly Katerina Ivanovna felt obliged to honour the memory of the deceased “suitably,” that all the lodgers, and still more Amalia Ivanovna, might know “that he was in no way their inferior, and perhaps very much their superior,” and that no one had the right “to turn up his nose at him.” Perhaps the chief element was that peculiar “poor man’s pride,” which compels many poor people to spend their last savings on some traditional social ceremony, simply in order to do “like other people,” and not to “be looked down upon.” It is very probable, too, that Katerina Ivanovna longed on this occasion, at the moment when she seemed to be abandoned by everyone, to show those “wretched contemptible lodgers” that she knew “how to do things, how to entertain” and that she had been brought up “in a genteel, she might almost say aristocratic colonel’s family” and had not been meant for sweeping floors and washing the children’s rags at night. Even the poorest and most broken-spirited people are sometimes liable to these paroxysms of pride and vanity which take the form of an irresistible nervous craving. And Katerina Ivanovna was not broken-spirited; she might have been killed by circumstance, but her spirit could not have been broken, that is, she could not have been intimidated, her will could not be crushed. Moreover Sonia had said with good reason that her mind was unhinged. She could not be said to be insane, but for a year past she had been so harassed that her mind might well be overstrained. The later stages of consumption are apt, doctors tell us, to affect the intellect.

There was no great variety of wines, nor was there Madeira; but wine there was. There was vodka, rum and Lisbon wine, all of the poorest quality but in sufficient quantity. Besides the traditional rice and honey, there were three or four dishes, one of which consisted of pancakes, all prepared in Amalia Ivanovna’s kitchen. Two samovars were boiling, that tea and punch might be offered after dinner. Katerina Ivanovna had herself seen to purchasing the provisions, with the help of one of the lodgers, an unfortunate little Pole who had somehow been stranded at Madame Lippevechsel’s. He promptly put himself at Katerina Ivanovna’s disposal and had been all that morning and all the day before running about as fast as his legs could carry him, and very anxious that everyone should be aware of it. For every trifle he ran to Katerina Ivanovna, even hunting her out at the bazaar, at every instant called her “_Pani_.” She was heartily sick of him before the end, though she had declared at first that she could not have got on

without this “serviceable and magnanimous man.” It was one of Katerina Ivanovna’s characteristics to paint everyone she met in the most glowing colours. Her praises were so exaggerated as sometimes to be embarrassing; she would invent various circumstances to the credit of her new acquaintance and quite genuinely believe in their reality. Then all of a sudden she would be disillusioned and would rudely and contemptuously repulse the person she had only a few hours before been literally adoring. She was naturally of a gay, lively and peace-loving disposition, but from continual failures and misfortunes she had come to desire so _keenly_ that all should live in peace and joy and should not _dare_ to break the peace, that the slightest jar, the smallest disaster reduced her almost to frenzy, and she would pass in an instant from the brightest hopes and fancies to cursing her fate and raving, and knocking her head against the wall.

Amalia Ivanovna, too, suddenly acquired extraordinary importance in Katerina Ivanovna’s eyes and was treated by her with extraordinary respect, probably only because Amalia Ivanovna had thrown herself heart and soul into the preparations. She had undertaken to lay the table, to provide the linen, crockery, etc., and to cook the dishes in her kitchen, and Katerina Ivanovna had left it all in her hands and gone herself to the cemetery. Everything had been well done. Even the table-cloth was nearly clean; the crockery, knives, forks and glasses were, of course, of all shapes and patterns, lent by different lodgers, but the table was properly laid at the time fixed, and Amalia Ivanovna, feeling she had done her work well, had put on a black silk dress and a cap with new mourning ribbons and met the returning party with some pride. This pride, though justifiable, displeased Katerina Ivanovna for some reason: “as though the table could not have been laid except by Amalia Ivanovna!” She disliked the cap with new ribbons, too. “Could she be stuck up, the stupid German, because she was mistress of the house, and had consented as a favour to help her poor lodgers! As a favour! Fancy that! Katerina Ivanovna’s father who had been a colonel and almost a governor had sometimes had the table set for forty persons, and then anyone like Amalia Ivanovna, or rather Ludwigovna, would not have been allowed into the kitchen.”

Katerina Ivanovna, however, put off expressing her feelings for the time and contented herself with treating her coldly, though she decided inwardly that she would certainly have to put Amalia Ivanovna down and set her in her proper place, for goodness only knew what she was fancying herself. Katerina Ivanovna was irritated too by the fact that hardly any of the lodgers invited had come to the funeral, except the Pole who had just managed to run into the cemetery, while to the memorial dinner the poorest and most insignificant of them had turned up, the wretched creatures, many of them not quite sober. The older and more respectable of them all, as if by common consent, stayed away. Pyotr Petrovitch Luzhin, for instance, who might be said to be the most respectable of all the lodgers, did not appear, though Katerina Ivanovna had the evening before told all the world, that is Amalia Ivanovna, Polenka, Sonia and the Pole, that he was the most generous, noble-hearted man with a large property and vast connections, who had been a friend of her first husband’s, and a guest in her father’s house, and that he had promised to use all his influence to secure her a considerable pension. It must be noted that when Katerina Ivanovna exalted anyone’s connections and fortune, it was without any ulterior motive, quite disinterestedly, for the mere pleasure of adding to the consequence of the person praised. Probably “taking his cue” from Luzhin, “that contemptible wretch Lebeziatnikov had not turned up either. What did he fancy himself? He was only asked out of kindness and because he was sharing the same room with Pyotr Petrovitch and was a friend of his, so that it would have been awkward not to invite him.”

Among those who failed to appear were “the genteel lady and her old-maidish daughter,” who had only been lodgers in the house for the last fortnight, but had several times complained of the noise and uproar in Katerina Ivanovna’s room, especially when Marmeladov had come back drunk. Katerina Ivanovna heard this from Amalia Ivanovna who, quarrelling with Katerina Ivanovna, and threatening to turn the whole family out of doors, had shouted at her that they “were not worth the foot” of the honourable lodgers whom they were disturbing. Katerina Ivanovna determined now to invite this lady and her daughter, “whose foot she was not worth,” and who had turned away haughtily when she casually met them, so that they might know that “she was more noble in her thoughts and feelings and did not harbour malice,” and might see that she was not accustomed to her way of living. She had proposed to make this clear to them at dinner with allusions to her late father’s governorship, and also at the same time to hint that it was exceedingly stupid of them to turn away on meeting her. The fat colonel-major (he was really a discharged officer of low rank) was also absent, but it appeared that he had been “not himself” for the last two days. The party consisted of the Pole, a wretched looking clerk with a spotty face and a greasy coat, who had not a word to say for himself, and smelt abominably, a deaf and almost blind old man who had once been in the post office and who had been from immemorial ages maintained by someone at Amalia Ivanovna’s.

A retired clerk of the commissariat department came, too; he was drunk, had a loud and most unseemly laugh and only fancy--was without a waistcoat! One of the visitors sat straight down to the table without even greeting Katerina Ivanovna. Finally one person

having no suit appeared in his dressing-gown, but this was too much, and the efforts of Amalia Ivanovna and the Pole succeeded in removing him. The Pole brought with him, however, two other Poles who did not live at Amalia Ivanovna's and whom no one had seen here before. All this irritated Katerina Ivanovna intensely. "For whom had they made all these preparations then?" To make room for the visitors the children had not even been laid for at the table; but the two little ones were sitting on a bench in the furthest corner with their dinner laid on a box, while Polenka as a big girl had to look after them, feed them, and keep their noses wiped like well-bred children's.

Katerina Ivanovna, in fact, could hardly help meeting her guests with increased dignity, and even haughtiness. She stared at some of them with special severity, and loftily invited them to take their seats. Rushing to the conclusion that Amalia Ivanovna must be responsible for those who were absent, she began treating her with extreme nonchalance, which the latter promptly observed and resented. Such a beginning was no good omen for the end. All were seated at last.

Raskolnikov came in almost at the moment of their return from the cemetery. Katerina Ivanovna was greatly delighted to see him, in the first place, because he was the one "educated visitor, and, as everyone knew, was in two years to take a professorship in the university," and secondly because he immediately and respectfully apologised for having been unable to be at the funeral. She positively pounced upon him, and made him sit on her left hand (Amalia Ivanovna was on her right). In spite of her continual anxiety that the dishes should be passed round correctly and that everyone should taste them, in spite of the agonising cough which interrupted her every minute and seemed to have grown worse during the last few days, she hastened to pour out in a half whisper to Raskolnikov all her suppressed feelings and her just indignation at the failure of the dinner, interspersing her remarks with lively and uncontrollable laughter at the expense of her visitors and especially of her landlady.

"It's all that cuckoo's fault! You know whom I mean? Her, her!" Katerina Ivanovna nodded towards the landlady. "Look at her, she's making round eyes, she feels that we are talking about her and can't understand. Pfoo, the owl! Ha-ha! (Cough-cough-cough.) And what does she put on that cap for? (Cough-cough-cough.) Have you noticed that she wants everyone to consider that she is patronising me and doing me an honour by being here? I asked her like a sensible woman to invite people, especially those who knew my late husband, and look at the set of fools she has brought! The sweeps! Look at that one with the spotty face. And those wretched Poles, ha-ha-ha! (Cough-cough-cough.) Not one of them has ever poked his nose in here, I've never set eyes on them. What have they come here for, I ask you? There they sit in a row. Hey, _pan_!" she cried suddenly to one of them, "have you tasted the pancakes? Take some more! Have some beer! Won't you have some vodka? Look, he's jumped up and is making his bows, they must be quite starved, poor things. Never mind, let them eat! They don't make a noise, anyway, though I'm really afraid for our landlady's silver spoons... Amalia Ivanovna!" she addressed her suddenly, almost aloud, "if your spoons should happen to be stolen, I won't be responsible, I warn you! Ha-ha-ha!" She laughed turning to Raskolnikov, and again nodding towards the landlady, in high glee at her sally. "She didn't understand, she didn't understand again! Look how she sits with her mouth open! An owl, a real owl! An owl in new ribbons, ha-ha-ha!"

Here her laugh turned again to an insufferable fit of coughing that lasted five minutes. Drops of perspiration stood out on her forehead and her handkerchief was stained with blood. She showed Raskolnikov the blood in silence, and as soon as she could get her breath began whispering to him again with extreme animation and a hectic flush on her cheeks.

"Do you know, I gave her the most delicate instructions, so to speak, for inviting that lady and her daughter, you understand of whom I am speaking? It needed the utmost delicacy, the greatest nicety, but she has managed things so that that fool, that conceited baggage, that provincial nonentity, simply because she is the widow of a major, and has come to try and get a pension and to fray out her skirts in the government offices, because at fifty she paints her face (everybody knows it)... a creature like that did not think fit to come, and has not even answered the invitation, which the most ordinary good manners required! I can't understand why Pyotr Petrovitch has not come? But where's Sonia? Where has she gone? Ah, there she is at last! what is it, Sonia, where have you been? It's odd that even at your father's funeral you should be so unpunctual. Rodion Romanovitch, make room for her beside you. That's your place, Sonia... take what you like. Have some of the cold entrée with jelly, that's the best. They'll bring the pancakes directly. Have they given the children some? Polenka, have you got everything? (Cough-cough-cough.) That's all right. Be a good girl, Lida, and, Kolya, don't fidget with your feet; sit like a little gentleman. What are you saying, Sonia?"

Sonia hastened to give her Pyotr Petrovitch's apologies, trying to speak loud enough for everyone to hear and carefully choosing the most respectful phrases which she attributed to Pyotr Petrovitch. She added that Pyotr Petrovitch had particularly told her to say that, as soon as he possibly could, he would come immediately to discuss _business_ alone with her and to consider what could be done for her, etc., etc.

Sonia knew that this would comfort Katerina Ivanovna, would flatter her and gratify her pride. She sat down beside Raskolnikov; she made him a hurried bow, glancing curiously at him. But for the rest of the time she seemed to avoid looking at him or speaking to him. She seemed absent-minded, though she kept looking at Katerina Ivanovna, trying to please her. Neither she nor Katerina Ivanovna had been able to get mourning; Sonia was wearing dark brown, and Katerina Ivanovna had on her only dress, a dark striped cotton one.

The message from Pyotr Petrovitch was very successful. Listening to Sonia with dignity, Katerina Ivanovna inquired with equal dignity how Pyotr Petrovitch was, then at once whispered almost aloud to Raskolnikov that it certainly would have been strange for a man of Pyotr Petrovitch's position and standing to find himself in such "extraordinary company," in spite of his devotion to her family and his old friendship with her father.

"That's why I am so grateful to you, Rodion Romanovitch, that you have not disdained my hospitality, even in such surroundings," she added almost aloud. "But I am sure that it was only your special affection for my poor husband that has made you keep your promise."

Then once more with pride and dignity she scanned her visitors, and suddenly inquired aloud across the table of the deaf man: "Wouldn't he have some more meat, and had he been given some wine?" The old man made no answer and for a long while could not understand what he was asked, though his neighbours amused themselves by poking and shaking him. He simply gazed about him with his mouth open, which only increased the general mirth.

"What an imbecile! Look, look! Why was he brought? But as to Pyotr Petrovitch, I always had confidence in him," Katerina Ivanovna continued, "and, of course, he is not like..." with an extremely stern face she addressed Amalia Ivanovna so sharply and loudly that the latter was quite disconcerted, "not like your dressed up draggletails whom my father would not have taken as cooks into his kitchen, and my late husband would have done them honour if he had invited them in the goodness of his heart."

"Yes, he was fond of drink, he was fond of it, he did drink!" cried the commissariat clerk, gulping down his twelfth glass of vodka.

"My late husband certainly had that weakness, and everyone knows it," Katerina Ivanovna attacked him at once, "but he was a kind and honourable man, who loved and respected his family. The worst of it was his good nature made him trust all sorts of disreputable people, and he drank with fellows who were not worth the sole of his shoe. Would you believe it, Rodion Romanovitch, they found a gingerbread cock in his pocket; he was dead drunk, but he did not forget the children!"

"A cock? Did you say a cock?" shouted the commissariat clerk.

Katerina Ivanovna did not vouchsafe a reply. She sighed, lost in thought.

"No doubt you think, like everyone, that I was too severe with him," she went on, addressing Raskolnikov. "But that's not so! He respected me, he respected me very much! He was a kind-hearted man! And how sorry I was for him sometimes! He would sit in a corner and look at me, I used to feel so sorry for him, I used to want to be kind to him and then would think to myself: 'Be kind to him and he will drink again,' it was only by severity that you could keep him within bounds."

"Yes, he used to get his hair pulled pretty often," roared the commissariat clerk again, swallowing another glass of vodka.

"Some fools would be the better for a good drubbing, as well as having their hair pulled. I am not talking of my late husband now!" Katerina Ivanovna snapped at him.

The flush on her cheeks grew more and more marked, her chest heaved. In another minute she would have been ready to make a scene. Many of the visitors were sniggering, evidently delighted. They began poking the commissariat clerk and whispering something to him. They were evidently trying to egg him on.

"Allow me to ask what are you alluding to," began the clerk, "that is to say, whose... about whom... did you say just now... But I don't care! That's nonsense! Widow! I forgive you.... Pass!"

And he took another drink of vodka.

Raskolnikov sat in silence, listening with disgust. He only ate from politeness, just tasting the food that Katerina Ivanovna was continually putting on his plate, to avoid hurting her feelings. He watched Sonia intently. But Sonia became more and more anxious and distressed; she, too, foresaw that the dinner would not end peaceably, and saw with terror Katerina Ivanovna's growing

irritation. She knew that she, Sonia, was the chief reason for the ‘genteel’ ladies’ contemptuous treatment of Katerina Ivanovna’s invitation. She had heard from Amalia Ivanovna that the mother was positively offended at the invitation and had asked the question: “How could she let her daughter sit down beside _that young person_?” Sonia had a feeling that Katerina Ivanovna had already heard this and an insult to Sonia meant more to Katerina Ivanovna than an insult to herself, her children, or her father. Sonia knew that Katerina Ivanovna would not be satisfied now, “till she had shown those draggletails that they were both...” To make matters worse someone passed Sonia, from the other end of the table, a plate with two hearts pierced with an arrow, cut out of black bread. Katerina Ivanovna flushed crimson and at once said aloud across the table that the man who sent it was “a drunken ass!”

Amalia Ivanovna was foreseeing something amiss, and at the same time deeply wounded by Katerina Ivanovna’s haughtiness, and to restore the good-humour of the company and raise herself in their esteem she began, apropos of nothing, telling a story about an acquaintance of hers “Karl from the chemist’s,” who was driving one night in a cab, and that “the cabman wanted him to kill, and Karl very much begged him not to kill, and wept and clasped hands, and frightened and from fear pierced his heart.” Though Katerina Ivanovna smiled, she observed at once that Amalia Ivanovna ought not to tell anecdotes in Russian; the latter was still more offended, and she retorted that her “_Vater aus Berlin_ was a very important man, and always went with his hands in pockets.” Katerina Ivanovna could not restrain herself and laughed so much that Amalia Ivanovna lost patience and could scarcely control herself.

“Listen to the owl!” Katerina Ivanovna whispered at once, her good-humour almost restored, “she meant to say he kept his hands in his pockets, but she said he put his hands in people’s pockets. (Cough-cough.) And have you noticed, Rodion Romanovitch, that all these Petersburg foreigners, the Germans especially, are all stupider than we! Can you fancy anyone of us telling how ‘Karl from the chemist’s’ ‘pierced his heart from fear’ and that the idiot, instead of punishing the cabman, ‘clasped his hands and wept, and much begged.’ Ah, the fool! And you know she fancies it’s very touching and does not suspect how stupid she is! To my thinking that drunken commissariat clerk is a great deal cleverer, anyway one can see that he has addled his brains with drink, but you know, these foreigners are always so well behaved and serious.... Look how she sits glaring! She is angry, ha-ha! (Cough-cough-cough.)”

Regaining her good-humour, Katerina Ivanovna began at once telling Raskolnikov that when she had obtained her pension, she int

PREFACE

In this edition of my _Logic_, the text has been revised throughout, several passages have been rewritten, and some sections added. The chief alterations and additions occur in cc. i., v., ix., xiii., xvi., xvii., xx.

The work may be considered, on the whole, as attached to the school of Mill; to whose _System of Logic_, and to Bain's _Logic_, it is deeply indebted. Amongst the works of living writers, the _Empirical Logic_ of Dr. Venn and the _Formal Logic_ of Dr. Keynes have given me most assistance. To some others acknowledgments have been made as occasion arose.

For the further study of contemporary opinion, accessible in English, one may turn to such works as Mr. Bradley's _Principles of Logic_, Dr. Bosanquet's _Logic; or the Morphology of Knowledge_, Prof. Hobhouse's _Theory of Knowledge_, Jevon's _Principles of Science_, and Sigwart's _Logic_. Ueberweg's _Logic, and History of Logical Doctrine_ is invaluable for the history of our subject. The attitude toward Logic of the Pragmatists or Humanists may best be studied in Dr. Schiller's _Formal Logic_, and in Mr. Alfred Sidgwick's _Process of Argument_ and recent _Elementary Logic_. The second part of this last work, on the "Risks of Reasoning," gives an admirably succinct account of their position. I agree with the Humanists that, in all argument, the important thing to attend to is the meaning, and that the most serious difficulties of reasoning occur in dealing with the matter reasoned about; but I find that

a pure science of relation has a necessary place in the system of knowledge, and that the formulae known as laws of contradiction, syllogism and causation are useful guides in the framing and testing of arguments and experiments concerning matters of fact. Incisive criticism of traditionary doctrines, with some remarkable reconstructions, may be read in Dr. Mercier's _New Logic_.

In preparing successive editions of this book, I have profited by the comments of my friends: Mr. Thomas Whittaker, Prof. Claude Thompson, Dr. Armitage Smith, Mr. Alfred Sidgwick, Dr. Schiller, Prof. Spearman, and Prof. Sully, have made important suggestions; and I might have profited more by them, if the frame of my book, or my principles, had been more elastic.

As to the present edition, useful criticisms have been received from Mr. S.C. Dutt, of Cotton College, Assam, and from Prof. M.A. Roy, of Midnapore; and, especially, I must heartily thank my colleague, Dr. Wolf, for communications that have left their impress upon nearly every chapter.
